

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

v.4
1864

ENTERED, according to Act of Congress, in the year 1865, by
D. APPLETON AND COMPANY,
In the Clerk's Office of the District Court of the United States for the Southern District
of New York.

P R E F A C E .

THE flattering reception by the public of the previous volumes of this work, with the numerous testimonials of eminent individuals, has been such as to induce the publishers to believe that they have been successful in furnishing a truthful and valuable record of the great events of each year of the work. The same efforts have been made as heretofore, with increased earnestness, to secure the completeness and accuracy of the *ANNUAL CYCLOPÆDIA*, and to preserve it free from every mark of partisanship.

The events of the year 1864 have been more varied than those of any previous one during the war. The contest was carried on with an earnest purpose to make it, at once, decisive and final; and the reconstruction of States was commenced in the most thorough manner. Emancipation became a subject of State action, and was incorporated as a principle in the fundamental law of several of the States. In other parts of the world, although no extensive war has been waged, the discussions of principles and the agitation of the minds of men have been no less intense than in former years.

Among the numerous questions discussed in the United States were those respecting the relations of the insurrectionary States to the Union; the principles on which the reconstruction should be effected; the powers of the Federal Government; the amendment to the Constitution; the equality and rights of the colored men; the encroachments of military authority; the terms of peace; the exciting topics involved in a Presidential election; and the relations of foreign governments arising upon numerous international questions.

A detailed statement of the vast military and naval operations in this country is continued, which presents the movements of the armies day by day, and step by step, illustrated with complete topographical maps of the field, and the objects of those movements and their consequences; also the efforts of the humane through the Sanitary, Christian and Union Commissions to relieve the hardships of the soldiers and to aid refugees from the South.

The details of the internal affairs of the country embrace the replenishing of the armies North and South; the number and condition of the troops;

the important measures and debates in Congress ; the acts of State Legislatures and results of elections ; the finances of the Federal Government and of that of the insurrectionary States, and the important public measures of the latter ; the discussions relative to peace, and the efforts to obtain it ; the commerce of the country and the regulations for commercial intercourse with the South—and all these important occurrences comprised in the history of the nation.

The interesting events relating to foreign nations in all parts of the world are presented ; also the famous encyclical letter of the Pope, the manner of its reception, and the questions raised thereby.

In mechanical industry considerable progress has been made, especially in the department of military implements ; and inventions and improvements have been numerous also in other departments.

The applications of science to useful purposes have been pursued with much diligence, and interesting results are described.

Geographical explorations have been very actively continued in all quarters of the globe, and the discoveries which have followed are very carefully and fully presented.

The unusual enterprise which has been awakened by successfully refining and converting to various uses the article of Petroleum, has caused not less astonishment than the unbounded wealth which it is likely to yield to the country. The history of this branch of industry, including an investigation of all the scientific questions relating to Petroleum, has not been overlooked.

The record of Literature is not less important than in any previous year. By a reference to that title its most interesting features may be seen.

A notice of the principal religious denominations of the country states their branches, membership, views on civil affairs, and the progress of their distinctive opinions.

In no year has the number of distinguished men who closed their career been so large. A brief tribute has been paid to their memory.

All important documents, messages, orders, despatches, and letters from official persons, have been inserted entire.

 State officers, committees of legislative and other public bodies, principals of public institutions, whether benevolent, educational, reformatory, scientific, etc., will confer a favor by sending their printed reports and documents to the Publishers.

THE
ANNUAL CYCLOPÆDIA.

A

AFRICA. The whole of North Africa was, during some months of the year 1864, in an extraordinary fermentation, which was supposed to spring, in part, from the fanatical preaching and the influence of the Mohammedan priests. On the 8th of April an insurrection broke out among the Arabian tribes in Algeria against the French, which assumed very large dimensions. The natives were unable to obtain any lasting successes, but at the close of the year quiet was not wholly restored. (See FRANCE.) Simultaneously, a violent outbreak occurred in Tunis. A body of cavalry, which, under the command of Gen. Si-Far-Hat, was sent out to collect taxes, was murdered by the discontented tribes. The insurrection spread rapidly over a large portion of the Tunisian territory. The cause of the discontent was the doubling of the highly unpopular personal tax which at the beginning of the year 1864 was raised from 86 to 72 piastres, and the unpopularity of the courts which had been introduced in 1860. The insurgents, numbering from 15,000 to 20,000, took possession of the towns Kef-Kadgia, Kairvan, and others, and threatened the coast towns Monastir and Susa. The Bey of Tunis, Sidi-Mohammed El Sadak, on May 1, consented to the demanded abolition of the courts, but the insurgents, whose chief leader was Ali Ben Gahum, insisted on more concessions, especially on the dismissal of the Kasnadar (Minister), Sidi Mustafa. This, however, the Bey steadily refused to grant, and the insurrection continued. In July the Arabs marched again in force upon Tunis, and when they arrived within two leagues the army of the Bey surrendered. On the 28th of July the minister of the Bey officially informed the French consul-general of the pacification of the regency under the following conditions: The granting of an amnesty without reserve,

the reduction of the personal tax from 72 to 20 piastres, and the nomination, in the provinces, of Caid (native governors), instead of Mamelukes. The insurrection was, however, far from being completely subdued. While fourteen of the tribes were stated to have made their submission, forty others were said to continue in insurrection. One chief who signed the conditions of peace, was obliged to take refuge in Tunis, and several other chiefs who had manifested a wish for peace were killed. Most of the tribes demanded the dismissal of the Kasnadar. The French and Italian admirals despatched ships of war to watch the coast and to protect French and Italian subjects. The French admiral having learned that the Turkish flag had been substituted for that of Tunis, wrote a circular note, on the 26th of June, protesting against manifestations disavowed even by the Ottoman Government, and declaring that France would countenance no intervention in the established order of the regency. Toward the close of the year the insurrection began again to extend. The Arabs, who had submitted, threw off their allegiance to the Bey and surrounded the camp of Gen. Ruthen. On the 15th of December, Prince Alij set out with a body of troops for his relief.

The Government of Morocco seems to be disposed to favor reforms. Sir Moses Montefiore, who paid a visit to the Sultan of Morocco for the purpose of obtaining toleration and protection for the persecuted Jews of the empire, was entirely successful. A threatening difficulty with France, arising out of the assassination of a French subject, was promptly adjusted. The four principals charged with the deed were arrested, and the governor who assisted the flight of the criminals, was dismissed and also arrested.

Of all the native governments of Africa

Egypt is by far the most progressive. The commerce of Alexandria is increasing immensely, and the Viceroy says he hopes to see the time when the commerce of that city will demand of him his palace at Ras-el-tin for the purpose of building docks and warehouses. The difficulty between the Pasha and the Suez Canal Company was submitted to the arbitration of the Emperor of France, whose decision was adopted by both parties. At the annual general meeting of the shareholders of the Suez Canal Company it was stated by M. de Lesseps, the President of the Company, that the principal canal would be completed in 1867. The Egyptian Government also took vigorous measures for the prevention of the extensive slave trading expeditions on the White Nile. A slight misunderstanding between the American consul and the Egyptian Government was soon removed.

King Theodore of Abyssinia, who was formerly looked upon as a patron of Protestant missions, treated some of the missionaries with the most severe cruelties. The king, also, through the British consul at Massoowah, the port of Abyssinia on the African coast, sent proposals of marriage to Queen Victoria of England, and when the consul declined to transmit this offer to England he was imprisoned at Guada, King Theodore's capital. At the close of the year the English had not yet succeeded in obtaining the release of the imprisoned consul.

The doubts concerning the death of King Radama of Madagascar continued in the Island, and manifestations and movements in his favor were several times renewed. On the 18th of May an attack was made upon the palace, but repulsed, and eighteen of the ringleaders put to death. The prime minister having, while intoxicated, insulted the queen, was deposed from his office. His successor ordered the expulsion of several foreigners who for fifteen years had been in the service of the Government. The progress of the Christian missions in the capital and the surrounding country was, however, uninterrupted.

On the Gold Coast the English were again engaged in a war with the King of Ashantee, in which the British troops suffered very severely from the climate.

The King of Dahomey made war upon Abbeokuta, but was repulsed with immense losses in killed and prisoners.

In the English colonies a considerable sensation was produced by the deposition of Bishop Colenso of Natal, at a synod of the Anglican bishops of South Africa. (See *ANGLO-AMERICAN CHURCH*.)

AGRICULTURE. While the war has interfered with production in some of the border States, and notably in Kentucky, Missouri, Maryland, and Virginia, and has rendered it impossible to obtain any full statistics from the States in insurrection, the year has been one of agricultural prosperity in most of the

States of the North and Northwest. The long drought of June and July, which it was at one time supposed would greatly diminish and perhaps destroy the corn and potato crops, proved less injurious than was feared. The corn crop was everywhere much larger than in 1863, when it was about three-fourths an average crop, but was not quite equal to that of 1862, though much nearer to it than was at first expected. Maine, New Hampshire, New Jersey, Maryland, Kentucky, Michigan, Indiana, Missouri, Kansas, and Nebraska Territory, reported materially reduced crops of corn as compared with the crop of 1862, while Rhode Island, Iowa, Minnesota, and West Virginia were largely beyond even that year of plenty in their production, and Connecticut, Delaware, Illinois and Wisconsin were fully equal to it. In potatoes there was a diminution of about 2,700,000 bushels from the crop of 1863, and of about 16,320,000 bushels from the crop of 1862. The heaviest reduction was in the Northwestern States, Michigan, Indiana, Illinois, Missouri, Wisconsin, Iowa, Kansas, and Nebraska reporting not over three-fourths of a crop, as compared with 1862. Maine, New Hampshire, New York, and Ohio yielded nearly as large quantities as in 1862; and Vermont, Massachusetts, Connecticut, and West Virginia exceeded the production of that year.

The wheat crop was less in quantity by 17,262,000 bushels than that of 1862, and by about 18,000,000 than that of 1863, but its quality is greatly superior to that of 1863. The rye crop varied but a few thousand bushels from that of 1863, but was about 700,000 bushels less than in 1862. Oats were 6,500,000 bushels in excess of 1862, and 7,000,000 bushels in excess of 1863. Barley was about 2,500,000 bushels less than the crops of 1862 and 1863, which were nearly alike in amount. Buckwheat was fully up to the production of 1862, and 8,000,000 of bushels in excess of that of 1863. Potatoes, as we have already stated, were below the amount produced in 1863, fully one-seventh less than the crop of 1862. The hay crop was slightly below the crop of 1863, and about 8,000,000 of tons below that of 1862. The tobacco crop was materially less than in 1863, the principal falling off being in Kentucky, Missouri, and Maryland, and being due to the disturbed condition of those States, and partly perhaps also to the drought. The hop crop, which is confined mainly to a section of central New York, and a portion of New England, was materially less than in previous years, owing to the "blight" which entirely destroyed the product of many yards and deteriorated the quality of others. In 1862 the crop was about 80,000 bales of 200 pounds each; in 1863, 65,000 bales, a considerable portion of it inferior in quality; and in 1864 only 45,000 bales, much of it of poor quality. The crop of flax and flaxseed is nearly 25 per cent. in advance of that of the previous year, and is mainly the result of the

greater breadth sown. Sorghum has also increased in quantity in Illinois, the crop being one-quarter more than in 1862. The amount of cotton raised in the States north of the Ohio River is nearly 40 per cent. greater than in 1862. There has been a serious falling off in the quantity of root crops in all the States except Vermont, Connecticut, Delaware, Illinois, and West Virginia. The entire diminution of these crops is about 15 per cent. In the Eastern and Middle States the yield of apples, peaches, and pears was large, the markets being for a time glutted with peaches; but in the Western and Northwestern States the great frosts of the winter of 1863-'4 destroyed a large proportion of the fruit trees, and there was a scarcity of peaches and apples. The stock of apples in the market was so greatly reduced by exportation and the shortness of the crop, that in January, 1865, apples of ordinary quality brought from \$5.50 to \$8 per barrel at wholesale. The grape crop was fully up to the average, and larger quantities than usual were absorbed in the manufacture of wine. This has become a speciality at several points on the Hudson River, on the islands in and near Sandusky Bay, Lake Erie, in the vicinity of Cincinnati, Ohio, along the Missouri and Osage Rivers in Missouri, and in California. The production of wine in California has reached an extent and excellence which enables the wine-growers of that State to enter into successful competition with the great vineyards of Europe, and it is rapidly increasing.

There has been a heavy reduction in the number of swine fattened for market during the year, owing mainly to the scarcity of corn in 1863-'4. This reduction amounts probably to nearly 40 per cent. The receipt of live hogs in New York in 1862 was 1,098,712; in 1863, 1,096,773; in 1864, only 657,092. The falling off in the exports of pork from New York as compared with those of 1863, was 60,000 barrels, or one-third; of cut meats, 88,000,000 pounds, or very nearly one-half; and of lard, 77,000,000 pounds, or about two-thirds. In Cincinnati and Chicago the amount of pork packed was larger than in 1863, but this was at the expense of the smaller packing points. The number of hogs packed in the packing season of 1863-'4 was 3,389,427. The season of 1864-'5 is not yet (January, 1865) closed, but it is estimated that the number packed will be not far from 2,500,000. The number of swine in stock in 1864 in the loyal States, is estimated by the Commissioner of Agriculture to have been 16,140,712, a reduction of nearly a million since 1859. Of other farm stock, the number, according to his careful and reliable estimates, were as follows: Horses, 4,049,142; mules, 280,847; bulls and working cattle, 7,965,489; cows, 6,066,748; sheep, 24,346,891. The only considerable increase in live stock since 1859 (the year reported in the Census of 1860) is in sheep. The number of

horses, mules, and swine has slightly decreased from the great demand of the war; the number of working cattle and cows has remained nearly stationary from the same cause, but the number of sheep has increased 9,242,119. The clip of wool for the year, it is thought, will not fall much short of 100,000,000 pounds, while the consumption is about 150,000,000 pounds. The climate of California is found well adapted to wool growing, and the sheep are sheared twice a year there. The fall clip, the growth of the summer months, is short, dry, and brittle, and of inferior quality, answering to the low-priced India wools. Kansas and Nebraska, Central Illinois, and Texas are also excellent climates for wool growing, and the present price of wool has greatly developed the production of that staple.

The production of molasses and sugar from the sorghum has increased during the year. The syrup or molasses is now refined on a large scale at Chicago and Cincinnati, and the result is very satisfactory; the unpleasant taste which had proved a serious objection to its use being removed by the refining process, and a syrup resulting which differs but little from the best sugar-house syrups of Stuarts, Woolsey, and other refiners. There seems to be a difficulty in making sugar from most of the sorghum molasses, probably from the fact that the cane is seldom perfectly matured when crushed. Small quantities of fair sugar have been produced, but for the most part it is used only in the form of molasses or syrup. Within the past two years the attempt has been made on a large scale in Illinois to cultivate the sugar-beet for the production of sugar. It is yet too early to pronounce definitely on the success of the enterprise, but it promises fairly. Four hundred and eighty thousand tons, one-sixth of all the sugar used in the world, is now produced from the sugar-beet, mainly in France and its colonies, and there seems no good reason why we should not produce it as successfully as other nations. The amount of sugar produced from the maple shows a considerable increase over previous years, the season having been a favorable one, and the high prices of sugars creating an unusual demand for it.

Of leguminous plants (peas and beans) the crop is somewhat less than in 1863, the falling off being mainly in peas, the bean crop being nearly or quite an average one. This crop has greatly increased in importance from the large army demand for it. The production of butter and cheese is nearly identical with that of 1863, but owing to the increased export demand and the depreciation of the currency, remarkably high prices have ruled for all dairy products.

The following tables give the production of the principal staple agricultural products in each of the loyal States and Territories in 1864, as compared with the returns of 1862 and 1863. They are from the valuable bi-monthly reports of the Agricultural Department:

TABLE SHOWING THE AMOUNTS OF THE PRINCIPAL CROPS OF 1864, IN BUSHELS &c., AS ESTIMATED FROM THE RETURNS OF CORRESPONDENTS, COMPARED WITH THE CROPS OF 1863 AND 1862

STATES.	WHEAT.			RYE.			BARLEY.			OATS.

GRAPE CULTURE.—The culture of the grape, both for wine-making and for table purposes, has come to be one of the largest agricultural interests in some sections of the country, and is proceeding with rapid strides. The grape is cultivated in almost every township of the Northern States for table use, and there has been for several years past an extraordinary rivalry in regard to the varieties best adapted for cultivation for this purpose. It seems to be very generally conceded that the Isabella, a favorite table-grape in Southern New York, Pennsylvania, and elsewhere, is more subject to the blight, and is a less fruitful bearer than some other varieties. The Catawba, a favorite wine-grape in some sections, is liable to rot, and is hardly equal for the table to other varieties. The Hartford Prolific, which is earlier by two weeks than any other of the popular grapes, is an abundant bearer, but is thick-skinned and not particularly fine flavored. The Concord, an admirable grape, is not very prolific, and does not succeed very well north of latitude 46°. The Delaware, also an excellent grape and more hardy, is not usually a free bearer; and, owing to attempts to propagate it from immature buds, has fallen into undeserved disrepute. The Iona, a seedling produced by C. W. Grant, a vine-grower at Iona Island on the Hudson, has been adjudged, during the past year, the premium offered by Hon. Horace Greeley for the best table-grape in all respects. Dr. Grant claims for it, and his claim seems to be maintained, that it is early, a good bearer, not subject to blight or rot, of fine flavor and thin skin. This grape can hardly fail to have an extensive introduction. Of other varieties having a local reputation, are the Adirondac of Northern New York, the Maxatawny, a favorite in Pennsylvania, the Cuyahoga, Lydia, and Mottled, originating in Northern Ohio, and much liked there; the Clinton, a hardy

but not very palatable variety; the Diara, which has not maintained its first reputation, and the Israella, a new seedling of Dr. Grant's, which may prove valuable. Of the strictly wine-grapes, the Norton's Virginia seedling and the Herbemont are highly prized.

The culture of the grape for wine-making is now extensively prosecuted in five localities, and a sixth is about entering very largely upon its production. These are: 1st. Iona Island and Croton Point on the Hudson, where Dr. Grant and Mr. Underhill have extensive vineyards; the Isabella, Catawba, and Iona being the principal varieties cultivated for wine. 2d. The Cincinnati Wine district, extending fifteen or twenty miles around that city, in which the Catawba is almost exclusively raised. 3d. The Northern Ohio Wine district, embracing two distinct sections: one from five to twenty miles east and west of Cleveland along the lake shore, and raising the Cuyahoga, Catawba, Norton's Virginia, and other wine-grapes; and the Island Vineyards in Ottawa County, embracing Danbury and Catawba Island townships on the mainland, and Put-in-Bay township, including the three islands of South, Middle, and North Bass in Lake Erie. Here the Catawba grape stands preëminent, though some others are cultivated. 4th. The Missouri Wine district, of which Hermann on the Missouri River is the centre, and which extends for fifteen or twenty miles around it. Here the Norton's Virginia seedling is preferred, though many are cultivating the Herbemont and some the Catawba and the Delaware. 5th, and *par excellence* the Wine region of America, California. The largest wine-producing counties are Los Angeles, Anaheim, Santa Clara and Sonoma, but there are considerable vineyards in other counties.

There have been more than twelve millions of vines set in the State, and eleven-twelfths of them within the past seven years. The Mission grape, an old and perhaps indigenous variety, is as yet the most abundant of the bearing vines; but all the European and Eastern varieties have been set, and most of them are doing well in the fine deep soil of the State. One million five hundred thousand gallons of wine were sent to market in 1864, and it is believed that the product of 1865 will not fall short of two and a half million gallons. The wines of the State are of excellent quality, and improve with age.

A sixth wine district is about coming into notice in Central Illinois; some of the prairie lands proving well adapted to grape-culture. These various wine districts, like those in Europe, not only require different varieties of the grape, but make wine of different qualities, and adopt different modes of cultivation, and different processes in the manufacture of the wine. The northernmost wine districts usually dwarf their vines; and whether cultivating the Catawba, the Cuyahoga, the Delaware, or the Iona, train them to short posts, giving them

the benefit of as much sun as possible. The wines produced in these districts are generally light in body or in the per cent. of alcohol they contain, and somewhat acidulous, resembling the Rhenish wines and clarets in strength. In the Missouri district the vines are trained on trellis, and the Norton's Virginia and Herbemont grapes are preferred. The wine is stronger, and resembles Port in color, astringency, and percentage of alcohol. In California wines of all grades are made; most of their best wines, however, have considerable body, and some of them a decided astringency. The California Port and Sherry are not inferior in quality to their European congeners. The *Muscatel* and *Angelica* seem to be rather cordials than wines, containing from 22 to 30 per cent. of alcohol, and, it is said, are made by adding brandy to the unfermented must, and clarifying. They contain about 16 per cent. of grape-sugar.

Careful investigations have been made within the last year, to ascertain the aggregate number of degrees of heat requisite during the season or cycle of growth to perfecting our best known varieties of grapes, and the temperature necessary at the commencement of growth, the average mean of the summer, the mean temperature of the hottest month, and the mean temperature of September, required by each. These particulars are of great importance to vine-growers as a guide to the variety of grape best adapted to their purpose. They have been made the subject of an elaborate and able paper by Mr. James S. Lippen-cott, of Haddonfield, New Jersey, in the Government Agricultural Report for 1863. We can only briefly notice the conclusions at which he arrives. "Those places which have a summer temperature of 66.5°, a hot month of 70°, and a September of 60°, will ripen the Delaware, Clinton, Perkins, Logan, and some other very hardy varieties. The temperature of their growing season corresponds to a mean of 65° and upwards, and an aggregate of heat of about 8,000° F. This district includes many parts of New England and New York, Northern Pennsylvania, Northern Michigan, Wisconsin, and Iowa."

"Those places which have a summer of 70°, a hot month of 72°, and a September of 63°, will ripen the Concord, Hartford Prolific, Diana, Crevelling, &c. Their season of growth corresponds to a mean of 67°, and an aggregate of 8,500° and upwards. This district covers part of the southeast and south coast of New England, valleys of Hudson and Mohawk, neighborhood of the minor lakes in Western New York, southern border of Lake Ontario, Southern Michigan, Southern Wisconsin, etc."

"Those places which have a summer of 72°, a hot month of 78°, and a September of 65°, will ripen the Isabella and Rebecca. Their growing season corresponds to a mean of 70°, and an aggregate of 10,000° of heat. They are not found in the State of New York, except in

the southeast extremity, lower valley of the Hudson, and near some of the minor lakes, but appear on the southern border of Lake Erie, in Northern Indiana and Northern Illinois."

"Those places which enjoy a summer mean of 78°, a hot month of 75°, and a September of 65°, will ripen the Catawba and Anna. Their growing season corresponds to a mean of 72°, and an aggregate of 11,000°. They are not found north of New York City and vicinity, or the southeast counties of Pennsylvania, Middle New Jersey, or Southern Ohio, Indiana, Illinois, or Missouri. There is one exception to these localities, viz., the islands and peninsula near Sandusky, in Lake Erie, where the Catawba, owing to the effect of the water on the temperature, will ripen completely during most seasons."

"Those places which bask under a glowing summer of 74°, a hot month of 75°, and a September of 75°, like Los Angeles County and some other portions of California, other circumstances being favorable, may ripen the most tender European wine grapes to perfection."

In 1862, at Waterloo, N. Y., the Delaware grape and the Hartford Prolific were 122 days from leafing to ripening; the Union Village, 125; the Clinton, 127; the Diana and Concord, 133; the Rebecca, 138; the Isabella and Catawba, 142; the To Kalon, 144; while the Anna was still unripe at the end of 154 days. The average temperature from leafing to maturity, was about 64.6°, that from leafing to blooming about 59°, the hottest month about 69°, and from bloom to ripening about 67.5°.

There is, however, another element which must enter into the possibility of the successful cultivation of the vine, viz., the amount of humidity in the climate. If the period from leafing to blooming be sufficiently humid to develop favorably these processes, the vine will succeed in maturing its grapes perfectly with a very slight amount of rain thereafter, provided only the heat is sufficient. The dry, and during the summer almost rainless, climate of California is better adapted to the cultivation of the grape than the rainy districts of Southern Oregon, or the lower portion of the Apalachian chain in East Tennessee, Western North and South Carolina, and Northern Georgia. In these the grape matures with difficulty, and lacks sweetness. Yet, from the greater equability of its temperature, an inland climate is preferable for the lighter wine-grapes to the mainland, notwithstanding its greater humidity, but will hardly produce the strong wines of a dryer and more tropical latitude. There are many indications that portions of Louisiana, Arkansas, and Texas, will yet prove the finest wine regions of the Atlantic slope, possessing, as they do, the qualifications of rich soil, genial temperature, and moderate humidity.

The following table exhibits the exports of produce from New York for 355 days of 1863 and 1864, and the prices ruling in December, 1864, in New York and Chicago:

NAMES OF PRODUCTS.	1864.	1865.	1864, December 31.	
	From Jan. 1 to Dec. 1.	From Jan. 1 to Dec. 31.	Prices at New York.	Prices at Chicago.

Pean.....do.....	5 58	8 08	9 10	10 45	10 60

The subjoined is a general summary of the crops of 1862, 1863, and 1864, giving the prices and values of the crops of 1862 and 1863, but the amount only of that of 1864, as the prices and values are not yet determined. It is known, however, that they will not fall below \$1,500,000,000, and may reach \$1,600,000,000. California, Oregon, and Kentucky are excluded in 1862 and 1863, and California and Oregon in 1864.

THE CROPS OF 1862, 1863, AND 1864.—GENERAL SUMMARY.

NAMES OF PRODUCTS.	1862.			1863.			1864.
	Amount.	Price.	Value.	Amount.	Price.	Value.	Amount.
Indian corn.....bushels...	\$ 80	\$9 84½	\$185,613,736	\$ 113	\$9 62½	\$ 309	580,581,408

			796,807,791			955,764,339	

For the sake of future comparison, a table is added showing the number of acres in each crop in 1863, the value of the crop, the price per bushel, &c., and the yield per acre:

The temperature and the average rain-fall in each State exert so much influence on the quantity and quality of the crops, that the following table, though not later than the close of 1863, cannot fail to be of great interest to all who are engaged in agricultural pursuits. The intelligent young farmer will find these tables an infallible guide in regard to the culture of some crops on which he might otherwise be disposed to venture. The cotton crop, which requires during the months of its growth a warm, moist climate, will not answer in California, because during those months the rain-fall is very scanty. Nor is that climate favorable to Indian corn, for the same reason. The tables for 1864 will appear in the next volume.

AIKIN, Miss LUOY, an English author and poet, born at Warrington, Eng., Nov. 6, 1781; died at Hampstead, Eng., Jan. 29, 1864. Miss Aikin belonged to a gifted and highly intellectually family, her grandfather having been classical and afterwards Divinity tutor in the Warrington academy, her father, Dr. John Aikin, being the well-known author and poet, and, in conjunction with his sister, Mrs. Anna Lætitia Barbauld, the author of that excellent juvenile classic "Evenings at Home." Miss Aikin was educated under her father's direction, and her literary attainments were far beyond those of almost any woman of her time, embracing a very thorough familiarity with the principal French and Italian authors and the Latin classics, as well as a profound acquaintance with English history and literature. In 1810 she published her first poetical work, "Epistles on Women," though she had previously assisted her father and aunt in some of their books. The "Epistles" is characterized by a smooth and polished versification, and terseness and compactness of language, and her style is evidently formed on the model of that of Pope, the master-spirit of the latter part of the last century. In 1814 appeared "Lorimer, a Tale," a work of considerable ability; but Miss Aikin had been for some years preparing for a higher flight in literature. After years of study and critical reading and comparison, she published, in 1818, her "Memoirs of the Court of Queen Elizabeth," comprehending in it the private life of the queen and the domestic life of the period, anecdotes and biographies of the principal members of her court, and notices of the manners, opinions, and literature of the age. The work received, as it merited, the hearty approbation of Professor Smythe, Sir Henry Hallam, and other eminent historians. In 1822 this was followed by "Memoirs of the Court of James I.," a well-written work, but relating to a period inferior in interest to that of Elizabeth. In 1828 she published a memoir of her father, who had died the preceding year, and in 1825 one of her aunt, Mrs. Barbauld. She then resumed her historic studies, and in 1833 produced her "Memoirs of the Court and Reign of Charles I.," and ten years later, "Memoirs of Addison." This was her last important work. Her later years were spent in quiet enjoyment in the family of her niece at Wimbledon and Hampstead, where, amid a large circle of valued friends, she held a court of her own, her rare conversational powers and her high intellectual attainments making her the constant centre of attraction.

ALABAMA. The military operations of 1864 touched the State of Alabama only on its northern and southern border. On the north, these operations were confined to the line of railroad from Memphis to Chattanooga. On the south, the forts at the entrance of Mobile harbor were captured by the Navy—

(See NAVAL OPERATIONS)—and a raid was made by a Federal force from the neighborhood of Pensacola to Pollard. The force consisting of two thousand cavalry, started on December 18th, and reached Pollard on the morning of the 16th. The railroad depot, eight cars loaded chiefly with grain, the railroad and Quartermaster's store-houses, in which were tents, boxes of haversacks, canteens, knapsacks, harnesses, and Quartermaster's property in abundance, the Commissary's store-houses, filled with meal, corn, a number of barrels of soft soap, some flour, etc., and the ordnance building, with some two thousand stand of arms, and a large stock of accoutrements, were destroyed. A trestle bridge, three miles from the town, and small crossings of numerous streams, were burned. Some skirmishing took place on the return of the expedition, causing a loss of seventy-five in killed, wounded, and missing.

The two most important cities in the State are Selma and Mobile. The former is on the west bank of the Alabama River, fifty-six miles west of Montgomery, the capital, and three hundred and eight miles above Mobile by the river: as a shipping point for iron, coal, ammunition and Commissary stores, it is of the highest importance to the Confederacy. There are manufactories of shot, shell, torpedoes, cannon, powder, canteens, and clothing. Naval foundries are located there, and a navy yard, at which iron-clad batteries are constructed; also private establishments for the manufacture of cotton cards, wagons, ambulances, and nitre. It is the terminus of the Alabama and Tennessee Railroad, over which is brought immense quantities of coal and iron. Ten miles west are the saltworks of Alabama, which have furnished the largest portion of salt used in Alabama, Mississippi, and Western Georgia, during the last two years.

An extra session of the Legislature was called by the Governor, in September, to devise measures for the defence of the State. That body neither adopted the Governor's suggestions nor substituted any of their own. Some resolutions in favor of reconstruction on the plan proposed by the Chicago Convention, were introduced and discussed, but no public measure was adopted. After two weeks, an adjournment took place. At the regular session in November, the Governor, in his Message, discussed at much length the question of reconstruction through a convention, and denounced it as impracticable. With regard to reconstruction he said: "Who would desire a political union with those who have murdered our sons, outraged our women, and with demoniac malice wantonly destroyed our property, and now seek to make slaves of us? The voices from the graves of two hundred thousand fallen heroes would blanch the cheeks of the recreant who would propose it. The hoarse shout of four hundred thousand living heroes now with arms in their hands, fighting

for liberty and independence, would forbid it! If attempted by those at home, away from the danger and carnage of battle, the consequence would be fearful. A civil war in fact would be inaugurated, and the red stream of eternal strife, swelling like the molten lava from some volcanic crater through every avenue of these States, would flow, annihilating, deluging with its burning avalanche, every landmark of civilization." He stated that a convention of the Governors of North Carolina, Mississippi, Virginia, and Alabama was held at Augusta, Ga., on February 17th, at which several resolutions relating to public affairs were adopted. One urging the use of negroes in the army he recommended to the Legislature to repudiate, as a measure both unconstitutional and destructive to the interests of the States.

Other events besides the divided sentiment of the Legislature, and the arguments of the Governor, indicated not only a universal desire of the people for peace, but a disposition among a portion of them to return to the Union. Some public meetings were held in the northern part of the State early in the year, for this object, and addressed by distinguished citizens. But as the views of the authorities were opposed to such action, nothing could be accomplished.

Freedmen's camps were established on deserted plantations in the northern part of the State, and five thousand old men, women, and children collected in them. The able-bodied men were in the Federal army. About two thousand acres of land were thus put under cultivation.

AMERICA. The American continent continued throughout the year 1864 to be the scene of grand and stirring events.

In the United States, the civil war was prosecuted with unabated vigor. At the Presidential election, on the 8th of November, President Lincoln was reelected for another term of four years, receiving the electoral votes of twenty-two out of the twenty-five States in which a full vote was taken. The States of Louisiana and Maryland adopted new State Constitutions, by which slavery is abolished, and Missouri elected, on the 8th of November, a convention pledged to pass an ordinance of immediate emancipation early in January, 1865. A motion in Congress so to amend the Constitution of the United States as to prohibit slavery, received the required two-thirds' majority in the Senate, but failed the House.

In Mexico, the war between the Republican Government and the French and their allies likewise continued throughout the year. With many delays the Archduke Maximilian finally accepted the proffered crown, abandoned his reactionary interests in the Empire of Austria, and sailed for Mexico in the month of April. President Juarez retired before the overwhelming numbers of his adversaries, who advanced in the northeast to the Rio Grande. Juarez found a refuge in the mountains of Chihuahua, while Gens. Porfirio Diaz and

Arteaga, at the close of the year, were still in command of considerable armies in the Pacific States of Central Mexico. Maximilian was recognized by most of the European States, but the House of Representatives of the United States Congress by a unanimous vote reasserted the Monroe doctrine. Maximilian appeared to be very anxious to conciliate the Liberal party, and toward the close of the year announced his intention to ratify the past sales of church property. (*See MEXICO.*)

A highly important project of federation was started in British America. A sectional conflict between Upper and Lower Canada was terminated by a coalition of parties under a ministry which undertook to form a great colonial federation. A scheme for the New Constitution was framed by a convention of delegates from all the provinces, and it was commonly expected that it would be acceptable to the people of the several provinces, and be ratified by the Home Government. The confederation is to embrace at first the two Canadas, New Brunswick, New Foundland, Nova Scotia, and Prince Edward's Island, and gradually to take in the rest of the British dominions of North America. (*See CANADA.*)

In South America, upon the invitation of Peru, a congress of plenipotentiaries of the South American Republics assembled at Lima on the 14th of November. The congress, on opening, was composed of the plenipotentiaries of Chili, Peru, Bolivia, the Argentine Republic, Ecuador, the United States of Colombia, and Venezuela. Later a plenipotentiary for Guatemala was added. The object of this congress is to effect a close alliance between all the republics of Spanish America; especially for the purpose of resisting the encroachments of European powers upon this continent. (*See PERU.*)

A new act of lawless aggression was committed by Spain, in seizing the Peruvian Chincha Islands. The alleged cause was the failure of the Peruvian Government to give full satisfaction for a wrong done to a citizen of Spain upon Peruvian territory. The aggressive act of Spain produced throughout South America the greatest excitement. The Governments and people of most of the republics declared their determination to aid Peru in case of a war. When the South American congress met its first resolution was to make the cause of Peru the common cause of all the republics. Before, however, declaring war against Spain, it was resolved first to try again the effect of negotiations. (*See PERU.*)

The people of San Domingo heroically continued their war against Spain, to which power the republic had been treacherously sold in 1861 by the late President Santana. The Spaniards made hardly any progress in the subjugation of the Island, and the murderous climate decimated the ranks of the Spanish army to a fearful extent. At the same time the drain of the war upon the Spanish finances was so heavy that at the close of the year the

cabinet of Marshal Narvaez insisted upon abandoning San Domingo. (*See SPAIN and SAN DOMINGO.*)

The war which existed at the beginning of the year between the United States of Colombia and Ecuador was soon after terminated by a compromise. A revolution in Ecuador against the Conservative Government of Gen. Moreno was promptly suppressed and the leaders executed. In Venezuela the civil war was brought to a close.

The civil war in the republic of Uruguay continued throughout the whole year. Toward the close of the year the Government of Brazil, on the ground that the Government of Uruguay refused to give satisfaction for some grievances, threatened the latter republic with a declaration of war and even with annexation to Brazil. These reported intentions of Brazil produced a great excitement in the upper provinces of the Argentine Republic and in Paraguay, both of which feel deeply interested in withholding from Brazil the control of the mouth of the river La Plata. Both seemed to be determined to aid Uruguay. (*See BRAZIL and URUGUAY.*)

Chili, the Argentine Republic, Bolivia, and the republics of Central America, enjoyed an undisturbed peace, and made considerable progress in material prosperity. The cultivation of cotton, in particular, is increasing in all the republics of Central and South America, and largely adding to their exports and their wealth.

In all parts of the American continent the question of Inter-Oceanic Railroads, connecting the Pacific with the Atlantic, is exciting a great interest. The most important of these roads, the Union Pacific Railway, in the United States, is rapidly approaching completion.

In British America, the plan of an inter-oceanic railway, connecting the Atlantic and the Pacific provinces of the British dominions, has gained new importance in view of the projected confederation of all the provinces. In Chili, a passage through the Andes was discovered, which will greatly facilitate a connection, by railway, of the two oceans. The Imperial Government of Mexico is again inviting the attention of capitalists to the importance of the transit of Tehuantepec. It was also found that the Amazon is navigable nearly as far as its source, thus affording another transit route between the two oceans.

President Geffrard, of Hayti, in December, issued a proclamation to his people in which he tells them that though three insurrections had broken out within the past six months, they were all quelled and order completely restored. The condition of this republic, both politically and materially, is favorable. A treaty of amity, commerce, navigation, and extradition, was concluded between the United States and Hayti on the 8d of November. A similar treaty was concluded between Hayti and Liberia, which provides that slave trade shall be assimilated to piracy, and the vessels of the two States which may be engaged in the traffic

shall be judged and punished according to the laws in force in their respective countries against piracy.

AMPERE, JEAN JACQUES ANTOINE, a French author, born in Lyons, Aug. 18th, 1800; died March 27, 1864. He was the son of the celebrated mathematician André Marie Ampère, under whose direction his education was conducted, and who permitted, if he did not encourage him, to gratify an ardent taste for belles lettres and poetry, to which his own studies and inclinations were rather hostile. Of a natural independence of character, young Ampère early left the beaten tracks of literature, and associated himself with those new ideas about philosophy, literature, and history, which formed so remarkable a feature in the intellectual history of the early part of the 19th century. He evinced, in particular, a lively enthusiasm for the master-pieces of foreign literature, and before the age of 20 had acquired a considerable knowledge of the English, German, and Italian languages, beside acquainting himself with the best productions of French authors. Thrown from boyhood into the companionship of the scholars and men of letters who frequented his father's house, he gained the esteem of Balzac and Chateaubriand, by whom he was introduced to the polished circle which assembled at the saloon of Madame Recamier. To the influence which this association produced may be traced the refined judgment and artistic spirit which characterize the productions of his pen.

He commenced his literary career as a writer in the *Globe* and the *Revue Française*, established by Guizot to oppose the reactionary ministry of Charles X., and in 1830 commenced a course of lectures on literary history at the Athenæum in Marseilles. The first of these discourses appeared in 1831, under the title of "Essay on the History of Poetry." After the July revolution of 1830 he returned to Paris, lectured for a year or two at the Sorbonne, and in 1833 succeeded Andrieux in the chair of History and French Literature at the College of France, which he filled with great reputation for many years. Among the fruits of his labors in this field are his "Literary History of France previous to the 12th Century" (3 vols., 1839-'40), an introduction to the "History of French Literature in the Middle Ages" (1841), and "Formation of the French Language" (3 vols., 1841). He was also a frequent contributor to the *Revue des Deux-Mondes* and the *National*. In 1842 he succeeded Gérando at the Academy of Inscriptions, and in 1847 Guiraud at the French Academy. An irresistible love of travel led him at various times to visit many parts of the Old and of the New World, of which accounts appeared from time to time in the columns of the *Revue des Deux-Mondes*. Archaeologist, philosopher, and poet, as well as tourist, he endeavored, whether in Scandinavia, Germany, Italy, Egypt, Nubia, or North America, to see

things for himself, to accept no statements on trust, and, as far as possible, to bring the conclusions of science under the test of personal observation. Many of his papers on these subjects have been published under the title of "Literature and Travels," a book abounding in sprightly descriptions characterized alike by grace, wit, and erudition.

It was while reading De Tocqueville's "Democracy in America," during a trip up the Rhine, that Ampère conceived the desire and purpose to visit the United States, which he carried into effect in 1852-'53. His *Promenade en Amérique*, recording his tour, says a recent critic, "is singularly unpretending. It resembles in tone and method the best conversation. The style is pure and animated, and the thoughts naturally suggested. He describes what he sees with candor and geniality, criticizes without the slightest acrimony, and commends with graceful zeal. And yet, simple and unambitious as is the narrative, it affords a most agreeable, authentic, and suggestive illustration of De Tocqueville's theories." His remaining works comprise "Greece, Rome, and Dante," "Literary Studies after Nature" (1848), "Roman History at Rome" (1856), a novel and remarkably liberal application of archaeology to literature and politics, "Cæsar; Historic Scenes" (1859), etc., beside eulogies on Ballanche and Chateaubriand read before the Academy. His own eulogy was pronounced by Guizot, who bore testimony to his scholarly attainments, critical abilities, and a rare amenity of manners.

ANÆSTHETICS, if the term be taken in its original and broadest sense, are those agents of whatever sort which, upon administration or application to the living body, suspend or greatly diminish for a time the common sensibility, i. e., the power of feeling. Since the development, however, of the modern and most successful methods to this end—and hence, mainly within the past twenty years—this term has acquired a new importance and in a manner a new signification, being now employed to designate specifically those agents which are in greater or less degree available for the relief or prevention of pain, as incident to surgical or dental operations, or as met with in general medical or in obstetrical practice. The condition of insensibility which such agents induce, and which, when perfect, precludes the feeling of pain, is termed *anæsthesia*. Illustrations of it are witnessed in the insensibility of fainting, of stupor from narcotics or other cause, and of one form of paralysis, and in the numbness caused by a blow or by severe cold. But since the common sensibility depends on the activity of a certain set of nerves and of nervous centres—hence called the "sensory," or those of sensation—we may say, more precisely, that *anæsthesia* is that state of a living body or of some part of it, in which the action of its sensory nervous apparatus is for the time suspended; and whatever can produce such condition,

without destroying the nervous apparatus itself, is so far an anæsthetic.

Under the title, ANÆSTHETICS, in the *NEW AMERICAN CYCLOPEDIA*, will be found a concise history of the practice (to about the year 1858), together with an account of the mode of action of anæsthetic agents, and their effects, a summary of their applications in medicine, surgery, and obstetrics, &c.

Among the earliest recorded instances of anæsthetic practice collected by MM. Perrin and Lallemand ("Treatise upon Surgical Anæsthesia," Paris, 1868), and in which the end aimed at was precisely that sought in the practice of the present day, are those of the resort, among the Assyrians, to the stupor caused by compressing the arteries (it would appear) of the neck, preparatory to performing circumcision in childhood; of the local application in certain minor surgical operations, among the early Greeks and Romans, of the powdered "Memphis stone"—probably a species of marble—mixed with vinegar, to parts to be benumbed, and which the authors conjecture to have acted by means of the carbonic acid set free by the mixture; and of the anæsthetic employment in China of the Indian hemp (*Cannabis Indica*)—the plant, closely allied to our common hemp, from which the celebrated "hashish," well known as possessing inebriating and stupefying properties, is still extracted; as also of both the hemp and the mandrake (*Atropa mandragora*) in India and some other oriental countries. The medical school of Bologna, in the 18th century, brought into vogue in surgery a set of stupefying preparations some of them believed to have been imitated from the ancients, and some, at least, of a highly complex character; of the latter class, one is known to have been a mixture of extracts with which a sponge was saturated; and when to be used, the sponge was wet in warm water, and the emanations were *inhaled* until stupor followed. But, in western and southern Europe, all the modes of producing anæsthesia thus far considered—imperfect as they were—would appear by the beginning of the 18th century to have passed wholly out of use. The stupor of intoxication, and that produced by opium, were still resorted to, at times, in severe operations; and in minor ones, the practice of diverting the patient's attention by a blow or by some agitation of the feelings was much in vogue. The 18th century was strongly marked, however, by a tendency to seek for anæsthetic effects through agencies of a physical or biological character.

The modern anæsthetic practice may be in a manner traced to the founding of Dr. Beddoes' "Medical Pneumatic Institution," in 1798, near Bristol, England, and which was designed for the treatment of pulmonary diseases by inhalation of ether, and of carbonic acid and other gases. It was here that Humphry Davy, then young, acquired his interest in the subjects of gases and their inhalation; and his discovery,

soon after, of *nitrous oxide* (protoxide of nitrogen), or "laughing gas," and of its effects on the human system—first published in the year 1800—created for some time a sort of *furor* in regard to its inhalation, for amusement, and as a restorative and curative agent. Davy himself predicted the use of this gas for anæsthetic purposes, when he wrote: "As nitrous oxide in its extreme operation [deeper stages of its effect] seems capable of destroying physical pain, it will probably be used with advantage during surgical operations in which no great effusion of blood takes place." Still, this remained a mere prediction until, many years after, the use of agents capable of anæsthetic effects was taken up and successfully reduced to practice in this country, by three physicians of the cities of Hartford and Boston. For, although nitrous oxide was in the outset experimented with by European chemists and surgeons, it was by them pronounced unsafe and laid aside; and ether, to which attention was thereupon turned as a substitute, was not at the time brought into practice. As early as 1828, Dr. Hickman, of London, in particular, addressed the French Academy on the subject of anæsthesia by inhalation, and especially of *carbonic acid*; but that body did not favorably entertain the subject, and it was dropped.

Without here entering into a discussion of the vexed question of priority in the discovery of the modern anæsthetic methods, it will be proper, at least, to name what appear to be the facts in the case. Recent evidence goes to show that the first painless operations (and also quite numerous) in the development of the new method, were performed by Dr. Horace Wells, a dentist of Hartford, Conn., during the close of the year 1844 and the early part of 1845; and that the agent which he employed in these cases was *nitrous oxide*, the operations being the extraction of teeth. This conclusion has been confirmed by the report and action of at least two important medical bodies in this country within the past two years. While, however, it is by some asserted that Dr. Wells was led to try the nitrous oxide by his reading of the views of Davy and other early authorities on the subject, Dr. G. Q. Colton states that Dr. Wells' attention was called to the agent by an observation made by the latter of the painlessness, for the time, of a wound which a person inhaling the gas at one of Dr. Colton's exhibitions of it had inflicted upon himself. Dr. Wells laid aside the use of the nitrous oxide, after its failure on the occasion of an attempted public demonstration with it, in Boston. It would further appear, that it was the application of Dr. Wells' process that Dr. W. T. G. Morton, of Boston, was proposing to imitate, with a person for whom he was about to extract a tooth, when Dr. C. T. Jackson, a chemist, also of Boston, and who had previously had experience in his own person of the insensibility produced by ether, suggested to Dr. Morton the real and superior value of the latter agent.

This was in September, 1846. Dr. Morton's first private administration of ether occurred on the 80th of that month, and his first public demonstration of the method, in the Massachusetts General Hospital, on the 16th of October following; while the first *capital* operation upon an etherized patient was performed on the 7th of the succeeding November, by Prof. George Hayward, also of Boston: the result in all these cases was, as desired, a complete freedom, on the part of the subjects operated on, from pain. The news of the remarkable success obtained with ether having reached Europe, certain physicians and chemists there made trial of several other volatile liquids, in the hope of obtaining one still more suited to the end in view than ether. In the following year, 1847, Dr. Simpson, of Edinburgh, announced his discovery of the applicability of chloroform—a material which has since closely contested the ground with the prior agent, and has even in some degree supplanted it.

The fact, soon rendered evident in practice, that neither ether nor chloroform was wholly free from danger or from other inconveniences of application, led to the trial of still other agents, with a view, if possible, to find some one that should be entirely safe and devoid of disagreeable effects—conditions which, however, no substance has yet been found fully to satisfy.

The following list presents—not altogether in the order of time—the more important of the substances, possessing anæsthetic powers in some degree, which have been experimented with for the purposes now indicated:

1. *Nitrous oxide*. (Davy, 1800; Dr. Horace Wells, 1844; Dr. G. Q. Colton, 1863.)
2. *Carbonic acid*. (Dr. Hickman, 1828; Dr. Ozanam, about 1862; and others.)
3. *Sulphuric ether*. (Drs. Jackson and Morton, 1846.)
4. *Chloroform*. (Dr. Simpson, 1847.)
5. *Hydrochloric ether*. (M. Flourens, 1847; M. Sédillot.)
6. *Acetic ether*. (M. Figuier, 1848; M. Flourens.)
7. *Nitrous ether*. (M. Flourens.)
8. *Nitric ether*. (Dr. Simpson—tried on animals.)
9. *Aldehyde*. (M. Poggiale.)
10. *Oleasant gas*. (M. Tourdes.)
11. *Chloride of hydrocarbon*; or, *Dutch liquid*. (Dr. Nunneley; M. Aran.)
12. *Benzine*. (Drs. Simpson and Snow.)
13. *Formomethylal*. (M. Bouisson.)
14. *Bisulphide of Carbon*. (1848.)
15. *Carbonic oxide*. (MM. Ozanam and Tourdes.)
16. *Kerosolene*. (Drs. Jackson and Bigelow.)
17. *Amylene*. (Drs. Snow and Fergusson, about 1856.)
18. *Oil of turpentine*. (Successfully, on shipboard, by John Wilmhurst, naval surgeon.)

Iodoform, the teriodide of formyle, and thus the analogue of chloroform, as well as, of course, many other substances which do not appear to have been especially subjected to trial, possesses in degree anæsthetic powers. The anticipations awakened by the earlier success of amylenes, in the hands of Dr. Snow and others, were soon disappointed, through the detection of disagreeable consequences, and finally by the occurrence in two cases of death, under its use;

and the agent was thereupon abandoned. Dr. Ozanam, in his recent revival of inhalation of *carbonic acid* to produce insensibility, administered it along with common air, 8 parts to 1. He found this mixture safe; and it produced complete anæsthesia, from which the patient recovered without difficulty; but it does not appear that the use of this agent has yet become in any manner general. The condition of *trance*, *somnambulism*, or *artificial sleep*, as induced in connection with the agencies or methods of influence passing under the names of "Mesmerism," "animal magnetism," "Braidism" or "hypnotism," "psychometric impression," "spiritualism," &c., has been of late years often resorted to, and in some of these forms for a time much vaunted; but though in exceptional cases, or in the hands of particular persons, painless surgical operations have been doubtless secured under some or all of the influences named, yet their effect is far from uniform, or even certain; and at the present day, none of them are relied on as suitable to take the place of the material anæsthetics.

Dr. Valentine Mott, in his monograph upon "Pain and Anæsthetics," prepared at the request of the U. S. Sanitary Commission (Washington, 1863), in considering the philosophy of of anæsthetics, and their value to the surgeon, justly remarks, not only that pain is *useless*, but also that it is *positively injurious to the pained*; and he cites from different authorities the expression of a truth which is stated by Gooch, in the words, "Mere pain can destroy the powers of life." But when complete insensibility exists, both pain and nervous shock are, so far as the operation is concerned, avoided. "The most severe operation during anæsthesia," says Dr. Mott, "produces little or no effect upon the pulse, because the nervous centres receive little or no impression." But again, except where the conscious coöperation of the patient with the surgeon is required, and in all cases in which the locality or peculiar nature of the operation may not forbid the administration of anæsthetics, the unconsciousness, helplessness, and complete relaxation which those agents can produce, is often a matter of the highest convenience and advantage. The use of anæsthetics thus allows the surgeon to undertake cases in which, without them, he could not safely think of operating; and it also allows him to take more time. Considerations such as these show that their employment practically extends the domain of surgery; and moreover that, *prima facie*, it should lessen the danger and the mortality of operations.

Dr. Detmold, in 1847, M. Ozanam later, and some other medical authorities, have argued that in the inhalation of ether, chloroform, or other anæsthetics, the insensibility obtained is due to action of *carbonic acid* resulting from the decomposition of such substance within the system. M. Ozanam went so far as to say that carbon is in all cases the true anæsthetic; and that so-called anæsthetic agents possess their

power just in the proportion that they are more largely composed of carbon. But if this were true, amylene should be a more potent anæsthetic than ether, and ether itself than chloroform; whereas the reverse is true in both cases. Again, the experiments and observations of Flourens and Longet go to show that the specific anæsthetic agents, not less than morphine, strychnine, alcohol, &c., produce their effects by a direct and positive depressing action upon the nervous centres. Thus, they are all (save, perhaps, nitrous oxide—and even on this point there is room for question) positive poisons; and in undue quantity they produce death in that mode (naturally, and usually in fact) in which we say it begins in the nervous system.

Nitrous oxide, by freely yielding oxygen, is, like common air, only in still higher degree, a supporter of combustion. Of course, in the outset of its inhalation, it is in proportionate degree a supporter and quickener of the functions of life. By hurrying on decomposition in the system, it rapidly generates carbonic acid, and loads the blood with this product. Ether is not a supporter of combustion, but is combustible; and its decomposition may to some extent increase the proportion of carbonic acid naturally contained in the blood. But chloroform is neither a supporter of combustion nor combustible; and it is doubtful whether it undergoes decomposition in the system at all. All anæsthetics, however, after a preliminary stage of excitement, longer or shorter, then forthwith begin, by inducing a torpor or inactivity in the nervous centres, to depress and to lower the respiration, if not also the heart's action; and as a consequence, they occasion the retaining for the time in the blood of much of the carbonic acid, naturally forming in the system, which would under a normal respiration be continually expelled. Still further, wherever gaseous anæsthetics are administered by means of a containing reservoir or bag, so that the patient breathes the same material over and over, even the carbonic acid which is expelled, for the time, mingles with the anæsthetic, increasing in quantity, and being reinhaled. These facts would show, that with chloroform, there is a *single* source of increase of carbonic acid in the blood—this being, however, not the cause, but the consequence, of the anæsthetic action; that with ether, there are *two* such sources; while with nitrous oxide, there are *three* sources of increase of carbonic acid. And unquestionably the retained carbonic acid will contribute its share to the depth of the stupor that results; if, indeed, in the case of nitrous oxide alone, it may not be in a large degree the really effective agent. At all events, it is probable that the action of carbonic acid, generated or retained in the blood during anæsthetic inhalation, may in some cases modify materially the symptoms attending or following upon their use.

The stages of anæsthesia are strictly comparable to those of intoxication (carried to

stupor), only that they are passed through much more rapidly. They may be conveniently considered as four in number: the *first*, that of action on the cerebral hemispheres, marked first by mental excitement, and then by loss of intelligence and of power of will; the *second*, that in which the anæsthetic acts on the cerebellum, destroying the power—if the common theory of the use of this organ be correct—of combining the muscular actions, when the body becomes fully relaxed and helpless; the *third*, that in which the effect extends to the ganglia of the base of the brain and probably to the exterior parts of the medulla oblongata, as well as in some degree to the spinal cord; so that the senses are obliterated, the capacity of feeling pain lost, and the reflex actions to some extent arrested; the *fourth*, that in which it attacks the "vital centre" within the medulla oblongata, from which arise the nerves that maintain the function of respiration, and so, indirectly, that of the circulation. When this last degree of action is fully established, the breathing and the heart's action cease, and death is already taking place.

It is, accordingly, the third stage of anæsthesia, as here divided, that the surgical or dental operator seeks to produce, and to maintain. The quantity of chloroform used to such end may vary from one to four drachms, or an ounce. A sponge or napkin wet with the liquid is brought near to the mouth and nostrils, so that the patient inhales the vapor mingled with air. The time required for the full effect is thirty or sixty seconds, or even more. Of the many forms of apparatus that have been devised for inhalation of anæsthetics, none have been received with general favor. The greater power, and consequently (unless under judicious management) danger, of chloroform over sulphuric ether, is shown in that the quantity of the latter required is much greater, as from two to four ounces, and in some instances even a quart or more; and the time required to produce insensibility is usually from three to five minutes. Generally, it is preferred that the patient shall be in the recumbent position. When the anæsthesia is complete, as indicated by sonorous or stertorous breathing, and other signs, the inhalation is discontinued, to be renewed from time to time if the patient show signs of passing back into the preceding or semi-conscious stages.

The fact that several cases of death under chloroform, and one or more under ether, have been directly traceable to the circumstances that the stomach was at the time loaded with food, is one that, where practicable, should never be lost sight of in fixing the period for operating. The most suitable time is some three or four hours after a meal, when, although the system is not yet weakened for want of food, the organs of digestion are in the main relieved and in a quiescent state. It is always desirable, if possible, to guard against vomiting under the influence of an anæsthetic, and almost always

unfortunate in some way where it occurs. According to Dr. Mott's observations, if vomiting occurs, one result that is quite certain is that the anæsthetic effect will immediately pass off.

Of seventy-seven immediately fatal cases under chloroform, collected by Perrin and Lallemand, and of which they present a very full analysis in tabular form, in sixty-seven the posture of the patient is noted; and of the latter, in forty-eight cases the posture was recumbent, in nineteen that of sitting. Those authors, however, agree with the usage of practitioners generally, in favoring the horizontal posture, unless the nature of the operation requires some other; and it is certain that an upright position of the body increases the likelihood of fainting. The horizontal posture favors the entrance of the vapor of chloroform especially—its density being about four times that of air—into the lungs. This extreme density of the vapor of so powerful an agent is, however, in itself, and in several ways, a source of danger. The too sudden and rapid introduction of the vapor into the lungs may at once occasion asphyxia (suffocation), or it may cause a sudden arrest of the heart's action, besides that it is apt to induce coughing, and perhaps may tend in some cases to cause vomiting. Dr. Mott regards it as a further recommendation of the recumbent posture, in case of chloroform, that if for any reason it should become desirable to free the lungs suddenly of the vapor they may at the moment contain, the result is readily aided by turning the body upon the side (or, we may suppose, inclining the face partly downward), while the proper measures for resuscitation are employed. And this consideration is the more important, since, as implied by another authority, when alarming symptoms do arise, the deadly power of the vapor already in the lungs may suffice to complete the fatal effect of the drug. Both with ether and chloroform, while the administration of the vapor should not be so slow in the outset as to prolong inconveniently the preliminary stages of the effect, it is yet, on the other hand, very important that it be not commenced too abruptly and too strongly in the outset, lest the dangers already indicated be incurred. Dr. Mott adduces the reckless and heedless manner in which he has seen ether and chloroform administered, and without evil results, in Paris and New York, as a proof of the comparative safety of the practice; but he insists none the less upon the necessity of such cautions as have here been indicated. It is always important, especially so with chloroform, that the sponge or handkerchief wet with the liquid should be approached cautiously toward the mouth at the first; and that it shall at no time be brought so near but that the percentage of air inhaled shall largely exceed that of the vapor at the same time entering the lungs.

Dr. Mott states that, although preferring chloroform for use alone, he is in the habit of employing often the two usual anæsthetics in

the same case, beginning with ether, and resorting to chloroform if insensibility is not thus readily induced. He mentions Dr. Simpson's recent method of administering these agents, with a view to securing the due admixture of air—that of spreading a handkerchief single-fold over the face of the patient, and allowing the liquid to drop at intervals upon this, near to the mouth and nose. He fears, however, that this method might give rise to irritation of the skin, a result he usually guards against in his own practice, by previously applying a little olive oil about the mouth and nostrils.

Prof. Samuel D. Gross, in the recent edition of his "System of Surgery" (Phila., 1864), treats at some length of the choice and application of anæsthetics. He prefers chloroform to ether, as having a less objectionable odor, and as being less liable to occasion vomiting and other unpleasant symptoms. Instead of the mixture of ether and chloroform, 8 parts of the former to 1 of the latter, employed by some practitioners, he favors—if any mixture be used—that proposed by Dr. Snow, of equal parts of chloroform and alcohol. He has administered chloroform in several thousands of cases: no death from its use has occurred in his hands, and only two threatening cases that could be traced to an injudicious mode of use. He regards age as being no bar to the employment of anæsthetics; as he has given chloroform with success to children—even to infants under two months, and also to very old persons—in one case, to a lady of 92. As to danger from disease of the heart or brain, he says: "For my own part, I have never allowed any affection whatever to stand in my way;" and considering the tranquillizing effects of the anæsthetics, he finds no physiological reason for doing so. Some difference of practice appears to exist among surgeons in respect to operations about the mouth, jaws, and nose. Dr. Mott recommends in these, that, generally, anæsthetics should not be used, but reliance placed on narcotics. Prof. Gross advises that in such cases usually the patient should be under anæsthetic influence only at the beginning of the operation; but he states that he has repeatedly performed excision of the tonsils, excision of the jaw, etc., while the patient was perfectly unconscious and incapable of resisting.

It has been seen that in anæsthesia the use of the special senses is commonly lost, along with or before the disappearance (in most parts of the system) of the general sensibility and susceptibility to pain. A remarkable exception to this rule is named by Dr. H. B. Montgomery: a boy undergoing amputation of the leg under the influence of chloroform, in the Stevens Hospital, Dublin, opened his eyes as if from sleep, when a finger was placed upon the neck over the carotid artery, remarked that there was nothing the matter with his neck, but that the surgeons were *setting* his leg, and

remained thereafter with his eyes open, and noticing such objects as came before them throughout the operation; but after recovering from the anæsthetic, he declared that he had felt no pain, and did not know that amputation was being performed. In this case, consciousness was retained, and sight, and to some extent touch, were active, though the common sensibility—at least in the lower limbs—must have been in abeyance.

M. Simonin ("*Revue des Sociétés Savantes*," June 26, 1868) states that the two most important points for the surgeon to observe, in the deeper stages of anæsthesia, in order to be forewarned in time of the near approach of collapse of the respiration and circulation, are, the condition (as to its sensibility, or the opposite) of the region of the temples, and the continued contraction of the muscles holding up the lower jaw, or their narcotism, allowing it to fall. The disappearance of sensibility of the temples marks a definite and deep degree of anæsthesia, but, alone, does not show immediate danger. The sensory nervous filaments to the temples, and the motor filaments to the masseter muscles, are alike furnished by the *fifth pair*, some roots of which arise from portions of the medulla oblongata not far from the "vital centre." The masseters, the contraction of which holds out last in the entire voluntary muscular system, may even relax, and life still not be immediately threatened; but the symptom is usually one of danger, showing as it does that the torpor induced by the anæsthetic has spread well-nigh to the nervous centre of respiration, on the action of which life itself depends. Dr. B. W. Richardson ("*Brit. & For. Med.-Chirurg. Review*," April, 1864), confirming the importance of Simonin's observations, explains by the principle he has brought forward the fact, remarked by himself, of more dangerous symptoms arising during the profound anæsthesia induced for operations *within the mouth*, than under any other circumstances. Dr. Wm. Marcet is led to believe that chloroform absorbed into the blood sometimes produces death, not by its anæsthetic or directly depressing action, but by exciting a spasmodic closure of the glottis—this, at the time, being likely to pass unobserved; and in case of complete suspension of the respiration under chloroform, as the chances of recovery are then small, he advises immediate tracheotomy, and artificial respiration. Dr. G. W. Balfour has called attention to the danger of the filling of the trachea with vomited matters—at least one death having been known by him to occur from that cause, and even though the patient appeared to recover properly from the anæsthetic.

Prof. Gross states the phenomena which indicate danger, in anæsthesia, as being stertorous respiration (very marked, of course), small and feeble pulse, lividity of the features, dilatation of the pupils, relaxation of the sphincters and rapid diminution of the temperature of the

body. The remedies to be employed in case of threatened death, are those in a general way suitable to cases of suspended animation. Among the measures that may be resorted to are those of placing the body, if it be not already so, in a horizontal position; dashing cold water in the face; opening windows, and admitting air freely—if not too cold—to the person; employing frictions of the surface or extremities; stimulating respiration by applying ammonia, etc., to the nostrils; turning the patient on the side, to favor exhalation of the anæsthetic; and performing artificial respiration, or else “insufflation”—i. e., blowing air into the lungs, either from the mouth of another person placed directly upon that of the patient, or through a tube opening in the pharynx or passed within the trachea, and blown into by the mouth or with bellows. To favor or allow of respiration, it is sometimes necessary to draw the tongue forward, and to clear the fances of obstructing liquids, as may be done with the finger; and where the means are at hand, the action of the so-called “Faradization” current, to excite a sort of natural respiration, is advised—the current to be applied, preferably, over the phrenic nerve and diaphragm, and not, as formerly, to the heart. Dr. J. Smith urges that, in dental operations under chloroform, it is not as a rule advisable to keep the tongue forward with forceps or tenaculum during the operation, since thus the spontaneous efforts at clearing the throat by swallowing may be prevented, and fluids in consequence pass into the glottis. Dr. Mott remarks that in operations in which the mouth becomes filled with blood, he formerly feared the occurrence of strangling, but his later observation has shown that deglutition, taking place—like the uterine contractions—by means of reflex nervous action, can occur notwithstanding the anæsthetic influence.

Dr. Maddin, of Nashville, quoted by Prof. Gross, and Dr. Chas. Kidd, find by their researches that a very large proportion of the fatal cases, under the use of anæsthetics, have occurred in minor operations, especially in dentistry, and generally in private practice or in small institutions. Prof. Gross suggests in explanation, both that the severe operations appear to establish a sort of “chloroform tolerance,” and that the administration of anæsthetics has, in private hands, been frequently less judicious, and in some way in fault. At Guy’s Hospital, London, chloroform was given in upwards of 12,000 cases, before any serious accident occurred from its use; and M. Flourens declares that in the Crimean war it was administered 25,000 times without a single death traceable to its use.

Dr. Arnott and others have argued that chloroform has increased, and Dr. Simpson that it has diminished, the rate of mortality, in the great surgical operations. The average of about 1,600 cases of amputation of the thigh, before the introduction of anæsthetics,

collected from several European hospitals, shows 45 deaths in every 100, 86 in 100 being the lowest rate in any of them; while in 145 such amputations, under anæsthetics, the fatal cases were only 25 to 100. The statistics of a large number of amputations performed in the cities of Boston, New York, and Philadelphia, show a greater rate of mortality in the cases under anæsthetics than in those in which they were not used; though it has been suggested that the number of cases was still not large enough to warrant a final conclusion. The question of the actual influence of anæsthetic practice on the mortality of operations is, in fact, yet undecided; though even an apparent increase of mortality may consist with no such increase in reality, in view of the extension of the practice of operating, as before intimated, to a large number of cases, and mainly serious and doubtful ones, in which, but for his reliance on anæsthetic aid, the surgeon would not operate at all. From their analysis of the 77 cases already referred to, Perrin and Lallemand conclude that the mortality from *chloroform* diminished greatly (the year 1859 excepted) from 1847–8 to within a few years past—most especially since 1854; and that for a few years now the mortality appears nearly stationary, although the use of the agent is continually on the increase. Dr. Kidd collected the accounts of deaths apparently from anæsthetics, in Europe, up to May, 1860; of these, 125 were from chloroform, 25 from ether, and several (it is stated) from amylene; and he remarks that the mortality had been more than twice as great among males as among females.

In regard to the employment of anæsthetics in obstetrical practice, our space will permit of no more than referring the reader to the works, journals, etc., in which the subject is treated of; and among which may be especially named Prof. G. S. Bedford’s “Principles and Practice of Obstetrics,” New York, 1861; the work of Perrin and Lallemand; and the papers by Profs. Barker and Elliot, with the discussion following, in the “Bulletin of the New York Academy of Medicine,” vol. I.

The committee some time since appointed by the Boston Society for Medical Improvement, to inquire into the alleged danger of ether inhalation, state in their report their conclusion that all anæsthetics, as shown both by their symptoms and by the results of experiments, “are *depressing agents*.” In relation to the point specially considered by them, they say: “There is no recorded case of death known to the committee, attributed to sulphuric ether, which cannot be explained on some other ground equally plausible, or in which, if it were possible to repeat the experiment, insensibility could not have been produced and death avoided.” A “Chloroform Committee,” appointed by the Royal Medico-Chirurgical Society, London, after more than

two years devoted to examination and experiment in connection with the anæsthetics in use, reported during July, 1864 ("Lancet," July 16; "Amer. Jour. of the Med. Sciences," Oct., 1864). This committee urge the dangers attending the deeper degrees of the effect of chloroform, and they concede much in favor of ether, as that in the outset it is not so purely depressing, and that at the same degree of insensibility it does not to the same degree depress the heart's action, as chloroform. Regarding chloroform as in a degree hazardous, and ether as inconvenient, they suggest that some more eligible anæsthetic is still to be desired. In chloroform inhalation, they think that $4\frac{1}{2}$ per cent. of vapor, with $95\frac{1}{2}$ per cent. of air, is the maximum that can be required; $3\frac{1}{2}$ per cent. of vapor being a suitable average. They do not find that anæsthetics have increased the rate of mortality.

Painful dental operations, especially the extraction of teeth, occupy in reference to the use of anæsthetics a sort of middle ground, as admitting of resort either to general or to local anæsthesia. In any case, owing to the extreme sensitiveness of the dental nerves, and the excruciating pain the extraction (at least) of the teeth occasions, the anæsthetic action requires to be very decided, and the state of insensibility profound; and it is certainly supposable that this circumstance constitutes an explanation in part of the comparatively greater mortality (already referred to) from chloroform and ether in dental practice. During the past fifteen years or more, resort has been had, unavailingly, to mesmerism; to the congelation or freezing of the gums, which however was found liable to be followed by rheumatic pains in the part, or other difficulties; and to the passage of an electrical current through the nerve at the moment of seizing and extracting the tooth: but these methods have in succession been laid aside; and though the two last named have been revived from time to time, almost or quite to the present date, by individual practitioners, they find no favor with the profession at large.

In the early part of the year 1863, Dr. G. Q. Colton revived the use of nitrous oxide as an anæsthetic in dental operations. He states (Dec., 1864) that he has successfully administered the gas to more than 8,000 patients, and that in no instance has he known any ill effects to attend the operation. He prepares the gas by heating nitrate of ammonia in a retort, and collects it in a barrel, from which it displaces water previously contained—its purification being completed by letting it stand for some hours over a remaining portion of the water. It is of the utmost importance that this gas should be perfectly pure; and it is presumed to be so when a little of it inhaled by way of test does not excite cough. The gas is inhaled through a tube from a rubber bag, the contents of which, only the patient respires for the time,

the nostrils and the corners of the mouth being closed. About six gallons are used for one inhalation; the anæsthesia is usually induced in about one minute's time, and passes off in a like or less period. Two or more teeth may in the mean time be extracted; and after waiting a few minutes for the bleeding to subside, the dose may be repeated; and so on, several times in succession, if required. The rubber bag should in every case be emptied and cleansed before receiving a new charge. If not in all respects, still, a wholly desirable anæsthetic, it would nevertheless appear that nitrous oxide is at once the most agreeable to the patient, and the most safe (at least for the brief operations in which it has been employed) of the general anæsthetic agents now in use. Dr. A. O. Castle ("Boston Med. and Surg. Journal," March 8, 1864) mentions three cases in which its employment was followed by decidedly unpleasant symptoms, in the head, the chest, and the nervous system, respectively, and in persons previously in good health; but the general testimony of those acquainted with its use appears to show that such results are rare. The agent is already employed by many dentists in New York and New England, if not also in other parts of the country.

Various forms of local application of chloroform or ether, or of their vapors, have been resorted to for the purpose of securing local anæsthesia, but usually with *uncertain*, and often with very incomplete, success. Perhaps the most efficient of all these has been M. Richet's modification of M. Guérard's process—in its simplest form—merely letting ether fall, drop by drop, on any external part to be benumbed, and playing on it at the same time with the current of air from a common bellows. M. Fournier's "chloroaceticization"—application of chloroform and glacial acetic acid—has been found often to occasion too much irritation and smarting to allow of its use. Chloroform applied on lint or in test-tubes for ten or fifteen minutes sometimes produces total insensibility. The process of congelation, by applying a freezing mixture of pounded ice and salt, and which is familiar to medical men, is still earnestly recommended by many authorities, for superficial operations; though in this confidence Prof. Gross does not share. Dr. Arnott ("Med. Times and Gazette," quoted in the "Boston Med. and Surg. Journal," Oct. 1, 1863) has recently repeated his recommendation of artificial cold, both as an anæsthetic, and for the relief of inflammations; and he proposes a new method—that of cooling in a freezing mixture, and to below 0° Fahr., an iron, brass, or copper instrument of suitable form, or two such to be used alternately, and applying on the part to be benumbed. The local application of carbonic acid for the relief of pain has not been attended with success. As to passing an electric current through the nerve of a tooth at the time of extraction—effected by placing one pole of a battery of

small power in the hand of the patient, and making the forceps the other pole, insulating them at the same time from the operator's hand—the opinion finally reached by medical authorities appears to be, that pain is not in this way prevented, but that, while sometimes the patient's mind is diverted from it at the moment by the electric shock, at other times the latter in reality adds to the suffering the operation alone would occasion.

The reader may further consult Dr. O. T. Jackson's "Manual of Etherization," Boston, 1861; MM. Perrin and Lallemand's "*Traité D'Anesthésie Chirurgicale*," of which use has been to some extent made in the preparation of this article; and "A Treatise on Military Surgery and Hygiene," by F. H. Hamilton, M.D., New York, 1865.

ANGLICAN CHURCHES. The "Churchman's Calendar" for 1865 gives the following view of the bishops of this Church:

England.....	Archbishops, 2	Bishops, 26
Ireland.....	"	" 10
Scotland.....	"	" 6
Mediterranean.....	"	" 1
America—United States.....	"	" 26
" British America.....	"	" 9
" West Indies.....	"	" 6
Asia.....	"	" 8
Africa.....	"	" 8
Oceania.....	"	" 14
Bishops, demissionary.....	"	" 7
		139

Total 139, an increase over the past year of 3.

The statistics of the Protestant Episcopal Church of the United States in 1864 were, according to the "Church Almanac" for 1865, as follows:

DIOCESES AND MISSIONS.	Clergy.	Parishes.	COMMUNICANTS.		SUNDAY SCHOOLS.		Missionary and Charitable Contributions.

The 29th annual meeting of the Board of Missions was held at Cleveland, Ohio, Oct. 4th. The receipts of the Domestic Committee were reported to have been \$66,581, against \$37,458 in 1863, and \$5,223 in 1862. The receipts this year were larger than in any previous year. The receipts of the foreign committee (including \$5,448 from the American Church Missionary Society) were \$76,347, an increase of \$22,586 over last year, and only \$8,542 less than in 1860, when contributions came in from every diocese of the land.

The American Church Missionary Society held its 5th annual meeting in Boston, Oct.

19th. The Society employed forty missionaries, and its receipts were \$24,864.

The receipts of the English Society for the Propagation of the Gospel in Foreign Parts for the year ending December 31st, 1863, were £87,832, or about \$439,000. The total income of the English Church Missionary Society was £184,247, or about \$670,000. The number of clergymen employed by this society was 269; native and country born catechists and teachers of all classes not sent from home, 1,933; number of stations, 140; of communicants, 18,110.

The Mission of the Protestant Episcopal Church in Hayti is making progress, and the

existence of Trinity Parish, Port-au-Prince, was duly proclaimed by an official document from the Presiding Bishop of the United States, dated July 22, 1863. The Haytian Government extended a cordial reception to Bishop Lee, of Delaware, who in October, 1863, made an Episcopal visitation of the mission.

The movement for opening communication with the Russian Church actively continued, both in England and in the United States. The Rev. J. F. Young, the secretary of the Russo-Greek Committee, appointed by the General Convention of the P. E. Church of the United States, paid a visit to Russia, and conferred on this subject with the authorities of the Russian Church, who manifested the greatest interest in the objects and success of the movement. (*See GREEK CHURCH.*) In England the friends of the movement formed an "Eastern Church Association," the objects of which were stated to be—

1. To inform the English public as to the state and position of the Eastern Christians, in order gradually to better their condition through the influence of public opinion in England.

2. To make known the doctrines and principles of the Anglican Church to our Christian brethren of the East.

3. To take advantage of all opportunities which the providence of God shall afford us, for intercommunion with the Orthodox Church, and also for friendly intercourse with the other ancient churches of the East.

4. To assist, so far as our pecuniary means will permit, the bishops of the Orthodox Church, in their efforts to promote the spiritual welfare of their flocks.

Among the committee of this association are the Rev. T. T. Carter, the Rev. W. Denton, Prebendary Ford, the Rev. H. P. Liddon, the Rev. Dr. J. M. Neale, the Rev. George Williams, Dr. Wordsworth, the Rev. Eugene Popoff, the Archimandrite Constantine Strattis, and Mr. H. T. Parker, of Boston.

The "Christian Union Society," which was organized in New York on March 31, has a somewhat wider scope, and aims, in general, at bringing about a union of all churches holding to the doctrine of the apostolical succession of bishops. Similar societies were established in other cities of the United States, and joined by members of the Protestant Episcopal and Moravian Churches. The reports, made at the successive meetings of this society, state that a Danish periodical favors more intimate relations between the Anglican and Scandinavian Churches; that in France, two periodicals, *Observateur Catholique*, and *Union Chrétien*, edited by Abbé Quettée, advocate this same movement; that in Northern Italy, the *Examinatore*, a paper conducted by Count Tasca, the poet laureate of Piedmont, and receiving contributions from several bishops and priests, recommend the largest circulation of the Bible in the vulgar tongue, and similar reforms;

that reformatory movements, looking toward a severance of the national Catholic Churches from Rome, were progressing in Mexico, South America, and Portugal. In England, an "Association for Promoting the Unity of Christendom," having the same object in view, has been at work for seven years. It appears from the preface to a work recently published for some members of this Society, and entitled "Sermons on the Reunion of Christendom," that it numbers seven thousand members, that of these one thousand are Roman Catholics, three hundred are Orientals, and the remainder (five thousand seven hundred) members of the Church of England. A prayer for the union of Christendom is recited daily by each member, and those who are priests bind themselves "to offer the Holy Sacrifice once in three months with intention of the same." The volume is dedicated "To the most blessed and holy father in Christ, Pius IX., by Divine Providence, Pope, Bishop of the holy Apostolic See; also to the most blessed and holy father in Christ, Sophronius, Archbishop of Constantinople, Ecumenical Patriarch of New Rome; also to the right honorable and right reverend father in Christ, Charles Thomas, Archbishop of Canterbury, Primate of All England, &c." The Pope has addressed a letter to the Roman Catholic bishops of England condemning the Association, and forbidden Roman Catholics to have any connection with it.

The excitement produced by the works of Bishop Colenso, and the Essays and Reviews not only in the Anglican Churches but in the whole civilized world, continued throughout the year 1864. The interest in the case of Bishop Colenso was especially revived by his trial before a Synod of South African Bishops, commencing at Capetown, on November 17, 1863. The tribunal consisted of Dr. Gray, Bishop of Capetown and Metropolitan of South Africa, as President, and the Bishops of Grahamstown and Orange Free Town. The Bishops of St. Helena and Zambesi were absent. On the part of the accused bishop, Dr. Bleek, curator of the Grey Library, attended to protest against the proceedings, or to speak more correctly, against the jurisdiction of the court. The court found Colenso guilty of heresy on nine counts, and the Metropolitan consequently pronounced sentence, depriving Colenso of his Episcopal see, unless on or before the 4th of March, 1864, he (Colenso) should file a full, unconditional, and absolute retraction in writing of all the objectionable extracts in London, or a like retraction by April 16th in Capetown. The Bishop of Capetown proceeded to Natal, and read the decree of deposition in the cathedral. The same decree was read in all the other churches of the diocese of Natal. Nearly all the clergy of the diocese accepted the sentence as valid, and signed a declaration by which they pledged themselves not to recognize Colenso any longer as their bishop. On May 31st, Bishop Co-

lenso was served in England with a copy of the decree of deposition. He had already issued a letter to his diocese, in which he disputes the power claimed by the bishops of South Africa to depose him from office. His friends in England collected a fund to enable him to plead his cause before the English courts. The first proceedings were commenced before the judicial committee of the Privy Council on June 28d. On December 14, the appeal of Bishop Colenso came on for a hearing, the judges being the Lord Chancellor, Sir Stephen Lushington, the Master of the Rolls, Lord Kingsdown, and Lord Cranworth. At the end of the year the sentence had not yet been delivered.*

The famous case of the "Essays and Reviews" was ultimately decided by the judicial committee of the Privy Council. The case came up upon an appeal of Dr. Williams and Mr. Wilson, two of the writers of the "Essays and Reviews," from the sentence of the Court of Arches, by which they had been deprived for one year of their benefices. The Privy Council, the highest judicial court of the country, declared the holding and publishing of the views contained in the essays of Dr. Williams and Mr. Wilson not to be inconsistent with the rule of faith in the Church of England, and therefore reversed the sentence of the Court of Arches. The judgment was delivered by the Lord Chancellor, who stated that the Archbishops of Canterbury and York differed from the rest of the committee as to the charge with reference to the inspiration of Scripture. In order to neutralize the decision of the Privy Council, on the 25th of February a committee of leading theologians of both the High and Low Church parties issued the "Oxford Declaration," declaring their belief that the Church of England teaches that the Bible not only contains but is the Word of God, and that the punishment of the wicked is, equally with the life of the righteous, everlasting. The declaration was signed by more than 11,000 clergymen of the Established Church, and called forth similar declarations from the bishops and clergy of the Anglican churches in the British provinces of North America and the United States.

The latter is as follows:

We, the undersigned, Bishops and Clergymen of the Protestant Episcopal Church in the United States of America, hold it to be our bounden duty to the Church of England and Ireland, and to the souls of men, to declare our firm belief that the said Church, in common with our own and the whole Catholic Church, maintains, without reserve or qualification, the Inspiration and Divine Authority of the whole Canonical Scriptures, as not only containing but being the Word of God; and further teaches, in the words of our Blessed Lord, that the "punishment" of the "cursed," equally with the "life" of the "righteous," is everlasting.

This declaration was signed by the Bishops of Connecticut, Vermont, Kentucky, Ohio,

Wisconsin, Michigan, Western New York, Delaware, Massachusetts, New Hampshire, Maine, Indiana, Illinois, Iowa, New York, New Jersey, Minnesota, the Northwest, the Assistant Bishops of Connecticut and Ohio, and Bishop Southgate, demissionary Bishop.

The Convocation of Canterbury, in the session commencing on the 21st of June, passed a "synodical" condemnation of the volume of the "Essays and Reviews," as containing teachings contrary to the doctrine received by the united Church of England and Ireland, in common with the whole Catholic Church of Christ. The resolution was adopted in the House of Bishops by all votes against two, and in the lower house by 89 to 19.

This act of "synodical" condemnation called forth a very interesting debate in the English Parliament, in the course of which the Lord Chancellor was very severe upon rights of the Convocation. He called the synodical condemnation a violation of the law of England, according to which "the crown is the fountain of all jurisdiction, ecclesiastical and spiritual as well as temporal, and he warned the bishop not to trespass in future upon the prerogatives of the crown."

In December, an address signed by 137,000 lay members of the Church of England, was presented to the Archbishops of Canterbury and York, for their pastoral letters in support of the doctrines involved in the decision of the judicial committee of the Privy Council.

The attempted establishment of the Benedictine Order in the Church of England, by Brother Ignatius,* continued to produce great excitement. Brother Ignatius during the year preached and lectured in London, York, Leeds, Newcastle, and other large cities, and found in all these places a great deal of sympathy. He also made his appearance at the Church Congress of Bristol, where it required, however, an appeal from the President to the Congress to secure him a hearing. The practices of this new Anglican Order are entirely in conformity with those of Roman Catholic monasteries. The holy water is used at the entrance into the church: the entire mass is reestablished; the veneration of the Virgin Mary, including the doctrine of the Immaculate Conception, is adopted; and pilgrimages are revived. The number of monks has not considerably increased, and most of the bishops have forbidden the clergy of their dioceses to admit brother Ignatius to their pulpits. Toward the close of the year another attempt of establishing a monastic order was made at Leeds.

Annual "Church Congresses" may now be regarded as permanent institutions in the Church of England, like the German and Scandinavian Church Diets, and the Catholic Congresses of Germany, Switzerland and Belgium. That of 1864 was held at Bristol, and it seems to have rivalled the success of the preceding meetings

* See Annual Cyclopaedia for 1868, p. 12.

* See Annual Cyclopaedia for 1868, p. 18.

at Cambridge, Oxford, and Manchester. The Bishop of Gloucester and Bristol was the president; and among the distinguished members who attended, were the Bishops of Chichester, Ely, Bath and Wells, Kilmore, Guyana, the Earl of Harrowby, Lord Lyttleton, Mr. Baresford Hope, Archdeacon Denison, Dr. Pusey, Canon M'Neile. All parties were again represented, though the High Church party was obviously in the ascendency. On several important topics, as the increase of the episcopate and the restoration of church synods, all the speakers were agreed, thus indicating clearly the current of public opinion in the Church of England.

ANILINE, OR COAL-TAR COLORS. Purchasers of textile fabrics, and especially of silks, have within a very few years past found the market supplied with such goods dyed in a variety of unusually brilliant and beautiful colors and hues of color (violets, crimsons, blues, &c.), some of them unlike any before obtained in dyed fabrics, and in regard to all of which very little has been generally known, further than that the new dyes were produced from coal-tar. It was, in fact, only so late as the year 1856 that a product capable of yielding a permanent color, and so of being used as a dye, was obtained from coal-tar; this was the discovery of Mr. H. W. Perkin, and the color produced was known at the first as *mauve*, or *Perkin's purple*. In the brief period intervening since that time, however, the production and application of the new dyes have given rise to large and important branches of industry; and the history of the subject, traced from its two starting-points, in the discovery of *benzole* by Faraday, in 1825, and of the so-called "*crystalline*" by Unverdorben in 1826, affords, as has been well said, "a remarkable instance of the manner in which abstract scientific research becomes, in the course of time, of the most important practical service."

Brief references to the aniline colors occur in the two preceding volumes of this *CYCLOPEDIA*, under the head of *CHEMISTRY*. The reader may profitably consult, in connection with the subject, the articles *COAL PRODUCTS*, *NAPHTHA*, *BENZOLE*, and *ANILINE*, in the *NEW AMERICAN CYCLOPEDIA*. The chemical processes requisite for producing the aniline dyes, and other related substances to be mentioned, will not here be given in detail; the reader is referred for such information to the works upon practical chemistry, and upon dyeing.

Aniline was first obtained in separate form by Unverdorben, in 1826. He isolated it from among other products of the distillation of animal matters, as a heavy but volatile oily liquid, which he named *crystalline*. Later it was produced by Fritzsche, of St. Petersburg, by the action of caustic potash on indigo. After this, Zinin, of St. Petersburg, by a process consisting essentially in acting upon nitro-benzole with sulphide of ammonium, produced the same body, which he named "*benzidum*." And still

later an oily liquid was at different times separated from among the products of the distillation of coal-tar, by M. Runge, Prof. A. W. Hofmann, and others, and which was observed, when brought in contact with bleaching powder (chloride or hypochlorite of lime), to develop a beautiful violet blue, that, however, soon disappeared. Among the names which different experimenters gave to this body were also those of *kyanol*, *phenylamine*, and *phenamida*. To Hofmann, it appears, is due the credit of proving the identity of the substance, as thus obtained from different sources by so many different chemists. This he was enabled to do, and at the same time to determine the composition of the body, by his study of it as obtained from *isatins* (oxidized indigo-blue), heated in mixture with potash. As thus obtainable from indigo (Spanish, *añil*), Hofmann gave to this substance the name of *aniline*; and this name, as being most convenient for the formation of the compound terms needed for the many derivatives of the substance itself, has since become generally adopted. Besides the sources already named, aniline can be obtained by certain reactions from many other bodies, most of them in fact derivatives from coal-tar, as salicylamide, nitrotolnole, &c.; but of the methods and sources thus far named, by far the greater number are as yet of interest to the theoretical chemist only. Indeed, during all the period now considered, and up to the time of Mr. Perkin's discovery of *mauve*, aniline still remained a subject of scientific interest and curiosity only; and even at the time when this important discovery was made, both aniline and the nitro-benzole from which its manufacture on the large scale is now carried on, were as yet to be met with only in small quantities in the laboratory.

In the early part of 1856, Mr. Perkin was experimenting on a compound of toluidine, in the hope of forming quinine artificially. Failing in this, he tried the action of bichromate of potash, acidulated with sulphuric acid, on the sulphate of aniline. The result was a black precipitate of unpromising appearance, but which, on examination, was found to yield the dye already mentioned. This, known as *mauve*, *phenamine*, *indisine*, &c., is more correctly termed *aniline purple*, or, as some dealers prefer to say, *aniline violet*. The interest created by the introduction of this new color naturally directed the attention of chemists again to its source. Prof. Hofmann, in a note to the Royal Society, June, 1858, mentioned the formation of a crystalline derivative from aniline, by action on the latter of bi-chloride of carbon, the reaction being accompanied by the appearance of a magnificent crimson color. This appears to have been the first notice of the *aniline crimson* (*aniline red*), subsequently named by its discoverer *rosaniline*; although it is also stated that Natanson had observed this coloring matter, as formed from aniline, in 1856. As, however, very little of the pigment was obtained

by Hofmann, and the products of the reaction were very complex, the examination was at the time discontinued. But practical men seized and acted on the hint; and M. Verguin, of Lyons, first succeeded in preparing the crimson dye on a large scale, by acting on aniline with bi-chloride of tin. Its manufacture and application in dyeing were rapidly developed in France, among others by Verguin and the Rénard brothers, and in England especially by the house of Simpson, Maule & Nicholson. To this color, or to particular hues of it, have been given by different manufacturers a variety of names, such as *magenta*, *roseine*, *fuchsine* (now somewhat commonly, but improperly, changed to *fuchsia*, and by Prof. Dussauce to *futschine*), &c.

From the first discovery of a brilliant dye from aniline, it became of course a matter of interest to be able to produce the latter material in large quantities, and more cheaply than could before be done; and as these objects were presently accomplished by operating on benzole, it will be important here briefly to trace the relations and show the nature of this substance.

When bituminous coal, placed in gas-retorts, is distilled by application of a high heat, some 40 per cent. of it is volatilized and driven out of the retorts, the remaining 60 per cent. constituting the *coke*; and the volatilized portion being made to pass through the "hydraulic main" and a succession of other condensers, its condensable or liquid and solid matters are chiefly arrested in these, while the mixed illuminating gases and some impurities pass on to the proper reservoir. The condensed portions altogether constitute the *coal-tar*. This consists mainly of bodies which, when isolated, have the form of oils (the coal-oils), and of a tarry or pitchy residue, from which many solids, crystallizable or otherwise, can be separated. From the entire coal-tar some forty or more distinct chemical substances (solids, liquids, and gases) have, upon analysis of it, been obtained.

When coal-tar is by itself placed in a retort, and redistilled, the temperature being slowly and gradually raised, the products that are first for a time obtained are oils, those which pass over at temperatures successively higher being of different composition, and more and more dense or heavy. The oils which thus volatilize at temperatures reaching to about 212° F., and which are usually collected together, constitute the "light oil" or "crude coal-naphtha." This, in commerce, is more commonly known as *benzole* or *beneine*, although the single oil which (when pure) properly takes these names, forms only a certain percentage of its whole bulk. Among the many products which the entire coal-tar, upon analysis, yields, are the *solid*, as naphthaline, paranaphthaline, cumidine, paraffine, &c.; the *liquid bases*, as methylamine, aniline, chinoline, toluidine, &c.; the *liquid acids*, as the rosolic, brunolic, phenic or carbolie,

&c.; the *liquid neutral bodies*, as water, benzole, toluole, cumole, &c.; and *gases*, as ammonia, &c. The quantity of aniline thus directly separable from coal-tar is, however, small, and the process is not remunerative.

The light coal-oil or naphtha is a yellow or brownish liquid, and when purified, has a specific gravity of from .70 to .85. The amount of benzole proper contained in the naphtha varies in different samples, being in some very small. Benzole, first separated by Faraday from oil-gas, was so named by Mitscherlich (1834), as being procured by him from benzoic acid, distilled with baryta. The fact of its forming a considerable portion of coal-naphtha was later shown by Mansfield, an English chemist; though the practical method of procuring it was brought out on the continent, about 1850. French chemists named the substance *beneine*; and under this name, and that of "benzine-collas," it became familiarly known as useful for removing grease from cloth, &c. Benzole, as obtained from naphtha, is not usually entirely free from mixture with oils homologous with it, as toluole, &c. At ordinary temperatures it is a colorless, highly mobile liquid, of an aromatic odor, and at 59° F. has a specific gravity of about .85. Its composition is represented by C_6H_6 .

Mitscherlich found that the strongest nitric acid readily attacks benzole, one equivalent of its hydrogen becoming replaced by one of hyponitric acid, and a new compound—a heavy, yellowish oily liquid—being produced, the composition of which is, therefore, $C_6H_5NO_2$. This he termed nitro-benzole. In preparing it, the reaction just stated is secured by simply allowing a fine stream of benzole and another of concentrated nitric acid to run together in a worm or long glass tube, kept well cooled, the resulting product being then treated with water and carbonate of soda. Nitro-benzole has the odor of oil of bitter almonds, and has hence become much used, under the name of "essence of mirbane," for scenting soaps and for other like uses. Zinin's mode of procuring aniline from this oil by sulphide of ammonium has been already referred to; but as it was not economical, many other methods were tried, among these being that by means of nascent hydrogen, set free by zinc and an acid, and that with acetate of iron. By a modification of the last-named reagent, introduced by M. Béchamp, the process being distinguished as that with "ferrous acetate," it is, that aniline can be cheaply prepared by the ton, and that all the aniline of commerce is now obtained. In this process, 2 parts of nitro-benzole, 3 of concentrated acetic acid, and 8 of iron filings, are placed together in a retort: the application of heat is unnecessary, the chemical reaction giving rise to sufficient heat to distill over a mixture which is found to contain aniline, its acetate, and some nitro-benzole. Redistilling, and treating the distillate with fused caustic potash, the aniline separates as an oily layer.

A further portion of it can be obtained from the residue in the retort; and the entire quantity is finally to be distilled again and rectified.

The aniline of commerce is never pure. As benzole (C_6H_6), in the ordinary modes of separation, always holds and carries with it some portion of—at the least—toluole (C_7H_8), so, when nitro-benzole is prepared, there is formed at the same time with it nitro-toluole; and finally, in the change in which, as commonly stated, nitro-benzole is converted into *aniline*, the nitro-toluole mixed with the former is in the mean time and by a like reaction converted into *toluidine* (C_7H_7N). The commercial aniline is always a mixture of at least these two substances, and very probably contains minute quantities of still other homologues of aniline proper. This very impurity of aniline, it will presently be seen, is essential to the production of the coloring matters. Dr. Phipson gives the boiling-point of pure aniline as $359^{\circ}F.$, and that of toluidine as $388^{\circ}F.$; and he states that the anilines sought for the manufacture of the dyes are those having their boiling-points between about 365° and $410^{\circ}F.$, and which are necessarily, therefore, mixtures.

As met with in commerce, aniline is a colorless, oily liquid, which sinks in water, and has a vinous odor, and an acid, burning taste. It is very slightly soluble in water, but readily so in alcohol or ether. These qualities, also, in much the same degree, belong to pure aniline; this, however, being lighter, and having a lower boiling-point. Its specific gravity is 1.028. The formation of aniline from nitro-benzole takes place by substitution of an equivalent of amide in the former for that of hyp-nitric acid; so that its formula is C_6H_7N . It is a powerful organic base, having a resemblance to certain vegetable alkaloids, and combining with many acids to form salts. A characteristic quality of this base, that of striking a fine purple blue with bleaching powder and other oxidizing agents, and the observation of which finally led to the development of the aniline dyes, has been already mentioned.

Some other derivatives of coal-tar besides aniline have been made to yield dyes; as, certain homologues of aniline, and also chinoline, naphthaline, carbolic acid, &c. The "coal-tar colors" are thus much more numerous than the "aniline colors," strictly so called; although the latter expression appears sometimes to be used as equivalent to the former.

Since the time when Verguin and the Ré-nard brothers brought out the aniline crimson, by action of a chloride of tin on aniline, other chemists and manufacturers in different European countries have produced the crimson or particular hues of it by the employment of a variety of other oxidizing agents, among these being chlorides of lime, carbon, mercury, iron, and perhaps others of the metals, and also nitrate of mercury, nitric acid, bichromate of potash, ozone, arsenic acid, &c. The hues obtained

usually vary with the nature of the oxidizer employed; and the consequence has been the issuing of a proportionately large number of patents, and also much litigation between different claimants.

Perkin's aniline purple is a material quite unlike in composition to the crimson or rosaniline of Hofmann, with its derivatives. The former appears, according to a late statement of its discoverer, to consist essentially of *mauveine* ($C_{16}H_{12}N_4$), which plays with acids the part of a powerful base. The aniline crimson was at first never obtained pure, and accounts of its composition varied. Mr. Nicholson first procured it in the pure state, by acting on the boiling solution of the compound formed by the crimson dye with acetic acid (a form in which the material is quite generally used in dyeing), by means of ammonia. The basic substance is deposited from the liquid, on cooling, in the form of needles and plates, which, so far as entirely pure, are perfectly white or colorless. Dr. Phipson, however, cites M. Preissner as having shown, some years ago, that most coloring matters in the pure state have no more color than white sugar. For the name, *roseine*, which Nicholson gave to this pure crimson dye, *i. e.*, magenta, but which is now appropriated to another of these dyes, Hofmann, who analyzed the former, substituted *rosaniline*. This body, in the white crystalline, *i. e.*, pure form, is in reality a hydrate of the true base; and in Hofmann's latest expressions of it would be represented by $C_{16}H_{11}N_4H_2O$, equivalent to $C_{16}H_{12}N_4O$. It forms with acids numerous perfectly crystallizable salts, which possess the vivid crimson color of the dye; and as it enters into these it contains no oxygen, and is represented by $C_{16}H_{11}N_4$. The magenta dyes in practical use are always some one or more of such salts; in the latter of which the color seems to be developed. When the pure white crystals, however, of rosaniline are exposed to the atmosphere, they rapidly turn pink, and ultimately dark red, no perceptible alteration of weight attending this change; and when dissolved in alcohol, they impart to the liquid a deep-red color. Heated to $212^{\circ}F.$ the base loses a minute quantity of water; and at temperatures above 266° it is decomposed, leaving a quantity of carbon and an oily liquid containing much aniline. The rosaniline base appears capable of forming three classes of salts, containing respectively one, two, and three equivalents of acid; the monacid salts are stable, and the dyes belong to this class. The crystals of these salts, red when seen in thin plates by transmitted light, are by reflected light of a rich greenish metallic lustre. Being very hygroscopic, they require to be kept from the air.

After Prof. Hofmann had been for some time engaged in the investigation of rosaniline, he discovered that during the oxidation of aniline there was formed another base, also a coloring-matter, and of a beautiful yellow color, which

in fact accompanies rosaniline in all the usual modes of production, and can be obtained from the residue that remains after the extraction of the latter, by passing through it a current of steam, condensing, and adding nitric acid. The nitrate of the base is thus formed, and being extremely insoluble in water, is at once precipitated. The base, isolated, is in form of a yellow powder, and from its color the discoverer named it *chrysaniline*. It is very soluble in alcohol and ether. Its composition is $C_{14}H_{11}N_3$; i. e., rosaniline—2 H. Again, rosaniline acted on by nascent hydrogen (the dye being dissolved in hydrochloric acid, and zinc added), gives rise to a third base, and to this, as being perfectly colorless both in itself and in its salts, Hofmann gave the name of *leucaniline*. Its composition is $C_{14}H_{11}N_3$; i. e., rosaniline + 2 H. This substance, however, when long exposed to the air becomes slightly red, and still more so when heated.

It long passed as a fact that the magenta or crimson dye was a product of the oxidation of the aniline proper contained in the impure aniline of commerce. More recently, however, Hofmann tried upon pure aniline the usual reaction, and found that the crimson dye could not be obtained from it. As was natural, he next tried pure toluidine, but still no rosaniline was produced. But upon mixing the two materials, both pure, the reaction of a suitable oxidizer at once gave the coloring matter. He infers that to the formation of rosaniline both toluidine and aniline proper must contribute, a portion of their hydrogen being meantime given up to the oxygen of the reagent used: the result may be thus represented— $2(C_6H_5N) + (C_6H_7N) - 7H = C_{14}H_{11}N_3$. Quite recently, also, MM. Laurent and Casthelez have succeeded in converting nitro-benzole by a single operation into aniline crimson. This they effect by mixing the former with iron and hydrochloric acid, or with protochloride of iron, and then heating. At first, aniline and perchloride of iron result; and when the mixture is heated, the perchloride reacts on the aniline, producing rosaniline.

Some of the facts here stated in relation to rosaniline and the related substances were given in the preceding volume of this CYCLOPÆDIA: such are here repeated only so far as is requisite to a sufficiently connected and clear view of the entire subject. In the same place will be found a brief account of the *aniline blue*, with a reference to the analogous colors in which the phenyle-radical of that substance is replaced by ethyle, methyle, and amyle, respectively, and also to the *cyanine*, obtained from chinoline. Aniline yields other dyes than those yet named, as the green, or *emeraldine*, &c.; and several dyes are in use which are procured from certain other derivatives of coal-tar; among the latter being *picric acid*, and (it would appear) *azuline*, &c. As might be expected, however, in the beginning of a branch of industry of such extent, a considerable variety of usage and even

much confusion still exist among manufacturers and dealers in reference to the very names of the various colors obtained from coal-tar products. In such a state of things, a systematic and complete classification of the new dyes is as yet scarcely practicable. Some of the more important of the coal-tar dyes, however, whether yet practically in use or not so, require further and special notice: of such a list is here given:

1. *Aniline purple* (*Perkin's purple*, *mauve*, common *aniline violet*, *imperial violet*, *panetta*, &c.).—Obtained as a black precipitate, by mixing equivalents of solutions of sulphate of aniline and bichromate of potash, and allowing to stand; the precipitate washed with water, and dried, digested in naphtha till this ceases to be colored brown, then repeatedly boiled in alcohol to extract the coloring matter; the latter left upon distilling off the alcohol: thus prepared it is not pure. When purified, and dried, it is obtained as a brittle substance, having a beautiful bronze-colored surface. As one test, a little of the alcoholic solution being evaporated on a glass plate, and viewed by transmitted light, appears of a beautiful bluish-violet color. Many characteristic reactions are given; but of these, or those of the dyes yet to be named, space does not here allow. The color imparted by this dye is a bluish or deep violet. The name *mauve* (French, for mallow,) was given from a resemblance (supposed, at least) of the color to that of the petals of the plant in question. It is stated that much of the *mauves* now seen is an imitation, with a dye obtained by a new process from *archil*. While there are two unlike colors which pass among dealers and dyers as *solferino*, one of them is a purple or violet, of different shades, and is stated to the writer to be identical with Perkin's purple.

2. *Violets*.—A product of the oxidation of aniline, first obtained by Dr. David Price, by means of the action of biniodide of lead on a solution of two equivalents of sulphuric acid and one of aniline in water. Dried from alcoholic solution at the close of the process (not here given in full), it resembles the aniline purple dye, but has a more coppery appearance. Very soluble in alcohol, insoluble in ether.

3. *Rosine*.—First noticed by Mr. C. G. Williams, afterwards by Dr. Price. The latter obtained it by acting on a boiling solution of sulphate of aniline with biniodide of lead, filtering, &c. Dried, a dark, brittle substance, of slightly metallic lustre; dissolved in alcohol, gives a fine crimson. The three coloring matters thus far named are closely allied.

4. *Aniline crimson* (*aniline red*, *aniline pink*, *rosaniline*, *magenta*, *fuchsine*, *roseine*, &c.).—The history of its discovery, as well as an account of its composition, has been given, and the sorts of reagents that produce it from aniline have been named. Béchamp considers the formula of anhydrous fuchsine as $C_{14}H_9N_3$, this, when the base is free, being associated with H_2O , giving $C_{14}H_{11}N_3O$. Perkin, and after him Dussauce, give quite fully the modes of preparing the dye with bichloride of tin, and with nitrate of mercury. As met with in commerce, the coloring matter, when not pulverized, is in small irregular masses or lumps, having a golden-green semi-metallic lustre, but which, in thin plates and by transmitted light, are red. A light and slightly bluish magenta is the other color to which the name of *solferino* is sometimes given. This, however, is not a proper violet or purple, but a distinct and bright crimson.

5. *Chrysaniline* (*phosphine*).—As already stated, a residual product, formed at the same time with rosaniline, and removed from the residue left in preparing that dye, by passing through it a current of steam. It dyes a golden yellow, as its two names—from *χρυσος*, *gold*, and *phosphorus*—respectively indicate.

6. *Aniline blue* (*bleu de Paris*, *bleu de Lyon*, *opal*

blue).—A dye produced under circumstances somewhat similar to those giving the crimson: as described by MM. Persoz, De Laynes, and Salvétat, it is formed by heating in sealed tubes, for 30 hours, 9 parts bichloride of tin with 16 parts aniline, to about 358° F. It crystallizes from its alcoholic solution in fine needles somewhat resembling the ammoniacal sulphate of copper. It is soluble in water, wood-spirit, and acetic acid. This blue is very beautiful, and several fine and durable tints of it appear now to be produced at Lyons, if not elsewhere.

7. *Aniline green (emeraldine)*.—A substance long known in the laboratory, as forming on the outside of vessels in the vicinity of aniline. It may be obtained by oxidizing aniline with chloric acid, or a salt of that body with perchloride of iron. Dried, it has an olive-green color. It is soluble, and somewhat changed, in sulphuric acid; insoluble in water, alcohol, ether, and benzole. It appears to be now successfully used as a dye.

Among dyes directly obtained from aniline, there is said also to be a *black*, and the writer has seen *browns* and *scarlets* said to be derived from the same material; but of these no account has been met with.

8. *Nitroso-phenylins* (comp., $C_6H_5N_2O$).—Obtained by action of nascent hydrogen on an alcoholic solution of di-nitro-benzole. It gives crimson-colored solutions, but not so brilliant as those of rosaniline.

9. *Di-nitroanilins* ($C_6H_4N_2O_2$).—Obtained from di-nitro-phenyle citra-conamide, by carbonate of soda. Pure, it is found in yellow tabular crystals. It can be made to dye silk yellow.

10. *Nitro-phenylins diamines*.—Obtained from the last named, by sulphide of ammonium, in form of red, acicular crystals, which give an orange solution with water. It is capable of dyeing silk of a clear golden color.

11. *Picric, or Di-nitro-phenic acid* ($C_{12}H_5N_2O_7$).—A long-known product, obtainable by action of heated nitric acid on aniline, indigo, carbolic acid, salicine, silk, aloes, and a number of other substances; and which was first introduced as a dye about 1855, by MM. Guinon, Marnas, and Bonney, silk dyers of Lyons. It is prepared on the large scale from carbolic acid, and also from certain gum-resins. Pure and dry, it is of a light primrose-yellow color, crystallizing in shining laminae. Its taste is extremely bitter. It dissolves in water. Cheap and inferior imitations of it are in the market.

12. *Bosolic acid* ($C_{22}H_{23}O_7$).—Obtained by Dr. H. Muller from crude phenate of lime. Pure, it is a dark, amorphous mass, showing the greenish metallic lustre of cantharides; and in thin layers, by transmitted light, of a golden metallic color. It is said to be discovered since the discovery of rosaniline.

13. *Cyanine (chinoline blue)*.—Obtained from chinoline, a constituent of the mixed product known as quinoline or leucoline (from coal-tar). A very delicate, pure blue, but extremely fugitive, and not yet successfully employed. A *chinoline violet*, and *green*, are similarly liable to objection.

14. *Aniline*.—This is a very beautiful blue dye, introduced during the year 1861 by Guinon, Marnas, and Bonney. It is obtained from coal-tar, but from which of its derivatives, or what the process, is as yet kept secret. The dye is in amorphous masses, of a coppery lustre. The color it gives, though not as fine as that of chinoline blue, is far superior to the Prussian blue.

Naphthalene yields many colored derivatives, but none which (at least up to 1861) have been turned to account by the dyer. Among these are:

15. *Chloroazynaphthalic, and Perchloroazynaphthalic acids*.—The salts of the former have beautiful yellow, orange, and crimson colors; those of the latter with potash and ammonia, a very fine red or crimson.

16. *Carmine-naphtha*.—A fine red, obtained by Laurent.

17. *Ninaphthalamines*.—Obtained from di-nitro-naphthalene, as a bright red crystalline mass, which

is capable of dyeing silk of a color like that of annoto.

18. *Nitroso-naphthalins*.—A product of the action of nitrous acid on naphthalamine. With much hydrochloric or sulphuric acid, it dyes silk a beautiful violet, but which fades at once unless so much of the acid be left as to rot the silk.

19. *Naphthamein*.—This dyes silk or cotton of a purple color, but very inferior.

20. *Tar Red*.—Discovered by Mr. Clift, of Manchester, 1853. It is obtained by exposing for about three weeks to the air a mixture of the more volatile parts of basic oils of coal-tar and hypochlorite of lime. With different mordants it yields different colors.

The irregularity which as yet prevails in the naming and classification of the coal-tar colors, is illustrated in the sets of samples of colors produced that are furnished to dealers. The manufacturing firm in Lyons, known as *La Fuchsine Société*, and advertising a capital of \$4,000,000, furnishes to importers in New York samples bearing the following names: *fuchsine*, *bleu de lumière* (very light), *bleu de Lyon* (in three shades, darker and darker, marked T, R, and E—light, reddish, and deep), *violet Hofmann* (two shades, R and B—reddish and bluish), *violet* (R and B), and *dahlia imperial*, a fine reddish violet. Other sets of specimens vary again more or less from these. Simpson, Maule and Nicholson furnish, to illustrate Dr. Phipson's paper on the subject, *opal blue*, *chrysaniline*, *rosaniline*, *Hofmann's patent violet*, *regina purple*, and *imperial violet*. ("Popular Science Review," July, 1868.) Hofmann's violet is a very brilliant and fine reddish violet, though the shades produced by different makers differ somewhat; and the dye is now one of the most expensive. It is said to be also called *primula*, *Alexandria violet*, and *imperial purple*. The so-called (imported) *Humboldt purple*, if not identical with this, is at least quite similar to it.

Aniline colors are now manufactured in this country, from imported aniline, by the "Holliday Chemical and Color Co.," of Brooklyn (Eastern District), N. Y. Of the magenta or *crimson dye* they produce three hues, which they term the *Empire* red (the dye soluble in cold water), the *Keystones* (bluish), and the *Bay State* (reddish); of the *violet*, three hues, the *Manhattan* (reddish), the *Knickerbocker* (bluish), and the *Humboldt* (bluish, more deep); and of the *blue*, two hues, the *Union* (reddish, or deep), and the *Washington*, (greenish, or "night" shade). Most of these the company's agents hold at this time at \$9, in gold. It would appear, also, that some of the aniline and other coal-tar colors have been already produced in this country from products separated from petroleum—especially from the naphtha and the residuum. It is stated that the "Humboldt Petroleum Co.," of New York, have works for this manufacture now in process of erection, at Plummer, on Cherry Run, Venango Co., Pa. It has been stated to the writer that the company have already produced from petroleum several superior dyes, and—a very important point, if con-

firmed by further experience—that they are aniline dyes. Evidently, if petroleum contains benzole, identical with coal-tar benzole, or any thing that for the color manufacture is equivalent to this, or if it can largely yield aniline, the fact will be one of great importance to the future of American commerce and manufactures.

The colors obtained from aniline and other coal-tar dyes are almost invariably distinguished by a superior brilliancy, which is readily made evident upon bringing into close proximity with them similar hues furnished by other coloring matters. The new dyes were, moreover, in the outset, of extremely high price; and though recently they have greatly declined, they are still comparatively dear. For both these reasons, the fabrics dyed with these colors have been, and still are, held at a higher value on such account. Perkin's purple dye was for a long time held at its weight in gold. In the London Exhibition of 1862, Mr. Nicholson exhibited a crown constructed of crystals of acetate of rosaniline, and which was valued at £100 sterling. The writer is informed that at the present time the imported dyes can be bought in New York at prices of from \$5 to \$9 the pound, in gold. These coloring matters were, nevertheless, even when held at a much higher price, available to the dyer, and chiefly for three reasons: 1, their very high coloring power, so that a little of the dye goes a great way; 2, the fact that the process of dyeing with them is usually extremely simple; 3, the higher price the dyed fabrics would command. The power, for example, of the *mauve* and *magenta* is shown by the fact that $\frac{1}{16}$ th of a grain of either will color substantially a gallon of alcohol. And such has been the demand for the dyes, that, in England at least, the production of Hofmann's patent violet, obtained by action of the iodides of ethyle, &c., on rosaniline, speedily occasioned a considerable rise in the price of iodine.

Whatever may in the outset have been said to the contrary, it is now well ascertained that the coal-tar colors do not withstand the action of light; but that, as a rule, they lose their brilliancy and fade even more readily than other similar colors. In this respect, however, it is already demonstrated that much depends on the mode of preparing and applying the dyes; and some of these, in any case, produce much more durable colors than others. M. Chevreul and Mr. Perkin agree in pronouncing the hues of magenta usually very fugitive, and most so upon cotton. Aniline purple is said to resist light among the best; and azuline, *bleu de Paris*, and the yellow from picric acid, are also very stable.

When Mr. Perkin wrote, in 1861, only four of all the dyes above enumerated were as yet employed by the dyer and printer; namely, aniline purple, aniline crimson, picric acid, and azuline. It is evident that by the present time the number has become greatly increased. A remarkable quality in all the coal-tar dyes is

their strong affinity for all manner of animal fibres (illustrated even in the tenacity of the stain they leave on the fingers), and their indifference to vegetable fibrous materials. Thus, they take effect most perfectly on silk and on wool, and in these they exhibit their richest hues. With these fabrics, as a rule, no mordants are required, and very little, indeed, beyond thoroughly cleansing the silk or wool, plunging it into a proper solution of the dye, and then taking it out and washing: the dye is so strongly attracted to the fibres, that it may be said to become fixed in an instant; while some of the dyes, as aniline purple and violine, are thus so completely withdrawn from the liquid holding them in solution, that the latter is speedily left colorless. In fact, with silk and wool one great difficulty the dyer has to contend with is the tendency of the fibres thus to become dyed unevenly.

The dyeing of *silk* with aniline purple, violine, and roseine, is essentially effected by adding an alcoholic solution of the dyes, diluted with hot water acidulated with tartaric acid, to a dye-bath of acidulated cold water, and working the silk in this until of the required shade; with fuchsine, picric acid, chinoline blue, and violet, still more simply, by working the silk in cold aqueous solutions of the dyes, with the first two especially avoiding acids; with azuline, in the color-solution acidulated with sulphuric acid, first at a low, and then at a high temperature, and afterwards carefully rinsing in water, working in soap lather, &c. The dyeing of *wool* with any of these colors requires simply a dye-bath consisting of a dilute aqueous color-solution, at a temperature of about 40° F. In case, however, of linen, cotton, paper or other substances of a vegetable nature, the dye may require to be prepared with some material that shall play the part of a mordant, as in Fuller's and Perkin's process with tannin and stannate of soda, or else the fabric may first be coated, or the dye itself mixed, with some albuminous or animal matter, in order to secure action of the dye on the fibre. It is stated, however, that fuchsine, violine, roseine, and the chinoline colors will act directly on vegetable fibres, while picric and rosolic acids are not applicable to the dyeing of cotton. The tannin process, just named, and also another in which a basic carbonate or oxide of lead is first formed on the parts to be colored, and the fabric then worked in the coloring solution, the color to be removed by soap from the portions not mordanted, are among the methods resorted to for printing calicoes with coal-tar colors.

When the dyeing of fabrics with the coal-tar colors began to be practised, fears were entertained that the health of the workmen would suffer. Mr. Perkin states that during the few years of his experience in the business, no sickness had occurred among the workmen that could be traced to the use of his own—the aniline purple dye. In respect to working in aniline, the case would appear to be different. Dr.

Kreuser, of Stuttgart, has lately stated that the workmen in the aniline factories are subject to intense bronchitis, with violent, dry, and spasmodic cough, and accompanied with the appearance of ulcers covered with blackish crusts, especially on the lower extremities. The cases were easily cured upon removal of the patients from the aniline vapors; and by proper attention to clothing, cleanliness, and the ventilation of the factories, the difficulties mentioned could usually be prevented.

The reader may further consult a "*Treatise on the Coloring Matters derived from Coal-tar*," &c., by Prof. H. Dussauce, Phila., 1863,—a source from which some of the statements given in this article are drawn.

APPLETON, JOHN, an American statesman and diplomatist, born in Beverly, Mass., Feb. 11, 1815; died at Portland, Maine, Aug. 22, 1864; graduated from Bowdoin College, Brunswick, Me., in 1834; commenced the study of law, and was admitted to the bar of Maine, in 1837. In 1838 he became editor of the "*Eastern Argus*" in Portland, and continued in that position for several years. He also acted for some time as Register of Probate for the County of Cumberland during a part of this time. In 1845 he became Chief Clerk in the Navy Department, and subsequently, Chief Clerk of the State Department. In 1848 he was appointed *Chargé d'Affaires* of the United States to Bolivia. Soon after the inauguration of Gen. Taylor in 1849 he was superseded in this office and returned to Portland, and entered upon the practice of law in partnership with the Hon. Nathan Clifford, now one of the Justices of the U. S. Supreme Court. He was elected to the 32d Congress from the Portland district, and in 1855 was Secretary of Legation to Mr. Buchanan at the Court of St. James. During Mr. Buchanan's presidency he was assistant Secretary of State. His health failing, he resigned his position and returned to Portland, where he had suffered from a lingering and distressing illness up to the day of his death.

ARKANSAS. The organized rebel force in Arkansas and its vicinity, at the commencement of 1864, was large. It was at several points as follows:—Princeton, 800; Tulip, 400; Rockport, 4,000; Washington and vicinity, 8,000; Camden, 1,200; its vicinity, 4,000; near Lake Providence, in Louisiana, 800; on the Red River, 8,000—total, 21,700. On the retreat of Gen. Banks from the Red River country, this force concentrated against Gen. Steele, and put him on the defensive at Little Rock. The positions within the State held by Federal troops were gradually surrendered, until only Little Rock, Pine and Duvall's Bluffs, Fort Smith and Van Buren, were retained. Before the close of the year, Van Buren, and one or two others, were evacuated. The limited Federal force in the State compared with the strength of the enemy, offered an opportunity for the invasion of Missouri by Gen. Price.

With the exception of the military posts, the State became as completely under rebel control as when occupied by a Confederate army. It was unsafe to go outside of any posts, and even at Little Rock, in the presence of a large army, guerrillas lurked in undesirable proximity. The communications between the posts were dangerous and liable to interruption. Heavy details were required for escort duty, and men and horses were worn out in the unprofitable service. As the military occupation was not sufficiently strong to afford security to the inhabitants, the Unionists became scarce, and gradually lost their energy and hope.

At the beginning of the year a Union State Government was organized. The movement was based on the amnesty proclamation of President Lincoln, issued December 8th, 1863. Under this authority a Convention to revise the State Constitution assembled on January 8th. Representatives were reported to be present from forty-two out of fifty-four counties. In fifteen counties they had been elected at the ordinary precincts, without the presence of a soldier. The election was called by mass meetings. The Constitution amended by the Convention, forever prohibited the existence of slavery in the State. Isaac Murphey was appointed Provisional Governor; O. C. Bliss, Lieut.-Governor; and R. J. T. White, Secretary of State. These officers were inaugurated on January 22d. The Convention ordered the Constitution to be submitted to a vote of the people on March 14th, and State officers to be chosen at the same time.

These proceedings were somewhat in conflict with the order prescribed by President Lincoln. This was settled by the following letter and address:

WASHINGTON, February 13, 1864.

To William Fishback:

When I fixed a plan* for an election in Arkansas I did it in ignorance that your Convention was at the same work. Since I learned the latter fact I have been constantly trying to yield my plan to theirs. I have sent two letters to Gen. Steele and three or four despatches to you and others, saying that he (Gen. Steele) must be master, but that it will probably be best for him to keep the Convention on its own plan. Some single mind must be master, else there will be no agreement on any thing; and Gen. Steele, commanding the military and being on the ground, is the best man to be that master. Even now citizens are telegraphing me to postpone the election to a later day than either affixed by the Convention or me. This discord must be silenced.

A. LINCOLN.

HEADQUARTERS LITTLE ROCK, February 23, 1864.

To the People of Arkansas:

It affords the General Commanding the highest gratification to be able to say that by the conduct of the army under his command, in connection with the wise administration of the Government by its officers at Washington, peace has been so far restored in your midst as to enable you to institute proceedings for the restoration of the civil government, by which order may be firmly established, and the rights of persons and property secured against violence and the danger of anarchy. The Convention of your citizens, held at Little Rock during the last

* Annual Cyclopaedia, 1863, p. 16.

month, has adopted a constitution and submitted it to you for your approval or rejection. That constitution is based upon the principles of freedom, and it is for you now to say, by your voluntary and unbiased action, whether it shall be your fundamental law. While it may have defects in the main, it is in accordance with the views of that portion of the people who have been resisting the fratricidal attempts which have been made during the last three years. The Convention has fixed the 14th day of March next on which to decide this great question, and the General Commanding is only following the instructions of the Government when he says to you that every facility will be offered for the expression of your sentiments, uninfluenced by any considerations save those which affect your own interests and those of your posterity. If you will institute a government of your own, he feels great confidence in assuring you that quiet and security will soon be restored to your entire State. Those who have been unwisely led, by the counsel of bad men, to engage in this unjustifiable and wicked rebellion, will speedily return and acknowledge the rightful sovereignty of the State, as well as the supremacy of the National Government over the whole domain, and peace will prevail throughout the land. The election will be held and the return be made in accordance with the schedule adopted by the Convention, and no interference from any quarter will be allowed to prevent the free expression of the loyal men of the State on that day. The schedule will be hereto appended to render the election valid. There must be cast five thousand four hundred and six votes.

FRED. STEELE,
Major-General Commanding.

The popular vote on the Constitution as returned, was 12,177 in its favor, and 226 against it. There was also chosen at said election a Governor, Lieutenant-Governor, Secretary of State, Auditor, State Treasurer, Attorney-General, three Supreme Court Judges, three members of Congress, six out of nine Circuit Judges, seven of nine Prosecuting Attorneys, twenty-three out of twenty-five State Senators, fifty-nine out of seventy-five members of the Assembly. The counties also elected Sheriffs, County and Circuit Clerks, County and Probate Judges, Treasurers, Coroners, School Commissioners, Surgeons, Justices, and Constables. The Legislature assembled on April 25th, and elected William Fishback and Elisha Baxter Senators to Congress in Washington. The question relative to their admission to seats was discussed, but not decided by the Senate.

On September 22d, the rebel Legislature of the State assembled. Thirteen members were present in the Senate, and forty in the House. A message was delivered by the rebel Governor Hannigan, and A. P. Garland was elected to the Congress at Richmond—Albert Pike being the opposing candidate.

ARMY, CONFEDERATE. The acts of the Congress at Richmond, by which their armies were formed, were revised at the beginning of 1864. On December 28, 1863, it was enacted that no person liable to military service should be permitted, or allowed to furnish a substitute for such service; on January 5, 1864, it was enacted that no person liable to military service should be exempted by reason of his having furnished a substitute. In February, a

general military act was passed, which provided as follows:

1. That all white men, residents of the Confederate States, between the ages of seventeen and fifty, shall be in the military service of the Confederate States during the war.

2. That all between the ages of eighteen and forty-five now in service shall be retained during the present war in the same organizations in which they were serving at the passage of this act, unless they are regularly discharged or transferred.

3. That no person shall be relieved from the operation of this act by reason of having been discharged, where no disability now exists, nor by reason of having furnished a substitute; but no person who has heretofore been exempted on account of religious opinions, and paid the required tax, shall be required to render military service.

4. That all between seventeen and eighteen years and forty-five and fifty years of age shall form a reserve corps, not to serve out of the State in which they reside.

5. That any person of the last named failing to attend at the place of rendezvous within thirty days, as required by the President, without a sufficient reason, shall be made to serve in the field during the war.

6. That all the duties of provost and hospital guards and clerks, and of clerks, guards, agents, employés, or laborers, in the Commissary and Quartermaster Department, in the Ordnance Bureau and Navy Department, and all similar duties, shall be performed by persons who are declared, by a board of surgeons, as unable to perform military service in the field. The President may detail such bodies of troops or individuals required to be enrolled under the fifth section of this act (between the ages of forty-five and fifty) as may be needed for the discharge of such duties. Persons between seventeen and eighteen years of age shall not be assigned to such duties. The President is empowered to detail artisans, mechanics, or persons of scientific skill, to perform indispensable duties in the departments or bureaus herein mentioned.

7. That any Quartermaster, or Assistant Quartermaster, Commissary, or Assistant Commissary (other than those serving with organizations in the field), or other officer in the Ordnance Bureau, or Navy Agent, or Provost-Marshal, or officer in the conscript service, who shall hereafter retain or employ any person subject to military duty, as herein provided, shall be cashiered.

8. Repeals all existing exemption laws, and exempts the following:

1. All who shall be held unfit for military service, under rules to be prescribed by the Secretary of War.

2. The Vice-President of the Confederate States, the members and officers of Congress, of the several State Legislatures, and such other Confederate and State officers as the President or the Governors of the respective States may certify to be necessary for the proper administration of the Confederate or State Governments, as the case may be.

3. Every minister of religion authorized to preach according to the rules of his church, and who, at the passage of this act, shall be regularly employed in the discharge of his ministerial duties; superintendents and physicians of asylums of the deaf, dumb, blind, and insane; one editor for each newspaper being published at the time of the passage of this act, and such employés as said editor may certify on oath to be indispensable to the publication of such newspaper; the public printer of the Confederate and State Governments, and such journeymen printers as the said public printer shall certify on oath to be indispensable to perform the public printing; one skilled apothecary in each apothecary store who was doing business as such apothecary on the 10th day of October, 1862, and has continued said business without intermission since that period; all physicians over

the age of thirty years who are now and have been for the last seven years in the practice of their profession, but the term physician shall not include dentists. [The old law exists covering professors and teachers.]

All superintendents of public hospitals established by law before the passage of this act, and such employees as the said superintendent shall certify on oath to be essential to the management thereof.

4. There shall be exempt one person as owner or agriculturalist on each farm or plantation upon which there are now and were, on the first day of January last, fifteen able-bodied field hands between the ages of sixteen and fifty, upon the following conditions: 1st. This exemption shall only be granted in cases in which there is no white male adult on the farm or plantation not liable to military duty, nor unless the person claiming the exemption was, on the 1st day of January, 1864, either the owner and manager or overseer of said plantation; but in no case shall more than one person be exempted for one farm or plantation. 2d. Such person shall first execute a bond, payable to the Confederate States of America, in such form and with such security and in such penalty as the Secretary of War may prescribe, conditioned that he will deliver to the Government, at some railroad depot, or such other place or places as may be designated by the Secretary of War, within twelve months next ensuing, one hundred pounds of bacon, or, at the election of the Government, its equivalent in pork, and one hundred pounds of net beef (said beef to be delivered on foot), for each able-bodied slave on said farm or plantation within the above said ages, whether said slaves are in the field or not, which said bacon, or pork and beef, shall be paid for by the Government at the price fixed by the Commissioners of the State under the impressment act: *Provided*, That when the person thus exempted shall produce satisfactory evidence that it has been impossible for him, by the exercise of proper diligence, to furnish the amount of meat thus contracted for and leave an adequate supply for the subsistence of those living on said farm, the Secretary of War shall direct a commutation of the same to the extent of two-thirds thereof in grain or other provisions to be delivered by such persons as aforesaid at equivalent rates.

Such person shall furthermore bind himself to sell the marketable surplus of provisions and grain now on hand, and which he may raise from year to year, while the exemption continues, to the Government or to the families of soldiers, at prices fixed by the Commissaries of the State, under the impressment act: *Provided*, That any person exempted as aforesaid shall be entitled to a credit of twenty-five per cent. on any amount of meat which he may deliver within three months from the passage of this act: *Provided, further*, That persons coming within the provisions of this exemption shall not be deprived of the benefit thereof by reason of having been enrolled since the first day of February, 1864.

In addition to the foregoing exemptions, the Secretary of War may, under the direction of the President, exempt or detail such other persons as he may be satisfied ought to be exempted on account of public necessity, and to insure the production of grain and other provisions for the army and for the families of soldiers. He may also grant exemptions or details, on such terms as he may prescribe, to such overseers, farmers, or planters, as he may be satisfied will be more useful to the country in pursuits of agriculture than in the military service: *Provided*, That such exemption shall cease whenever the farmer, planter, or overseer shall fail diligently to employ, in good faith, his own skill, capital, and labor exclusively in the production of grain and other provisions, to be sold to the Government and the families of soldiers at such prices not exceeding those fixed at the time for the articles by the Commissaries of the State under the Impressment Act.

The old law is reenacted relating to railroads.

6. Nothing herein contained shall be construed as

repealing the act approved April 14, 1862, exempting contractors for carrying the mails of the Confederate States, and the drivers of post coaches and hacks, from military service: *Provided*, That all the exemptions granted under this act, shall only continue while the persons so exempted are actually engaged in their respective pursuits or occupations.

10. That the President be, and he is hereby, authorized to grant details, under general rules and regulations to be issued from the War Department, either of persons between forty-five and fifty years of age, or from the army in the field, in all cases where, in his judgment, justice, equity, and necessity require such details, and he may revoke such orders of details whenever he thinks proper: *Provided*, That the power herein granted to the President to make details and exemptions shall not be construed to authorize the exemption or detail of any contractor for furnishing supplies of any kind to the Government by reason of said contract, unless the head or Secretary of the department making such contract shall certify that the personal services of such contractor are indispensable to the execution of the contract: *Provided, further*, That whenever such contractor shall fail diligently and faithfully to proceed with the execution of such contract, his exemption or detail shall cease.

13. That in appointing local boards of surgeons for the examination of persons liable to military service, no member composing the same shall be appointed from the county or enrolling district in which they are required to make such examination.

Under the provisions of this bill, almost the whole male population can be employed either in the army, or in raising supplies. On the 5th of October, an order was issued revoking all details, furloughs, and temporary exemptions of men, between the ages of eighteen and forty-five. At the session in December, 1864, a new bill was introduced which omitted the exemption of fifteen field hands.

These acts have never been executed strictly. In November the States of North Carolina and Georgia had respectively fourteen thousand and fifteen thousand exempts acting as State officers. More than thirty thousand were estimated to be exempted as State officers by the Conscription Bureau, and a hundred thousand from physical disability. The number of physicians exempted was estimated between three and four thousand; and farmers, one hundred and fourteen thousand.

No facts can at present be obtained by which to determine the strength of the armies in the field, or the real military power of the Confederacy. The following estimate was published at Richmond, Dec., 1864:

Number between 17 and 50 in 1860.....	1,299,700
Arrived at 17 since 1860.....	881,630
Total.....	1,681,860
Deduct for ordinary mortality.....	200,000
For population within enemy's lines.....	840,515
For losses in battle, and by unusual diseases.....	225,000
	765,515
Remainder.....	865,895
Deduct 10 per cent. for exemptions for disability and other causes.....	86,584
Prisoners in the enemy's hands.....	50,000
	186,584
Subject to military duty.....	729,251
Left the country.....	86,463
Total.....	692,789

It was also stated at that time that if one-third of this number (230,932) were added to the army in the field, it would consist of 461,844 men. From this it might be inferred that the force then in the field was 230,912. This is about the number of veteran troops estimated to be in the service at the beginning of the year, to which 120,000 conscripts were added. The number of youths passing annually from sixteen to seventeen years of age, was estimated at 62,000.

The Secretary of War, in his report at the session of Congress in November, alludes to the enlistment of negroes as at that time unnecessary. He says:

While it is encouraging to know this resource for further and future efforts at our command, my own judgment does not yet either perceive the necessity or approve the policy of employing slaves in the higher duties of soldiers; they are confessedly inferior in all respects to our white citizens in the qualifications of the soldier, and I have thought we have within the military age as large a proportion of our whole population as will be required or can be advantageously employed in active military operations. If, then, the negro be employed in the war, the inferior is preferred to the superior agent for the work. In such a war as this, waged against foes bent with malignant persistence on our destruction, and for all that man holds priceless—the most vital work is that of the soldier, and for it wisdom and duty require the most fitting workmen. The superior instrumentalities should be preferred. It will not do, in my opinion, to risk our liberties and safety on the negro while the white man may be called to the sacred duty of defence. For the present it seems best to leave the subordinate labors of society to the negro, and to impose its highest, as now existing, on the superior class.

The ration of the soldier is per month 10 lbs. of bacon, 26 lbs. of coarse meal, 7 lbs. of flour, or some hard biscuit, 3 lbs. of rice, $1\frac{1}{2}$ of salt, half a bar of soap, and, in the season, potatoes and vegetables. Sometimes fresh meat is allowed. No sugar, no molasses, no coffee are given except to the sick. The Government is well supplied with coarse clothing for the soldiers.

A benevolent association, known as the Richmond Ambulance Corps, was early formed to look after the wounded in battle. Their agency was similar to the Sanitary Commission of the north. They have followed the Virginian army and been present in every battle. They have every appurtenance necessary in their humane vocation, such as hospital supplies, sugar, tea, coffee, etc., with utensils for preparing every thing on a large scale.

The stringency of the blockade has compelled the inhabitants to manufacture the materials for war. The Ordnance Department has organized twelve arsenals, eight armories, seven large harness shops, four powder mills, a laboratory for smelting lead, and many other small establishments. They have supplied the army with two hundred field batteries, upwards of five hundred thousand small arms, several hundred thousand sets of infantry accoutrements, and millions of cartridges. A shoe establish-

ment in Richmond, employed by the Government, make six hundred pairs daily. The material brought through the blockade in 1863, was estimated to be sufficient to put four hundred thousand men in the field.

So successful has been the manufacture of arms, that all the troops are provided with the best rifles, and the smooth bore has nearly disappeared. The field artillery of the armies comprises now more than a thousand pieces. The gun chiefly used is the 12-pounder Napoleon, to which has been added the 10-pounder Parrott. The number of cannon foundries built up since the commencement of the war, is six; two of which have capacity to cast guns of the largest dimensions. Five powder mills have been erected in different places, one of which alone is represented to be capable of producing all the powder required. Four hundred thousand percussion caps are now manufactured in a day, and there is sufficient machinery to produce a million. The manufacture of the materials of war seems now to have reached such perfection, that it is asserted to be sufficient to supply all wants, without asking any thing from other countries. Such important changes as were made of the commanders of the armies are stated elsewhere. (*See ARMY OPERATIONS.*)

ARMY OF THE UNITED STATES. During 1864 the number of men called for by the President to reinforce the army amounted in the aggregate to 1,500,000, although by an explanatory statement of the Provost Marshal General this number was in fact reduced to 1,200,000. Notwithstanding the impulse which the high bounties and premiums offered in 1863 gave to enlistments under the October call of that year for 800,000 men, the number of men realized seems to have been insufficient for the needs of the service, and on Feb. 1st, 1864, an order was issued by the President to draft 500,000 three years men on March 10th, less the number enlisted or drafted into the service prior to March 1st, and not previously credited. This practically amounted to a call for 200,000, as appears by the following circular:

WAR DEPARTMENT, PROVOST MARSHAL GENERAL'S }
Office, Feb. 1, 1864. }

The President's order of this date, for a draft on tenth (10th) March, for five hundred thousand (500,000) men, after deducting all who may be raised prior to March first (1) and not heretofore credited, is equivalent to a call for two hundred thousand (200,000) men in addition to the three hundred thousand (300,000) called for October seventeenth (17th).

JAS. B. FRY, Prov. Mar. Gen.

By an order dated Jan. 14th, 1864, the Provost Marshal General also directed that the time for paying the bounty of \$300 and \$400, and the \$15 and \$25 premium, be extended to March 1st.

In anticipation of the momentous campaign which was impending, and the losses likely to be incurred by the troops in the field, the President on March 14th followed up his pre-

vious call by a supplementary one for 200,000 men, "to supply the force required to be drafted for the navy, and to provide an adequate reserve force for all contingencies." The order also provided as follows:

The 15th day of April, 1864, is designated as the time up to which the number required from each ward of a city, town, etc., may be raised by voluntary enlistments, and drafts will be made in the ward of a city, town, etc., which shall not have filled the quota assigned to it within the time designated, for the number required to fill said quota. The drafts will be commenced as soon after the 15th day of April as practicable. The Government bounties as now paid continue until April 1st, 1864, at which time the additional bounties cease. On and after that date one hundred dollars bounty only will be paid, as provided by act approved July 22d, 1863.

ABRAHAM LINCOLN.

The severe losses sustained by Gens. Grant and Sherman, the disasters connected with the Red River campaign, and other untoward circumstances, far more than neutralized the results obtained from the calls of February and March, and induced the President to make still another levy. Congress had meantime made important changes in the law of enrolment, as will be seen by the following proclamation:

Whereas, By the act approved July 4, 1864, entitled, "An act further to regulate and provide for the enrolling and calling out the national forces and for other purposes," it is provided that the President of the United States may, "at his discretion, at any time hereafter, call for any number of men, as volunteers, for the respective term of one, two, and three years, for military service," and "that in case the quota, or any part thereof, of any town, township, or ward of a city, precinct, or election district, or of a country not so subdivided, shall not be filled within the space of fifty days after such call, then the President shall instantly order a draft for one year to fill such quota, or any part thereof, which may be unfilled."

And whereas the new enrolment heretofore ordered is so far completed as that the aforementioned act of Congress may now be put in operation, for recruiting and keeping up the strength of the armies in the field, for garrisons, and such military operations as may be required for the purpose of suppressing the rebellion and restoring the authority of the United States Government in the insurgent States;

Now, therefore, I, Abraham Lincoln, President of the United States, do issue this my call for five hundred thousand volunteers for the military service; provided, nevertheless, that this call shall be reduced by all credits which may be established under section eight of the aforesaid act, on account of persons who have entered the naval service during the present rebellion, and by credits for men furnished to the military service in excess of calls heretofore made.

Volunteers will be accepted under this call for one, two, or three years, as they may elect, and will be entitled to the bounty provided by the law for the period of service for which they enlist.

And I hereby proclaim, order, and direct that immediately after the fifth day of September, 1864, being fifty days from the date of this call, a draft for troops to serve for one year shall be had in every town, township, ward of a city, precinct, or election district, or county not so subdivided, to fill the quota which shall be assigned to it under this call, or any part thereof which may be unfilled by volunteers on the said fifth day of September, 1864.

VOL. IV.—S A

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington this eighteenth day of July, in the year our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States the eighty-ninth.

ABRAHAM LINCOLN

By the President:

WILLIAM H. SEWARD, Secretary of State.

The allowance of credits having diminished the number of men to be obtained under this call to somewhat above 200,000 (although, according to the President's statement, 250,000 men were actually put into the army and navy under the call), a further call for 800,000 volunteers to serve for one, two, or three years, was issued on Dec. 20th. Quotas of States, districts, and sub-districts were directed to be assigned by the Provost Marshal General, and in case these should not be filled by Feb. 15th, 1865, a draft to supply the deficiency was ordered to commence forthwith.

The number of men called for during the year may be thus recapitulated:

Call of Feb. 1st.	500,000
Call of March 14th.	200,000
Call of July 18th.	500,000
Call of Dec. 20th.	800,000
	1,500,000

Deducting from this aggregate 800,000 men under the February call, who were really included in the October call of 1863, and 800,000 cancelled by credits on the July call, which made it equivalent to a call for 200,000, we have 900,000 as the number required to recruit the army and navy in 1864. If we also consider the December call as practically intended for 1865, the number is still further reduced to 600,000.

In the third volume of this work the number of men in the military service at the close of 1863 was estimated at somewhat less than 600,000. The degree to which the army was depleted during 1864 by the casualties of the field, discharges for physical incapacity, desertion, and the expiration of terms of service, cannot be estimated with any approach to exactness; and in like manner it is impossible, in the absence of official statements, to ascertain how largely it was recruited. For reasons of public policy the Government has long ceased to afford information on the subject, and has even on several occasions arrested and punished persons, whether connected with the army or in civil life, who have stated, from official sources, facts tending to show the strength of the national forces. Had 600,000 men been actually raised in 1864 and added to the army, its total strength, even after deducting a liberal percentage for losses of all kinds, would have approximated probably to 1,000,000. The latter estimate, however, is notoriously very far from the truth, notwithstanding the statement of Senator Wilson, Chairman of the Military Committee of the Senate, that between October, 1863, and June, 1864, 600,000 white

troops had been raised; or that of Mr. Whiting, Solicitor of the War Department, in a speech delivered in Boston in November, that the colored troops alone then numbered 155,000 men. The fact that four calls for troops were made in the course of the year indicates either that the casualties of the service were greater than in any previous year of the war, or that the men called for were not in reality obtained, whatever the returns might show. The latter is in all probability the true cause of the frequency of the calls; and from their apparent inefficacy to recruit the army to an extent commensurate with the magnitude of its operations, it may be presumed that the military strength on January 1st, 1865, was not greater, if so great, as a year previous. The neglect of duty in the examining surgeons in passing men physically incapacitated for service, the frauds of bounty and substitute brokers, and the wholesale desertions of "bounty jumpers" (as those recruits or substitutes are called who systematically desert after receiving their bounties, and often with the connivance of Government employes), have reduced the number of enlistments to a comparatively small percentage; and hence the repeated calls of the President for additional men, instead of enormously increasing the strength of the army, barely enable it to maintain its standard. On one point only an explicit official statement of the results of recruiting has been made public. The Provost Marshal General, in reference to the reenlistment of veteran volunteers during the fall of 1863 (see vol. iii., pp. 22, 23) says: "Over one hundred and thirty-six thousand tried soldiers, who would otherwise, ere this, have been discharged, were secured for three years longer. Organizations which would have been lost to the service were preserved and recruited, and capable and experienced officers were retained in command. The force thus organized and retained has performed an essential part in the great campaign of 1864, and its importance to the country cannot be over-estimated."

A temporary addition was made to the army in the spring and summer of 1864 of a class of troops known as "Hundred-day men," numbering about 100,000, and voluntarily furnished by the governors of Ohio, Indiana, Illinois, Iowa, and Wisconsin. They were organized as regiments, and to serve one hundred days from the date of their muster into the service, unless sooner discharged. It was further stipulated that they should receive no bounty, nor be credited on any draft. Their services having been accepted, Congress appropriated \$25,000,000 for equipping them, and during May and June the hundred days' men went forward in large numbers to perform garrison duty and otherwise relieve old and disciplined troops who were sent to the front.

Immediately after the call of July 18th for 500,000 men, the Provost Marshal General

issued a series of instructions for the guidance of enlisting officers. The bounties provided by law were announced to be, for recruits—including representative recruits—(white or colored) for one year, \$100; for two years, \$300; for three years, \$800. A first installment of bounty, amounting to one-third of the whole sum, was to be paid to the recruit when mustered in. The premiums previously paid for procuring recruits were discontinued, and neither drafted men nor substitutes, furnished either before or after the draft, were to be entitled to bounty from the United States. The "representative recruits," alluded to above, were those offered by persons not fit for military duty, and not liable to draft, from age or other causes, who desired to be personally represented in the army. The Provost Marshal General issued a circular to further this laudable project, and ordered the names of persons thus represented by recruits to be officially recorded. Many others, also, in anticipation of the draft, furnished substitutes for one, two, or three years, for whom they received no bounty from the General Government, although generally assisted by the town, county, or State in which they resided. The amount of these local bounties differed in different parts of the country. In the agricultural districts, where every able-bodied man could find abundant occupation during the harvesting season, it was no uncommon thing to offer from \$1,200 to \$1,500 for a three years' recruit; and even among the large floating population of unnaturalized foreigners in the seaboard cities, from which substitutes were mainly drawn, the prices demanded were unprecedented in the history of the war.

The act of Congress of July 4th, 1864, having provided that the State Executive might "send recruiting agents into any of the States declared to be in rebellion, except the States of Arkansas, Tennessee, and Louisiana, to recruit volunteers, who should be duly credited to the States procuring them," a series of instructions on the subject were, on July 9th, promulgated by the War Department. The recruiting agents were to report through the commanding officers of certain designated rendezvous for the reception of this class of recruits, to the commander of the military district, department, or army in which such rendezvous might be situated, and were to be subject to all the rules and articles of war. Commanding officers were further directed to afford agents all reasonable facilities for the performance of their duties, to dismiss or arrest those guilty of improper conduct, and to prevent recruiting by unauthorized parties. Many of the States hastened to avail themselves of the opportunity thus offered to fill their quotas without drawing upon their population. Gov. Andrew, of Massachusetts, was one of the first to appoint recruiting agents, and the Executives of Ohio, Connecticut, Michigan, Maine, and other States, soon followed his example. Gov. Sev-

mour, of New York, was among those who declined to act in the matter. In the opinion of many military men the new plan of recruitment within the lines of military operations, was objectionable; and commanding generals held it in particular disfavor on account of the opportunities it would afford for reckless and injurious competition among State agents, and for the infraction of sound military rules. The following letter from Gen. Sherman to one of the Massachusetts agents, doubtless expresses the views of a large class of officers:

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI,
IN THE FIELD, NEAR ATLANTA, GEORGIA.
July 30th, 1864.

John A. Spooner, Esq., Agent for the Commonwealth
of Massachusetts, Nashville, Tenn.

SIR: Yours from Chattanooga, July 28, is received, notifying me of your appointment by your State as Lieutenant-Colonel and Provost Marshal of Georgia, Alabama, and Mississippi, under the act of Congress approved July 4, 1864, to recruit volunteers to be credited to the States respectively.

On applying to Gen. Webster at Nashville, he will grant you a pass through our lines to those States, and, as I have had considerable experience in those States, would suggest recruiting depots to be established at Macon and Columbus, Miss., Selma, Montgomery, and Mobile, Alabama, and Columbus, Milledgeville, and Savannah, Georgia.

I do not see that the law restricts you to black recruits, but you are at liberty to collect white recruits also. It is waste of time and money to open rendezvous in Northwest Georgia, for I assure you I have not seen an able-bodied man, black or white, there, fit for a soldier, who was not in this army or the one opposed to it. You speak of the impression going abroad that I am opposed to the organization of colored regiments. My opinions are usually very positive, and there is no reason why you should not know them. Though entertaining profound reverence for our Congress, I do doubt their wisdom in the passage of this law:

1st. Because civilian agents about an army are a nuisance.

2d. The duty of citizens to fight for their country is too sacred a one to be peddled off by buying up the refuse of other States.

3d. It is unjust to the brave soldiers and volunteers who are fighting as those who compose this army do, to place them on a par with the class of recruits you are after.

4th. The negro is in a transition state, and is not the equal of the white man.

5th. He is liberated from his bondage by act of war; and the armies in the field are entitled to all his assistance in labor and fighting in addition to the proper quotas of the States.

6th. This bidding and bantering for recruits, white and black, has delayed the reinforcement of our armies at the times when such reinforcements would have enabled us to make our successes permanent.

7th. The law is an experiment which, pending war, is unwise and unsafe, and has delayed the universal draft, which I firmly believe will become necessary to overcome the wide-spread resistance offered us; and I also believe the universal draft will be wise and beneficial; for under the Providence of God it will separate the sheep from the goats, and demonstrate what citizens will fight for their country, and what will only talk. No one will infer from this that I am not a friend of the negro as well as the white race; I contend that the treason and rebellion of the master freed the slave, and the armies I have commanded have conducted to safe points more negroes than those of any general officer in the army; but I prefer negroes for pioneers, teamsters, cooks, and servants, others gradually to experiment in the art of the sol-

dier, beginning with the duties of local garrisons, such as we had at Memphis, Vicksburg, Natchez, Nashville, and Chattanooga; but I would not draw on the poor race for too large a proportion of its active, athletic young men, for some must remain to seek new homes and provide for the old and young—the feeble and helpless.

These are some of my peculiar notions, but I assure you they are shared by a large proportion of our fighting men. You may show this to the agents of the other States in the same business as yourself.

I am, &c.,

(Signed) W. T. SHERMAN, Maj.-Gen.

Official copy—L. M. DAYTON, Aide-de-Camp.

The result of the recruitment in the insurrectionary States were reported by the Provost Marshal General as on the whole unfavorable, and the system has been practically abolished.

The necessity of procuring substitutes from a class of the population not liable to draft, led to the enlistment of a large body of recruits of foreign birth, who had never been naturalized. Under these circumstances any considerable increase in the emigration from Europe to America was looked upon with suspicion by foreign governments or statesmen unfriendly to the United States, as having been caused by improper inducements, in violation of municipal law. It was even charged, by persons high in influence in England, that agents from the United States had visited Ireland and the British North American provinces, for the purpose of enlisting men in the army, and had despatched many recruits to America, ostensibly as mechanics or farm laborers. By a resolution adopted by the United States Senate, on May 24th, the President was requested to state—

If any authority has been given any one, either in this country or elsewhere, to obtain recruits in Ireland and Canada for our army or navy; and whether any such recruits have been obtained, or whether, to the knowledge of the Government, Irishmen or Canadians have been induced to emigrate to this country in order to be recruited; and if so, what measures, if any, have been adopted in order to arrest such conduct.

The resolution was referred by the President to the Secretary of State, who replied, that no authority to recruit abroad had been given by the United States Government, and that applications for such authority had been invariably rejected. The Government had no knowledge, he added, that any such recruits had been obtained in the provinces named, or in any foreign country. In two or three instances it had been reported to the State Department that recruiting agents had crossed the Canadian frontier without authority, with a view to engage recruits or reclaim deserters. The complaints thus made were immediately investigated; the proceedings of such recruiting agents were promptly disavowed and condemned; the recruits or deserters, if any had been brought into the United States, were at once returned, and the offending agents were dismissed from the public service. With respect to the inducements held out by the Government to emigrants, he observed:

In the land and naval forces of the United States there are found not only some Canadians, some Englishmen, and some Irishmen, but also many subjects

of continental European powers. All of these persons were voluntary immigrants into the United States. They enlisted after their arrival on our shores, of their own free accord, within our own limits and jurisdiction and not in any foreign country. The Executive Government has no knowledge of the nature of the special inducements which led these volunteers to emigrate from their native countries, or of the purposes for which they emigrated. It has, however, neither directly nor indirectly invited their immigration by any offers of employment in the military or naval service. When such persons were found within the United States, exactly the same inducements to military service were open to them which, by authority of law, were offered at the same time to citizens of the United States.

* * * * *

It is a notorious fact, manifest to all the world, that a vigorous and continual tide of emigration is flowing from Europe, and especially from portions of the British empire, and from Germany and Sweden, into the United States. This immigration, like the immigration which preceded it, results from the reciprocal conditions of industrial and social life in Europe and America. Of the mass of immigrants who arrive on our shores, far the largest number go immediately into the occupations of peaceful industry. Those, on the contrary, who are susceptible to the attractions of military life, voluntarily enter the national service with a similar class of our own native citizens, upon the same equal inducements and with the same patriotic motives. There is no law of nations and no principle of international comity which requires us to refuse their aid in the cause of the country and humanity.

Until 1864 the inferior standing of colored troops in the army with respect to bounty, pay, and pensions remained unchanged, notwithstanding the protest of the Secretary of War and other officials against the injustice thus done to men who shared all the dangers and privations of the war, and who were also liable to draft. The Army Appropriation Bill, passed in June, 1864, disposed of this vexed question by putting the colored soldiery on a footing with the white troops. The following are the sections of the bill relating to the subject:

2. All persons of color who have been, or may be, mustered into the military service of the United States, shall receive the same uniform, clothing, arms, equipments, camp equipage, rations, medical and hospital attendance, pay, and emoluments, other than bounty, as other soldiers of the regular or volunteer forces of the United States of a like arm of the service, from and after the 1st of January, 1864. And every person of color who shall hereafter be mustered into the service shall receive such sums in bounty as the President shall order in the different States and parts of the United States, not exceeding one hundred dollars.

3. All persons enlisted and mustered into the service as volunteers under the call dated October 17, 1863, for three hundred thousand volunteers, who were at the time of enlistment actually enrolled and subject to draft in the State in which they volunteered, shall receive from the United States the same amount of bounty, without regard to color.

4. All persons of color who were free on the 10th day of April, 1861, and who have been enlisted and mustered into the military service of the United States, shall from the time of their enlistment be entitled to receive the pay, bounty, and clothing allowed to such persons by the laws existing at the time of their enlistment; and the Attorney-General of the United States is hereby authorized to determine any question of law arising under this provision; and if the Attorney-General aforesaid shall

determine that any of such enlisted persons are entitled to receive any pay, bounty, or clothing, in addition to what they have already received, the Secretary of War shall make all necessary regulations to enable the pay department to make payment in accordance with such determination. (See Congress, U. S.)

An order was soon after issued from the War Department to pay colored soldiers six months' full wages for the period embraced between January 1st and July 1st, 1864; and in August the Attorney-General, in accordance with the provisions of section 4, decided that colored men volunteering prior to 1864, were entitled to the same pay, bounty, and clothing, as other volunteers. By section 14 of the act of July 4, 1864, the widows and children of colored soldiers dying in battle, or of wounds or disease contracted in the military service, were declared entitled to pensions, provided such widows and children were free persons.

During the year colored troops continued to be enlisted into the army, principally in the Southern States, although several regiments, whose organization had commenced in the North in 1863, departed previous to July for the seat of War. If the statement of the Solicitor of the War Department, quoted above, may be relied upon, upwards of 100,000 of this class of troops were enlisted in 1864. Opinions differed quite as much as in 1863, upon the propriety, politically considered, of employing negroes as soldiers, and upon their value in a military aspect; but toward the close of the year, in view of their soldierly conduct on various trying occasions, it seemed to become the settled conviction that they would form a useful branch of the service. The Corps d'Afrique organized by Gen. Banks in 1863, and intended to comprise about 15,000 men, was described in May, 1864, by an army correspondent in Louisiana, as greatly depleted in numbers by disease, by discharges for physical incapacity, and by desertions, and in consequence thoroughly demoralized. The rate of mortality among the men was said to have been unprecedented in the history of the war, and their idle, wasteful, and slovenly habits, it was alleged, made them unfitted for soldiers. On the other hand Adjutant-General Thomas, who had devoted several months of the previous year to organizing negro regiments in the South, and who had conceived a high opinion of their capacity, was amply confirmed in his views by his experience of 1864, and urged the necessity of enlisting more of this class of troops, as also of raising their pay. He also issued the following order imposing upon negro troops their proportionate share of military duty:

The incorporation into the army of the United States of colored troops renders it necessary that they should be brought, as speedily as possible, to the highest state of discipline.

Accordingly, the practice which has hitherto prevailed, no doubt from necessity, of requiring these troops to perform most of the labor on fortifications, and the labor and fatigue duties of permanent stations and camps, will cease, and they will be only

required to take their fair share of fatigue duty with white troops. This is necessary to prepare them for the higher duties of conflicts with the enemy.

By order of the Secretary of War.

L. THOMAS, Adjutant-General.

The colored regiments continued to be officered by white men, who were subjected to an unusually strict examination by a board appointed for that purpose. Up to August, the total number of officers examined amounted to 2,471, of whom 1,486 were accepted.

Although desertions from the service during the year were not so numerous as in the early years of the war, when discipline was less strict, and the offence was considered in a less odious light, the number has still been sufficiently large to cause the Government considerable embarrassment. This resulted in a great measure from the inferior class of men enlisted into the army through the medium of bounty and substitute brokers, and from the unwise leniency shown by the Government to offenders. For a long time the death penalty seems to have been practically abolished, and the activity of the Provost Marshals had in consequence little or no effect in lessening the number of absentees without leave. Unprincipled men, having no fear of execution before their eyes, risked the chance of recapture and the comparatively slight punishment which would follow, and escaped with their bounty money, a few weeks, or even days, after being mustered into the service. As an illustration of the extent to which the practice was carried, it is stated that out of a detachment of 625 recruits sent to reinforce a New Hampshire regiment in the Army of the Potomac, 187 deserted on the passage, 82 to the enemy's picket line, and 86 to the rear, leaving but 370 men, or less than 60 per cent. available for duty. These men, it may be observed, were for the most part substitutes, or recruits purchased through brokers at exorbitant prices to fill up a quota, and who, as "bounty jumpers," drove a profitable business, some of them having probably received bounty, deserted, and reenlisted eight or ten times. The drafted men, or those personally volunteering, were, as a class, free from this vice. The desertions in the Army of the Potomac were greatly increased by a proclamation from Gen. Lee (intended as an offset to one issued by Gen. Grant), offering to send Federal deserters North. Thousands probably availed themselves of this opportunity, and found their way back to the loyal States, there perhaps to reenlist and again desert; and a small percentage entered the rebel service. The evil finally increased to such a degree that the death penalty was restored and unsparingly used. During the latter part of the year executions of deserters were of almost daily occurrence in the Army of the Potomac, and almost immediately a diminution in the number of cases was observable, which has continued to the present time.

Another, but less numerous class of deserters,

was composed of men who had escaped from hospitals, or had never returned from furlough, of whom several thousand had taken refuge in the British provinces. Numbers of these, upon expressing contrition and a desire to return to duty, were pardoned by the President. The total number of deserters of all kinds was estimated by Senator Wilson, in March, at 40,000, and it has probably not materially increased since that time. The Provost Marshal General reported 39,892 deserters and stragglers arrested by his officers between Oct. 1st, 1863, and Oct. 1st, 1864, and the total number arrested, from the establishment of the special bureau having charge of the matter to Oct. 1st, 1864, at 60,760. Boards of examination have been kept up to inquire into causes of absence from duty by officers. The effect has been to diminish the number of cases published and referred to the boards to 864, for 11 months; whereas, before their organization, from 100 to 200 were reported monthly for absence without leave alone.

The operations connected with the Quartermaster-General's department were, during the year, on an extensive scale, and the army was reported to have been well supplied with all the essentials of military equipment, with fuel, forage, and other necessities, and to have gained in mobility. By an act approved July 4th, 1864, the department was thoroughly reorganized, so that the grades of rank and authority should be proportioned to the duties and responsibilities; and the change has proved in every respect beneficial. Among the new organizations connected with this department was a construction corps, under the direction of General McCullum, which operated upon a thousand miles of railroad in connection with the movements of the armies, and whose labors are characterized by the Secretary of War as "remarkable triumphs of military and engineering skill." Six thousand five hundred miles of military telegraph were in operation in 1864, of which 8,000 were constructed during the year. The supply of horses and mules for army use has been at the rate of 500 per day, which is also the average rate of their destruction; and notwithstanding this enormous drain upon the resources of the country, the stock gives no signs of diminution. The Secretary of War also reports, that for the better protection of the depots of the quartermaster's bureau from rebel raids, the Quartermaster-General was directed to cause the persons employed in this department, at the principal and exposed depots, to be organized into military companies and regiments for internal guard duty and for local defence. These organizations, comprising a force of several thousand men, have been called upon several times during the last year to take the place of regular troops, and have done good service.

On June 30th, 1864, 190 hospitals, with a capacity of 120,521 beds, were in active operation; and during the year the health of the entire army was reported better than is

usual with troops engaged in arduous campaigns. At the close of the year the number of sick and wounded, both with their commands and in general hospitals, was less than 16 per cent. of the strength of the army. The number sick with their respective commands was 4 per cent., and in general hospitals 5 and $\frac{2}{3}$ per cent. of the strength. Of the 6 and $\frac{4}{5}$ per cent. wounded, nearly 1 per cent. were with their respective commands; the rest in general hospitals. By an act approved March 11th, 1864, a uniform system of ambulances was established, which in operation has proved very successful. The corps is made up of officers and enlisted men, detailed for the service, under the control of the chief medical directors of the several armies. A captain commands the ambulances of an army corps; a first lieutenant those of each division of such corps; a second lieutenant those of each brigade of such division, and a sergeant those of each regiment. To each ambulance three privates are attached, and to each wagon one. From three to one ambulances are attached to each regiment, according to its numerical strength. The ambulance corps is uniformed and thoroughly instructed in the most expeditious manner of removing sick and wounded men, and has the sole charge of accompanying them to the rear, in action or on the march. The latter provision has greatly increased the efficiency of troops in battle, by preventing the confusion previously caused by men indiscriminately conveying wounded comrades from the field.

By an act passed in 1864 the pay of privates in infantry, cavalry, and artillery organizations was increased to \$16 per month, and that of petty officers in proportion, the rations remaining the same. The Secretary of War reported the whole army as paid up to Aug. 31st, 1864. Medals of honor were awarded during the year in many cases to deserving non-commissioned officers and privates. By another act officers employing soldiers as servants are subjected to a reduction of pay. This provision was intended to prevent the withdrawal of troops from active duty for menial purposes, which has proved injurious to the service. In cases where civilians are employed by those who are allowed servants, the law does not apply.

The Provost Marshal General reported the Veteran Reserve corps (formerly the Invalid corps) as consisting, October 1, 1864, of 764 officers and 28,738 men; its discipline and instruction good; and that the entire corps is doing duty which would otherwise have to be performed by an equal number of able-bodied troops detached from the armies in the field; and that it is yet inadequate in numbers to fill the demands made on it. It has rendered valuable service in guarding the depots of volunteers, substitutes, and drafted men, and in escorting detachments to their regiments; and during the summer campaign of the Army of the Potomac its operations were extended almost to the front.

At the close of 1864 only five revolutionary pensioners were surviving, to whom the 38th Congress, at its second session, voted a gratuity of \$300 a year, in addition to their regular pension of \$100. The number of army pensioners (other than Revolutionary) who were paid during the fourteen months ending the 30th of June, 1864, was 22,767; of widows (other than Revolutionary), orphans, and dependent mothers, 25,483; and the total number, including Revolutionary pensioners and widows of Revolutionary pensioners, who received pensions during that period, was 49,680, to whom was paid the sum of \$4,340,388.60. Of this amount more than \$3,500,000 were on account of disability or death incurred during the existing war.

The supplies of ordnance produced during the year included 1,750 pieces of ordnance, 2,381 artillery carriages and caissons, 802,525 small arms, 794,055 sets of accoutrements and harness, 1,674,244 projectiles for cannon, 12,740,146 pounds of bullets and lead, 8,409,400 pounds of gunpowder, 169,490,029 cartridges for small-arms, in addition to large quantities partially made up at the arsenals. The supplies furnished to the military service during the same period included 1,141 pieces of ordnance, 1,396 artillery carriages and caissons, 455,910 small-arms, 502,044 sets of accoutrements and harness, 1,918,753 projectiles for cannon, 7,624,685 pounds of bullets and lead, 464,549 rounds of artillery ammunition, 152,087 sets of horse equipments, 112,087,553 cartridges for small-arms, 7,544,044 pounds of gunpowder. The national armory at Springfield, Mass., was reported in a condition to turn out 300,000 of the best quality of rifle muskets annually. The stock on hand, at the close of the year, amounted to a million and a quarter, exclusive of the arms in the hands of the troops.

At the close of 1864 the military geographical departments were in charge of the following generals:

Department of the Tennessee—Maj.-Gen. O. O. Howard.
 " of the Cumberland—Maj.-Gen. George H. Thomas.
 " of the Ohio—Maj.-Gen. John M. Schofield.
 " of the East—Maj.-Gen. John A. Dix.
 " of the Gulf—Maj.-Gen. Stephen A. Hurlbut.
 " of North Carolina and Virginia—Maj.-Gen. B. F. Butler.
 " of the Northwest—Maj.-Gen. John Pope.
 " of Washington—Maj.-Gen. Christopher C. Augur.
 " of Pennsylvania—Maj.-Gen. George Cadwallader.
 " of Western Virginia—Maj.-Gen. George Crook.
 " of New Mexico—Brig.-Gen. James H. Carleton.
 " of the Pacific—Maj.-Gen. Irwin McDowell.
 " of Kansas—Maj.-Gen. Samuel R. Curtis.
 " of the Middle Department—Maj.-Gen. Lewis Wallace.
 " of the South—Maj.-Gen. John G. Foster.
 " of Missouri—Maj.-Gen. Grenville M. Dodge.
 " of Arkansas—Maj.-Gen. Joseph J. Reynolds.
 " of the North—Maj.-Gen. Joseph Hooker.
 " of the Mississippi—Maj.-Gen. Napoleon J. T. Dana.

The departments of the Tennessee, the Cumberland, and the Ohio, form the military division of the Mississippi, of which Maj.-Gen. William T. Sherman assumed command in the early part of the year; and in May the departments lying west of the Mississippi were formed into the military division of West Mississippi, under the command of Maj.-Gen. E. R. S. Canby.

The several army corps, were, on Jan. 1st, 1865, commanded as follows:

- *1st. Maj.-Gen. W. S. Hancock.
- 3d. Maj.-Gen. A. A. Humphreys.
- 8d. Discontinued.
- 42d. Maj.-Gen. D. S. Stanley.
- 54th. Maj.-Gen. G. K. Warren.
- 56th. Maj.-Gen. H. G. Wright.
- 72d. Maj.-Gen. J. J. Reynolds.
- 8th. Maj.-Gen. Lewis Wallace.
- 9th. Maj.-Gen. John G. Parke.
- 10th. Discontinued.
- 11th. do.
- 12th. do.
- 13th. Maj.-Gen. Gordon Granger.
- 14th. Brig.-Gen. Jefferson C. Davis.
- 15th. Maj.-Gen. John A. Logan.
- 16th. Maj.-Gen. Andrew J. Smith.
- 17th. Maj.-Gen. Frank P. Blair.
- 18th. Discontinued.
- 19th. Brig.-Gen. W. H. Emory.
- 20th. Brig.-Gen. A. S. Williams.
- 21st. Discontinued.
- 22d. do.
- 23d. Maj.-Gen. John M. Schofield.
- 24th. Maj.-Gen. E. O. C. Ord.
- 25th. Maj.-Gen. Godfrey Weitzel.

The casualties in the volunteer service during the year were, major-generals three, viz., John Sedgwick, James B. McPherson, and Daniel D. Birney; and brigadier-generals seventeen, viz., Stephen O. ChAMPLIN, Alexander Hays, James S. Wadsworth, Thomas G. Stevenson, James O. Rice, J. St. C. Morton, C. G. Harker, Samuel A. Rice, Daniel McCook, Lucien Greathouse, G. A. Stedman, Daniel P. Woodbury, J. A. Howell, David A. Russell, Hiram Burnham, Daniel D. Bidwell, and T. E. G. Ransom; total, 20.

By a return made to the United States Senate by the Secretary of War, it appears that on Jan. 1st, 1865, there were sixty-six major-generals of volunteers, and two hundred and sixty-seven brigadier-generals of volunteers in the service, of whom forty-five major-generals and two hundred brigadiers held active commands. Of the remainder two were before the Committee on the Conduct of the War; twenty were awaiting orders; two were employed as commissioners for exchange of prisoners; twenty-seven were members of courts-martial, military commissions, etc.; fifteen were off duty on account of sickness or wounds; fourteen were employed on special duty; three were absent on furlough; three were under trial; and two were prisoners of war, one of them, Gen. Hayes, having been released on parole at Richmond, to superintend the distribution of supplies sent to Federal soldiers in rebel prisons.

Under the head of "Enrolment and Draft" the process for obtaining men to serve in the national armies, adopted by the act of Congress of March 3d, 1863, was described in the 8d volume of this work. During 1864 two acts, amendatory of this act or making further provisions on the subject, that of February 24th, and that of July 4th, were passed by the 38th Congress. By section 2 of the former act, which authorizes the President, at his discretion, to call for men for military service, it was provided,

That the quota of each ward of a city, town, township, precinct, or election district, or of a county

where the county is not divided into wards, towns, townships, precincts, or election districts, shall be as nearly as possible in proportion to the number of men resident therein liable to render military service, taking into account, as far as practicable, the number which has been previously furnished therefrom; and in ascertaining and filling said quota there shall be taken into account the number of men who have heretofore entered the naval service of the United States, and whose names are borne upon the enrolment lists as already returned to the office of the Provost Marshal General of the United States.

When a quota is not filled within the time designated by the President a draft is to be made, and should this prove unsuccessful, further drafts are to be ordered, until the quota of each district is filled. Enrolled and drafted men are authorized to furnish acceptable substitutes "who are not liable to draft and are not in the military or naval service;" and the principals are exempted from military service during the time for which such substitutes are accepted. Persons in the military or naval service, however, who have served a year and have less than six months more to serve, are available as substitutes "in the troops of the State in which they enlisted." The money commutation clause of the act of 1863 is declared to exempt a drafted person only from draft on a single quota, and for no longer period than a year. The boards of enrolment are directed to enrol all persons liable to draft and accidentally omitted, also

All persons who shall arrive at the age of twenty years before the draft; all aliens who shall declare their intention to become citizens; all persons discharged from the military or naval service of the United States who have not been in such service two years during the present war; and all persons who have been exempted under the provisions of the 2d section of the act to which this is an amendment, but who are not exempted by the provisions of this act. The names of all persons who, between the time of the enrolment and the draft, shall have reached the age of forty-five, are to be stricken from the enrolment.

Sailors in the merchant service drafted into the military service are allowed, under certain conditions, to enlist in the navy. Persons exempted from enrolment or draft must be such as are rejected as physically or mentally unfit for the service, those already in the service, and those who have served two years during the present war and been honorably discharged. Those sections of the act of 1863 providing for the enrolment of two classes of persons are repealed. The act further provides that members of religious denominations conscientiously opposed to the bearing of arms, or prohibited from so doing by their rules and articles of faith, shall be considered, if drafted, non-contestants, and be assigned to duty in hospitals, etc., or be exempted by the payment of \$300. The following section (24) relates to the enrolment of colored persons:

All able-bodied male colored persons, between the ages of twenty and forty-five years, resident in the United States, shall be enrolled according to the provisions of this act, and of the act to which this is an amendment, and form part of the national forces;

* Reorganizing and not in active service.

and when a slave of a loyal master shall be drafted and mustered into the service of the United States, his master shall have a certificate thereof, and thereupon such slave shall be free; and the bounty of one hundred dollars, now payable by law for each drafted man, shall be paid to the person to whom such drafted person was owing service or labor at the time of his muster into the service of the United States. The Secretary of War shall appoint a commission in each of the slave States represented in Congress, charged to award to each loyal person to whom a colored volunteer may owe service a just compensation, not exceeding three hundred dollars, for each such colored volunteer, payable out of the fund derived from commutation, and every such colored volunteer on being mustered into the service shall be free. And in all cases where men of color have been heretofore enlisted or have volunteered in the military service of the United States, all the provisions of this act, so far as the payment of bounty and compensation are provided, shall be equally applicable as to those who may be hereafter recruited. But men of color, drafted or enlisted, or who may volunteer into the military service, while they shall be credited on the quotas of the several States, or subdivisions of States, wherein they are respectively drafted, enlisted, or shall volunteer, shall not be assigned as State troops, but shall be mustered into regiments or companies as United States colored troops.

By the act of July 4th the President is authorized to call for any number of men as volunteers for the respective terms of one, two, and three years. Such volunteers or their substitutes shall be credited to the town, township, ward, etc., toward the quota of which they may have volunteered or engaged as substitutes. Every accepted and mustered volunteer for one year shall receive \$100 bounty, for two years \$200, for three years \$300; one-third of the bounty at the time of muster in, one-third at the expiration of half the term of service, and one-third at the expiration of the term of service. In case of his death in service the residue of the bounty goes to the widow; in case there is no widow then to the children; in case there are no children, then to the soldier's mother, if she be alive. The \$300 commutation clause is absolutely repealed, and if any quota remains unfilled at the expiration of fifty days from a call the President is directed to order a draft for one year to fill such quota. The Executives of the States are authorized to send recruiting agents into States declared to be in rebellion as mentioned above. Other sections provide against the enlistment of persons under sixteen years of age, and direct that drafted men, substitutes, and volunteers shall be assigned to organizations from their own States, and that drafts shall be for one hundred per cent. in addition to the number required to fill the quotas. Section 8 provides as follows:

All persons in the naval service of the United States who have entered said service during the present rebellion, who have not been credited to the quota of any town, district, ward, or State, by reason of their being in said service and not enrolled prior to February 24th, 1864, shall be enrolled and credited to the quotas of the town, ward, district, or State, in which they respectively reside, upon satisfactory proof of their residence made to the Secretary of War.

The Provost Marshal General reports that during the year efforts were made to perfect

the enrolment of the national forces, which resulted, on November 1st, in placing on the lists the names of 2,784,226 men; also, that on July 31st there was no material deficiency in the United States on the quotas of troops required, such localities as were behindhand having been drafted for the amounts due from them. The draft under the July call took place during the excitement of the Presidential canvass, and notwithstanding threats of resistance, proceeded in accordance with the law. A large portion of the commutation money received from drafted men, while such commutation was lawful, was appropriated "for the expenses of the draft and for the procurement of substitutes."

The July call for 500,000 men, as has been stated, failed, from the numerous credits on account of army and navy enlistments, to produce the number of men required; and in assigning the quotas under the succeeding December call a new element had to be taken into consideration, viz., how many localities had filled their quotas with three years' men, how many with two years' men, and how many with one year's men. Hence the Provost Marshal General announced that the number of men to be furnished under the December call, would not be in proportion to the population of States or Districts, or to the number enrolled. In a communication to the Governor of Minnesota, in reply to inquiries respecting the quota of that State, he observed:

Had all localities filled the call for 500,000 with three years' men, or all one year's men, or all in the same proportion of both, the number of men to be furnished under the present call would be in proportion to the number enrolled. But as it would be unjust and illegal to require a district which had filled its quota under the last call with three years' men to furnish as many men under the present call as an equal district which had filled its quota under the last call with one year's men, the former having furnished three times the number of years of service which the latter had furnished, it became necessary to estimate the number of years of service which each State, district, and sub-district had furnished respectively, so that in ascertaining the required number for each district in order to obtain three hundred thousand men, each locality would receive full credit for the number of years of service furnished under the last call, or excess carried forward and credited upon that call, previous calls being filled with three years' men, or enlistments reduced to the three years' basis.

In crediting the excess that is carried forward from the call of July 18, 1864, and applied to the call of December 19, 1864, I consider not only the number of men of which the excess is composed, but also the period of their service; and the quotas assigned under the call of December 19, are thus reduced by this excess of service, and hence they should not be further reduced, except by enlistments subsequent to December 19, 1864, the date of the call for three hundred thousand men.

These quotations may be considered to embody the principle on which the raising of men for the military and naval service will be conducted under the present enrolment acts. For further details see *MICHIGAN*.

ARMY OPERATIONS. At the commencement of the year, the army of the Potomac, under Gen. Meade, was near Culpepper Court House, in Virginia, with the army under Gen. Lee in front and south of him. The Confederate Gen. Early had been ordered to command the forces in the Shenandoah valley, with his headquarters at Staunton. The Federal forces held Winchester, Martinsburg, and Harper's Ferry, and occupied the line of the Baltimore and Ohio Railroad, in Western Virginia. Gen. Burnside was still at Knoxville, in East Tennessee, with a line of communication into Kentucky. Eastward of him was Gen. Longstreet, with a division of the Confederate army. The army of Gen. Grant was in front of Chattanooga, in the southeast corner of Tennessee, and a force of the enemy before him at Dalton, under Gen. Bragg.

The following address to his soldiers had been issued by Gen. Grant, near the close of 1863:

HEADQUARTERS MILITARY DIVISION OF THE
MISSISSIPPI, IN THE FIELD.
CHATTANOOGA, TENN., Dec. 10, 1863.

The General Commanding takes this opportunity of returning his sincere thanks and congratulations to the brave Armies of the Cumberland, the Ohio, the Tennessee, and their comrades from the Potomac, for the recent splendid and decisive successes achieved over the enemy. In a short time you have recovered from him the control of the Tennessee River, from Bridgeport to Knoxville. You dislodged him from his great stronghold upon Lookout Mountain, drove him from Chattanooga valley, wrested from his determined grasp the possession of Missionary Ridge, repelled with heavy loss to him his repeated assaults upon Knoxville, forcing him to raise the siege there, driving him at all points, utterly routed and discomfited, beyond the limits of the State. By your noble heroism and determined courage, you have effectually defeated the plans of the enemy for regaining possession of the States of Kentucky and Tennessee. You have secured positions from which no rebellious power can drive or dislodge you. For all this the General Commanding thanks you collectively and individually. The loyal people of the United States thank and bless you. Their hopes and prayers for your success against this unholy rebellion are with you daily. Their faith in you will not be in vain. Their hopes will not be blasted. Their prayers to Almighty God will be answered. You will yet go to other fields of strife; and with the invincible bravery and unflinching loyalty to justice and right which have characterized you in the past, you will prove that no enemy can withstand you, and that no defenses, however formidable, can check your onward march.

By order of Major-General U. S. GRANT.

T. S. BOWMAN, Ass't Adj.-Gen.

The line of communication of Gen. Grant extended to Nashville by the railroad, through Stevenson and Murfreesboro'. Florence and Corinth were also held by a Federal force until the earlier portion of the year, when the former was occupied by the enemy. Military posts consisting of fortifications and heavy guns, with negro troops, were established on the Mississippi River at Cairo, Columbus, New Madrid, Fort Pillow, Memphis, Helena, Goodrich's Landing, Vicksburg, Natchez, Port Hudson, Baton Rouge, New Orleans, and Forts Jackson and St. Philip. There were also

forces at other points adjacent to these. A large force was under the command of Gen. Banks, in New Orleans, with detachments at Brashear City, and at Brownsville, on the Rio Grande. Gen. Steele occupied Little Rock, Arkansas, with a considerable force, and Gen. Rosecrans, in command of the department, had a small body of troops in Missouri. The military positions on the coast of North Carolina and South Carolina remained unchanged.

The number of troops in the field at the commencement of the year can be only indefinitely estimated. Between October, 1863, and May, 1864, seven hundred thousand new troops took the field, as stated by Senator Wilson in Congress. A portion of these supplied the place of the three years' men whose term of service expired in 1864. A large majority of the latter, however, reenlisted (*see* ARMY U. S.)

The number of Confederate troops in the field known as veterans, in the beginning of the year, was as follows: That portion of the Southern army which constituted the force under Gen. Lee (counting in Gen. Longstreet, who commanded a portion of his army), numbered ninety thousand troops. This is also counting in the troops which were in the vicinity of Abingdon, Lynchburg, and other portions of Southwestern Virginia and East Tennessee, formerly under Gen. Samuel Jones, who was detached from Gen. Lee's army late in September, 1863, to operate against Gen. Burnside, and afterwards under the command of Gen. Breckinridge. At Richmond and at Petersburg there were, not counting in citizens and home guards, about three thousand men. Between Petersburg and Weldon there were one thousand men. Along the railroad, between Weldon and Wilmington, there were at least six thousand men. The forces under Gen. Pickett numbered eight thousand men. Imboden and Moseby together had four thousand men—all guerrillas. This swelled the army in Eastern Virginia and North Carolina to one hundred and twelve thousand strong.

The second great army in the Confederacy was that under Gen. Johnston, a large portion of which was cavalry. The army known as the Army of the Tennessee was composed of two corps, each having six divisions of infantry, amounting to thirty-six thousand men. There were also several divisions of cavalry, numbering at least eighteen thousand men, making an aggregate of fifty-four thousand. This included the four divisions sent to reinforce Bishop Polk, and the two divisions sent to Mobile, and the entire cavalry under Wheeler, Wharton, and John Morgan. Gen. Johnston also had command of all the Confederate forces in Georgia, Alabama, and Mississippi, except those at Savannah, Mobile, and under Forrest, who had an independent (roving) commission. Before the arrival of Gen. Sherman at Meridian, Gen. Polk had eighteen thousand troops, only two thousand of which were veterans.

The forces in South Carolina and at Savannah, under Gen. Beauregard, and in Florida, under Gen. McCown, numbered ten thousand. This only included the veterans, or old soldiers, as the armies in these three localities above mentioned a little later numbered twenty-five thousand men.

The next regular armies of the Confederacy were the Trans-Mississippi forces, scattered in different portions of Arkansas and Texas, and all under the command of Lieut.-Gen. Kirby Smith, the army in Arkansas under Gen. Holmes, and the army in Texas under Gen. Magruder; the old soldiers of which numbered twelve thousand men.

The forces at Mobile, under Gens. Maury and Claiborne, numbered about eight thousand. The forces under Gen. Forrest, and under Chalmers, Lee, and Richardson, amounted to six thousand, which included all the veterans in the rebel service.

To this may be added, however, in the same line, twelve thousand soldiers engaged in important prison guard, and in the hospitals and quartermasters' and commissary departments. There were also about two thousand men engaged in the guerrilla warfare on the banks of the Mississippi. No other guerrilla bands of importance existed in Gen. Grant's department. There was not a single squad in Kentucky, East and Middle Tennessee, Northern Alabama or Northern Georgia. There were still several guerrilla organizations in West Tennessee and Northern Mississippi. The people themselves had rid the country.

The total of these veterans was two hundred and twenty-four thousand; to these were added, at the beginning of the year, one hundred and twenty thousand conscripts, making the number in the service three hundred and forty-four thousand.

The earliest operations of importance, in 1864, consisted of a movement under Gen. Sherman from Vicksburg, Mississippi, to Meridian, Alabama; another under Gen. Smith, from Memphis, Tennessee, to cooperate with Gen. Sherman; another under Gen. Grant's orders, from Chattanooga, Tennessee, upon Dalton, Georgia, and another under Gen. Schofield, who relieved Gen. Burnside, upon the forces under Gen. Longstreet, in East Tennessee.

Upon the return of Gen. Sherman from East Tennessee to Chattanooga, his command was stationed at Scottsboro, Alabama, and thence along the Memphis and Chattanooga railroad, to Huntsville. Near the end of January, Gen. Sherman went to Memphis and Vicksburg, to command an expedition. Corinth was abandoned, and the Memphis railroad eastward of Lagrange to Huntsville, and a large body of troops sent down the Mississippi to Vicksburg.

The following letter was addressed by Gen. Sherman, at this time, to his adjutant-general, relative to the course to be pursued by subordinate commanders of military districts to the inhabitants:

HEADQUARTERS DEPT. OF THE TENNESSEE,
VICKSBURG, January 31, 1864.

Major R. M. Sawyer, Asst. Adj.-Gen. Army of the Tennessee, Huntsville:

DEAR SAWYER: In my former letter I have answered all your questions, save one, and that relates to the treatment of inhabitants, known or suspected to be hostile, or "secesh." This is in truth the most difficult business of our army as it advances and occupies the Southern country. It is almost impossible to lay down rules, and I invariably leave this whole subject to the local commanders, but am willing to give them the benefit of my acquired knowledge and experience.

In Europe, whence we derive our principles of war, as developed by their histories, wars are between kings or rulers, through hired armies, and not between peoples. These remain, as it were, neutral, and sell their produce to whatever army is in possession.

Napoleon, when at war with Prussia, Austria, and Russia, bought forage and provisions of the inhabitants, and consequently had an interest to protect farms and factories which ministered to his wants. In like manner, the allied armies in France could buy of the French inhabitants whatever they needed, the produce of the soil, or manufactures of the country. Therefore, the rule was and is, that wars are confined to the armies, and should not visit the homes of families or private interests.

But, in other examples, a different rule obtained the sanction of historical authority. I will only instance that, when, in the reign of William and Mary, the English army occupied Ireland, then in a state of revolt, the inhabitants were actually driven into foreign lands, and were actually dispossessed of their property, and a new population introduced. To this day, a large part of the north of Ireland is held by the descendants of the Scotch emigrants, sent there by William's order and an act of Parliament.

The war which prevails in our land is essentially a war of races. The Southern people entered into a clear compact of Government, but still maintained a species of separate interests, history, and prejudices. These latter became stronger and stronger, till they have led to a war, which has developed the fruits of the bitterest kind.

We of the North are, beyond all question, right in our lawful cause, but we are not bound to ignore the fact that the people of the South have prejudices which form part of their nature, and which they cannot throw off without an effort of reason, or the slower process of natural change. Now, the question arises, should we treat as absolute enemies all in the South who differ from us in opinion or prejudice, kill or banish them; or, should we give them time to think, and gradually change their conduct so as to conform to the new order of things, which is slowly and gradually creeping into their country?

When men take arms to resist our rightful authority, we are compelled to use force, because all reason and argument cease when arms are resorted to. When the provisions, forage, horses, mules, wagons, etc., are used by our enemy, it is clearly our duty and right to take them, because otherwise they might be used against us.

In like manner, all houses left vacant by an inimical people are clearly our right, or such as are needed as store-houses, hospitals, and quarters. But a question arises as to dwellings used by women, children, and non-combatants. So long as non-combatants remain in their houses and keep to their accustomed business, their opinions and prejudices can in no wise influence the war, and therefore should not be noticed. But if any one comes out into the public streets and creates disorder, he or she should be punished, restrained, or banished, either to the rear or front, as the officer in command adjudges. If the people, or any of them, keep up a correspondence

with parties in hostility, they are spies, and can be punished with death or minor punishment.

These are well-established principles of war, and the people of the South having appealed to war, are barred from appealing to our Constitution, which they have practically and publicly defied. They have appealed to war, and must abide its rules and laws. The United States, as a belligerent party claiming right in the soil as the ultimate sovereign, have a right to change the population, and it may be and is, both politic and just, we should do so in certain districts. When the inhabitants persist too long in hostility, it may be both politic and right we should banish them and appropriate their lands to a more loyal and useful population. No man will deny that the United States would be benefited by dispossessing a single prejudiced, hard-headed, and disloyal planter, and substituting in his place a dozen or more patient, industrious, good families, even if they be of foreign birth. I think it does good to present this view of the case to many Southern gentlemen, who grew rich and wealthy, not by virtue alone of their industry and skill, but by reason of the protection and impetus to prosperity given by our hitherto moderate and magnanimous Government. It is all idle nonsense for these Southern planters to say that they made the South, that they own it, and that they can do as they please—even to break up our Government, and to shut up the natural avenues of trade, intercourse, and commerce.

We know, and they know, if they are intelligent beings, that, as compared with the whole world, they are but as five millions are to one thousand millions—that they did not create the land—that their only title to its use and usufruct is the deed of the United States; and if they appeal to war, they hold their all by a very insecure tenure.

For my part I believe that this war is the result of false political doctrine, for which we are all as a people responsible, viz.: that any and every people have a right to self-government; and I would give all a chance to reflect, and when in error to recant. I know slave owners finding themselves in possession of a species of property in opposition to the growing sentiment of the whole civilized world, conceived their property in danger, and foolishly appealed to war; and by skillful political handling involved with themselves the whole South on the doctrines of error and prejudice. I believe that some of the rich and slaveholding are prejudiced to an extent that nothing but death and ruin will extinguish, but hope that as the poorer and industrial classes of the South realize their relative weakness, and their dependence upon the fruits of the earth and good will of their fellow-men, they will not only discover the error of their ways, and repent of their hasty action, but bless those who persistently maintained a Constitutional Government, strong enough to sustain itself, protect its citizens, and promise peaceful homes to millions yet unborn.

In this belief, whilst I assert for our Government the highest military prerogatives, I am willing to bear in patience that political nonsense of slave rights, State rights, freedom of conscience, freedom of press, and such other trash as have deluded the Southern people into war, anarchy, bloodshed, and the foulest crimes that have disgraced any time or any people.

I would advise the commanding officers at Huntsville, and such other towns as are occupied by our troops, to assemble the inhabitants and explain to them these plain, self-evident propositions, and tell them that it is for them *now* to say, whether they and their children shall inherit the beautiful land, which, by the accident of nature, has fallen to their share. The Government of the United States has in North Alabama any and all rights which they choose to enforce in war, to take their lives, their homes, their lands, their every thing, because they cannot deny that war does exist there, and war is simply power unrestrained by constitution or compact. If they want eternal war, well and good—we will accept

the issue and dispossess them, and put our friends in possession. I know thousands and millions of good people who, at simple notice, would come to North Alabama and accept the elegant houses and plantations now there. If the people of Huntsville think different, let them persist in war three years longer, and then they will not be consulted. Three years ago, by a little reflection and patience they could have had a hundred years of peace and prosperity, but they preferred war; very well, last year they could have saved their slaves, but now it is too late—all the powers of earth cannot restore to them their slaves any more than their dead grandfathers. Next year their lands will be taken, for in war we can take them, and *rightfully*, too, and in another year they may beg in vain for their lives. A people who will persevere in war beyond a certain limit, ought to know the consequences. Many, many people, with less pertinacity than the South, have been wiped out of national existence.

My own belief is, that even now the non-slaveholding classes of the South are alienating from their associates in war. Already I hear crimination. Those who have property left, should take warning in time.

Since I have come down here, I have seen many Southern planters who now hire their negroes, and acknowledge that they knew not the earthquake they were to make by appealing to secession. They thought that the politicians had prepared the way, and that they could part in peace. They now see that we are bound together as one nation, by indissoluble ties, and that any interest or any people that set themselves up in antagonism to the nation, must perish.

While I would not remit one jot or tittle of our nation's rights, in peace or war, I do make allowances for past political errors and false prejudices. Our national Congress and Supreme Courts are the proper arenas in which to discuss conflicting opinions and not the battle-field.

You may not hear from me again, and if you think it will do any good, call some of the people together, and explain these my views. You may even read to them this letter, and let them use it, so as to prepare them for my coming.

To those who submit to the rightful law and authority, all gentleness and forbearance, but to the petulant and persistent secessionists, why, death is mercy, and the quicker he or she is disposed of, the better. Satan, and the rebellious saints of heaven, were allowed a continuance of existence in hell, merely to swell their just punishment. To such as would rebel against a Government so mild and just as ours was in peace, a punishment equal would not be unjust.

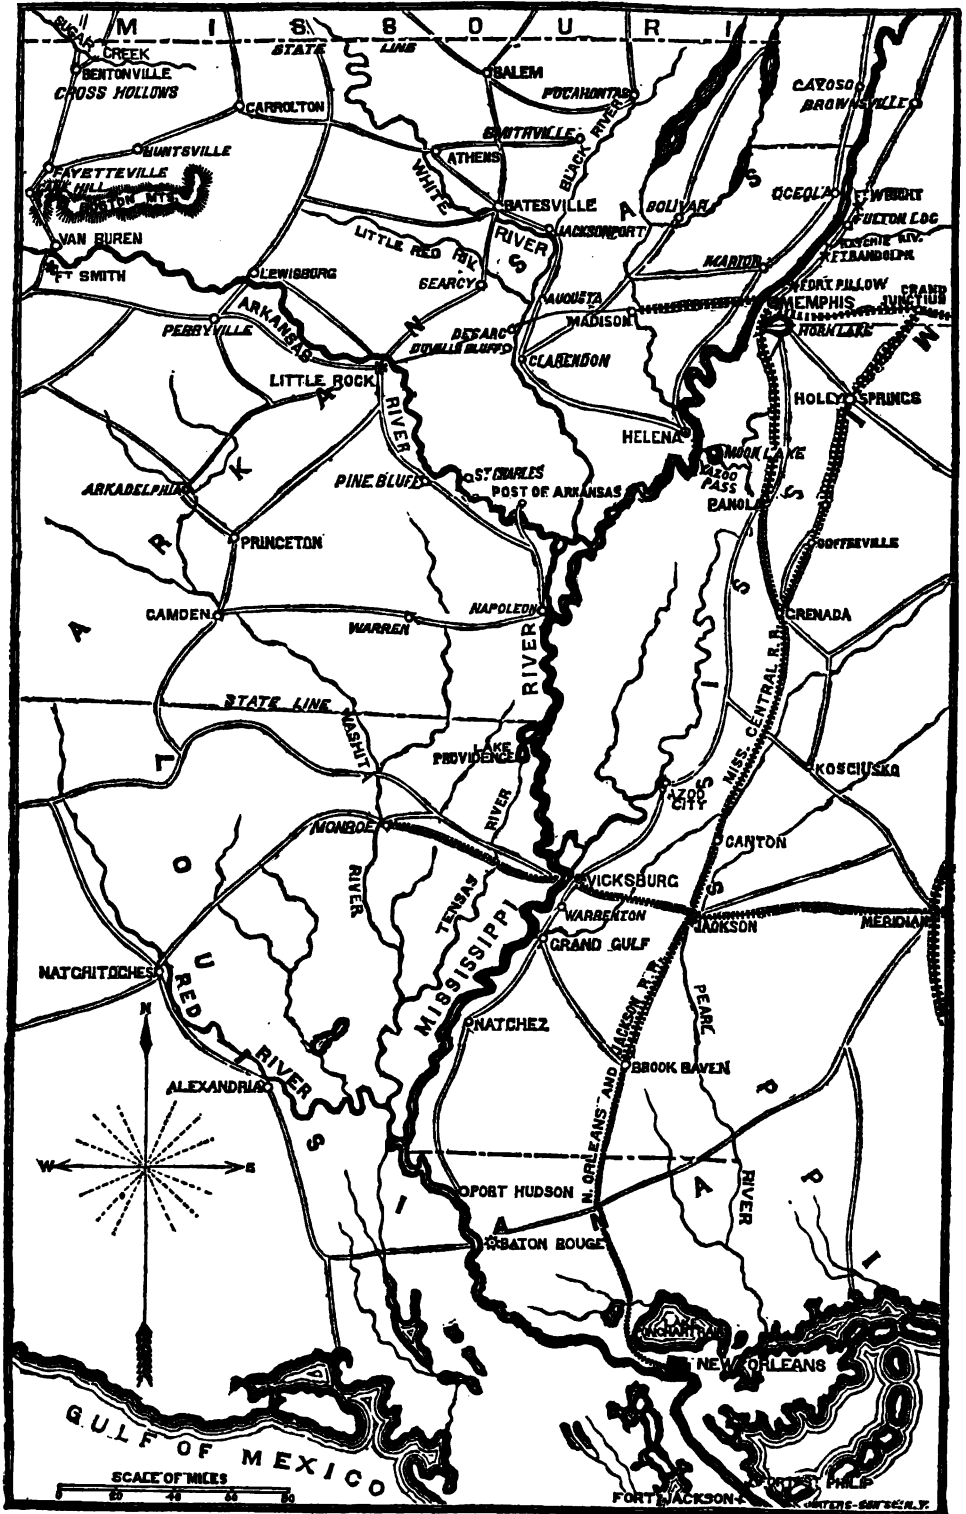

We are progressing well in this quarter. Though I have not changed my opinion that we may soon assume the existence of our National Government, yet years will pass before ruffianism, murder, and robbery will cease to afflict this region of our country.

Truly your friend,

(Signed)

W. T. SHERMAN,
Major-General Commanding.

The advance of Gen. Sherman's movement, consisting of the 17th corps, under Gen. McPherson, left Vicksburg on February 8d, in light marching order, with rations for some days. The enemy were encountered after crossing the Big Black River, during the day, and some skirmishing ensued. The encampment was made that night on the west side of Baker's Creek, the enemy appearing in line of battle on the opposite side. The Confederate force consisted of about two thousand cavalry under Gen. Whitworth, who was in command from Jackson westward. At Canton there was

a force of about five thousand men under Gen. Loring, and at Meridian Gen. Polk with ten thousand more. The latter officer was in command of the department.

The preparations for Gen. Sherman's expedition had attracted the attention of the enemy, and many unaware of the difficulties of such a movement across the country, had supposed his object might be an attack on Mobile. The uncertainty which existed is shown by the following order, issued at a later date:

MOBILE, February 10, 1864.

DEAR SIR: I have just been informed by General Polk that the enemy is moving from Morton against Mobile. It is, therefore, my duty to ask all persons who cannot take part in the defence of the city to leave it.

I am, sir, very respectfully yours,

DABNEY MAURY,

Major-General Commanding.

To Col. JOHN FORSYTH, Mobile.

The Governor of Alabama, upon the first advance of the Federal troops from Vicksburg, issued the following address to the people:

EXECUTIVE DEPARTMENT OF ALABAMA, }
MONTGOMERY, February 6, 1864.

To the People of Alabama:

The recent action of Congress has deprived the State of much of the materials of the second-class militia. It is important to the defence of the State, that Alabama shall have more troops subject to the call of her Commander-in-chief. We have, within the State, the materials for an efficient army. It needs nothing but the spirit, the prompt and willing spirit to fight, as men ought to fight, to guard our firesides and drive the hireling Yankees from our borders. We are threatened with raids into the heart of the State.

As your Executive Chief I call upon the middle aged, the young men and boys, to organize into companies at once, and report, without delay, that they are organized and ready. I cannot suppose that Alabamians will wait to be drafted into the service. The enthusiastic reenlistment of our veteran troops in the Virginia and Tennessee armies has caused a thrill of joyful hope to animate the hearts of even the creaking and despondent. If these battle-scarred heroes, who for three years have carried their lives in their hands, ready to be sacrificed in the defence of their homes and liberty, are willing to battle on while the feet of a hated foe press our soil, shall we at home be laggards in the race of glory? I trust no such damning stigma shall rest upon the honored name of Alabama.

I confidently expect a hearty, prompt, and noble response to this call.

The rolls of companies will be reported to the Adjutant-General.

T. H. WATTS, Governor of Alabama.

The force of Gen. Sherman consisted of two corps under Gen. McPherson and Hurlbut, estimated at thirty thousand men, with sixty pieces of light artillery. He reached Jackson on February 6th, and pressed forward toward Meridian. The enemy fell back, destroying all provision, and making a desert of the country. From Jackson Gen. Sherman crossed the Pearl River, and passed through Brandon to Morton. Here the enemy had made dispositions for a battle, but retired during the night. On the next day the army advanced and reached Meridian. The enemy state that all the Confederate Government property was

previously removed, and nearly all the machinery of the railroad company. The force under Gen. Polk fell back across the Tombigbee. On his arrival at Meridian Gen. Sherman issued the following congratulatory address to his troops:

HEADQUARTERS, DEPARTMENT OF THE TENNESSEE, }
MERIDIAN, MISS., February 15, 1864.

The General Commanding conveys his congratulations and thanks to the officers and men composing this command for their most successful accomplishment of one of the great problems of the war. Meridian, the great railway centre of the Southwest, is now in our possession, and by industry and hard work can be rendered useless to the enemy, and deprive him of the chief source of supply to his armies. Secrecy in plan and rapidity of execution accomplish the best results of war; and the General Commanding assures all that by following their leaders fearlessly and with confidence they will in time reap the reward so dear to us all—a peace that will never again be disturbed in our country by a discontented minority.

By order of

W. T. SHERMAN,

Major-General Commanding.

On the same day he issued the following instructions:

HEADQUARTERS, DEPARTMENT OF THE TENNESSEE, }
MERIDIAN, MISS., February 15, 1864.

1. The destruction of the railroads intersecting at Meridian is of great importance, and should be done most effectually. Every tie and rail for many miles in each direction should be absolutely destroyed or injured, and every bridge and culvert should be completely destroyed. To insure this end, to General Hurlbut is entrusted the destruction east and north, and to General McPherson the roads west and south. The troops should be impressed with the importance of this work, and also that time is material, and therefore it should be begun at once and be prosecuted with all the energy possible. Working parties should be composed of about one-half the command, and they should move by regiments, provided with their arms and haversacks, ready to repel attacks of cavalry. The other half in reserve will be able to watch the enemy retreating eastward.

2. Colonel E. F. Winalow, commanding cavalry, will keep his cavalry in advance of the party working eastward, and will act as though this army were slowly pursuing the enemy.

3. Special instructions will be given as to the general supply train; and the troops now in Meridian will, under proper brigade parties, collect meal, meat, and supplies. The destruction of buildings must be deferred till the last moment, when a special detail will be made for that purpose.

By order of

W. T. SHERMAN,

Major-General Commanding.

Gen. Sherman reports that while at Meridian he made "the most complete destruction of railroads ever beheld." This was done on the road running south as far as Quitman; on the east as far as Cuba Station, twenty miles; and two miles north to Lauderdale Springs. Lauderdale County was already desolate, and the country between Meridian and Demopolis was sterile and unproductive. While at Meridian he heard nothing of the cavalry force under Gen. W. S. Smith, who was ordered to be there from Memphis by February 10th; and after occupying the town for a week, and his supplies growing short, he began to fall back toward Vicksburg, making a circuit by the north to Canton. This place was reached February

26th. His total loss was reported at one hundred and seventy men killed and wounded.

Meantime, Gen. W. S. Smith, who was ordered to report to Gen. Sherman at Meridian, moved from Memphis on February 11th, with a force of seven thousand men, consisting of cavalry and a brigade of infantry. After two days the expedition reached the Tallahatchie. A demonstration was made westward by the infantry toward Panola, thus attracting the attention of a force of the enemy, while the cavalry moved eastward to New Albany, where the river was crossed without opposition. Gen. Smith then pushed forward, and in the vicinity of Houston encountered some troops under Col. Gholson. They fell back to a swamp, where a considerable force was concentrated. Finding it impossible to turn either flank of this position, Gen. Smith moved rapidly eastward, while a demonstration was made in front of the enemy as if an attack was intended. On the same day he surprised and entered Okalona. The 9th Illinois cavalry, Lieut.-Col. Burgh, was then sent to Aberdeen to endeavor to secure a crossing of the Tombigbee. On the next morning Col. Grierson was sent forward with a brigade to support the 9th, with directions to threaten Columbus strongly. With the remaining force Gen. Smith advanced along the railroad toward West Point, tearing up the track and burning all the corn he found. The quantity which he destroyed is reported as nearly a million of bushels, with about two thousand bales of cotton. During this portion of the march negroes flocked to Gen. Smith by hundreds, mounted on their masters' horses and mules. They welcomed Gen. Smith as their deliverer whenever he met them: "God bless ye; has yer come at last? We've been lookin' for you for a long time, and had almost done gone give it up," was the cry of many. They bid farewell to their wives and children and marched in the van.

Hearing that the enemy was concentrated in heavy force at West Point, the brigade at Aberdeen was called over by a forced march to the railroad, at a station fifteen miles north of West Point. Two miles north of this station Gen. Smith encountered a force of the enemy, which fell back, after a sharp skirmish, through the town to a swamp on the right. Gen. Smith now found the enemy on his front in strong force, holding all the crossings of the swamp on the right; also on the line of the Ootibbeha in front, and that of the Tombigbee River on his left. He could attack only with light carbines, as his horses were useless on the marshy ground. The enemy were armed with muskets and rifles. Gen. Smith was also now encumbered with pack-trains, and mules and horses captured, numbering about two thousand, beside as many negroes. To guard these his effective force was reduced, and he therefore determined to make a demonstration in front, and at the same time fall back with his trains and his main body to Okalona.

This movement was successfully executed, although the enemy pressed closely, under the command of Gens. Forrest, Lee, and Chalmers. At Okalona, on the 23d, Gen. Smith was attacked, and suffered severely in the loss of men, besides five howitzers. His retreat that day was followed up. Under cover of the night he moved toward Pontotoc. This movement is thus described: "Picture to yourself, if you can, a living, moving mass of men, negroes, mules, and horses, of four thousand or five thousand, all *en masse*, literally jammed, huddled, and crowded into the smallest possible space; night setting in; artillery and small arms booming behind us; cavalry all around and ahead, moving on, on, on over fences, through fields and brush, over hills and across mud-holes, streams, and bridges, and still on, on into the night, until the moon rises on the scene and shows us some of the outlines of this living panorama. I forgot to say that in this crowd were a lot of prisoners, too, once or twice attempting to escape, followed by the swift report of the revolver, once with bitter consequences to the escaping prisoners."

During the day the enemy had moved on each flank, with the evident design of reaching the Tallahatchie River in advance, and forming a junction to prevent the crossing of Gen. Smith and capture his whole force; but, by marching all night, he safely crossed the river at New Albany. On the 23d the rear guard had skirmishing all day. On the 25th the advance reached Memphis, at 11 p. m., having marched nearly fifty miles that day. It was reported that a million bushels of corn were destroyed, many miles in length of the Memphis and Ohio Railroad, bridges, cotton-gins, and buildings. Says one: "We have probably devoured fifty thousand hams, some eggs, chickens, turkeys, milk, and butter by wholesale, and such *et ceteras* as can be found in so rich a country as we have passed through." The captured stock and trains were brought off safely. The loss was less than two hundred killed and captured. The expedition failed to make a junction with Gen. Sherman.

When the expedition of Gen. Sherman returned toward Vicksburg, a detachment was sent up the Yazoo River, accompanied with some gunboats. Yazoo City was attacked, but the enemy held it until reinforced. An amount of stores and cotton was destroyed. The Federal loss was about fifty killed and wounded. The general results of this movement, including those of Gens. Sherman and Smith, is stated to have been as follows: One hundred and fifty miles of railroad, sixty-seven bridges, seven hundred trestles, twenty locomotives, twenty-eight cars, several thousand bales of cotton, several steam mills, and over two million bushels of corn were destroyed. Some prisoners were captured, and upwards of eight thousand negroes and refugees came in with the various columns.

Many dwellings and all the outbuildings and farming utensils were destroyed.

The expedition of Gen. Sherman was generally supposed to be designed for the capture of Mobile. But, however that may have been, no official statement has been made. As it advanced toward Meridian, a force was detached from the army of Gen. Johnston, formerly commanded by Gen. Bragg, near Dalton, in Georgia, and sent to reinforce Gen. Polk. Two divisions of Gen. Hardee's Corps, under Gens. Stewart and Anderson, composed this force. To counteract this movement of the enemy, another was set on foot by Gen. Grant, then in command at Chattanooga. This consisted of an advance of the Fourteenth Corps, under Gen. Palmer, upon Dalton. It commenced on February 22d. The divisions of Gens. Jeff. C. Davis, Johnson, and Baird participated on the right, or direct road to Dalton, and the division of Gen. Stanley, under command of Gen. Crufts, on the left. This latter division had been encamped at Cleveland, and formed a junction with the main force between Ringgold and Tunnel Hill. The advance of the main force passed to the left of the Chickamauga battle-field, over Taylor's Ridge and through Ringgold Gap. A small force of the enemy was seen here, who retired. Ringgold, twenty-three miles from Chattanooga, was occupied that night. On the next day the column moved at daylight, and during the forenoon there was constant skirmishing with the cavalry of the enemy. At noon Gen. Crufts made a junction, and the whole corps moved forward in line of battle, with cavalry in advance and on the flanks, until it reached the vicinity of Tunnel Hill. On the ridge were four pieces of artillery, under Gen. Wheeler, which soon opened fire. These were dislodged in a short time by the 2d Minnesota and 9th Indiana batteries, and the ridge occupied about 4 P. M. The advance continued and the cavalry force pressed forward in pursuit of the few scattered enemies, until it was checked by a cross-fire from six guns, at Rocky Fall, in a gorge through which the railroad and turnpike passes. The enemy succeeded in holding that position for the night. On the next morning, after considerable heavy fighting, the corps advanced into the town and captured about a hundred and fifty prisoners. The movement was immediately continued upon Dalton, distant seven miles from Tunnel Hill. The corps descended through the gaps into the Rocky Fall valley, the division of Gen. Crufts being on the left, Gen. Johnson on the right, Gen. Baird on the left centre, and Gen. Davis on the right centre. During the whole forenoon there was lively skirmishing, and the enemy's force evidently increased in numbers. Gen. Palmer advanced cautiously within two miles of Dalton, when it appeared that preparations had been made by the whole of Gen. Johnson's army to receive him. Considerable activity was perceptible in the interior of the enemy's

works, and their cavalry began to hover about the flanks of Gen. Palmer's corps. Deserters reported that two divisions which had started toward Mobile had returned. Gen. Palmer now fell back to Tunnel Hill. His loss in the expedition was about three hundred and fifty killed and wounded. That of the enemy is unknown. Some prisoners were taken by Gen. Palmer. On March 10th he had fallen back to Ringgold.

The movement in East Tennessee consisted merely in an advance toward the position of Gen. Longstreet, who was then reported to be retreating into Virginia. He finally joined the army of Gen. Lee with his command.

In the Department of the South, authority was given to Gen. Q. A. Gillmore commanding, on December 22d, 1864, to undertake such operations as he might deem best on a conference with Admiral Dahlgren commanding the naval force. On the 18th of January the President wrote to Gen. Gillmore as follows:

EXECUTIVE MANSION, WASHINGTON, January 18, 1864.

MAJOR-GENERAL GILLMORE: I understand an effort is being made by some worthy gentlemen to reconstruct a legal State Government in Florida. Florida is in your department, and it is not unlikely you may be there in person. I have given Mr. Hay a commission of major and sent him to you with some blank books and other blanks to aid in the construction. He will explain as to the manner of using the blanks, and also my general views on the subject. It is desirable for all to cooperate; but if irreconcilable differences of opinion shall arise you are master. I wish the thing done in the most speedy way possible, so that when done it be within the range of the late proclamation on the subject. The detail labor will of course have to be done by others, but I shall be greatly obliged if you will give it such general supervision as you can find consistent with your more strictly military duties.

A. LINCOLN.

On January 14th Gen. Gillmore proposed to the War Department to occupy the west bank of the St. John's River in Florida, and establish small depots there preparatory to an advance west. On the 22d of January he was informed by the Secretary that the matter was left entirely to his judgment and discretion with the means at his command. On January 31st Gen. Gillmore again wrote to the Secretary that the objects to be obtained by the operations were:

- 1st. "To procure an outlet for cotton, lumber, timber, &c.
 - 2d. "To cut off one of the enemy's sources of commissary supplies, &c.
 - 3d. "To obtain recruits for my colored regiments.
 - 4th. "To inaugurate measures for the speedy restoration of Florida to her allegiance in accordance with the instructions which he had received from the President, by the hands of Major John Hay, Assistant Adjutant-General."
- On the same day Gen. Gillmore issued the following order:

HEADQUARTERS DEPARTMENT OF THE SOUTH. }
HILTON HEAD, S. C., January 31, 1864. }

GENERAL ORDER No. 16.—In accordance with the provision of the Presidential Proclamation of Pardon and Amnesty, given at Washington on the 8th day of December, in the year of our

Lord one thousand eight hundred and sixty-three, and in pursuance of instructions received from the President of the United States, Major John Hay, Assistant Adjutant-General, will proceed to Fernandina, Florida, and other convenient points in that State, for the purpose of extending to the citizens of the State of Florida an opportunity to avail themselves of the benefits of that Proclamation, by offering for their signature the oath of allegiance therein prescribed, and by issuing to all those subscribing to said oath certificates entitling them to the benefits of the Proclamation. Fugitive citizens of the State of Florida, within the limits of this Department, will have an opportunity to subscribe to the same oath and secure certificates in the office of the Post Commander at Hilton Head, South Carolina.

By command of Maj.-Gen. Q. A. GILLMORE.
ED. W. SMITH, Ass't Adj.-Gen.

Orders were issued to Brig.-Gen. Truman Seymour on February 5th to proceed to Jacksonville, Fla., and effect a landing and push forward his mounted force to Baldwin, seventy miles from Jacksonville. It was the junction of the railroads from Jacksonville and Fernandina. On the 6th the expedition, consisting of twenty steamers and eight schooners, under convoy of the gunboat Norwich, left Hilton Head and arrived at Jacksonville on the next day, February 7th. When the landing of the troops commenced a small body of the enemy in a wood adjacent to the town fired three shots, thus wounding two or three persons. A company of colored troops went in pursuit, and the enemy after firing a few shots fled.

About twenty-five families remained in Jacksonville. They were chiefly women and children, and all professed to be in favor of the Union. The railroad was in running order to Tallahassee. Provisions and cattle were abundant. Gen. Joseph Finegan was in command of the forces of the enemy.

In the afternoon of the 8th the march to the interior of the State was commenced. The forces were divided into three columns, commanded respectively by Cola, Barton, Hawley, and Henry. Col. Barton took the main road, Col. Henry took the road to the right of that, and Col. Hawley one still further to the right. After an advance of three miles the three roads united on the line of the railroad. Here the infantry bivouacked for the night, and Col. Guy V. Henry, with the 40th Massachusetts infantry, the independent battalion of cavalry and Elder's horse battery B, 1st artillery, pushed forward on a reconnaissance. It was dark when the movement commenced at a brisk trot toward Lake City. For the distance of five miles none of the enemy were seen. The country through which the force passed was low, level, and marshy. On each side the road was flanked by pine forests. The soil was that of fair farming land to Lake City, but beyond it becomes a rich sandy loam. A mile and a half from Camp Finegan a picket station was discovered, but the pickets had fallen back to the reserve post. Pressing forward, after a short stop, Col. Henry soon came in sight of Camp Finegan on the right. About two hundred cavalymen were seen drawn up in line of battle. Having

no apprehension from this force, he continued his advance, and three miles beyond surprised and captured a camp of artillery containing four guns, camp and garrison equipage, including wagons, tents, commissary stores and officers' baggage. Three prisoners were taken. The remainder of the force escaped to the woods. This body was falling back, and had not anticipated so rapid an advance of the Federal force. Early on the next morning the advance reached Baldwin, a place of fifteen buildings. Here three cars, two of which were filled with corn, a three-inch rifled gun, a considerable quantity of cotton, rice, tobacco, and other stores were captured. At evening Gen. Gillmore and Seymour arrived.

On the 10th Col. Henry continued his advance. At Barber's Station a thousand barrels of turpentine and five hundred pounds of bacon were captured. An advance guard was then sent forward to see if the enemy were in position to defend the south fork of the St. Mary's river, while the remainder of the force cautiously followed. The enemy in small force were found defending the fork, when a skirmish ensued, in which four were killed on the Federal side and thirteen wounded. Two of the enemy were killed and three wounded, when they fled to the woods. Their force was about one hundred and fifty men. At 6 p. m. Col. Henry reached Sanderson, forty-miles from Jacksonville. The place had been abandoned by the enemy, and a large amount of stores committed to the flames. On the 11th the command encamped five miles from Lake City, which was held by the enemy but evacuated during the night. This was unknown to Col. Henry, and, as he was without infantry, he retraced his steps to Sanderson. The most important property captured was as follows: Two twelve-pounder rifled guns, two six-pounder guns, one three-inch gun, two other guns, five caissons, a large quantity of ammunition, an immense supply of camp and garrison equipage, four railroad cars, one hundred and thirteen bales of cotton, four army wagons, one hundred and five horses and mules, a large stock of saddlery, tanning machinery, three thousand and eighty-three barrels turpentine, six thousand bushels corn; three large warehouses were destroyed. On the 11th telegraphic communication was established between Jacksonville and Baldwin, and on that day Gen. Gillmore sent instructions to Gen. Seymour not to risk a repulse in advancing upon Lake City, but to hold Sanderson unless there were reasons for falling back, and also in case his advance met with serious opposition to concentrate at Sanderson and the south fork of the St. Mary's. On the 18th Gen. Seymour was further instructed to concentrate at Baldwin without delay. This was done at once. Meantime, Col. Henry was sent toward the left to capture some railroad trains at Gainesville on the Fernandina and Cedar Keys railroad. This resulted in a skirmish with a

body of East Florida cavalry, which was repulsed. A reconnaissance was also made along the Georgia State line by Col. Scammon, destroying several small works of the enemy. After arranging with Gen. Seymour for the construction of certain defences at Jacksonville, Baldwin, and the south fork of the St. Mary's, Gen. Gillmore departed to Hilton Head. His understanding was that no advance would be made by Gen. Seymour without further instructions, and not until the defences were well advanced. It was the intention of Gen. Gilmore to construct several works capable of resisting a *coup de main* at Jacksonville, Baldwin, Pilatka, and perhaps one or two other important points, so strong that two or three hundred men would be sufficient at each. His desire was to see the lumber and turpentine trade on the St. John's River revived, and to give assurance that the occupation of the river was intended to be permanent.

On Thursday the 18th, the force of Gen. Seymour at Jacksonville left camp with ten days rations, and advanced on the line of the railroad sixteen miles. On the next day it moved seventeen miles to Barber's Station, the roads having been bad on the whole route. On the 20th the troops were in motion at an early hour, the light cavalry in advance. The line of march was across the south fork of the St. Mary's, and up the road to Sanderson, nine miles distant. The day was beautiful. The sky was clear overhead, and the savannahs which stretched out on each side of the sandy road winding through the pine woods, were warm with the sunshine. Sanderson was reached without a halt. There the infantry made a short halt, but the cavalry kept its position about two miles in advance. The march was resumed at midday toward Lake City. Gen. Seymour's force, consisting of five thousand men, moved in three columns, Col. Hawley's brigade on the left, Col. Barton's in the centre, and Col. Scammon's regiment on the extreme right. The cavalry in advance were led by Col. Henry with Elder's battery. In the rear was the colored brigade led by Col. Montgomery. About six miles from Sanderson the enemy's mounted pickets, thirty or forty in number, were met and driven in after exchanging shots. The main body hurried forward a distance of two miles, when three or four cannon shot of the enemy fell among the head of the column. Skirmishing commenced immediately. The artillery dashed into position on the gallop, the infantry on the double-quick step, and in a brief period of time a severe battle was progressing. Elder's battery unlimbered at the head of the road, Hamilton's to the left, and Langdon's on the extreme left, opening at short range with canister shot. The artillery of the enemy consisted of four or five guns, and was badly served at first, being fired too high to do injury. Gen. Seymour's line of infantry was well formed for the position. With the exception of a small field of a few acres, it was in the woods, amid a

heavy growth of pine timber, and with swampy ground intervening between it and the enemy, of whose position nothing was known. The battle lasted for three hours. Two of the Federal batteries were disabled early in the action. The 7th New Hampshire broke, but was rallied again. The 8th U. S. colored fought well until the loss of their leader, when they fled. The contest closed at dusk, and Gen. Seymour finding his force repulsed with some loss, and the colored reserve unequal to the emergency, retired from the field leaving his dead and wounded. The retreat for a short distance was conducted in successive lines of battle, but finding the enemy were not disposed to follow the line was changed, and the force retired in column, Barton's brigade bringing up the rear covered by the cavalry and Elder's battery. A halt was made at Sanderson, six or seven miles, coffee cooked, and some attention given to the wounded. From Sanderson to Barber's Station, says a writer, "ten miles, we wended or crawled along, the wounded filling the night air with lamentations, the crippled horses neighing in pain, and a full moon kissing the cold, clammy lips of the dying." On the next morning the retreat was continued to Baldwin, where the cavalry of the enemy made their appearance. Many of the wounded were here sent on cars drawn by mules to Jacksonville, and Gen. Seymour, knowing that the enemy was following in force, ordered the commissary stores, worth about sixty thousand dollars, to be destroyed, and resumed his march to Jacksonville. His loss in killed, wounded, and missing was about twelve hundred.

The following despatch from the Governor of Florida presents the enemy's account of the battle:

TALLAHASSEE, FLA., February 21.

TO PRESIDENT DAVIS: I have just received the following despatch from Gen. Finegan, dated yesterday:

"I met the enemy in full force to-day, under Gen. Seymour, and defeated him with great loss. I captured five pieces of artillery, hold possession of the battle-field, and the killed and wounded of the enemy. My cavalry are in pursuit. I don't know precisely the number of prisoners, as they are being brought in constantly. My whole loss, I think, will not exceed two hundred and fifty killed and wounded. Among them I mourn the loss of many brave officers and men."

I understand that Gen. Finegan also captured many small arms.

(Signed) JOHN MILTON, Governor.

Gen. Seymour now occupied Jacksonville with his forces, and the enemy took up a position at Camp Finegan, eight miles distant, toward Baldwin. The following correspondence passed, at this time, between Gen. Seymour and Gen. Finegan commanding the enemy's force:

HEADQUARTERS DISTRICT OF FLORIDA, D. S. }
JACKSONVILLE, FLA., Feb. 23, 1864. }

SIR: In view of the inconveniences to which the wounded prisoners in your hands, since the action of the 20th, near Olustee, Florida, may be unavoidably subjected, I have the honor to propose that they may be paroled, and delivered within my lines as

soon as possible, and Capt. G. S. Dana, of my staff, the bearer of this communication, is authorized to make such arrangements therefor as may be convenient, and a horse car or ambulance will be sent for the wounded, at such times as may be designated, should this proposal be acceded to.

The body of Col. C. W. Fribley was left on the field at Olustee. If there have been any means of identifying his person, I request that his grave may be so marked, that at some future day his family may be able to remove his remains.

I am, General, very respectfully,

Your obedient servant,

T. SEYMOUR,

Brigadier-General Commanding.

To the General commanding the Confederate forces in Florida.

HEADQUARTERS DISTRICT EAST FLORIDA, }
BALDWIN, FLA., Feb. 24, 1864.

Brig.-Gen. T. Seymour, Commanding United States forces, Jacksonville:

GENERAL: I have the honor to acknowledge the receipt of your communication of the 23d inst., proposing "that the wounded prisoners left by you on the field of battle, at Ocean Pond, on the 20th inst., be paroled and sent within your lines, and requesting that, if the body of Col. C. W. Fribley, left on the ground, can be identified, that his grave be marked, so that at some future day his family may be able to remove his remains."

In reply, I have to state that the wounded prisoners have been sent forward and properly taken care of, and will be kept to await the future action of my Government in reference to a general exchange of prisoners.

I regret to state that the body of Col. Fribley has not been identified.

Very respectfully, your ob't serv't,

JOSEPH FINEGAN.

Brigadier-General Commanding.

HEADQUARTERS DISTRICT OF FLORIDA, D. S., }
JACKSONVILLE, FLA., Feb. 25, 1864.

GENERAL: Notwithstanding the information contained in your communication of the 24th inst., respecting the body of the late Col. Fribley, that it has not been identified, I have the honor to urge that measures be taken to ascertain the possession of some of the articles upon his person, with a view to the return of some of them to his widow, at this place. The accompanying memorandum may serve to assist in whatever investigation you may decide to institute.

And I feel assured that whatever can be done by you to mitigate the sorrow that is the lot of a most deserving and greatly suffering lady, will be cheerfully accorded.

And any remuneration that may be desired or necessary to procure any part of the personal memorials mentioned in this memorandum, will be duly forwarded to the parties having them in possession.

I have further to request, if the arrangement can be made, that Mrs. Fribley herself, accompanied by the adjutant of the late colonel, may be permitted to pass within your lines, in the hope of obtaining more information than can perhaps otherwise be anticipated.

The circumstances of this contest will certainly not be injuriously affected by such a concession to humanity.

Respectfully, your obedient servant,

T. SEYMOUR, Brig.-Gen. Commanding.

Brig.-Gen. Joseph Finegan, Commanding Confederate forces East Florida.

HEADQUARTERS DISTRICT EASTERN FLORIDA, }
February 25, 1864.

GENERAL: I have the honor to acknowledge the receipt of your communication of the 25th inst., and to reply that I will cause the proper inquiries to be made to obtain the information sought for in your

letter, and will, as soon as practicable, forward you a reply by flag of truce.

I regret to say that I consider it at present objectionable, for reasons which it is needless for me to state, but which will doubtless be appreciated by yourself, to grant a permit for Mrs. Fribley and the adjutant of her late husband's regiment to visit the battle-field of Ocean Pond. At a future day these obstacles may be removed.

I am, very respectfully, your obedient servant,

(Signed)

JOSEPH FINEGAN,

Brigadier-General Commanding.

Brig.-Gen. T. Seymour, Commanding United States forces Jacksonville, Florida.

HEADQUARTERS DEPARTMENT SOUTH CAROLINA, }
GEORGIA AND FLORIDA, March 4, 1864.

District of Florida headquarters, forces in the field.

GENERAL: In further reply to your communication of the 25th of February, 1864, I have the honor to forward through you to the widow of the late Col. Fribley, an ambrotype, supposed to be the one referred to in the memorandum accompanying your communication.

Traces have also been discovered of his watch, a letter from his wife to himself, and his diary, and steps have been taken to recover possession of them. If successful, the two former articles will be forwarded.

That I may not be misunderstood, it is due to myself to state that no sympathy with the fate of any officer commanding negro troops, but compassion for a widow in grief, has induced these efforts to recover for her relics which she must naturally value.

Very respectfully, your obedient servant,

(Signed)

W. M. GARDNER,

Brigadier-General Commanding.

To Brigadier-General T. SEYMOUR,

Comm'g United States forces, Jacksonville, Fla.

A small Federal force remained at Jacksonville for several months, and many raids in different directions were made. (See FLORIDA.) No important military operations took place. The movement to reorganize the State ceased after the battle at Olustee.

Early in the year, a concentration of forces at New Orleans commenced. To these were added a portion of the forces of Gen. Sherman. After his return to Vicksburg from his expedition to Meridian, a considerable body of his troops moved to join Gen. Banks, while the division of Gen. A. J. Smith remained at Vicksburg, ready to coöperate. It was the purpose of Gen. Banks to open the region of Western Louisiana to trade, and scatter or destroy the forces of the enemy. During only the months of March and April the Red River has sufficient water to be navigable by the largest vessels.

In the beginning of the month of March, the division of Gen. Franklin, who formerly held a command in the army of the Potomac, moved from New Orleans by the railroad to Brashear City, thence along the Bayou Teche and Opelousas, to Alexandria. This was substantially the same route as was taken by the army in the previous year, under Gen. Banks. (See ANNUAL CYCLOPEDIA, 1863, ARMY OPERATIONS.) In the mean time the most formidable fleet ever seen in the western waters had been collected under Rear-Admiral Porter, at the mouth of the Red River. It consisted of twenty powerful armed steamers of all classes,

from the light to the heaviest draught. Among them were the monitors Ozark, Osage, Neosho; the ironclads Benton, Carondelet, Pittsburg, Mound City, Louisville, Essex, and Chillicothe; the rams Price, Choctaw, Lafayette, besides the lighter boats, Blackhawk, Onachita, Champion, and Tyler.

On the 10th of March, about ten thousand troops under Gen. A. J. Smith embarked in twenty transports at Vicksburg, and proceeded to join the fleet. This force consisted of the first and third divisions of the sixteenth army corps, and the first and fourth divisions of the seventeenth. It was intended to unite with the force of Gen. Banks, to which was subsequently to be added the force under Gen. Steele from Arkansas. The principal force of the enemy was under Gen. Richard Taylor, at Shreveport. Bodies of troops under Gen. Price and Gen. Walker were also moving to unite with it.

On the next afternoon the transports arrived at the mouth of Red River, and joined the fleet. On the next day, Saturday, the 12th, the fleet moved up the old Red River, into the Atchafalaya, and in the afternoon anchored at Semmesport. The town had ceased to exist; a few chimneys marked the former site. It was burned by Col. C. R. Ellet, in retaliation for the firing upon his steamer, the Queen of the West; and afterward entirely destroyed by Col. John Ellet, during the siege of Port Hudson, to prevent the construction of batteries by the enemy, and a traffic across the river. Hearing nothing from Gen. Banks, Gen. Smith disembarked a portion of his troops on the next day, and sent a brigade under Gen. Mower to reconnoitre in the vicinity of Yellow Bayou. The enemy had broken up their camp and retired. Two extensive earthworks in an incomplete state were found. A distance further five teams loaded with tents were overtaken. The latter were burnt, and the teams loaded with sugar and molasses, and taken to the fleet. It was now decided that the column should march overland to Fort De Russy, a distance of thirty miles, whither it was supposed the enemy had retreated. At daybreak, on Monday morning, the force started in light marching order, with the brigade of Gen. Mower in advance. They had advanced scarcely five miles before they were beset by the enemy's cavalry, in front and rear. This continued until the position of the enemy, known as Fort De Russy, was approached in the afternoon. It consisted of two distinct and formidable earthworks, connected by a covered way; the upper part facing the road mounted four guns, two field and two siege; the lower work, commanding the river, was a casemated battery of three guns. Only two guns were in position in it, one a 11-inch Columbiad, and an 8-inch smooth bore. On each side were batteries of two guns each, making in all eight siege and two field-pieces. As the line moved up to the edge of the timber, the upper work opened with shell and shrapnel,

against which two batteries were brought to bear. The cannonading continued for two hours. A charge was then ordered, and as the men reached the ditch, the garrison surrendered. The Federal loss was four killed and thirty wounded; that of the enemy, five killed and four wounded. The prisoners taken were twenty-four officers and two hundred men. Considerable ammunition and stores were found, besides a thousand muskets. A portion of the fleet arrived as the fort surrendered. Gen. Smith ordered the works to be destroyed. This portion of his troops were then embarked on the transports, and reached Alexandria, one hundred and forty miles from the Mississippi River, on the evening of the 16th. They were followed by the remainder of the forces and the fleet. The enemy retired before the advance, destroying two steamboats and considerable cotton. During the first week, the gunboats rescued upwards of four thousand bales of cotton, and large quantities were brought in by the negroes. The fleet was detained by the low water on the falls above Alexandria, its depth being only six feet, whereas nine feet were required to float the largest gunboats. Three formidable iron-clad rams of the enemy were reported to be at Shreveport, about four hundred and fifty miles above the Mississippi River. On the 19th, Gen. Stone, chief of Gen. Banks' staff, arrived and reported that the latter was at Opelousas. On the 20th, the cavalry force under Gen. Lee, attached to the command of Gen. Banks, reached Alexandria, after marching from Franklin across the Teche country. Meantime detachments from Gen. Smith's command had been sent forward, and captured several small bodies of the enemy.

On the 21st, Natchitoches was taken, with two hundred prisoners and four pieces of artillery. It is about eighty miles from Alexandria. On the 26th, the force of Gen. Smith as the advance, left Alexandria for Shreveport, to be followed by the troops of Gen. Banks then arriving. Shreveport was the destination of the expedition. It had been the capital of the Confederate State Government. Its situation is in almost the extreme northwestern corner of Louisiana, and at the head of navigation on the Red River. The enemy were reported to have a strong force there, and large quantities of cotton and military stores were expected to be captured. The coöperation of Gen. Steele in command at Little Rock, Arkansas, was also expected by Gen. Banks. Twelve of the gunboats and a fleet of thirty transports were able to pass over the shoals, and moved up the river in coöperation with the land forces. On the 4th of April, Gen. Banks' column reached Natchitoches. Here he remained two days.

On Wednesday, the 6th, the army moved from Natchitoches for Shreveport, with Gen. Lee's cavalry in advance. The infantry marched seventeen miles, and the cavalry reached

Crump's Hill four miles further, and half way between Natchitoches and Mansfield. On the 7th, Gen. Lee pushed forward, maintaining a constant skirmish with the enemy, until he arrived at a position two miles beyond Pleasant Hill. Here the main body of the enemy's cavalry, under Major-Gen. Thomas Green, was encountered by the advance of Gen. Lee's cavalry, consisting of a brigade under Col. H. Robinson. Heavy skirmishing ensued for two hours and a half, when Gen. Green fell back upon the Con-

the 18th corps. The entire division numbered 2,600 men. The 18th corps, under Gen. Franklin, were in camp nine miles in the rear, and Gen. A. J. Smith, with about one-half of the 16th and 17th corps, was nearly twenty miles in the rear. The Federal artillery consisted of the Chicago Mercantile battery, the 1st Indiana battery, Nim's Massachusetts battery, and battery G, 5th regular artillery. Col. Landrum's brigade took a position on the right and centre with all the batteries except one, and Gen. Ransom's brigade on the left with Nim's battery supported by Col. Dudley's cavalry brigade, while Col. Robinson's cavalry protected the wagon train, and Col. Lucas acted on the right. Gen. Banks had, in the meanwhile, arrived on the field, and at once sent couriers for Gen. Franklin to hasten forward with all possible despatch. Heavy skirmishing commenced at 5 o'clock, and in a short time the skirmishers were driven in by the enemy advancing in force, when the engagement became general on the right and centre. To sustain this portion of the line, which was heavily pressed, the left was necessarily much weakened. This was observed by the enemy, who massed upon their right and dashed upon the left of Gen. Banks, which was soon driven back, and four guns of Nim's battery captured. Not horses enough were alive to drag it from the field. Meantime the right continued fiercely engaged and the centre was pressed back, when the right also gave way. The loss of the Chicago battery and the 1st Indiana soon followed. Gen. Cameron came up with a brigade of Indiana troops belonging to the third division of the 18th corps, and advanced to the front, but was unable to resist the force of the enemy. Gen. Franklin with staff, also arrived on the field in advance of his division. The line continued to fall back slowly until the baggage trains blocked up the roads in the rear so that the troops could not easily pass, when a panic ensued. The enemy now pursued for three and a half miles, when their advance was checked and driven back by Gen. Emory's division. Here the conflict ended for the day. Six guns of the Chicago battery, two of battery G, four of the 1st Indiana, and six of Nim's battery were left on the field, with two howitzers of the 6th Missouri. The loss of Gen. Banks was estimated at two thousand killed, wounded, and missing. His force on the field was about eight thousand. The force of the enemy was much larger. Gen. Mouton was among the badly wounded of the enemy.

As it was now known that Gen. Smith with his force had marched to Pleasant Hill and halted, Gen. Banks determined to withdraw to that place for the sake of concentrating his forces, and of the advantageous position which he could there occupy. The movement commenced at ten o'clock at night, and before daylight the rear of the army was well on the road. The enemy during the night had pressed his pickets down on Gen. Banks' front, but failed

federate infantry and artillery at Bayou du Paul. Col. Robinson finding the enemy in an increased force, halted for the night and to await reinforcements. Early the next morning, the infantry brigade of the 4th division of the 18th corps, under Col. Landrum, joined him, and the advance was resumed and continued until 2 o'clock p. m., driving the enemy before them for seven miles. The main force of the enemy now appeared, occupying a strong position in the vicinity of Sabine Cross roads east of Mansfield. They were partly concealed in a dense wood with an open field in front and the Shreveport road passing through their lines. Major-Gen. Taylor was in command. Major-Gen. Green commanded the left wing, Brig.-Gen. Mouton the right, with Gen. Walker's division still further to the right, and two cavalry regiments on the extreme right. Meantime Gen. Ransom arrived on the field with the remaining brigade of the 4th division of

to discover the retreat of the troops as it was conducted with the greatest silence and expedition. Becoming aware of it in the morning, he followed after with his main force, his cavalry being in advance, but the cavalry failed to come up with the rear under Gen. Emory, before it had arrived at Pleasant Hill about seven o'clock in the morning. Col. Gooding, of the cavalry division, was then sent out on the Shreveport road to find the enemy. About a mile up the road the advance was seen approaching in strong force.

The battle-ground was an open field on the outside of the town of Pleasant Hill on the Shreveport road. It was open and rolling, and ascended both from the side of the town and from the side on which the enemy were approaching. A belt of timber extended almost entirely around it. The division of Gen. Emory was drawn up in line of battle on the sloping side, with the right resting across the Shreveport road. Gen. McMillen's brigade formed the extreme right of the line, with his right resting near the woods, which extended along the whole base of the slope and through which the enemy would advance. Gen. Dwight's brigade was formed next with his left resting on the road, Col. Benedict's brigade formed next, with his right resting on the road and a little in the rear of Gen. Dwight's left. Two pieces of Taylor's battery were placed in the rear of Gen. Dwight's left on the road, and four pieces were in position on an eminence on the left of the road and in rear of Col. Benedict. Hibbard's Vermont battery was in the rear of the division. Gen. Smith's division, under command of Gen. Mower, was massed in two lines of battle fifty yards apart with artillery in rear of Gen. Emory's division. The right of the first line rested on the road, and was composed of two brigades: the first brigade on the right commanded by Colonel Lynch; the second brigade on the left commanded by Colonel Shaw. The 8d Indiana battery (Crawford's) was posted in the first line of battle, and on the right of the 89th Indiana. The 9th Indiana battery (Brown's) was in position on the right of the first brigade. The Missouri battery occupied ground on the right of the 89th Indiana.

The second line was composed of two brigades. The 18th corps were in reserve. Skirmishing continued through the day, and at 4 p. m. the enemy's line of battle was formed. Gen. Green's division was posted on the extreme left; Gen. Mouton's division, under command of Brig.-Gen. Polignac, on Gen. Green's right; Gen. Walker on Polignac's right, and Gen. Churchill's division of Arkansians and Missourians on the extreme right. About 5 p. m. the enemy appeared on the field at the edge of the woods, and the battle began by the Federal batteries opening upon him with case shell as he advanced at double-quick. The left under Col. Benedict came into action first, and soon after the right and centre were engaged.

The contest now became fierce on both sides, when Gen. Emory's division, pressed by overwhelming numbers, fell back up the hill to the 16th corps, which was just behind the crest. The enemy rushed forward and were met by Gen. Smith with a discharge from all his guns, which was followed by an immediate charge of the infantry, by which the enemy were driven rapidly back to the woods, where they broke in confusion. Night put an end to the pursuit. The Taylor battery lost on the advance of the enemy was recovered, and also two guns of Nim's battery. Five hundred prisoners were also taken. Early on the next morning, leaving the dead unburied and the muskets thrown on the field, the army commenced its march back to Grand Ecore, thirty-five miles from Pleasant Hill, to obtain rest and rations.

The entire losses of the campaign thus far were stated to be twenty pieces of artillery, three thousand men, one hundred and thirty wagons, twelve hundred horses and mules, including many that died of disease. The gains were the capture of Fort De Russy, Alexandria, Grand Ecore, and Natchitoches, the opening of Red River, the capture of three thousand bales of cotton, twenty-three hundred prisoners, twenty-five pieces of artillery, chiefly captured by the fleet, and small arms and considerable stores. A large number of citizens enlisted in the service in Alexandria, and the material for two colored regiments was gathered, and five thousand negroes, male and female, abandoned their homes and followed the army.

Meanwhile Rear-Admiral Porter ascended the falls with twelve gunboats and thirty transports, and reached Grand Ecore when the army was at Natchitoches preparing for an immediate march. As the river was rising slowly the advance was continued with six smaller gunboats and twenty transports, having army stores and a part of Gen. Smith's division on board. Starting on the 7th of April, Springfield Landing was reached on the third day. Here a large steamer sunk in the river obstructed further progress; and information was received that the army had met with a reverse. Orders also came to Gen. Smith's troops to return to Grand Ecore with the transports. The fleet, therefore, turned back, but was constantly annoyed by the enemy on the bank of the river. Two of the fleet at Grand Ecore were found above the bar, and not likely to get away until there was a rise of water in the river.

The continued low water in the Red River, and the difficulty of keeping up a line of supplies, caused the army to fall back to Alexandria. The march commenced in the afternoon of April 21st, by starting the baggage train with a suitable guard. At 2 o'clock the next morning the army began silently to evacuate its position, Gen. Smith's force forming the rear guard. Soon after daylight the enemy observing the movement began his pursuit, but with so small a force that only slight skirmishing

took place. After moving thirty miles, the army bivouacked for the night. On the next morning the march was resumed, six miles to the crossing of Cane River. Here the enemy appeared in a strong position to dispute the crossing of the river. A flank movement through an almost impassable wood was made upon the enemy's position, from which he was driven, and the crossing secured. The pursuit was continued by the enemy until Alexandria was reached on the 27th.

Although Gen. Banks had declared in the commencement of the campaign that his occupation of the country would be permanent, such was now the state of affairs as to require his withdrawal, the season having passed for operating with any chance of success. Preparations for this object were soon commenced. The position of the fleet was most serious, and its extrication is thus related by Rear-Admiral Porter:

MISSISSIPPI SQUADRON, FLAGSHIP BLACK HAWK, }
MOUTH RED RIVER, May 16th, 1864. }

SIR: I have the honor to inform you that the vessels lately caught by low water above the falls at Alexandria, have been released from their unpleasant position. The water had fallen so low that I had no hope or expectation of getting the vessels out this season, and, as the army had made arrangements to evacuate the country, I saw nothing before me but the destruction of the best part of the Mississippi squadron.

There seems to have been an especial Providence looking out for us in providing a man equal to the emergency. Lieut.-Col. Bailey, Acting Engineer of the 19th Army Corps, proposed a plan of building a series of dams across the rocks at the falls, and raising the water high enough to let the vessels pass over. This proposition looked like madness, and the best engineers ridiculed it; but Col. Bailey was so sanguine of success that I requested to have it done, and he entered heartily into the work. Provisions were short and forage was almost out, and the dam was promised to be finished in ten days or the army would have to leave us. I was doubtful about the time, but I had no doubt about the ultimate success, if time would only permit. Gen. Banks placed at the disposal of Col. Bailey all the forces he required, consisting of some three thousand men and two or three hundred wagons. All the neighboring steam-mills were torn down for material; two or three regiments of Maine men were set at work felling trees, and on the second day after my arrival in Alexandria, from Grand Ecore, the work had fairly begun.

Trees were falling with great rapidity, teams were moving in all directions, bringing in brick and stone; quarries were opened; flat-boats were built to bring stone down from above, and every man seemed to be working with a vigor I have seldom seen equalled, while perhaps not one in fifty believed in the undertaking. These falls are about a mile in length, filled with rugged rocks, over which at the present stage of water it seemed to be impossible to make a channel.

The work was commenced by running out from the left bank of the river a tree dam, made of the bodies of very large trees, brush, brick, and stone, cross-tied with heavy timber, and strengthened in every way which ingenuity could devise. This was run out about three hundred feet into the river; four large coal barges were then filled with brick and sunk at the end of it. From the right bank of the river, cribs filled with stone were built out to meet the barges, all of which were successfully ac-

complished, notwithstanding there was a current running of nine miles an hour, which threatened to sweep every thing before it.

It will take too much time to enter into the details of this truly wonderful work; suffice it to say that the dam had nearly reached completion in eight days' working time, and the water had risen sufficiently on the upper falls to allow the Fort Hindman, Osage, and Neosho, to get down and be ready to pass the dam. In another day it would have been high enough to enable all the other vessels to pass the upper falls. Unfortunately, on the morning of the 9th inst., the pressure of water became so great that it swept away two of the stone-barges which swung in below the dam on one side. Seeing this unfortunate accident, I jumped on a horse and rode up to where the upper vessels were anchored, and ordered the Lexington to pass the upper falls if possible, and immediately attempt to go through the dam. I thought I might be able to save the four vessels below, not knowing whether the persons employed on the work would ever have the heart to renew the enterprise.

The Lexington succeeded in getting over the upper falls just in time, the water rapidly falling as she was passing over. She then steered directly for the opening in the dam, through which the water was rushing so furiously that it seemed as if nothing but destruction awaited her. Thousands of beating hearts looked on anxious for the result.

The silence was so great as the Lexington approached the dam that a pin might almost have been heard to fall. She entered the gap with a full head of steam on, pitched down the roaring torrent, made two or three spasmodic rolls, hung for a moment on the rocks below, was then swept into deep water by the currents, and rounded to safely into the bank.

Thirty thousand voices rose in one deafening cheer, and universal joy seemed to pervade the face of every man present. The Neosho followed next—all her hatches battened down, and every precaution taken against accident. She did not fare as well as the Lexington, her pilot having become frightened as he approached the abyss, and stopped her engine when I particularly ordered a full head of steam to be carried. The result was that for a moment her hull disappeared from sight, under the water. Every one thought she was lost. She rose, however, swept along over the rocks with the current, and fortunately escaped with only one hole in her bottom, which was stopped in the course of an hour. The Hindman and Osage both came through beautifully without touching a thing, and I thought if I was only fortunate enough to get my large vessels as well over the falls my fleet once more would do good service on the Mississippi.

The accident to the dam, instead of disheartening Col. Bailey, only induced him to renew his exertions, after he had seen the success of getting four vessels through. The noble-hearted soldiers, seeing their labor of the last eight days swept away in a moment, cheerfully went to work to repair damages, being confident now that all the gunboats would be finally brought over. The men had been working for eight days and nights, up to their necks in water, in the broiling sun, cutting trees and wheeling bricks, and nothing but good humor prevailed among them. On the whole, it was very fortunate the dam was carried away, as the two barges that were swept away from the centre swung around against some rocks on the left and made a fine cushion for the vessels, and prevented them, as it afterward appeared, from running on certain destruction.

The force of the water and the current being too great to construct a continuous dam of six hundred feet across the river in so short a time, Col. Bailey determined to leave a gap of fifty-five feet in the dam, and build a series of wing dams on the upper falls. This was accomplished in three days' time, and on

DAM ACROSS THE RED RIVER, CONSTRUCTED BY COOL BAILEY

the 11th instant the Mound City, the Carondelet, and Pittsburgh came over the upper falls, a good deal of labor having been expended in hauling them through, the channel being very crooked, scarcely wide enough for them. Next day the Ozark, Louisville, Chillicothe, and two tugs also succeeded in crossing the upper falls.

Immediately afterward the Mound City, Carondelet, and Pittsburgh started in succession to pass the dam, all their hatches battened down and every precaution taken to prevent accident.

The passage of these vessels was a most beautiful sight, only to be realized when seen. They passed over without an accident except the unshipping of one or two rudders. This was witnessed by all the troops, and the vessels were heartily cheered when they passed over. Next morning at ten o'clock, the Louisville, Chillicothe, Ozark, and two tugs passed over without any accident except the loss of a man, who was swept off the deck of one of the tugs. By three o'clock that afternoon, the vessels were all coaled, ammunition replaced, and all steamed down the river with the convoy of transports in company. A good deal of difficulty was anticipated in getting over the bars in lower Red River—depth of water reported only five feet; gunboats were drawing six. Providentially, we had a rise from the back-water of the Mississippi—that river being very high at that time—the back water extending to Alexandria, one hundred and fifty miles distant, enabling it to pass all the bars and obstructions with safety.

Words are inadequate to express the admiration I feel for the ability of Lieut.-Col. Bailey. This is without doubt the best engineering feat ever performed. Under the best circumstances, a private company would not have completed this work under one year, and to an ordinary mind the whole thing would have appeared an entire impossibility. Leaving out his ability as an engineer—the credit he has conferred upon the country—he has saved the Union a valuable fleet, worth nearly \$2,000,000; more, he has deprived the enemy of a triumph which would have emboldened them to carry on this war a year or two longer, for the intended departure of the army was a fixed fact, and there was nothing left for me to do in case that event occurred but to destroy every part of the vessels, so that the rebels could make nothing of them. The highest honors the Government can bestow on Col. Bailey can never repay him for the service he has rendered the country.

To Gen. Banks, personally, I am much indebted for the happy manner in which he has forwarded this enterprise, giving it his whole attention night and day; scarcely sleeping while the work was going on; attending personally to see that all the requirements of Col. Bailey were complied with on the instant.

I do not believe there ever was a case where such difficulties were overcome in such a short space of time, and without any preparation.

Previous to passing the vessels over the falls, I had nearly all the guns, ammunitions, provisions, chain cables, anchors, and every thing that could effect their draft taken out of them.

I have the honor to be, very respectfully, your obedient servant,

DAVID D. PORTER, Rear-Admiral.

Hon. GIBSON WELLES, Secretary of the Navy, Washington, D. C.

The last of the gunboats passed the falls on May 12th, and Alexandria was evacuated on the next day. As early as 10 A. M. the town was discovered to be on fire in several places. Various opinions existed as to its origin, but nothing positive was known. It is situated on a plain, in the centre of a rich cotton-growing region, with six hundred inhabitants. The fire spread with great rapidity. Gen. Banks made

some ineffectual attempts to stay the progress of the flames, and tore down several buildings, but the soldiers, it is said, did not work with much interest. An engine was drawn to the river, but the hose was found to be cut. The scenes attending the burning of the town now became appalling. A spectator thus describes it:

Women gathering their helpless babes in their arms, rushing frantically through the streets with cries that would have melted the hardest hearts to tears. Little boys and girls were running hither and thither crying for their mothers and fathers; old men leaning on a staff for support to their trembling limbs, were hurrying away from the suffocating heat of their burning homes. The helpless wives and children of absent husbands and fathers were almost in the twinkling of an eye driven into the streets, leaving every thing behind but the clothes they then wore. Owing to the simultaneous burning in every part of the city, the people found no security in the streets, where the heat was so intense as almost to create suffocation. Everybody rushed to the river's edge, being protected there from the heat by the high bank of the river. The steamboats lying at the landing were subjected to great annoyance, the heat being so great that the decks had to be flooded with water to prevent the boats from taking fire. Among those who thus crowded the river bank were the wives, daughters, and children, helpless and now all homeless, of the Union men who had joined the Federal army since the occupation of Alexandria. Their husbands had already been marched off in the front toward Semmesport, leaving their families in their old homes, but to the tender mercies of the Confederates. The torch had now destroyed their dwellings, their household goods and apparel, the last morsel of provisions, and left them starving and destitute. As might be expected, they desired to go along with the Federal army, where their husbands had gone. They applied to be allowed to go aboard the transports. They were refused! They became frantic with excitement. The officers of the boats were desirous of doing so, but there was the peremptory order not to allow any white citizen to go aboard.

It had been expected when the army arrived that the occupation would be permanent, and that protection would be given to all who came forward and took the oath of allegiance; while those who would not were threatened with banishment and confiscation of property. Hundreds came forward and took the oath. An election was held, and delegates were sent to the constitutional convention then in session at New Orleans. A recruiting office was opened, and a large number of white men were mustered into the United States service. Quite a number of permanent citizens of Alexandria took the oath, and were promised protection. Their houses and other property were now all reduced to ashes, and they turned out in the world with nothing, absolutely nothing, save the amnesty oath. They could not now go to the Confederates and apply for charity. They too applied to be allowed to go aboard the transports and go to New Orleans. They were refused in every instance!

The guns taken from the boats above the falls were burst; and when every thing was ready, the fleet, last of all, moved away, leaving the place wrapped in a dense volume of smoke. The fleet proceeded down the river about ten miles, and laid up for the night. On the next day the advance of the army was overtaken by the fleet, and on the 16th both began to arrive at Semmesport. The Atchafalaya was crossed the next day by the army, by means of twenty-

two steamboats placed side by side, with their bows lashed firmly together. "A plank bridge was then laid across the bows of each, connecting them together, and forming a solid bridge across the stream, which was no sooner finished than it was covered with teams, and there was a constant stream of wagons, cavalry, and men, until the night of the 20th, when the last of Gen. Smith's division crossed over, and the bridge in five minutes was endowed with life, and broke into fragments and proceeded up the river."

Thence the army proceeded toward the Mississippi, encountering on the way a considerable force of the enemy, with whom a sharp skirmish ensued. It finally returned to New Orleans, and the fleet resumed its station on the Mississippi. This withdrawal of Gen. Banks left the enemy at liberty to move into Arkansas and operate against Gen. Steele, who was moving toward Shreveport.

It was expected that Gen. Steele, in command of the 7th army corps, at Little Rock, in Arkansas, would cooperate with Gen. Banks on his approach to Shreveport. For this purpose he left Little Rock, March 28d, with twelve thousand infantry and three thousand cavalry, under Gen. Carr. On the previous day Gen. Thayer, in command of the Army of the Frontier, left Fort Smith, with nearly five thousand men, to join Gen. Steele. About the same time Col. Clayton, with a small force, left Pine Bluffs on an expedition. Camden was the point of junction for the three commands. It was 120 miles distant from Little Rock, about 180 miles from Fort Smith, and 80 miles from Pine Bluffs.

It was known that a force of the enemy, about twelve thousand men, under command of Gen. Price, was in southwestern Arkansas, and occupied a line from Camden, at the head of navigation on the Washita River, west to Washington, in Hempstead County. Camden is an important position for all movements looking to the occupation of the Red River and confluent streams. Forage and subsistence were abundant in the region, and the army of the enemy was well clothed and in good spirits.

Camden was known to be well fortified. Gen. Steele, therefore, directed his march toward Washington, evidently with the design of flanking Camden and drawing out of the fortifications what forces might be there. On the 14th of April, having advanced one hundred and ten miles in twenty-two days, he first encountered a strong cavalry division under Gen. Marmaduke. This was at the Little Missouri River, sixteen miles west of Camden. Heavy skirmishing ensued. On the 16th Gen. Thayer arrived with his force. Crossing the Little Missouri at a point menacing Shreveport, Washington, or Camden; Gen. Steele concealed the real destination of the expedition, which was Camden, and marched beyond the junction of the roads, thus deluding the enemy into the belief that he intended to attack Shreveport. Act-

ing upon this opinion, they withdrew and took a fortified position. From this they were driven by a flank movement of Gen. Steele, who pursued, apparently with vigor, and captured some prisoners, and then moving in a direct line to Camden. The enemy, having discovered his error, concentrated his cavalry, and attacked in front, flank, and rear, hoping to embarrass Gen. Steele, so that his own infantry might have time to regain the works at Camden. Their efforts were in vain, and Gen. Steele took possession of the town.

Col. Clayton, in advancing from Pine Bluffs, captured a pontoon bridge over the Saline, and attacked and dispersed a cavalry force and took a number of prisoners. He thus reported his movement:

PINE BLUFFS, ARK., March 31, 1864.

Major Grema, A. A. Gen.:

The expedition to Mount Elba and Longview has just returned. We destroyed the pontoon bridge at Longview; burned a train of thirty-five wagons, loaded with camp and garrison equipments, ammunition, quartermaster stores, &c.; captured three hundred and twenty prisoners; engaged in battle at Mount Elba, yesterday morning, Gen. Docking's division, of about twelve hundred men, from Monticello; routed him, and pursued him ten miles, with a loss on his side of over one hundred killed and wounded; captured a large quantity of small arms, two stands of colors, many wagons, and over three hundred horses and mules. Our loss will not exceed fifteen in killed, wounded, and missing. We brought in several hundred contrabands. The expedition was a complete success, the details of which will be furnished in my official report, which will be forwarded in a few days.

POWELL CLAYTON, Col. Commanding.

It was soon known that Gen. Banks had failed in his object on the Red River. This, to some extent, endangered the command of Gen. Steele. The force of the enemy, estimated to reach twenty-five thousand men, could now, in part, be moved against Gen. Steele. As it was not his plan to act alone, but in conjunction with Gen. Banks, he now prepared to fall back. In addition to these circumstances, his communications were interrupted and Little Rock threatened. On the day following the occupation of Camden, the enemy appeared in force about six miles to the south. A pontoon bridge was put across the Washita River thirty miles east of Camden, by which a force of the enemy's cavalry crossed and cut off the supplies. Trees were also felled into the stream, and other obstructions made to the navigation. On the 21st, a foraging party, with one hundred and fifty wagons and an escort of nearly a thousand men, were sent to a point sixteen miles west. On the return, at Poison Springs, twelve miles west of Camden, the command was attacked by a strong force of the enemy. After a severe struggle of some hours, the force reached Camden, with a loss of two hundred and fifty men, four guns, and the trains, with a number of arms.

On the 23d Gen. Steele started a train of two hundred and fifty wagons, six ambulances, and an escort of two hundred cavalry and

twelve hundred infantry, with four pieces of artillery, to Pine Bluffs for supplies for the army. The expedition was under the command of Lieut.-Col. Drake, of the 86th Iowa. On the 25th, an attack was made on the train, within six miles of the Saline River, by a cavalry force under Maj.-Gen. Fagan, which resulted in the capture or wounding of all the officers, nearly all the men—of whom two hundred and fifty were killed and wounded—four brass guns, and the wagon trains.

On the 26th Gen. Steele determined to evacuate Camden, and before daylight of the 27th the army had crossed, the pontoon bridge was secured, and the Washita River put between him and the forces of the enemy. The army was pushed forward over bad roads, and on the 28th camped at Princeton crossing, and on the next evening at the Saline crossings, Jenkins Ferry. During the night the enemy showed themselves in the rear. Whether they were in force, or only sufficient to harass by cavalry attacks until Gen. Kirby Smith's main force could intercept the march to Little Rock, was uncertain. Dispositions were, however, made by Gen. Steele to resist a large force. The bad condition of the roads, and the heavy rain which commenced, and the darkness, prevented the crossing of the Saline during the night. The pontoon bridge, however, had been laid, and a small portion of the force passed over. The remainder of the army encamped in the bottom lands of the river, to which it descended from a considerable elevation about four miles west of the stream. Gen. Salomon's division camped about two miles from the hill, and the line which it was to hold in the morning was protected on the left by the Saline and swampy bottom lands, and on the right by a bayou skirting the base of the uplands. In the morning the rain poured in torrents. The artillery, the trains, and men were to cross over the river. Soon after daylight skirmishing commenced in the rear, and a general engagement soon succeeded. The enemy consisted of all their forces in southwestern Arkansas, with some from Louisiana, under Gens. Smith, Price, Walker, Churchill, and others. Under Gen. Steele, the commands of Gens. Salomon, Thayer, Rice, Ingleman, and Col. Benton were engaged. The battle continued about seven hours, and resulted in the repulse of the enemy, and a loss to Gen. Steele of seven hundred in killed and wounded, although several stands of colors were captured and three pieces of artillery. The loss of the enemy in killed and wounded was also severe. The effect of the battle was not only to secure a safe retreat to Little Rock for Gen. Steele, where he arrived on the 2d of May, but also to relieve, for some time, that portion of Arkansas, and also Missouri, from the presence of the enemy. The following is Gen. Steele's address to his troops:

HEADQUARTERS DEPARTMENT OF ARKANSAS,
LITTLE ROCK, May 9.

To you troops of the 7th army corps, who participated in the recent campaign designed to co-

operate with Gen. Banks' movement against Shreveport, the Major-General Commanding tenders his earnest and grateful thanks. Although you were compelled to fall back without seeing the main object of the expedition accomplished, you will have the satisfaction of knowing that you have beaten the enemy wherever he has met you in force, and extricated yourselves from the perilous position in which you were placed by the reverses of the cooperating column. This let loose upon you a superior force of the enemy, under one of their best generals, causing the loss of your trains and the total interruption of your communications, rendering it impossible for you to obtain supplies. You have fallen back over rivers and swamps, while pressed by a superior force of the enemy. This you have done successfully, punishing the enemy severely at the same time.

The patience with which you have endured hardships and privations, and your heroic conduct on the battle-field, have been brought to the notice of the Government, and will furnish a page in the history of this war of which you may well be proud.

F. STEELE, Maj.-Gen. Commanding.

For further details of military affairs under Gen. Steele, see ARKANSAS.

The withdrawal of the forces of Gens. Sherman and A. J. Smith from Vicksburg to engage in the Red River expedition, afforded an opportunity for the irregular command of Gen. Forrest, with other detached forces of the enemy in Northern Mississippi and Southwestern Tennessee, to concentrate for an attack on the Federal posts in West Tennessee and Kentucky. Accordingly, on March 28d, Gen. Forrest left Jackson, Tennessee, with about five thousand men, marching north to Union City. Jackson is a station on the railroad from Cairo and Columbus to New Orleans, and about one hundred and seven miles from Cairo, and sixty miles from Union City, another station on the same railroad, where the line to Paducah and the one to Hickman commence. On the next day he arrived before Union City and summoned Col. Hawkins, with four hundred and fifty men of the 11th Tennessee Union cavalry, to surrender. The surrender of the place was made after resisting an assault, and also two hundred horses and five hundred small arms. This surrender was opposed by the officers under Col. Hawkins' command, and only one man had been injured when it was made. A force under Gen. Brayman, from Cairo, advanced within six miles for its defence; but on learning that it had surrendered, Gen. Brayman retired. Gen. Forrest next occupied Hickman, and then moved immediately north with Buford's division of his forces, direct from Jackson to Paducah. This place was occupied by Col. S. G. Hicks, 40th Illinois regiment, with six hundred and fifty-five men. Col. Hicks retired into Fort Anderson and there made a stand, assisted by the gunboats Peosta and Paw-Paw, belonging to the command of Capt. Shirk of the navy. Gen. Forrest then sent the following demand for a surrender:

HEADQUARTERS FORREST'S CAVALRY CORPS, }
PADUCAH, March 25, 1864. }

To Col. Hicks, commanding Federal forces at Paducah:
Having a force amply sufficient to carry your works and reduce the place, in order to avoid the unnecessary effusion of blood, I demand a surrender of the

fort and troops, with all the public stores. If you surrender you shall be treated as prisoners of war, but if I have to storm your works you may expect no quarter. N. B. FORREST, Maj.-Gen. Com'ing.

Col. Hicks replied as follows:

HEADQUARTERS POST PADUCAH, }
PADUCAH, KY., March 25, 1864. }

Maj.-Gen. N. B. Forrest, commanding Confederate forces:

I have this moment received yours of this instant, in which you demand an unconditional surrender of forces under my command. I can answer, that I have been placed here by my Government to defend the post. In this, as well as all other orders from my superior officers, I feel it my duty as an honorable officer to obey, and must therefore respectfully decline surrendering, as you require. Very respectfully,
S. G. HICKS, Commanding Post.

Two successive attacks upon the fort were now made by the enemy and repulsed. They next occupied the houses, and fired from behind them and from the windows, but were steadily held back. At half-past eleven P.M. they retired. During the evening a steamboat on the marine ways was burned, and also some houses. On the next morning Gen. Forrest proposed an exchange for some prisoners in Col. Hicks' hands, but the latter had no power to make the exchange. In the afternoon the enemy retired. Gen. Forrest reported that he held the town ten hours, and captured many stores and horses, burned sixty bales of cotton, one steamboat, and took fifty prisoners. His loss at Union City and Paducah he stated at twenty-five killed and wounded, and the prisoners captured at five hundred. The loss of Col. Hicks was fourteen killed and forty-six wounded. A large portion of the town was destroyed, partly by the guns fired from the fort upon the enemy, and partly by the enemy.

On the 12th of April an attack was made on Fort Pillow by Gen. Forrest, with Gen. Chalmers' division of his forces, of which Gen. Forrest led Bell's brigade, and Chalmers led McCulloch's. Fort Pillow is situated about seventy miles above Memphis, on the Mississippi River. Its garrison at the time of the assault consisted of nineteen officers and five hundred and thirty-eight enlisted men, of whom two hundred and sixty-two were colored troops, comprising one battalion of the 6th United States heavy artillery, formerly the 1st Alabama artillery of colored troops, under the command of Major L. F. Booth; one section of the 2d United States light artillery (colored), and one battalion of the 18th Tennessee cavalry (white), commanded by Major W. F. Bradford. Major Booth was the ranking officer, and was in command of the fort.

The troops which had served to garrison the fort were withdrawn in January, to accompany Gen. Sherman's expedition to Meridian, and others had been sent from Memphis subsequently to hold it.

Just before sunrise in the morning, April 12th, the pickets of the garrison were driven in. This was the first intimation which the force then had of an intention of the enemy to

attack the place. Fighting soon became general, and about nine o'clock Major Bradford succeeded to the command and withdrew all the forces within the fort. They had previously occupied some intrenchments at some distance from the fort and further from the river.

This fort was situated on a high bluff, which descended precipitately to the river's edge, the ridge of the bluff on the river side being covered with trees, bushes, and fallen timber. Extending back from the river on either side of the fort was a ravine or hollow, the one below the fort containing several private stores and some dwellings, constituting what is called the town. At the mouth of that ravine and on the river bank were some Government buildings containing commissary stores.

The ravine above the fort was known as Cold Bunk Ravine, the ridge being covered with trees and bushes; to the right or below, and a little to the front of the fort, was a level piece of ground, not quite so elevated as the fort itself, on which had been erected some log huts or shanties, which were occupied by the white troops, and also used for hospital and other purposes. Within the fort tents had been erected, with board floors, for the use of the colored troops. There were six pieces of artillery in the fort, consisting of two 6-pounders, two 12-pounder howitzers, and two 10-pounder Parrotts.

The rebels continued their attack, but up to two or three o'clock in the afternoon they had not gained any decisive success. The Federal troops, both white and black, fought bravely, and were in good spirits. The gunboat No. 7—New Era, Capt. Marshall—took part in the conflict, shelling the enemy as opportunity offered.

Signals had been agreed upon by which the officers in the fort could indicate where the guns of the boat could be aimed most effectively. There being but one gunboat no permanent impression appears to have been produced upon the enemy, for as they were shelled out of one ravine they would make their appearance in the other. They would thus appear and retire as the gunboat moved from one point to another.

About one o'clock the fire on both sides slackened somewhat, and the gunboat moved out in the river to cool and clean the guns, having fired 282 rounds of shell, sharpnel, and canister, which nearly exhausted the supply of ammunition. The rebels having thus far failed in their attack, resorted to their customary flags of truce. The first flag conveyed a demand from Gen. Forrest for the unconditional surrender of the fort. To this Major Bradford replied, asking to be allowed an hour to consult with his officers and the officers of the gunboat.

In a short time a second flag of truce appeared with a communication from Gen. Forrest. He would allow Major Bradford twenty minutes in which to move his troops out of the fort, and if it was not done in that time, an assault would be ordered. To this Major Bradford replied

that he would not surrender. Immediately after the second flag of truce retired, the rebels made a rush from the positions they had treacherously gained, while the flags of truce were sent in, and obtained possession of the fort, raising the cry of no quarter. But little opportunity was allowed for resistance. The Federal troops, black and white, threw down their arms, and sought to escape by running down the steep bluff near the fort, and secreting themselves behind trees and logs, in the bushes, and under the brush, some even jumping into the river, leaving only their heads above the water as they crouched down under the bank.

The scenes which now followed became a subject of investigation by a Committee of Congress, who state in their report as follows:

The rebels commenced an indiscriminate slaughter, sparing neither age nor sex, white or black, soldier or civilian. The officers and men seemed to vie with each other in the devilish work. Men, women, and even children, wherever found, were deliberately shot down, beaten, and hacked with sabres. Some of the children not more than ten years old, were forced to stand up and face their mothers while being shot. The sick and wounded were butchered without mercy, the rebels even entering the hospital buildings, and dragging them out to be shot, or killing them as they lay there unable to offer the least resistance. All over the hillside the work of murder was going on. Numbers of our men were gathered together in lines or groups and deliberately shot. Some were shot while in the river, while others on the bank were shot and their bodies kicked into the water, many of them still living, but unable to make any exertion to save themselves from drowning. Some of the rebels stood upon the top of the hill, or a short distance down its side, and called to our soldiers to come up to them, and as they approached shot them down in cold blood; if their guns or pistols missed fire, forcing them to stand there until they were again prepared to fire. All around were heard cries of "No quarter, no quarter;" "Kill the d—n niggers;" "Shoot them down." All who asked for mercy were answered by the most cruel taunts and sneers. Some were spared for a time only to be murdered under circumstances of greater cruelty. No cruelty which the most fiendish malignity could devise was omitted by these murderers. One white soldier, who was wounded in the leg so as to be unable to walk, was made to stand up while his tormentors shot him. Others who were wounded and unable to stand up were held up and again shot. One negro who had been ordered by a rebel officer to hold his horse was killed by him when he remonstrated. Another, a mere child, whom an officer had taken up behind him on his horse, was seen by Chalmers, who at once ordered the officer to put him down, and shoot him, which was done. The huts and tents in which many of the wounded had sought shelter were set on fire both that night and the next morning, while the wounded were still in them, those only escaping who were able to get themselves out, or who could prevail on others less injured than themselves to help them out; and even some of them thus seeking to escape the flames were met by these ruffians and brutally shot down, or had their brains beaten out. One man was deliberately fastened down to the floor of a tent, face upwards, by means of nails driven through his clothing and into the boards under him so that he could not possibly escape, and then the tent set on fire. Another was nailed to the side of a building, outside of the fort, and then the building set on fire and burned. The charred remains of five or six bodies were afterwards found, all but one so much disfigured and consumed by the flames that

they could not be identified, and the identification of that one is not absolutely certain, although there can hardly be a doubt that it was the body of Lieut. Akerstrom, quartermaster of the 18th Virginia cavalry, and a native Tennessean. Several witnesses who saw the remains, and who were personally acquainted with him while living here, testified that it is their firm belief that it was his body that was thus treated. These deeds of murder and cruelty closed when night came on, only to be renewed the next morning, when the demons carefully sought among the dead lying about in all directions for any other wounded yet alive, and those they killed. Scores of the dead and wounded were found there the day of the massacre by the men from some of our gunboats, who were permitted to go on shore and collect the wounded and bury the dead. The rebels themselves had made a pretence of burying a great many of their victims, but they had merely thrown them, without the least regard to care or decency, into the trenches and ditches about the fort, or the little hollows and ravines on the hillside, covering them but partially with earth. Portions of heads and faces, hands and feet, were found protruding through the earth in every direction even when your committee visited the spot two weeks afterward, although parties of men had been sent on shore from time to time to bury the bodies unburied, and re-bury the others, and were even then engaged in the same work. We found evidences of this murder and cruelty still most painful. We saw bodies still unburied, at some distance from the fort, of some sick men, who had been fleeing from the hospital, and beaten down and brutally murdered, and their bodies left where they had fallen. We could still see the faces, and hands, and feet of men, white and black, protruding out of the ground, whose graves had not been reached by those engaged in reintering the victims of the massacre; and although a great deal of rain had fallen within the preceding two weeks, the ground, more especially on the side at the foot of the bluff where the most of the murders had been committed, was still discolored by the blood of our brave but unfortunate men, and the logs and trees showed but too plainly the evidences of the atrocities perpetrated there. Many other instances of equally atrocious cruelty might be enumerated, but your committee feel compelled to refrain from giving here more of the heart-sickening details, and refer to the statements contained in the voluminous testimony herewith submitted. Those statements were obtained by them from eye-witnesses and sufferers. Many of them, as they were examined by your committee, were lying upon beds of pain and suffering; some so feeble that their lips could with difficulty frame the words by which they endeavored to convey some idea of the cruelty which had been inflicted on them, and which they had seen inflicted on others. In reference to the fate of Major Bradford, who was in command of the fort when it was captured, and who had, up to that time, received no injury, there seems to be no doubt. The general understanding everywhere seemed to be that he had been brutally murdered the day after he was taken prisoner. How many of our troops thus fell victims to the malignity and barbarity of Forrest and his followers cannot yet be definitely ascertained. Two officers belonging to the garrison were absent at the time of the capture and massacre. Of the remaining officers but two are known to be living, and they are wounded, and now in the hospital at Mound City. One of them (Capt. Porter) may even now be dead, as the surgeons, when your committee were there, expressed no hope of his recovery. Of the men, from three hundred to four hundred are known to have been killed at Fort Pillow, of whom at least three hundred were murdered in cold blood, after the fort was in possession of the rebels, and our men had thrown down their arms and ceased to offer resistance. Of the survivors, except the wounded in the hospital at Mound City, and the few who suc-

ceeded in making their escape unhurt, nothing definite is known, and it is to be feared that many have been murdered after being taken away from the fort. When your committee arrived at Memphis, Tennessee, they found and examined a man (Mr. McLogan) who had been conscripted by some of Forrest's forces, but who, with other conscripts, had succeeded in making his escape. He testifies that while two companies of rebel troops, with Major Bradford and many other prisoners, were on their march from Brownsville and Jackson, Tennessee, Major Bradford was taken by five rebels, one an officer, led about fifty yards from the line of march, and deliberately murdered in view of all those assembled. He fell, killed instantly by three musket balls, and while asking that his life might be spared, as he had fought them manfully, and was deserving of a better fate. The motive for the murder of Major Bradford seems to have been the simple fact that, although a native of the South, he remained loyal to his Government.

On the other side is the following statement by Lieut.-Gen. S. D. Lee, who was in command of the Confederate department. It is part of a letter on the subject, dated June 28th:

As commanding officer of this department, I desire to make the following statement concerning the capture of Fort Pillow—a statement supported in a great measure by the evidence of one of your own officers captured at that place. The version given by you and your Government is untrue, and not sustained by the facts to the extent that you indicate. The garrison was summoned in the usual manner, and its commanding officer assumed the responsibility of refusing to surrender, after having been informed by Gen. Forrest of his ability to take the fort, and of his fears as to what the result would be in case the demand was not complied with. The assault was made under a heavy fire and with considerable loss to the attacking party. Your colors were never lowered and your garrison never surrendered, but retreated under cover of a gunboat, with arms in their hands and constantly using them. This was true particularly of your colored troops, who had been firmly convinced by your teachings of the certainty of slaughter in case of capture. Even under these circumstances many of your men—white and black—were taken prisoners. I respectfully refer you to history for numerous cases of indiscriminate slaughter after successful assault, even under less aggravated circumstances. It is generally conceded by all military precedent that where the issue had been fairly presented and the ability displayed, fearful results are expected to follow a refusal to surrender. The case under consideration is almost an extreme one. You had a servile race armed against their masters, and in a country which had been desolated by almost unprecedented outrages.

I assert that our officers, with all the circumstances against them, endeavored to prevent the effusion of blood; and as an evidence of this, I refer you to the fact that both white and colored prisoners were taken, and are now in our hands. As regards the battle of Tishomingo Creek, the statements of your negro witnesses are not to be relied on. In their panic they acted as might have been expected from their previous impressions. I do not think many of them were killed—they are yet wandering over the country, attempting to return to their masters. With reference to the *status* of those captured at Tishomingo Creek and Fort Pillow, I will state that, unless otherwise ordered by my government, they will not be regarded as prisoners of war, but will be retained and humanely treated, subject to such future instructions as may be indicated.

Your letter contains many implied threats; these, of course, you can make, and you are fully entitled to any satisfaction that you may feel from having made them.

It is my intention, and that also of my subordinate

officers, to conduct this war upon civilized principles, provided you permit us to do so; and I take this occasion to state that we will not shirk from any responsibility that your actions may force upon us. We are engaged in a struggle for the protection of our homes and firesides, for the maintenance of our national existence and liberty; we have counted the cost, and are prepared to go to any extremes; and though it is far from our wish to fight under a black flag, still, if you drive us to it, we will accept the issue. Your troops virtually fought under it at the battle of Tishomingo Creek, and the prisoners taken there state that they went into battle under the impression that they would receive no quarter, and, I suppose, with the determination to give none.

I will further remark, that if it is raised, so far as your soldiers are concerned, there can be no distinction, for the unfortunate people whom you pretend to be aiding are not considered entirely responsible for their acts, influenced, as they are, by the superior intellect of their white brothers. I enclose for your consideration certain papers touching the Fort Pillow affair, which were procured from the writer after the exaggerated statements of your press were seen.

I am, general, yours, respectfully,

S. D. LEE, Lieutenant-General.

The report of the enemy stated that Gens. Forrest and Chalmers "both entered the fort from opposite sides, simultaneously, and an indiscriminate slaughter followed. One hundred prisoners were taken and the balance slain. The fort ran with blood. Many jumped into the river and were drowned, or shot in the water. Over \$100,000 worth of stores were taken, and six guns captured. The Confederate loss was seventy-five. Lieut.-Col. Reed, of the 5th Mississippi, was mortally wounded."

A party of the enemy on the capture of Fort Pillow made an advance against Columbus, Gen. Buford being in command of their force.

On the 18th he sent the following summons to the commander of the fort:

HEADQUARTERS CONFEDERATE STATES ARMY, }
BEFORE COLUMBUS, KY., April 18, 1864. }

To the Commander of the United States forces, Columbus, Ky.:

Fully capable of taking Columbus and its garrison by force, I desire to avoid shedding blood. I therefore demand the unconditional surrender of the forces under your command. Should you surrender, the negroes now in arms will be returned to their masters. Should I be compelled to take the place by force, no quarters will be shown negro troops whatever; white troops will be treated as prisoners of war. I am, sir, yours,

A. BUFORD, Brig.-Gen.

This demand was refused, and Gen. Buford retired without making an attack. At the same time an excitement arose at Paducah, under apprehension of another attack of the enemy. The entire forces, however, retired to Bolivar, Trenton, and Grand Junction. For further military operations in this part of the country, see KENTUCKY, TENNESSEE, MISSISSIPPI.

Some active operations took place in North Carolina. The important ports on the sounds, as Newbern, Washington, Plymouth, &c., had been held since their capture by the forces under Gen. Burnside. On the 1st of February, a force of the enemy under Gen. Pickett, consisting of Gen. Hoke's brigade, with a part of Gens. Corse's and Clingman's, made an assault

on the Federal outpost at Bachelor's Creek, eight miles from Newbern, and captured it with seventy-five prisoners. They then advanced toward Newbern, where an attack was greatly feared. Before daylight on the next morning a party in barges captured the gunboat Underwriter, with her officers and a portion of her crew. The steamer was aground, but so lay as to cover a portion of the fortifications between Fort Anderson and Fort Stevens, at Newbern. Gen. Pickett thus reported his expedition:

Kinston, February 8, 1864.

To Gen. S. Cooper:

I made a reconnaissance within a mile and a half of Newbern, with Hoke's brigade, and a part of Corse's and Clingman's, and some artillery; met the enemy in force at Batchelor's Creek, killed and wounded about one hundred in all, captured thirteen officers and two hundred and eighty prisoners, fourteen negroes, two rifled pieces and caissons, three hundred stand of small arms, four ambulances, three wagons, fifty-five animals, a quantity of clothing, camp, and garrison equipage, and two flags. Commander Wood, Confederate States navy, captured and destroyed the United States gunboat Underwriter. Our loss thirty-five killed and wounded.

G. E. PICKETT,

Major-General Commanding.

The next movement of importance made by the enemy was the capture of Plymouth. This town is on the south bank of the Roanoke River, about eight miles from its mouth. The river flows in an easterly direction into Albemarle Sound. The town originally contained about one thousand inhabitants, but was burned by the Union fleet two years previously. It had been held for some time as a key to the river, and had been strongly fortified. A breastwork with strong forts at different points along the line, had been constructed. Another strong work, called Fort Gray, had also been constructed about a mile further up the river, opposite which a triple row of piles had been driven, to which torpedoes were attached, to serve as a protection to the fleet below. The enemy had a powerful iron-clad ram in the river above. Still further up there was another row of piles with torpedoes, near which a picket boat was stationed to watch the iron-clad. The Federal gunboats Southfield and Miami were anchored in the river opposite the town. The garrison of the town was about twenty-four hundred men, under command of Gen. Wessels. They composed the 85th New York infantry regiment, 101st Pennsylvania infantry regiment, 108d Pennsylvania infantry regiment, 16th Connecticut infantry regiment, two companies of the Massachusetts heavy artillery, two companies of the 2d North Carolina volunteers, two companies of the 12th New York cavalry.

The approach of the enemy was unknown, until they began to appear about 8 P. M., April 17th, in the rear of the town, driving in the Union pickets. A brisk artillery fire was soon opened upon Fort Gray, which continued with some vigor until near midnight. About daylight on the next morning the contest was renewed,

and two charges were made during the forenoon, which were repulsed. In the afternoon, two guns of the enemy were captured by a sortie from the fort. The gunboats then took a position, one above and the other below the town, and the contest continued fiercely until night, when it ceased without any advantage to the enemy. Early the next morning the picket boat up the river reported that the iron-clad had passed down. The gunboats were immediately lashed together, to make a joint resistance to the iron-clad. This had scarcely been done when she appeared within a hundred yards. As they approached each other, the gunboats fired without effect. The ram first struck the Miami, and gliding off struck the Southfield on her left side, crushing in six or eight feet square. The Miami now fired a shell at the iron-clad, which rebounded and killed her captain, Flusser, and wounded eight persons. Becoming separated from the Southfield, the Miami was swung round by the current, and unable for a time to render further assistance. The Southfield was now rapidly sinking, and her crew took to the boats and fled. The Miami, after her loss, withdrew. The iron-clad, called the Albemarle, under command of J. W. Coker, came down to the mouth of the river, outside of which were four gunboats. Her position in the river cut off all hopes of sending reinforcements to Gen. Wessels, and he surrendered to Brig.-Gen. Hoke on the next day. This surrender was thus announced by Gen. Peck, in command of the department:

HEADQUARTERS OF THE ARMY AND DISTRICT OF }
NORTH CAROLINA, NEWBERN, N. C., April 21, 1864. }

General Order No. 66:

With feelings of the deepest sorrow the commanding general announces the fall of Plymouth, N. C., and the capture of its gallant commander, Brig.-Gen. H. W. Wessels, and his command. This result, however, did not obtain until after the most gallant and determined resistance had been made. Five times the enemy stormed the lines of the general, and as many times were they repulsed with great slaughter; and but for the powerful assistance of the rebel iron-clad ram, and the floating sharpshooter battery, the Cotton Plant, Plymouth would still have been in our hands. For their noble defence the gallant Gen. Wessels and his brave band have, and deserve the warmest thanks of the whole country, while all will sympathize with them in their misfortune.

To the officers and men of the navy the commanding general tenders his thanks for their hearty coöperation with the army, and the bravery, determination, and courage that marked their part of the unequal contest. With sorrow he records the death of the noble sailor and gallant patriot, Lieut.-Com. C. W. Flusser, U. S. Navy, who in the heat of battle fell dead on the deck of his ship, with the lanyard of his gun in his hand.

The commanding general believes that these misfortunes will tend, not to discourage, but to nerve the army of North Carolina to equal deeds of bravery and gallantry hereafter.

Until further orders, the headquarters of the sub-district of the Albemarle will be at Roanoke Island. The command devolves upon Col. D. W. Wardrop, of the 99th New York infantry.

By command of Maj.-Gen. JOHN G. PECK.
J. A. JUDSON, Ass't Adj't-Gen.

Gen. Hoke thus reported his capture of the position :

PLYMOUTH, N. C., April 20, 1864.

To Gen. Braxton Bragg :

I have stormed and carried this place, capturing one brigadier, sixteen hundred men, stores, and twenty-five pieces of artillery.

R. F. HOKE, Brig.-Gen.

Only two places on the main land were now held by the Federal forces. These were Washington, on the Tar River, and Newbern, at the mouth of the Neuse. Washington was evacuated in the latter part of April, and burned. The following order of Gen. Palmer was issued for the purpose of detecting the incendiaries :

HEADQUARTERS DISTRICT OF N. C., }
NEWBERN, N. C., May 8, 1864. }

General Orders No. 5.

While the troops of this command may exult and take just pride in their many victories over the enemy, yet a portion of them have, within a few days, been guilty of an outrage against humanity which brings the blush of shame to the cheek of every true man and soldier.

It is well known that, during the late evacuation of Washington, North Carolina, that town was fired, and nearly, if not entirely, consumed, thus wantonly rendering houseless and homeless hundreds of poor women and children (many of them the families of soldiers in our own army), and destroying the last vestige of the once happy homes of those men who have now given up all to serve their country in the hour of peril. And this was done by men in the military service of the United States.

It is also well known that the army vandals did not even respect the charitable institutions, but, bursting open the doors of the Masonic and Odd Fellows' Lodges, pillaged them both, and hawked about the streets the regalia and jewels. And this, too, by United States troops. It is well known, too, that both public and private stores were entered and plundered, and that devastation and destruction ruled the hour.

The commanding general had, until this time, believed it impossible that any troops in his command could have committed so disgraceful an act as this, which now blackens the fame of the army of North Carolina. He finds, however, that he was sadly mistaken; and that the ranks are disgraced by men who are not soldiers, but thieves and scoundrels, dead to all sense of honor and humanity, for whom no punishment can be too severe.

The commanding general is well aware what troops were in the town of Washington when the flames first appeared. He knows what troops last left the place. He knows that in the ranks of only two of the regiments in the district of North Carolina the culprits now stand. To save the reputation of the command, it is hoped that the guilty parties may be ferreted out by the officers who were in Washington at the time of these occurrences.

This order will be read at the head of every regiment and detachment in this command, at dress parade, on the day succeeding its receipt, and at the head of the 17th Massachusetts volunteers, and the 15th Connecticut volunteers, at dress parade, every day for ten consecutive days, or until the guilty parties are found.

By command of Brig.-Gen. I. N. PALMER.
J. A. JUDSON, Ass't Adj't-Gen.

Subsequently the iron-clad Albemarle was destroyed by Lieut. Oushing, of the navy (*see* NAVAL OPERATIONS), and Plymouth recaptured.

Some military expeditions from Newbern into the State, were made during the year. (*See* NORTH CAROLINA.)

VOL. IV.—5 A

In Virginia, a few desultory operations took place previous to the commencement of the great campaign of the year. On the 3d of January a supply train, consisting of two hundred animals, was captured by the enemy on its return from Petersburg, in West Virginia, to New Creek. A few of the men and animals escaped. The enemy, being in considerable force, now made several demonstrations for the purpose of reaching the Baltimore and Ohio railroad, but were unsuccessful. On January 28th, a train from New Creek to Petersburg, laden with commissary stores for the garrison at the latter place, was attacked three miles south of Williamsport, and, after a sharp contest, captured by the enemy. The losses in this region in horses, wagons, stores, &c., to February 1st, was estimated at two hundred and fifty thousand dollars.

The headquarters of Gen. Meade, in command of the Army of the Potomac, was near Culpepper Court House. This position was occupied by that army, from December, 1863, until May, 1864. The army of Gen. Lee, on the south side of the Rapidan, confronted it. A few reconnaissances were made, but without important results. A cavalry expedition into the neighborhood of Richmond was the most active movement at this period of the year. It commenced with the advance of the 8th corps, under Gen. Sedgwick, from Madison Court House, on February 27th. A division under Gen. Birney followed on the next day. Madison Court House was occupied by a brigade of infantry, with a small force of cavalry, but the main force was encamped along the heights of Robertson's River. From this position pickets were sent out to the right and left. Gen. Birney's force occupied James City, a small village west of Culpepper. Meanwhile a cavalry force under Gen. Custer pushed forward by way of Madison Court House, in the direction of Charlottesville, the junction of the Alexandria with the Lynchburg railroad. About the same time, in the afternoon of the 28th, Gen. Kilpatrick, with his division of cavalry, and a portion of Gens. Merritt's and Gregg's divisions, with a light battery of six guns, being nearly eight thousand men, left Stevensburg for the lower fords of the Rapidan, intending to make a dash upon Richmond. This force crossed at Germania and Ely's Fords, distant about sixty miles from Richmond. The command encamped on that night eight miles south of the Rapidan.

The headquarters of Gen. Lee were at Orange Court House, and the movements of the infantry with the command of Gen. Custer, toward Charlottesville, threatened to turn his left, and thus serve as a diversion in favor of the advance of Gen. Kilpatrick. Early on the morning of the 28th (Monday), Gen. Custer pushed forward across the Rapidan, and passing through Stannardsville arrived within four miles of Charlottesville. Here a body of cavalry under Col. Caskie were encountered. Six caissons, some camp equipage, and a few

prisoners were captured, when the enemy rallied in force, and Gen. Custer fell back toward Ravenna River. Finding that the force of the enemy was considerable, the original intention of destroying the railway bridge and stores at Charlottesville was abandoned, and after burning three mills and a saddle factory the Ravenna was crossed, and the bridge burned. It now began to rain and freeze, and the night became exceedingly dark. Gen. Steadman's brigade being in advance, reached Madison Court House soon after daylight in the morning. Gen. Custer, however, was delayed by the difficulty of crossing streams with his artillery in the extreme darkness. Thus the enemy intercepted him near Stannardsville. By means of his artillery Gen. Custer held them in check until he could fall back upon a by-road, and thus avoid them. Madison Court House was reached at dusk on the 29th, with a number of horses and prisoners captured, and without the loss of a man.

In the meanwhile Gen. Kilpatrick resumed his advance on the next morning, to Frederick's Hall, on the Virginia Central Railroad. Here the track was torn up for some distance, and several officers of the enemy captured, and the carriages of several pieces of artillery destroyed. Col. Dahlgren was here detached with a portion of the force, and moved toward the James River Canal, and Gen. Kilpatrick advanced toward Ashland, on the railroad, twenty miles above Richmond. Here he rested on Monday night, and tore up a portion of the railroad track. Early the next morning he moved towards Richmond, on the Brooks' turnpike, and reached within six miles of that city. There he was met by a portion of the engineer troops and a few sections of light artillery, by which his advance was checked. A contest with artillery ensued for two hours, when Gen. Kilpatrick withdrew in the direction of Mechanicsville, burning the trestle work of the railroad across the Chickahominy on his route.

The detachment under Col. Dahlgren penetrated as far as the farm of James A. Seddon, Confederate Secretary of War, and burned his barn and stables, and the flour and saw mills in the vicinity. On the canal a number of freight and other boats were destroyed, and a lock cut. A large number of horses were also seized. The ignorance or evil intention of their negro guide had misled the command, so that it was unable to join Gen. Kilpatrick at Ashland, and aid in the attack on Richmond, where it was supposed the enemy had few troops. It was afternoon, however, before he reached the vicinity of Richmond, advancing by the Westham or river road. As he approached nearer he was confronted on every road by superior numbers, and obliged to fall back.

He then attempted to reach the Peninsula through King's and Queen's county, where he encountered on the next day the 9th Virginia, Lieut.-Col. Pollard, and a sharp skirmish ensued. Col. Dahlgren was killed, and about

sixty of his men captured. The remainder of the command, and the force of Gen. Kilpatrick, who had been obliged to move during the night by the pressure of the enemy, met a cavalry force sent out by Gen. Butler, from Williamsburg, near Tunstall's station on the York River railroad, and retired down the Peninsula. Their loss was about one hundred and fifty men killed and wounded, besides Col. Dahlgren. A number of prisoners were captured. The newspaper press at Richmond subsequently published the following address and orders, and asserted that they were found in the pocket of Col. Dahlgren. His connection with them has been denied, in the most positive manner, by the friends of Col. Dahlgren:

HEADQUARTERS, THIRD DIVISION.
CAVALRY CORPS, 1864.

Officers and Men—You have been selected from brigades and regiments as a picked command to attempt a desperate undertaking—an undertaking which, if successful, will write your names on the hearts of your countrymen in letters that can never be erased, and which will cause the prayers of our fellow soldiers now confined in loathsome prisons to follow you and yours wherever you may go. We hope to release the prisoners from Belle Isle first, and, having seen them fairly started, we will cross the James River into Richmond, destroy the bridges after us, and, exhorting the released prisoners to destroy and burn the hateful city, will not allow the rebel leader Davis and his traitorous crew to escape. The prisoners must render great assistance, as you cannot leave your ranks too far, or become too much scattered, or you will be lost. Do not allow any personal gain to lead you off, which would only bring you to an ignominious death at the hands of citizens. Keep well together and obey orders strictly, and all will be well; but on no account scatter too far, for in union there is strength. With strict obedience to orders and fearlessness in their execution you will be sure to succeed. We will join the main force on the other side of the city, or perhaps meet them inside. Many of you may fall; but if there is any man here not willing to sacrifice his life in such a great and glorious undertaking, or who does not feel capable of meeting the enemy in such a desperate fight as will follow, let him step out, and he may go hence to the arms of his sweetheart, and read of the braves who swept through the city of Richmond. We want no man who cannot feel sure of success in such a holy cause. We will have a desperate fight; but stand up to it when it does come, and all will be well. Ask the blessing of the Almighty, and do not fear the enemy.

U. DAHLGREN, Colonel Commanding.

SPECIAL ORDERS AND INSTRUCTIONS.

Guides and pioneers, with oakum, turpentine, and torpedoes, signal officer, quartermasters, commissaries, scouts and pickets, and men in rebel uniforms—these will remain on the north bank and move down with the force on the south bank, not get ahead of them, and if the communication can be kept up without giving an alarm, it must be done; but every thing depends upon a surprise, and no one must be allowed to pass ahead of the column. Information must be gathered in regard to the crossings of the river, so that, should we be repulsed on the south side, we will know where to recross at the nearest point.

All mills must be burned and the canal destroyed, and also every thing which can be used by the rebels must be destroyed, including the boats on the river. Should a ferry boat be seized which can be worked, have it moved down. Keep the force on the south side posted of any important movement of the enemy,

and in case of danger, some of the scouts must swim the river and bring us information. As we approach the city the party must take great care that they do not get ahead of the other party on the south side, and must conceal themselves and watch our movements. We will try and secure the bridge to the city, one mile below Belle Isle, and release the prisoners at the same time. If we don't succeed they must then dash down, and we will try to carry the bridge by storm. When necessary the men must be filed through the woods and along the river bank. The bridge once secured and the prisoners loose and over the river, the bridges will be burned and the city destroyed.

The men must be kept together and well in hand, and once in the city, it must be destroyed and Jeff. Davis and his Cabinet killed. Pioneers will go along with combustible material. The officer must use his discretion about the time of assisting us. Horses and cattle which we do not need immediately must be shot, rather than left.

Every thing on the canal and elsewhere, of service to the rebels, must be destroyed.

As Gen. Custer may follow me, be careful not to give a false alarm. The signal officer must be prepared to communicate at night by rockets, and in other things pertaining to his department. The Quartermasters and Commissaries must be on the lookout for their departments, and see that there are no delays on their account. The engineer officer will follow and survey the road as we pass over it, &c. The pioneers must be prepared to construct a bridge or destroy one. They must have plenty of oakum and turpentine for burning, which will be soaked and rolled into balls and be given to the men to burn when we get into the city. Torpedoes will only be used by the pioneers for burning the main bridges, &c. They must be prepared to destroy the railroads.

Men will branch off to the right with a few pioneers and destroy the bridges and railroads south of Richmond, and then join us at the city. They must be well prepared with torpedoes, &c.

The line of Falling Creek is probably the best to march along, or, as they approach the city, Good's Creek, so that no reinforcements can come up on any cars.

No one must be allowed to pass ahead, for fear of communicating news.

Rejoin the command with all haste, and if cut off, cross the river above Richmond and rejoin us. Men will stop at Bellona Arsenal and totally destroy it and every thing else but hospitals; then follow on and rejoin the command at Richmond with all haste, and, if cut off, cross the river and rejoin us. As Gen. Custer may follow me, be careful and not give a false alarm.

On the approach of Gen. Kilpatrick Richmond was in a defenceless condition. The Departments of the Government were closed and the clerks armed for defence. Men were collected from every quarter to oppose him. At the same time great consternation prevailed.

On the 29th of February an act of Congress to revive the grade of Lieutenant-General was approved by President Lincoln. He immediately sent the nomination of Maj.-Gen. Ulysses S. Grant to the Senate for confirmation. On March 3d this nomination was confirmed by the Senate. Gen. Grant was then in command of the army in Tennessee. He at once left his Department for Washington, and visited the President on March 9th. On presenting to him the commission as Lieutenant-General, in the presence of the Cabinet, Gen. Halleck, Gen. Rawlins, and Col. Comstock, of Gen. Grant's staff, the son of Gen. Grant, Mr. Lovejoy, of

the House of Representatives, and others, the President rose and said:

GEN. GRANT: The nation's appreciation of what you have done, and its reliance upon you for what remains to do, in the existing great struggle, are now presented with this commission, constituting you Lieutenant-General in the Army of the United States. With this high honor devolves upon you, also, a corresponding responsibility. As the country herein trusts you, so, under God, it will sustain you. I scarcely need to add that with what I here speak for the nation, goes my own hearty personal concurrence.

To which Gen. Grant replied:

MR. PRESIDENT: I accept this commission with gratitude for the high honor conferred.

With the aid of the noble armies that have fought on so many fields for our common country, it will be my earnest endeavor not to disappoint your expectations.

I feel the full weight of the responsibilities now devolving on me, and I know that if they are met, it will be due to those armies, and, above, all to the favor of that Providence which leads both nations and men.

On the 11th of March Gen. Grant returned to Nashville, Tennessee. On the 12th, the following order was issued at Washington:

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, }
WASHINGTON, March 12. }

General Orders No. 98.

The President of the United States orders as follows: 1. Maj.-Gen. Halleck is, at his own request, relieved from duty as General-in-Chief of the Army, and Lieut.-Gen. U. S. Grant assigned to the command of the Armies of the United States. The headquarters of the army will be in Washington and also with Lieut.-Gen. Grant in the field.

2. Maj.-Gen. Halleck is assigned to duty in Washington as Chief-of-Staff of the Army, under the direction of the Secretary of War and the Lieutenant-General commanding. His orders will be obeyed and respected accordingly.

3. Maj.-Gen. W. T. Sherman is assigned to the command of the military division of the Mississippi, composed of the Department of the Ohio, the Cumberland, the Tennessee, and the Arkansas.

4. Maj.-Gen. J. B. McPherson is assigned to the command of the Department and Army of the Tennessee.

5. In relieving Maj.-Gen. Halleck from duty as General-in-Chief, the President desires to express his approbation and thanks for the zealous manner in which the arduous and responsible duties of that position have been performed.

By order of the Secretary of War.

E. D. TOWNSEND, Ass't Adj't Gen.

On the 17th, Gen. Grant issued the following order:

HEADQUARTERS ARMIES OF UNITED STATES, }
NASHVILLE, March 17, 1864. }

General Orders No. 1.

In pursuance of the following order of the President—

EXECUTIVE MANNING, }
WASHINGTON, D. C., March 10, 1864. }

Under the authority of the act of Congress to revive the grade of Lieutenant-General of the United States Army, approved February 29th, 1864, Lieut.-Gen. U. S. Grant, U. S. A., is appointed to the command of the Armies of the United States.

(Signed) A. LINCOLN.

I assume command of the Armies of the United States. My headquarters will be in the field, and until further orders will be with the Army of the Potomac. There will be an officers' headquarters in Washington, to which all official communications

will be sent, except those from the army where headquarters are at the date of this address.

(Signed) U. S. GRANT, Lieut.-Gen. U. S. A.

On the 19th Gen. Grant left Nashville for Washington, and proceeded thence to the Army of the Potomac. On the 24th the following order was issued by Gen. Meade, in command of the Army of the Potomac:

HEADQUARTERS ARMY OF THE POTOMAC, }
Thursday, March 24, 1864. }

General Orders No. 10.

The following order has been received from the War Department:

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, }
WASHINGTON, March 23, 1864. }

General Orders No. 15.

By direction of the President of the United States the number of army corps comprising the army of the Potomac will be reduced to three, viz., the 2d, 5th, and 6th corps; and the troops of the other two corps, viz., the 1st and 3d, will be temporarily reorganized and distributed among the 2d, 5th and 6th by the commanding general, who will determine what existing organizations will retain their corps badges and other distinctive marks. The staff and officers of the 2d corps, which are temporarily broken up, will be assigned to vacancies in the other corps, so far as such vacancies may exist. Those for whom there are no vacancies will cease to be considered as officers of the general staff of army corps.

2. Maj.-Gen. G. K. Warren is assigned by the President to the command of the 5th corps.

3. The following general officers are detached from the Army of the Potomac, and will report for orders to the Adjutant General of the army, viz.: Maj.-Gen. George Sykes, U. S. V.; Maj.-Gen. W. H. French, U. S. V.; Maj.-Gen. John Newton, U. S. V.; Brig.-Gen. J. R. Kenly, U. S. V.; Brig.-Gen. F. Spinola, U. S. V., and Brig.-Gen. Solomon Meredith, U. S. V.

By order of the Secretary of War.

E. D. TOWNSEND, Ass't Adj't Gen.

The following arrangements are made to carry out the provisions of the foregoing order:

The 2d, 5th, and 6th army corps will each be consolidated into two divisions. The 1st and 2d divisions of the 3d corps are transferred to the 2d corps, preserving their badges and distinctive marks. The 3d division of the 3d corps is transferred permanently to the 6th corps. The three divisions now forming the 1st corps are transferred to the 5th corps, preserving their badges and distinctive marks, and on forming the 5th corps they will be consolidated into two divisions.

The commanders of divisions transferred to the 2d, 5th, and 6th corps will at once report to the commanders of those corps for instructions. Brig.-Gen. J. B. Carr will report to Maj.-Gen. Hancock, commanding 2d corps, and Brig.-Gen. H. Prince to Maj.-Gen. Sedgwick, commanding 6th corps. The chief of artillery will assign eight batteries each to the 2d, 5th, and 6th corps; the batteries to be taken from those now with the corps and with the 1st and 3d corps. The batteries with the several corps in excess of the above allowance will join the artillery reserve.

The consolidation of divisions called for in this order will be made by the corps commanders concerned, who are authorized to rearrange the brigades of their respective commands in such manner as they may think best for the service. The reassignment of officers of the staff departments consequent upon the reorganization of the army, will be made upon the nomination of chiefs of the staff departments at these headquarters.

Special instructions will be given hereafter with respect to staff officers of the 2d corps, temporarily broken up.

The Major-General Commanding avails himself

of the occasion to say that, in view of the reduced strength of nearly all the regiments serving in this army, the temporary reduction of the army corps to three is a measure imperatively demanded by the best interests of the service, and that the reasons for attaching the 1st and 3d corps for the time being to other corps, were in no respect founded on any supposed inferiority of those corps to the other corps of the army. All the corps have equally proved their valor in many fields, and all have equal claims to the confidence of the Government and the country. The 1st and 3d corps will retain their badges and distinctive marks, and the Major-General Commanding indulges the hope that the ranks of the army will be filled at an early day, so that those corps can again be reorganized.

By command of Maj.-Gen. MEADE.
S. WILLIAMS, Ass't Adj't Gen.

A concentration of troops was now commenced in preparation for a campaign against Richmond, in Virginia, by the Army of the Potomac, under Gen. Meade, and a campaign against Atlanta, in Georgia, by the Army of Tennessee, under Gen. Sherman. Gen. Grant continued to be present with the Army of the Potomac during the year. Gen. Meade was as truly the commander of that army as Gen. W. T. Sherman of the army operating in Georgia, and both these officers were equally under the command of Gen. Grant. His presence with the Army of the Potomac naturally led to his assuming a more direct and personal supervision of affairs in Virginia than he was able to do of the co-operative movement of Gen. Sherman in Georgia. The orders of Gen. Grant to Gen. Meade were of the most general character. The manner of executing them was left to the judgment and skill of the latter. It was now nine months since the Army of the Potomac had fought a general battle, and seven months since the Western army marched into Chattanooga—the last battle for the possession of which was fought in November.

The month of April passed in reorganizing both armies, and in making preparations for the campaign against Richmond and Atlanta.

It was the middle of March when Gen. Grant turned over the military division of the Mississippi, comprising the departments of the Cumberland, the Tennessee, and the Ohio, to Major-General W. T. Sherman, who had previously commanded the department of the Tennessee, to which Major-General McPherson was soon after assigned. In the succeeding month the general plan of the summer campaign, which contemplated a simultaneous advance upon Richmond by the army of the Potomac, and upon Atlanta from Chattanooga, by the several western armies, was matured, and Gen. Sherman at once bent every energy to the perfecting and enlargement of the communications between Nashville and Chattanooga, his primary and secondary bases, and to the accumulation in the latter place of a sufficient quantity of provisions and military stores. These went forward with great rapidity, and by the end of April the depots in Chattanooga were reported abundantly supplied for all immediate purposes.

At this time the headquarters of the armies of the Tennessee, the Cumberland, and the Ohio, were respectively at Huntsville, Chattanooga, and Knoxville; and on the 27th, Gen. Sherman having been notified by Gen. Grant that the Army of the Potomac would march from Culpepper on or about May 5th, and that he wished the movement from Chattanooga to commence at the same time, put his troops in motion toward the latter place. The total force under his command for offensive purposes, was as follows:

Army of the Cumberland, Major-Gen. Thomas Commanding.

Infantry.....	54,568
Artillery.....	2,877
Cavalry.....	3,928
Total.....	60,773
Guns.....	180

Army of the Tennessee, Major-Gen. McPherson Commanding.

Infantry.....	32,487
Artillery.....	1,404
Cavalry.....	624
Total.....	34,465
Guns.....	96

Army of the Ohio, Major-Gen. Schofield Commanding.

Infantry.....	11,188
Artillery.....	679
Cavalry.....	1,679
Total.....	13,560
Guns.....	28

making a grand aggregate of 88,188 infantry, 4,460 artillery, and 6,149 cavalry, or 98,797 men and 254 guns. The Army of the Cumberland comprised the 4th corps, Gen. Howard; the 14th corps, Gen. Palmer, and the 20th corps, Gen. Hooker; the Army of the Tennessee, the 15th corps, Gen. Logan; the 16th corps, Gen. Dodge; and later in the campaign, the 17th corps, Gen. Blair; and the Army of the Ohio, the 23d corps, Gen. Schofield. These armies were grouped on the morning of May 6th as follows: That of the Cumberland at Ringgold, on the Western and Atlantic Railroad, 28 miles southeast of Chattanooga; that of the Tennessee at Gordon's Mill, on the Chickamauga, eight miles west of Ringgold; and that of the Ohio, near Red Clay, on the Georgia line, about ten miles northeast of Ringgold. The enemy, comprising Gens. Hardee's, Hood's, and Polk's corps of infantry and artillery, and Wheeler's division of cavalry, the whole commanded by Lieut.-General Joseph E. Johnston, of the Confederate Army, lay in and about Dalton, fifteen miles south of Ringgold, on the railroad, the advance being at Tunnel Hill, a station about midway between the two places. Their cavalry were estimated by Gen. Sherman at 10,000 men, and the infantry and artillery at from 45,000 to 50,000, of whom much the greater part were veteran troops.

Topographically considered, the State of Georgia admits of three distinct divisions: 1. A mountainous region, embracing the northwest corner of the State, and which terminates at the Kenesaw Mountain, near Marietta, 120 miles from Chattanooga; 2. A gently undulat-

ing country extending from the mountainous region to a line passing in a northeasterly direction through Columbus, Macon, and Augusta; and 3. A level country extending to the seaboard, for the most part sandy and thickly covered with pine woods, and along the coast bordered by extensive swamps. The northwestern portion of the State, as far south as Atlanta, is almost exclusively a grain and grass-bearing region; the middle and eastern divisions being devoted chiefly to the cultivation of cotton. But its mineral wealth, particularly in iron ores, which abound among the mountains, has, since the commencement of the war, rendered the possession of this first-mentioned division a matter of prime importance to the Confederates. At Etowah, Rome, and Atlanta were large iron works in the employ of the rebel government, the capture and permanent occupation of which by a Union force would be likely to cause much embarrassment, not to speak of cotton and woollen mills at Roswell, Rome, and elsewhere, which turned out large quantities of fabrics for the use of the rebel troops.

Atlanta, lying near the boundary between the northwestern and middle divisions had, previous to the war, become an important centre of railroad communication and trade between the western and Atlantic and Gulf States, and one of the chief manufacturing towns of the South. It is laid out in a circle, two miles in diameter, in the centre of which was the passenger depot (since destroyed) of railroads radiating to Chattanooga, Augusta, Macon, and Montgomery; and the business portion of the town contained many fine blocks of warehouses for storing goods consigned from the north and northwest to the cotton regions of the South. Here also were established the machine shops of the principal railroads, the most extensive rolling mill in the South, foundries, pistol, and tent factories, and numerous works under the direction of the Confederate Government for casting shot and shell, and the manufacture of gun-carriages, cartridges, caps, shoes, clothing, and other military supplies. The population, numbering in 1860 about 15,000, had, subsequent to the commencement of the war, been increased by the arrival of refugees and government officials and employes to fully 20,000. In any event the capture of the place, with its vast stores and costly machinery, would so cripple the rebel resources, that the simple suggestion of such a contingency sent a thrill of alarm through the entire Confederacy. In the opinion of many its importance was not second even to that of Richmond. Strenuous efforts were accordingly put forth for its defence, and the line of approach along the Western and Atlantic Railroad, which is crossed by the Oostanaula and Etowah, branches of the Coosa River, which in turn is a branch of the Alabama, and by the Chattahoochee, and is girt as far as Marietta by ranges of rugged hills, was rendered as difficult for Sherman as the abundant

resources at the disposal of Johnston would admit. Should the mountain region be traversed or turned, and the Chattahoochee be crossed by an invading army, the enormous strength of Atlanta itself still gave promise of a long and perhaps successful defence, while an active cavalry force operating on Sherman's flanks might so seriously interrupt his communications as to compel him to retrace his steps and abandon the campaign. His forces were also liable to daily depletion as he advanced by the necessity of garrisoning captured places as well as of guarding the line of railway, while Johnston, moving constantly nearer to his supplies and reinforcements, would probably be relatively stronger when he reached Atlanta than when he started. The consequences which defeat would entail upon either party seemed so disastrous that the campaign was watched with an interest hardly inferior to that attending the more extensive operations around Richmond.

For the convenience of reference the following table of stations on the Western and Atlantic Railroad, with their distances from Chattanooga, is appended:

	Miles.		Miles.
Boycce.....	5	Kingston.....	79
Chickamauga.....	10	Cass.....	86
Johnson.....	18	Cartersville.....	91
Ringgold.....	28	Etowah.....	95
Tunnel Hill.....	31	Altoona.....	98
Dalton.....	38	Ackworth.....	102
Tilton.....	47	Big Shanty.....	108
Resaca.....	56	Marietta.....	119
Calhoun.....	60	Vining's.....	120
Adairsville.....	69	Atlanta.....	123

A reconnoissance by Gen. Sherman of Gen. Johnston's position at Dalton satisfied him that an attack in front was impracticable, even should the enemy abandon their works at Tunnel Hill. Directly south of this eminence, through which passes the railroad by a tunnel eighteen hundred feet in length, opens a level valley about three miles long by half to three-quarters of a mile in width, bounded at its further extremity by "Rocky Faced Ridge," a steep, thickly-wooded and rugged eminence, which commands the approach to Dalton both by railroad and wagon road, and extends as an impassable barrier along its west side for many miles. The outlet to this valley is through a narrow mountain pass called Buzzard Roost, nearly midway between Tunnel Hill and Dalton, which by means of abatis, a formidable series of batteries, and a line of rifle-pits at its northern entrance, had been rendered absolutely impregnable to a force advancing along the railroad. On its northeast side Dalton was defended by strong works on Mill Creek. Gen. Sherman accordingly directed Gen. McPherson, with the Army of the Tennessee, to move rapidly southward from his position at Gordon's Mill, *via* Ship's Gap, Villanov, and Snake Creek Gap, upon Resaca, a station eighteen miles below Dalton, or upon any other point on the railroad which might prove more accessible. This movement, he supposed, would compel Gen. Johnston to evacuate Dalton, when Gen.

McPherson would be in a position to harass the enemy's flank, while the main body of the Federal army pressed him from the north. While this flanking movement was in progress a strong feint of attack was to be made by Gen. Thomas in front of Buzzard Roost, and Gen. Schofield, with the Army of the Ohio, was directed to close up upon the latter's left.

On the 7th Gen. Thomas advanced from Ringgold toward Tunnel Hill, which was carried by the 14th corps under Gen. Palmer, after a brief skirmish, with the loss of a few men wounded. The slight resistance offered by the enemy indicated that they had no intention of defending the position, but only sought to hold Gen. Thomas in check until they could make good their retreat to the stronger position of Buzzard Roost. The Federal line was established on the same evening about a mile south of Tunnel Hill. On the 8th a demonstration in force was made against Rocky Faced Ridge and Buzzard Roost, which, on the 9th, was pushed almost to a battle. The 4th (Howard's) corps succeeded in carrying the ridge, but found the crest too narrow to enable it to attack the pass with any prospect of success. Gen. Schofield meanwhile came up on Gen. Thomas's left, which was held by Gen. Howard, and a brigade of his cavalry, while demonstrating against the enemy's right flank, met with some loss in an encounter with a superior force of rebel infantry.

On the 8th Gen. McPherson passed through Snake Creek Gap, surprising a rebel cavalry force sent to hold the position, and approached within a mile of Resaca, which he found too strong to be carried by assault. Apprehending, also, that if he should attempt to cross over to the railroad he might expose his left flank to an attack from the direction of Dalton, he fell back to a strong position at the west end of Snake Creek Gap, and reported to Gen. Sherman. The latter, finding that the demonstration on the enemy's flank had failed to compel him to evacuate his strong position, immediately determined to put the remainder of his army in motion for Snake Creek Gap; and on the 10th Gen. Hooker's (20th) corps, which held the right of Gen. Thomas's line, started for that place, followed on the succeeding day by the rest of Thomas's troops, with the exception of two divisions of Howard's corps and some cavalry, who were left to threaten the enemy in front of Buzzard Roost, and by Gen. Schofield's army; the three armies thus holding the same relative positions occupied by them at the commencement of the campaign. The Federal loss in the actions of the 8th and 9th was between 700 and 800 killed, wounded, and missing, the greater number being only slightly wounded.

Resaca, toward which Sherman was now moving, is situated on the Oostanaula, in a peninsula formed by the junction of that river with its northwest fork, the Conasauga, and across this peninsula the rebels had erected

continuous lines of rifle-pits with strong field fortifications, particularly about the town, by means of which their flanks were protected on either river, and a line of retreat preserved across the Oostanaula. Friday, May 18th, was occupied by the troops in deploying through Snake Creek Gap and getting into position in Sugar Valley, a fertile tract beyond, much broken by hills, which are covered by a dense undergrowth, and on that account difficult of approach. The movement was covered by the cavalry under Gen. Kilpatrick, who, while pressing the enemy toward Resaca, fell into an ambuscade and received a severe flesh wound, which incapacitated him for several months for active duty. During the day the Federal lines were advanced toward Resaca, the right under McPherson resting on the Oostanaula, about two miles below the town, and extending thence northward so as to face it; the centre, under Gen. Thomas, closing up upon Gen. McPherson's left, and the left, under Schofield, striking the Conasauga near Tilton, a station on the railroad about midway between Dalton and Resaca. Beside the protection afforded by the two rivers, both flanks of the army were covered by heavy bodies of cavalry. The scene of these operations was a rugged, thickly-wooded country, abounding in steep hills and narrow ravines, through one of which, directly in front of the rebel lines, flows Camp Creek, a small stream emptying into the Oostanaula near Resaca.

Gen. Johnston was not long in detecting the object of Sherman's flanking march, and judging the position at Dalton to be no longer tenable, he moved rapidly southward on the 12th, and having the shorter line of march, reached Resaca with his entire force before the Union army had debouched from Snake Creek Gap. The divisions of Howard's corps left to watch Buzzard Roost, soon after occupied Dalton, which was found thoroughly stripped of supplies and almost deserted, and moving in the enemy's rear, effected a junction on the 14th with the Federal left, near Tilton. The successful turning of the rebel position at Dalton was justly considered a great step gained in the movement upon Atlanta; and even among the rebel troops there were many who thought that if their leader could not hold for more than four days a place so strongly fortified by nature, he would be unable to maintain himself for a long time at any of the remaining points north of Atlanta, no one of which was perhaps so capable of defence as Dalton.

The night of the 18th was employed by the rebels in strengthening their already formidable position by additional earthworks, and on the morning of the 14th they were in complete readiness for an attack, their right wing being held by Gen. Hardee, their centre by Gen. Hood, and their left by Gen. Polk. Skirmishing commenced at an early hour, and the object of Gen. Sherman being to press Resaca at all points, while a force of infantry and cav-

alry crossed the Oostanaula and threatened Calhoun in the rear, the firing toward noon grew heavy along the whole rebel line. The Federal general had hoped to be able to turn the rebel left wing, and thus cut off their retreat, but the nature of the ground rendered this impossible. At 1 P. M. an attempt was made by Palmer's corps, holding the left centre, to break the enemy's line, and force him from an elevated position in the immediate front. To reach this point it was necessary to descend a hill in full range of rebel artillery, ford a stream thickly bordered with undergrowth and interlacing vines, and then, crossing a valley full of ditches and other obstructions, to mount the opposite eminence. In the teeth of a murderous fire of musketry and artillery, Palmer's troops charged down the hill and across the creek; but becoming speedily entangled in the obstructions, and unable to find shelter or to return with effect the plunging fire of the enemy, which caused havoc in their ranks, they were forced to retire, with a loss estimated at upwards of a thousand. About the same time, further to the left, Gen. Judah's division of the 28d corps and Newton's of the 4th corps, moving over comparatively level ground, succeeded, after a desperate struggle, in forcing the enemy to abandon an important position on their outer line. Although the Federal troops were unable to hold this, they succeeded in advancing their line and getting their artillery into a position to prevent the enemy from reoccupying the works. On the extreme left, that portion of the 4th corps which had arrived from Dalton, in concert with Gen. Schofield, maintained heavy skirmishing with the rebel right, the dense woods in that direction preventing the use of artillery, and effectually concealing the movements of troops on either side. The operations on Gen. McPherson's end of the line were, during the morning, of the same character.

At about 3 o'clock in the afternoon Gen. Johnston, perceiving that no serious impression had been made upon his lines, quietly massed a heavy force on the road to Tilton, with a view of turning the Federal left flank, held by Stanley's division of the 4th corps. The attack was delivered with impetuosity and in such overwhelming numbers, that Stanley's troops, after a stubborn resistance, were forced in confusion from a hill upon which they were posted. The rebels rushed on with loud yells across an open field west of the hill, and for a few moments matters wore a critical aspect. Fortunately, however, the movement of the rebel right had been early detected, and Hooker's corps sent from the centre to reinforce the Federal left. The timely arrival of a portion of his troops checked the rebel advance, and the scattered division of Stanley having been partially rallied, the rebels were at dusk driven back within their lines with severe loss. Meanwhile Gen. McPherson, taking advantage of the enemy's occupation with this movement, ordered Logan's (15th) corps, with a portion of the 16th, to

cross Camp Creek and carry a hill and a line of rifle-pits on the enemy's extreme left, in front of Resaca, which was effected with slight loss. As the position was one which would enable the Federal General to pour a destructive enfilading fire upon the rebel works, and also to command the railroad and trestle bridges across the Oostanaula, a desperate effort was made soon after dark to retake it. Heavy columns of infantry with fixed bayonets moved up to the very crest of the hill, but recoiled under the steady fire of the Federal troops, and finally retired in confusion. At 10 P. M. the fighting terminated for the day. The result of the day's work was on the whole satisfactory to Gen. Sherman, as the Federal lines had nowhere been permanently forced back, while on their left and centre the rebels had lost positions of importance.

The night of the 14th was occupied by both armies in strengthening their positions, and the morning of the 15th opened with heavy skirmishing along the Federal centre, under cover of which troops were massed for an assault upon two fortified hills commanding each other, on the enemy's extreme right, which were considered the key to the whole position. For this purpose Gen. Hooker's corps had been shifted to the extreme left, and Gens. Howard's, Schofield's, and Palmer's troops moved to the right to fill up the gap occasioned by the withdrawal of Gen. Hooker. Shortly after 1 o'clock in the afternoon Gen. Hooker sent forward Butterfield's division as the assaulting column, supported by the divisions of Gens. Geary and Williams, and after several unsuccessful attacks the enemy were driven from a portion of their lines, and a lodgment was secured under the projecting works of a lunette, mounting four pieces of artillery. So severe, however, was the fire from rifle-pits beyond and on either side of this work, forming the inner rebel line, that further advance was impossible, and the Federal troops were fain to seek such shelter as was available, and content themselves with holding the position they had gained. Toward the close of the afternoon Gen. Hood's corps made a determined but unsuccessful effort to dislodge them, and subsequently, under cover of the darkness, a number of rebel prisoners were brought up, the ends dug out of the works, and the guns hauled out by means of ropes, under a destructive fire from the rebels. As soon as a breach was made our forces rushed in and captured the lunette after a desperate engagement. The guns seized were twelve-pounders. The flags of the 85th and 88th Alabama regiments were captured, with over two hundred prisoners. While these operations were in progress the enemy's attention was occupied by heavy skirmishing along the whole line.

During the night the enemy quietly abandoned Resaca, leaving behind a four-gun battery and a quantity of stores, and by dawn were well on their way to Kingston, thirty-two miles

south on the railroad. Gen. Thomas's troops immediately occupied the town, and succeeded in saving the road bridge, but the railroad bridge, the most costly structure of the kind between Chattanooga and Atlanta, was destroyed by the enemy, with the exception of the stone piers. The total Federal loss in the two days' fighting was between 4,000 and 5,000 killed and wounded, upward of 2,000 of the latter being so slightly injured that they were returned to duty in two or three weeks. The rebel loss was stated by themselves at 2,500, which is probably not far from the mark. Fighting for the most part behind earthworks, and having the advantage of position, they necessarily suffered less than their opponents. Beside the eight guns and the stores already mentioned, they left about 1,000 prisoners in the hands of the Federals. According to Gen. Sherman nothing saved Gen. Johnston's army at Resaca but the impracticable nature of the surrounding country, which made the speedy passage of troops across the valley from Snake Creek Gap an impossibility. This fact enabled the rebel army to reach Resaca from Dalton along comparatively good roads, constructed beforehand by the foresight of their general. The latter was nevertheless severely criticized for this second abandonment of what was considered a defensible position, notwithstanding that the Richmond newspapers explained that his peculiar forte consisted in drawing an enemy after him, and then overwhelming him by a sudden attack. They also endeavored to derive consolation from a reputed caution of Gen. Scott to a Federal commander: "Beware of Lee advancing, and watch Johnston at a stand; for the devil himself would be defeated in the attempt to whip him retreating," which was extensively quoted in the Southern papers.

Soon after the discovery of Gen. Johnston's retreat, the cavalry divisions of Gens. Stoneman and McCook were thrown forward in pursuit, and during the 16th the army was occupied in crossing the Oostanaula. Gen. Thomas made the passage at Resaca, Gen. McPherson at Lay's Ferry, a few miles to the southwest, while Gen. Schofield, moving to the left of Thomas, crossed the Oonasauga and Coosawattee, which unite near Resaca to form the Oostanaula. In this order the army marched southward on roads parallel to the railroad, finding no trace of the enemy until reaching the neighborhood of Adairsville, thirteen miles below Resaca, where Newton's division of the 4th corps had a smart skirmish with the rebel rear guard, who had posted their sharpshooters in an octagon cement building called "Graves House," for the purpose of delaying the advance. By the aid of artillery they were driven out, and on the 18th the 4th corps reached Kingston, four miles beyond which place the enemy were again discovered in considerable force on open ground. At Cassville, five miles east of Kingston, they were known to have constructed strong works; and on the 19th, in

anticipation of a general engagement, Gen. Sherman directed Gen. Schofield to move down toward this place from the north, while Gen. Thomas closed up upon his right, and McPherson marched to Kingston to be in close support of Thomas. Gen. Johnston, however, declined the offer of battle, and during the night retreated across the Etowah, burning the road and railroad bridges behind him. A few days' halt for rest and refreshment was now allowed the army, and as the country north of the Etowah had been completely stripped by Gen. Johnston, it was necessary to await the arrival of supplies by railroad. The latter fortunately had received little injury at the hands of the enemy, and by the energetic labors of the repairing parties, who followed close behind the army, was put in running order to Kingston on the 20th, on which day trains arrived laden with supplies. By this means the army was soon restored to a condition of complete efficiency, and relieved of the necessity of looking after the wounded, who were sent back to Chattanooga. In like manner telegraphic communication with the latter place was kept open as the army advanced.

While these operations were in progress, Gen. Jeff. C. Davis, of Palmer's corps, on the 17th marched southwesterly from Resaca toward Rome, fifteen miles west of Kingston, which place he occupied on the 19th after a sharp fight, gaining possession of several forts, eight or ten guns of heavy caliber, large quantities of stores, and the valuable mills and foundries employed in the service of the Confederate Government.

Gen. Johnston had meanwhile taken a strong position at Allatoona Pass, in the Etowah Mountains, south of the Etowah River, which formed an almost impregnable barrier to a direct advance upon Atlanta by railroad. Gen. Sherman accordingly resorted to the same tactics which had proved so successful at Dalton; and having supplied his wagons with twenty days' provisions, and left garrisons at Rome and Kingston, he put his army in motion on May 28d for Dallas, a town lying about fifteen miles southwest of Allatoona Pass, and eighteen miles directly west of Marietta, a station on the railroad forty miles below Kingston, and twenty-four south of the Etowah River. He expected thus, by threatening Marietta, to compel the evacuation of Allatoona. The country between Dallas and the railroad is of the same impracticable character as that in which previous operations of the campaign had been conducted, being for the most part densely wooded, traversed by ranges of rugged hills, and cut up by frequent ravines. The roads were few and poor. Through this region, admirably adapted for defence, and of which the topography was scarcely known to the Federal general, the advance in the presence of a vigilant enemy had necessarily to be made with much caution, and it will be seen that several days were occupied with manœu-

ring for position and other movements, before any practical results were obtained.

In marching upon Dallas, Gen. McPherson, still holding the Federal right, made a somewhat wide detour to the southwest through Van Wert, while Gen. Thomas took a course nearly due south, having Gen. Schofield on his left flank. The movement had scarcely commenced before it was detected by Gen. Johnston, who having the shorter line to Dallas, marched in the direction of that place to cover the approaches to Marietta. On the 25th Hooker's corps, approaching Pumpkin Vine Creek on the main Dallas road, came into collision with parties of Hood's and Hardee's corps, and a severe engagement took place for the possession of a point known as the New Hope Church, where three roads meet from Ackworth [four miles south of Allatoona by rail], Marietta, and Dallas. By means of earthworks the enemy successfully resisted the advance of Gen. Hooker, and the night closing with a heavy rain storm, no further attempt was made to force the position. In this affair Hooker sustained a loss of about six hundred killed and wounded. Gen. Sherman then ordered McPherson to move up to Dallas, and Gen. Thomas to make a bold demonstration against New Hope Church, while Schofield overlapped the enemy's right wing. Owing to the difficult nature of the country, the 26th and 27th were occupied in perfecting these dispositions, and on the evening of the latter day his line extended in a semicircular direction northeast from Dallas, the enemy having his right resting on the road from Ackworth to Dallas, at a point three miles northeast of New Hope Church, and his left at a point nearly due east of Dallas. Heavy skirmishing attended these manœuvres, but as the density of the surrounding woods rendered the use of artillery impracticable, the casualties were not numerous. On the 28th, just as Gen. McPherson was on the point of closing up to Gen. Thomas in front of New Hope Church, in order to enable a further development of the Federal left wing, he was attacked by a heavy rebel force, whose repeated and desperate, though fruitless assaults had the effect of checking temporarily the contemplated movement. The Federal troops, protected by their breastworks, finally drove the enemy back with a loss of upward of two thousand killed and wounded.

After a brief pause, interrupted only by the customary skirmishing, renewed orders were given for the shifting of the Federal line to the left. The movement was now effected with comparative ease, and on June 1st, the roads to Allatoona and Ackworth being occupied, the cavalry divisions of Stoneman and Garrard were pushed forward to Allatoona Pass, which was carried with slight loss. Orders were immediately given to rebuild the railroad bridge over the Etowah, at Etowah Station, and on June 4th Gen. Sherman moved directly upon Ackworth. This manœuvre compelled Gen.

Johnston to abandon his intrenchments at New Hope Church, and move westward to the railroad to cover Marietta, and on the 6th the Federal army reached Ackworth, where it rested for several days. Allatoona Pass was at once fixed upon as a secondary base, and put in a defensible condition. A well-informed correspondent, summing up the results of the campaign to this date, observes: "We have in a month's time, with a force not very much superior to his, forced the enemy back nearly one hundred miles, obliging him to abandon four different positions of unusual strength and proportions; have fought him six times; have captured twelve guns, three colors, over two thousand prisoners, with considerable forage, provisions, and means of transportation; have placed at least fifteen thousand of his men *hors de combat*, and have destroyed several important foundries, rolling mills, iron works, &c., at Rome, and in the Allatoona Mountains."

On the 8th Gen. Blair reached Ackworth with two divisions of the 17th army corps, which were attached to Gen. McPherson's command, and a brigade of cavalry belonging to Gen. Garrard's division. These accessions compensated for the Federal losses in battle, and the garrisons left at Resaca, Rome, Kingston, and Allatoona, and on the 9th the army, refreshed by three days' much needed rest, and abundantly supplied with stores, moved forward to Big Shanty, the next railroad station south of Ackworth. Between this place and Marietta intervenes a mountainous district of vast natural strength, having three detached and well-defined summits, where Gen. Johnston had made his next stand. Kenesaw Mountain, the most easterly of these summits, is a double-peaked eminence, about 1,200 feet high, lying directly north and northwest of Marietta, and west of the railroad, and sending out a spur for several miles in a northeasterly direction. West of Marietta, on the road to Dallas, is Lost Mountain, and midway between the latter and Kenesaw, half a mile further to the north, is Pine Mountain, a rugged, cone-shaped peak, which may be said to form the apex of a triangle, of which Kenesaw and Lost Mountains constitute the base. The three eminences are connected by several ranges of lesser heights, seamed with ravines, and covered with a dense growth of oak and hickory, and upon their summits the rebels had erected signal stations which commanded an excellent view of all the general operations of the Federal forces. As the latter drew in sight, the most assailable points in this succession of mountain fortresses appeared bristling with cannon, and the spurs were alive with men constructing earthworks, felling timber for obstructions, and otherwise preparing for an obstinate resistance. The rebel front extended westward from the railroad, on which their right rested, about four miles, and comprised several successive lines of intrenchments. They had also some works on the ridge east of the railroad. "The rebel

works," says the correspondent above quoted, "consisted of log barricades, protected by earth thrown against them, with a formidable abatis, and in many places a *chevaux-de-frise* of sharpened fence-rails besides. The thickness of this parapet (which really resembled a parallel) was generally six to eight feet at top, on the infantry line, and from twelve to fifteen feet thick at top where field guns were posted, or where fire from our artillery was anticipated."

The controlling point of the whole region is Kenesaw Mountain, which covers the railroad and the town of Marietta so effectually that a direct advance upon the latter place from the north would be well-nigh impossible. As the rebel lines were drawn, it constituted a stronghold or citadel in a deep reentrant, Pine and Lost Mountains and the connecting ridges being in the nature of outworks, useful in retarding the approach of an enemy, but not absolutely essential as portions of a system of defences. The accounts of prisoners, deserters, and scouts, placed Gen. Johnston's force at nine divisions of seven thousand men each, which was probably somewhat above the mark; in addition to which an auxiliary force of fifteen thousand Georgia militia, called out by Governor Brown, was placed at his disposal. The latter, though comparatively undisciplined, did good service as laborers on fortifications, and were capable of offering considerable resistance behind earthworks. Hardee's corps occupied their right, Polk the centre, and Hood the left. Their cavalry, estimated at fifteen thousand, operated on the flanks, and in the Federal rear.

The order of the Federal advance was somewhat different from that previously observed during the campaign. Gen. McPherson's command was now transferred to the extreme left, and moved toward Marietta, having its right on the railroad, while Gen. Schofield, shifting to the right wing, marched for Lost Mountain. Gen. Thomas kept his old position in the centre, and moved on Kenesaw and Pine Mountains. Gens. Stoneman and Garrard covered the right and left wings with their cavalry, and McCook guarded the communications and rear. From the 9th to the 14th the Federal lines were gradually closed up toward the rebel position, Sherman's first object being to break the line between Kenesaw and Pine Mountains; and on the latter day, during a heavy cannonade by the 4th corps, the rebel Gen. Polk, commanding on Pine Mountain, was killed by the explosion of a shell. On the same night, the rebels, perceiving that Hooker's corps was moving around the base of the mountain to cut off their retreat, abandoned their works without loss of guns or material of war, and on the morning of the 15th the position was quietly occupied by Stanley's division of the 4th corps. A paper was found affixed to a stake, stating, "Here Gen. Polk was killed by a Yankee shell;" and from the reports of deserters it appeared that Gens. Johnston and

Hardee were standing near Gen. Polk when he was struck, and narrowly escaped death.

Gen. Johnston now drew back his centre about a mile, to a strong line of intrenchments in the rugged hills connecting Kenesaw and Lost Mountains, keeping his flanks on these two eminences. The 15th, 16th, and 17th, were occupied with incessant skirmishing, which told upon the spirits and endurance of the Federal army almost as much as a pitched battle. "The enemy," says a correspondent, "seems to have marked out this whole country, from the Allatoona Mountains to the Chattahoochee, with line after line of rifle-pits and intrenchments and fortification. No sooner do we take possession of one formidable line of works than another confronts us, and each seems to be stronger than the preceding." On the extreme right during the afternoon of the 15th, Gen. Schofield carried the first line of the rebel works at the foot of Lost Mountain. During the 17th, the left and centre remained quiet, its line being so far advanced that a general engagement would otherwise have resulted. The right and right centre were pushed forward more than a mile, occupying a heavy line of intrenchments which the rebels had evacuated, and their main line at the foot of Lost Mountain, without serious loss. Toward evening, after much heavy skirmishing, the enemy's left was dislodged from the strong intrenchments at the Lost Mountain and in the rear of Kenesaw, and driven back upon his centre, the Federal army swinging around so as to threaten his flank. The movement occupied the whole day, and was rendered difficult by the thick growth of timber and underwood and the pertinacity of the skirmishers of the enemy. During the 18th, the right crowded the rebel left still further backward. The possession of the Dallas and Marietta road was secured, and the enemy pushed so hard at dusk that the 20th corps was in a line perpendicular to their own. The Federal troops met with considerable loss during the day, as in many places it was necessary to construct opposing works under the fiercest fire, especially from the enemy's sharpshooters; but from extreme right to extreme left the rebel skirmishers were steadily driven, and many of them killed and wounded. Several hundred prisoners were also taken. These made the number taken since the 11th about one thousand.

Apprehending that his position on Lost Mountain was in danger of being enveloped, Gen. Johnston, on the night of the 18th, under cover of the darkness and a violent storm of rain, drew in his left flank toward Kenesaw, which he made his salient, his right wing being thrown back to cover Marietta, and his left behind Nosee's Creek, for the purpose of guarding his railroad communication with the Chattahoochee. The abandoned works on Lost Mountain, and the line of breastworks connecting it with Kenesaw, were at once occupied by the Federal troops, and during the 19th the

enemy was steadily pressed at all points. On the evening of that day our left held the base of Kenesaw on its north face, and the first ridge of hills running thence to the northeast, while our right lay to the west and rear of Kenesaw, and within three miles of Marietta. During these operations the rain fell almost incessantly, and the roads were rendered so heavy that a general movement would have been impossible. The most that could be attempted was to press the enemy without cessation, and harass him by constant skirmishing. The fact that under such discouraging circumstances so many strong positions were carried, testifies to the discipline and endurance of the troops.

The operations of the 20th and 21st were of a similar character to those above described, but on the 22d the enemy made a sudden attack upon portions of Gens. Hooker's and Schofield's troops on the Federal right, near what is known as the "Kulp House," and was handsomely repulsed, leaving his dead, wounded, and many prisoners behind him. The Federal centre was now established squarely in front of Kenesaw, but it required so many men to hold the railroad and the line running along the base of the mountain, that but a small force was left with which to attempt a flank movement to the right. So small was it that Gen. Sherman hesitated to push it vigorously toward the railroad, in the rear of Marietta, for fear that it might be altogether detached from the army and exposed to disaster. He therefore contented himself with extending his right along the enemy's flank, hoping that Gen. Johnston would thereby be induced to weaken his centre sufficiently to render an assault in that direction practicable. "Although inviting the enemy at all times," says Gen. Sherman in his official report, "to make such mistakes, I could not hope for him to repeat them after the examples of Dallas and the 'Kulp House'; and upon studying the ground, I had no alternative but to assault his lines or turn his position. Either course had its difficulties and dangers. And I perceived that the enemy and our own officers had settled down into a conviction that I would not assault fortified lines. All looked to me to 'outflank.' An army to be efficient must not settle down to one single mode of offence, but must be prepared to execute any plan which promises success. I waited, therefore, for the moral effect, to make a successful assault against the enemy behind his breastworks, and resolved to attempt it at that point where success would give the largest fruits of victory." The general point selected was the rebel left centre, in the belief that if this should be once forced, a road to the railroad below Marietta would be opened to the assaulting column, the enemy's retreat cut off, and their army overwhelmed in detail. Simultaneous with this an attack was directed to be made on Little Kenesaw by McPherson. The 27th was selected for the movement, and three days were allowed for preparation.

At 6 A. M., on the appointed day, Gen. Blair's (17th) corps, holding the extreme left of Gen. McPherson's line, moved toward the eastern point of the mountain to threaten the enemy's right, while Gen. Dodge's (16th) corps and Gen. Logan's (15th) corps assaulted the northern slope adjoining. The brunt of the attack was borne by three brigades of the 15th corps, which immediately scattered the enemy's skirmishers, and pushing on up the hill with impetuosity, carried part of the rebel rifle-pits. Some of the retreating enemy were captured while endeavoring to escape to a gorge which intervenes between the right and left halves of Kenesaw. Still pressing forward our troops arrived at the foot of a perpendicular cliff thirty feet high, from the crest of which the enemy formed in line of battle, poured a destructive plunging fire, and rolled down huge stones. Seeing it impossible to scale these cliffs our line halted, retired a short distance, and fortified on the extreme right. For the second and more important attack portions of Gen. Newton's division of the 4th corps, and of Gen. Davis's of the 14th corps, were selected. At a given signal the troops rushed forward with buoyant courage, charged up the face of the mountain amidst a murderous fire from a powerful battery on the summit and through two lines of abatis, carried a line of rifle-pits beyond, and reached the works. The colors of several regiments were planted before the latter, and some of the men succeeded in mounting the ramparts, but the deaths of Gens. Wagner and Harker, and the wounding of Gen. McCook, the destructive fire of both musketry and artillery, and the difficulty of deploying the long columns under such fire, rendered it necessary to recall the men. Gen. Newton's troops returned to their original line, while Gen. Davis's 2d brigade threw up works between those they had carried and the main line of the enemy, and there remained. The whole contest lasted little more than an hour, but cost Gen. Sherman nearly three thousand in killed and wounded, while the enemy, lying behind well-formed breastworks, suffered comparatively slight loss. During the day Gen. Schofield had sharp skirmishing with the enemy's left wing, and Gen. Cox's division of the 23d corps pushed forward to a point nine miles south of Marietta and three from the Chattahoochee; but the important fighting was in the centre. The failure of the attack is to be attributed to the fact that Gen. Johnston did not allow himself to be deceived by the lengthened line which Gen. Sherman opposed to him. From his elevated position on the summit of Kenesaw he could see plainly that the main posts still confronted him, and that the flanking movement to his left was not in earnest. Contenting himself, therefore, with sending a single corps to watch the right wing, he held his main body to repel the assault on his centre. It was not, however, the intention of Gen. Sherman to rest long under the imputation of defeat, and he almost immediately commenced

preparations to turn the enemy's left, amusing Gen. Johnston, meanwhile, by a show of approaching his centre by saps. On July 1st, Gens. Hooker and Schofield advanced to the right some two miles, and on the 2d Gen. McPherson received orders to rapidly shift his whole force from the extreme left to the extreme right of the Federal lines, and push on to Nickajack Creek, which flows into the Chattahoochee, four miles below the railroad bridge. His place on the left, in front of Kenesaw, was occupied by Gen. Garrard's cavalry, while Gen. Stoneman's cavalry moved on his flanks to strike the river near Turner's Ferry, two miles and a half below the railroad bridge. The object of the movement was speedily detected by Gen. Johnston, who at once prepared to evacuate Kenesaw and fall back to the Chattahoochee. On the night of the 2d his rear guard abandoned the works which for upward of three weeks had been so resolutely assailed and defended, and before dawn of the 3d the Federal pickets occupied the crest of the mountain. Orders were immediately given for Gen. Thomas to move forward along the railroad to Marietta, and thence southward to the Chattahoochee, the rest of the army pressing rapidly toward Nickajack Creek to harass the enemy in flank and rear, and if possible to assail him in the confusion of crossing the river. Gen. Sherman himself, accompanying the Army of the Cumberland, entered Marietta at 9 o'clock on the morning of the 3d. During the retreat about two thousand prisoners, principally stragglers, fell into the hands of the Federal troops.

Gen. Johnston was too good a general to leave his movement uncovered, and Gen. Thomas pushing forward in pursuit, found him intrenched behind a fortified line at Smyrna, half way between the river and Marietta, having his flanks protected by Nickajack and Rottenwood Creeks. This, however, was but an advance line, his intention being to make his real stand in a series of works on the left bank of the river, and at the railroad bridge, where he had constructed a strong *étape de pont*. Again a flanking movement to the right was attempted, and with such success that on the night of the 4th Gen. Johnston fell back to the river, across which the main body of his army passed, Gen. Hardee's corps remaining on the right bank. Gen. Sherman then moved up to the Chattahoochee, and on the evening of the 5th Gens. Thomas's and McPherson's troops occupied a line extending from a short distance above the railroad bridge to the mouth of Nickajack Creek, while Gen. Schofield was posted in the rear near Smyrna as a reserve. Cavalry demonstrations were extended as far south as Campbelltown, fifteen miles below the railroad bridge. By these several manœuvres, and particularly by the shifting of Gen. McPherson's troops to the right, Gen. Sherman aimed to convey to Gen. Johnston the impression that it was his *left* flank that was to be turned; and in pursuance of the same strategy the Fed-

eral general having determined that the enemy's position was unassailable except by a flank movement across the river, amused his enemy by demonstrations south of the railroad bridge, as if he intended crossing there. His real object was, by rapidly shifting masses of troops from extreme right to extreme left, to turn the enemy's *right* flank, and seize and hold the vital strategic points in that direction.

Gen. Schofield was, accordingly, directed to move due eastward from his position at Smyrna to the Chattahoochee, and to make a crossing near the mouth of Soap Creek, eight miles north of the railroad bridge. This was successfully accomplished on the 7th, with the capture of a gun and a number of prisoners, and a lodgment was effected on high ground on the left bank, and a substantial bridge constructed. At the same time Gen. Garrard occupied Roswell, a town near the Chattahoochee, nearly due north of Atlanta, and about seven miles above Gen. Schofield's crossing, where he destroyed some woollen and cotton mills which had supplied the rebel armies. In accordance with Gen. Sherman's orders he secured the ford at this place until a corps could be sent thither from the Army of the Tennessee on the right wing. On the 9th, while the enemy were amused by feints extending from Power's Ferry, four miles above the railroad bridge, to Turner's Ferry, three miles below it, a crossing was effected at Roswell, and the river firmly bridged; and under cover of the same demonstrations Gen. Howard was enabled to throw a bridge across at Power's Ferry. Gen. Johnston at length took the alarm, and during the night of the 9th gave orders for another retreat. His heavy guns were removed to Atlanta, seven miles distant, Gen. Hardee's corps was safely crossed to the left bank, and at daylight of the 10th the railroad bridge, the road bridge, and the pontoons, were in flames. The rebel army then fell back toward the fortifications of Atlanta, abandoning the whole line of the river, although its left wing kept in the neighborhood of Turner's Ferry, in the expectation of an attack from that quarter. Leaving Gen. Johnston to his delusion, Gen. Sherman rapidly and quietly moved the rest of the Army of the Tennessee behind the line of our forces, to its old position on the extreme left, and busied himself with strengthening his bridges and collecting supplies, which, as early as the 8th, were brought by railroad within a mile of the railroad bridge.

A week's rest was now allowed the army, a sufficient force being detailed to the left bank of the Chattahoochee to secure the several positions there and occupy the works of the enemy. These proved to be of the most formidable character, and had evidently cost many months of labor, the lines extending for upward of five and a half miles along the river, with almost impenetrable abatis in front. The sudden abandonment of them caused more consternation to the enemy than any previous disaster of

the campaign, as it was anticipated that here, in the immediate neighborhood of his supplies, Gen. Johnston could make a long and probably successful stand; or at least keep Gen. Sherman at bay until reinforcements from other parts of the confederacy should arrive. The catastrophe completed the long catalogue of complaints against this general which his enemies had sedulously arrayed before the public, and his removal was clamored for as indispensable to the salvation of the cause. The inhabitants of Atlanta in particular urged that the retreating policy had been followed far enough. It can hardly admit of a doubt, however, that he had conducted the campaign with prudence and skill, and considering his inferiority in numbers to Gen. Sherman, who was always in a condition to outflank him, he had probably delayed the Federal advance as long as it was possible.

On the 17th the whole army was across the Chattahoochee, with the exception of Gen. Davis's division of the 14th corps, left to watch the railroad bridge and the rear, and prepared to move upon Atlanta. The Army of the Cumberland now occupied the right wing and right centre, resting on the river just above the railroad bridge, the Army of the Ohio the left centre, and the Army of the Tennessee the left. In this order a grand right wheel was commenced, the right wing of the Army of the Cumberland serving as the pivot, which, on the evening of the 17th, brought the Federal line into a position about northeast of the railroad bridge, along what is known as the old Peach Tree road. On the 18th the left wing, swinging rapidly around, struck the Georgia Railroad, which connects Atlanta with Augusta, at a point two miles west of Stone Mountain, a vast elevation of granite towering over the surrounding country, fifteen miles northeast of Atlanta. With the aid of Gen. Garrard's cavalry, which moved on his flank, Gen. McPherson broke up a section of about four miles of the road, while Gen. Schofield occupied Decatur, six miles east of Atlanta, and Gen. Thomas brought his troops close up to Peach Tree Creek, a small stream rising five or six miles northeast of Atlanta, and flowing southwesterly into the Chattahoochee, near the railroad bridge. In these manoeuvres our extreme left encountered little else than cavalry, supported by a few guns and a very inadequate force of infantry, an evidence that the enemy was still laboring under the delusion that his left and not his right was the real point of attack, and that Atlanta was to be approached from the southwest instead of from the northeast. Under these circumstances Gens. McPherson and Schofield were enabled, on the 19th, to pass with little trouble westward of Decatur, within the naturally strong defensive lines of Nance's and Peach Tree Creeks. Gen. Thomas, moving more directly from the north of Atlanta, found the enemy in larger force, but succeeded on the same day in crossing Peach Tree Creek in front of their intrenched lines.

The Federal line then held the arc of a circle, extending from the railroad between Atlanta and the river to some distance south of the Georgia Railroad, and in a direction north and northeast of Atlanta.

Meanwhile, on the 17th, Gen. Johnston had, in accordance with orders from the confederate war department, turned over his command to Gen. Hood, accompanying the act with the following farewell address to his troops:

HEADQUARTERS, ARMY OF TENNESSEE, }
July 17, 1864.

In obedience to the orders of the War Department, I turn over to Gen. Hood the command of the Army and Department of Tennessee. I cannot leave this noble army without expressing my admiration of the high military qualities it has displayed so conspicuously—every soldierly virtue, endurance of toil, obedience to orders, brilliant courage.

The enemy has never attacked but to be severely repulsed and punished. You, soldiers, have never argued but from your courage, and never counted your fears. No longer your leader, I will still watch your career, and will rejoice in your victories. To one and all I offer assurances of my friendship, and bid an affectionate farewell.

J. E. JOHNSTON, General.

General Hood, on assuming command, issued the following address:

HEADQUARTERS, ARMY OF TENNESSEE, }
July 18, 1864.

SOLDIERS: In obedience to orders from the War Department, I assume command of this Army and Department. I feel the weight of the responsibility so suddenly and unexpectedly devolved upon me by this position, and shall bend all my energies and employ all my skill to meet its requirements. I look with confidence to your patriotism to stand by me, and rely upon your prowess to wrest your country from the grasp of the invader, entitling yourselves to the proud distinction of being called the deliverers of an oppressed people. J. B. HOOD, General.

With this change in commanders commenced a change in the method of conducting the campaign, by which it was expected that the *morale* of the rebel army, weakened by the persistent Fabian policy of Gen. Johnston, would be fully reestablished. The time for retreating had passed when the chief city of western Georgia lay almost in the grasp of Gen. Sherman; and the rebel army, which, to give Gen. Johnston due credit, had been kept in a compact body, and had experienced but insignificant losses of guns or material of war, was to be launched, after their well-known tactics, in fierce assaults upon the invader. With this view the command was given to Gen. Hood, who had an unequalled reputation among their generals for energy and impetuous bravery.

On the 20th the Federal lines converged still more closely around the northern and eastern sides of Atlanta, and as a gap existed between Gens. Schofield and Thomas, Stanley's and Wood's division of Gen. Howard's corps were moved to the left to connect with Gen. Schofield, leaving Gen. Newton's division of Gen. Howard's corps, with inadequate force, to hold an important position on the road leading from Atlanta to Buckhead. This weak point was soon detected by Gen. Hood, who determined to signalize his appointment to the chief com-

mand by an assault which, at one blow, should retrieve the disasters of the campaign. Gen. Sherman also was well aware that his line was vulnerable at this point; and as there were indications during the morning of a concentration of troops on the enemy's right, as if to attack the left, orders were sent to Gen. Newton and the rest of the Army of the Cumberland to close rapidly up in the latter direction. Gen. Newton accordingly pushed forward to a prominent ridge, where, about two o'clock in the afternoon his troops stacked arms and made a temporary halt. Some prisoners, gathered up by the skirmishers, having reported that there was no considerable force of the enemy within a mile and a half, no apprehension of an attack seems to have been felt, and no preparations had been made beyond the accustomed piles of logs and rails, which the Federal troops constructed as a matter of course, whenever halting for any considerable time on new ground in presence of the enemy. Gen. Hood had meanwhile been massing his main body in the woods immediately in front of Gen. Newton and of Gen. Hooker, who was approaching from the right, expecting, by a sudden and overwhelming attack upon the columns while in motion, to cut the Federal army in twain. At 4 o'clock he advanced from his covert without skirmishers, and pushed directly for Gen. Newton's position. Notwithstanding the unexpectedness of his appearance, the Federal troops sprang instantly to their arms, and from behind their breastworks poured deliberate and deadly volleys into the dense masses of the Confederates, who were further kept in check by well-served batteries which Gen. Newton had posted on each of his flanks.

Almost at the instant of the attack on Gen. Newton, Gen. Geary's division of Gen. Hooker's corps was struck by the advancing columns of the enemy and thrown back in some confusion. But quickly rallying, it recovered its ground and kept the enemy in check until Ward's division could arrive to its assistance. The latter met the enemy's charge by a counter charge, and the two columns mingling in the shock of battle, the enemy, after a brief and fierce struggle, were driven back. Further to the right, and next to Geary, Williams' division, though attacked with desperation, stood manfully up to the work, and repulsed with heavy loss every onset of the enemy. After four hours of incessant fighting, the latter retired precipitately to his intrenchments, leaving on the field upward of six hundred dead, one thousand severely wounded, seven regimental flags, and a number of prisoners. His total loss was estimated by Gen. Sherman at five thousand. That of the Federal troops was one thousand nine hundred, of which the greater part fell on Gen. Hooker's corps, which fought wholly on open ground, and bore the brunt of the battle.

During the 21st the enemy kept within his intrenched position, commanding the open valley of Peach Tree Creek, his right beyond the

Georgia railroad to the east, and his left extended toward Turner's Ferry, at a general distance of four miles from Atlanta. In the course of the day a steep and strongly-fortified hill, about five hundred yards in advance of the skirmish line of the extreme Federal left, was gallantly carried by Gen. Leggett's division of the 17th corps, though with a loss of seven hundred and fifty men. Four desperate attempts were made by the division of Gen. Cleburne to regain the position, which completely commanded Atlanta and the two principal roads leading north and south from the city; but the enemy finally retired, baffled and severely crippled, leaving his dead and most of his wounded on the slope of the hill. He also lost about a hundred prisoners. Gen. McPherson immediately threw out working parties to the hill, with the intention of occupying it with strong batteries.

On the 22d the whole advanced line of the enemy was found abandoned, a circumstance which at first led Gen. Sherman to believe that they intended to surrender Atlanta without further contest. Gen. Hood, however, was only preparing to repeat, on a larger scale, the experiment of the 20th. By a show of retreating upon the city he hoped to decoy Gen. Sherman into a rapid advance, and then suddenly, with heavy masses of troops, to strike the Federal army while in motion, at such weak points as should present themselves. "It is now quite evident," says an army correspondent, writing on the 24th, "that the enemy, when they fell back out of their works, did not retire to the inner line around the city at all, though by taking that direction, and showing themselves in large numbers upon their works, they intended to make us believe they had done so. Gen. Hardee's corps, instead, marched during the night away round to the eastward, sweeping entirely the circle of the Federal left wing, and then, as we closed in around the city, and before the left wing had got in position, struck us upon the front, and also upon the flanks." Unsuspecting of this deep laid plan for his discomfiture, Gen. Sherman pushed his troops beyond the abandoned works, and found the enemy occupying in force a line of finished redoubts completely covering the approaches to Atlanta, and busily occupied in connecting these redoubts with curtains strengthened by rifle trenches, abatis, and chevaux-de-frise. This satisfied him that Gen. Hood meant to fight, and he immediately resumed the dispositions previously commenced for pressing the city on its eastern and northern fronts. As the Federal line closed in, the circle which it formed became so contracted, that the 16th corps, Gen. Dodge, which formed the right of the Army of the Tennessee, was thrown out of position, and fell behind the 15th corps, the latter thus closing up with Gen. Schofield, who held the centre. Gen. McPherson accordingly ordered Gen. Dodge to shift his position to the extreme left of the line, and occupy the hill carried by the 17th corps on

the previous day, and which was still held by Gen. Leggett's division. At about 11 A. M., soon after this movement had commenced, Gen. McPherson met the commander-in-chief near the centre of the lines. "He described to me," says Gen. Sherman in his official report, "the condition of things on his flank and the dispositions of his troops. I explained to him that if we met serious resistance in Atlanta, as present appearances indicated, instead of operating against it by the left, I would extend to the right, and that I did not want him to gain much distance to the left. He then described the hill occupied by Gen. Leggett's division of Gen. Blair's (17th) corps as essential to the occupation of any ground to the east and south of the Augusta railroad, on account of its commanding nature. I therefore ratified his disposition of troops, and modified a previous order I had sent him in writing to use Gen. Dodge's corps, thrown somewhat in reserve by the closing up of our line, to break up railroad, and I sanctioned its going, as already ordered by Gen. McPherson, to his left, to hold and fortify that position."

At noon Gen. McPherson rode off to the left, where the enemy appeared to be making a slight cavalry demonstration. He had not been gone half an hour when the desultory skirmishing which had been going on in that quarter all the morning suddenly deepened into a loud crash of musketry, followed by rapid artillery firing, indicating the presence of the enemy in large force. Gen. Hood had in fact secured the opportunity which he desired, and apprehending rightly that a demonstration was least expected on the left flank, had massed Gens. Hardee's and Stewart's corps under the cover of the thick woods which skirt the railroad, and was preparing to attack the 16th and 17th corps while they were getting into position, his forts meanwhile holding the Federal centre and right in check. Gen. Sherman instantly transmitted orders to Gens. Schofield and Thomas to keep the enemy employed on all parts of their front, and the former was directed to hold as large a force as possible in reserve to sustain the left, should aid be needed.

Gen. McPherson, upon reaching the left, found the 16th corps just about moving into position to prolong the flank, and temporarily facing to the left in a direction perpendicular to our main line. Between the right of the 16th and the left of the 17th corps was a wooded space of about half a mile which was not occupied by any troops. Shortly after twelve o'clock the enemy emerged from the dense woods in front of these corps in three solid columns, and marched directly upon the 16th corps for the purpose of turning our whole line. Three desperate assaults were repelled by Gen. Dodge, in the last of which the enemy suffered severe loss from the well-directed fire of the Federal batteries. Finding that the attempt to break the lines had failed at this point, Gen. McPherson

son took advantage of a temporary lull in the fighting to ride through the woods to Gen. Giles A. Smith's division, which held the left of the 17th corps. A report that the enemy in heavy force were moving around the left of the 17th corps, and were pushing in through the gap above mentioned, as existing between it and the 16th (the attack on the 16th corps having, in fact, been a feint to draw attention from the real point of attack), induced him to hasten in that direction. After reaching the gap he gave directions to the only member of his staff who accompanied him, the rest having been sent with orders to different portions of the field, to obtain a brigade from Gen. Logan's command and throw it across the gap, and then, with a single orderly, struck into a cross road leading directly to Gen. Smith's position. Already, however, unknown to him, the enemy's skirmish line had advanced close up to this road, and when it was too late to retrace his steps he found himself within fifty feet of it. The rebel officer in command called upon him to surrender, but he only dashed his horse to the right of the road, and was almost immediately brought to the ground, mortally wounded, by a volley from the skirmishers. His body was for a time in the possession of the enemy, but was subsequently recovered and brought within the Federal lines. Upon hearing of this disaster, Gen. Sherman ordered Gen. Logan to assume command of the Army of the Tennessee.

The brigade (Wangelin's) ordered up from Gen. Logan's corps, arrived in time to partially check the enemy, but could not prevent him from getting a portion of his force in the rear of the 17th corps, while heavy masses of troops, principally from Gen. Stewart's corps, were pushed against the works held by Gen. Leggett on the hill, wrested from Gen. Cleburne the day before, and which they were evidently determined to retake at any sacrifice. Sweeping up in their advance the working party engaged upon the fortifications, the enemy bore heavily against Gens. Smith's and Leggett's divisions, which, attacked in front and rear, were obliged to fire alternately from behind their own breastwork and the old abandoned parapet of the enemy. Gen. Leggett's troops clung firmly to their important position on the top of the hill, against the fortified angle of which the rebels dashed their columns with desperate but fruitless energy. Gen. Smith had meanwhile been compelled to abandon his more exposed lines, but by a skillful movement he gradually withdrew his men, regiment by regiment, to a new line connecting on the right with Gen. Leggett, his left, refused, facing to the southeast. In executing this movement he was obliged to abandon two guns to the enemy. Against this new formation of the 17th corps the enemy could make no impression, but recoiled again and again before the deadly fire of the Federal troops, which mowed down whole ranks at a time, and covered the ground and ditches with dead and

wounded men. A part of the rebel force that pushed for the gap between the 16th and 17th corps renewed the attack upon the right flank of the former, and upon its first advance captured a six-gun battery of the regular army, which was moving along unsupported and unapprehensive of danger. Gens. Sweeney's and Fuller's divisions soon checked the enemy's advance, and finally drove him back in confusion with the loss of many prisoners. At a critical period of the battle several of Gen. Sweeney's regiments were found to be without ammunition; but as it was indispensable that they should hold their position, their commander ordered them to meet the enemy with the bayonet, whereupon the latter broke and fled to the rear. At about half-past three o'clock the enemy desisted from his attack on our left flank, having gained no ground and suffered enormous losses, for which his capture of eight guns ill compensated.

Meanwhile two divisions of Gen. Wheeler's cavalry, with a section of artillery, took a wide circuit to the east and fell upon Decatur, now three miles in our rear, where Col. Sprague, with three infantry regiments, and a battery, was guarding a number of wagon trains filled with commissary and ammunition supplies. By a skillful disposition of his small force, Col. Sprague held the enemy in complete check until every wagon except three was sent to the rear of Gens. Schofield and Thomas, when he also fell back nearer the main body, having inflicted considerable damage upon the enemy and secured a number of prisoners. Gen. Wheeler's unopposed approach to Decatur was owing to the absence of Gen. Garrard's cavalry on a raid southeast of Atlanta.

About 4 p. m. a pause occurred in the battle, occasioned by Gen. Hood's massing troops for an assault upon Gen. Logan's (15th) corps, temporarily commanded by Gen. Morgan L. Smith, which held the right of the Army of the Tennessee behind substantial breastworks, immediately adjoining the 17th corps. At half-past 4 p. m., while just enough of an attack was maintained against the extreme left to occupy the attention of the troops in that quarter, a heavy force two lines deep marched directly toward the left of the 15th corps, driving before it a couple of regiments of skirmishers and capturing two guns. Protected by their works, Gen. Lightburn's brigade, which held this part of the line, for half an hour kept the enemy at bay by well-directed discharges from a battery of 20-pounder Parrotts; but a second strong rebel column now approached, which scarcely faltered beneath the volleys which ploughed its ranks in long furrows, and presently, to add to the perplexity of the situation, a third column was seen pouring in at the rear through a deep cut in the Georgia railroad. Finding that to hold their position would insure capture, Gen. Lightburn's troops retired in considerable confusion to the second line of breastworks, five hundred yards from

the main line, and the abandoned works, with two batteries, fell into the hands of the enemy. The position gained by the latter, if allowed to be held by them, threatened such serious disaster that Gen. Sherman sent orders to Gen. Logan, which had already been anticipated by that general, to make the 15th corps regain its lost ground at any cost. In aid of this movement he posted certain batteries from Gen. Schofield's corps where they could shell the enemy and the works beyond, so as to prevent reinforcements. Just as the enemy were preparing to turn the captured Parrotts upon the inner Federal line, the 15th corps, supported by portions of Gen. Schofield's troops, advanced with loud cheers upon them; and after a desperate struggle, in the course of which both Federals and rebels at times fought hand to hand across the narrow parapet, the latter were driven out of the works and the guns retaken. Their retreat was accelerated by repeated discharges of grape and canister among their crowded ranks which caused an awful carnage. With this repulse the battle terminated.

This was by far the bloodiest battle yet fought in Georgia; and notwithstanding the complete defeat of the enemy at all points, the Federal army sustained an irreparable loss in the death of Gen. McPherson, described by Gen. Sherman as "a noble youth, of striking personal appearance, of the highest professional capacity, and with a heart abounding in kindness that drew to him the affections of all men." The heroic conduct of the Army of the Tennessee during the whole battle was in no slight degree owing to the desire to avenge the fall of their commander. The total Federal loss on the 22d was 8,722, of whom much the greater portion were killed and wounded. The enemy's dead alone in front of our lines numbered 2,200 from actual count, and of these 800 were delivered to the enemy under flag of truce. Their total loss in killed was computed by Gen. Logan at 8,240. Upwards of 3,000 prisoners, including 1,000 wounded, and many commissioned officers of high rank, beside 18 colors and 5,000 small arms, fell into the hands of the Federals. The enemy of course removed many of their dead and most of their wounded. Owing to the closeness and desperation of the conflict, the proportion of wounded to killed was much less than usual—probably not more than two to one—which would make their loss in wounded about 6,500, and their total loss in killed, wounded, and prisoners, more than 12,000.

As an important feature in his campaign, Gen. Sherman had contemplated, in addition to offensive operations against the enemy in the field, a series of expeditions against the several railroads by which supplies or reinforcements were brought to Atlanta. The first line of rebel communications selected to be broken was the railroad system connecting Atlanta with the southwest, comprising the Atlanta and West

Point and the West Point and Montgomery roads; and on July 10, in accordance with orders long previously issued by Gen. Sherman, a body of 2,000 Federal cavalry, under Gen. Rousseau, started from Decatur, Ala., for Opelika, a station on the latter of these roads, in eastern Alabama, whence a road diverges east to the important manufacturing town of Columbus, Geo., and thence to Macon. On the 18th Gen. Rousseau crossed the Coosa near the Ten Islands, routing a body of Alabama cavalry; passed rapidly through Talladega; skirmished again with the enemy at the crossing of the Tallapoosa; and on the 16th struck the West Point and Montgomery road at Loachapoka, ten miles west of Opelika. From this point to Opelika the railroad was well broken up, and the bridges and culverts destroyed, beside three miles of the branch toward Columbus and two toward West Point. Gen. Rousseau then turned north, and brought his command in safety to Marietta on the 22d, with a loss of less than thirty men.

The next operation was to more thoroughly disable the Georgia railroad. This had been broken up between Decatur and Atlanta as the army closed around the city; but as Gen. Sherman already contemplated prolonging his right toward the west and south of the town, and possibly abandoning his hold on the railroad, it became necessary to render the latter unavailable to the rebels. Gen. Garrard was therefore detached on the 21st, and ordered to proceed with his cavalry to Covington, forty-one miles east of Atlanta, and destroy the railroad bridges over the Yellow and Uloopauhatchee Rivers, branches of the Ocmulgee. He returned in safety on the 24th, having completely destroyed the two bridges, of which that over the Yellow River was 550 feet in length, and the other 250 feet, and broken up the railroad for seven miles between the two. He also burned three trains of cars, numerous depots, minor bridges and culverts, 2,000 bales of cotton, a new and extensive hospital building at Covington, and a considerable quantity of commissary and quartermaster's stores, and brought in with him several hundred prisoners and negroes and many horses. He lost but two men in the expedition.

Having rendered the Georgia road useless to the enemy Gen. Sherman next turned his attention to the Macon and Western Railroad, connecting Atlanta with Macon, and the only avenue left for the conveyance of stores and ammunition to the rebel army. For the purpose of effectually crippling this, he organized his cavalry in two large bodies, to move in concert from each wing of the army, while simultaneously with this movement the Army of the Tennessee was to be shifted by the right toward East Point, a station six miles south of Atlanta, where the Atlanta and West Point and Macon and Western Railroads diverge from a common track. Gen. Stoneman was transferred to the left flank, and assumed command of his own

cavalry and Gen. Garrard's, comprising an effective force of 5,000 men, while Gen. McCook, on the right flank, received his own command and the cavalry brought by Gen. Rousseau, amounting in the aggregate to 4,000 men. This joint force Gen. Sherman supposed was fully adequate to look after Gen. Wheeler's rebel cavalry, and to accomplish the work allotted to it, which was to rendezvous at Lovejoy's station on the Macon road, thirty miles south of Atlanta, on the night of July 28th, and there make such a complete destruction of the road as would lead to the speedy abandonment of Atlanta. At the moment of starting, Gen. Stoneman asked permission, after fulfilling his orders, to proceed with his own command to Macon and Andersonville, and release the Federal prisoners of war confined at those places. After some hesitation Gen. Sherman consented, stipulating, however, as a condition precedent, that the railroad should be effectually broken up and Wheeler's cavalry put *hors de combat*.

On the 27th the two expeditions started forth, Gen. Stoneman making for McDonough, a town about ten miles east of Lovejoy's, and sending Gen. Garrard to Flat Rock to cover his movement; and Gen. McCook keeping down the right bank of the Chattahoochee. Gen. Stoneman, however, almost immediately turned off toward the Georgia Railroad, which he followed as far as Covington, whence he struck due south, and to the east of the Ocmulgee, for Macon, distant sixty miles, in the neighborhood of which he arrived on the 30th. A detachment was sent east to Gordon, a station on the Georgian Central Railroad, where eleven locomotives and several trains loaded with quartermasters' stores were destroyed, together with several bridges between that place and Macon. But as he learned that the prisoners in Macon had on the previous day been sent to Charleston, Gen. Stoneman decided to return at once by the way he had come, without attempting to reach Macon or Andersonville. On the even-

ing of the 80th he turned northward again, skirmishing on the way; and on the morning of the 81st, when about twenty miles from Macon, encountered a heavy force in his front. The country being unfavorable for cavalry operations, he dismounted a portion of his command, and threw them forward as skirmishers, but soon found himself surrounded. After various fruitless attempts to make head against the enemy, he gave directions to the greater part of his force to break through the opposing lines, and escape in the readiest manner possible, while he, with several hundred men and a section of artillery, occupied the attention of the enemy. He was finally overpowered and compelled to surrender. Of his three brigades one arrived safely within the Federal lines, one was attacked and somewhat scattered on the way back, and the third was captured with him. Gen. Garrard meanwhile, after waiting at Flat Rock for orders from Stoneman until the 29th, moved toward Covington, and learning that he had gone south from that point, returned to his position on the left flank of the army.

Gen. McCook, after reaching the neighborhood of Rivertown on the Chattahoochee, crossed on pontoons and made for Palmetto Station on the Atlanta and West Point Railroad, twenty-five miles south of Atlanta, where he destroyed a section of the road. He thence moved eastward upon Fayetteville and burned five hundred wagons belonging to the rebel army, besides killing eight hundred mules and capturing several hundred quartermasters' men, and reached Lovejoy's on the night of the 28th. Here he destroyed a section of the Macon and Western Railroad, but, hearing nothing from Stoneman, and finding his progress eastward barred by a constantly accumulating force of the enemy, he turned off to the southwest, and at Newman, a station on the Atlanta and West Point Railroad fifteen miles south of Palmetto, encountered a rebel infantry force coming up from Mississippi to Atlanta. After a severe fight with superior numbers he finally cut his way out, with the loss of five hundred men and all his prisoners, and reached the Chattahoochee, whence he arrived safely within the Federal lines. The damage done by the several expeditions scarcely compensated for the severe losses sustained by Gens. Stoneman and McCook, amounting to upward of fifteen hundred. Owing to the failure of Gen. Stoneman to concentrate with Gen. McCook at Lovejoy's, the communications with Atlanta were only temporarily interrupted, and the enemy gained at least a month's respite from their final catastrophe.

While the cavalry raid was in progress, the Army of the Tennessee was, pursuant to instructions, drawn out of its intrenchments on the left flank and moved *en echelon* to a position on the extreme right, the right flank being held by Gen. Logan's corps. This movement was directed by Gen. Howard, who on the

27th, by appointment of the President, assumed the command vacated by the death of Gen. McPherson. The line was thus prolonged due south, facing east, and south of Proctor's Creek. Apprehending that Gen. Hood might again improve the opportunity to attack the Federal army while in motion, Gen. Sherman on the 28th disposed of Gen. Davis's division of the 14th corps so that it might be within easy supporting distance of the flank of Gen. Howard's new line, in the event of a strong rebel demonstration in that quarter. The enemy was not slow to perceive that Gen. Sherman was gradually swinging around toward the Macon road, and to oppose the movement massed his troops in the same direction. About noon of the 28th Gen. Stewart's corps came out from Atlanta by the Bell's Ferry road, and, forming on open ground, advanced in long parallel lines upon Gen. Logan's troops, fortunately sheltered behind the customary breastworks of rails, expecting to find his flank "in air." For upward of four hours a series of desperate attacks were made upon Gen. Logan's position, which were uniformly repelled with loss. Again and again the rebel columns were brought up to the breastworks, only to recoil shattered and bleeding before the steady volleys of musketry and the incessant discharges of grape and canister by which they were assailed. The few officers and men who reached the rail piles were either killed or taken prisoners. Shortly after 4 o'clock the enemy retired, leaving his killed and wounded in our hands, and having experienced a total loss estimated by Gen. Sherman at five thousand. The Federal loss was under six hundred. By some inadvertency Gen. Davis's division failed to come up to the support of Gen. Logan, whereby an opportunity was lost to strike the assailing rebel columns in flank, and probably to put them to a disastrous rout.

About this time Gens. Hooker and Palmer resigned the command of their corps, and were succeeded, the former by Gen. Slocum, and the latter by Gen. Jeff. C. Davis. Gen. Slocum, however, being absent at Vicksburg, the command of the 20th corps was temporarily assumed by Gen. A. S. Williams. Gen. D. S. Stanley also succeeded Gen. Howard in command of the 4th corps.

Failing to dislodge Hood from Atlanta in this way, Gen. Sherman next resorted to a further extension of his right, in the hope of flanking him in that direction. The 23d corps, supported by the 14th, was accordingly, on the 5th and 6th of August, transferred from the left to a position somewhat below Utoy Creek, a small affluent of the Chattahoochee, where it joined on Gen. Logan's right and formed our right flank. Demonstrations of more or less importance were made against the enemy's works during the prolongation of the right, but everywhere he was found well protected behind an admirably constructed line of defences, within which was a second line, comprising a series of redoubts of great thickness of parapet and good

command, connected throughout by a continuous infantry parapet, covered by abatis, chevaux-de-frise, and other impediments of the most approved kind. This inner line of works completely enveloped Atlanta, and thence extended for six miles along the railroad track to East Point, previously described as jointly used by the Atlanta and West Point and Macon and Western Roads, thus covering the latter. The Federal army, instead of threatening the city on the north and east, was now so shifted from its first position that, while the extreme left covered the northern approaches to Atlanta, the extreme right was south-west of it, running parallel to the railroad. The Federal lines were drawn at an average distance of two and a half miles from the city, and between them and the rebel works intervened a narrow belt of rough and wooded country, the scene of constant skirmishing between the opposing forces. Thus Gen. Hood, though in inferior force to Gen. Sherman, having the advantage of interior lines, and acting strictly on the defensive behind almost impregnable works, seemed able to hold his position for an indefinite period. He had recently been reinforced by some veteran troops and by a body of several thousand Georgia militia, and had also added considerably to his fighting material by arming and organizing laborers, teamsters, and quartermasters' men, whose places were supplied by negroes.

A survey of the situation satisfied Gen. Sherman that Gen. Hood's lines could only be carried at a fearful sacrifice of life, and that in order to reach the Macon Road and control the supplies of Atlanta, a new movement by the right flank, in which nearly the whole army should participate, must be attempted. He accordingly determined to withdraw one corps to the intrenched position at the railroad bridge over the Chattahoochee, to protect communication with his base, and with his remaining troops to march rapidly to the southwest and south of the city, and crossing the two railroads, break them up in such a manner that immediate repairs would be impossible. The movement thus resolved itself into a raid, as the term is understood in modern military parlance, on a truly gigantic scale, and, if successful, would probably cut off Atlanta for months from its supplies and compel its evacuation. It involved, in brief, to use Gen. Sherman's own words, "the necessity of raising the siege of Atlanta, taking the field with our main force, and using it against the communications of Atlanta, instead of against its intrenchments." By the 16th of August his plans were completed; but, before commencing to put them in execution, he ascertained that Gen. Wheeler, with nearly the whole force of rebel cavalry, had moved round in a northeasterly direction to cut his communications between Marietta and Chattanooga. Thinking that in the absence of Gen. Wheeler the Federal cavalry might perhaps accomplish the task he had marked out for the whole army, he temporarily

suspended his orders and directed Gen. Kilpatrick, recently returned to duty, to move across the railroads and tear them up thoroughly. Gen. Kilpatrick started on the 18th with a force of five thousand men, struck the Atlanta and West Point Road at Fairburn and the Macon road at Jonesboro, and Lovejoy's; but, being harassed by the enemy at each place, could effect no permanent damage. He finally returned on the 22d by way of Decatur, bringing one hundred prisoners, three flags, and one piece of artillery.

This satisfied Gen. Sherman that his original plan must be adhered to, and preparations for carrying it out were pressed with renewed activity. A battery of 4½-inch rifled guns was meanwhile put in position, and by its well-directed discharges impressed the enemy with the belief that regular siege operations were in progress, thus aiding to mask the new movement. It also materially interrupted the running of the rebel supply trains on the Macon road, and was the cause of several conflagrations in Atlanta. Notwithstanding the latter, the enemy held resolutely to their forts, with the evident intention of suffering the city to perish rather than abandon their position. On the night of the 25th, every thing being in readiness, and the wagons loaded with fifteen days' provisions, the 4th and 20th corps, occupying the extreme left, were moved quietly out of their intrenchments, and marched, the former to a position in the rear of the Army of the Tennessee, and the latter to the railroad bridge over the Chattahoochee and the adjacent ferries, which it was appointed to guard. On the succeeding night the 4th corps was moved southward toward Red Oak and Fairburn stations, on the Atlanta and West Point road, twelve or fifteen miles south of Atlanta, followed by the Army of the Tennessee, and on the morning of the 27th the whole front of the city was uncovered, except that portion occupied by the 28d corps, which alone remained within its intrenchments. In like manner the 28d corps was withdrawn from its intrenchments and formed the left of the new line, of which the Army of the Cumberland held the centre, and the Army of the Tennessee the right. These operations were viewed with undisguised wonder by the rebel troops from within their fortifications, and seemed to give color to the belief that Gen. Sherman had commenced a retreat. A skirmish line sent out toward the bridge, after the withdrawal of Gens. Thomas and Howard, encountered the 20th corps intrenched behind a strong *tête de pont*, and returned more bewildered if possible than before.

On the morning of the 28th, the Armies of the Cumberland and the Tennessee lay between Fairburn and Red Oak in a line facing east and north. The day was devoted to a thorough destruction of the West Point Railroad between these points, and some distance above. "It was done," says Gen. Sherman, "with a

will. Twelve and a half miles were destroyed, the ties burned, and the iron rails heated and tortured by the utmost ingenuity of old hands at the work. Several cuts were filled up with trunks of trees, with logs, rock and earth, intermingled with loaded shells prepared as torpedoes, to explode in case of an attempt to clear them out." On the 30th the army was again in motion in a southeasterly direction, aiming to strike the Macon Railroad from Rough and Ready to Jonesboro. Gen. Hood now began to understand the object of Gen. Sherman's movement; but still ignorant, apparently, that nearly the whole Federal army was moving upon his communications, he contented himself with sending Gens. Hardee and S. D. Lee's corps to Jonesboro, where they intrenched, remaining in Atlanta with Gen. Stewart's corps and the militia. Gen. Howard, marching due east from Fairburn, arrived within half a mile of Jonesboro on the evening of the 30th; but encountering Gens. Hardee and Lee, he halted for the night in a strong position, and proceeded to throw up intrenchments. The remainder of the army, moving *en echelon* to the left, did not succeed in reaching the railroad.

Meanwhile the 15th corps, having seized a prominent hill which formed the key to the enemy's position, took post in the centre of the Army of the Tennessee, the 16th somewhat retired, holding the extreme right, and the 17th the left. The 15th corps spent the night in intrenching, and early next day, before the right and left flanks had taken up their advanced position, the enemy burst in masses on the 15th corps, but were steadily and repeatedly repulsed, losing several general officers, including Major-Gen. Anderson, mortally wounded, and five colonels and majors (wounded) taken prisoners, besides upward of three thousand rank and file killed, wounded, and captured. The Federal loss was slight, as the men fought behind breastworks. It was observed that the rebel attacks lacked the enthusiasm and dash which had characterized the severe assaults before Atlanta. During the 31st the 28d and 4th corps reached the railroad near Rough and Ready, and commenced destroying it north and south from that point, in the same thorough manner which had characterized their operations on the West Point road.

Upon the repulse of the enemy on the afternoon of the 31st, Gen. Sherman directed Gen. Howard to hold him in his fortifications until the remainder of the army could close in upon him. The 14th corps only, having a comparatively short distance to travel, succeeded in getting up to Jonesboro on September 1st, the other two being too far from the field, and too much embarrassed by the difficult character of the country and the want of good roads, to move with rapidity. At 4 p. m. the 14th corps, which had taken position on the left of the Army of the Tennessee, was ordered to assault the enemy's works, Gen. Sherman fearing that, if he waited for the arrival of Gens. Schofield and

Stanley, darkness might intervene, and the enemy escape without a fight. The troops steadily advanced under a withering fire of musketry and artillery, and after a desperate conflict of two hours drove the enemy from their works, capturing two batteries—one of them Loomis' battery, captured at Chickamauga, some battle flags, and a large number of prisoners, including Gen. Govan and the greater part of his brigade, forming part of the celebrated "fighting division" of Gen. Cleburne. Darkness now setting in, Gen. Hardee was enabled to fall back seven miles to Lovejoy's, where he intrenched himself in a naturally strong position. Had Gens. Stanley and Schofield succeeded in coming up in season, he would in all probability have been overwhelmed and forced to capitulate.

Meanwhile, in Atlanta on the 1st, all was excitement and consternation, as it gradually transpired that the main body of the Federal army lay between the city and Gen. Hardee. Gen. Hood at once gave orders for the evacuation of his works, and the destruction of such stores and ammunition as could not be removed. The removal of all the supplies and ammunition that the transportation facilities of the army would permit commenced early in the morning, and was continued throughout the day. Large quantities of provisions were also distributed to the people, and the several bodies of troops, as they were withdrawn from the defences and went through the city, were allowed access to the public stores. The rolling stock of the railroads, consisting of about one hundred cars and six engines, was concentrated near the rolling mill before dark, by which time all the troops had passed through, with the exception of the rear guard, left to prevent straggling. The cars were then laden with the surplus ammunition, and together with the locomotives, depots, and store houses, and every thing, in fine, which would be of use to the Federal army, fired about midnight. The flames lit up the heavens for many miles, and the explosion of the ordnance trains was distinctly heard by the army in front of Jonesboro, and by Gen. Slocum at his position on the Ochattoochee. The latter sent out a heavy reconnoitring column at daybreak on the 2d, which, pushing forward without opposition, entered the city at 9 o'clock, where it was met by the mayor, who made a formal surrender, at the same time requesting protection for non-combatants and private property. This having been freely granted, Gen. Ward's division marched into the city with drums beating and colors displayed, and the national flag was raised over the Court House amidst hearty cheers. Eleven heavy guns were found in the fortifications, beside a number subsequently exhumed; and among the additional spoils were three uninjured locomotives, three thousand muskets in good order, a quantity of tobacco, and other stores. Of the valuable machinery in the workshops part had been removed to

Augusta and Macon, and part destroyed. "We have," says Gen. Sherman, in his despatch announcing the capture of Atlanta, "as the result of this quick, and, as I think, well-executed movement, twenty-seven guns, over three thousand prisoners, and have buried over four hundred rebel dead, and left as many wounded that could not be removed. The rebels have lost, besides the important city of Atlanta and their stores, at least five hundred dead, twenty-five hundred wounded, and three thousand prisoners; whereas our aggregate loss will not foot up fifteen hundred. If that is not success I don't know what is."

Of the losses in killed, wounded, and missing, sustained by the Federal army up to this period, the following table, based upon the most trustworthy information at present attainable, may be considered to give a fair estimate:

Skirmishing from Chattanooga to Resaca.....	1,900
Battle of Resaca.....	4,500
Skirmishing from Resaca to Allatoona.....	500
Battles around Dallas.....	8,000
Battle of Kennesaw Mountain, July 27th.....	8,000
Lesser contests around Kennesaw, June 9th to July 1st.....	4,500
Skirmishing between Kennesaw and the Chattahoochee.....	1,000
Battle of July 20th.....	1,900
" of July 22d.....	8,700
" of July 28th.....	500
Skirmishing from July 17th to August 28th.....	8,000
Fighting at Jonesboro, August 31st and Sept. 1st.....	1,500
Losses in cavalry raids.....	5,000
	<u>30,400</u>

Of the total number, less than one-sixth come under the head of missing. The loss in cannon was fifteen pieces—ten in the battle of July 22d, three taken from Stoneman, and two abandoned by McCook. Notwithstanding these casualties, amounting to nearly a third of the force with which he set out from Chattanooga, Gen. Sherman was enabled to report, after the fall of Atlanta, that by the arrival of reinforcements, recruits, furloughed men and convalescents, he had maintained his original strength. Of the rebel losses it is more difficult to form an estimate, but the following is believed to be reasonably correct:

Loss in skirmishing from Chattanooga to Atlanta....	6,000
Battles at Resaca.....	2,500
" around Dallas.....	8,500
Battle of Kennesaw Mountain.....	1,000
" of July 20th.....	5,000
" of July 22d.....	12,000
" of July 28th.....	5,500
Lesser contests around Atlanta.....	1,500
Battles at Jonesboro.....	5,000
	<u>43,000</u>

The enemy lost more than twenty general officers, killed and wounded, according to their own showing, besides from forty to fifty pieces of cannon, of which eight were 64-pounders, and over 25,000 stand of small arms. Their loss in colors was also much greater than that of the Federals.

Gen. Hood, upon abandoning Atlanta, directed his march toward McDonough, whence moving west he succeeded in forming a junction with Gens. Hardee and Lee. On the 2d Gen. Sherman followed in Gen. Hardee's traces, but finding him intrenched in a position of great strength, and learning the capitulation of the

city, he desisted from further attack, and on the 4th gave orders for the army to proceed by easy marches in the direction of Atlanta. On the 8th the Army of the Cumberland encamped around the city, that of the Tennessee about East Point, and that of the Ohio at Decatur. Atlanta itself was held by Gen. Slocum's (20th) corps.

Previous to the departure of the cavalry under Gen. Wheeler, on their raid against the railroad communications of Gen. Sherman, as mentioned above, the latter had enjoyed a comparative immunity from such demonstrations. This was mainly the result of the skilful dispositions which he had made for guarding the road between Atlanta and Chattanooga. In the latter place he had also wisely accumulated a sufficient quantity of stores to render him in a measure independent of Nashville, in the event of any interruption of travel between the two places. He consequently felt little immediate uneasiness upon hearing of the departure of Gen. Wheeler, but rather congratulated himself that he was at a critical moment superior to the enemy in cavalry. Gen. Wheeler left Atlanta soon after the miscarriage of Gen. Stoneman's raid, with a mounted force of six thousand men, and moving around to the north-east, struck the Western and Atlanta road near Adairsville, just midway between Atlanta and Chattanooga. Here he succeeded in capturing nine hundred beef cattle. He next approached the road at Calhoun, nine miles north of Adairsville, where he committed some damage, and on August 14th made his appearance at Dalton, of which place, "to prevent the effusion of blood," he demanded the immediate and unconditional surrender. Col. Leibold, who held the town with five hundred or six hundred men, replied that he had "been placed there to defend the post, but not to surrender." Apprising Gen. Steedman, in command at Chattanooga, of his danger, he kept Gen. Wheeler at bay until the next day, when reinforcements arrived from that place, by whose aid the enemy were driven off in confusion. Gen. Wheeler then passed up into East Tennessee, leaving the Federals to repair at their leisure the damage he had done, and in a few days the railroad was again in good running order between Atlanta and Chattanooga. He subsequently destroyed a considerable portion of the road between Chattanooga and Knoxville, and moving west during the latter part of August and first week of September, made strenuous efforts to interrupt railroad and telegraph communication between Chattanooga and Nashville; but being pursued by Gens. Rousseau, Steedman, and Granger, he was speedily driven toward Florence, and thence into Northern Alabama. The damage committed by him between Chattanooga and Atlanta was so slight, that Gen. Sherman, writing from the latter place on September 15th, was enabled to say, "Our roads and telegraphs are all repaired, and the cars run with regularity and speed."

The news of the capture of Atlanta reached

Washington on Sept. 2d, and immediately elicited the following expression of thanks from President Lincoln :

EXECUTIVE MANSION, WASHINGTON, Sept. 2.

The national thanks are tendered by the President to Maj.-Gen. Sherman and the gallant officers and soldiers of his command, before Atlanta, for the distinguished ability, courage, and perseverance displayed in the campaign in Georgia, which, under Divine Power, resulted in the capture of the city of Atlanta.

The marches, battles, sieges, and other military operations that has signalled this campaign, must render it famous in the annals of war, and have entitled those who have participated there, to the applause and thanks of the Nation.

(Signed) ABRAHAM LINCOLN.

Orders were also given for the firing of national salutes at the principal arsenals, and the 11th of September was appointed a day of solemn national thanksgiving for the signal successes of Gen. Sherman in Georgia, and of Admiral Farragut at Mobile. The following is Gen. Sherman's congratulatory address to his troops :

HEADQUARTERS MILITARY DIVISION OF THE MISS.,
IN THE FIELD, ATLANTA, GA., Sept. 8.

Special Field Order No. 68.

The officers and soldiers of the Armies of the Cumberland, Ohio, and Tennessee, have already received the thanks of the nation through its President and Commander-in-Chief; and it now remains only for him who has been with you from the beginning, and who intends to stay all the time, to thank the officers and men for their intelligence, fidelity, and courage displayed in the campaign of Atlanta.

On the first of May our armies were lying in garrison, seemingly quiet, from Knoxville to Huntsville, and our enemy lay behind his rocky-faced barrier at Dalton, proud, defiant, and exulting. He had had time since Christmas to recover from his discomfiture on the Mission Ridge, with his ranks filled, and a new commander-in-chief, second to none of the Confederacy in reputation for skill, sagacity, and extreme popularity.

All at once our armies assumed life and action, and appeared before Dalton; threatening Rocky Face we threw ourselves upon Resaca, and the rebel army only escaped by the rapidity of its retreat, aided by the numerous roads with which he was familiar, and which were strange to us.

Again he took post at Allatoona, but we gave him no rest, and by a circuit toward Dallas and subsequent movement to Ackworth, we gained the Allatoona Pass. Then followed the eventful battles about Kenesaw, and the escape of the enemy across Chattahoochee River.

The crossing of the Chattahoochee and breaking of the Augusta road was most handsomely executed by us, and will be studied as an example in the art of war. At this stage of our game our enemies became dissatisfied with their old and skilful commander, and selected one more bold and rash. New tactics were adopted. Gen. Hood first boldly and rapidly, on the 20th of July, fell on our right at Peach Tree Creek, and lost.

Again, on the 22d, he struck our extreme left, and was severely punished; and finally again, on the 28th, he repeated the attempt on our right, and that time he must have been satisfied, for since that date he has remained on the defensive. We slowly and gradually drew our lines about Atlanta, feeling for the railroads which supplied the rebel army and made Atlanta a place of importance.

We must concede to our enemy that he met these efforts patiently and skilfully, but at last he made the mistake we had waited for so long, and sent his cavalry to our rear, far beyond the reach of recall. Instantly our cavalry was on his only remaining

road, and we followed quickly with our principal army, and Atlanta fell into our possession as the fruit of well-concerted measures, backed by a brave and confident army.

This completed the grand task which had been assigned us by our Government, and your General again repeats his personal and official thanks to all the officers and men composing this army, for the indomitable courage and perseverance which alone could give success.

We have beaten our enemy on every ground he has chosen, and have wrested from him his own Gate City, where were located his foundries, arsenals, and workshops, deemed secure on account of their distance from our base, and the seeming impregnable obstacles intervening. Nothing is impossible to an army like this, determined to vindicate a Government which has rights wherever our flag has once floated, and is resolved to maintain them at any and all costs.

In our campaign many, yea, very many of our noble and gallant comrades have preceded us to our common destination, the grave; but they have left the memory of deeds on which a nation can build a proud history. Gens. McPherson, Harker, McCook, and others dear to us all, are now the binding links in our minds that should attach more closely together the living, who have to complete the task which still lies before us in the dim future.

I ask all to continue as they have so well begun the cultivation of the soldierly virtues that have ennobled our own and other countries. Courage, patience, obedience to the laws and constituted authorities of our Government; fidelity to our trusts, and good feeling among each other; each trying to excel the other in the practice of those high qualities, and it will then require no prophet to foretell that our country will in time emerge from this war, purified by the fires of war, and worthy its great founder, Washington. W. T. SHERMAN, Maj.-Gen. Com'g.

Upon arriving in Atlanta, Gen. Sherman determined that the exigencies of the service required that the place should for the present be appropriated exclusively for military purposes, and orders were immediately issued for the departure of all civilians, both male and female, excepting those in the employment of the Government. The following conveys the intentions of Gen. Sherman :

HEADQUARTERS POST OF ATLANTA,
ATLANTA, GA., Sept. 5, 1864.

General Order No. 3.

All families living in Atlanta, the male representatives of which are in the service of the Confederate States, or who have gone south, will leave the city within five days. They will be passed through the lines and go south.

All citizens from the North, not connected with the army, and who have not authority from Maj.-Gen. Sherman or Maj.-Gen. Thomas to remain in the city, will leave within the time above mentioned. If found within the city after that date, they will be imprisoned.

All male residents of this city, who do not register their names with the city Provost-Marshal within five days and receive authority to remain here, will be imprisoned. WM. COGSWELL,

Col. Commanding Post.

A truce of ten days was accordingly proposed, in a letter from the Federal general to Gen. Hood, then encamped near Lovejoy's, to which the latter made the following reply :

HEADQUARTERS ARMY OF THE TENNESSEE,
OFFICE CHIEF OF STAFF, Sept. 9, 1864.

Major-Gen. Sherman, Com'g U. S. forces in Georgia :

GENERAL: Your letter of yesterday's date, borne by James W. Ball and James R. Crew, citizens of

Atlanta, is received. You say therein: "I deem it to be to the interest of the United States that the citizens residing in Atlanta should remove," etc. I do not consider that I have any alternative in the matter. I therefore accept your proposition to declare a truce of ten days, or such time as may be necessary to accomplish the purpose mentioned, and shall render all the assistance in my power to expedite the transportation of citizens in this direction. I suggest that a staff officer be appointed by you to superintend the removal from the city to Rough and Ready, while I appoint a similar officer to control their removal further south; that a guard of 100 men be sent by either party, as you propose, to maintain order at that place; and that the removal begin next Monday.

And now, sir, permit me to say that the unprecedented measure you propose, transcends in studied and ingenious cruelty all acts ever before brought to my attention in the dark history of war.

In the name of God and humanity I protest, believing that you will find you are expelling from their homes and firesides the wives and children of a brave people.

I am, General, very respectfully, your obedient servant,
J. B. HOOD, General.

Official: McA. HUMBERT, Lieutenant, etc.

Accompanying the above letter was one addressed to Col. Calhoun, Mayor of Atlanta, as follows:

HEADQUARTERS ARMY OF THE TENNESSEE, }
September 9, 1864. }

Hon. James M. Calhoun, Mayor:

SIR: I have the honor to acknowledge the receipt of your letter touching the removal of the citizens of Atlanta, as ordered by Gen. Sherman. Please find inclosed my reply to Gen. Sherman's letter. I shall do all in my power to mitigate the terrible hardships and misery that must be brought upon your people by this extraordinary order of the Federal commander. Transportation will be sent to Rough and Ready to carry the people and their effects further South.

You have my deepest sympathy in this unlooked for and unprecedented affliction.

I am, sir, very respectfully, your obedient servant,
J. B. HOOD, General.

The following is Gen. Sherman's reply to Gen. Hood:

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI, }
IN THE FIELD, ATLANTA, GA., Sept. 10, 1864. }

Gen. J. B. Hood, Commanding Army of the Tennessee, Confederate Army:

GENERAL: I have the honor to acknowledge the receipt of your letter of this date at the hands of Messrs. Ball and Crew, consenting to the arrangements I had proposed to facilitate the removal south of the people of Atlanta, who prefer to go in that direction. I inclose you a copy of my orders, which will, I am satisfied, accomplish my purpose perfectly. You style the measure proposed "unprecedented," and appeal to the dark history of war for a parallel as an act of "studied ungenerous cruelty." It is not unprecedented; for Gen. Johnston himself very wisely and properly removed the families all the way from Dalton down, and I see no reason why Atlanta should be excepted. Nor is it necessary to appeal to the dark history of war, when recent and modern examples are so handy. You, yourself, burned dwelling-houses along your parapet, and I have seen today fifty houses that you have rendered uninhabitable, because they stood in the way of your forts and men.

You defended Atlanta on a line so close to the town, that every cannon-shot, and many musket-shots from our line of intrenchments, that overshot their mark, went into the habitations of women and children. Gen. Hardee did the same at Jonesboro, and Gen. Johnston did the same, last summer, at

Jackson, Miss. I have not accused you of heartless cruelty, but merely instance those cases of very recent occurrence, and could go on and enumerate hundreds of others, and challenge any fair man to judge which of us has the heart of pity for the families of "brave people." I say it is a kindness to those families of Atlanta to remove them now at once from scenes that women and children should not be exposed to; and the brave people should scorn to commit their wives and children to the rude barbarians, who thus, as you say, violate the laws of war, as illustrated in the pages of its dark history.

In the name of common sense, I ask you not to appeal to a just God in such a sacrilegious manner—you who, in the midst of peace and prosperity, have plunged a nation into civil war, "dark and cruel war," who dared and badgered us to battle, insulted our flag, seized our arsenals and forts that were left in the honorable custody of a peaceful Ordnance Sergeant, seized and made prisoners of war the very garrisons sent to protect your people against negroes and Indians, long before any overt act was committed by the "to you" hateful Lincoln government, tried to force Kentucky and Missouri into the rebellion in spite of themselves, falsified the vote of Louisiana, turned loose your privateers to plunder unarmed ships, expelled Union families by the thousand, burned their houses, and declared by act of Congress the confiscation of all debts due Northern men for goods had and received. Talk thus to the marines, but not to me who have seen these things, and will this day make as much sacrifice for the peace and honor of the South as the best-born Southerner among you. If we must be enemies, let us be men, and fight it out as we propose to-day, and not deal in such hypocritical appeals to God and humanity. God will judge me in good time, and He will pronounce whether it be more humane to fight with a town full of women, and the families of a "brave people" at our backs, or to remove them in time to places of safety among their own friends and people.

I am, very respectfully, your obedient servant,
W. T. SHERMAN, Maj.-Gen. Com'g.

The following is the truce agreed upon between the two generals:

HEADQUARTERS MILITARY DIVISION, MISSISSIPPI, }
IN THE FIELD, ATLANTA, GA., Sept. 10, 1864. }

Special Field Order No. 70.

1. Pursuant to an agreement between Gen. J. B. Hood, commanding the Confederate forces in Georgia, and Maj.-Gen. W. T. Sherman, commanding this Army, a truce is hereby declared to exist from daylight of Monday, September 12, until daylight of Thursday, September 22—ten (10) full days—at a point on the Macon Railroad known as Rough and Ready, and the country round about for a circle of two (2) miles radius, together with the roads leading to and from, in the direction of Atlanta and Lovejoy station, respectively, for the purpose of affording the people of Atlanta a safe means of removal to points south.

2. The Chief Quartermaster at Atlanta, Col. Easton, will afford all the citizens of Atlanta who elect to go south all the facilities he can spare to remove them, comfortably and safely, with their effects, to Rough and Ready station, using cars and ambulances for that purpose; and commanders of regiments and brigades may use their regimental and staff teams to carry out the object of this order; the whole to cease after Wednesday, 21st inst.

3. Maj.-Gen. Thomas will cause a guard to be established on the road out beyond the camp ground, with orders to allow all wagons and vehicles to pass that are used manifestly for this purpose; and Maj.-Gen. Howard will send a guard of one hundred men, with a field officer in command, to take post at Rough and Ready during the truce, with orders, in concert with a guard from the Confederate army of like size, to maintain the most perfect order in that vicinity

during the transfer of these families. A white flag will be displayed during the truce, and a guard will cause all wagons to leave at 4 p. m. of Wednesday, the 31st instant, and the guard to withdraw at dark, the truce to terminate the next morning.

By order of Maj.-Gen. W. T. SHERMAN.
L. M. DARTON, Aide-de-Camp.

The civic authorities made a final appeal to Gen. Sherman to revoke or modify his order, which, with his reply, is here appended:

ATLANTA, GA., September 11, 1864.

Major-General W. T. Sherman :

SIR: The undersigned, Mayor, and two members of Council for the City of Atlanta, for the time being the only legal organ of the people of the said city to express their wants and wishes, ask leave most earnestly but respectfully to petition you to reconsider the order requiring them to leave Atlanta. At first view it struck us that the measure would involve extraordinary hardship and loss, but since we have seen the practical execution of it, so far as it has progressed, and the individual condition of many of the people, and heard the statements as to the inconvenience, loss, and suffering attending it, we are satisfied that the amount of it will involve in the aggregate consequences appalling and heart-rending.

Many poor women are in an advanced state of pregnancy; others having young children, whose husbands, for the greater part, are either in the army, prisoners, or dead. Some say: "I have such a one sick at my house; who will wait on them when I am gone?" Others say: "What are we to do; we have no houses to go to, and no means to buy, build, or rent any; no parents, relatives, or friends to go to." Another says: "I will try and take this or that article of property; but such and such things I must leave behind, though I need them much." We reply to them: "Gen. Sherman will carry your property to Rough and Ready, and then Gen. Hood will take it thence on;" and they will reply to that: "But I want to leave the railroad at such a place, and cannot get conveyance from thence on."

We only refer to a few facts to illustrate, in part, how this measure will operate in practice. As you advanced, the people north of us fell back, and before your arrival here a large portion of the people here had retired south; so that the country south of this is already crowded, and without sufficient houses to accommodate the people, and we are informed that many are now staying in churches and other out-buildings. This being so, how is it possible for the people still here (mostly women and children) to find shelter, and how can they live through the winter in the woods? no shelter or subsistence; in the midst of strangers who know them not, and without the power to assist them much if they were willing to do so.

This is but a feeble picture of the consequences of this measure. You know the woe, the horror, and the suffering cannot be described by words. Imagination can only conceive of it, and we ask you to take these things into consideration. We know your mind and time are continually occupied with the duties of your command, which almost defers us from asking your attention to the matter, but thought it might be that you had not considered the subject in all of its awful consequences, and that, on reflection, you, we hope, would not make this people an exception to mankind, for we know of no such instance ever having occurred—surely not in the United States. And what has this helpless people done, that they should be driven from their homes, to wander as strangers, outcasts, and exiles, and to subsist on charity?

We do not know as yet the number of people still here. Of those who are here, a respectable number, if allowed to remain at home, could subsist for several months without assistance; and a respectable

number for a much longer time, and who might not need assistance at any time.

In conclusion, we most earnestly and solemnly petition you to reconsider this order, or modify it, and suffer this unfortunate people to remain at home and enjoy what little means they have.

Respectfully submitted,

JAMES M. CALHOUN, Mayor.

E. E. RAWSON, }
S. C. WELLS, } Councilmen.

GEN. SHERMAN'S REPLY.

HEADQUARTERS MILITARY DIVISION OF THE
MISSISSIPPI, IN THE FIELD,
ATLANTA, GA., September 12, 1864. }

James M. Calhoun, Mayor, E. E. Rawson, and S. C. Wells, representing City Council of Atlanta :

GENTLEMEN: I have your letter of the 11th, in the nature of a petition, to revoke my orders removing all the inhabitants from Atlanta. I have read it carefully, and give full credit to your statements of the distress that will be occasioned by it, and yet shall not revoke my order, simply because my orders are not designed to meet the humanities of the case, but to prepare for the future struggles in which millions, yes, hundreds of millions of good people outside of Atlanta have a deep interest. We must have Peace, not only at Atlanta, but in all America. To secure this we must stop the war that now desolates our once happy and favored country. To stop war we must defeat the rebel armies that are arrayed against the laws and Constitution, which all must respect and obey. To defeat these armies we must prepare the way to reach them in their recesses provided with the arms and instruments which enable us to accomplish our purpose.

Now, I know the vindictive nature of our enemy, and that we may have many years of military operations from this quarter, and therefore deem it wise and prudent to prepare in time. The use of Atlanta for warlike purposes is inconsistent with its character as a home for families. There will be no manufactures, commerce, or agriculture here for the maintenance of families, and sooner or later want will compel the inhabitants to go. Why not go now, when all the arrangements are completed for the transfer, instead of waiting till the plunging shot of contending armies will renew the scene of the past month? Of course I do not apprehend any such thing at this moment, but you do not suppose that this army will be here till the war is over. I cannot discuss this subject with you fairly, because I cannot impart to you what I propose to do, but I assert that my military plans make it necessary for the inhabitants to go away, and I can only renew my offer of services to make their exodus in any direction as easy and comfortable as possible. You cannot qualify war in harsher terms than I will.

War is cruelty, and you cannot refine it; and those who brought war on our country deserve all the curses and maledictions a people can pour out. I know I had no hand in making this war, and I know I will make more sacrifices to-day than any of you to secure peace. But you cannot have peace and a division of our country. If the United States submits to a division now, it will not stop, but will go on till we reap the fate of Mexico, which is eternal war. The United States does and must assert its authority wherever it has power; if it relaxes one bit to pressure it is gone, and I know that such is the national feeling. This feeling assumes various shapes, but always comes back to that of Union. Once admit the Union, once more acknowledge the authority of the National Government, and instead of devoting your houses, and streets, and roads, to the dread uses of war, I, and this army, become at once your protectors and supporters, shielding you from danger, let it come from what quarter it may. I know that a few individuals cannot resist a torrent of error and passion such as has swept the South into rebellion; but you can point out, so that we may know those

who desire a Government and those who insist on war and its desolation.

You might as well appeal against the thunder-storm as against these terrible hardships of war. They are inevitable, and the only way the people of Atlanta can hope once more to live in peace and quiet at home is to stop this war, which can alone be done by admitting that it began in error, and is perpetuated in pride. We don't want your negroes, or your horses, or your land, or any thing you have, but we do want and will have a just obedience to the laws of the United States. That we will have, and if it involves the destruction of your improvements, we cannot help it. You have heretofore read public sentiment in your newspapers, that live by falsehood and excitement, and the quicker you seek for truth in other quarters, the better for you.

I repeat, then, that, by the original compact of government, the United States had certain rights in Georgia which have never been relinquished and never will be; that the South began war by seizing forts, arsenals, mints, custom-houses, &c., &c., long before Mr. Lincoln was installed, and before the South had one jot or tittle of provocation. I myself have seen in Missouri, Kentucky, Tennessee, and Mississippi hundreds and thousands of women and children fleeing from your armies and desperadoes, hungry and with bleeding feet. In Memphis, Vicksburg, and Mississippi, we fed thousands upon thousands of the families of rebel soldiers left on our hands, and whom we could not see starve. Now that war comes home to you, you feel very different; you deprecate its horrors, but did not feel them when you sent car-loads of soldiers and ammunition, and molded shell and shot, to carry war into Kentucky and Tennessee, and desolate the homes of hundreds and thousands of good people, who only asked to live in peace at their old homes, and under the Government of their inheritance.

But these comparisons are idle. I want peace, and believe it can only be reached through Union and war; and I will ever conduct war purely with a view to perfect and early success.

But, my dear sir, when that peace does come, you may call on me for any thing. Then will I share with you the last cracker, and watch with you to shield your homes and families against danger from every quarter. Now you must go, and take with you the old and feeble, feed and nurse them, and build for them in more quiet places proper habitations to shield them against the weather until the mad passions of men cool down, and allow the Union and peace once more to settle on your old homes at Atlanta.

Yours in haste,

W. T. SHERMAN, Major-General.

In another communication to the Mayor Gen. Sherman ordered the latter to announce to the citizens:

The Government will furnish transportation south as far as Rough and Ready; north, as far as Chattanooga. All citizens may take their movable property with them. Transportation will be furnished for all movables. Negroes who wish to do so may go with their masters; other male negroes will be put in Government employ, and the women and children sent outside the lines.

For the purpose of contributing to the comfort of those who were under orders to remove, an extension of the truce was subsequently obtained. The difficult and delicate task of superintending the departure of these persons was not effected without charges of cruelty and peacemaking against the Federal officers, with which for several weeks the Southern press teemed. The following letter from Gen. Sherman on the subject shows how little foundation the calumniators had to build upon:

ATLANTA, September 26th, 1864.

To the Louisville Agent of the N. Y. Associated Press:

Your press despatches of the 21st embrace one from Macon of the 14th, announcing the arrival of the first train of refugees from Atlanta, with this addition, "that they were robbed of every thing before being sent into the rebel lines." Of course this is false, and it is idle to correct it as far as the rebels are concerned, for they proposed it as a falsehood to create a mischievous public opinion.

The truth is that during the truce 446 families were moved south, making 705 adults, 860 children, and 470 servants, with 1,661 pounds of furniture and household goods on the average to each family, of which we have a perfect recollection by name and articles. At the end of the truce, Col. Warner, of my staff, who had general supervision of my business, received from Major Clan, of Gen. Hood's staff, the following letter:

ROUGH AND READY, September 21, 1864.

Colonel: Our official communication being about to close, you will permit me to bear testimony to the uniform courtesy you have shown on all occasions to me and my people, and the promptness with which you have corrected all irregularities arising in our intercourse. Hoping at some future time to be able to reciprocate your courtesies, and in many instances your positive kindness.

I am, with respect, your obedient servant,
W. T. CLAN, Major and A. A. G. of Gen. Hood's Staff.
Lieut. Col. WILLARD WARNER, of Gen. Sherman's Staff.

I would not notice this, but I know the people of the North, liable to be misled by a falsehood calculated for special purposes, and by a desperate enemy, will be relieved by this assurance, that not only care, but real kindness, has been extended to families who lost their homes by the acts of their male protectors.

W. T. SHERMAN, Maj.-Gen. Commanding.

The Army of the Potomac, under Gen. Meade, in its reorganization was reduced to three corps, as stated on previous pages. Maj.-Gen. Warren was assigned to the command of the 5th army corps.

The consolidation of divisions and arrangement of brigades was made as follows: The commanding officer of the 1st division of the old 5th corps was ordered to consolidate the three brigades into two brigades, to be designated as the 1st and 2d brigades, 1st division, 5th army corps. The old 2d division, 5th corps, was consolidated into one brigade, and designated as the 3d brigade, 1st division, 5th corps, commanded by Brig.-Gen. R. B. Ayres. The old 3d division, 5th corps, remained as the new 3d division, 5th army corps. The 2d brigade of the 3d division, 1st army corps, was transferred to the 2d division, 1st army corps, and this division afterwards designated as the 2d division, 5th army corps. The 1st brigade of the 3d division, 1st army corps, was transferred to the 1st division, 1st army corps, and this division afterwards designated as the 4th division, 5th army corps. The designating flags of the old 3d brigade, 1st division, 5th army corps; of the old 2d division, 5th army corps; of the old 2d brigade 2d division, 5th army corps, and of the 3d division, 1st army corps, were ordered to be turned in to the corps quartermaster.

The following was the assignment of general officers to commands in the consolidated corps:

- 1—Brig.-Gen. J. S. Wadsworth, commanding 4th division.
- 2—Brig.-Gen. S. W. Crawford, commanding 3d division.

- 8—Brig.-Gen. J. C. Robinson, commanding 2d division.
- 4—Brig.-Gen. Charles Griffin, commanding 1st division.
- 5—Brig.-Gen. R. B. Ayres, commanding 3d brigade, 1st division.
- 6—Brig.-Gen. L. Cutter, commanding 1st brigade, 4th division.
- 7—Brig.-Gen. Henry Baxter, commanding 2d brigade, 2d division.
- 8—Brig.-Gen. J. J. Bartlett, commanding 2d brigade, 1st division.
- 9—Brig.-Gen. James Barnes, commanding 1st brigade, 1st division.
- 10—Brig.-Gen. J. C. Rice, commanding 2d brigade, 4th division.

The 2d corps was commanded by Maj.-Gen. Hancock. The original regiments of the 2d corps were consolidated into two divisions, with a new assignment of division and brigade commanders.

The division formerly known as the 1st division of the 8d corps, commanded by Maj.-Gen. Birney, was designated as the 3d division of the 2d corps. The division formerly known as the 2d division of the 8d corps, to which Brig.-Gen. Carr had been assigned as commander, was afterwards known as the 4th division of the 2d corps. Each of these divisions had been reduced to two brigades. The following was the arrangement of divisions and assignment of commanders:

FIRST DIVISION.

- Brig.-Gen. T. C. Barlow.
- First Brigade—Col. N. A. Miles, 61st New York.
- Second Brigade—Col. T. A. Smyth, 1st Delaware volunteers.
- Third Brigade—Col. P. Frank, 52d New York.
- Fourth Brigade—Col. J. R. Brooke, 55th Pennsylvania.

SECOND DIVISION.

- Brig.-Gen. John Gibbon.
- First Brigade—Brig.-Gen. A. S. Webb.
- Second Brigade—Brig.-Gen. J. P. Owens.
- Third Brigade—Col. S. S. Carroll, 8th Ohio.

THIRD DIVISION.

- Maj.-Gen. D. B. Birney.
- First Brigade—Brig.-Gen. J. H. Ward.
- Second Brigade—Brig.-Gen. A. Hayes.

FOURTH DIVISION.

- Brig.-Gen. J. B. Carr.
- First Brigade—Brig.-Gen. G. Mott.
- Second Brigade—Col. W. R. Brewster, 78d New York.
- Chief of Artillery, Col. Tibball.

Sixth corps was commanded by Gen. Sedgwick.

The old 8d division, 6th corps, was broken up, one brigade (Shaler's) going to the 1st division; the 2d (Wheaton's and Eustis') going to the 2d division. The 3d division, 8d corps, was transferred to the 6th corps, and Gen. Prince was assigned to the command of it. The three brigades of this division were consolidated into two, under Gen. Russell and Gen. Morris.

FIRST DIVISION.

- Brig.-Gen. H. G. Wright.
- First Brigade—Brig.-Gen. A. T. A. Torbett.
- Second Brigade—Col. E. Upton, 121st New York.
- Third Brigade—Col. H. Burnham, 5th Maine volunteers.
- Fourth Brigade—Brig.-Gen. A. Shaler.

SECOND DIVISION.

- Brig.-Gen. G. W. Getty.
- First Brigade—Brig.-Gen. F. Wheaton.
- Second Brigade—Col. L. A. Grant, "Fremont Brigade."
- Third Brigade—Brig.-Gen. T. H. Neill.
- Fourth Brigade—Brig.-Gen. A. L. Eustis.

THIRD DIVISION.

- Brig.-Gen. H. Prince.
- First Brigade—Brig.-Gen. W. H. Morris.
- Second Brigade—Brig.-Gen. D. A. Russell.
- Col. C. H. Tompkins, 1st Rhode Island artillery, commanding artillery.

The cavalry corps of this army was placed under the command of Gen. P. H. Sheridan, previously in service at the West. Brig.-Gen. Kilpatrick, in command of the 8d cavalry division, was transferred to the command of the cavalry in the Army of the Cumberland, under Major-Gen. Sherman; Gen. Pleasanton was relieved from the command of his cavalry corps, and ordered to report to Gen. Rosecrans; Gen. Sykes was ordered to report to Gen. Curtis; Gen. Newton was ordered to report to Gen. Sherman; Gen. French was ordered to report at Philadelphia; Gen. Meredith was ordered to report at Cairo; Gens. Ricketts, Gibbon, and Wadsworth, were ordered to report to Gen. Meade for assignments to command.

The following were the addresses of Gens. Pleasanton, Newton, and French, on parting with their commands:

HEADQUARTERS CAVALRY CORPS, ARMY OF THE POTOMAC, March 25, 1864.

General Orders No. 14.

Having been relieved from duty with the Army of the Potomac, the regret of separation from the many personal associations established in the cavalry corps becomes more impressive by the devotion, generosity, and noble daring that has been exhibited throughout one of the most eventful periods in the history of the war. The brave seek no higher tribute than the confidence of their commander. Your glorious deeds testify to the trust you have maintained so sacredly. Continue to be animated by the same spirit that now guides your colors to victory, and you will reap the reward of duty to yourselves, your country, and your God.

A. PLEASANTON, Major-General.

HEADQUARTERS FIRST CORPS, March 25, 1864.

In relinquishing command, I take occasion to express the pride and pleasure I have experienced with you, and my profound regret at our separation.

Identified by its services with the history of this war, the 1st corps gave at Gettysburg a crowning proof of valor and endurance, in saving from the enemy the strong position upon which the battle was fought. The terrible losses suffered by the corps on the 1st of July, attest its supreme devotion to the country. Though the title of the corps may not survive the present changes, history will not be silent upon the magnitude of its services.

JOHN NEWTON, Major-General.

HEADQUARTERS THIRD ARMY CORPS, BRANDY STATION, March 24, 1864.

General Orders No. 26:

Having been detached from the Army of the Potomac, in consequence of its reorganization into three corps, I desire to express the personal feelings of regret with which the order is received. The consolidation of the corps gives this army greater strength. The generals to command them are conspicuous for their gallantry and ability. Only known in the department where bullets whistle, there is a strong probability that I may soon meet in the field

those brave soldiers with whom I have been so long associated with pride and distinction.

WM. H. FRENCH, Major-Gen. Volunteers.

The following officers composed the staff of Gen. Grant in the field:

Brig.-Gen. John A. Rawlins, Chief of Staff; Lieut.-Col. T. S. Bowers, Ass't Adj't Gen.; Lieut.-Col. C. B. Comstock, Senior Aide-de-Camp; Lieut.-Col. O. E. Baca Babcock, Aide-de-Camp; Lieut.-Col. F. T. Dent, Aide-de-Camp; Lieut.-Col. Horace Porter, Aide-de-Camp; Lieut.-Col. W. L. Dupps, Ass't Insp.-Gen.; Lieut.-Col. W. R. Rowley, Sec.; Lieut.-Col. Adam Badeau, Sec.; Capt. E. S. Parker, Ass't Adj't Gen.; Capt. George K. Leet, Ass't Adj't Gen., in charge of office at Washington; Capt. P. T. Hudson, Aide-de-Camp; Capt. H. W. Jones, Ass't Quartermaster, on duty at headquarters; First-Lieut. Wm. Dunn, jr., 88d Indiana volunteers, Acting Aide-de-Camp.

At the same time the 9th corps of the army, at Annapolis, was filled up, partly with colored troops, and placed under the command of Major-Gen. Burnside, its former commander.

About the 28d of April, this corps moved to Washington, were reviewed by President Lincoln, and proceeded to Culpepper Court House, and were united to the Army of the Potomac.

Early in March Major-Gen. Sigel had been placed in command of the active forces in the Department of Western Virginia, for the purpose of cooperating with Gen. Grant by way of the Shenandoah valley. Those forces were largely increased.

The forces of Major-Gen. Butler, in command at Fortress Monroe, were also largely increased. Major-Gen. W. F. Smith, from the Western army, was assigned to the command of the 18th corps, and Major-Gen. Q. A. Gillmore, from the Department of the South, was assigned to the command of the 10th corps. Major-Gen. Foster was ordered to the command of the Department of the South. He had previously been in command in North Carolina.

On the 21st of April the Governors of Ohio, Indiana, Illinois, and Iowa, tendered to the President the services of one hundred thousand men for one hundred days. The object of this tender of men, the service in which they were to be engaged, and the reasons for the same, are fully stated in the following proclamation of the Governor of Illinois:

To the people of the State of Illinois:

On the 21st of April, the Governors of Ohio, Indiana, Illinois, Iowa, and Wisconsin, submitted to the President of the United States a proposition to furnish volunteers from their respective States for the coming campaign:

WAR DEPARTMENT, WASHINGTON, April 21, 1864.

To the President of the United States:

First—The Governors of Ohio, Indiana, Illinois, Iowa, and Wisconsin, offer to the President infantry troops for the approaching campaign.

Second—The term of service to be a hundred days, reckoning from the date of muster into the service of the United States, unless sooner discharged.

Third—The troops to be mustered into the United States service by regiments, when the regiments are filled up according to regulations to the minimum strength. The regiments to be organized according to the regulations of the War Department. The whole number to be furnished within twenty days from date of notice of the acceptance of this proposition.

Fourth—The troops to be clothed, armed, equipped, sub-

sisted, transported, and paid as other United States Infantry volunteers, and to serve in fortifications or wherever their services may be required, within or without their respective States.

Fifth—No bounty to be paid the troops, nor the service charged or credited on any draft.

Sixth—The draft for three years service to go on in any State or district where the quota is not filled up; but, if any officer or soldier in the special service should be drafted, he shall be credited for the service rendered.

JOHN BROUGH, Governor of Ohio.

O. H. MORTON, Governor of Indiana.

RICH'D YATES, Governor of Illinois.

W. M. STONE, Governor of Iowa.

The foregoing proposition of the Governors is accepted, and the Secretary of War is directed to carry it into execution.

A. LINCOLN.

APRIL 23d, 1864.

I shall not set forth the various reasons which induced the Executive of these States to submit their proposition. It will be sufficient for you to know that it is evident from the circumstances which surround us, that the battles which are to decide the fate of the country are soon to be fought. The enemy has, during the past winter, been concentrating all his strength for the summer campaign which is before us. It is of the utmost importance to meet them with the greatest force, and with the most overwhelming numbers which it is possible to bring to bear.

You are also aware that the country which has already been wrested from the grasp of the enemy is of vast extent, embracing many States and Territories, many thousands of miles of seacoast, and the whole length of the Mississippi River, and of most of her tributaries, and that to hold this country and these long lines of sea and river coast requires large stationary forces.

The strongholds, forts, garrisons, cities, and towns, situated as they are in the midst of populations which are for the most part disloyal, and ready to rise upon the withdrawal of our troops, are almost innumerable, and require by far the greater part of our immense army in their protection and defence. In this view of the case, the Executives of the most Western States believed that the efficiency of the army might be immensely increased by a volunteer force, to be immediately raised, which should occupy the points already taken, and release our veteran troops, and send them forward to join the main body of the army, which is soon to engage the forces of the enemy. It will be apparent also that, while these forces are to be employed in fortifications, and at such points as the Government may require them now, in the future, also, they will place in the hands of the States the means to repel invasion from their borders, suppress insurrection, and maintain the peace.

The mode of enlistments, places of rendezvous, and all information pertaining to organization, &c., will be communicated to you by the adjutant-general of the State.

I make my appeal to the State of Illinois, to respond to the Government with her full quota of 20,000 men in the next twenty days. Although the State has thus far exceeded her quota under all calls by so many thousands, I doubt not she will stand ready to strengthen the arm of the Government in this trying hour, and that she will send this timely necessary relief to her gallant sons now in the field, and who have so distinguished her proud name upon every battle-field of the war. It is confidently hoped that by the timely aid which may thus be given our veteran army, the last blow may be given this wicked rebellion, and the Government reestablished, the Union restored, and all the blessings of a stable and lasting peace secured.

Though in the North and in the South the notes of preparation for the conflict fill the land, yet for the first time have I fully seen the beginning of the end of this frightful war. All that is now required is, that the Government put forth its power at the right time, and in the right place.

The people of Illinois have confidence in her sons, and in the great commander, Gen. Grant, whom she has given to the country, as well as in the armies under his command. Let us do all in our power to uphold and strengthen their arms.

Glorious Illinois, in every period of this war you have done your duty. The shining achievements of your sons are the admiration of the world. In this most eventful hour you will not fail.

RICHARD YATES, Governor.

The address of the Governor of Indiana was as follows:

EXECUTIVE DEPARTMENT, INDIANAPOLIS, April 22, 1864.
To the people of Indiana:

The Governors of Ohio, Illinois, Iowa, Wisconsin, and Indiana, have offered to raise for the service of the General Government eighty-five thousand men for the period of one hundred days, to perform such military service as may be required of them in any State. They will be armed, subsisted, clothed, and paid by the United States, but receive no bounty. They will be mustered into the service of the United States for the period designated, the time to commence from the date of muster.

The importance of making the approaching campaign successful and decisive is not to be over-estimated, and I feel confident that this call will be promptly and fully responded to.

I need not enter into the reasons which have induced the making of this offer, and its acceptance by the Government, as they will be suggested to all by the condition and position of our military affairs.

I therefore call for twenty thousand volunteers, to rendezvous at such places as may be hereafter designated, and to be organized under instructions given by the Adjutant-General. Existing organizations of the Indiana Legion, offering their services, will be preserved when the regiment or company is filled to the minimum number, under the regulations governing the army of the United States.

O. P. MORTON, Governor of Indiana.

The following order was issued in Ohio:

COLUMBUS, April, 24th, 1864.

General Orders No. 12.

The regiments, battalions, and independent companies of infantry of the National Guard of Ohio are hereby called into active service for the term of one hundred days, unless sooner discharged. They will be clothed, armed, equipped, transported, and paid by the United States Government. These organizations will rendezvous at the nearest eligible places in their respective counties, the place to be fixed by the commanding officer, and to be on a line of railroad where practicable, on Monday, May 2, 1864, and report by telegraph to these headquarters at four o'clock P. M. of the same day the number of men present for duty. The alacrity with which all calls for the military forces of the State have been heretofore met, furnishes the surest guarantee that the National Guard will be prompt to assemble at the appointed time. Our armies in the field are marshalling for a decisive blow, and the citizen soldiery will share the glory of the crowning victories of the campaign, by relieving our veteran regiments from post and garrison duty, to allow them to engage in the more arduous labor of the field. By order of the Governor,

B. B. COWEN, Adjutant-General of Ohio.

The plan of Gen. Grant was more comprehensive than the mere capture of the city of Richmond. His purpose was to secure the machinery of the Confederate Government, and to destroy the army of Gen. Lee. Other movements were therefore necessary in connection with the one made under his own direction. The first of these was to be made by Gen. Sigel up the Shenandoah Valley toward

Staunton with the view of taking possession of the Virginia Central Railroad, and ultimately holding Lynchburg on the Virginia and Tennessee Railroad. The next of these movements was to be made by Gen. Averill moving toward the same great railroad with the design of striking it near Salem or Wytheville. The next was to be made by Gen. Crook moving with a strong force and abundant supplies from Charleston, Va., toward Dublin Depot (Newbern), on the same railroad. The remaining movement on the west was to be made up the eastern side of the Big Sandy River, toward Abingdon, on the same railroad. It was intended that these different forces should strike the Virginia and Tennessee Railroad about the same time, at Abingdon, Wytheville, Dublin Depot, and Staunton, and should afterwards unite centrally west of Lynchburg, and march against that town. This combined movement comprehended a large aggregate of forces, to wit: 12,000 men by the Big Sandy route, under Gen. Burbridge; 4,000 under Gen. Crook, moving from the lower Kanawha; 2,500 cavalry under Gen. Averill, from northwest Virginia, and the army of Gen. Sigel, numbering nearly 12,000.

On the south side of Richmond it was intended by Gen. Grant to capture and hold Petersburg by a heavy force, under the command of Gen. B. F. Butler. Thus holding Petersburg and Lynchburg, all southern communication with Richmond would be cut off. The progress and results of these respective coöperating movements will be stated on a subsequent page.

On the 3d of May Gen. Meade issued the following address to the army:

HEADQUARTERS ARMY OF THE POTOMAC, May 3, 1864.

SOLDIERS: Again you are called upon to advance on the enemies of your country. The time and the occasion are deemed opportune by your Commanding-General to address you a few words of confidence and caution. You have been reorganized, strengthened, and fully equipped in every respect. You form a part of the several armies of your country—the whole under an able and distinguished general, who enjoys the confidence of the Government, the people, and the army. Your movement being in coöperation with others, it is of the utmost importance that no effort should be spared to make it successful.

Soldiers! The eyes of the whole country are looking with anxious hope to the blow you are about to strike in the most sacred cause that ever called men to arms. Remember your homes, your wives, and children; and bear in mind that the sooner your enemies are overcome the sooner you will be returned to enjoy the benefits and blessings of peace. Bear with patience the hardships and sacrifices you will be called upon to endure. Have confidence in your officers and in each other.

Keep your ranks on the march and on the battlefield, and let each man earnestly implore God's blessing, and endeavor by his thoughts and actions to render himself worthy of the favor he seeks. With clear conscience and strong arms, actuated by a high sense of duty, fighting to preserve the Government and the institutions handed down to us by our forefathers, if true to ourselves, victory, under God's blessing, must and will attend our efforts.

GEORGE G. MEADE, Maj.-Gen. Com'ding.

S. WILLIAMS, Ass't Adj.-Gen.

On the same day camp was broken up, and with six days' rations the army was put in motion in light marching order. About 2 P. M. the division of cavalry commanded by Gen. Gregg, with a part of the canvas pontoon train, moved toward Richardsville and were engaged till late at night in repairing the roads to Ely's Ford. Soon after midnight a crossing was prepared by throwing two bridges over to the south shore. At the same time Gen. Wilson, in command of the 8d cavalry division, advanced to Germania Ford, eight miles above, and there prepared another bridge with canvas pontoons. About midnight the 2d corps, under Maj.-Gen. Hancock, began to move down the Stevensburg and Richardsville road to Ely's Ford. The entire corps were on the march before 8 A. M., and crossed soon after daylight. At the same time the 5th corps, under Maj.-Gen. Warren, began to move. The advance, consisting of two divisions of infantry and a portion of artillery, passed through Stevensburg soon after midnight, closely followed by the remainder of the corps, and destined to Germania Ford. This corps was closely followed by the 6th corps, under Maj.-Gen. Sedgwick, which left its camp at 4 A. M. It was the forces at Oulpepper Court House which moved by the old plank road and crossed at Germania Ford. Those at Brandy Station, Catlett's, &c., on the Alexandria railroad, moved by the old turnpike, crossing the

Rappahannock at Ely's Ford, four miles below the junction of the Rapidan and the Rappahannock rivers. Germania Ford is about twelve miles and Ely's Ford about four miles from Chancellorsville. Orange Court House is about twenty-seven miles and Wilderness Tavern about twenty-two miles from Chancellorsville. From points between Chancellorsville and Wilderness Tavern, roads lead to Gordonsville, Louisa Court House and Frederick's Hall, on the Virginia Central Railroad, in distances varying from twenty to thirty miles. From these places there are good roads leading direct to Richmond, which is distant between forty-two and fifty-four miles; and also good roads to Hanover Junction.

The crossing was effected during the day by these three corps without opposition. The pickets of the enemy withdrew quietly from the river, and the cavalry of Gen. Gregg advanced toward Chancellorsville without finding the enemy anywhere in force. Gen. Wilson's cavalry moved up the road to Parker's store, toward Orange Court House, the position of the enemy. The infantry and artillery followed in the direction of Chancellorsville and the Wilderness. The 2d corps camped on the old battle-field at Chancellorsville; the 5th at the old Wilderness Tavern, and the 6th at the Tavern and at Germania Ford.

The 9th corps, under Gen. Burnside, was encamped at Warrenton. On May 1st he issued the following address to his troops:

HEADQUARTERS 9TH ARMY CORPS,
WARRENTON JUNCTION, VA., May 1, 1864. }

The General commanding publishes the following instructions to the men just entering the service of the country. He expects that every old soldier who has learned their value by experience, will join in impressing their importance on those who are now to share with him the honor of a soldier's life.

On the march no soldier should quit the ranks, on any pretence whatever, without permission of his commanding officer. The army is about to move into the country of an active enemy, with no friendly force behind or near it, and every straggler runs the risk of Libby Prison or a bullet.

No soldier should leave camp without his musket; nor, on any consideration, whether on the march or in action, take off the haversack, canteen, or cartridge-box.

He should sleep with his arms within reach.

Washing the feet at night, soaping the stockings, and greasing the shoes will prevent foot-soreness.

Cavalry and artillery should husband their forage. Every soldier should endeavor to make his rations hold out longer than the time for which they were issued. A little saving may save a day's starving. It is well to make little bags, or some secure packages, for coffee, salt, and sugar. If mixed in the haversack they become worthless.

Blankets and overcoats should never be thrown away, no matter how tired or hot one may be. Cold nights follow hot days. The chief point in health and comfort is to sleep warm. At the same time the recruit should not overload his knapsack; by endeavoring to carry many comforts he may be compelled to throw away all.

He should never waste a cartridge nor a cap; the time may come when every one will tell.

When on picket duty he must remember that the safety of the whole army may depend upon his vigilance. He should observe and report every unusual sound. If attacked he must remember that a cool and determined party, acting on the defensive and properly protecting themselves, can keep at bay many times their number, and thus give time to their comrades to form and come to their support.

In action he should keep cool, not loading in haste, but tearing the cartridge and pouring in all the powder before putting in the ball. He should aim deliberately, aim low, and pull the trigger slowly. One shot in five minutes, well aimed, is better than five in a minute without aim.

He should never leave the ranks to carry off the wounded without permission of his officer; the ambulance attendants will take care of them, and he must feel that his first duty is to stand by his comrades in the fight.

Spies and persons in citizen's dress found lurking in our lines with hostile intent, should be immediately turned over to the Provost Guard.

Prisoners of war, wounded or not, should be treated with that soldierly kindness and consideration which the 9th corps has always honorably shown, and which is due to an open enemy.

The General Commanding desires to express to the 9th corps that he feels the same confidence in them now that he has ever felt in times past, and has ever found just cause for feeling. He believes that they will do their duty thoroughly and heartily on all occasions and under all circumstances.

By command of Maj.-Gen. BURNSIDE.
EDWARD M. NEILL, Asst Adj.-Gen.

Acting as a reserve upon the advance of the army Gen. Burnside followed to the banks of the Rapidan, but did not cross over.

The army of Gen. Lee consisted of three corps

under Lieut.-Gens. Longstreet, A. P. Hill, and Ewell, and occupied a position around Orange Court House, south of Culpepper Court House.

The plan of Lieut.-Gen. Grant in his advance upon Richmond was to follow a line nearly corresponding to the route of the Fredericksburg and Richmond railroad, making his base at Aquia Creek. For this purpose he moved down the right of the position of Gen. Lee, and was prepared either to accept a battle from him on the Rapidan or to continue his march to Spottsylvania Court House. But Gen. Lee would not consent to be outflanked, and ultimately endanger his railroad communication with Richmond. He, therefore, prepared to resist the progress of Lieut.-Gen. Grant, and commenced a rapid movement of his forces parallel with the course of the river. Lieut.-Gen. Longstreet's corps started from Gordonsville, Lieut.-Gen. Hill took the plank road, and Lieut.-Gen. Ewell the old turnpike which joins the plank. The two latter arrived in front of Lieut.-Gen. Grant's forces on Thursday morning. Early on that morning his forces began to move. The 5th corps, under Maj.-Gen. Warren, advanced from its position near Wilderness Tavern along the roads leading to Orange Court House, five miles to Parker's Store. It is here that the Germania Ford road debouches into the old turnpike. This point is in Spottsylvania county, about eight miles above Chancellorsville, and twenty below Orange Court House. The whole face of the country in that neighborhood is thickly covered with an undergrowth of field pines, cedars, and scrub oaks, and therefore utterly unfit for the use of cavalry or artillery. Maj.-Gen. Sedgwick with the 6th corps was to follow, and Maj.-Gen. Hancock with the 2d corps was to stretch southwesterly from Chancellorsville toward Shady Grove Church. Gen. Sheridan covered the extreme left beyond Maj.-Gen. Hancock, with the object of finding the enemy's cavalry under Gen. Stuart. The effect of these movements was to bring Maj.-Gen. Sedgwick on the right, Maj.-Gen. Hancock on the left, and Maj.-Gen. Warren in the centre of the line extending nearly five miles. The centre was thrown a little forward, the wings not having reached the best position, and then the action commenced.

At noon, Gen. Griffin, whose advance had been driven in, was ordered to push the 1st division of the 5th corps out to the right and left of the turnpike and feel the enemy. An advance of less than a mile, stretching across the turnpike, brought them in contact with the enemy under Lieut.-Gen. Ewell, posted on a wooded declivity. A sharp engagement ensued for an hour, when the pressure of the enemy could no longer be resisted. Gen. Griffin's division was driven back, leaving two pieces of artillery in the enemy's hands. The 4th division, under Gen. Wadsworth, and the 2d, under Gen. Robinson, now advanced, relieving Gen. Griffin, and holding the enemy in check. The Federal loss was about one thousand men.

The next movement of the enemy was to press between the corps of Gens. Warren and Hancock on the left centre. Here the contest commenced about 8 P. M. In anticipation of this movement Gen. Hancock's advance had been checked, and his corps was rapidly moving to close the gap between it and the centre. One division of the 6th corps, under Gen. Getty, had been detached and moved to the left, taking position on the right of the Orange Court House plank road. The advance, consisting of the 1st brigade of the 2d division of the 2d corps, had scarcely formed a junction with Gen. Getty, when the enemy, belonging to Lieut.-Gen. Hill's corps, made a powerful attack upon them. The position was held with the utmost obstinacy. Meanwhile the remainder of Gen. Hancock's corps arrived and attacked on the enemy's front and right. The divisions of Gens. Birney, Barlow, and Gibbons, took an active part, and the contest became exceedingly bloody. Such was the nature of the undergrowth that there was little opportunity to use artillery. The furious fire of the enemy's musketry was seldom surpassed. After the contest had stubbornly continued for two hours, a portion of Gens. Wadsworth's and Robinson's divisions of the 5th, moved out to turn the flanks of Gen. Hill's corps. The contest continued here until late in the night, and closed with a loss of a thousand killed and wounded, among whom was Gen. Alexander Hayes. The effort of the enemy to penetrate the left centre failed.

On the right the fighting commenced with an attack by Gen. Sedgwick, who advanced his line. In the afternoon the enemy advanced to drive him back, during which they made a desperate effort to turn his right. In this extremity he sent a request to Gen. Burnside, who had that day crossed over, to close up and assist him. At this time the attack of the enemy was repulsed, but near nightfall it was renewed again with great vigor. A most desperate engagement ensued, which continued until two hours after dark, when the indecisive conflict closed. Three hundred of the enemy had been taken prisoners, and they in turn claimed the capture of a thousand during the day.

The following is Gen. Lee's despatch:

HEADQUARTERS ARMY NORTHERN VIRGINIA, May 5, 1864.

Hon. Secretary of War:

The enemy crossed the Rapidan at Ely's and Germania Fords. Two corps of this army moved to oppose him, Ewell's by the old turnpike and Hill's by the plank road. They arrived this morning in close proximity to the enemy's line of march. A strong attack was made upon Ewell, who repulsed it, capturing many prisoners and four pieces of artillery.

The enemy subsequently concentrated upon Gen. Hill, who with his and Wilcox's divisions, successfully resisted the repeated and desperate assaults. A large force of cavalry and artillery on our right were driven back by Rossan's brigade. By the blessings of God, we maintained our position against every effort until night, when the combat closed. We have to mourn the loss of many brave officers and men.

Gallant Brig.-Gen. J. M. Jones was killed, and Gen. Stafford, I fear, mortally wounded, while leading his command with conspicuous valor. R. E. LEE.

VOL. IV.—7 A

No despatch was sent from Lieut.-Gen. Grant. During the day the 9th corps, under Gen. Burnside, had come upon the field after a forced march. It was distributed as occasion required on the right, right centre and left centre. The Federal line continued substantially as during the day, stretching northwest and southeast, nearly parallel to a line from Germania Ford to Chancellorsville. Gen. Grant had thus been successful in covering the fords by which all his teams were yet to pass, and which it was absolutely necessary to keep open in order to preserve his line of communication, and which were threatened by the rapid and bold movement of Gen. Lee from west to east.

On the next day, Friday, May 6th, the battle consisted of a succession of fierce attacks made by each side. Both had more or less intrenched their positions by felling timber and covering it with earth, or with slight earthworks. An advance had been ordered on the right, at 5 A. M., by Gen. Grant, but before it took place the firing of the pickets had commenced and increased until six o'clock, when the engagement became general. The interval of ground between the opposing lines was fought over in some places as many as four or five times, the combatants driving each other in turn from the opposite lines of rifle-pits. Gen. Seymour with a provisional division on the extreme right, and Gen. Wright's 1st division of the 6th corps, next adjoining, were first engaged, and Gen. Ricketts' was next involved. An effort made on the part of the enemy to flank was repelled, and the line pushed a few hundred yards ahead, but without any decisive advantage. At 8 and half-past 10 o'clock the right was again pressed by the enemy. The firing at each period extended all along the line. The efforts of the enemy appeared to be intended to break through the separate corps. The gaps, however, were closed by the 9th corps. Earthworks were thrown up whenever and wherever practicable, and proved to be of invaluable service. On the left the engagement commenced at the same time as on the right. Gen. Hancock pressed the enemy some distance, until being reinforced they held their ground. Soon a severe assault was again made on the left, followed up along the line with such vigor as nearly to involve the whole in confusion. Reinforcements from Gen. Burnside checked the advance of the enemy, and relieved the left and centre. Before noon Gen. Wadsworth, commanding the 4th division of the 5th corps was shot in the forehead and instantly killed.

At noon the contest was comparatively suspended, and Gen. Grant concentrated his lines, interposing the greater part of Gen. Burnside's corps between Gens. Warren and Hancock. The left was also brought forward a little toward the centre from the Brock Road, to which it had been driven. These movements had hardly been completed when the forces of Gens. Longstreet and Hill renewed the attack on the left and centre with great fury, and drove them

back. The fight was fiercest at the junction of these two corps and Gen. Crawford's 3d division of the 5th corps. Gen. Carr's 4th division of the 2d corps, and Gen. Stevenson's division of the 9th corps, suffered the most heavily. The latter division being on Gen. Hancock's right gave way, and the enemy rushed through the gap. Their advance was checked by an attack on the flank by Gen. Carroll's brigade of Gen. Hancock's corps, and they retired with much loss. The centre and left then recovered their former position.

Toward night the battle was renewed on the right. The assault of the enemy was sudden and furious, and the 2d brigade of the 3d division, under Gen. Seymour, on the extreme right, was panic-stricken, and, with Gen. Shaler's brigade, were overwhelmed and their commanders captured. Gen. Seymour had taken command of this brigade only on the previous night, and did every thing that skill and bravery could effect. The whole right wing, if not the whole army, was now in peril. Gen. Sedgwick, however, rallied and held his troops, thus saving the army from the threatened destruction. The enemy, not perceiving the havoc which they had made, or not knowing the condition of the right wing, and exhausted with the severe efforts of the day, retired in the darkness which now prevailed. No further effort was made to cut off the army from Germania Ford, even when it was nearly successful. The loss on the right wing was about 6,000, of which 4,000 occurred during this assault of the enemy. The total of the two days' battles was estimated at 15,000. Among the killed were Gens. Hayes, Wadsworth, and Webb of Gen. Grant's army. Of the enemy's, Gens. Jones, Jenkins, and Pickett were killed, and Gens. Longstreet, Pegram, and Hunter severely wounded. Gen. Longstreet was struck in the neck below the Adam's apple. The ball passed along the clavicle, fracturing it, and came out on the shoulder, cutting some important nerves of the arm. He was unable to take the field until near the close of the year.

At the close of the day both armies held substantially the same line as on the previous evening, and the intervening space was occupied by the dead and wounded. Gen. Grant had strengthened his left, and during the night preparations were made to strengthen the right, and to repair the disaster on that flank.

During these two days Gen. Grant's cavalry had occupied a position covering the rear and left, and prevented flanking movements by the cavalry of the enemy. On Friday, as Gen. Hancock's corps advanced to battle, the enemy charged and captured several hundred of the 18th Pennsylvania cavalry.

On Saturday, the 7th, brisk skirmishing ensued along the lines. Gen. Gordon's brigade of the enemy cut off the communication of Gen. Sedgwick with Germania Ford, and the latter was withdrawn toward Wilderness Tavern. Gen. Burnside's corps was moved out

on the road to Spottsylvania Court House. It was evident in the afternoon that Gen. Lee was withdrawing his main force toward Spottsylvania Court House, and orders were issued to the surgeons in charge of the hospitals to remove their sick and wounded to Ely's Ford, and the supply trains were ordered to move in the night to the vicinity of Todd's tavern. Subsequently Fredericksburg was occupied by some of Gen. Grant's forces, and made a depot for the wounded and a basis for supplies.

The following despatches were sent by Gen. Lee to Richmond:

HEADQUARTERS ARMY NORTHERN VIRGINIA, }
May 7, 1864—8 P. M. }

Honorable Secretary of War:

Gen. Gordon turned the enemy's extreme right yesterday evening and drove him from his rifle-pits. Among the prisoners captured are Gens. Seymour and Shaler. A number of arms were also taken. The enemy has abandoned the Germania Ford road and moved his pontoon bridge toward Ely's. There has been no attack to-day—only slight skirmishing along the line. (Signed) R. E. LEE.

HEADQUARTERS ARMY NORTHERN VIRGINIA, May 8.
Honorable Secretary of War:

The enemy have abandoned their position and are marching toward Fredericksburg. I am moving on the right flank. (Signed) R. E. LEE.

During the afternoon a battle took place between the cavalry. The loss was about two hundred and fifty on each side. At dark the 2d corps began to move by way of Brock's road, followed by the 5th corps on the same route. Gens. Burnside and Sedgwick moved on the old Chancellorsville road, and arrived on the field near Spottsylvania at noon on Sunday. Gen. Warren reached a point about three miles from Spottsylvania Court House, after marching all of Saturday night. About the same time Gen. Ewell's corps, with a portion of Gen. Longstreet's, had arrived. A sharply-contested action ensued in a field to the left of the Brock road, which stretched away to the east, toward the Spottsylvania and Fredericksburg road. The country was rolling, and dotted here and there with thick groves of pine and cedar for the distance of a mile from the point where the Wilderness terminates in the open country. A contest between cavalry had taken place in front of Gen. Warren, and some artillery was seen, but it was inaccurately reported that there was no infantry. As the advance of Gen. Warren passed down the road, shells were thrown at it with great activity, and the enemy fell back, making only a slight resistance. On reaching a triangular clearing known as Alsop's farm, of a hundred acres, the artillery of the enemy was found to be stationed there. Beyond the clearing was Ny Run, a small stream affording no obstacle to the advance of troops. The wooded ground rises beyond in ridges. The Union batteries were stationed to the right, commanding those of the enemy. The infantry advanced through the clearing and came upon three lines of the enemy, the last of which was behind earthworks. Here the struggle took

place with the greatest violence, and continued some hours, during which Gen. Warren held his ground. In the afternoon a brigade of the 6th corps came to his assistance, and the enemy were driven from their position. The Federal loss was thirteen hundred. Many officers were wounded, among whom was Gen. Robinson, who was shot in the knee. Several brigades lost their commanders, and the 4th Michigan was finally commanded by a first lieutenant. The 1st Michigan, two hundred strong, came out of the fight with twenty-three men. The day was intensely hot, and many suffered from sun-stroke.

Monday was comparatively quiet in the morning, followed by cannonading and skirmishing, but no general battle. While superintending the mounting of artillery, Gen. Sedgwick was killed by a ball from a sharpshooter entering his head. The centre of the line formed on Sunday was held by Gen. Warren, with the 2d corps, Gen. Hancock, on the right, and the 6th corps, Gen. Wright, lately Gen. Sedgwick, on the left. Toward night, on Monday, Gen. Grant ordered another advance on the enemy. The right, with Gens. Birney's and Gibbon's divisions in advance, followed by Gen. Carroll's brigade, crossed over to the south bank of a branch of the Po River. Here a severe battle with both infantry and artillery ensued. Each side alternately charged. At night the enemy held Spottsylvania Court House, and Gen. Hancock slowly retired his corps, after suffering heavy losses. During the day an attack, directed on Gen. Wilcox's division of the 9th corps, was met and repulsed.

The following despatches from Mr. Stanton, the Secretary of War, relative to the preceding operations, were sent to the public press:

WASHINGTON, May 8—9 A. M.

To Gen. John A. Dix, New York:

We have no official reports from the front; but the Medical Director has notified the Surgeon General that our wounded were being sent to Washington, and will number from six to eight thousand.

The Chief Quartermaster of the army of the Potomac has made requisition for seven days' grain, and for railroad construction trains, and states that the enemy is reported to be retiring. This indicates Gen. Grant's advance, and affords an inference of material success on our part.

The enemy's strength has always been most felt in his first blows, and his efforts having failed, and our forces, not only having maintained their ground, but preparing to advance, lead to the hope of full and complete success; for when either party falls back, disorganization by straggling and desertion commence, and the enemy's loss in killed and wounded must weaken him more than we are weakened. Nothing later than my last night's despatch has been received from Gen. Butler.

A despatch from Gen. Sherman, dated at 5 o'clock P. M. yesterday, states that Gen. Thomas had occupied Tunnel Hill, where he expected a battle, and that the enemy had taken position at Buzzard Roost Pass, north of Dalton. Skirmishing had taken place, but no real fighting.

Nothing later from Gen. Banks.

You may give such publicity to the information transmitted to you as you deem proper.

It is designed to give accurate official statements of what is known to the department in this great crisis, and to withhold nothing from the public.

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 8—5 P. M.

Maj.-Gen. John A. Dix, New York:

We are yet without any official despatches from the Army of the Potomac, except those referred to this morning from the Medical Director and Chief Quartermaster, and nothing additional has been received by the Department from any other source. It is believed that no fighting took place yesterday.

A part of the wounded arrived in ambulances this morning at Rappahannock Station, and are on the way in by railroad. The Department will probably receive despatches by that train, which will arrive to-night.

A despatch from Gen. Butler, just received, and which left him yesterday, states that a demonstration had been made by his forces on the railroad between Petersburg and Richmond, and had succeeded in destroying a portion of it, so as to break the connection; that there had been some severe fighting, but that he had succeeded. He heard from a rebel deserter that Hunter was dangerously wounded, Pickett also, and Jones and Jenkins were killed.

Nothing further has been heard from Gen. Sherman.

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 9—10:45 A. M.

Maj.-Gen. John A. Dix:

We have intelligence this morning, by agents direct from the army, as late as Saturday evening, but no official reports. The general result may be estimated as a success to our arms.

The fighting on Friday was the most desperate known in modern times.

I deeply regret to say that the country will have to mourn the death of that accomplished soldier, Brig.-Gen. Wadsworth, who was struck in the forehead by a ball, at the head of his command, while leading them against one of the enemy's strongest positions. His remains are in our hands in charge of Col. Sharpe. Gen. Webb was wounded. Gen. Jones, of the rebel army, was killed.

The condition of our army is represented to be most admirable. Their cool, determined courage, has in every instance proved too much for the desperate fury of the rebels, who have been driven at all points. There has been no straggling.

At the latest accounts Hancock was pushing forward rapidly, by the left, to Spottsylvania Court House, and yesterday heavy cannonading was heard at Aquia Creek from that direction.

We have lost some prisoners. One regiment, the 7th Pennsylvania reserves, charged through an abatis of the enemy, but were unable to get back, and most of them were captured. We have also taken a large number of prisoners, supposed to be more than we lost. The wounded had not yet arrived at the point where the trains were to receive them. The Medical Director reports that a large proportion are slightly wounded. Artillery was not used on either side the last two days.

There is nothing later from Gen. Butler than the dates of my last despatch.

Gen. Sherman has heard from last night. He had been all day reconnoitring the enemy's position, and would attack to-day.

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 9—11:30 A. M.

Maj.-Gen. John A. Dix:

This Department has just received from Gen. Butler the official report of Gen. Lee of the operations of Friday. He says their loss in killed is not large, but they have many wounded. He grieves to announce that Gen. Longstreet was severely wounded, Gen. Jenkins killed, and Gen. Pegram badly wounded on Thursday, and that it is supposed that Gen. Stafford will recover. He thanks a merciful God that every ad-

vance on their (Gen. Grant's) part has been repulsed. He states that our forces attacked them and caused some confusion. Gen. Wadsworth's body fell into their hands; but our reports this morning state that it is now in our possession, under charge of Col. Sharpe, as stated in my first despatch this morning.

The belief here is that Lieut.-Gen. Grant is achieving a complete victory.

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 9—4 P. M.

Maj.-Gen. John A. Dix:

Despatches have just reached here direct from Gen. Grant. They are not fully deciphered yet, but he is "on to Richmond." We have taken two thousand prisoners.

EDWIN M. STANTON, Secretary of War.

The last official despatch.

WASHINGTON, May 9—4 P. M.

A bearer of despatches from Gen. Meade's headquarters has just reached here. He states that Lee's army commenced falling back on the night of Friday. Our army commenced the pursuit on Saturday.

The rebels were in full retreat for Richmond by the direct road.

Hancock passed through Spottsylvania Court House at daylight yesterday.

Our headquarters at noon yesterday were twenty miles south of the battle field.

We occupy Fredericksburg. The 32d New York cavalry occupied that place at eight o'clock last night.

The depot for our wounded is established at Fredericksburg.

EDWIN M. STANTON, Secretary of War.

The President, on the 9th, also issued the following proclamation:

EXECUTIVE MANSION, WASHINGTON, May 9, 1864.

To the Friends of Union and Liberty:

Enough is known of the army operations within the last five days to claim our especial gratitude to God. While what remains undone demands our most sincere prayers to and reliance upon Him (without whom all human effort is vain), I recommend that all patriots, at their homes, in their places of public worship, and wherever they may be, unite in common thanksgiving and prayer to Almighty God.

ABRAHAM LINCOLN.

The excitement produced throughout the North by these despatches was very great. Washington also was almost wild with enthusiasm over what was regarded as a great victory achieved by the Army of the Potomac over the army under Gen. Lee. In the evening the feelings of the people found vent in a congratulatory visit to the President, which is thus reported:

"A procession was formed in front of Willard's Hotel about half-past eight this evening, headed by the band of the 27th Michigan regiment, and proceeded to the White House. After several patriotic airs had been performed by the band, in response to the cheers and calls of the multitude assembled, the President came forward, and was introduced to the people by Senator Foster, of Connecticut.

"He returned his thanks for the compliment paid him, and said that we had won a great victory, for which we should return thanks to the Almighty, who had smiled upon and blessed our efforts, and also to Gen. Grant and his brave officers and soldiers, to whose heroism and sacrifices we were indebted, under Provi-

dence, for this triumph. We had won a great victory, but we must not be prematurely sanguine, for although much had been done, there was a great deal of work yet to do before the rebellion could be suppressed and the Union restored. There was one thing which he desired to say to them, and that was, that while Gen. Grant had met with stubborn resistance, he had not been forced back in the slightest degree from the line upon which he had started, and was now moving forward upon the line which he had marked out before the movement commenced. He had every confidence in Gen. Grant, and believed that he would accomplish the great work which he had yet to do.

"Enthusiastic cheers were given for the President, Gen. Grant, Gen. Meade, and our brave armies, after which the crowd retired in a quiet and orderly manner."

The thanksgiving recommended by the President was very generally observed by the churches on the following Sunday. As an instance, the rector of Trinity Church, New York, issued the following:

TRINITY RECTORY, May 12, 1864.

The reverend the clergy of this parish are requested, on the approaching feast of Whitsunday, to offer solemn thanksgivings to Almighty God for the answer to the prayers of his people, and for the great mercies extended to this nation by His Divine Providence during the past week. The form of thanksgiving set forth and authorized by the Bishop of this diocese will be used immediately after the general thanksgiving, at each service during the day.

MORGAN DIX, Rector of Trinity Church.

The following is a report of the manner of observance:

After the usual initial exercises had been gone through, the prayer for victories, to be found in the prayers at sea in the Episcopal book of common prayer, was read.

Dr. Vinton then ascended the pulpit and preached the sermon, taking his text from St. John, seventh chapter and thirty-ninth verse:—"The Holy Ghost is not yet." The preacher only briefly alluded to our victories in the course of his discourse. He said that the day of Pentecost had again dawned on the world; but the anniversary of the Christian year came that day, not ushered in like the fast days of the world formerly, but with the booming of cannon and hurrahs echoing in the air, and the rejoicing which all the people of this land were now expressing for their victories.

The rest of the preacher's discourse was strictly confined to remarks on the coming of the Holy Ghost, and in conclusion he said we should now especially give God thanks for all the favors we have received at His hands.

The despatches of the Secretary were continued as follows:

WASHINGTON, May 10, 1864.

To Major-Gen. Dix:

Despatches have been received this evening from Maj.-Gen. Grant, dated at one o'clock yesterday.

The enemy have made a stand at Spottsylvania Court House. There had been some hard fighting; but no general battle had taken place there.

I deeply regret to announce that Maj.-Gen. Sedgwick was killed in yesterday's engagement at Spottsylvania, being struck by a ball from a sharpshooter. His remains are at Fredericksburg, and are expected

here to-night. [A ball entered his eye and passed through his head, killing him instantly.]

The army is represented to be in excellent condition, and with ample supplies.

Gen. Robinson and Gen. Morris are wounded. No other casualties to general officers are reported.

Gen. H. G. Wright has been placed in command of Sedgwick's corps.

Gen. Grant did not design to renew the attack to-day, being engaged in replenishing from the supply train, so as to advance without it.

EDWIN M. STANTON, Secretary of War.

On Tuesday morning, the 10th, Gen. Grant's forces occupied substantially the same position as on the previous day. His line stretched about six miles on the northerly bank of the Po, and took the general form of a crescent, the wings being thrown forward. The 2d corps, across the Po, now held a line on the right, nearly parallel to the road from Shady Grove Church to the Court House. The 5th corps held the centre, being on the east side of the Po, and the 6th corps held the left, facing toward the Court House. Further on the left was the 9th corps, under Gen. Burnside. Several batteries covered the right and others the left centre. In front was a dense forest. The enemy held Spottsylvania and the region north of the Court House. His left rested on Gladly Run, sweeping northward and sheltered by strong works long before made in anticipation of this emergency. His right curved in a similar direction, and rested on the Ny River, and his centre, a little thrown forward from the right and left centres, was posted on commanding ground. His position was well supported by breastworks, and along the centre was the forest and underbrush, lining a marsh partially drained by the run. The conflict opened in the morning by a terrific fire of artillery, which was incessant during all the forenoon. A most vigorous and gallant attack was then made by the 5th corps, and by Gens. Gibbons' and Birney's divisions of the 2d corps, on the centre of Gen. Lee's army. The losses of Gen. Grant were most severe in the repeated charges by which the enemy was driven to his rifle-pits. Brig.-Gen. Rice, commanding the 2d brigade of the 4th division of the 5th corps, was killed at this time. In the mean time the enemy had attacked and turned Gen. Barlow's division of the 2d corps, on the right; but it was finally extricated without great loss. Toward the close of the day a most energetic assault was made along the whole line, in which the enemy's works were scaled, and more than a thousand prisoners taken, with several guns, by Gen. Upton's 1st brigade of Gen. Wright's 1st division of the 6th corps, which was in the advance of this onset. His position being too far in advance of the residue of the army to be held, he was compelled to fall back with the prisoners which he had taken. The Federal losses throughout the day were estimated to exceed ten thousand; and the total loss thus far, thirty-five thousand. The enemy's loss was supposed to be equally severe.

The following despatches from the Secretary

of War, relative to this contest at Spottsylvania, were published:

WASHINGTON, May 11, 1864.

Maj.-Gen. John A. Dix:

Despatches from the Army of the Potomac have just reached here, bearing dates to 5 o'clock P. M. yesterday.

Both armies at that time held their positions at Spottsylvania Court House, without any material change. The enemy had been driven to their breastworks.

The 6th corps, under Gen. Wright, had carried the first line of the enemy's rifle pits.

There had been heavy skirmishing during the day.

Our wounded had reached Fredericksburg, and during the night some were brought up to Washington.

The Surgeon General reports that ample supplies of nurses, surgeons, and medical stores have gone forward.

There has been nothing heard from Gen. Sherman or Gen. Butler since my last despatch of yesterday.

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 11—11:30 P. M.

Maj.-Gen. John A. Dix:

Despatches from Gen. Grant, dated at 8 o'clock this morning, have just reached this department. He says:

"We have now ended the sixth day of very hard fighting. The result to this time is much in our favor. Our losses have been heavy as well as those of the enemy. I think the loss of the enemy must be greater. We have taken over five thousand prisoners in battle, while he has taken from us but few except stragglers.

"I propose to fight it out on this line, if it takes all summer."

The Government is sparing no pains to support him.

EDWIN M. STANTON, Secretary of War.

The following despatch of Gen. Lee was sent to Richmond:

SPOTTSVYLANDIA COURT HOUSE, VIA GURNEY'S, }
May 10, 1864. }

The Honorable Secretary of War:

Gen. Grant's army is intrenched near this place, on both sides of the Brock road. Frequent skirmishing occurred yesterday and to-day, each army endeavoring to discover the position of the other. To-day the enemy shelled our lines and made several assaults with infantry against different points, particularly on our left, held by Gen. R. H. Anderson. The last, which occurred after sunset, was the most obstinate, some of the enemy leaping over the breastworks. They were easily repulsed, except in front of Gen. Doles' brigade, where they drove our men from their position, and from a four-gun battery there posted. The men were soon rallied, and by dark our line was reestablished and the battery recovered.

A large body of the enemy moved around our left on the evening of the 9th, and took possession of the road about midway between Shady Grove Church and the Court House. Gen. Early, with a part of Hill's corps, drove them back this evening, taking one gun and a few prisoners.

Thanks to a merciful Providence, our casualties have been small.

Among the wounded are Brig.-Gens. Hayes and H. E. Walker.

R. E. LEE.

On the next day, Wednesday, the 11th, the position of the two armies was nearly the same as on the previous day. The enemy still held and covered the town with a crescent-shaped line. Their centre was very strong and posted securely, with rifle-pits in front and the strip of forest covering it, well guarded with lines of skirmishers. During the morning there was a brisk skirmishing, which died away at noon.

Some reconnoitring movements were made, and the enemy, apprehending an attack on their left, moved artillery from their right to left, toward the point threatened. During the afternoon rain fell for the first time since the army moved. It was determined during the day to make an assault early the next morning on the enemy's left, where their batteries were so strongly posted as to annoy Gen. Grant's lines. The 2d corps was selected to make this movement. Soon after midnight, in the darkness and storm, Gen. Hancock changed the position of his corps from the extreme right to the left, filling up the space between Gens. Wright and Burnside. It was then near ground well commanded by the enemy, and requiring a quick advance in the morning.

On Thursday the 12th, at the dawn of day, veiled by the twilight and by a dense fog, the 2d corps moved up to the enemy's lines. Gen. Barlow's 1st division and Gen. Birney's 3d division formed the first line; Gen. Gibbon's 2d division and Gen. Mott's 4th formed the second line. The advance of Gen. Barlow marched in column of battalions doubled on the centre. As the corps moved over the rugged and woody space intervening the excitement increased, until it broke out in a rush at the hostile intrenchments. These the corps leaped, with loud cheers, and dashed among the astonished enemy, compelling their surrender in mass. An entire division was surrounded, and officers and men captured. Three thousand prisoners and two generals—Maj.-Gen. Edward Johnson and Brig.-Gen. G. H. Stewart—were taken. So complete was the surprise that the hostile officers were taken at their breakfast, and within an hour after the start of the corps Gen. Hancock reported as follows: "I have captured from thirty to forty guns. I have finished up Johnson, and am now going into Early." The second line of rifle-pits was immediately stormed, and after a stubborn resistance wrested from the enemy. A heavy cannonade then commenced all along the line, to which the enemy replied with the utmost spirit. The whole line now pressed up to support the 2d corps. The 9th corps rushed in on the extreme left, converging toward the penetrated space, and joined its right to the left of the 2d corps. The 6th corps advanced against Gen. Ewell's left, and on the extreme right Gen. Warren's corps became hotly engaged. About 9 o'clock the enemy began to charge desperately upon the 2d and 9th corps, to recover the lost works. For three hours a bloody fight continued. At noon, however, they abandoned for a time the attempt to retake the position so obstinately held. But the further advance of Gen. Hancock had been successfully checked. Most of the captured cannon were covered by the guns of the sharpshooters, and neither party were able to bring them off. Meantime the right and centre had charged the enemy's position with great intrepidity, but without success, his position being found impregnable. Every ave-

nue of approach was swept by a most destructive fire of artillery, and his force was strong enough to hold the position against twice the attacking numbers.

Gen. Meade now sought to turn the enemy's right; and after a temporary lull in the afternoon, began to crowd his troops down toward the left, still keeping up his artillery and infantry fire. The rain began to fall at noon, but the carnage went on until night. The enemy finding that the Federal right had been merely holding him in front from reinforcing his right, and had now abandoned his front, also concentrated on his right. Every inch of ground was fought over with desperation. The dead and wounded lay thickly strewn along the ground, and heaped up where the fight was hottest. After fourteen hours, night fell on one of the severest contests of the war. The movement of Gen. Hancock in the morning was the first decided success of the campaign, having secured an advance of a mile in the line at that point. About three thousand prisoners were reported to be captured. The loss in killed and wounded was estimated at ten thousand, and that of the enemy was supposed to be equally severe. The artillery which had been captured remained on disputed ground, and was subsequently withdrawn by the enemy.

On Friday the 13th it was soon apparent that the enemy had withdrawn his main force on the left, by falling back to a new defensive position. The storm increased, and rendered the roads very heavy. Skirmishing and artillery firing were kept up by small bodies of the troops during the day. At noon Gen. Meade issued the following address to his army:

HEADQUARTERS ARMY OF THE POTOMAC, }
May 13, 1864.

SOLDIERS! The moment has arrived when your commanding officer feels authorized to address you in terms of congratulation.

For eight days and nights, without almost any intermission, through rain and sunshine you have been fighting a desperate foe in positions naturally strong, and rendered doubly so by intrenchments.

You have compelled him to abandon his fortifications on the Rapidan, to retire and to attempt to stop your progress, and now he has abandoned the last intrenched position, so tenaciously held, suffering in all a loss of eighteen guns, twenty-two colors, eight thousand prisoners, including two general officers.

Your heroic deeds, noble endurance of fatigue and privation, will ever be memorable. Let us return thanks to God for the mercy thus shown us, and ask earnestly for its continuance.

Soldiers! Your work is not over. The enemy must be pursued, and, if possible, overcome. The courage and fortitude you have displayed render your Commanding General confident that your future efforts will result in success.

While we mourn the loss of many gallant comrades, let us remember that the enemy must have suffered equal if not greater losses.

We shall soon receive reinforcements which he cannot expect. Let us determine, then, to continue vigorously the work so well begun, and, under God's blessing, in a short time the object of our labors will be accomplished.

(Signed) GEORGE G. MEADE,
Major-Gen. Commanding.

Official: S. WILLIAMS.

On Saturday the 14th, the enemy appeared to have fallen back a little, but to be still holding the Court House tenaciously. Gen. Meade's line finally stretched nearly at right angles across the Fredericksburg and Spottsylvania road, with Gen. Hancock's corps on the right, Gen. Burnside's 9th on the right centre, Gen. Wright's 6th on the left centre, and Gen. Warren's 5th on the left. The position of the enemy seemed to be a semicircular line of earth-works with rifle-pits here and there, well established on commanding heights, and the whole flanked right and left by dense woods. A part of the works appeared to be soddied, showing an old construction, and great activity was manifest in strengthening the position. Gen. Grant's forces soon commenced to throw up military works, and both armies were diligently at work with the spade. On the extreme left there was considerable fighting. In the afternoon Gen. Meade narrowly escaped capture or injury, being in a house near which the enemy made a sudden and unlooked-for charge.

On this day Gen. Lee issued the following address to his army:

General Order No. 41.

HEADQUARTERS ARMY OF NORTHERN VA., May 14, 1864.

1. The General Commanding takes great pleasure in announcing to the army the series of successes that, by the favor of God, have recently been achieved by our arms.

2. A part of the enemy's force threatening the Valley of Virginia, has been routed by Gen. Imboden and driven back to the Potomac, with the loss of their train and a number of prisoners.

3. Another body of the enemy under Gen. Averill, penetrated to the Virginia and Tennessee Railroad, at Dublin depot. A portion of his force has been dispersed by Gens. Morgan and W. E. Jones, who are in pursuit of the remainder.

4. The army of Gen. Banks sustained a severe defeat in Western Louisiana by the forces of Gen. Kirby Smith, and retreated to Alexandria, losing several thousand prisoners, thirty-five pieces of artillery, and a large number of wagons. Some of the most formidable gunboats that accompanied the expedition were destroyed to save them from capture.

5. The expedition of Gen. Steele into Western Arkansas has ended in a complete disaster. Northern journals of the 10th inst. announce his surrender, with an army of nine thousand men, to Gen. Price.

6. The cavalry force sent by Gen. Grant to attack Richmond has been repulsed, and retired toward the Peninsula. Every demonstration of the enemy south of James River has, up to this time, been successfully repelled.

7. The heroic valor of this army, with the blessing of Almighty God, has thus far checked the principal army of the enemy, and inflicted upon it heavy losses. The eyes and hearts of your countrymen are turned to you in confidence, and their prayers attend you in your gallant struggle. Encouraged by the success that has been vouchsafed to us, and stimulated by the great interests that depend upon the issue, let every man resolve to endure all and brave all, until, by the assistance of a just and merciful God, the enemy shall be driven back and peace secured to our country. Continue to emulate the valor of your comrades who have fallen, and remember that it depends upon you whether they shall have died in vain. It is in your power, under God, to defeat the last great effort of the enemy, establish the independence of your native land, and earn the lasting love and gratitude of your countrymen, and the admiration of mankind.

R. E. LEE, General.

The following despatches were sent by the Secretary of War:

WASHINGTON, May 12—2:30 P. M.

To Major-General John A. Dix:

A despatch from Lieut.-Gen. Grant has just been received, dated near Spottsylvania Court House, May 12, 6:30 P. M. It is as follows:

"The eighth day of battle closes leaving between three and four thousand prisoners in our hands for the day's work, including two general officers and over thirty pieces of artillery. The enemy are obstinate, and seem to have found the last ditch. We have lost no organization, not even a company, while we have destroyed and captured one division (Johnson's), one brigade (Dobbs'), and one regiment entire of the enemy."

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 12—6:30 P. M.

Major-General Dix:

The following despatch from Mr. Dana has just reached this department.

EDWIN M. STANTON, Secretary of War.

SPOTTSVILANIA COURT HOUSE, VA., May 12—8 A. M.

Hon. E. M. Stanton, Secretary of War:

Lee abandoned his position during the night, whether to occupy a new position in the vicinity or to make a thorough retreat is not determined.

One division of Wright's and another of Hancock's are engaged in settling this question, and at half-past 7 A. M. had come up on his rear guard. Though our army is greatly fatigued from the enormous efforts of yesterday, the news of Lee's departure inspires the men with fresh energy.

The whole force will soon be in motion; but the heavy rains of the last thirty-six hours render the roads very difficult for wagons and artillery.

The proportion of severely wounded is greater than on either of the previous days' fighting. This was owing to the great use made of artillery.

WASHINGTON, May 12—6:55 P. M.

Major-General Dix, New York:

The Acting Surgeon General reports that of five hundred patients from the recent battle-field admitted into the Harwood Hospital, not one will require any surgical operation, and that, in his opinion, two-thirds of the whole number of wounded will be fit for service in thirty days.

Reinforcements are going forward to the Army of the Potomac.

EDWIN M. STANTON, Secretary of War.

WASHINGTON, May 15—9 A. M.

To Major-General Dix:

An official despatch from the battle field at Spottsylvania yesterday morning, at half-past 6, states that during the preceding night (Friday) a movement was made by the 5th and 6th corps to our left, and an attack was to have been made at daylight, but no sound of battle had been heard from that quarter. This manoeuvre, it is said, if successful, would place our forces in Lee's rear, and compel him to retreat toward Lynchburg.

No cannon nor any sound of battle was heard yesterday at Belle Plain or Fredericksburg, which affords ground for inference that Lee had retreated during Friday night, and before the advance of the 5th and 6th corps.

Nothing later than half-past 6 A. M. of yesterday has been received from the army by the department. All the wounded that had reached Belle Plain yesterday evening have arrived here.

The surgical report from the headquarters of the army states that the condition of the supplies is satisfactory, and the wounded are doing well. The medical director at Belle Plain reports that every thing at that point is satisfactory. The surgical arrangements have never been so complete as now.

Gen. Sheridan's command had reached the left bank of Turkey Island at 8 o'clock yesterday after-

noon, and have formed their junction with the forces of Gen. Butler.

EDWIN M. STANTON, Secretary of War.

On the 15th, 16th, and 17th, offensive operations were suspended. The roads had been made impassable by the rains. On the 18th, the Secretary of War telegraphed as follows:

WASHINGTON, May 18—11:15 A. M.

Major-General Dix:

We have no reports of operations since my last despatch. The latest information from Gen. Grant was that the roads had greatly improved. Large reinforcements had reached him, and he designed to move against the enemy without delay.

It is the design of the Government to keep up the national forces until the rebellion is overthrown; and, in order to provide against any inopportune reduction, when the services of the hundred days' men go out, a draft to fill up their place, and all other reductions, will be ordered, to take place on the 1st of July, by which time the new enrolments will be completed. No order is yet issued.

EDWIN M. STANTON, Secretary of War.

It was at first supposed that the wounded in these terrible battles would be sent to Rappahannock Station, and thence by railroad to Washington. But the guerrillas of the enemy were so numerous in the rear of Gen. Grant's army as to prevent this arrangement. The trains were therefore withdrawn to Washington. At first hospitals were established on the field. But on Friday the 6th a number of slightly wounded men, who had been ordered to the rear, made their way to Fredericksburg under an escort of fourteen armed men. On entering the town, they were fired on by the citizens with such arms as could be obtained. They, however, succeeded in passing out and proceeded to Aquia Creek, where they were taken up by a gunboat and carried to Washington. Fredericksburg was occupied by a force of Gen. Grant, and hospitals established. Surgeons and nurses were immediately sent forward from Washington, Philadelphia, Harrisburg, Trenton, New York, and Albany, and other cities, to render assistance. The vessels in the employment of the Sanitary Commission were loaded with hospital supplies, and despatched with relief agents and nurses. The most severely wounded were retained at the hospitals in Fredericksburg, but others were transported to the Government hospitals in the northern cities. The Christian Commission had a large number of persons, with stores at hand to afford relief. The Government also did every thing in its power to succor the wounded. The losses by the battles of the first eight days were variously estimated. The following is a statement which does not include the 9th corps:

	<i>Killed.</i>	<i>Wounded.</i>	<i>Missing.</i>	<i>Total.</i>
Second corps.....	1,100	7,000	1,400	9,500
Fifth corps.....	1,200	7,500	1,800	10,000
Sixth corps.....	1,000	6,000	1,300	8,300
Total.....	3,300	20,500	4,500	27,700

If the losses in the 9th corps are added to the above, and supposed to be in the same proportion, the entire loss will reach thirty-five thousand men.

On the 14th the first detachment of the hundred days' volunteers reached Washington. Many of them were sent into the army under Gen. Grant before their term of service expired.

On the previous day, the 18th, the Government made a requisition on the Governor of Maryland for the immediate services of two thousand militia for one hundred days. The Governor immediately issued a call for that number to relieve the regular troops on duty in that State. At the same time the Governor of Kentucky issued the following call for troops:

FRANKFORT, KY., May 18, 1864.

Kentuckians! to the rescue! I want ten thousand six months' troops at once. Do not hesitate to come. I will lead you. Let us help to finish this war and save our Government.

THOMAS E. BRAMLETTE,
Governor of Kentucky.

The number of troops in the Army of the Potomac, when it crossed the Rapidan, has been variously stated at 120,000 and 150,000. The army consisted of four corps, each of which, with full ranks, would have numbered about forty thousand men. The ranks, however, were not full. No official statement of the numbers has been made. But there were various coöperating movements in which large forces were engaged. Gen. Butler moved up the Peninsula with a force between forty and fifty thousand strong, to cut the southern communications with Richmond. Another force, about fifteen thousand strong, moved up the Shenandoah Valley, under Gen. Sigel, and from Western Virginia under other commanders, for the purpose of cutting the railroads running from the west and southwest to Richmond. It evidently must have been the opinion of Gen. Grant that the army of Gen. Meade would have been sufficient to cope with the forces of Gen. Lee. But, to secure ample provision for that object, the corps of Gen. Burnside was added as a reserve against all contingencies. After the first day's encounter, it was found necessary to order up this reserve in haste, and in the subsequent battles every brigade was fully employed as a part of the ordinary force. The subsequent and immense reinforcement required by Gen. Grant, after the battles at Spottsylvania Court House, served to show the unexpected great strength of the enemy in the field.

Several coöperating movements were in progress during the advance thus far of Gen. Grant. On Monday the 9th of May, the cavalry force connected with Gen. Grant's army commenced an advance to cut the communications between Gen. Lee's army and Richmond. At daylight the march began, with Gen. Merritt's 1st division in advance, Gen. Wilson's 8d division in the centre, and Gen. Gregg's 2d division in the rear. The movement was first toward Fredericksburg. At a distance of three miles from that city the column turned to the right and passed round the right flank of the enemy to the south of Spottsylvania Court House, on the road to Childsburgh, at which place a halt was made. Moving thence on the same road south-

erly and westerly, they forded the North Anna River at Anderson's bridge, two miles below Beaver Dam, about dusk. Gen. Ouster's brigade took possession of the railroad station, and captured a train of cars having on board three hundred and seventy-eight Union wounded and prisoners on their way to Richmond. These prisoners had been captured by the enemy during the late operations. The trains of cars, with the depot of supplies, were quickly set on fire, and two locomotives, three long trains, and a large quantity of bacon, meal, flour, and other supplies for Gen. Lee's army, were destroyed. The ties and bridges were burned, and the rails twisted so as to become useless. Meantime the enemy came up and attacked the flank and rear of the column, and captured many prisoners of the 6th Ohio. At night the column bivouacked on both sides of the North Anna.

Early on the next morning the enemy began to shell the camp, and the column moved south, the advance being annoyed by the enemy as it proceeded. The South Anna was crossed at Ground Squirrel bridge, and the bridge destroyed. The bivouac at night was near Goodall's, but the sharpshooters of the enemy caused some annoyance. Early on the next morning, the 11th, the 1st brigade of the 2d division under Gen. Davies was sent seven miles east to Ashland, on the Richmond and Fredericksburg Railroad. There the depot was burned and a considerable quantity of stores destroyed; also six miles of railroad, three culverts, two trestle bridges, several Government buildings, a locomotive, and three trains of cars. On the return the force was fired upon from the houses, and about thirty men were left in the enemy's hands. In the mean time the column had advanced and destroyed the track on the same road at Glen Allen station. The nearer it approached Richmond, the more opposition was made to its progress. At Yellow Tavern the cavalry of the enemy, concentrated under Gen. Stuart, made an attack on the advance under Gen. Devin. A sharp contest ensued, during which the brigades of Gens. Ouster, and Gill, and Wilson came to his support, and the enemy were driven toward Ashland. Advancing still further toward Richmond, the picket defences were entered, and in a charge by Gen. Ouster's brigade a hundred prisoners and a section of artillery were captured. In the conflict Gen. J. E. B. Stuart and Col. Pate, of the enemy, were fatally wounded. On the next morning the column turned toward Meadow Bridge, on the Chickahominy. It had been destroyed, but was rebuilt under a galling fire from the enemy, and crossed. The column next reached Mechanicsville and Coal Harbor, and encamped toward night at Gaines's Mill. On the next day the march was pursued by the way of Bottom bridge to Turkey Bend, where supplies were obtained from Gen. Butler.

Two movements were made by the forces in the Shenandoah valley and Western Virginia, which were designed to act against Lynchburg.

The first, in May, miscarried, and the plan was afterwards altered. It was determined to carry it into effect in June. According to the original plan, at the time when Gen. Grant crossed the Rapidan, May 4th, Gen. Sigel was in motion upon Staunton, Gen. Crook upon Dublin depot, and Gen. Averill upon Wytheville, with the design, after destroying that town and the lead mines, to unite with Gen. Crook at Dublin depot, for a march toward Lynchburg in connection with Gen. Sigel. A movement by the Big Sandy, under Gen. Burbridge, upon Abingdon, and to prevent the advance of the enemy from the southwest, was not ready. The enemy, upon the advance of Gen. Sigel, ordered Gen. Breckinridge to move in haste further east, with all the troops he could collect, to oppose him, thus leaving Gens. Jenkins and McCausland, with a scattered force of fifteen hundred men, to resist Gen. Crook. Further to the southwest, on the line of the Lynchburg and Tennessee Railroad, the enemy happened to have a larger force than anywhere else on that route. Gen. W. E. Jones, in command, at once despatched Gen. Morgan further east. By making a forced march from Saltville, he arrived at Wytheville in advance of Gen. Averill. The latter, with a cavalry force of two thousand men, left camp at Charleston, Va., on May 1st, with three days' rations and two days' forage, and moved day and night over mountain paths until the evening of the 8th, when a cavalry force of the enemy was encountered near Jeffersonville, Va. This force was repelled, and a detour made by way of Princeton. On the 9th Gen. Averill left Tazewell Court House for Wytheville, in order to cut the railroad thirty miles lower down than it was to be cut by Gen. Crook. Cove Mountain Gap, near Wytheville, was reached on the 10th, and the enemy found to be in possession of the latter place. A conflict ensued, which, it is asserted by the enemy, resulted in the defeat of Gen. Averill, with a heavy loss in killed, wounded, prisoners, and horses, and prevented his reaching Dublin station and forming a junction with Gen. Crook before the latter had retired from that place. The following is Gen. Averill's address to his command, made some days later:

HEADQUARTERS CAVALRY DEPARTMENT, }
WEST VIRGINIA, Monday, May 22, 1864. }

General Order No. 5:

The Brigadier-General commanding Cavalry Division, desires to express his sincere thanks to the officers and men of the division, for the uncomplaining fortitude with which they have endured the terrible vicissitudes incident to their recent march of three hundred and fifty miles, over mountains without roads, and the unwavering courage with which they attacked and held a superior force of the enemy near Wytheville, on the 10th, thereby enabling another command to accomplish its purposes without the opposition of overwhelming numbers. Your country will remember your heroism with gratitude; and the noble sacrifices and sufferings of our fallen comrades will be cherished forever in our memories. The 14th Pennsylvania and 1st Virginia cavalry first received the shock of battle, while the 2d and 3d Vir

ginia cavalry and 34th Ohio infantry established a line which the enemy had reason to respect and remember. Great credit is due to the brigade commanders, Brig.-Gen. Duffie and Col. Schoonmaker, for the energy and skill they displayed. While the conduct of all was admirable and deserving the praise of the Brigadier-General commanding, he desires, without making invidious distinction, to express his high appreciation of the steady and skilful evolutions of the 2d Virginia cavalry, under Col. Powell, upon the field of battle. It was a dress parade, which continued without disorder, under a heavy fire, during four hours.

The purposes of the enemy were foiled by the engagement. The railroad was reached and destroyed, New River crossed, and the baffled columns of the enemy arrived in time to witness the destruction which all the energies of their superior force, even with artillery, failed to prevent.

(Signed)

W. W. AVERILL,

Brigadier-General Commanding.

WILL RUMSEY, A. A. G.

Gen. Crook moved from Charleston, Va., at the same time with Gen. Averill. His object was to strike the Virginia and Tennessee Railroad at Dublin Station. His force consisted of the 23d, 34th, and 36th Ohio, forming the first brigade; the 12th, 91st Ohio, 9th and 14th Virginia, forming the second brigade; the 8d and 4th Pennsylvania Reserves, 11th and 15th Virginia, forming the 3d brigade. He proceeded without opposition nearly to Princeton, where two companies of the enemy, one of cavalry and one of infantry, were encountered and driven off. Near the southwestern base of *Cloyd's* Mountain, about four miles from Dublin depot, a more considerable force of the enemy was found. These were under the command of Gen. Jenkins. When he was killed, Gen. McCausland took the command.

After some skirmishing and manœuvring for a position, the enemy were attacked in front and flank and driven through Dublin to New River bridge. The Union loss was one hundred and twenty-six killed and five hundred and eighty-five wounded; and that of the enemy was severe, but unknown. On the next day an attack was made on the enemy's position near the bridge, and it was destroyed. The expedition proceeded as far as Newberne, on the Virginia and Tennessee Railroad, ninety-nine miles from Bristol, destroying the railroad for some distance. The resistance of the enemy, with the approach of a strong force under Gen. Morgan, caused Gen. Crook to abandon the design of the expedition against Lynchburg and withdraw to Meadow Bluff, in Greenbrier County.

The force in the Shenandoah valley, numbering about fifteen thousand men, was placed under the command of Gen. Sigel. He advanced to the vicinity of New Market, about fifty miles from Winchester, on the west side of the Massanuttan range of mountains, and nearly midway between Mount Jackson and Harrisonburg. His command was designed to cooperate with Gen. Grant, as before mentioned, up the Shenandoah valley, and occupy Gordonsville and Lynchburg, and thus destroy the western com-

munication of Gen. Lee's army, and aid to isolate Richmond.

On the 18th of May Gen. Sigel's advance encountered the advance of Gen. Breckinridge. Some skirmishing ensued, which was renewed on the next day, and also on Sunday. Gen. Sigel, however, continued to advance, and brought a part of his forces into position, one division still being in the rear. About 3 P. M. the enemy moved to attack. A hot contest ensued, which resulted in the defeat of Gen. Sigel, with a loss of a thousand stand of small arms, six pieces of artillery, and seven hundred men. The loss of the enemy was also large. Gen. Sigel fell back in disorder, abandoning his hospitals, and destroying a portion of his train, and retreated to Cedar Creek, near Strasburg. The enemy failed to pursue in force. These results to Gen. Averill, Crook, and Sigel, caused a suspension of that part of the plan of Gen. Grant which consisted in destroying the Virginia and Tennessee Railroad, and the occupation of Lynchburg.

The next important movement in cooperation with Gen. Grant, was made on the southeast side of Richmond, from Fortress Monroe up the James River. The 18th corps, under Maj.-Gen. M. F. Smith, and the 10th corps, under Maj.-Gen. Q. A. Gilmore, composed the military force of the movement, under the command of Maj.-Gen. B. F. Butler. These forces were concentrated at Yorktown and Gloucester as if designed for a movement up the York River. At the same time a brigade under Col. S. F. Alford, 8d New York, landed at West Point, up the York River, and commenced building the wharves, &c. On the 4th of May orders to move were issued, and the troops embarked on board the transports. After dark on the 5th, the vessels began to move down the York River, and up the James River, preceded by three army gunboats under command of Brig.-Gen. Graham; by the double-enders Eutaw, Mackinaw, and Osceola; four monitors, the Tecumseh, Canonicus, Saugus, Onondaga, and the iron-clad Atlanta, and by the smaller gunboats Commodore Morris, Hunchback, Commodore Jones, Dawn, Delaware, Putnam, and Sheshonee.

As the fleet proceeded up the James River, a regiment of negro troops, under Gen. Wild, were landed at Wilson's Wharf, on the north bank, below Charles City Court House. This was done for the purpose of preventing the interruption of water communication. At Fort Powhatan Landing, a little above on the south bank of the river, two regiments of the same brigade were landed for the same object. At City Point, the division of Gen. Hinks, with some other troops, and a battery were landed. At this place the flag of truce boat was lying with four hundred and fifty prisoners brought up on the previous day for exchange. The remainder of the force proceeded up the river, and landed on the south bank at Bermuda Hundred, which is three or four miles above

the mouth of the Appomattox River. Immediately upon landing, the troops intrenched themselves, with the gunboats covering their flank on the water. On the same day, Gen. Butler sent the following despatch relative to his proceedings to Gen. Grant:

OFF CITY POINT, VA., May 5, 1864.

Lieutenant-General Grant, Commanding Armies of the United States, Washington, D. C.:

We have seized Wilson's Wharf Landing. A brigade of Wild's colored troops are there. At Fort Powhatan Landing two regiments of the same brigade have landed. At City Point Hinks' division, with the remaining troops and battery, have landed. The remainder of both the 18th and 10th army corps are being landed at Bermuda Hundred, above the Appomattox.

No opposition experienced thus far. The movement was apparently a complete surprise. Both army corps left Yorktown during last night. The Monitors are all over the bar at Harrison's Landing and above City Point. The operations of the fleet have been conducted to-day with energy and success. Gens. Smith and Gilmore are pushing the landing of the men. Gen. Graham, with the army gunboats, led the advance during the night, capturing the signal station of the rebels.

Col. West, with eighteen hundred cavalry, made several demonstrations from Williamsburg yesterday morning. Gen. Kautz left Suffolk this morning, with his cavalry, for the service indicated during the conference with the Lieutenant-General.

The New York flag of truce boat, was found lying at the wharf, with four hundred prisoners, whom she had not time to deliver. She went up yesterday morning.

We are landing troops during the night—a hazardous service in the face of the enemy.

BENJ. F. BUTLER, Maj.-Gen. Commanding.

A. F. PURFAX, Captain and A. D. C.

Gen. Kautz, above mentioned, left Suffolk on the 5th, and forcing a passage over the Black Water, advanced to Stony Creek, on the Weldon and Petersburg Railroad, and burned the bridge over that stream. A part of the force of Gen. Beauregard moving from Charleston to Richmond, had previously crossed over, and contested the further progress of Gen. Kautz, who then moved through Surry and Prince George counties to City Point, which he reached on the 8th.

On the 5th, also, Col. West, with two regiments of cavalry—the 1st and 2d colored—made a demonstration on Williamsburg, above Yorktown, on the Peninsula. He advanced to the Pamunkey River, stopping at the White House, and returned to Williamsburg on the next night. On the 7th he advanced over nearly the same ground again, but met with more opposition, than on his previous expedition. Subsequently his force was embarked on transports, and landed at Bermuda Hundred.

On the 6th, Gen. Butler caused reconnoissances to be made of the position of the enemy. On the 7th, an expedition consisting of five brigades under Brig.-Gen. Brooks was sent forward for the purpose of cutting the Petersburg and Richmond Railroad. When within two miles of the railroad, the cavalry advance came on the enemy in a strong position, from which they opened fire upon the mounted rifles.

The cavalry fell back to the infantry line, which deployed as skirmishers, and slowly advanced with a strong support in line of battle. The enemy were now steadily driven, with some loss to both sides, back to their main line in front of the railroad. Here a sharp contest took place, during which some of the railroad was torn up, and a railroad bridge, crossing one of the tributaries of the Appomattox, was set on fire and totally consumed. The increase of the force of the enemy finally compelled Gen. Brooks to retire, leaving some of his dead and wounded on the field, and with an estimated loss of two hundred and fifty.

At the same time when Gen. Brooks' main column started, a brigade under Gen. Heckman, with Belger's Rhode Island battery, moved out on another road, and meeting a force of the enemy, drove them back on the railroad, but were unable to penetrate far.

The Petersburg and Weldon Railroad was supposed to be an important route by which supplies were brought to Richmond. For the purpose of disabling this line more effectually, another advance was made on the 9th.

Three divisions from the 10th corps, under Gens. Terry, Ames, and Turner, and two from the 18th, under Gens. Weitzel and Wistar, moved from camp at daylight, and reached the railroad at four points without opposition. Gen. Terry's division occupied Chester station, about fourteen miles from Richmond, and destroyed the track. Gen. Turner moved on his left toward Petersburg, until he came up with Gen. Ames' division, each destroying the road. Four miles was thus finished before noon, and the column began to move toward Petersburg, the division of Gen. Weitzel leading the advance. The enemy were met near Swift Creek. A desultory skirmish began, which was continued until the line of battle was formed and pushed forward. The fire on both sides then increased, and artillery was brought into action. Gen. Ames' division formed on the left, then Gens. Weitzel's, Turner, and Terry in the order named. The enemy were steadily driven back, with considerable loss on both sides. At night the enemy had fallen back to their batteries across the creek, and the skirmishers confronted each other on opposite sides. During the night the enemy formed in a column, and advanced about one o'clock, either to test the strength of the pickets, and to determine if the force had been withdrawn, or to capture a battery. The pickets on their approach fell back to the main line; and as they came well up, a destructive fire of musketry was opened upon them. Three charges were thus made in the dark, and repulsed, when the enemy withdrew, leaving sixty dead on the field. In the morning they made an attack upon the right flank, for the purpose of turning it, but without success. In the afternoon a similar attack was made on the left, which was repulsed with some loss on both sides. At night the forces had returned to their original

position. The 11th was a day of quiet and rest to the army save that portion engaged in strengthening the intrenchments.

On Thursday, the 12th, a heavy force from both corps was sent out, under Gens. Gillmore and Smith, and at the same time an expedition of cavalry, under Gen. Kautz, for the purpose of cutting the railroad communication between Richmond and Danville. Leaving a sufficient force under Gen. Ames to watch the enemy at Petersburg, Gen. Gillmore advanced on the left up the railroad toward Chester station and Richmond. Gen. Smith, with the 18th corps and a division of the 10th, advanced in the same direction on the right, up the turnpike between the railroad and the James River. A little above Werbottom church the skirmishers in advance met the enemy and drove them back a mile or more. They then made a determined stand in a strong position, and a sharp engagement ensued. Finally the enemy retired slowly to a new position, where they again made a stand, and were again driven from it. The skirmishing continued until dark, when the command of Gen. Smith had advanced to Proctor's Creek, within about three miles of Fort Darling, and within sight of that work. The weather during the day was hot and sultry, and a number of cases of sunstroke occurred.

Meanwhile Gen. Gillmore moved from his position to Chester Junction, and thence up the railroad toward Richmond, reaching Chesterfield Court House, on the enemy's right, without any real opposition. Continuing his advance, and diverging still further to the right, he reached a formidable earthwork, stretching from west of the railroad across to the James River, which was strongly constructed, and well supplied with embrasures for artillery. This proved to be the outer line of defence about Fort Darling. The movement of Gen. Smith had caused the enemy to concentrate in his front, so that no heavy force appeared before Gen. Gillmore. Throwing forward the 24th Massachusetts and 10th Connecticut as skirmishers, with some sharpshooters and a battery or two in position to annoy the enemy and occupy his attention, Gen. Gillmore sent the brigade of Col. Hawley through the woods on the right, which surprised the enemy and entered the right flank of the work in the rear. The enemy made a sharp resistance, but were driven to the rear by the brigade of Col. White advancing and occupying the line. Finding their position turned by this movement, the enemy on the next morning—Saturday, the 14th—under cover of a vigorous demonstration, abandoned the whole line, and withdrew to the second, a stronger line of works, about three-fourths of a mile distant.

A despatch of Gen. Butler on the morning of the 14th says:

We are still before the base of the enemy's works at Drury's Bluff, Fort Darling. The enemy are here in force.

Gen. Gillmore, by a flank movement with a portion of his corps and a brigade of the 18th corps, assaulted and took the enemy's works on their right. It was gallantly done. The troops behaved finely. We held our lines during the night, and shall move this morning.

Two hours later he added:

Gen. Smith carried the enemy's first line on the right this morning at 8 A. M. Loss small. The enemy have retired into three square redoubts, upon which we are now bringing our artillery to bear with effect.

The redoubts into which the enemy had retired commanded the outer line of their defences, and it was necessary that Gen. Butler should obtain possession of these to enable him to secure his position. His artillery was therefore brought to bear upon them, and with the aid of the sharpshooters the enemy's guns were silenced. About 9 P. M. the enemy attempted to advance on Gen. Butler's line near the Petersburg turnpike, but after a short engagement they withdrew within their work. On the next day, at noon, they again advanced, and attacked Gen. Heckman's brigade; a contest with musketry ensued, which continued for four hours, when they withdrew within their works. On the next morning, Monday, May 16th, under cover of a thick fog, the enemy made an attack on the line of Gen. Butler. The attack was made on the right, with cavalry, artillery, and infantry. The extreme right next the James River was held by Gen. Heckman's brigade. Next the river were two squadrons of colored cavalry, then came the 9th New Jersey infantry, then the 28d Massachusetts, then the 25th and 27th Massachusetts, all of Heckman's brigade, of Weitzel's division, of Gen. Smith's corps. Gen. Gillmore's corps held the left and left centre. The line of battle was the fortifications, except on the extreme right, where they did not extend down to the river. Prominent among the batteries on the right was battery E of the 8d New York artillery, of twenty-pounder Parrotts, and the 1st Rhode Island battery. On the right, in reserve, Col. Drake's brigade of the 10th corps was temporarily posted. A narrow belt of timber screened the reserves from the view of the enemy on the right. The advance of the enemy reached the rear of the 9th New Jersey before the attack was made. Gen. Heckman finding he could not hold his position, began to fall back. The enemy, however, charged upon him in overwhelming numbers, and his force was broken and driven from the field, and he was made a prisoner. At the same time a force of the enemy moved down the turnpike, and attempted to surprise Ashby's battery of twenty-pounder Parrotts. Most of the guns were saved, but the loss was heavy in men. The Rhode Island battery also lost one gun. Having forced back the right, a heavy attack was made on the entire line of the 18th corps, with feints along the line of the 10th corps; and the entire right was forced back some distance after several hours of severe and sanguinary conflict. The loss was severe

on both sides in killed and wounded, and some prisoners were taken. After thus gaining a portion of their first line of intrenchments, the enemy massed their forces on the 10th corps to drive it back. Repeated charges were made, which were desperately resisted and driven back at all points. Finally, ceasing their efforts to force the position of the 10th corps, and leaving their dead and wounded on the field before its line, the enemy again massed on Gen. Smith's front and attacked his left. Gen. Gillmore immediately ordered Gen. Turner to attack the enemy on their flank, and also ordered Gen. Terry to support him. Gen. Turner's attack had hardly commenced, before Gen. Gillmore was ordered by Gen. Butler to retire and strengthen Gen. Smith's corps by forming in his rear. The troops fell back slowly and in order, repulsing every attempt of the enemy to quicken their movements, until they ceased to follow up and fell back to their first line of intrenchments. At half-past two o'clock the fighting, which had been going on with more or less violence along the whole line, ceased, and preparations were made by Gen. Butler to draw off his forces from the field and return to his intrenchments. The artillery was sent to the rear, except a section to cover the rear guard. The ambulances, loaded with wounded, and the supply trains, were despatched to the rear, and finally the entire army fell back. The enemy did not pursue. During the action of the morning, a brigade of the enemy attacked the force guarding the extreme left on the roads from Petersburg under Col. Dobbs, and after a sharp struggle drove him back toward Gen. Butler's intrenchments, but finally gave up the pursuit. The loss of Gen. Butler was estimated at twenty-five hundred. That of the enemy was severe, but the amount unknown.

The despatch relative to the above operations was as follows:

WAR DEPARTMENT, WASHINGTON, May 17, 9 P. M.

Major-General Dix:

Despatches from Gen. Butler, just received, report the success of his expedition under Gen. Kautz, to cut the Danville road and destroy the iron bridge across the Appomattox.

On Monday morning the enemy in force, under cover of a thick fog, made an attack upon Smith's line, and forced it back in some confusion and with considerable loss. But as soon as the fog lifted, Gen. Smith reestablished his lines, and the enemy was driven back to his original lines.

At the same time the enemy made an attack from Petersburg on Gen. Butler's forces guarding the rear, but were handsomely repulsed.

The troops having been on incessant duty for five days, three of which were in a rain storm, Gen. Butler retired leisurely within his own lines. We hold the railroad between Petersburg and Richmond.

Persons state that Bragg and Davis were present on the field.

EDWIN M. STANTON,
Secretary of War.

The cavalry expedition under Gen. Kautz returned on the 17th. On the night of the day on which he started, Gen. Kautz reached Midlothian coal-pits, where he remained an

hour. No injury was done to public property here, but a considerable amount of private property was destroyed. Thence he proceeded to Coalfield station, where he arrived between 10 and 11 o'clock. The depot building and water-tank here were destroyed, the telegraph wire torn down, and some hundred feet of the railroad track ripped up. Thence he advanced at daylight upon Powhatan station, which was reached at 8 A. M. The railroad was torn up, and the depot and water-tank destroyed. An advance was next made to destroy the iron bridge at Mattaox station. This was found to be too strongly guarded by the enemy, and the column turned to the right and reached Goode's bridge about 4 P. M. This bridge had been partly destroyed, but was repaired by Gen. Kautz, who pushed on and reached Chula station at 10 P. M. The enemy sent a locomotive from Mattaox to reconnoitre, which was captured and destroyed. On the morning of the 14th the column faced about and recrossed Goode's bridge, approaching Mattaox. Here a fight took place with the enemy, who were in a strong position, and after a loss of about thirty Gen. Kautz retired. The column now moved to the south, and crossed the Appomattox at Devil's bridge, which they were compelled to rebuild, reaching Finney Mill at 12 M. Here the 5th Pennsylvania, under command of Maj. Kleinz, was sent to the left near to Mansboro', on the road to Petersburg, to convey the impression that Gen. Kautz was about to move on that point. The march was then resumed, and, arriving within six miles of the Petersburg and Lynchburg road, Gen. Spear was sent with his brigade to destroy the road at Wilson's station, while the main column moved on to Wellville, where they arrived at about 4 P. M. After waiting patiently until 5 P. M. for a train that was due at that hour from Petersburg, but which did not come, Gen. Spear destroyed the railroad property at Wilson's, and, moving up the road, rejoined Gen. Kautz at Wellville, just as the latter had finished tearing up the track and burning the depot.

The column arrived at Black's and White's at 10 P. M., and found large supplies of forage and rations. These were dealt out with a liberal hand to the exhausted men and horses; and the track and other railroad and government property having been destroyed, the force moved a few miles further on, and bivouacked at 2 A. M.

On the 15th, at 7 A. M., the column set out for Lawrenceville, and after a long march, passing through Jonesborough and Edmonds, arrived at that place at dusk. A large amount of property was destroyed here, and large quantities of corn and bacon distributed to the men. At daylight the march was resumed with the intention of striking the Petersburg road at Hickford. Finding a strong force of the enemy at Stony Point ready to receive him, Gen. Kautz turned directly north. After marching eight or ten miles, the advance came to a stand in the centre of an immense pine forest,

at a loss how to proceed. The road to the right was followed, and Jarrett's station reached at 5 P. M. The track of the railroad was again torn up, and the troops marched to Freeman's bridge, arriving about midnight. Thence they moved to Belcher's Mills, Heart's station, and City Point.

The naval part of the forces had been chiefly employed in keeping the river open to navigation, and in removing the obstruction and torpedoes. In order to remove torpedoes, the shore near where they were placed was first shelled by the gunboats, to drive away any body of the enemy. A boat with a complement of men was then sent ashore to do the work. At the first place of landing, opposite Turkey Bend, they captured one large torpedo. The next landing was made under the bluff above which stands the mansion of Gen. Pickett, where they captured six more of the same size, making seven in all. There was great difficulty in cutting the strings of the torpedoes, as they led up the bluff, where the person exploding them is generally stationed. Great coolness and discretion had to be used in handling them. The officers waded up to their armpits in the water to get at them, which was very dangerous, as they knew not but that at any moment the string might be pulled from above and the torpedo exploded. All they had to depend upon to prevent this was the boat's crew, stationed on the bluff as sharpshooters. Each of the torpedoes contained about seventy-five pounds of powder. They were taken out of the stream, and, after considerable difficulty, successfully emptied of their contents.

On the 6th one of the smaller gunboats, Com. Jones, was destroyed by a torpedo. About fifty of the crew were killed and wounded. This was an instance of the most complete destruction by a submarine battery to which any vessel has been subjected, her annihilation being utter and instantaneous. The torpedo was fired amidships and directly under her, upraising the centre of the ship, which burst asunder as the explosion rent the air; and then, amid a cloud of smoke and steam, the body of her hull and upper works, rent into a thousand pieces, and, worst of all, numbers of her unfortunate crew, were propelled into the air, and fell like a shower of missiles from the crater of a volcano. When the smoke drifted from the scene the sunken framework and ribs of the destroyed vessel were all that remained, except innumerable splintered relics of the wreck, which covered the waters around the fatal spot. Two other boats, the Sheshonee and the Brewster, were destroyed by an explosion, not, however, of a torpedo.

The forces of Gen. Butler reached their intrenchments on Monday night, the 16th. On the next day scouts reported that two heavy columns of the enemy, with large trains, were passing down the turnpike to Petersburg. It was supposed that the trains were either carrying supplies for the moving column, or were

sent to Petersburg to be loaded with supplies for Gen. Lee's army, or the forces at Richmond. The capture or destruction of any portion of them, therefore, appeared to be desirable. Accordingly, about 9 P. M. Gen. Foster, chief of Gen. Gillmore's staff, with a body of cavalry and infantry, moved quietly out to the picket lines, and a few hundred yards beyond. There he stationed pickets on different roads to guard against an attempt to cut him off, and began to move up the road leading to the turnpike. In a moment or two he encountered the pickets of the enemy, and attempting to capture them received a heavy fire from the pickets and a force of the enemy behind them. Finding they were in too great force he made an attack on another portion of the line, but with the same result. He then returned to camp. This existence of the enemy in so large a force in his front caused Gen. Butler to make extraordinary exertions to complete other works on his defences. On the river he was covered by the gunboats under Rear-Admiral S. P. Lee.

At daylight on the 18th the enemy appeared and drove back the picket line within a few hundred yards of the breastworks. But their advance was checked after a heavy skirmish. They then commenced throwing up works directly in front of Gen. Butler's lines, either for the purpose of laying siege to his position, or to prevent him from reaching again the railroad to destroy it. On Thursday, the 19th, they put two or three light batteries in position and commenced vigorously shelling the lines. No assault was made, and their guns finally became silent during the remainder of the day. At midnight, however, they advanced in force on the pickets along nearly the entire line. The sharp fire of the pickets retarded their advance, but they crowded forward and the reserves were ordered up by Gen. Butler. A sharp fight ensued which lasted nearly an hour, when the enemy retired with considerable loss. At daylight on the 20th they began to shell the lines and camps, and to push the pickets strongly. The pickets of Gen. Ames were driven back from the rifle-pits thrown up on the picket line, and Gen. Terry's line was forced back under a heavy fire. The position thus obtained by the enemy was too important to be given up. A brigade, under Col. Howell, was therefore sent to retake the rifle-pits and establish a firm line there. This was accomplished after heavy fighting, with considerable loss on both sides. The attack was renewed again on the next day, but no advantage was gained by the enemy. Meantime the work on the fortifications of Gen. Butler was continued night and day, and all cover for the enemy's sharpshooters cleared away. Thus the failure of the expedition on the west to destroy the Virginia and Tennessee Railroad, and occupy Lynchburg, and the failure of Gen. Butler to capture and occupy Petersburg, enabled the enemy to concentrate against Gen. Grant. The forces of Gen. Breckinridge were immediately

added to the army of Gen. Lee, and Richmond was held by the troops of Gen. Beauregard, which had opposed Gen. Butler. Gen. Grant, on the other hand, proceeded to organize new expeditions against Lynchburg, putting Gen. Hunter in the place of Gen. Sigel, and pressed forward himself to capture Petersburg.

The army of Gen. Grant had remained inactive during the 16th, 17th, and 18th, before Spottsylvania. On the afternoon of the 18th the enemy in force made an effort to turn the right of Gen. Grant's line. It was held by some regiments of heavy artillery, acting as infantry, comprising the 1st Massachusetts, 15th, 2d, 6th, and a battalion of the 4th New York, all under Col. Kitchings, who fell back across an open field under cover of some woods. Repeated attempts were made by the enemy to drive them further, but without success. Subsequently a charge was made, driving the enemy back across the open field, which was held. Night put an end to the conflict. The loss of Col. Kitchings was about eleven hundred men. About four hundred of the enemy were made prisoners. On the next day Gen. Meade issued the following special order:

HEADQUARTERS, ARMY OF THE POTOMAC, May 20.

The Major-General Commanding desires to express his satisfaction with the good conduct of Tyler's division and Kitchings' brigade of heavy artillery in the affair of yesterday evening. The gallant manner in which these commands, the greater portion being for the first time under fire, met and checked the persistent attack of a corps of the enemy, led by one of his ablest generals, justifies the Commanding General in this special commendation of troops who henceforward will be relied upon, as were the tried veterans of the Second and Fifth corps, at the same time engaged.

By command of Major-General MEADE.
S. WILLIAMS, A. A. G.

The following is the despatch of the War Department:—

WAR DEPARTMENT, WASHINGTON, }
May 20—630 P. M. }

Major-General Dia :

This afternoon we have despatches dated at half-past eight this morning, from General Grant.

Last evening an effort was made by Ewell's corps to turn our right. They were promptly repulsed by Birney's and Tyler's divisions, and some of Warren's troops that were on the extreme right. About three hundred prisoners fell into our hands, besides many killed and wounded. Our loss foots up a little over six hundred wounded and one hundred and fifty killed and missing.

General Grant says that probably our killed and missing are over estimated.

Over twenty-five thousand veteran reinforcements have been forwarded to General Grant. The condition of the army and his contemplated operations are entirely satisfactory. The army is abundantly supplied.

Major-General Hunter has been placed in command of the Department of West Virginia, including the Shenandoah valley.

On the night of the 20th the troops were moving all night to new positions; and on the next morning the general headquarters were broken up, and nearly the whole army was in motion. At 12 o'clock P. M. of the 20th the cavalry left their camp in the woods near

Massaponax Church, and advanced toward Guineas' station, on the Richmond and Fredericksburg Railroad. The pickets of the enemy, firing only a few shots, withdrew before the advance until they reached Guineas' bridge on the river Ny, a short distance from the station. Here an inclination to make a stand and oppose the advance was shown. They were, however, soon driven from the bridge. At Downer's bridge another stand was made, and the position held for some time. At Bowling Green the enemy made no stand, but assembled at Milford station in considerable force. On an eminence a little to the left of the station the enemy had mounted a battery, and thrown up some rifle-pits. A battery accompanying the cavalry was put into position, and occupied the enemy whilst a flank movement to the left was made. This was executed with success, and the enemy made a hasty retreat across the Mattaponi. Six officers and sixty-six soldiers were surprised and captured. Milford station had been, until the previous day, the base for supplies to the army under Gen. Lee. But obtaining information of the contemplated movement, the enemy had removed their stores before the arrival of the cavalry.

Soon after midnight on the night of the 20th the 2d corps moved from its position on the Ny, near Spottsylvania Court House, and followed the road thus opened by the cavalry. Nothing unusual occurred during the march to Bowling Green. The corps then crossed the Mattaponi at Milford bridge, and about a mile from the river Gen. Hancock halted his column and formed a line of battle in a commanding position on the crest of a range of hills. The enemy's cavalry followed close in the rear during the march and picked up the stragglers.

At six o'clock on the morning of the 21st the 5th Corps, under Gen. Warren, left the position occupied by them and pushed on in the rear of Gen. Hancock. As the column approached the bridge across the Mattaponi at 4 P. M., it was delayed by a detachment of the enemy's cavalry posted in the woods that skirt the river on both sides of the road. They were soon driven out with a slight loss. During the day the whole army was in motion. The weather had become fine and the roads well settled. On Sunday, the 22d, the following despatch was sent from the War Department:

WAR DEPARTMENT, WASHINGTON, May 22—10 P. M.

To Major-General Dia :

On Friday evening General Grant commenced a movement for the purpose of compelling Lee to abandon his position at Spottsylvania. It has thus far progressed successfully.

Longstreet's corps started south at one o'clock Friday night, an hour and a half after Hancock moved. Ewell's corps followed Longstreet's last night.

The indications are that the rebel army has fallen back beyond the North Anna. Hoke's brigade has joined Lee.

The movement of General Grant has thus far been

accomplished without any severe engagement or serious interruption.

We now occupy Guineas' station, Milford station, and south of the Mattapony on that line. No despatches have been received to-day from General Butler.

Despatches from Kingston, Ga., state that General Sherman's forces are resting and replenishing their supplies.

EDWIN M. STANTON,
Secretary of War.

On the next morning the following additional despatch was sent from the Department:

WASHINGTON, May 22, 1864.

Major-General Dix:

We have no official reports since my last telegram from General Grant or General Butler.

Official reports of this Department show that within eight days after the great battle at Spottsylvania Court House many thousand veteran troops have been forwarded to General Grant.

The whole army has been amply supplied with full rations and subsistence.

Upwards of twenty thousand sick and wounded have been transported from the fields of battle to the Washington hospitals and placed under surgical care.

Over eight thousand prisoners have been transported from the field to prison depots, and large amounts of artillery and other implements of an active campaign brought away.

Several thousand fresh cavalry horses have been forwarded to the army, and the grand Army of the Potomac is now fully as strong in numbers, and better equipped, supplied, and furnished, than when the campaign opened.

Several thousand reinforcements have also been forwarded to other armies in the field, and ample supplies to all.

During the same time over thirty thousand volunteers for a hundred days have been mustered into the service, clothed, armed, equipped, and transported to their respective positions.

This statement is due to the chiefs of the army staff and bureaux, and their respective corps, to whom the credit belongs.

EDWIN M. STANTON, Secretary of War.

The 9th corps, under Gen. Burnside, began to move on the 21st. Early in the afternoon orders were given to leave the line of works thrown up in their front. The movement was covered by a sortie of Gen. Ledlie's brigade of Gen. Crittenden's division, who deployed in front in skirmish line with two regiments held in reserve. The enemy were driven some distance toward Spottsylvania Court House. Meanwhile the rest of the corps moved out of the works, and by night were far on the road. The march was kept up steadily until eleven o'clock, when a short halt was ordered.

Finding the enemy in force on the road proposed, the route was abandoned. The column retrograded a few miles on the Richmond and Fredericksburg telegraph road, and thence moved to the southeast. At 9 o'clock on the next morning a halt of an hour was made, and then the march was resumed, crossing the railroad near Guineas' station, and arriving at Bowling Green at 4 p. m. On the next morning the march was continued to Milford station.

The 6th corps moved after the 9th, and filed into the intrenchments as vacated by the 9th.

The sortie of Gen. Ledlie had rallied the enemy on their main line, and they advanced in considerable force upon the 6th corps, but were met with such a fire as caused them to retreat with severe loss. Subsequently it followed the route of the 5th corps. On the 22d the entire army was in a new position, facing westerly from Milford to Guineas' station.

On Monday forenoon, May 22d, the advance of the army reached the North Anna River. The 5th corps arrived, by the telegraph road, in the neighborhood of Jericho Mills. The 2d corps arrived in the afternoon, and took position on the left of the 5th, extending to the railroad. In front of the army there were three fords of the North Anna, known as Island, Jericho, and Chesterfield, or Taylor's Bridge fords. The latter is about a mile above the railroad crossing of the river, and the next, or Jericho ford, about four miles further up. The 2d corps arrived at Taylor's bridge about the time when the 5th arrived at Jericho. About a hundred rods in front of Taylor's bridge is a small stream called Long Creek, parallel with the North Anna, and forming a junction with it below the railroad, thus giving a peninsular form to the land between. The bridge across the North Anna was commanded at its entrance by a redan whose extremities were covered by the river, and its flanks swept by artillery in field-works on the opposite bank, as well as by infantry in rifle-pits. The peninsula formed a broad open space between the redan and the 2d corps drawn up in front. Gen. Barlow's division occupied the right of the railroad, Gen. Birney's was in front of the peninsula, and Gen. Gibbon's on the right, while the 5th corps was on the right on the Milford road, and about four miles up from the railroad. Skirmishing commenced in front of Gen. Birney, and his batteries opened upon the enemy at 4 p. m. His division was ordered to charge and carry the works, and, if possible, get possession of the bridge across the river. A brilliant charge was made without a halt until the enemy was driven across the bridge, and guns so placed as to command it. The loss was about five hundred on each side. No effort was made to cross that night, but the bridge was then held by a small command. About 11 p. m. the enemy made a sortie from his works and endeavored to retake the bridge, but after a spirited skirmish of about twenty minutes he was driven off. About midnight another attack was made with a much larger force. The enemy got possession of the bridge and held it for some time, and made several attempts to burn it, but were finally forced to retire. Early the next morning the 2d corps crossed the river.

About the time when the bridge was taken by the 2d corps, the 5th corps effected a crossing and took a position on the south bank, and threw up some breastworks. Soon after they were attacked by a heavy force of the enemy, which was repulsed after causing a loss of about five hundred. Their own loss was unknown.

This attack was renewed during the night. About dark Gen. Burnside's corps came up and took position between Gens. Hancock and Warren, and made preparations to cross, while the 6th corps took the right of the 5th. On the next day, the 24th, the army crossed the river, and considerable skirmishing took place along the whole line with a loss of about five hundred. During the day a portion of the cavalry force under Gen. Sheridan reached the army, returning from James River. On the 25th, contrary to general expectation, the enemy were found strongly posted in force within two miles of Gen. Grant's lines. They lay in the form of a triangle, with the apex reaching nearly to the North Anna River, between the points where Gens. Warren and Hancock crossed with their corps. Their ground was found to be admirably chosen and extensively fortified. The formation of their line gave them every facility for a quick movement of troops from one flank to the other. A successful assault would have involved immense slaughter. As the apex of the enemy's position stretched toward the North Anna, his right wing resting on a formidable marsh and extending across the railroad, protected it and covered the junction. His left wing ran along Little River. New movements were therefore made by Gen. Grant. His plan was to recross the North Anna and march by the left flank. The swelling of the streams by the recent rains made it prudent to commence it as soon as possible. To cover the movement a strong demonstration was made during Thursday on the left of the enemy. Some divisions of cavalry attacked his left, whilst the 8d division of Gen. Sheridan's cavalry moved up the Virginia Central Railroad and began to burn the track. Under cover of this attack, on Thursday evening the 27th, the 6th corps quietly and swiftly withdrew to the north bank of the river, followed by the other corps in quick succession, and moved out easterly for the Pamunkey. The rear was protected by Gen. Hancock. At the same time a strong skirmish line was left in front to engage the enemy's attention and disarm suspicion.

At 9 o'clock on the next morning, Friday the 28th, Hanover Ferry and Hanovertown were occupied by a portion of Gen. Sheridan's cavalry, who captured seventy-five of the enemy. At 10 A. M. the 1st division of the 2d corps arrived, followed closely by the remainder of the corps. Hanovertown is on the Pamunkey River, fifteen miles from Richmond, and sixteen miles from the White House, on the same river. Thirteen miles east of the White House is West Point, where the Mattaponi and the Pamunkey join and form the York River. Transports with supplies for the army were already on the way to the White House, to which the base of the army was now changed. On Saturday the 28th the troops continued to arrive all day, and the crossing of the Pamunkey was secured. The enemy had previously occupied Hanover

Court House, and in the mean time extended his lines southerly. The despatch of the War Department relative to these movements was as follows:

WASHINGTON, May 28—9:50 P. M.

To Major-General Dix:

An official despatch from the headquarters of the Army of the Potomac, at Magahick Church, ten miles from Hanovertown, dated yesterday afternoon at five o'clock, has just been received.

It states that our army was withdrawn to the north side of the North Anna on Thursday night, and moved toward Hanovertown, the place designated for crossing the Pamunkey.

At 9 o'clock yesterday (Friday) morning Sheridan, with the 1st and 2d divisions of cavalry, took possession of Hanover Ferry and Hanovertown, finding there only a rebel vidette. The 1st division of the 6th corps arrived at 10 A. M., and now hold the place, with sufficient force of cavalry and infantry and artillery to resist any attack likely to be made upon them. The remainder of the corps is pressing forward with rapidity. Weather fine and perfect.

A later despatch dated at 7 o'clock this morning (28th), from Headquarters, Magahick Church, has also been received. It reports that every thing goes on finely; weather clear and cool; the troops came up rapidly and in great spirits, and that the army will be beyond the Pamunkey by noon.

Breckinridge is at Hanover Court House with a force variously reported from three thousand to ten thousand. Wickham's and Lomax's brigades of cavalry are also there.

The despatch further states that, after seizing Hanover Ferry yesterday, General Torbert captured seventy-five cavalry, including six officers; that the rebel cavalry is exceedingly demoralized, and flees before ours on every occasion.

No despatches from any other field of operations have been received to-day.

EDWIN M. STANTON, Secretary of War.

On Saturday two divisions of cavalry, under Gens. Torbert and Gregg, were pushed toward Mechanicsville as a reconnaissance of the enemy's line. Near the Tolopatomy Creek, a tributary of the Pamunkey, a sharp engagement took place with a cavalry force of the enemy, which resulted in forcing them back some distance, leaving a part of their dead and wounded. The loss of the Union force was about four hundred, and that of the enemy was supposed to be not less.

On Sunday, the 29th, the whole army was across the Pamunkey, and fronted southwest about three miles from the river. Reconnoissances were made from each corps, followed up by a gradual advance. The enemy appeared to be in force, distant about six miles, and beyond the Tolopatomy Creek, holding Shady Grove and Mechanicsville with his extreme right, and his centre in front of Atlee's station on the Virginia Central Railroad, and his left covering Hanover Court House.

On Monday, the 30th, the forces of Gen. Lee were reported to be on the Mechanicsville road south of the Tolopatomy Creek, with his right resting on Shady Grove. The right of Gen. Grant's army, consisting of the 6th corps under Gen. Wright, extended in the direction of Hanover Court House. The right centre was held by Gen. Hancock on the Shady Grove road, and the left centre by Gen. Warren on

the Mechanicsville road. Gen. Burnside held the left, and a little in rear. The right and rear were covered by the 8d division of cavalry under Gen. Wilson. The divisions of Gens. Torbert and Gregg were advanced on the left flank. The division of Gen. Torbert held the Old Church Tavern Cross Road with a picket force extending on the road to Coal Harbor. A movement of the enemy was made about 2 P. M. upon these pickets, who were driven in, and a sharp engagement ensued, with a loss of eighty or ninety on each side, when the enemy were driven back. About 5 P. M. an attack was made on Gen. Warren's corps, which was gradually moving to the left along the Mechanicsville road, by a reconnoitring division of Gen. Ewell's corps with two brigades of cavalry. The turning of Gen. Warren's flank was endangered, which was prevented only by the timely arrival of reinforcements. A sharp engagement followed, and the enemy were forced to retire by a road parallel to the Coal Harbor road. Gen. Meade, upon being informed of the situation of Gen. Warren, ordered an attack along the whole line. Gen. Hancock alone received the order in time to attack before dark, and immediately advanced upon the enemy's skirmish line, captured their rifle-pits, and held them all night. Gen. Warren held his position near Mechanicsville, and the enemy moved down troops to prevent any further dangerous concentration on his right. An effort was made to dislodge Gen. Hancock at midnight, but without success.

On Tuesday, the 31st, the army of Gen. Grant was further reinforced by the arrival of the 18th corps under Gen. Smith. This corps, being a part of the command of Gen. Butler, embarked on transports at City Point, and moved with celerity down the James River and up the York River to the White House, which was the base of supplies for Gen. Grant's army.

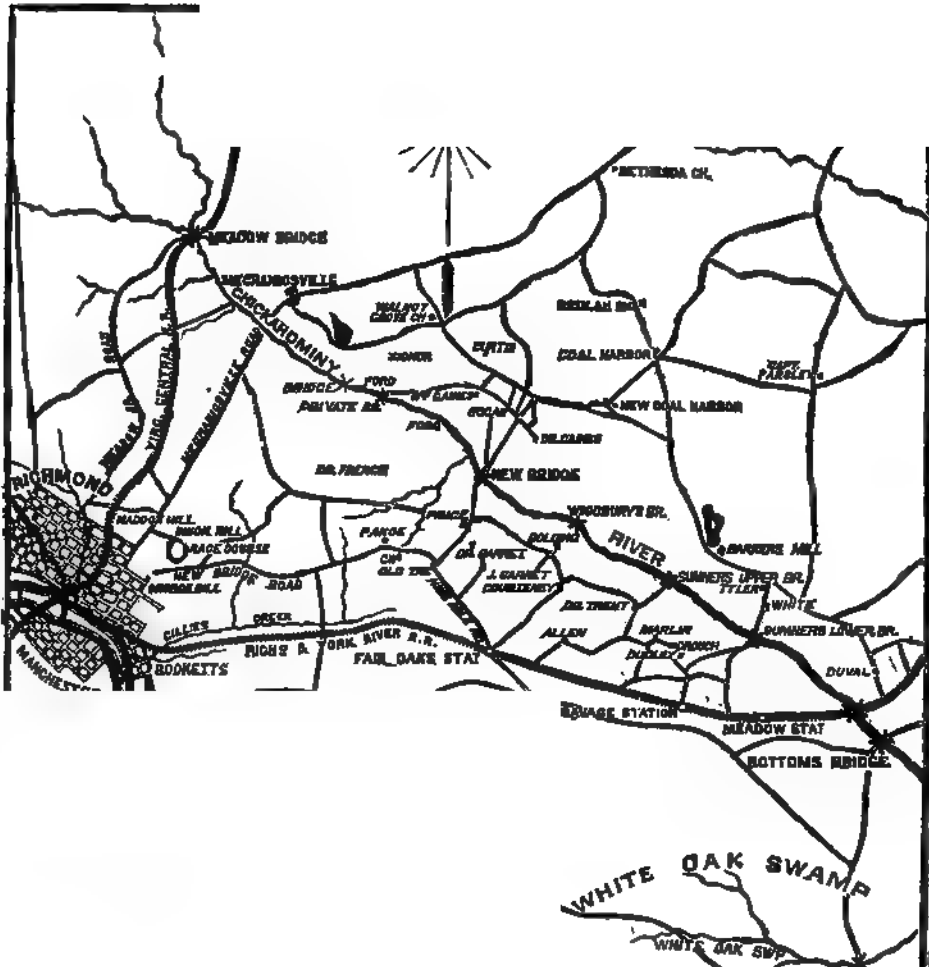

After the retirement of Gen. Butler to his intrenchments on the 20th, little fighting occurred. An attack was made on his post at Wilson's Wharf, on the northerly bank of the James, held by two regiments of negro troops, on the 24th, by a body of cavalry under Gen. Fitz Lee. A demand for surrender was made, which Gen. Wild declined, when the skirmishing line was speedily driven in, and furious charges made on the works. After a contest of three or four hours the enemy withdrew, leaving twenty-five dead on the ground. On the 26th a reconnoissance discovered the enemy in considerable force. The position of Gen. Butler now was such that his communication and supplies were perfectly secure. Both flanks of his remaining force were covered by gunboats.

On Tuesday, May 31st, the headquarters of Gen. Grant were about five miles southeast of Hanover Court House, and less than that distance west of Hanover town. In front of that position, facing westerly on its right and

southwesterly on its left, the line of battle of the army extended a distance of six miles across Tolopatomy Creek. The right was held by Gen. Wright's 6th corps, next Gen. Hancock's 2d corps, next Gen. Burnside's 9th corps, and Gen. Warren's 5th corps on the left. The position of the enemy was on the westerly bank of a creek running southeast, and a tributary to the Tolopatomy before the latter turns to the northeast to the Pamunkey. Their line closely followed in general direction that of Gen. Grant's army. The right was held by Gen. A. P. Hill, the centre by Gen. Longstreet's corps, and the left by Gen. Ewell. In this position they covered the Chickahominy, which is the outer line of defence for Richmond and the Virginia Central Railroad, with cavalry supports thrown out on the left as far as Hanover Court House, and on the right to Bottom Bridge. This was the theatre of operations of the Army of the Potomac in 1862, when the approach to Richmond was made across the Chickahominy, before which the enemy were now strongly drawn up.

On Tuesday there was desultory firing through the day along the whole line. Gen. Grant already contemplated a movement by the left, and the 1st division of cavalry, under Gen. Torbert, were ordered forward to reconnoitre thoroughly the ground in the vicinity of Coal Harbor, and to hold it at all hazards for the occupation of infantry. While there a sharp fight ensued with a body of the enemy's cavalry, which resulted in Gen. Torbert's holding the desired ground.

On the next day, June 1st, an effort was made by a division of the enemy under Gen. Hoke, to get possession of Coal Harbor. This was repulsed by Gen. Sheridan. Subsequently Gen. Hoke was reinforced, and about noon checked the further advance of Gen. Sheridan on the left. On the previous night the 6th corps was detached from the right, and marched from Shady Grove to Coal Harbor, where they arrived soon after the close of the above affair. It formed in line on the right of the Gaines' Mill road, with Gen. Ricketts' division on the right, Gen. Russell's in the centre, and Gen. Neill's 2d on the left. About 3 o'clock the 18th corps, under Gen. Smith, from the White House, came into the field, and formed on the right of the 6th corps, with Gen. Martindale on the right; Gen. Brookes in the centre, and Gen. Devens on the left. Their march, like that of the 6th corps, had been severe, over a distance of twenty-five miles. A charge by the 18th corps was ordered at once, and, without stopping, they crossed an open field to a strip of wood, and took and held the first line of the enemy's rifle-pits, capturing six hundred prisoners. A lodgment was also effected in the enemy's line further to the right, but the position proved to be completely commanded by a redoubt in the second line of the enemy, and, amidst a heavy fire, it was abandoned. During the night the enemy made desperate efforts to

regain the rifle-pits, and succeeded in annoying the troops with an enfilading fire. Their charges, however, were repelled. The loss of the Union troops was about two thousand; the enemy being behind breastworks, probably suffered much less. The change in the line now had brought Gen. Wright to the extreme left, between whom and the 5th corps was now the 18th under Gen. Smith. During the entire day there had been warm work along the whole line, in which the artillery took a part toward night. Several distinct charges were made by the enemy, which were repulsed. No careful estimate of the losses in this part of the field during the day was made, but it was supposed not to exceed a thousand. The loss of the enemy was severe. The result of the day was the complete occupation and holding of Coal Harbor, which was an important position both as commanding the road to the White House, whence supplies were brought, and also in reference to a subsequent crossing of the Chickahominy.

In the night it was determined by Gen. Grant to make the attempt to push the enemy across the Chickahominy, and to secure a place to ford that stream. The 2d corps was therefore advanced from the extreme right to the extreme left, in order to increase the force in that direction. It reached its position about noon the next day, Thursday, June 2d. The attack which was to have been made on that evening, owing to the heavy rain which ensued, was postponed until the next morning, Friday. Considerable skirmishing had taken place during the day, and a charge was made upon the 5th and 9th corps, without gaining any special advantage.

At half-past 4 o'clock on Friday morning the army was in motion. Its line extended from Tolopatomy Creek across the road from Coal Harbor to the Chickahominy. The ground consisted of woodlands, swamp, and open fields. The skirmishers were promptly advanced, and the whole line was soon engaged in a terrific battle. From Gen. Hancock's corps on the extreme left the brigades of Gens. Gibbon and Barlow moved boldly forward, exposed to shot and shell, up the ascent on which the enemy in their front had concentrated their men and artillery. They drove out the enemy, and for a moment were in possession of their position. Being in advance of the line, they were exposed to a most destructive enfilading fire of the enemy. At the same time the second line of the enemy was massed and hurled upon them. Thus overwhelmed in front, and swept by a fire on the flank, these divisions were now driven out of the intrenchments, but not until they had secured a color and three hundred prisoners. Falling back about fifty yards they were under a partial cover of the ridge. Here they intrenched themselves, and remained through the day. So far had they advanced that one of the enemy's batteries was captured and nearly turned against them when the retreat

was ordered. The 18th and the 6th corps adjoining the second along the line charged forward with not less gallantry, and carried the first line of the enemy's intrenchments, but were received with a most destructive enfilading fire. After an obstinate conflict they were forced back, yielding the position which they had taken, and occupied another close to the enemy's works, which they intrenched. On the right the 5th and 9th corps were advanced; but the conflict here was not so severe, as the force of the enemy was massed on their right. Still further to the right the 3d division of cavalry, under Gen. Wilson, were engaged with a force of the enemy under Gen. Hampton, but without important results. The contest was continued with more or less vigor throughout the day. The enemy were found too strongly posted to carry their works, and all efforts to cross the Chickahominy at that point were repelled. The loss was nearly seven thousand in killed, wounded, and prisoners. The enemy lost many prisoners, but the advantages under which they fought prevented their loss from being so severe. The following despatches were issued by the War Department:

WASHINGTON, June 4, 1864.

To Major-Gen. Dix:

Despatches from Gen. Grant's headquarters, dated 3 o'clock yesterday, have just been received. No operations took place on Thursday. Yesterday, at half-past 4 o'clock A. M., Gen. Grant made an assault on the enemy's lines, of which he makes the following report:

"We assaulted at half-past 4 A. M., driving the enemy within his intrenchments at all points, but without gaining any decisive advantage. Our troops now occupy a position close to the enemy, some places within fifty yards, and are remaining. Our loss was not severe, nor do I suppose the enemy to have lost heavily. We captured over three hundred prisoners, mostly from Breckinridge."

Another later official report, not from Gen. Grant, estimates the number of our killed and wounded at about three thousand. The following officers are among the killed:

Col. Haskell, 86th Wisconsin; Col. Porter, 8th New York heavy artillery; Col. Morris, 66th New York.

Among the wounded are Gen. R. O. Tyler—seriously—will probably lose a foot; Col. McMahon, 164th New York; Col. Byrnes, 28th Massachusetts—probably mortally; and Col. Brooke, 53d Pennsylvania. EDWIN M. STANTON, Sec'y of War.

WASHINGTON, June 5—1 P. M.

Major-Gen. Dix:

A despatch from Gen. Grant's headquarters, dated half-past 8 o'clock last night, has been received. It states that "about 7 P. M. yesterday, Friday, 3d of June, the enemy suddenly attacked Smith's brigade, of Gibbon's division. The battle lasted with great fury for half an hour. The attack was unwaveringly repulsed. Smith's losses were inconsiderable."

At 6 P. M., Wilson, with his cavalry, fell upon the rear of a brigade of Heth's division, which Lee had thrown around to his left, apparently with the intention of enveloping Burnside. After a sharp but short conflict, Wilson drove them from their rifle-pits in confusion. He took a few prisoners. He had previously fought and routed Gordon's brigade of rebel cavalry. During these fights he lost several officers, among them Col. Preston, 1st Vermont cavalry, killed; Col. Benjamin, 8th New York cavalry, seriously wounded.

Our entire loss in killed, wounded, and missing

during the three days' operations around Coal Harbor will not exceed, according to the Adjutant-General's Report, seven thousand five hundred.

This morning, Saturday, June 4, the enemy's left wing, in front of Gen. Burnside, was found to have been drawn in during the night.

Col. Ceanola, in command of five thousand men, arrived there yesterday, having marched from Port Royal. EDWIN M. STANTON, Sec'y of War.

The position gained, however, was held, and during the next day, Saturday, June 4th, the erection of temporary breastworks was busily prosecuted. At 9 o'clock at night the enemy made a fierce attack on the corps of Gen. Hancock, Smith, and Wright, but after a severe loss they were repulsed.

On Sunday, the 5th, the lines continued close to each other. The sharpshooters of the enemy endangered any person exposed in the rifle-pits, and many officers and men were fatally wounded. Meanwhile the work on the intrenchments, when practicable, was kept up. Soon after dark the enemy made a sudden dash on Gen. Smyth's brigade of the 2d division of Gen. Hancock's corps. They met with a sharp resistance, and were soon repelled with a disproportionately large loss. On Monday the picket-firing was continued, with some change of position in bodies of the troops, and with the work on the intrenchments. At midnight an attack was made on Gen. Burnside's corps on the right, but soon repelled. The nearness of the lines of the two armies made the battle-fields of Friday disputed, and the dead still remained upon it unburied and the wounded were unrelieved. A correspondence ensued relative to these dead and wounded, between Gens. Grant and Lee. It resulted in an armistice of two hours, during which the dead and wounded were carefully removed. Meanwhile the 5th corps was detached from its position on the right centre and withdrawn to the rear. Its place in the line was filled by a transfer of the 9th corps from the extreme right. Commissary supplies had been constantly sent forward to the army from the White House, with some reinforcements of hundred days' men and convalescents. New earthworks were built, extending along the course of the Chickahominy, and everywhere the enemy built parallel works a few hundred yards distant. On Tuesday, June 7th, the enemy making a reconnaissance, attacked the 9th corps in the afternoon, but were vigorously repelled. Of the 5th corps detached during the night from their position in the line, the divisions of Gens. Griffin and Cutler moved rapidly down toward Sumner's bridge, on the Chickahominy. The enemy at the bridge were in force, and opened with rather heavy guns on the approaching column. They were soon driven from the bridge, but continued to command it with their artillery. During Wednesday and Thursday there was no change of position. On the latter day, the cavalry under Gens. Torbert and Gregg were pushed further to the left. On Friday some skirmishing of cavalry took place on the right.

The work of intrenchment was continued, and an advance was pushed as far as Bottom bridge, the next below the railroad crossing of Chickahominy. The enemy kept pace, confronting the advance, and fortifying at the bridge. On the same day the destruction of the railroad to the White House was begun from Despatch station easterly. The rails and ties were removed to the White House, and shipped on barges.

On Sunday night, June 12th, the movement for crossing the James River commenced. The line of the enemy extended from Bottom bridge along the Chickahominy, nearly parallel to which was the line of Gen. Grant, and both intrenched. Bottom bridge was commanded by the enemy, and could not be used for crossing. The next were Long bridge, six or seven miles, and Jones's bridge, ten or twelve miles below.

On Sunday night, June 12th, the army began to move. The 2d and 5th corps moved to Long bridge, over which they crossed, and took the road due south to Wilcox's wharf, twelve miles distant on the James' River, and a little west of Charles City. The 6th and the 9th corps at the same time marched to Jones's bridge, by which they crossed the Chickahominy and advanced rapidly to Charles City Court House, about nine miles nearly south of the bridge and a mile from the James' River. The 18th corps about the same time marched to the White House, embarked on transports and proceeded directly to Bermuda Hundred, on the south side of the James' River, being the headquarters of Gen. Butler. The points designated for the crossing of the other corps were Powhatan's and near Wilcox's Wharf, where pontoons had already been prepared by Gen. Butler. During all Sunday night and Monday the troops moved forward, and at evening the advance reached Wilcox's wharf. On Tuesday the crossing of the James commenced, and was completed on Wednesday. The movement had been attended with some slight skirmishing with the enemy, with a loss of not more than four hundred men.

Meanwhile deserters having reported that the force of the enemy at Petersburg had been greatly reduced, a demonstration against that city, was made by a portion of the forces under Gen. Butler at Bermuda Hundred. It was determined that Gen. Gilmore, with thirty-five hundred men, crossing the Appomattox, should move by the turnpike road and assault the city, while Gen. Kautz, with a cavalry force of fifteen hundred men, should make a circuit of the place and attack it on the southerly or southwesterly side, and thus, as the movement was simultaneous, both forces might enter the city together. At the same time another demonstration was to be made upon Fort Clifton. The movement commenced on Monday night, June 8th. Gen. Gilmore encountered no serious opposition until within two miles of the city, when he met the enemy's skirmish line and briskly drove it back. On arriving in front of the city where the fortifications could be closely examined, he found them too strong

for the force at his command to attempt, and accordingly withdrew about noon and returned to camp in the evening. Meanwhile Gen. Kautz had forced the enemy's intrenchments and reached the streets of the city, sharply engaged in fighting. But the force of the enemy concentrating against him, he was forced to retire. Some prisoners were taken, and the loss was about twenty men. Two gunboats and a battery engaged Fort Clifton during the morning with a brisk fire.

Petersburg, a city of eighteen thousand inhabitants, is situated on the south bank of the Appomattox River, twenty-two miles south of Richmond, and ten miles from the James River at City Point. The Appomattox empties into the James at City Point. It is navigable to Petersburg for vessels of one hundred tons, and to Waltham, six miles below, by larger vessels. The city is connected with City Point by a railroad. The road from Richmond to North and South Carolina also passes through it. The river at this point runs nearly northeast to the James. The city was defended by several series of strong earthworks, consisting not only of square redoubts, but also of well-established and commanding rifle-trenches.

On Wednesday, June 15th, a reconnoissance was made by the cavalry, by which it was discovered that the corps of Gen. Hill occupied the region southeast of Richmond in strong force. At 1 o'clock on the morning of the same day the 18th corps, which had arrived on the previous evening from the White House, started for Petersburg. The Appomattox was crossed by a pontoon-bridge near Point of Rocks. The route was nearly the same as that taken by the advance of Gen. Gilmore on a previous day. Skirmishing of the advance with the enemy commenced at daylight. A row of rifle-trenches with two twelve-pounders was carried by a body of colored troops under Gen. Hinks' command later in the day. In the afternoon the movement resulted in forming a line of battle in front of the outer intrenchments of the enemy, about two miles from Petersburg. Just before sunset the order was given to carry the works by assault. The whole line rapidly advanced under a hot artillery fire from the enemy, and swept the entire range of rifle-pits with great gallantry. The enemy broke and deserted their intrenchments, losing sixteen guns, a battle flag, and three hundred prisoners. The Union loss was about five hundred. The position was held, but no further advance was made. It was supposed that, if a supporting force had been at hand, the second line of works might have been carried with comparative ease. The force of the enemy in the city was small, but reinforcements were received by them previous to the arrival of the other corps of Gen. Grant's army. The troops which held Petersburg composed the command of Gen. Beauregard. A portion of them had confronted Gen. Butler, and some had been in Richmond.

The cavalry under Gen. Kautz, which preceded the 18th corps, had moved out to the extreme left against the works near the Norfolk Railroad and on the Baxter road. The position of the enemy was, however, too strong to be carried, and Gen. Kautz retired.

Meanwhile the other corps of the army were approaching as rapidly as possible. Gen. Birney's division of the 2d corps arrived at evening and occupied the captured intrenchments. During the night the remainder of the corps came up.

On Thursday morning a part of the 10th corps, under Gen. Terry, was sent out to reconnoitre in front of Gen. Butler's position. The skirmishers soon drove the enemy, and his line was penetrated and carried, and the railroad subsequently reached near Port Walthall Junction. About two miles of the track were torn up, when the enemy came down in such force that Gen. Terry was obliged to retire.

Early in the morning Gen. Birney sent out a force under Gen. Egan and carried a redoubt on his left, with a loss of about a hundred. Meantime the troops of the enemy were crowded forward so rapidly that it became necessary to wait for Gen. Burnside's corps to come up. The intrenchments of the enemy ran semicircularly from the river on the north of the city to the river on the south. Their northern extremity was also strengthened by batteries on the opposite side of the Appomattox. In the afternoon the corps of Gen. Burnside arrived and a line of battle was formed, with the 18th corps under Gen. Smith on the right, the 2d corps under Gen. Birney during this assault, which was commanded by Gen. Hancock, and the 9th under Gen. Burnside on the left. At 6 o'clock an attack was made, and continued for three hours. Gen. Birney's division, on the right of the centre corps, carried the crest in his front and held it firmly. On the left of Gen. Birney's division the advance of Gen. Barlow found more difficulty, from the concentration of the enemy in front. A charge was made by the brigades of Gens. Miles and Griffin, which succeeded in gaining a foothold of the rifle-pits outside of the stronger works. But the troops were so annoyed by the enemy that Gen. Barlow determined to make an assault. But the enemy cut off his skirmish line in front, amounting to three hundred men, with their officers. Gen. Burnside also prepared to make an assault, but the enemy opened so severely as to frustrate it. The right took no important part in the contest. After three hours the assault was suspended. The loss was between fifteen hundred and two thousand. That of the enemy, as they held an advantageous position, was much less.

Early on Friday morning, June 17th, the assault was renewed by an order of Gen. Burnside to Gen. Patten's division to take the works in their front. The brigade of Gen. Griffin, supported by that of Gen. Curtin, dashed forward, carrying the position and capturing six

guns, sixteen officers, and four hundred men, with a loss of about five hundred men. A pause now ensued, but skirmishing was kept up by the picket lines, and there was a moderate fire of artillery. In the afternoon Gen. Patten's division was relieved by that of Gen. Ledlie. An advance of this latter division was ordered, under cover of artillery, upon the enemy's breastworks, from which, after a desperate contest, they were driven, and the position carried, with the capture of some prisoners. Gen. Burnside was now about a mile and a half from the city and threw some shells into it. Several attempts were made by the enemy to recover the intrenchments during the day, but without success. About 9 o'clock at night, however, a desperate attempt to retake them was made and succeeded. In this affair about two hundred prisoners were made on each side. The loss of the division was estimated at a thousand. The rest of the line during the day was engaged in skirmishing, without any attempt at decisive assault. On the right the 18th corps had been withdrawn and returned to the intrenchments at Bermuda Hundred. The 5th corps, under Gen. Warren, had come and massed on the left in the rear of Gen. Burnside's 9th corps. The 2d corps was commanded by Gen. Birney, as Gen. Hancock was suffering from an old wound.

The proper dispositions were now made for a vigorous assault early on Saturday morning the 18th. The line was formed by the divisions of Gens. Martindale and Hinks, of the 18th corps, on the right, extended by the 6th, 2d, 9th, and 5th, in the order named, to the left. On sending out skirmishers preparatory to the assault, at 4 A. M., it was found that the enemy had withdrawn to an inner series of defences. New arrangements, therefore, became necessary. At noon a general advance of the 2d, 9th, and 5th corps was ordered. From the 2d corps an assaulting column of three brigades was sent forward, while the rest of the corps threw out double lines of skirmishers to divert the attention of the enemy. The men moved promptly up to the works to be assaulted, which were situated near the Petersburg and City Point Railroad. As they came out from cover, they were received by such a desperate enfilading fire from the left, that they retired without reaching the breastworks, leaving their dead and wounded on the field. In the afternoon a second storming party was organized to commence the attack from Gen. Mott's position. His division, with detachments from the other two of the corps, advanced in two columns about 5 P. M., but were received with such a destructive fire from concentrated batteries and musketry, as to force them back with terrible loss, in spite of the greatest bravery on their part.

The 9th corps, on the left of the 2d, was prompt to act during the day. There was brisk skirmishing, but no decisive advantage was gained. The line was established during

the afternoon across the Petersburg and Norfolk Railroad.

On the left of the 9th, the 5th corps, at the time of the attack of the 2d, made a determined and vigorous advance against the south side of the Norfolk Railroad, and was partially successful. In the evening their efforts were again renewed, but were foiled by the enemy. The division of the 18th, on the extreme right, experienced the same results as the other troops. The operations of the day had been unsuccessful. The loss of the four days' operations was estimated above ten thousand men.

On Sunday, June 19th, there was skirmishing and considerable artillery fire, but no decisive movement. The loss was estimated at a hundred men. The 6th corps, heretofore on the north side of the Appomattox, now took a position on the right, and the colored division of Gen. Ferrero, of the 9th corps, arrived, and was posted in front. At night the enemy made an attack on the centre of the line, but were driven back. During the afternoon an attack with infantry and artillery was made on Gen. Butler's lines at Bermuda Hundred by a division of Gen. Longstreet's corps under Gen. Pickett. At the same time, three iron-clads from Richmond made their appearance near Dutch Gap, but retired before the fleet of Admiral Lee. During the same night, squads of the enemy made their appearance along the James River and destroyed the wharfs at Wilcox's and Westover landings.

Monday, the 20th, was unusually quiet near Petersburg. Some demonstrations of the enemy's cavalry were near the White House, but without any serious result to the convalescents there.

On Tuesday, the 21st, a movement was made to occupy and destroy the railroad from Petersburg to Weldon. On the previous evening the 2d corps moved from its entrenchments on the right centre to the left, and its position was occupied by the 9th and a part of the 18th. In the morning, crossing the Petersburg and Norfolk Railroad, it marched as rapidly as possible in a southerly direction. A division of the 5th and one of the 6th corps moved out in support. Before noon, the 2d corps halted, and in the afternoon a division, under Gen. Barlow, with sharpshooters skirmishing in advance, was sent forward and found the enemy's lines in the neighborhood of the Jerusalem road, which bisects the region between the Norfolk and the Weldon Railroad. The position was known as Davis Farm, about three miles below Petersburg, and a mile from the railroad. The enemy proved to be in force, with artillery planted in earthworks. They advanced to attack, and a severe skirmish ensued, and the advance line of Gen. Barlow was withdrawn, and rejoined the column. The loss was about a hundred men. A reconnoissance toward Petersburg, at the same time, was attended with no results. So threatening was the aspect of the enemy on the left, that a squadron

of cavalry was sent to protect that flank, and the corps retired to form position for the night.

In the lines east of Petersburg comparative quietness prevailed. The bridges across the Appomattox, between Petersburg and Pocahontas, the village on the Richmond side of the river, were shelled daily by the batteries of Gen. Grant. On the same day, the 21st, a division of the 10th corps, under Gen. Foster, crossed the James, at a point between Aikin's Landing and Four Mile Creek, and occupied Deep Bottom, about ten miles from Richmond. On the opposite side of the river, about six miles from Gen. Foster, the enemy had a battery at a position called Howlett's. In this position he threatened, to some extent, the southeast approaches to Richmond. At the same time the 18th corps moved from Bermuda Hundred to Petersburg, and occupied the position vacated by the 6th corps.

Early on Wednesday, the 22d, the movement against the railroad was resumed. The object was to cut off the communication with Petersburg from the south. At the same time a cavalry expedition was sent about ten miles further south, under Gen. Wilson, to destroy the railroad. The general movement was designed to consist of an advance of the 2d and 6th corps directly against the road. The 2d corps was on the left of the Jerusalem road, with Gen. Gibbon's division resting its right on the left of the road. Gen. Griffin's division of the 5th corps was on the further side. The position of Gen. Gibbon was so near the works of the enemy that any further advance by him would bring on a general engagement. The advance was, therefore, ordered for the left of the line, consisting of the divisions of Generals Barlow and Mott, and the 6th corps. It was to have been made at daybreak, but was delayed by each corps apparently waiting for the other to lead. At length each corps was ordered to advance independently, and to protect its own flank as connection between was not made. The line was deployed in open style, covering a large extent of ground, until it approached the presence of the enemy, in more intricate ground, when the left of the 2d, under Gen. Barlow, was pressed well in toward the right, thus opening a gap between it and the 6th corps. Gen. Barlow threw out flanking regiments to protect himself. But no sooner was the entire line of the 2d corps in position, and Gen. Barlow's division had commenced to intrench, when it was attacked on the flank by the enemy. In its advance, the 2d corps had separated from the 5th, on its right, and the 6th was now far distant, on the left and rear. The enemy took advantage of the error. One entire division, with Mahone's brigade, pushed through the interval. The flank of Gen. Barlow was instantly rolled up and a large number made prisoners. This movement of Gen. Barlow's force quickly uncovered the flank of Gen. Mott's division, and exposed him to the same danger. Gen. Mott

at once fell back, with the loss of many made prisoners, and thus exposed the left flank of Gen. Gibbon's division. The line of intrenchments occupied by Gen. Mott was now captured by the enemy, who thus pressed Gen. Gibbon in front and rear. Several regiments were captured, with McKnight's battery, before the enemy were checked by the bravery of the 20th Massachusetts. The broken corps was soon rallied and a new line formed, and further attacks of the enemy repulsed. The 6th corps was also attacked on its left flank by a division of Gen. Hill's command, and its advance line driven back, thus widening the gap between it and the 2d. In the evening, Gen. Meade getting both corps well in order, directed an advance. The 6th recovered its former line and the 2d a part of its line, and intrenched for the night. At daylight the enemy appeared, strongly intrenched, before the Weldon Railroad. The loss of the day included about two thousand made prisoners, four guns, and some colors.

On the next day, the 23d, Gen. Wright moved out to the extreme left, and finding that the enemy had not advanced so far, sent out a reconnoitring force to the railroad. They reached it unopposed and cut the telegraph. The 8d, 4th, and 11th Vermont regiments were then sent forward to hold the road. But they had hardly reached it when they were attacked on their flank by a division of the enemy under Gen. Anderson, and their position was turned at once. Several hundred were taken prisoners, and some were killed and wounded. The enemy, elated with success, pushed the troops back to the main body, and then began a general attack. The line was withdrawn toward evening to the cover of the breastworks. The loss of the enemy in these two days was disproportionately small. Elsewhere, during the day, nothing of importance occurred.

On Friday, the 24th, the enemy opened with artillery upon the position of Gen. Stannard's division of the 10th corps. After an hour, a charge was made, which was repulsed with a loss to the enemy of one hundred and fifty prisoners, besides some killed and wounded. No important movements were made in other parts of the line. During the evening, the cavalry force under Gen. Sheridan, while marching from the White House to the James River, were attacked by the enemy and a bloody struggle ensued. The enemy were finally driven off, after a loss by Gen. Sheridan of four to five hundred men. His trains were saved from capture.

On the next day, the 25th, the principal demonstration was made in front of Gen. Burnside's position. It consisted of the advance of a strong skirmish line, which was easily repulsed.

The cavalry expedition of Gen. Wilson set out from the camps near Prince George Court House, on the morning of June 22d. His

force was between six and eight thousand men, with three batteries of four guns each. The column moved to the Petersburg and Weldon Railroad at Reims' station. Here it took up and burned the track for several hundred yards, the water-tank, depot, and public buildings. It thence moved to Sutherland's station, on the Petersburg and Lynchburg Railroad, and advanced to Ford's station in the evening. Here two locomotives, sixteen cars, a depot, and a few stores were burned, and several miles of the road destroyed. On the next morning Gen. Kautz advanced toward Burkesville, which he reached in the afternoon, and destroyed the property of the road as at the other stations. Meanwhile the main body followed, and encountered in the afternoon a body of the enemy near Nottoway. A sharp conflict ensued until night, when the enemy retired. On the 24th the column reached Keyesville, and bivouacked for the night. About eighteen miles of the road, besides other property, were destroyed during the day. On the next day the bridge over Staunton River was reached, but it was found to be well defended by the enemy. The return of the expedition now commenced. On the route they were so harassed by the enemy as barely to escape capture. On Thursday and Friday, July 1st and 2d, they arrived within the lines, in straggling parties, in a most pitiable and wretched condition, both men and horses being jaded and worn beyond description after their hard march, severe fighting, and the relentless harassing of the enemy. The entire wagon train, the ambulance train, all the guns (sixteen), nearly all their caissons, and many horses had been lost, and between ten and fifteen hundred men. More than a thousand negroes had been collected and followed the column, but most of them were recaptured by the enemy. It was asserted that about fifty miles of the Danville Railroad had been destroyed. A movement was made by the 6th corps to aid the expedition, on learning its situation, but without important results.

The weather at this period was exceedingly hot, and the army suffered greatly. At the same time a drouth prevailed, water became scarce, and the dust rose in clouds at every movement. The condition of the army at this time is thus described by the "Army and Navy Journal":

The medical and commissary department had been well conducted, but it is not too much to say that the troops were thoroughly worn out. While their spirit and enthusiasm were, and always have been, beyond all praise, the fatigues of so extraordinary a campaign had been overpowering. Officers experienced its effects as well as men. Their conspicuous bravery had stretched out, dead or wounded, commissioned officers of all grades, not by hundreds, but by thousands, before the James was crossed. The effect was apparent in some want of skill and experience in succeeding battles. Captains were sometimes commanding regiments, and majors brigades. The men, missing the familiar forms and voices that had led them to the charge, would complain that they had

not their old officers to follow. On the other hand, more than one leader of a storming party was forced to say, as he came back from an unsuccessful attempt against the outworks of Petersburg, "My men do not charge as they did thirty days ago." A few commanders, too, showed the fatiguing effects of the campaign by a lack of health, by a lack of unity and harmony, or of alertness and skill. The last attacks on Petersburg show clearly how the campaign was telling on men and officers, and the two achievements on the Jerusalem road of the 22d and 23d of June, put the matter beyond all doubt. On the former occasion, the gallant 2d corps, whose reputation is unexcelled, fell back, division after division, from the enemy's onset, and one of the very finest brigades in the whole army was captured, with hardly a shot fired. In our account at that time the probable cause of the disaster was intimated. But when, in addition to this, the Vermont brigade of the 6th corps was badly cut up on the following day, it became clear that the rapidity of the fighting must be checked awhile. The pace was now too great. There was need of rest, recruitment, and some reorganization. It may be added, that the influx of raw troops and of Augur's troops from Washington, with new officers, had temporarily changed the character of brigades, of divisions, and almost of corps. These affairs of the 22d and 23d of June were the last offensive movements of infantry in force.

No movements of importance were made before Petersburg, and quiet prevailed for some days, excepting the artillery fire.

The second movement against the Virginia and Tennessee Railroad, and for the occupation of Lynchburg, thereby to coöperate with Gen. Grant against Richmond, commenced about May 31st. Gen. Sigel was removed from the Department of Western Virginia, and Gen. Hunter placed in command. On taking leave of his command Gen. Sigel issued the following order:

HEADQUARTERS, DEPARTMENT WEST VIRGINIA, }
May 31, 1864. }

By order of the President of the United States I am relieved from the command of this department.

Maj.-Gen. Hunter, United States volunteers, is my successor.

In leaving the troops under my immediate command, I feel it my duty to announce my most sincere thanks to the officers and men who have sustained me so faithfully during the last campaign.

Having no other wishes and aspirations but to serve and promote the good cause, which we are all bound to defend, I hope that final success may crown the indefatigable zeal and good will of this army.

F. SIGEL, Maj.-Gen.

The commands of Gens. Crook and Averill, which retired to Meadow Bluff, were reorganized and prepared for a simultaneous advance upon the Virginia and Tennessee Railroad and Lynchburg. Gen. Burbridge, in Kentucky, was ready to move upon extreme Southwest Virginia, so as to prevent any advance from that direction upon the rear of the combined forces about to move against Lynchburg. The position of the enemy at this time was most unfavorable for opposing these movements. Gen. Breckinridge, with the only Confederate force of importance west of the Blue Ridge, had been withdrawn to the army of Gen. Lee, leaving nothing but a few small brigades of inferior cavalry, about two regiments of infantry, and a small brigade of dismounted troops acting

as infantry. To supply the place of Gen. Breckinridge, the little force of Gen. McCausland was sent from Dublin depot to the front of Staunton, and Gen. W. E. Jones was ordered to take all the troops to the same position which he could move from Southwest Virginia. Gen. Jones, accordingly, got together all the Confederate troops west of New River, dismounting the brigades of cavalry, and moved to Staunton. He thus left in the extreme southwest only a few disjointed bodies of cavalry, and Gen. Morgan's command to oppose the advance of Gen. Burbridge. As this force was too small to effect that object by meeting Gen. Burbridge in front, with the slightest hope of success, it was resolved, as the only chance of saving the Southwest, that Gen. Morgan should dash boldly into the heart of Kentucky, and thus draw Gen. Burbridge away. This was expected to be successful, especially as Gen. Burbridge had much more to lose in Kentucky than the enemy had in Southwest Virginia.

On Sunday, June 29th, Gen. Morgan at the head of two thousand men passed through Pound Gap, on the border of Kentucky. At the same time a body of Gen. Burbridge's command was moving eastward and passed by Gen. Morgan. From Pound Gap he moved to Paintville, thence a scouting party was sent in advance to pick up horses. This body passed to Hazel Green, Owingsville, Flemingsburg, and Maysville, without resistance, thence to Mount Sterling, where a force from Gen. Burbridge overtook them. Other parties appeared in various places, but the main force moved to Cynthiana and Lexington, and approached Frankfort. Property was taken everywhere, the railroads destroyed, and bridges burned. Gen. Hobson, with a force of sixteen hundred men, was captured, and by the 12th of June Gen. Burbridge, with his whole command, was near Paris in full pursuit of Gen. Morgan. At Cynthiana a conflict took place, in which Gen. Burbridge reports that he killed three hundred and took as many more prisoners. He says: "Our loss in killed and wounded was about one hundred and fifty. Morgan's scattered forces are flying in all directions; have thrown away their arms, and are out of ammunition, and are wholly demoralized." Thus, by these movements, Gen. Burbridge was lured back to Kentucky and Southwest Virginia, for a time secured to the enemy. The rest and reorganization required by Gen. Burbridge's command, detained him until all the available reinforcements in Kentucky were required by Gen. Sherman in his progress to Atlanta.

Meanwhile the other parts of the general movement were in progress; Gen. Hunter, after assuming the command of the Department, issued the following order:

General Order No. 29.

HEADQUARTERS, DEPARTMENT WEST VIRGINIA, }
IN THE FIELD, * * * *

It is of the utmost importance that this army be placed in a condition for immediate efficiency.

We are contending against an enemy who is in

earnest, and if we expect success we too must be in earnest. We must be willing to make sacrifices—willing to suffer for a short time that a glorious result may crown our efforts. The country expects that every man will do his duty; and this well done, the protective care of a kind Providence will certainly ensure to us a complete success.

I. Every tent will be immediately turned in for transportation to Martinsburg, and all baggage not expressly allowed by this order will be at once sent to the rear. There will be but one wagon allowed to each regiment, and these will only be used to transport spare ammunition, camp kettles, tools, and mess-pans. Every wagon will have eight picked horses or mules, two drivers and two saddles. One wagon and one ambulance will be allowed to department headquarters, and the same to division and brigade headquarters. The other ambulances will be under the immediate orders of the Medical Director.

II. For the expedition on hand, the clothes that soldiers have on their backs, with one pair of extra shoes and socks, are amply sufficient. Every thing else in the shape of clothing will be packed to-day and sent to the rear. In each knapsack there must be one hundred rounds of ammunition, carefully packed; four pounds of hard bread, to last eight days; ten rations of coffee, sugar, and salt, and one pair of shoes and socks, but nothing else.

III. Brigade and all other commanders will be held strictly responsible that their commands are amply supplied on the march. Cattle, sheep, and hogs, and if necessary, horses and mules must be taken and slaughtered. These supplies will be seized under the direction of officers duly authorized, and upon a system which will hereafter be regulated. No straggling or pillaging will be allowed. Brigade and other commanders will be held responsible that there is a proper and orderly division of the supplies taken for our use.

IV. Commanders will attend personally to the prompt execution of this order, so that we may move to-morrow morning. They will see that in passing through the country in this way—depending upon it for forage and supplies—great attention is required of every commanding officer toward the enforcement of strict discipline.

V. The commanding general expects of every officer and soldier of the army in the field an earnest and unwavering support. He relies with confidence upon an ever kind Providence for a glorious result. The lieutenant-general commanding the armies of the United States, who is now vigorously pressing back the enemy upon their last stronghold, expects much from the Army of the Shenandoah, and he must not be disappointed.

VI. In conclusion, the major-general commanding makes it known that he will hold every officer to the strictest accountability for the proper enforcement of discipline in all respects; and that, on the other hand, he will never cease to urge the prompt promotion of all officers, non-commissioned officers, and enlisted men who attract recognition by their gallantry and good conduct.

By command of Maj.-Gen. HUNTER.
CHARLES G. HALPINE, Asst Adj.-Gen.

His first movement was made from the neighborhood of Cedar Creek nearly to Woodstock. The guerrillas in the rear soon became troublesome, and were partially successful in destroying his communications. The advance continued through Woodstock, Mount Jackson, New Market, to Harrisonburg. On leaving this place the column was divided into two parts, one of which took the road by Port Republic, and the other the direct route to Staunton. The movement to Port Republic was a demonstration against the right of the enemy, and it

encountered a movement on their part against the Federal left. At the same time the main body advanced in the direction of Mount Crawford, and met the enemy on North River, twelve miles from Staunton. A hot conflict ensued, as well here as at Port Republic, but the enemy were steadily driven on the North River, which exposed their right, and thus compelled it to fall back. At the same time Gen. Crook was approaching from the west, and the enemy in falling back retired toward Waynesboro' on the east. The loss of Gen. Hunter was two hundred and fifty. That of the enemy was severe, and included the commanding general, W. E. Jones. Staunton was immediately occupied by Gen. Hunter. Stores and railroad property of a large amount were captured.

The advance of Gens. Crook and Averill from Meadow Bluff was commenced on May 31st. They moved through Lewisburg, White Sulphur Springs, &c., to the Gaston depot on the Virginia Central Railroad by June 5th. This is about forty miles below the terminus of the road. Here the work of destruction commenced. The track was torn up, and bridges and culverts destroyed for a distance of ten miles. Thence the force moved over North Mountain, through Pond Gap to Staunton, and arrived on the 8th of June. The enemy attempted constantly to impede their progress.

On June 10th the consolidated command of Gen. Hunter marched from Staunton on the road through Middlebrook to Lexington, Gen. Crook's command being in advance. Three miles from Staunton the enemy, under Gen. McCausland, were posted behind rail breastworks, designed to delay the movement as much as possible. The steady advance, however, dislodged them, driving them ahead. Seventeen miles from Staunton they managed to kill two men and wound two others, when a strong force of cavalry dispersed them for that day. In the forenoon of the 11th Lexington was reached. The enemy had burned the bridge over the James, and were posted on the high bank opposite. They were driven off with artillery, after which the river was crossed at the fords and the town occupied. On Sunday, the 12th, the Military Institute and the house of Gov. Letcher were burned. Ten minutes were allowed to remove any property from the latter. A number of canal boats were destroyed, and considerable ammunition seized. A bronze statue of Gen. Geo. Washington, cast upon the orders of the legislature of Virginia, was taken down and subsequently transported to Wheeling, Va. On the 13th Gen. Averill was ordered to Buchanan, and the whole force followed on the next day. On Thursday, the 16th, Liberty was reached, and seven miles of railroad and the culverts and bridges destroyed. On the 17th the advance under Gen. Crook arrived within eight miles of Lynchburg at 10 A. M., and halted for the main force to come up. It arrived at 8 P. M., and moved on within

an hour. After an advance of two miles the first position of the enemy was reached. They immediately opened with a brisk cannonade, but were soon driven back two miles to their line of breastworks with considerable loss to both sides. Night coming on Gen. Hunter was compelled to halt. All night the whistles of locomotives were heard in Lynchburg, bringing reinforcements from Richmond. On the next day the enemy appeared in force, and advanced to turn the right of Gen. Hunter's force. After a sharp struggle they were driven back to their breastworks, which were protected by others in the rear. The position of the enemy now appeared to Gen. Hunter to be so strong, and his numbers so great, as to destroy all hope of success with his army, now on limited rations. In the afternoon, therefore, the trains were started back, and at 9 P. M. the command commenced retreating, and marched until 1 A. M. the next morning, when they arrived within five miles of Liberty. At 9 A. M. the march was renewed until 2 P. M., when a halt was made three miles southwest of Liberty. The enemy followed close, and the skirmishing was continually heavy. The rear was brought up by Gen. Crook. At 6 P. M. the command was again on the march, and reached Bonsack's depot at 10 A. M. of the 20th, where a halt for rest was made. At 8 P. M. the march was resumed, via Buford's Gap, for Salem, which was reached at 5 o'clock on the next morning. The enemy continued a hot pursuit, and on the 21st captured ten pieces of artillery in a deep gap. Six were recaptured. That night the command rested all night for the first time since leaving Lynchburg. New Castle, in Craig County, was reached at 6 P. M. on the 22d. On the night of the 25th Meadow Bluff was reached by the force, being without supplies, except such as could be obtained from the sparse inhabitants of a mountainous country. On the 27th rations were obtained, and Gen. Hunter arrived at Loup Creek during the next day. On the same day the following despatch from Gen. Hunter was issued by the War Department:

WASHINGTON, June 28—4 P. M.

Maj.-Gen. Dix:

The following despatch has just been received from Gen. Hunter:

"I have the honor to report that our expedition has been extremely successful, inflicting great injury upon the enemy, and victorious in every engagement. Running short of ammunition, and finding it impossible to collect supplies while in the presence of an enemy believed to be superior to our force in numbers and constantly receiving reinforcements from Richmond and other points, I deemed it best to withdraw, and have succeeded in doing so without serious loss to this point, where we have met with abundant supplies of food. A detailed report of our operations will be forwarded immediately. The command is in excellent heart and health, and ready, after a few days' rest, for service in any direction."

Nothing later than my telegram of this morning has been received from Gen. Grant or Gen. Sherman.

EDWIN M. STANTON, Secretary of War.

The operations of the expedition were commented upon unfavorably by two newspapers

in West Virginia. They were temporarily suppressed by Gen. Hunter. His reasons for this suppression, as well as his views of the condition of his men during the retreat, will be found in the annexed portion of a letter written by him:

HEADQUARTERS DEP'T OF WEST VIRGINIA.
CUMBERLAND, MD., July 18, 1864.

To his Exc. A. I. Boreman, Governor of West Virginia.

SIR: I have the honor to acknowledge the receipt of your communication dated July 10th, 1864, relative to the case of James E. Wharton, Esq., editor and proprietor of the "Parkersburg Gazette," and have first to state, in reply, that about two hours previous to the receipt of your letter orders had been given to the provost-marshal for Mr. Wharton's release, and he had been released before your letter reached my hand. And now a few words as to the causes which led to Mr. Wharton's arrest, and the temporary suppression of his journal.

As to the "criticism on your (my) conduct" in which Mr. Wharton indulged, and to which you refer, I agree with you that there was, of course, no offence whatever. It was merely a matter of taste on his part; nor was it noticed by me until you called my attention thereto as one of the possible causes for my action. But Mr. Wharton, in the editorial which led to the suppression of his paper, stated, first, that "Gen. Hunter, with his command, have principally passed through our city (Parkersburg) on their way east." This was contraband news, and was utterly untrue. Much less than one-tenth of my command had passed through Parkersburg, and I was detained there for some time after the appearance of the article, hurrying forward the balance.

In the second place Mr. Wharton went on to say, in the same article: "We were sorry to see so much suffering among them. They were completely worn out, and many in the division had died of starvation." "The sufferings of the soldiers in their movement from Lynchburg to Charleston were terrible, and they half require rest and surgical care."

That there was "some suffering" amongst the troops is true. The business of the soldier is one in which "suffering" forms an inevitable part. But on careful inquiry, personally and through many officers employed for the purpose, I have failed to discover even a report of any one case of death from hunger; while, on the other hand, my medical director, Surgeon Thomas B. Reed, an officer of large military experience and excellent judgment, assures me that, despite the certain limited privations and great fatigues of the march, the health of the command was, throughout, far better than the average health of soldiers quietly resting in their camps.

I have the honor to be, sir, with very sincere respect, your most obedient servant,

D. HUNTER, Maj.-Gen. Commanding.

The reason for his retreat through West Virginia was stated to be that "the return march down the Shenandoah to Staunton, was flanked by the railroad from Lynchburg to Waynesboro', and that Hunter with his whole command must, therefore, have been out off and destroyed or captured, had any such movement been attempted."

Simultaneously with the beginning of the movement against Richmond, a cavalry raid was made by Gen. Sheridan from New Castle Ferry on the Pamunkey River to Gordonsville, the junction of the Virginia Central Railroad with the road to Alexandria. His report of the expedition was as follows:

I crossed the Pamunkey River on the 7th instant,

marching via Aylett's, and encamped on Herring Creek.

On the morning of the 8th I resumed the march, via Polecat station, and encamped three miles west of the station.

On the 9th I marched through Childsburg and New Market, encamping on E. N. E. Creek, near Young's bridge.

On the 10th I marched via Andrews' Tavern and Leiman's store, crossing both branches of the North Anna, and encamped at Buch Childs, about three miles northeast of Trevilian station.

My intention was to break the railroad at this station, march through Mechanicsville, cut the Gordonsville and Charlottesville Railroad near Lindsay's house, and then to march on Charlottesville; but on our arrival at Buch Childs I found the enemy's cavalry in my immediate front.

On the morning of the 11th Gen. Torbert, with his division, and Col. Gregg, of Gen. Gregg's division, attacked the enemy. After an obstinate contest they drove him from successive lines of breastworks, through an almost impassable forest, back on Trevilian station.

In the mean time Gen. Custer was ordered with his brigade to proceed by a country road so as to reach the station in the rear of the enemy's cavalry. On his arrival at this point the enemy broke into a complete rout, leaving his dead and nearly all of his wounded in our hands; also twenty officers, five hundred men, and three hundred horses.

These operations occupied the whole of the day. At night I encamped at Trevilian station, and, on the morning of the 12th inst., commenced destroying the railroad from this point to Lorrain Court House. This was thoroughly done, the ties burned and the rails rendered unserviceable.

The destruction of the railroad occupied until 8 o'clock of this day, when I directed Gen. Torbert to advance with his division and Gen. Davis' brigade of Gen. Gregg's division in the direction of Gordonsville and attack the enemy, who had concentrated and been reinforced by infantry during the night, and had also constructed rifle-pits at a point about five miles from Gordonsville. The advance was made, but as the enemy's position was found too strong to assault, no general assault was made. On the extreme right of our lines a portion of the Reserve brigade carried the enemy's works twice, and was twice driven therefrom by infantry. Night closed the contest. I found, on examination of the command, that there was not a sufficiency of ammunition left to continue the engagement.

The next day trains of cars also came down to where we were engaged with the enemy. The reports of prisoners and citizens were that Pickett's old division was coming to prevent the taking of Gordonsville. I, therefore, during the night and next morning, withdrew my command over the North Anna, via Carpenter's ford, near Miner's bridge. In addition, the animals were for the two entire days in which we were engaged without forage. The surrounding country afforded nothing but grazing of a very inferior quality, and generally at such points as were inaccessible to us. The cavalry engagement of the 12th was by far the most brilliant one of the present campaign. The enemy's loss was very heavy. They lost the following named officers in killed and wounded:—Col. McAllister, commanding a regiment, killed; Brig.-Gen. Rosser, commanding a brigade, wounded, and Col. Custer, commanding a regiment, wounded. My loss in killed and wounded will be about five hundred and seventy-five. Of this number four hundred and ninety are wounded. I brought off in my ambulances three hundred and seventy seven—all that could be transported. The remainder were, with a number of rebel wounded that fell into my hands, left behind. Surgeons and attendants were detailed, and remained in charge of them. I captured and have now with me three hundred and

seventy prisoners of war, including twenty commissioned officers. My loss in captured will not exceed one hundred and sixty. They were principally from the 5th Michigan cavalry. This regiment gallantly charged down the Gordonsville road, capturing fifteen hundred horses and about eight hundred men; but were finally surrounded and had to give them up. When the enemy broke they hurried between Gen. Custer's command and Col. Gregg's brigade, capturing five caissons of Pennington's battery, three of which were afterwards recaptured, leaving in their hands two caissons.

The contest at Trevilian was reported by Gen. Lee to be a rebel victory.

The retirement of Gen. Hunter to West Virginia, with his army in such condition as to need rest and reorganization, left the Shenandoah valley open to the unresisted occupation of the enemy. At the same time the state of affairs at Petersburg permitted Gen. Lee to detach a force for the invasion of Maryland, and perhaps cause troops to be recalled from Gen. Grant for the defence of Washington. Rumors of the advance of the enemy down the Shenandoah valley preceded their appearance by some days. On Saturday, July 2d, they first reached the region of Martinsburg. On the news of their approach, Gen. Sigel determined to evacuate Martinsburg and a part of the stores were removed, including nearly all the rolling stock of the railroad company, and heavy trains loaded with supplies for Gen. Hunter. A quantity of valuable stores, however, were lost. The enemy first appeared at North Mountain, eight miles north of Martinsburg, which compelled Gen. Sigel to fall back to Harper's Ferry. On Saturday, July 8d, he was attacked at Leetown, and quickly driven from his position, and moved to the strong position of Maryland Heights, which he held. The main line of the enemy's advance was by way of Martinsburg and North Mountain, across the Potomac to Hagerstown. A panic spread over the region, and the inhabitants fled with such property as they could hastily seize and remove. At Frederick, Md., on the 5th, all the Government stores were loaded on railroad trains, and preparations made for an immediate evacuation of the city. On the same day Hagerstown was occupied and the stores plundered, and a requisition made on the inhabitants for \$20,000. This money was paid and the raiding party left. The Baltimore and Ohio Railroad was held by the enemy as far down as Sandy Hook, and much of the track torn up. The following were the orders of the commanding officer of the enemy to his force:

HEADQUARTERS CAVALRY DIVISION,
VALLEY DISTRICT, June 23, 1864.

The following directions for the march of this command will hereafter be strictly observed:—

Before the march begins on each morning the rolls of each company will be called after mounting, and the adjutant of each regiment will keep a list of the names of all deserters.

Before dismounting at camp in the evening the rolls will again be called, and the brigade commanders will report to these headquarters the number of men absent at each roll call.

The habitual order of the march will be in column

of "fours," but on narrow roads by "twos." The distance between the head of one brigade and the rear of the other will be two hundred yards. When artillery and ambulances accompany the brigades, those assigned to each brigade will follow immediately in rear of their brigades. During the march the brigades in rear will regulate their movements by those in front.

Regular halts will be made during the march, and neither officers nor men will leave the column, except at such halts, unless by the written consent of the brigade commander, and such permission will not be granted unless for important reasons.

Brigade, regimental, and company commanders will pass frequently from front to rear of their respective commands, to see that the column is at all times well closed up. Brigades will alternate in the march daily. A rear guard will be placed behind each brigade, and no person, except staff officers or couriers, will be permitted to fall behind such guard.

All the wagons of this division will march together under direction of the division quartermaster.

The quartermasters of the command will constantly accompany their respective trains. One man, dismounted when practicable, will go with each wagon to assist the driver. He will remain with the wagon. No other parties will be permitted with the train, except when a guard shall be necessary. The quartermasters will be held responsible that no others accompany the wagons. No other wagons or conveyances than those allowed from army headquarters will be allowed.

Upon reaching camp, officers and men must remain in their camps, and commanders will establish proper camp guards.

Immediately upon fixing the headquarters of the brigade the commanders will report their locality to division headquarters.

The utmost order and perfect quiet will be preserved upon the march and in camp. The silly practice of whooping and hallooing is strictly forbidden.

Destruction of the fences and crops of the farmers is positively prohibited, and such outrages will be paid for from the pay of the officers of the command nearest where such depredations may be committed.

Greatest care must be taken of ammunition. Not a cartridge must be fired unnecessarily. An important campaign is commenced, and upon its results depend more than we can estimate.

The Major-General commanding asks and expects from every man of his command a hearty and cheerful compliance with orders, assuring all that they shall reap and enjoy the full fruits of whatever their labors and privations may obtain.

By command of Maj.-Gen. RANSOM.
WALTER K. MARTIN, Asst.-Adjt.-Gen.
Brig.-Gen. NED McCausland, com'dg brigade.
N. FITZGERALD, Asst.-Adjt.-Gen.

On the same day the President issued a call for twelve thousand militia from Pennsylvania, twelve thousand from New York, five thousand from Massachusetts, and the various Governors issued proclamations calling out the troops, and the militia began to assemble.

On Wednesday there was some skirmishing with a few of the enemy's cavalry, between Hagerstown and Frederick. The Federal force from Hagerstown fell back toward Chambersburg. At various points along the Potomac and north there was some skirmishing.

On Thursday, a reconnoitring force sent out by Gen. Wallace from Monocacy, was quickly repulsed by the enemy. Boonsboro' and Middletown were occupied by them, and they advanced within a few miles of Frederick, and threw some shots into the city. Before morn-

ing of the 8th they withdrew to another quarter. The country on all sides was scoured for horses, forage, provisions, and money. On the 8th, another party from Harper's Ferry entered Hagerstown from Williamsport, and again plundered the inhabitants and burned some buildings. The enemy still occupied the road to Frederick with their main body behind Catocin Mountain. In the evening of the same day, Gen. Wallace withdrew with his force from Frederick to Monocacy Junction. At sunrise on the next morning, the 9th, the enemy entered and levied a contribution on the inhabitants. About 9 A.M. they advanced against Gen. Wallace, who occupied a position on the east side of the Monocacy River, with his batteries protecting the railroad and the turnpike. The attack of the enemy was made on his left under Gen. Ricketts, with varying success for some hours, when it was forced to give way. At the same time the right of Gen. Wallace was outflanked by the enemy, who, appearing in the rear, poured in a reverse fire and swept off about six hundred men and officers, including Gen. Tyler. Gen. Wallace now fell back, and the enemy pursued him some miles toward Ellicott's Mills on the Baltimore turnpike. His loss was about twelve hundred men, with six cannon. The command under Gen. Ricketts had been sent forward from Petersburg by Gen. Grant. The force of the enemy consisted of a column which crossed the Potomac at Williamsport, and another which had besieged Gen. Sigel for four days in Harper's Ferry.

The disaster to Gen. Wallace created great excitement in Washington and through the Northern States. Washington appeared to be in imminent peril, and reinforcements were hurried forward. The 19th army corps, which had been sent from New Orleans to reinforce Gen. Grant, was at this time entering the Chesapeake Bay. It was at once sent to Washington. One corps of Gen. Grant's army—the 6th, under Gen. Wright—was detached from the lines before Petersburg, and also sent to Washington. Gen. Wallace, in command at Baltimore, was superseded by Gen. Ord. Meantime the enemy, after tearing up some of the railroad from Frederick to Baltimore, sent their main body south of it and detached a cavalry force toward the Northern Central Railroad from Harrisburg, Penn., to Baltimore. This cavalry expedition overran Eastern Maryland. Twenty-five miles of the Northern Central road were destroyed, and on Monday, the 11th, a force appeared on the Baltimore, Wilmington, and Philadelphia road, and captured and set on fire the trains at Magnolia station, seventeen miles south of Havre de Grace. In one train Maj.-Gen. Franklin was captured, but afterwards made his escape. Some damage was done to the track, and Gunpowder bridge was partially burned. The cavalry, heavily loaded with plunder, came within six miles of Baltimore, then turning southward they joined the

force near Washington, which had been sent in that direction to guard against surprise. Part of it halted before Fort Stevens, on Seventeenth Street. Toward evening their sharpshooters had become so annoying, and their presence at the Capital so humiliating, that an attempt was made by Gen. Augur to dislodge them. A brigade of veteran infantry was detached along Seventeenth Street road, which encountered them, and a sharp skirmish ensued. The enemy were driven off, leaving about a hundred dead and wounded on the field. The Federal loss was between two and three hundred. While this demonstration was made before Washington, the rest of the enemy's force were moving across the Potomac, and on Wednesday morning the whole force was approaching the river and the invasion was ended.

On the retreat they were cautiously followed by a column from Washington, under Gen. Wright, consisting of the 6th corps and a division of the 19th. He crossed the Potomac below Edward's ferry and moved to Leesburg. At the same time a portion of one train was captured by the cavalry under Gen. Crook, with some of the teamsters and guard, and the rear driven through Snicker's gap after a sharp fight. The enemy, however, held the ferry across the Shenandoah with two guns, and checked the pursuit. On Monday, July 18th, the command of Gen. Wright and the cavalry under Gen. Crook, excepting a body sent to guard Ashby's gap, passed through Snicker's gap to the ferry. The infantry began to cross below the ferry. The cavalry also crossed, and forming a line with the brigade of Col. Wells on the left, and that of Col. Thorburn on the right, hotly engaged the enemy. As the latter were concentrating on the right, Gen. Wright began to cross the 6th corps to meet the enemy's concentration. But they charged the line with violence, and at length turned the right and drove it with some confusion across the ford. Finding the right giving way, Col. Wells withdrew the left, and the troops recrossed the river with a loss of three hundred. The force sent to Ashby's gap drove the enemy through the gap and across the river, but the latter finding their rear attacked, hurried back in force and compelled the command to retire with a loss of two hundred. The enemy now leisurely moved toward Winchester and Strasburg, and the force of Gen. Wright crossed the Shenandoah. They soon halted and recrossed, returning to Leesburg, whence Gen. Crook moved to Harper's Ferry, and Gen. Wright to Washington. On the 19th, the same day on which the enemy were overtaken at Snicker's ferry, Gen. Averill moved from Martinsburg toward Winchester, and encountered a cavalry force near Darksville. On the next morning he pressed toward Winchester, where he met the enemy, and a contest ensued for three hours, during which Gen. Averill captured four guns, several hundred small arms, and about two hundred prisoners. The total loss

of the enemy was between three and four hundred. The force of the enemy at hand caused him to halt in his advance.

The entire force of the enemy in this invasion was not far from 20,000 men. It included two infantry corps under Gens. Breckinridge and Rhodes, a division of cavalry under Gen. Ransom, and three batteries of artillery. The whole was under the command of Maj.-Gen. Jubal Early. Leaving a considerable force to guard his rear, about fifteen thousand crossed the Potomac. His loss was about fifteen hundred. A large amount of property was destroyed, five thousand horses driven off, one of the greatest panics was excited, and several thousand men were withdrawn from Gen. Grant's army.

Gen. Crook, after returning toward Harper's Ferry joined Gen. Averill, and on July 28d there was considerable skirmishing at Kerna-town, four miles beyond Winchester, and the Federal cavalry were driven back on the main body. On the next day the enemy pressed his advantage, and the cavalry were driven back in great rout through Winchester toward Bunker Hill. The breaking of his cavalry forced Gen. Crook to retreat. His command consisted of the cavalry under Gens. Averill and Duffie, and two divisions of infantry, about ten thousand men. The enemy being in greater strength outflanked him, and compelled a retreat from point to point. After the first struggle Gen. Early halted his main force about five miles north of Winchester, but his cavalry kept up a hot pursuit to Martinsburg. The loss of Gen. Crook from all sources was about twelve hundred, among whom was Col. Mulligan, killed. On the next day a sharp artillery engagement took place at Martinsburg, but Gen. Crook, having gained time to get off most of his trains, again fell back, and on the succeeding day crossed the Potomac into Maryland, without molestation by the enemy. Their loss in these affairs was considerable. None, however, were taken prisoners.

The enemy now held the west bank of the Potomac from Williamsport to Shepardstown. In Maryland and southern Pennsylvania the scenes in anticipation of the previous invasion were renewed—the panic—the frightful stories, fugitives, and the roads blocked with every species of property, which its owners were endeavoring to remove to a place of safety. The Federal troops rallied again, and on the 27th it was found that the enemy was not opposite Williamsport. On the next day, Gen. Kelly crossed and reoccupied Martinsburg, which the enemy had already evacuated. On the next day, the 29th of July, a force of the enemy crossed the Potomac, and advanced on Chambersburg, in Pennsylvania. On the next day, Saturday, they dispersed some troops at Carlisle barracks, and a force of two or three hundred mounted men entered Chambersburg and set it on fire. A part of the inhabitants, with their valuable property, had gone off on the

previous day. The enemy demanded a ransom of \$500,000, which not being paid, about two-thirds of the town, or two hundred and fifty houses, were burned. The inhabitants who remained made no opposition.

During the forenoon the enemy withdrew. Immediately afterwards Gen. Averill entered the town, and without stopping to extinguish the flames set out in pursuit. On Thursday evening previous he had retreated from Hagerstown toward Carlisle. During Friday he was driven back to Greencastle by the force of the enemy which on that day crossed the Potomac, and a part of his train lost. At night the enemy turned toward Chambersburg, and Gen. Averill on the next morning began to follow after them through St. Thomas, Loudon, and McConnellsburg. The force from Chambersburg having reached their reserves, were overtaken by Gen. Averill toward evening, eight miles beyond McConnellsburg. Skirmishing took place until dark. On the next day Gen. Averill followed to Hancock, where the enemy checked the pursuit by felling trees and burning bridges behind him.

On Saturday, Col. Mosby, a partisan ranger, with about fifty men crossed the Potomac at Cheat ferry, pushed up the towpath to Adams-town, captured the picket there, consisting of thirty or forty cavalry, cut the telegraph wire, robbed a few stores, and quickly retired. This affair created great alarm at Frederick, Monocacy, and Poolesville. It stopped the railroad trains in the neighborhood, and gave rise to a report that Gen. Early was invading Pennsylvania with forty thousand men.

The band of Col. Mosby on its return encountered a superior force at Conrad's ferry, with which a slight skirmish occurred. The panic, however, increased. Gen. Couch telegraphed to the authorities at Pittsburg that "it is believed Breckinridge is marching west." All business was immediately suspended, and on Sunday a public meeting was held to prepare for defence. On Monday, August 1st, Gen. Curtis called the State Legislature to assemble on the 9th to take prompt measures in so great a crisis. At the same time Gen. Couch examined the defences on the Ohio and Monongahela Rivers. The 6th corps started for the scene of action on hearing of the defeat of Gen. Crook. Leaving Georgetown on July 26th, it bivouacked at Rockville at night. On the next day it marched to Hyattstown and reached the Monocacy on Thursday, and passing through Frederick encamped at Jefferson. On Friday evening it reached Halltown, three miles from Harper's Ferry. The force at that point, on Saturday, the day that Chambersburg was burned, consisted of the 6th corps, a part of the 19th, and the infantry of Gen. Hunter, under Gen. Crook. On that day orders came to move in pursuit of Gen. Early's army, which was reported to be ravaging Pennsylvania. The whole force, with an immense wagon-train, marched hard during that day and the next,

losing some men by sunstroke, but finding no enemy. After a severe march they arrived at Frederick quite exhausted, and rested.

The small force of the enemy which had been in Maryland moved from Hancock on the Cumberland road, as above stated, the pursuit of Gen. Averill being checked by felling trees, &c. Gen. Kelley with his command in Western Virginia now started to intercept this advance. On Monday afternoon the enemy reached Folok's mill, three miles from Cumberland, and attacked Gen. Kelley, who was protecting the town. The skirmish continued until dark, and the enemy during the night fell back to Oldtown, leaving his killed and wounded, some wagons and ammunition. During the afternoon previous a force of five hundred men had been posted at Oldtown, under Col. Stough, to cut off the enemy's retreat. In the morning this force was attacked by the enemy, and, after a sharp skirmish, routed. The colonel and ninety men were made prisoners. The loss of the enemy in killed and wounded was about thirty; the Federal loss in this respect was much less. On Thursday, August 4th, the enemy made an attack on Gen. Crook, but were foiled, and during the night withdrew on the road to Moorefield. At that place he was overtaken by Gen. Averill and routed with the loss of his artillery, many wagons, and five hundred prisoners. The loss of Gen. Averill was about fifty. On Thursday, the 4th, a panic prevailed in Harrisburg, caused by a report that the enemy had crossed the Potomac, and was invading the North. Gen. Curtis issued a proclamation calling out thirty thousand militia, and the inhabitants in the Cumberland valley commenced another grand removal.

The result of these operations was to secure an organized defence under the command of Gen. Sheridan for the defence of the valley. This force, by orders of Gen. Grant, consisted of the 6th and 19th corps, the division of infantry under Gen. Crook, and the division of cavalry under Gen. Torbert, with four brigades of Gen. Hunter's cavalry.

The changes made before Petersburg during the operations of the enemy in Maryland, consisted chiefly in the transfer of troops to thwart them. The army of Gen. Grant continued more quiet than at any time since his campaign was commenced. The principal firing during this period was on the right and right centre, where Gen. Grant's lines were persistently pushed forward, and Petersburg and the batteries of the enemy monotonously shelled. Some skirmishes at different points also occurred by which a few men were lost on each side.

On July 1st a movement was made by a body of troops under Gen. Birney from Hilton Head, up the North Edisto River. They disembarked at White Point for the purpose of penetrating the country as far as practicable. The enemy were found in strong positions, and after some skirmishing the force withdrew. An attempt was also made to seize Fort Johnson on the

northern end of James Island, by crossing Morris Island. The enemy were found to be strong and on the alert, and the force was withdrawn.

About the same time, July 8d, Gen. Dennis with a force of three thousand men moved out from Vicksburg to destroy the railroad from Jackson to Canton. Jackson was easily occupied, but on the return, an attack of the enemy was made upon the rear, and a sharp skirmish followed. The loss was about two hundred on each side. Some other movements were made at this time in Mississippi and Missouri partaking of a guerrilla character.

In the latter part of July some changes were made in the commanders of the corps of the army of the James River. An order from the War Department relieving Gen. Butler was rescinded by Gen. Grant, and the former was retained in command. Gen. Smith was relieved from the command of the 18th corps and succeeded temporarily by Gen. Martindale, and then permanently by Gen. Ord, of the 8th corps. Gen. Gilmore was relieved of the command of the 10th corps, succeeded temporarily by Gens. W. H. H. Brooks and Terry, and permanently by Gen. Birney of the 2d corps.

The line of Gen. Grant extended at this time a distance of twenty miles. On the right, north of the James, at Deep Bottom, Gen. Foster's division of the 10th corps had been for some time in possession of an intrenched camp. This position served to prevent any sudden demonstration on the right flank by the enemy, who were in possession of Malvern Hill, and also checked any effort by them to blockade the river against gunboats and transports by field artillery. At the same time it furnished a good base for threatening an advance on Richmond from the southeast, or for making a feint in that direction. In the rear of Gen. Foster's position a pontoon bridge crossed the James which was thoroughly protected by gunboats, but in his front a large force of the enemy prevented an advance. On July 21st a second bridge was thrown across the James at Strawberry Plains a little further down, and on the next day a brigade of the 19th corps crossed over and held the head of the bridge. Constant skirmishing with the enemy followed for some days, and so threatening was the demonstration that a division was added to their force in front of Gen. Foster. On Tuesday, July 26th, rapid artillery firing, intermingled with musketry, was kept up during the forenoon. At evening it was renewed with the addition of the gunboats, and continued through the night. At 4 p. m. of the same day the 5th corps moved from the extreme left, followed by the cavalry under Gen. Sheridan to the James River at Jones's Neck. Before daylight they began to cross on a pontoon bridge, which had been muffled with hay and grass. A line of battle was then formed with Gen. Sheridan's cavalry on the extreme right, and the 2d corps next at Strawberry Plains, the brigade of the 19th corps on its left, and Gen.

Foster in his old position on the extreme left, at Deep Bottom.

The position of the enemy was in front of the 2d corps. They occupied rifle-pits, defended by one battery. An advance upon them was made by the 2d corps, during which Gen. Miles's brigade under cover flanked the whole position under a brisk charge. The enemy immediately retreated, losing their guns and some prisoners. A mile further in the rear they took a new position on a ridge. The Federal loss during the day was about a hundred. On the next day the demonstrations were continued, and a cavalry battle took place on the right with a loss of about two hundred and fifty. On Friday about four hundred empty wagons were taken across on the bridges as if an advance on Malvern Hill was to be made in great force. Nearly twenty thousand men and twenty cannon had thus been sent north of the James. Meanwhile the enemy hurried off a considerable force from Petersburg to meet these demonstrations, and during Thursday still more were sent. On Thursday evening, therefore, the 3d division of the 2d corps was secretly removed to Petersburg. After some skirmishing with the enemy on Friday afternoon, the rest of the 2d corps and the cavalry, after dark, retraced their steps and arrived before daybreak at Petersburg. At this place there had been the usual cannonade during the four preceding days.

All those movements were preliminaries to the explosion of a heavy mine which had been planted under one of the enemy's heaviest works. It had been suggested by Lieutenant-colonel Pleasants of the 48th Pennsylvania regiment, who with his regiment had been accustomed to mining before the war. By them the whole work was accomplished. It was begun on June 25th. It started in the side of a ravine in front of the 9th corps and pushed toward a formidable fort of the enemy situated about two thousand yards from Petersburg. The distance to be mined was about five hundred feet. The gallery was made in the usual shape, being about four feet wide at the bottom and sloping up to the top. Its height was about four and a half feet. A ventilating shaft was sunk near the entrance. The ground rose toward the enemy's position, and the tunnel was sloped upwards as it advanced. When the fort was reached, it was about twenty feet overhead. Wings were extended to the right and left, so that the main gallery might open into two diverging galleries, running along the outer line of the fort. Eight chambers were formed in these latter, separated by sand-bags and wood. Wooden pipes ran about a hundred feet from the magazines toward the mouth of the gallery, and were connected there by a hose or fuse which extended the rest of the distance. The chambers were charged with four tons of powder. After its completion a delay of some days ensued, during which the faint at Deep Bottom was made.

Every effort to conceal the work was made, but it was supposed that the enemy were aware of its existence.

The plan of assault was to explode the mine and immediately to open a cannonading from every gun on the line. Under cover of this concentrated fire, which might somewhat unnerve the enemy, a storming party was to rush through the gap made by the explosion and endeavor to carry the enemy's position beyond. In the rear of his first line was a strong crest, which commanded Petersburg. The Federal lines were less than a hundred and fifty yards distant from the enemy at the nearest points. The approach to the part to be charged, which was about the same distance, had been made difficult by abatis and entanglements. Nearly a hundred heavy guns had been brought up by Gen. Grant, some of which were eight-inch and some even heavier.

The assaulting force was the 9th corps, supported by the 18th corps, with the 2d in reserve on the right, and the 5th on the left, the whole closely massed, and leaving only the necessary garrisons to hold the more distant intrenchments. This force was in position soon after midnight on Friday, July 29th. The 9th corps was arranged with Gen. Ledlie's division in advance, Gens. Wilcox and Potter's next in support, and the colored division, in command of Gen. Ferrero, in the rear. The fuse was to be lighted at 8½ o'clock A. M. But, owing to dampness, the fire went out in the gallery. It was renewed after much delay, but the explosion did not take place until twenty minutes of five o'clock, and after sunrise. A heaving and trembling of the earth was followed by huge clouds of earth and all the contents of the fort, as guns, caissons, limbers, and the soldiers which manned them being thrown into the air. To the spectators it resembled a great fountain in appearance; then, poising for a moment, it quickly descended. A crater, one hundred feet or more in length and half as wide, and a depth of twenty feet, with heaps of ruins, remained where once stood a six-gun fort, its camp equipage, and two hundred men. Immediately after the explosion, the cannonading from a hundred guns commenced. Gradually recovering from his surprise the enemy began to respond, and soon their entire line was engaged. Meantime, after a few minutes' delay, Gen. Marshall's brigade, of Gen. Ledlie's division, began to advance across the deadly plain. The supporting brigades spread out and enveloped the flanking rifle-pits, capturing about two hundred prisoners. The breach was gained, and the troops began to reform for assault. Instead of bursting at once upon the frowning crest, four hundred yards distant, the advance brigades were suffered to throw up intrenchments and spend time in getting two guns to bear on the enemy. Meanwhile the latter rallied and poured a terrific enfilading fire upon the captured fort. At length the 7th

corps was re-formed, after a fatal delay, and with Gen. Potter's division on the right, Ledlie's in the centre, and Wilcox on the left, under cover of the fire of two guns, began the charge. At every step, the fire of the enemy in front and on each flank, concentrated with greater fury upon them and ploughed their ranks with slaughter. The charge was checked on the side of the crest, there was a halt, and finally the whole line, wavering under terrible odds, recoiled to the fort. The colored division of the corps remained. As a forlorn hope, it was despatched to do what the other three had failed in attempting. It rushed forward over the four hundred yards which separated it from the enemy only to meet the fate of its comrades. When once broken, it plunged headlong into the fort, upon which the enemy now concentrated their fire. It was evident the day was lost, and the question now was, how best to save the troops. Efforts were made by a division of the 18th and another of the 10th corps to distract the attention of the enemy, but they proved to be useless. His fire was directed straight upon the dismantled fort, now become a slaughter-pen, in which were huddled the fragments of the 9th corps, hoping for relief from their comrades who lay in their intrenchments, two hundred yards distant. Then squads of men began the work of retreating. But the enemy kept up a destructive cross-fire over every rod of the space between the fort and the Federal lines. The retreating movement, however, was kept up. Meanwhile, the enemy made several charges upon the ruins of the fort, which were bravely resisted by some of the officers and the remnants of the corps. About noon, however, a general retreat was ordered, a considerable part of the survivors of the assault having already crossed to the rear. Those who remained in the fort having exhausted their ammunition and being left unsupported by the rest of the army, were captured about 2 p. m. by a final charge of the enemy.

The Federal loss was estimated at five thousand; that of the enemy, one thousand, of whom two hundred were made prisoners. The dead lay on the field for thirty-six hours, when they were removed under a flag of truce.

On Friday, Aug. 5th, a mine was exploded by the enemy. No assault followed. On the 7th there was a sharp skirmish and an artillery duel in front of the 9th corps. In the afternoon of the 9th another duel with heavy mortars occurred on the right and right centre. On the same day an ordnance boat was receiving fixed ammunition at City Point, when, by dropping one of the cases, the whole cargo was exploded. On several succeeding days, before Petersburg, only picket and artillery firing took place.

On August 10th, preparations were made for digging a canal at Dutch Gap. A great bend in the James River forms a peninsula called Farrar's Island, which a neck of land, less

than half a mile wide, connects with the north shore. This isthmus it was proposed to cut by a canal. Such canal would save a circuit of six miles in a bend crowded with obstructions and torpedoes and guarded by gunboats of the enemy. If occupied, it would also flank the strong position of the enemy at Howlett's, where his heavy batteries swept the river. It would compel him to construct a new and more extended line of defence, requiring a larger force of men to defend it, and also bring Gen. Grant's forces dangerously near to Fort Darling. The prosecution of the work was continued through the remainder of the year, although often seriously and dangerously annoyed by the enemy. One of the last acts of Gen. Butler, while in command on the James, was an unsuccessful attempt to remove, by an explosion of powder, the earth at the entrance of the canal.

The state of operations at this time, as viewed by Gen. Grant, is expressed in the following letter :

HEADQUARTERS ARMY OF THE UNITED STATES,
CITY POINT, VA., August 16th, 1864. }

To Hon. E. B. Washburne :

DEAR SIR—I state to all citizens who visit me that all we want now to insure an early restoration of the Union is a determined unity of sentiment North. The rebels have now in their ranks their last man. The little boys and old men are guarding prisoners, guarding railroad bridges, and forming a good part of their garrisons for entrenched positions. A man lost by them cannot be replaced. They have robbed the cradle and the grave equally to get their present force. Besides what they lose in frequent skirmishes and battles, they are now losing from desertions and other causes at least one regiment per day.

With this drain upon them the end is not far distant, if we will only be true to ourselves. Their only hope now is in a divided North. This might give them reinforcements from Tennessee, Kentucky, Maryland, and Missouri, while it would weaken us. With the draft quickly enforced the enemy would become despondent, and would make but little resistance. I have no doubt but the enemy are exceedingly anxious to hold out until after the Presidential election. They have many hopes from its effects.

They hope a counter revolution; they hope the election of the Peace candidate. In fact, like "Micawber," they hope for something to "turn up." Our Peace friends, if they expect peace from separation, are much mistaken. It would but be the beginning of war with thousands of Northern men joining the South because of our disgrace in allowing separation. To have "peace on any terms" the South would demand the restoration of their slaves already freed; they would demand indemnity for losses sustained, and they would demand a treaty which would make the North slave-hunters for the South. They would demand pay for the restoration of every slave escaping to the North.

Yours, truly, U. S. GRANT.

On August 18th the 5th corps marched to Reams' station, on the Weldon Railroad, and surprised a body of the enemy guarding it, and took possession of the road. On the next day an impetuous attack was made upon their right by three brigades of the enemy under Gen. Mahone. The pickets and an advanced regiment were quickly driven back to the breast

works, and the enemy rushed through a gap in the line, separating the divisions of Crawford and Wilcox. A desperate engagement now ensued. At the same time the left of the line was attacked by the enemy under Gen. Heth, and the temporary intrenchments carried. On reaching the second line the enemy was brought to a stand, and then driven back with great slaughter. At this time reinforcements had arrived, consisting of the 1st and 2d divisions of the 9th corps. The lines were thus finally rallied and the enemy driven back, retrieving in a measure the disaster at the outset. The Federal loss was estimated between 8,500 and 4,000. The enemy claimed to have captured 2,700 prisoners. The Weldon Railroad was thus recovered by the enemy as far as Yellow Tavern, but the position first taken by Gen. Warren was held.

On August 28th, Gen. Grant issued the following order:

HEADQUARTERS ARMIES OF THE U. S., IN THE FIELD, }
VIRGINIA, August 28th, 1864. }

Special Orders No. 82.

Hereafter deserters from the Confederate army, who deliver themselves up to the United States forces, will, on taking the oath that they will not again take up arms during the present rebellion, be furnished subsistence and free transportation to their homes, if the same are within the lines of the Federal occupation.

If their homes are within such lines, they will be furnished subsistence and free transportation to any point in the Northern States.

All deserters who take the oath of allegiance will, if they desire it, be given employment in the Quartermaster's and other departments of the army, and the same remuneration paid them as is given to civilians employed for similar services.

Forced military duty, or services endangering them to capture by the Confederate forces, will not be exacted from such as give themselves up to the United States military authorities.

By command of Lieut.-Gen. GRANT.
T. S. BOWERS, A. A. G.

Affairs now remained quiet until September 10th, when the brigade of Gen. De Trobriand captured a portion of the enemy's pickets, inflicting a loss of one hundred to one hundred and fifty. On the 16th a body of the enemy's cavalry marched around in the rear of Gen. Meade's left at Reams' station, and captured the 18th Pennsylvania and a herd of 2,500 cattle. They were pursued by cavalry, but the pursuit was repulsed and they retired at leisure.

On September 14th the Secretary of War sent forward the following despatch:

WAR DEPARTMENT, September 14.

Major-General Dix, New York:

Lieutenant-General Grant telegraphs this department in respect to the draft as follows:

CITY POINT—10:30 A. M., September 18.

Hon. Edwin M. Stanton, Secretary of War:

We ought to have the whole number of men called for by the President in the shortest possible time. Prompt action in filling our armies will have more effect upon the enemy than a victory over them. They profess to believe, and make their men believe, there is such a party North in favor of recognizing Southern independence that the draft cannot be en-

forced. Let them be undeceived. Deserters come into our lines daily who tell us that the men are nearly universally tired of the war, and that desertions would be much more frequent, but they believe peace will be negotiated after the fall election. The enforcement of the draft and prompt filling up of our armies will save the shedding of blood to an immense degree.

U. S. GRANT, Lieutenant-General.

The following telegram has been received from Major-General Sherman on the same subject:

ATLANTA, GA.—9:30 P. M., Sept. 18.

Hon. E. M. Stanton, Secretary of War:

I am very glad to hear that the draft will be enforced. First, we want the men; second, they come as privates to fill up our old and tried regiments, with their experienced officers already on hand; and third, because the enforcement of the law will manifest a power resident in our Government equal to the occasion. Our Government, though a Democracy, should in times of trouble and danger be able to wield the power of a great nation. All well.

W. T. SHERMAN, Major-General.

The draft is ordered to commence in all the States and districts where the quota is not filled by volunteers, on Monday, the 19th, and will go on until completed. Volunteers and substitutes will be received and credited to as late a period as possible. Volunteering is still progressing with vigor in most of the States.

EDWIN M. STANTON,
Secretary of War.

A call for 500,000 men had been issued by the President on July 18th.

On Sept. 28th a movement was made by Gen. Grant on the north of the James. It was predicated on the belief that only a small force of the enemy occupied the works on the north side of the river, and a hope was entertained that by a sudden movement and a rapid advance the capture of Richmond might be the result. At the same time it was assumed that if the advance was successfully resisted it could only be accomplished by the withdrawal of a force from the south side of the river, which would materially aid the army of the Potomac in a contemplated movement on the enemy in the vicinity of Petersburg. Gen. Ord with the 18th corps was ordered to cross the James at Aikin's Landing, eight miles above Deep Bottom, and to mass his troops quietly on the north bank, and at daylight to advance against the enemy's works in his front with the utmost celerity, in order that no reinforcements might reach the enemy in time to oppose the movement. After capturing the works on Chapin's Farm, it was designed that he should without delay advance against the rear defences of Chapin's Bluff, and, after capturing these, destroy the bridges across the James and continue his advance toward Richmond, capturing the enemy or driving them before him, and effectually protecting his rear by the destruction of the bridges. At the same time Gen. Birney, on the afternoon of the 28th, with the 10th corps, moved to Bermuda Hundred and crossed the river during the night. A division of colored troops of the 18th corps was added to his force. Gen. Birney was ordered, by a rapid movement at daylight, to capture the enemy's work in front of Deep Bottom and gain possession of the New Market road lead-

ing to Richmond; thence to advance as rapidly as practicable toward Richmond, assaulting any works occupied by the enemy which he might meet, and establish communication or a connection with Gen. Ord at the Mill road, distant about seven miles from Richmond. Gen. Birney had captured the enemy's works at 8½ A. M., and by nine o'clock his second division was on the advance toward Richmond on the New Market road. Communication was established with Gen. Ord, as directed, by 10½ o'clock, and Gen. Grant, being on the field, expressed his gratification with the progress. The strong inner defenses of Chapin's Bluff were soon encountered, and preparations were made to assault them. Gen. Ord had carried the first line of the enemy's works in his immediate front, capturing some fifteen pieces of artillery, and was then preparing to act in conjunction with Gen. Birney upon the enemy's line of fortifications. As the works were evidently very formidable, it became necessary to organize a regular assaulting column. This delayed the assault until 2 P. M. Meantime reinforcements were sent to the enemy, and as the assaulting column advanced they could be seen entering the works. From this cause and the strength of the works, the assault was unsuccessful, although the troops behaved with great gallantry. Two regiments only of the colored division reached one of the rebel forts, where they found a ditch ten feet wide and eight feet deep between them and the parapet. More than a hundred of these brave fellows jumped into the ditch and assisted some of their comrades to mount the parapet by allowing them to climb up on their shoulders. About a dozen succeeded in mounting the parapet by these means. But this force which had bravely pushed on was far too small to capture the fort, and was therefore compelled to retire, leaving their comrades in the ditch of the fort. But these were unable to make good their escape, as it would have been certain death to leave the ditch and return to the troops, and were afterwards compelled to surrender. About eight hundred men were lost in this assault in killed, wounded, and prisoners. On the 30th the enemy attempted to recapture the works which had been taken, but without success. On the same day Gen. Warren attacked and carried the enemy's lines on their extreme right, and captured a number of prisoners. At the same time Gen. Meade attacked and carried the enemy's line near Poplar Grove Church.

On Oct. 7th the enemy made a vigorous and partially successful effort to turn the right flank of the army of the James. Gen. Anderson, with one brigade of cavalry and two of infantry, surprised the Federal cavalry and routed the force on the right and captured many of them. Upon encountering the main body near New Market the enemy were repulsed and abandoned the Central road. The loss was about five hundred, that of the enemy was some larger, including one hundred and fifty prisoners.

On the 27th a movement was made by a portion of the 2d and 5th corps against the enemy's position at Hatcher's Run. A severe engagement ensued, in which the troops of both corps were driven back with severe loss. They, however, held their original position. The following is Gen. Grant's despatch respecting this movement:

CITY POINT, Oct. 27—9 P. M.

To Hon. Edwin M. Stanton, Sec'y of War:

I have just returned from the crossing of the Boylston plank road with Hatcher's Creek. Our line now extends from its former left to Armstrong's mill, thence by the south bank of Hatcher's Creek to the point above named. At every point the enemy was found intrenched and his works manned. No attack was made during the day further than to drive pickets and cavalry inside of the main work. Our casualties have been light, probably less than two hundred killed, wounded, and missing. The same is probably true with the enemy. We captured, however, seven loaded teams on their way to Stony Creek to the enemy, about a dozen beef cattle, a travelling forge, and from seventy-five to one hundred prisoners. Butler extended around well toward the Yorktown road without finding a point unguarded. I shall keep our troops out where they are until toward noon to-morrow, in hopes of inviting an attack.

(Signed) U. S. GRANT, Lieut.-General.

The following is Gen. Lee's despatch:

HEADQUARTERS ARMY OF NORTHERN VIRGINIA, }
October 28th, 1864. }

Hon. James A. Seddon, Secretary of War:

Gen. A. P. Hill reports that the attack of Gen. Heth upon the enemy upon the Boylston plank road, mentioned in my despatch last evening, was made by three brigades under Gen. Mahone in front and Gen. Hampton in the rear. Mahone captured four hundred prisoners, three stands of colors, and six pieces of artillery. The latter could not be brought off, the enemy having possession of the bridge.

In the attack subsequently made by the enemy Gen. Mahone broke three lines of battle, and during the night the enemy retired from the Boylston plank road, leaving his wounded and more than two hundred and fifty dead on the field.

About 9 o'clock P. M. a small force assaulted and took possession of our works on the Baxter road, in front of Petersburg, but was soon driven out.

On the Williamsburg road yesterday, Gen. Field captured upward of four hundred prisoners and seven stands of colors. The enemy left a number of dead in front of our works and returned to his former position to-day.

R. E. LEE.

The subsequent movements during the year were comparatively unimportant. Both armies prepared such quarters as to enable them to retain their positions during the winter.

During the month of September, the Federal army in and about Atlanta were allowed to rest from the fatigues of active military duty, and many sick or deserving officers and men were sent home on furlough. The railroad was employed to its utmost capacity to bring forward supplies and recruits, and much important work was done in the construction of barracks, and in strengthening the defenses of Atlanta. All this seemed to indicate Gen. Sherman's intention to make the city a base for further operations southward, and to hold it with a powerful garrison. From his recent experience of the facility with which a cavalry force could temporarily interrupt his long line

of railroad communication, he was disposed to hasten this work, and the end of the month found Atlanta transformed into a considerable depot of supplies, and so protected by works that a moderate force could hold it against an enemy numerically much superior. The departure of the great body of the inhabitants, by lessening the number of persons to be subsisted, added to the capacity of the garrison to withstand a protracted siege.

Gen. Hood, meanwhile, kept his forces in the neighborhood of Jonesboro, receiving his supplies by the Macon road. His army numbered about 40,000 men, exclusive of the Georgia militia; and, as if to show that no immediate offensive movement was contemplated, the latter were withdrawn from him by Gov. Brown soon after the evacuation of Atlanta, through the following communication:

EXECUTIVE DEPARTMENT,
MILLEDGEVILLE, Sept. 10th, 1864.

Gen. J. B. Hood, Commanding Army of Tennessee:

GENERAL: As the militia of the State were called out for the defence of Atlanta during the campaign against it, which has terminated by the fall of the city into the hands of the enemy, and as many of them left their homes without preparation, expecting to be gone but a few weeks, who have remained in service over three months (most of the time in the trenches), justice requires that they be permitted, while the enemy are preparing for the winter campaign, to return to their homes, and look, for a time, after important interests, and prepare themselves for such service as may be required when another campaign commences against other important points in the State. I, therefore, hereby withdraw said organization from your command, in the hope that I shall be able to return it with greater numbers and equal efficiency, when the interests of the public service require it. In this connection, I beg leave to tender to you, general, my sincere thanks for your impartiality to the State troops, and for your uniform courtesy and kindness to me individually. With assurances of my high consideration and esteem, I am, very respectfully, your obedient servant,

JOSEPH E. BROWN.

To allow their principal Southern army to rust in inactivity, was not, however, the intention of the rebel authorities, who, whatever public statements they might make as to the insignificance of Gen. Sherman's conquest, knew that it was a vital blow aimed at the heart of the Confederacy, and that this was the belief of the Southern people. Something must be done, and that speedily, to arrest the progress of the Federal army, or Georgia, and perhaps the Gulf States, would be irretrievably lost. In this emergency Jefferson Davis started on a tour of inspection through the South, and at Macon, on Sept. 23d, delivered a public address on the crisis, so marked by indiscreet admissions that many of the Confederate papers at first refused to believe that it was genuine. He alluded with undisguised vexation to the depletion in Gen. Hood's ranks caused by absenteeism, and promised, if the deserters would return to duty, that Gen. Sherman should meet "the fate that befell the army of the French Empire in its retreat from Moscow. Our cavalry," he said, "and our people, will

harass and destroy his army as did the Cossacks that of Napoleon; and the Yankee general, like him, will escape with only a body-guard." These remarks foreshadowed a new policy, borrowed from that which Gen. Sherman himself had so successfully employed in the capture of Atlanta, and which, considering the long catalogue of rebel reverses in Georgia, had the merit of boldness, if not of farsightedness. The whole army of Gen. Hood, it was decided, should rapidly move in a compact body to the rear of Atlanta, and, after breaking up the railroad between the Chattahoochee and Chattanooga, push on to Bridgeport and destroy the great railroad bridge spanning the Tennessee River at that place. Should this be accomplished, Atlanta would be isolated from Chattanooga, and the latter in turn isolated from Nashville, and Gen. Sherman, cut off from his primary and secondary bases, would find Atlanta but a barren conquest, to be relinquished almost as soon as gained, and would be obliged to return to Tennessee. Atlanta would then fall from lack of provisions, or in consequence of the successful attacks of the Georgia militia.

In connection with this movement, Gen. Forrest, confessedly their ablest cavalry officer, was already operating in Southern Tennessee, where the Federal force was barely adequate to prevent him from interrupting communications between Nashville and Chattanooga. Not the least favorable result anticipated from this movement was the restoration of the *morale* of their army, which, dispirited by constant retreats and reverses, its leaders naturally supposed would be encouraged to greater efforts by an aggressive campaign. On the other hand, the effect of abandoning their conquests, to meet a defeated army operating in their rear, would be likely to perplex and disconcert the Federals. Such was the ingenious plan devised by the authorities, and, to a less able general than Sherman, its vigorous execution might have been productive of enormous disaster, including, of course, the abandonment of the conquests gained during a long and arduous campaign. The sequel will show that he was fully master of the situation, and that the boasts of the rebel papers, that "the great flanker was outflanked," were destined to prove illusive.

A week sufficed to complete Gen. Hood's arrangements, and by the 2d of October his army was across the Chattahoochee and on the march to Dallas, where the different corps were directed to concentrate. At this point he was enabled to threaten Rome and Kingston, as well as the fortified places on the railroad to Chattanooga; and there remained open, in case of defeat, a line of retreat southwest into Alabama. From Dallas he advanced east toward the railroad, and, on the 4th, captured the insignificant stations of Big Shanty and Ackworth, effecting a thorough destruction of the road between the two places. He

also sent a division under Gen. French to capture the Federal post at Allatoona Pass, where he had ascertained that a million and a half of rations for the Federal army were stored, on which he probably depended to replenish his commissariat. The natural strength of the position was such that ten thousand men could easily hold it against ten times their number, so long as their supplies held out, besides cutting off railroad communications between Chattanooga and Atlanta. This of itself might have compelled the evacuation of the latter city, and was a sufficient inducement to make the attack.

Gen. Sherman, however, aware that his seat in Atlanta was insecure while this long line of communications lay so exposed to interruption, had anticipated and partially provided against such a movement as this; and immediately upon hearing that Gen. Hood had crossed the Chattahoochee, he despatched Gen. Corse with reinforcements to Rome, which he supposed the enemy were aiming at. During the previous week he had sent Gen. Thomas with troops to Nashville to look after Forrest. His bridges having meanwhile been carried away by a freshet which filled the Chattahoochee, he was unable to move his main body until the 4th, when three pontoons were laid down, over which the armies of the Cumberland, the Tennessee, and the Ohio crossed, and took up their march in the direction of Marietta, with fifteen days' rations. The 20th corps, Gen. Slocum, was left to garrison Atlanta. Learning that the enemy had captured Big Shanty and Ackworth, and were threatening Allatoona, and alive to the imperative necessity of holding the latter place, Gen. Sherman at once communicated by signals instruction to Gen. Corse at Rome to reinforce the small garrison and hold the defences until the main body of the Federal army could come to his assistance. Upon receiving the message Gen. Corse placed nine hundred men on the cars, and reached Allatoona before the attack of French. With this addition the garrison numbered 1,700 men, with six guns.

Early on the morning of the 5th, Gen. French, with 7,000 troops, approached Allatoona, and summoned the Federal commander, "in order to save the unnecessary effusion of blood," to make an immediate surrender; to which the latter replied: "I shall not surrender, and you can commence the unnecessary effusion of blood whenever you please." The battle opened at 8 A. M., and was waged hotly until 2 o'clock in the afternoon. Driven from fort to fort, until they reached their last defence, the garrison fought with an obstinacy and desperation worthy of the great stake for which they contended. Their general was wounded early in the action, but relaxed in no degree his efforts to repel the enemy. On one occasion the opposing forces mingled in a bayonet charge. During the heat of the contest Gen. Sherman reached the summit of Kenesaw Mountain, whence he repeatedly signalled, to Gen. Corse

to hold out to the last. The announcement of approaching succor animated the garrison to renewed exertions, and they threw back the assaulting columns of the enemy again and again, finally compelling them to retire, beaten and disheartened, in the direction of Dallas. Their retreat was hastened by the rapid approach of Stanley's (4th) corps from the direction of Pine Mountain. The enemy left 700 to 800 killed, wounded, and prisoners in the hands of the Federals, and their total loss must have exceeded 1,000. The garrison lost 600 men. The town of Allatoona was reduced to a mere wreck by the severe fire of the enemy, and all the Federal artillery and cavalry horses were killed; but the valuable stores were saved, and the fort and pass held. The only important injury done by the rebels, was the destruction of six or seven miles of railroad between Big Shanty and Allatoona, which Gen. Sherman immediately commenced to repair.

For several days subsequent to the fight at Allatoona, Gen. Sherman remained in the latter place, watching the movements of Hood, who, he suspected, would march for Rome, and thence toward Bridgeport, or else to Kingston.

The 28d corps, commanded by Gen. Cox (Gen. Schofield, its commander, having previously been ordered to look after the defences of Chattanooga), was at once sent toward the former place, and, by the 10th, the whole army was on the march thither. Gen. Hood, however, crossing the Etowah and avoiding Rome, moved directly north, and on the 12th Stuart's corps of his army appeared in front of Resaca, the defences of which were held by Col. Weaver with 600 men and three pieces of artillery. The garrison immediately took to the rifle-pits surrounding the works, and kept the enemy's skirmishers at bay, and in the midst of a brisk contest a flag of truce approached, with the following message:

HEADQUARTERS ARMY TENNESSEE, {
IN THE FIELD, Oct. 12th, 1864. }

To the Officer Commanding the United States forces at Resaca, Ga.:

SIR: I demand the immediate and unconditional surrender of the post and garrison under your command; and should this be acceded to, all white officers and soldiers will be paroled in a few days. If the place is taken by assault, no prisoners will be taken.

Most respectfully, your obedient servant,
J. B. HOOD, General.

To which Col. Weaver replied:

HEADQUARTERS SECOND BRIGADE, {
THIRD DIVISION, FIFTEENTH ARMY CORPS. }

To Gen. J. B. Hood:

Your communication of this date just received. In reply, I have to state that I am somewhat surprised at the concluding paragraph, to the effect that "if the place is carried by assault, no prisoners will be taken." In my opinion, I can hold this post. If you want it, come and take it.

I am, General, very respectfully, your most obedient servant,
CLARK R. WEAVER, Comd'g Officer.
W. W. McCAMMON, A. A. A. G.

During the whole day continuous masses of rebel troops were passing the forts, but no serious attack was made upon the garrison, the

enemy being more intent upon destroying the railroad toward Dalton than wasting their time or strength upon the reduction of a post, the possession of which they wisely considered would be of no particular advantage to them. During the night they captured, after a gallant resistance, a block house at Tilton, garrisoned by part of the 17th Iowa regiment. Throughout the 13th and the 18th the work of destruction continued, the enemy gradually passing to the north, out of sight of Resaca, and on the evening of the latter day the advance of Gen. Sherman's army arrived from Rome, followed on the 14th by the main body, which encamped around Resaca for the night.

Meanwhile the rebel army, pursuing its devastating march north, reached Dalton on the 14th, and, in consequence of the negligence of the Federal scouts, surrounded the fort, garrisoned by the 44th colored regiment, Col. Johnston, before adequate preparations for defence could be made. A demand for surrender similar to that sent to Col. Weaver was at once made, which was refused. But Col. Johnston, discovering that the beleaguering force comprised the whole of Hood's army, and that Buzard Roost and other important points commanding his work had been occupied, subsequently surrendered his whole command. The 14th and 15th were employed by the enemy in continuing the destruction of the railroad as far as Tunnel Hill, which, whether through want of time or scarcity of gunpowder, they neglected to mine. They found no rolling stock of consequence on the road, and beyond the destruction of a few box-cars did little damage to this species of property. The approach of the Federal columns now warned Gen. Hood to move off to the west, and the 16th found him in full retreat for Lafayette, followed by Gen. Sherman, who, instead of marching along the railroad to Dalton, pushed for Snake Creek Gap, through which, in spite of obstructions accumulated there by Hood, he rapidly passed. At Ship's Gap he captured part of the 24th North Carolina regiment, stationed to delay his march. From Lafayette the enemy retreated in a southwesterly direction into Alabama through a broken and mountainous country, but scantily supplied with food for man or beast; and passing through Summerville, Gaylesville, and Blue Pond, halted at Gadsden, on the Coosa River, 75 miles from Lafayette. Here he paused for several days, receiving a few reinforcements brought up by Gen. Beauregard, who had on the 17th assumed command of the Confederate military division of the West in the following address:

HEADQUARTERS MILITARY DIVISION OF THE WEST, }
October 17th, 1864. }

In assuming command at this critical juncture of the Military Division of the West, I appeal to my countrymen of all classes and sections for their generous support and confidence. In assigning me to this responsible position, the President of the Confederate States has extended to me the assurance of his earnest support. The Executives of your States

meet me with similar expressions of their devotion to our cause. The noble army in the field, composed of brave men and gallant officers, are strangers to me, and I know that they will do all that patriots can achieve. The history of the past, written in the blood of their comrades, but foreshadows the glorious future which lies before them. Inspired by these bright promises of success, I make this appeal to the men and women of my country to lend me the aid of their earnest and cordial cooperation. Unable to join in the bloody conflicts of the field, they can do much to strengthen our cause, fill up our ranks, encourage our soldiers, inspire confidence, dispel gloom, and thus hasten on the day of our final success and deliverance.

The army of Sherman still defiantly holds Atlanta. He can and must be driven from it. It is only for the good people of Georgia and the surrounding States to speak the word, and the work is done. We have abundant provisions. There are men enough in the country liable to and able for service to accomplish this result. To all such I earnestly appeal to report promptly to their respective commands; and let those who cannot go see to it that none remain who are able to strike a blow in this critical and decisive hour. To those soldiers, if any, who are absent from their commands without leave, I appeal in the name of their brave comrades, with whom they have in the past so often shared the privations of the camp and the dangers of the battle-field, to return at once to their duty. To all such as shall report to their respective commands, in response to this appeal, within the next thirty days, an amnesty is hereby granted. My appeal is to every one, of all classes and conditions, to come forward freely, cheerfully, and with good heart to the work that lies before us.

My countrymen, respond to this call as you have done in days that have passed, and, with the blessing of a kind and overruling Providence, the enemy shall be driven from your soil. The security of your wives and daughters from the insults and outrages of a brutal foe shall be established soon, and be followed by a permanent and honorable peace. The claims of home and country, wife and children, uniting with the demands of honor and patriotism, summon us to the field. We cannot, dare not, will not fail to respond. Full of hope and confidence, I come to join in your struggles, sharing your privations, and with your brave and true men to strike the blow that shall bring success to our arms, triumph to our cause, and peace to our country. G. T. BEAUREGARD, General.

Gen. Hood still retained his special command, subject to the supervision or direction of Gen. Beauregard, and his army, after remaining a few days in Gadsden, moved, about the 1st of November, for Warrington, on the Tennessee River, 80 miles distant. Gen. Sherman meanwhile remained at Gaylesville, which place his main body reached about the 21st, watching the enemy's movements. During the retreat of Gen. Hood into Northern Alabama, he had frequent opportunities to join battle with his pursuers, which he uniformly declined.

The injuries to the railroad were confined to two sections, and covered about 28 miles of track: viz., 7 miles between Big Shanty and Allatoona, and 21 miles between Resaca and Tunnel Hill. So rapidly were the repairs effected, that, by the 20th, the road was in running order from Resaca to Atlanta; and on the 28th, while Gen. Hood was still lying at Gadsden, trains again left Chattanooga for Atlanta. Whatever, therefore, might be the final result of Hood's flanking movement, it had

entirely failed to interrupt the Federal communications to a degree that would compel the evacuation of Atlanta. Without permanently disabling the railroad, he had been driven with loss across the mountains south of Chattanooga into Alabama; had cut himself entirely adrift from that admirable railroad system which had so long kept his army supplied, and had left Georgia and the whole Southeast open to the invaders. He perhaps felt himself compensated for these disasters by the opportunity, now temptingly presented to him, to carry the war into Middle Tennessee and Kentucky, and plunder the richly-stored cities and farms of those States, forgetting that a general who had shown such fertile resources during a long and trying campaign, was still opposed to him, with more than double his own force.

It was undoubtedly a part of Gen. Sherman's plan to remain at Atlanta no longer than would suffice to accumulate stores and thoroughly strengthen the defences; after which he would continue his march southward. This, with a determined and unbroken enemy in his front, was likely, to judge from previous experience, to prove a tedious and dangerous operation. To relieve himself of the presence of that enemy was the problem to be solved. When, therefore, Gen. Hood crossed the Chattahoochee on his flanking march upon the Federal communications, it was with mingled feelings of hope and apprehension that he was watched by his vigilant adversary; hope, that he would finally place himself in the position where he was actually found on the 1st of November; and apprehension, lest he should again retire to his camp near Jonesboro. It will be remembered how apparently slow was the pursuit of the rebel army by Gen. Sherman after the former had crossed the Chattahoochee, and how readily it seemed to escape into Alabama, and thence march toward the Tennessee. To those who had witnessed the brilliant campaign to Atlanta, the Federal general's lack of energy and tardiness of movement seemed unaccountable. In the light of subsequent events it would now appear that Gen. Sherman, making only a show of following his adversary, deliberately lured him into Northern Alabama, for the purpose of pursuing an uninterrupted march with his own army through the heart of Georgia. The ill-advised plan of Gen. Hood had given him the very opportunity which he desired, and he prepared at once to avail himself of it.

Anticipating that his army was unnecessarily large for his purpose, he detached from it the 4th and 23d corps, which were ordered to Tennessee, *via* Chattanooga and Bridgeport, to reinforce Gen. Thomas. This left him four corps—the 14th, 15th, 16th and 17th—which had accompanied him from Atlanta, and the 20th left to garrison that place. Two armies were thus formed, of which the former, in conjunction with such forces as Gen. Thomas had in Ten-

nessee, was fully able to cope with Gen. Hood; while the latter, as events proved, was more than sufficient for the Georgia expedition. For several days Gen. Sherman retained his main force at Gaylesville, throwing out strong reconnoissances in the direction of the enemy, as if bent upon watching and thwarting his movement toward the Tennessee. But no sooner had he ascertained that Gen. Hood had started, than he moved his whole army eastward to Rome, with the exception of the two corps sent to Gen. Thomas, and commenced in earnest the preparations for his new campaign. Being no longer under the necessity of coping with an active enemy in his front, he had no further occasion to keep up a long line of railroad communication with a fortified base in his rear. The original plan, therefore, of provisioning Atlanta and using it as a secondary base, which would have required large details of troops, was willingly abandoned, and, in consequence, the place itself, and the greater part of the railroad connecting it with Chattanooga, became practically useless. To garrison and guard either, would be a simple waste of resources; and as it would be an act of needless generosity to leave them for the enemy to use, their destruction became a necessity. The army, once fairly started from Atlanta on its march through Georgia, was to cut loose from all bases and mainly subsist upon the country. This plan, so daring in its conception as to recall the achievements of the greatest generals of antiquity, appears to have been matured and carefully elaborated by Gen. Sherman long previous to its execution, and, upon being laid before the authorities at Washington, received their cordial approval.

During the first ten days of November every locomotive and car on the Chattanooga and Atlanta Railroad was employed in conveying North the inmates of the hospitals, and such supplies of all kinds as there was time to remove. The vast supplies of provisions, forage, stores, and machinery which had accumulated at Atlanta, Rome, and other points, the surplus artillery, baggage, and other useless wagons—every thing, in fact, likely to impede the movements of the army, was gathered up and sent safely to Chattanooga. In return, the trains brought down to Gen. Sherman recruits, convalescents, furloughed men, and ordnance supplies. On the night of November 11th, the last train left Atlanta for the North, and the army, supplied with every man and horse and gun which it needed, and having 80 days' rations in his wagons, was prepared to move toward the coast.

The five corps mentioned above as constituting the army which Gen. Sherman reserved for his expedition, were concentrated into four, by assigning one of the two divisions of the 16th corps (the remaining divisions were in Tennessee) to the 15th corps, and the other to the 17th. The expeditionary army then comprised the 14th corps, Gen. Jeff. C. Davis; the

W. T. Sherman

15th, Gen. Osterhaus commanding in the absence of Gen. Logan; the 17th, Gen. Blair; and the 20th, Gen. Slocum; beside four brigades of artillery, one for each corps, two horse batteries, and two divisions of cavalry. Gen. Barry, chief of artillery, in fitting out this important arm, withdrew every doubtful or suspicious horse, and supplied enough serviceable animals to give each artillery carriage eight horses, and each battery a reserve of twelve horses. The cavalry were equipped with equal care. The total force numbered between 50,000 and 60,000 picked men, constituting one of the most effective armies ever organized. The following order of Gen. Sherman gives the plan of march and other details of the campaign:

HEADQUARTERS MIL. DIV. OF THE MISSISSIPPI, }
IN THE FIELD, KINGSTON, GA., Wednesday, Nov. 9th. }
Special Field Order No. 120.

1. For the purpose of military operations, this army is divided into two wings, viz.: The right wing, Maj.-Gen. O. O. Howard commanding, the 15th and 17th corps. The left wing, Maj.-Gen. H. W. Slocum commanding, the 14th and 20th corps.

2. The habitual order of march will be, whenever practicable, by four roads, as nearly parallel as possible, and converging at points hereafter to be indicated in orders. The cavalry, Brig.-Gen. Kilpatrick commanding, will receive special orders from the Commander-in-Chief.

3. There will be no general trains of supplies, but each corps will have its ammunition and provision train, distributed habitually as follows: Behind each regiment should follow one wagon and one ambulance; behind each brigade should follow a due proportion of ammunition wagons, provision wagons, and ambulances. In case of danger, each army corps should change this order of march by having its advance and rear brigade unincumbered by wheels. The separate columns will start habitually at 7 A. M., and make about fifteen miles per day, unless otherwise fixed in orders.

4. The army will forage liberally on the country during the march. To this end, each brigade commander will organize a good and sufficient foraging party, under the command of one or more discreet officers, who will gather, near the route travelled, corn or forage of any kind, meat of any kind, vegetables, corn meal, or whatever is needed by the command; aiming at all times to keep in the wagon trains at least ten days' provisions for the command and three days' forage. Soldiers must not enter the dwellings of the inhabitants or commit any trespass; during the halt, or a camp, they may be permitted to gather turnips, potatoes, and other vegetables, and drive in stock in front of their camps. To regular foraging parties must be entrusted the gathering of provisions and forage at any distance from the road travelled.

5. To army corps commanders is entrusted the power to destroy mills, houses, cotton gins, etc., and for them this general principle is laid down: In districts and neighborhoods where the army is unmolested, no destruction of such property should be permitted; but should guerrillas or bushwhackers molest our march, or should the inhabitants burn bridges, obstruct roads, or otherwise manifest local hostility, then army corps commanders should order and enforce a devastation more or less relentless according to the measure of such hostility.

6. As for horses, mules, wagons, etc., belonging to the inhabitants, the cavalry and artillery may appropriate freely and without limit; discriminating, however, between the rich, who are usually hostile, and the poor or industrious, usually neutral or

friendly. Foraging parties may also take mules or horses, to replace the jaded animals of their trains, or to serve as pack-mules for the regiments or brigades. In all foraging, of whatever kind, the parties engaged will refrain from abusive or threatening language, and may, when the officer in command thinks proper, give written certificates of the facts, but no receipts; and they will endeavor to leave with each family a reasonable portion for their maintenance.

7. Negroes who are able-bodied and can be of service to the several columns, may be taken along; but each army commander will bear in mind that the question of supplies is a very important one, and that his first duty is to see to those who bear arms.

8. The organization at once of a good pioneer battalion for each corps, composed, if possible, of negroes, should be attended to. This battalion should follow the advance guard, should repair roads and double them if possible, so that the columns will not be delayed after reaching bad places. Also, army commanders should study the habit of giving the artillery and wagons the road, and marching their troops on one side; and also instruct their troops to assist wagons at steep hills or bad crossings of streams.

9. Capt. O. M. Poe, Chief Engineer, will assign to each wing of the army a pontoon train, fully equipped and organized, and the commanders thereof will see to its being properly protected at all times.

By order of Maj.-Gen. W. T. SHERMAN.

L. M. DARTON, Aide-de-Camp.

The following order issued by Gen. Slocum to the troops under his immediate command gives additional directions for the conduct of the march:

HEADQUARTERS TWENTIETH CORPS, }
ATLANTA, GA., Nov. 7th, 1864. }

[Circular.] When the troops leave camp on the march about to commence, they will carry in haversack two days' rations salt meat, two days' hard bread, ten days' coffee and salt, and five days' sugar. Each infantry soldier will carry sixty rounds of ammunition on his person. Every effort should be made by officers and men to save rations and ammunition; not a round of ammunition should be lost or unnecessarily expended. It is expected that the command will be supplied with subsistence and forage mainly from the country. All foraging will be done by parties detailed for the purpose by brigade commanders, under such rules as may be prescribed by brigade and division commanders. Pillaging, marauding, and every act of cruelty or abuse of citizens will be severely punished. Each brigade commander will have a strong rear guard on every march, and will order the arrest of all stragglers. The danger of straggling on this march should be impressed upon the mind of every officer and man of the command. Not only the reputation of the corps, but the personal safety of every man, will be dependent, in a great measure, upon the rigid enforcement of discipline and the care taken of the rations and ammunition.

By command of Maj.-Gen. SLOCUM.

H. W. PERKINS, Asst. Adj.-Gen.

A glance at the map will show that two parallel lines of railway, having a general southeasterly direction, connect Atlanta with the Atlantic seaboard, one terminating at Charleston, 808 miles distant, and the other at Savannah, 298 miles distant. The former line is composed of the Georgia Railroad, 171 miles in length, connecting Atlanta with Augusta, and of the South Carolina Railroad, extending from Augusta to Charleston, 187 miles; and the latter, of the Western and Macon road,

108 miles in length, connecting Atlanta with Macon; and of the Central Georgia road, 190 miles long, connecting Macon with Savannah. From Augusta there also runs a cross-road, due south, to Millen, on the Georgia Central road, 53 miles in length, which affords a second route from Atlanta to Savannah, ten miles longer than that through Macon. The average width of the belt of country embraced between the two main lines as far eastward as Augusta and Millen is about 40 miles; eastward of those points the country gradually expands to a width of nearly 100 miles.

The Georgia road, from Augusta to Atlanta, since the capture of the latter place, had lost much of its importance; but all the others, including that between Augusta and Millen, were essential links in the great chain of communications between the northern and southern portions of the Confederacy; and their destruction, which was one of the objects of the expedition, would sever the Gulf States as completely from Virginia and the Carolinas, as the trans-Mississippi States were cut off from the rest of the Confederacy after the fall of Vicksburg and Port Hudson. The country included in this

most populous of Georgia, containing the capital, Milledgeville, and many other important towns; and all accounts concurred in describing it as abundantly supplied with horses, cattle, and subsistence for an invading army. Here also had been conveyed for greater safety large numbers of slaves from the exposed parts of the rebel States. Not less important than these facts was the additional one, that, with the exception of a few brigades of cavalry under Gen. Wheeler, and such troops as could be gathered from Wilmington, Charleston, or Savannah, there was nothing but the Georgia militia to oppose the progress of Gen. Sherman. Under every circumstance, therefore, the two lines above described seemed likely to offer the most feasible route to the coast. The ultimate objective point of the expedition, whether Charleston or Savannah, it was left to circumstances to determine.

On the 11th of November the army was distributed as follows: the 14th corps, with which was Gen. Sherman, at Kingston; the 15th and 17th corps on the Powder Spring road, a little west of the Chattahoochee; and the 20th corps

of Gen. Slocum as commander of the left wing of the army, was commanded by Gen. Williams. On the morning of the 12th the 14th corps moved out of Kingston, leaving a brigade to cover the last shipment north of supplies and rolling stock. This was completed in the afternoon; a parting message, "All is well," was sent to Chattanooga by the telegraph wires, which were then cut, and by nightfall not a soldier of the expeditionary army remained north of Kingston. Following the line of the railroad, the 14th corps thoroughly destroyed every mile of track between Kingston and the Chattahoochee, and every building that could be of any possible use to the enemy. Some instances of wanton destruction by negroes and stragglers occurred, including churches and unoccupied buildings in Kingston, Ackworth, Marietta, and elsewhere; but, in general, private property was respected wherever the main body of the corps marched. On the evening of the 10th, Gen. Corse's division of the 15th corps had burned the public buildings and machine shops of Rome. On the 14th the corps reached the Chattahoochee, and on the

afternoon of the 15th marched into Atlanta. On the latter day, the 15th and 17th corps went into camp two miles south of the city, and the 20th corps marched out to a position somewhat further east. On the 7th, while the latter corps alone garrisoned Atlanta, a brigade of rebel cavalry which had been watching their opportunity, made a dash at the defenses, but were easily driven off. They nevertheless continued their demonstration—which they called the "Siege of Atlanta"—for several days, until constrained by the approach of the main Federal army to retire. The several corps having been newly supplied with clothing and such equipments as were necessary from the depots in Atlanta, and every thing valuable to the Government removed, the torch was, on the evening of the 15th, applied to the store houses, machine shops and depot buildings, the most substantial of which had previously been mined. For many hours the heavens were lighted up by the flames of this vast conflagration, which was rendered more awful by the roar of exploding shells and magazines, and, by dawn of the 16th, all that was valuable of the city which, next to Richmond, had furnished more material for prosecuting the rebellion than any other in the South, lay in ashes. As far as was possible, private property was spared, and the city rendered of no immediate use to the enemy.

The army being now concentrated and ready to march, Gen. Sherman caused the following order to be promulgated:

HEADQUARTERS MILITARY DIVISION OF THE MICHIGAN, IN THE FIELD, KINGSTON, GA., NOV. 8th, 1864. }

Special Field Orders No. 119.

The General Commanding deems it proper at this time to inform the officers and men of the 14th, 15th, 17th, and 20th corps, that he has organized them into an army for a special purpose, well known to the War Department and to Gen. Grant. It is sufficient for you to know that it involves a departure from our present base, and a long and difficult march to a new one. All the chances of war have been considered and provided for, as far as human sagacity can. All he asks of you is, to maintain that discipline, patience, and courage which have characterized you in the past, and hopes through you to strike a blow at our enemy that will have a material effect in producing what we all so much desire—his complete overthrow. Of all things, the most important is that the men, during marches and in camp, keep their places, and not scatter abroad as stragglers and foragers, to be picked up by a hostile people in detail. It is also of the utmost importance that our wagons should not be loaded with any thing but provisions and ammunition. All surplus servants, non-combatants, and refugees, should now go to the rear, and none should be encouraged to encumber us on the march. At some future time we will be enabled to provide for the poor whites and blacks who seek to escape the bondage they are now suffering under.

With these few simple cautions in your minds, he hopes to lead you to achievements equal in importance to those of the past.

By order of Gen. W. T. SHERMAN.

L. M. DUTTON, Aide-de-Camp.

On Nov. 16th the whole army marched eastward in four columns, the two under Slocum, with which was Gen. Sherman, following the railroad toward Augusta, while the right wing,

under Howard, moved along the Macon and Augusta road. Each wing had cavalry moving on its flanks. Whether the immediate objective was to be Augusta or Macon, or both, it was no part of the Federal general's plan to divulge. To perplex the enemy and divide his forces by pretended demonstrations on places widely separated, he judged would be most likely to ensure him a speedy and uninterrupted march to the coast.

Gen. Howard's command, of which the 15th corps formed the right wing, followed the railroad as far south as Jonesboro, where the mounted troops of Iverson essayed to make a stand, but were quickly dispersed by Kilpatrick. Thence the column moved east through McDonough and Jackson to the Ocmulgee, which it crossed at Planter's Factory, and passing south, through Monticello and Hillsboro, and between Milledgeville and Clinton, on the 22d struck the Georgia Central Railroad, with its left wing at Gordon, twenty miles east of Macon; the right wing being extended westward toward Griswoldville. In conjunction with the operations of this column the greater part of the Federal cavalry, under the immediate command of Gen. Kilpatrick, made a detour on the extreme right, through Griffin and Forsyth, toward Macon, within five miles of which place he was ordered to demonstrate. The rebels at first believed this to be another raid on a large scale; but learning of the approach of Gen. Howard's column they made haste to concentrate at Macon all their available troops, consisting of some cavalry under Wheeler, a small body of regulars, and several brigades of militia. They still remained in ignorance of Gen. Slocum's movement in the direction of Augusta, but believed Macon to be the main objective point of Gen. Sherman. On the 20th about eight hundred Federal cavalry, with four cannon, made a feigned attack on East Macon, two miles east of the city, which though resulting in little loss on either side, very effectually accomplished its purpose of deceiving the enemy. At one period of the fight a rebel battery was captured in a daring charge by the Federal troops, who, however, having no means of carrying off the guns, were obliged to relinquish them to the enemy. The Federal cavalry finally retired in the direction of Griswoldville after destroying several miles of railroad east of Walnut Creek.

Upon striking the Georgia Central Railroad, on the 22d, the 15th and 17th corps immediately began to destroy the track and the road bed between Gordon and Griswoldville in that thorough manner in which previous experience had rendered the troops adepts. It was while this work was going on that the most serious battle of the campaign up to this date took place. A brigade of infantry, with a section of artillery and some cavalry, under Gen. Walcott, forming the extreme right wing of the 15th corps, had been thrown forward to

The above Maps represent a belt of country about 80 miles in width and 260 in length, which may be said to have been covered by the operations of the expeditionary army. The lines of march pursued by the four main columns did not, perhaps, extend to the extreme limits of this region; but there is little of it east of the Atlanta and Macon Railroad and west of the Savannah River which was not visited by the cavalry or foraging parties. By reference to the text the movements of the several columns, down to the investment of Savannah, can be readily traced.

Griswoldville, to continue the demonstration against Macon so successfully commenced by Gen. Kilpatrick two days previous. After burning the principal buildings in the town, the troops took position in a wood, protected in front by an open morass, and threw up a rail barricade. At 2 o'clock in the afternoon a rebel force about five thousand strong was perceived approaching from the direction of Macon. The Federal cavalry fell slowly back on either flank of the infantry, protecting them from attack in flank and rear, and leaving the enemy no alternative but to make a direct front attack. The latter, comprising several brigades of militia under Gen. Phillips, with a part of Hardee's old command brought up from Savannah, advanced with considerable confidence; and with that ignorance of danger common to raw troops, attempted to carry by storm the Federal position. Six desperate assaults were made, which Gen. Walcott's troops from behind their breastworks repelled with ease and with trifling loss, while the enemy, exposed to a withering fire and part of the time floundering in the morass, paid dearly for their temerity and inexperience. They finally retired toward Macon, leaving three hundred dead upon the field, and having met with a total loss estimated at two thousand five hundred, including Gen. Anderson severely wounded. Their own estimate placed their loss at six hundred and fourteen, which, from all the facts attainable, is manifestly an under estimate. Macon could easily have been taken by Gen. Howard after this encounter, but the Federal commander-in-chief, from prudential motives, did not deem it advisable to make the attempt. His base being, in technical language, "in the air," the capture of a place of so little intrinsic importance, now that its railroad connections were severed, was not essential to the plan of the campaign.

Meanwhile the left wing of the expeditionary army pursued its march along the Augusta and Macon Railroad in two parallel columns, of which the left or outer one was the 20th corps. The 14th corps was accompanied by Gen. Sherman in person. The latter, having destroyed the railroad effectually as far as Covington, turned thence, on the 19th, south-east toward Milledgeville, while the 20th corps, which had previously marched somewhat north of the railroad, continued the work of destruction as far as Madison, sixty-nine miles east of Atlanta and one hundred and two west of Augusta. This was intended to be a demonstration against the latter city, and the more completely to deceive the enemy the Federal cavalry moving on this wing was sent as far east as Union Point, seventy-five miles from Augusta. From Madison the 20th corps marched nearly due south through Eatonton to Milledgeville, where its advance arrived on the 21st, followed on the next day by the 14th corps, which passed through Shady Dale and Eatonton. Neither corps encountered any opposition worth mentioning during the march.

VOL. IV.—10 A

At the time the expedition started from Atlanta the Georgia Legislature was in session at Milledgeville. The announcement of the approach of Kilpatrick's cavalry gave them at first no alarm, Macon being supposed to be the place aimed at, and the movement itself a raid. But when on the 18th it was ascertained that Gen. Howard's wing was moving through McDonough in a southeasterly direction, and that Gen. Slocum was evidently approaching from the north, an almost ludicrous panic and consternation seized upon the whole body of legislators, who, with Gov. Brown, fled in unseemly haste to Augusta with such valuables as could be packed within a few hours. On the morning of the 20th, two days after the departure of the legislature, a small party of Federal scouts dashed into the town, which was at once surrendered to them by the Mayor.

For several days previous to the evacuation of Atlanta, rumors of the probability of such an event were prevalent both in the loyal and disloyal States. By the latter the movement was supposed to have been forced upon Gen. Sherman by the aggressive campaign of Hood in Tennessee, and to promise substantial advantages to the rebel cause, no doubt being entertained that the Federal general, unable to maintain his communications with Chattanooga, had resolved to abandon his recent conquest and march back to Tennessee. The evacuation of Atlanta was in fact claimed as a rebel triumph. The cavalry advance toward Macon became in that light merely a demonstration to cover the retreat of the main body. When, however, the real purpose of Gen. Sherman became apparent, the unprepared condition of Georgia to oppose such a movement seems for the first time to have occurred to the State and Confederate authorities. Uttering almost in a single breath predictions of the speedy overthrow of Sherman and appeals to the people to rally against the invader, they exhibited in reality a degree of alarm which had any thing but an encouraging effect upon the public mind. On the 18th the following characteristic appeal was issued by Gen. Beauregard from his headquarters at Corinth, Ala.:

To the People of Georgia:

Arise for the defence of your native soil! Rally around your patriotic Governor and gallant soldiers. Obstruct and destroy all the roads in Sherman's front, flank, and rear, and his army will soon starve in your midst. Be confident. Be resolute. Trust in an overruling Providence, and success will soon crown your efforts. I hasten to join you in the defence of your homes and firesides.

G. T. BEAUREGARD.

Simultaneous with this came the following appeal from one of the Georgia Senators in the Confederate Congress:

RICHMOND, Nov. 18.

To the People of Georgia:

You have now the best opportunity ever yet presented to destroy the enemy. Put every thing at the disposal of our Generals, remove all provisions from the path of the invader, and put all obstructions in his path.

Every citizen with his gun and every negro with his spade and axe can do the work of a soldier. You can destroy the enemy by retarding his march.

Georgians be firm, act promptly, and fear not.
(Signed) B. H. HILL.

I most cordially approve the above.
JAMES A. SEDDON, Sec'y of War.

And this also from the Georgia delegation in the lower house of Congress:

RICHMOND, Nov. 19, 1864.

To the People of Georgia:

We have had a special conference with President Davis and the Secretary of War, and are able to assure you that they have done, and are still doing, all that can be done to meet the emergency that presses upon you. Let every man fly to arms. Remove your negroes, horses, cattle, and provisions from Sherman's army, and burn what you cannot carry. Burn all bridges, and block up the roads in his route. Assail the invader in front, flank, and rear, by night and by day. Let him have no rest.

JULIAN HARTRIDGE, MARK BLAUFORD,
J. H. REYNOLDS, Gen. N. LESTER,
JNO. T. SHEWMAKER, JOS. M. SMITH.

One of the last acts of Gov. Brown, before his hurried flight from Milledgeville, was to issue a proclamation ordering a levy *en masse* of the whole free white population of the State between the ages of sixteen and forty-five years, except the legislature and judiciary, ordained ministers of the gospel, railroad employes and telegraph operators, and all persons physically unable to bear arms. They were required to undergo military service for forty days, and failure to report at the designated places was to be considered equivalent to desertion. Should the directors or superintendents of railroad companies refuse to afford proper coöperation with the military authorities they were to be sent immediately to the front. Pursuant to a resolution of the Legislature the Governor also offered pardon to the prisoners in the penitentiary at Milledgeville if they would volunteer and prove themselves good soldiers. About a hundred accepted the offer. These preparations came manifestly too late to offer any other than a feeble resistance to the advance of Gen. Sherman's well-appointed army; and whatever opposition the latter did encounter during the remainder of the campaign was due to the efforts of such fragmentary bodies of Confederate troops or organized State militia as could be hastily concentrated.

But few of the troops that reached the neighborhood of Milledgeville entered the town, two or three regiments only being detailed to do provost guard duty and destroy public property. The magazines, penitentiary, arsenals, depot buildings, factories, and storehouses, with seventeen hundred bales of cotton, were burned; but the Capitol and the private residences received no injury, and, as far as possible, pillage was prevented. The principal of the State Asylum, and other persons, expressed their gratitude to Gen. Sherman that order was so fully maintained. Some stores and about twenty-five hundred small arms fell into the possession of the Federal

troops, and in the penitentiary were found some Federal prisoners of war. A number of sick rebels were also captured in the hospital.

While the left wing was enjoying a temporary rest at Milledgeville, the right advanced steadily along the Georgia Central Railroad to the Oconee, destroying every mile of track in its march. The rebels became aware at last that Macon was not to be seriously attacked, and by extraordinary exertions succeeded in getting Gen. Wheeler across the Oconee, in the neighborhood of the railroad bridge, where, aided by a body of militia under Gen. Wayne, he was prepared to dispute the passage. Upon reaching the bridge on the 28d, Gen. Howard found it too well guarded to effect a crossing except with considerable loss. A day or two was occupied with skirmishing across the river banks to occupy the enemy's attention, while the 15th corps was pushed down to a ford eight miles below the railroad, where a pontoon was laid without much difficulty. The rebel forces then made a precipitate retreat, and by the 26th the whole right wing was across the river and moving eastward along the railroad, which was destroyed as the column advanced. The left wing crossed the Oconee near Milledgeville without opposition on the 24th, and moved in a southeasterly direction toward Sandersville, a town lying a little north of the Georgia Central Railroad, and about 15 miles east of the river. This movement hastened the retreat of Gen. Wayne. The 14th corps now took post on the left flank of this column, which position it held during the remainder of the campaign. On the 26th, the 14th and 20th corps, marching on parallel roads, entered Sandersville simultaneously, driving out a body of rebel cavalry which essayed to impede their advance; and on the 27th and 28th both wings were temporarily encamped between Sandersville and Irwin's Cross Roads, a few miles south of the railroad. About this time Gen. Sherman transferred his quarters from the left wing to the 17th corps, then at Tennille, a railroad station near Sandersville.

After the demonstration toward Macon, ending with the action at Griswoldville, Gen. Kilpatrick shifted his cavalry force to the left wing. Remaining a day or two at Milledgeville to recruit, he started thence on the 25th in the direction of Waynesboro, a station on the Augusta and Millen Railroad, 75 miles due east, for the purpose partly of covering the passage of the main body of the army across the Ogeechee, the next great river on the route east of the Oconee, and partly of conducting a feint toward Augusta. On the 27th, a few hundred of his cavalry, under Captains Hays and Estes, dashed into Waynesboro, burned the railroad bridge over Briar Creek in the neighborhood, and after inflicting other damage, fell back on the succeeding day to the main cavalry body which lay east of the Ogeechee, in the neighborhood of Louisville. One of the prime objects of the advance was to surprise Millen

and release the Federal prisoners confined there; but nothing more than a demonstration in that direction was attempted, information reaching Gen. Kilpatrick that the enemy had for weeks previous been gradually removing the prisoners to some less exposed point in Southern Georgia.

On the 28th the 14th corps struck the Ogeechee River at Fenn's Bridge, 15 miles northeast of Sandersville, crossed on pontoons after some hours' delay, and marching down the left bank of the river reached Louisville on the 29th. The 20th corps at the same time moved along the railroad, which from Davisboro station immediately south of Fenn's bridge, follows for about 20 miles a course parallel with the Ogeechee. The 17th and 15th corps moved south of the railroad, the 15th, with which was Gen. Howard, covering the right flank of the army. The cavalry under Gen. Wheeler fell back steadily in the path of the advancing columns, seeking to delay their movements, and during the 28th and 29th had much sharp skirmishing with the Federal cavalry in the neighborhood of Louisville. Up to this time the objective point of Gen. Sherman was as much an uncertainty to the rebel leaders as at the commencement of the campaign; but in the appearance of Gen. Kilpatrick on the left flank of the Federal army, and especially in the occupation of Louisville by the 14th corps, Gen. Wheeler fancied he detected an intention to move in force upon Waynesboro, and thence to Augusta, 80 miles further north. That he should be thus deceived was part of the plan of Gen. Sherman, who gladly witnessed the rebel cavalry moving to the north to obstruct the supposed advance upon Augusta, and thus leaving him at liberty to cross the Ogeechee with his main body. On the 30th, the 20th and 17th corps, which had been actively engaged for several days in destroying the railroad between Tennille station and the river, succeeded in crossing with little difficulty, the former at the railroad bridge, and the latter near Barton station, a few miles further east. The 15th corps pursued its march in a parallel line with the other columns on the right bank of the river. The Ogeechee was naturally a line of great strength to the enemy, who might have made its passage a costly effort to the Federal army. That three of its four corps should have, under these circumstances, crossed without loss was esteemed one of the most brilliant pieces of strategy witnessed during the campaign.

On the morning of Nov. 30th Gens. Baird's and Morgan's divisions of the 14th corps moved forward a short distance on the road toward Waynesboro, which was the signal for Gen. Kilpatrick to renew, in cooperation with these troops, his demonstration against Augusta. For the purpose also of expediting Gen. Wheeler's movement to the north, the remaining division of the 14th corps demonstrated on the same day against his left flank. This had the desired effect, and during Dec. 1st that

general rapidly fell back before the Federal advance. During the 1st 2d and 3d constant skirmishing took place between the Federal and rebel cavalry, the latter being gradually pushed beyond Waynesboro. On the 3d they were found strongly posted on the railroad, two miles northeast of the town, with heavy rail barricades in front, and a swamp and railroad embankment on either flank. Two or three vigorous charges by the Federal cavalry sufficed to drive them from their defences with considerable loss. Up to this point Baird's division of the 14th corps formed the infantry support to the cavalry. The remaining divisions of this corps upon reaching Buckhead Creek had turned east to Lumpkin's station on the Augusta and Millen Railroad, 10 miles south of Waynesboro, where on the 3d and 4th they destroyed a considerable portion of the track. They then marched in a southeasterly direction for Jacksonboro, 20 miles east of Millen, where, on the 5th, they united with Gens. Kilpatrick and Baird, who having finished their demonstration against Augusta, moved rapidly south from Waynesboro on the 4th.

Meanwhile the 20th and 17th corps advanced steadily along the railroad, and on Dec. 2d the latter reached Millen. The 20th corps passed somewhat north of Millen, through Birdsville, and thence marched southeast, while the 15th corps moved in two columns to the west of the Ogeechee River, a day's march in advance of the main body. The whole army, pivoting, it may be said, upon Millen, now swung slowly around from its eastern course, and moved in parallel columns directly southward, all, with the exception of the 15th corps, marching down the peninsula formed by the Ogeechee and Savannah Rivers. The 17th corps followed the railroad, destroying it from Millen downward. The success of the feint toward Augusta was now demonstrated in the fact that Gen. Sherman was pursuing an uninterrupted march to the coast, with his army well in hand, while a large rebel force was concentrated in Augusta, too far in the rear of the Federal army to check its progress for a day, and utterly useless for offensive purposes. Even when it was ascertained that Gen. Sherman was moving south from Millen, the enemy appear to have been uncertain whether Savannah, Darien, Brunswick, or even Port Royal harbor was to be his objective point. After the deflection of the Federal march southward from Millen, however, they admitted that Gen. Sherman might possibly escape.

As the Federal army continued its advance down the peninsula between the Savannah and Ogeechee Rivers, it became apparent to Gen. Hardee, who held Savannah with fifteen thousand men, a great part of whom were militia, that that city was to be the objective of Gen. Sherman. A line of works, stretching from river to river, had been erected to delay the Federal advance; and for the purpose of preventing an attack upon the Savannah and

Gulf Railroad, which was being employed to its utmost capacity to bring supplies and reinforcements to the city, a force was sent across the Ogeechee, which it was supposed would offer effectual resistance to the progress of the 15th corps. The greater part of the latter, however, had crossed to the east bank of the Ogeechee, on the 7th, near Eden, and on the succeeding day Gen. Corse's division was pushed forward between the Little and Great Ogeechee, thirteen miles in advance of the main column, to the canal connecting the Ogeechee with the Savannah. The canal was quickly bridged, and the division intrenched in a strong position on the south side, the enemy, after a brief resistance, abandoning their advanced lines, and taking refuge within the fortifications proper of Savannah. Other portions of the 15th corps were immediately brought up to support Gen. Corse, and on the 9th a detachment moved forward to the Savannah and Gulf Railroad, destroyed the track for several miles around Miller's station, and captured a train of eighteen cars, with many prisoners, thus cutting off communication between Savannah and the South.

While the extreme right was thus closing in upon the rear of Savannah, the main body moved south by rapid marches between the Ogeechee and Savannah Rivers. The weather, which had been for the most part favorable during the first half of the campaign, became rainy after the columns passed Millen, and the swampy regions of the coast, which the army had now entered upon, offered serious obstacles to rapid marching. But, inspired by continued successes and the prospect of soon opening communications with the fleet on the coast, the troops pushed forward with no more delays than were caused by bridging streams or corduroying swamps, and on the evening of the 10th the advance of the several columns had reached positions varying from three to eight miles distant from Savannah. On the march the left wing struck the Savannah and Charleston Railroad where it crosses the Savannah River, from which point southward the track was thoroughly destroyed. The enemy showed considerable resistance as the Federal army approached the city, and the 14th and 17th corps sustained some loss in skirmishing. A number of men having been wounded by the explosion of shells and torpedoes, buried and concealed in the road, the rebel prisoners were placed in front of the columns, and compelled to remove them. Kilpatrick covered the rear, and kept at bay such scattered bodies of cavalry as attempted to harass the march. The 11th and 12th were occupied in putting the troops in position, establishing batteries, erecting breastworks, and in other operations connected with a regular investment, and on the latter day the army was concentrated so as to form a semicircle, extending from the Savannah River to the Savannah and Gulf Railroad. The line was about ten miles long, the extreme

left, held by the 20th corps, being about three miles from the city, while the extreme right of the 15th corps, resting on the railroad, was eleven miles distant. Next to the 20th corps came the 14th, and next to that on the right the 17th. Everywhere the troops encountered a strong line of earthworks, having heavy guns in position, and held apparently by a large force. These were the exterior fortifications of Savannah, and although of considerable extent, were so flanked by a series of impassable swamps stretching across the peninsula, as to be capable of easy defence. All the openings to these morasses, as well as the roads leading through them, had been fortified with extreme care, and could hardly be carried without severe loss.

Meanwhile, as early as the 9th, Capt. Duncan and two scouts had been sent from the 15th corps on the hazardous enterprise of penetrating the enemy's lines and reaching the coast, for the purpose of communicating with the fleet, which it was known was on the alert for intelligence from Gen. Sherman's army. Embarking in a small skiff on the Ogeechee, at nightfall, they paddled down the river until warned by the approach of day to conceal themselves in the rice swamps. On the night of the 10th they resumed their voyage, and creeping past Fort McAllister and the picket boats during a rain storm, emerged into Ossabaw Sound, where, on the morning of the 11th, they were picked up by the Federal gunboat *Flag*, which immediately conveyed them to Hilton Head. Gen. Foster, commanding the department, was at once summoned from Poootaligo, where he was demonstrating against the Charleston and Savannah Railroad in aid of Gen. Sherman's movement, and received from the scouts Gen. Howard's despatch of the 9th: "We have had perfect success, and the army is in fine spirits." This was the first direct intelligence from the expeditionary army since its departure from Atlanta, and its reception in the North a few days later caused universal rejoicing. The greater part of the available naval force on the station being already in the Savannah River for the purpose of co-operating with the army, nothing remained to be done but to send a few vessels around to Ossabaw and Wassaw Sounds to endeavor to open communications. Wassaw Sound, into which empties the Wilmington River, being nearer the city, was carefully explored by Gen. Foster and Admiral Dahlgren, and both there and in Ossabaw Sound the gunboats were directed to make frequent signals with the shore.

Gen. Sherman having determined that Ossabaw Sound, which forms the mouth of the Ogeechee, afforded the most practicable means of communicating with the fleet, immediately took measures to reduce Fort McAllister, which commands the water approaches in that direction. This work, situated on the right bank of the Great Ogeechee, about six miles from

the Sound, was one of the strongest of its class in the South, and had successfully resisted attacks by the Monitor fleet in January and March, 1863. It comprised three half bastions and two curtains, and mounted twenty-one guns, several of which were 8-inch and 10-inch pieces. Every line of approach, both by land and water, was swept by howitzers and field-pieces placed on the bastions, and along its front extended a ditch forty feet wide and of great depth, into whose bottom were driven heavy palisades. Outside of the ditch was a formidable line of abatis, and beyond this the land approaches were thickly planted with torpedoes. The fort had received additions in armament and garrison since the naval attacks, and was now held by two hundred and fifty men, commanded by Major Anderson and Captains Clinch and White.

On the evening of the 12th Gen. Hazen's division of the 15th corps, to which was assigned the duty of assaulting the fort, marched from its position on the Savannah and Gulf Railroad toward Kingsbridge over the Great Ogeechee, distant about six miles. This structure having been destroyed by the enemy, a new one, eighteen hundred feet in length, was erected during the night, and at daybreak of the 18th the column pushed on for Fort McAllister. At half-past four in the afternoon the work was completely invested, and the troops advanced to the assault in a single line, over an open space of six hundred yards, the greater part of which consisted of a rice swamp. The obstacles were formidable enough to have deterred veterans of more experience than those who formed the attacking column, and might have justified the erection of intrenchments and a system of gradual approaches, which would have involved a loss of valuable time and delayed the opening of communications with the fleet. "Carry the place by assault to-night if possible," was Gen. Sherman's order to Hazen, and the troops, fighting under the immediate eye of their commander, who was watching the action from a house-top some miles distant, and aroused to a high pitch of enthusiasm, pressed eagerly forward, regardless of bursting torpedoes or the fire from the fort. In an almost incredible short space of time the open ground was crossed, the abatis surmounted, and the ditch reached. A few minutes sufficed to remove the palisades, and the men, with loud cheers, swarmed over the parapet, shooting and bayoneting the gunners who refused to surrender, and planted the national colors upon the rampart. The assault occupied barely twenty minutes, and from first to last the storming column never wavered in its advance. The Federal loss was but twenty-three killed and eighty-two wounded, owing to the celerity of the movement, and that of the enemy amounted to fourteen killed and twenty-one wounded. Two hundred and eleven rebel officers and men were taken prisoners. On the succeeding day the latter were employed

in removing the torpedoes buried around the fort.

Just previous to the assault Gen. Sherman detected a gunboat reconnoitring in the river below the fort, and at once opened communications with her by signals. No sooner was the fort taken than he embarked in a rowboat on the Ogeechee, and a few hours later was taken on board of the steam tug *Dandelion* in the cabin of which he wrote his first despatch to the Secretary of War as follows:

ON BOARD DANDELION, OSAWATOMIE SOUND, {
11:50 P. M., Dec. 18.

To-day, at 5 P. M., Gen. Hazen's division of the 15th corps carried Fort McAllister by assault, capturing its entire garrison and stores. This opened to us the Osawatomie Sound, and I pushed down to this gunboat to communicate with the fleet. Before opening communication we had completely destroyed all the railroads leading into Savannah and invested the city. The left is on the Savannah River, three miles above the city, and the right on the Ogeechee, at Kingsbridge. The army is in splendid order, and equal to any thing. The weather has been fine, and supplies were abundant. Our march was most agreeable, and we were not at all arrested by guerrillas.

We reached Savannah three days ago, but owing to Fort McAllister could not communicate; but now we have McAllister we can go ahead.

We have already captured two boats on the Savannah River, and prevented their gunboats from coming down.

I estimate the population of Savannah at twenty-five thousand and the garrison at fifteen thousand. Gen. Hardee commands.

We have not lost a wagon on the trip, but have gathered in a large supply of negroes, mules, horses, etc., and our teams are in far better condition than when we started.

My first duty will be to clear the army of surplus negroes, mules, and horses. We have utterly destroyed over two hundred miles of rails, and consumed stores and provisions that were essential to Lee's and Hood's armies. The quick work made with McAllister and the opening of communication with our fleet, and the consequent independence for supplies, dissipates all their boasted threats to head me off and starve the army.

I regard Savannah as already gained.

Yours, truly,

W. T. SHERMAN, Major-General.

On the succeeding day he met Gen. Foster and Admiral Dahlgren in Wassaw Sound, where measures were concerted for opening permanent communication between the army and the fleet, and for efficient coöperation by the latter in the reduction of Savannah. The new base was established on the Ogeechee at Kingsbridge, and the obstructions in the river having been removed, a number of transports passed up on the 16th and 17th. On the 16th several tons of mail matter were distributed among the soldiers.

Meanwhile the lines of investment were steadily pressed around Savannah, prisoners being employed to remove the torpedoes buried by the enemy along the chief avenues of approach. On every side of the city but that fronting the river the investment was complete. By means of rows of piles, sunken vessels, and the guns of Forts Jackson, Lee, and Lawton, the enemy commanded the river to within a few miles of Fort Pulaski. Be-

tween the city and the South Carolina shore intervenes Hutchinson's Island, several miles in length, the upper end of which had been seized by Gen. Slocum as the Federal left wing approached the city. But the lower end, divided from the upper by a canal, was fortified and still held by the enemy; and somewhat below the island, on the South Carolina side, commences Union Causeway, traversing the extensive swamps intervening between Savannah and Charleston, and offering a practicable line of retreat to Gen. Hardee. To approach the city from the north, along the Carolina shore, through the wide stretch of swamps and rice-fields, artificially and skilfully flooded, seemed almost an impossibility, and the enemy relied confidently upon a protracted and perhaps successful resistance. On the 16th Gen. Sherman sent a formal demand for the surrender of Savannah, closing his despatch with Hood's words to the colored troops at Dalton. To this General Hardee replied that as his communications were still open and his men supplied with subsistence, he was able to withstand a long siege, and was determined to hold the city until his forces were overpowered.

Gen. Sherman now rapidly pushed forward his work, and by means of a substantial corduroy road traversing the swamps and rice-fields between Kingsbridge and the city, brought up heavy siege guns which by the 20th were put in position. Perceiving this, and also that preparations were making to close up the Federal lines on the left, Gen. Hardee seems to have become suddenly aware of the danger that menaced the city, and alive to the necessity of securing his own retreat while Union Causeway afforded an avenue of escape. On the afternoon of the 20th his troops were hurriedly set to work to destroy the navy yard and Government property, while the formidable iron-clads, Georgia and Savannah, moved up the river and commenced a furious fire on the Federal left, supported by several batteries. Under cover of this fire the garrison was transported during the night of the 20th, by steamboats, rowboats, and rafts to Union Causeway, and on the morning of the 21st the troops were well on their way to Charleston. Before leaving, they blew up the iron-clads and the fortifications below the city.

At dawn of the 21st the evacuation became known to the Federal pickets, and several regiments were sent forward to occupy the deserted intrenchments. A few hours later Gen. Sherman entered the city at the head of his body-guard, and received its formal surrender from the municipal authorities. The following despatch to the President announced this crowning success of the campaign:

SAVANNAH, GA., December 22.

His Excellency President Lincoln:

I beg to present you as a Christmas gift the city of Savannah, with one hundred and fifty heavy guns and plenty of ammunition, and also about twenty-five thousand bales of cotton.

W. T. SHERMAN, Major-General.

The following from Gen. Foster gives additional details of the capture:

STEAMER GOLDEN STATE, SAVANNAH RIVER, }

December 22—1 P. M.

To Lieut. Gen. Grant and Maj. Gen. H. W. Halleck:

I have the honor to report that I have just returned from Gen. Sherman's headquarters in Savannah.

I send Major Gray, of my staff, as bearer of despatches from Gen. Sherman to you, and also a message to the President.

The city of Savannah was occupied on the morning of the 21st. Gen. Hardee, anticipating the contemplated assault, escaped with the main body of his infantry and light artillery on the morning of the 20th, by crossing the river to Union Causeway, opposite the city. The rebel iron-clads were blown up, and the navy yard was burned. All the rest of the city is intact, and contains twenty thousand citizens, quiet and well disposed.

The captures include eight hundred prisoners, one hundred and fifty guns, thirteen locomotives in good order, one hundred and ninety cars, a large supply of ammunition and materials of war, three steamers, and thirty-three thousand bales of cotton, safely stored in warehouses. All these valuable fruits of an almost bloodless victory have been, like Atlanta, fairly won.

I opened communication with the city with my steamers to-day, taking up what torpedoes we could see, and passing safely over others. Arrangements are made to clear the channel of all obstructions.

J. G. FOSTER, Major-General.

With the capture of Savannah ended the great winter campaign through Georgia, just five weeks after the Federal army left Atlanta. Within that period Gen. Sherman traversed at his leisure, and with a total loss of less than fifteen hundred men, a tract of country varying from sixty to twenty miles in width, and completely destroyed the great railroad quadrilateral of which Atlanta, Macon, Augusta, and Savannah formed the four corners. When it is recollected that from Atlanta to Madison on the Georgia road, and from the neighborhood of Macon to Savannah, the track was systematically torn up, beside considerable portions of the Milledgeville branch and the Augusta and Millen road, Gen. Sherman's estimate of 200 miles destroyed will seem under the mark. The work of destruction was carried on with a completeness and deliberation unknown to previous expeditions. Every rail was heated and twisted; every tie, bridge, tank, wood-shed, and depot building was burned, and every culvert blown up. For miles on the Georgia, Georgia Central, and Augusta and Millen roads, the track is carried over marshy territory by extensive trestle-work. This was all burned or otherwise injured beyond the possibility of immediate replacement. Almost from the moment of departure the army literally fed on the fat of the land, and fared probably better on the march than in camp. Live stock, poultry, Indian meal, sweet potatoes, sorghum syrup, and other luxuries were found in an abundance far exceeding the demands of the men, and many thousand head of cattle, horses, and mules were gathered up on the march and brought safely to the coast. The army is said to have encamped around Savannah with fifty days' rations of beef on the hoof. As a rule the

regulations respecting pillaging were observed by the troops, but of necessity many instances occurred where private property, not necessary to sustain life or assist military operations, was appropriated by stragglers. Such occurrences are unavoidable in the unopposed progress of a large army through a well-stocked country. As was expected, large numbers of slaves, of both sexes and of all ages, seized the opportunity to gain their freedom, and followed in the wake of the several columns. The able-bodied men did good service as pioneers, teamsters, or laborers, and in many cases the places where horses, cattle, provisions, cotton, or valuables were concealed, were revealed by the colored fugitives. On several occasions this class of followers became so numerous as to impede the movements of the army and the trains. Many dropped off from time to time exhausted by the march; but from eight to ten thousand succeeded in reaching Savannah. Cotton was of course invariably burned wherever discovered, and the loss is estimated at 15,000 bales. The most remarkable feature of the campaign was the trifling opposition which the enemy opposed to the expeditionary army, and the ease with which every attack was repelled. In every engagement, down to the smallest skirmish, the Federal troops, having an absolute faith in their leader which made them equal to any task he might impose, showed their superiority. The cavalry advance, supported occasionally by a division or two of infantry, and frequently engaging superior numbers, was found adequate for any thing which the enemy could oppose to them. Full half the loss sustained by Gen. Sherman was of stragglers and plunderers, surprised and captured by the enemy while out of the direct line of march.

Upon the surrender of Savannah, Gen. Geary was appointed military commander. The city was found uninjured, the Federal cannon having never opened upon it, and was crowded with refugees from the interior, many of whom were without the means of procuring food. Measures were adopted for supplying the wants of these persons, and stringent orders issued by Gen. Geary for the protection of peaceful citizens and their property against outrages by soldiers. The cotton was, however, appropriated by the United States Government, with the design of shipping it to the North for sale. The following order was issued by Gen. Sherman for the government of the city:

HEADQUARTERS MILITARY DIVISION OF THE MIS-
SISSIPPI IN THE FIELD, SAVANNAH, GA., Dec. 26th, 1864.
Special Field Orders No. 143.

The city of Savannah and surrounding country will be held as a military post and adapted to future military uses; but as it contains a population of some 20,000 people, who must be provided for, and as other citizens may come, it is proper to lay down certain general principles, that all within its military jurisdiction may understand their relative duties and obligations.

I. During war, the military is superior to civil authority, and where interests clash the civil must

give way; yet where there is no conflict, every encouragement should be given to well-disposed and peaceable inhabitants to resume their usual pursuits. Families should be disturbed as little as possible in their residences, and tradesmen allowed the free use of their shops, tools, &c. Churches, schools, all places of amusement and recreation, should be encouraged, and streets and roads made perfectly safe to persons in their usual pursuits. Passes should not be exacted within the line of outer pickets, but if any person shall abuse these privileges by communicating with the enemy, or doing any act of hostility to the Government of the United States, he or she will be punished with the utmost rigor of the law. Commerce with the outer world will be resumed to an extent commensurate with the wants of the citizens, governed by the restrictions and rules of the Treasury Department.

II. The Chief Quartermaster and Commissary of the army may give suitable employment to the people, white and black, or transport them to such points as they choose, where employment may be had, and may extend temporary relief, in the way of provisions and vacant houses, to the worthy and needy, until such time as they can help themselves. They will select, first, the buildings for the necessary uses of the army; next, a sufficient number of stores to be turned over to the Treasury Agent for trade stores. All vacant storehouses or dwellings, and all buildings belonging to absent rebels, will be construed and used as belonging to the United States, until such times as their titles can be settled by the courts of the United States.

III. The Mayor and City Council of Savannah will continue and exercise their functions as such, and will, in concert with the commanding officer of the post and Chief Quartermaster, see that the fire companies are kept in organization, the streets cleaned and lighted, and keep up a good understanding between the citizens and soldiers. They will ascertain and report to the Chief of S., as soon as possible, the names and number of worthy families that need assistance and support.

The Mayor will forthwith give public notice that the time has come when all must choose their course, viz.: to remain within our lines and conduct themselves as good citizens, or depart in peace. He will ascertain the names of all who choose to leave Savannah, and report their names and residence to the Chief Quartermaster, that measures may be taken to transport them beyond the lines.

IV. Not more than two newspapers will be published in Savannah, and their editors and proprietors will be held to the strictest accountability, and will be punished severely in person and property for any libelous publication, mischievous matter, premature news, exaggerated statements, or any comments whatever upon the acts of the constituted authorities; they will be held accountable even for such articles though copied from other papers.

By order of Maj.-Gen. W. T. SHERMAN.
L. M. Darrow, Aide-de-Camp.

In marked contrast with the inhabitants of other Confederate cities captured during the war, the population of Savannah showed a desire to conform their conduct to circumstances, and refrained from open insults or efforts to vex or harass their captors. It does not appear that a bale of cotton, or indeed any thing of positive value, was destroyed by the citizens to prevent its falling into the hands of the Federal troops. A latent Union feeling was even developed, and at a meeting of influential citizens convened on the 28th, in pursuance of a call from Mayor Arnold, to take into consideration "matters relating to the present and future

welfare of the city," the following resolutions were unanimously adopted:

Whereas, By the fortunes of war and the surrender of the city by the civil authorities, Savannah passes once more under the authority of the United States; and whereas we believe that the interests of the city will be best subserved and promoted by a full and free expression of our views in relation to our present condition, we, therefore, the people of Savannah, in full meeting assembled, do hereby resolve,

1st. That we accept the position, and in the language of the President of the United States, seek to have "peace by laying down our arms and submitting to the national authority under the Constitution, leaving all questions which remain to be adjusted by the peaceful means of legislation, conference, and votes."

Resolved, 2d. That laying aside all differences and burying bygones in the graves of the past, we will use our best endeavors once more to bring back the prosperity and commerce we once enjoyed.

Resolved, 3d. That we do not put ourselves in the position of a conquered city asking terms of a conqueror, but we claim the immunities and privileges contained in the proclamation and message of the President of the United States, and in all the legislation of Congress in reference to a people situated as we are; and while we owe on our part a strict obedience to the laws of the United States, we ask the protection over our persons, lives, and property recognized by those laws.

Resolved, 4th. That we respectfully request his Excellency the Governor to call a convention of the people of Georgia, by any constitutional means in his power, to give them an opportunity of voting upon the question whether they wish the war between the two sections of the country to continue.

Resolved, 5th. That Major-General Sherman having placed as military commander of this post Brigadier-General Geary, who has, by his urbanity as a gentleman and his uniform kindness to our citizens, done all in his power to protect them and their property from insult and injury, it is the unanimous desire of all present that he be allowed to remain in his present position, and that for the reasons above stated the thanks of the citizens are hereby tendered to him and the officers under his command.

Resolved, 6th. That an official copy of these resolutions be sent to the President of the United States, the Governor of Georgia, General Sherman, and to each the Mayors of Augusta, Columbus, Macon, and Atlanta.

Finding the people so tractable and resigned to their condition, Gen. Geary exerted himself to protect them from oppression, and to maintain order; and several instances occurred of soldiers being severely punished for drunkenness, pillaging, or other improper acts. Measures were at once taken to prepare the Custom House and Post Office for the former uses, and by several of the insurance companies the propriety of establishing a National Bank, under the Act of Congress, was seriously considered.

On the 17th, while the investment of Savannah was in progress, a large body of cavalry, with infantry supports, started down the Savannah and Gulf Railroad, which was thoroughly destroyed to the Altamaha River, 50 miles distant, together with four miles of trestle-work immediately adjoining the river. The common supposition was, that the expedition was going to release the Federal prisoners conveyed to some point south of Millen. This would have involved a wider separation from the main

army than was consistent with prudence, and Gen. Sherman probably felt sufficiently compensated in the destruction of the only remaining link of railroad connecting Savannah with the Gulf. The close of the year found him at Savannah planning another campaign in a different direction.

Gen. Sheridan, after taking command of the army on the upper Potomac, held a strong position near the railroad from Harper's Ferry toward Winchester. On Sept. 14th a reconnaissance was made by Gen. Wilson within two miles of Winchester, which resulted in the capture of the 8th South Carolina infantry, numbering 136 men and 18 officers. On the 18th Gen. Gardner made an attack on Gen. Averill, at Martinsburg, but was repulsed. At this time the main body of Gen. Early's army was in the vicinity of Bunker Hill, northwest of the position held by Gen. Sheridan. By a rapid advance along the Winchester road Gen. Sheridan could gain the rear of the enemy, and he quickly embraced the opportunity. The 6th and 19th corps began to move at 3 A. M. on the morning of the 19th. Gen. Crook followed three hours later and joined the main column at the crossing of the Opequan. This advance was stubbornly resisted, and the first and second lines were temporarily thrown into confusion. But the artillery being brought into position, the ranks were reformed, and a severe contest ensued. At some points the opposing lines were not more than two hundred yards apart. By a successful cavalry charge the enemy were thrown into confusion and driven from the field. The enemy retreated toward Fisher's Hill, a short distance south of Strasburg, closely followed by Gen. Sheridan. That evening he sent the following despatch to Gen. Grant:

WINCHESTER, VA., Sept. 19, 7.30 P. M.

Lieut.-Gen. U. S. Grant:

I have the honor to report that I attacked the forces of Gen. Early over the Berryville pike, at the crossing of Opequan Creek, and after a most stubborn and sanguinary engagement, which lasted from early in the morning until 5 o'clock in the evening, completely defeated him, driving him through Winchester, capturing twenty-five hundred prisoners, five pieces of artillery, nine army flags, and most of their wounded. The rebel Generals Rhodes and Gordon were killed, and three other general officers wounded. Most of the enemy's wounded and all of their dead fell into our hands.

Our losses are severe. Among them Gen. D. A. Russell, commanding a division in the Sixth corps, who was killed by a cannon ball. Generals Upton, McIntosh, and Chapman were wounded.

I cannot yet tell our losses. The conduct of the officers and men was most superb. They charged and carried every position taken up by the rebels from Opequan Creek to Winchester. The rebels were strong in numbers and very obstinate in their fighting.

I desire to mention to the Lieut.-General commanding the army the gallant conduct of Generals Wright, Crook, Emory, Torbert, and the officers and men under their command. To them the country is indebted for this handsome victory.

D. H. SHERIDAN,
Major-General Commanding.

The force of Gen. Sheridan was composed as

follows: 6th corps, about 12,000; 19th corps (two divisions), 9,000; Crook's corps, 12,000; cavalry (three divisions), 10,000; artillery, about 2,000; total, 45,000, and 20 or 22 batteries, 6 guns each.

That of the enemy was known to consist of Gens. Early and Breckinridge's corps, amounting to about 20,000 men, exclusive of cavalry and artillery, which was estimated at 10,000 more. The artillery consisted of 14 batteries of 6 guns each.

On Sept. 22d Gen. Sheridan attacked the enemy's position at Fisher's Hill, and by forcing back the left of his line and throwing a force in his rear, compelled him to abandon it. He thus described and reported his success:

HEADQUARTERS MIDDLE MILITARY DIVISION,
SIX MILES FROM WOODSTOCK,
11.30 P. M. September 22d.

Lieut.-General Grant:

I have the honor to report that I achieved a most signal victory over the army of General Early at Fisher's Hill to-day. I found the rebel army posted with its right resting on the north fork of the Shenandoah, and extending across the Strasburg valley westward to North Mountain, occupying a position which appeared almost impregnable.

After a great deal of manoeuvring during the day, General Crook's command was transferred to the extreme right of the line on North Mountain, and he furiously attacked the left of the enemy's line, carrying every thing before him. While General Crook was driving the enemy in the greatest confusion, and sweeping down behind their breastworks, the Sixth and Nineteenth army corps attacked the works in front, and the whole rebel army appeared to be broken up. They fled in the utmost confusion. Sixteen pieces of artillery were captured, also a great many caissons, artillery horses, &c., &c.

I am to-night pushing down the valley. I cannot say how many prisoners I have captured, nor do I know either my own or the enemy's casualties. Only darkness has saved the whole of Early's army from total destruction. My attack could not be made until 4 o'clock in the evening, which left but little daylight to operate in.

The 1st and 3d cavalry divisions went down the Luray Valley to-day, and if they push on vigorously to the main valley, the result of this day's engagement will be still more signal. The victory was very complete.

(Signed,) P. H. SHERIDAN, Maj.-Gen. Com.

The number of prisoners taken was eleven hundred. The pursuit was made and continued to Staunton, which Gen. Sheridan occupied with his cavalry and inflicted much damage upon the enemy. He then leisurely and destructively fell back toward Strasburg. The losses of the enemy in these battles in killed, wounded, and missing was estimated at nearly ten thousand men. The losses of Gen. Sheridan were also severe.

On the night of the 27th Gen. Averill met with a repulse near Brown's Gap, and on the following day fell back six miles. He lost some twelve men. While Gen. Sheridan was at Staunton all public property was destroyed, including the railroad and factories. His cavalry then proceeded to Waynesboro for the purpose of destroying the iron railroad bridge and all the barns and mills in that section of country. The force of Gen. Early, in the mean time, had

retreated through Brown's Gap with their wagon trains, but on learning of the operations of the Federal cavalry, Kershaw's division of infantry and Fitzhugh Lee's cavalry were ordered to march in their rear and cut off the command of Gen. Torbert at Waynesboro. The latter, however, marched all night by way of Staunton and escaped.

Gen. Sheridan thus reported his march back to Woodstock:

WOODSTOCK, VA., Oct. 7, P. M.

To Gen. U. S. Grant:

I have the honor to report my command at this point to night. I commenced moving back from Port Republic, Mount Crawford, Bridgewater, and Harrisonburg yesterday morning. The grain and forage in advance of these points had previously been destroyed in coming back to this point.

The whole country, from the Blue Ridge to the North Mountain, has been made untenable for a rebel army. I have destroyed over 2,000 barns filled with wheat, hay, and farming implements, over 70 mills filled with wheat and flour; four herds of cattle have been driven before the army, and not less than 8,000 sheep have been killed and issued to the troops.

This destruction embraces the Luray and Little Fork Valleys as well as the main valley. A large number of horses have been obtained, a proper estimate of which I cannot now make.

Lieut. John R. Meigs, my engineer officer, was murdered beyond Harrisonburg near Dayton. For this atrocious act all houses within an area of five miles were burned. Since I came into this valley from Harper's Ferry, up to Harrisonburg, every train, small party, and every straggler has been bushwhacked by people, many of whom have protection papers from commanders who have been hitherto in that valley.

The people here are getting sick of the war; heretofore they have had no reason to complain, because they have been living in great abundance.

I have not been followed by the enemy up to this point, with the exception of a small force of rebel cavalry that showed themselves some distance behind my rear guard. To-day a party of 100 of the 8th Va. cavalry, which I had stationed at the bridge over the North Shenandoah near Mount Jackson, was attacked by McNeill with seventeen men while they were asleep, and the whole party dispersed or captured. I think they will all turn up. I learn that 66 of them had reached Winchester. McNeill was mortally wounded and fell into our hands. This was most fortunate, as he was the most daring and dangerous of all bushwhackers in this section of the country.

(Signed)

P. H. SHERIDAN, Major-Gen.

A correspondent, who was present with the army, thus describes the scenes of this march:

The atmosphere, from horizon to horizon, has been black with the smoke of a hundred conflagrations, and at night a gleam, brighter and more lurid than sunset, has shot from every verge. The orders have been to destroy all forage in stacks and barns, and to drive the stock before for the subsistence of the army. The execution of these orders has been thorough, and in some instances, where barns, near dwelling houses, have been fired, has resulted in the destruction of the latter. In no instance, except in that of the burning of dwellings within five miles, in retaliation for the murder of Lieut. Meigs, have orders been issued for the burning of houses, or have such orders been sanctioned by Gen. Sheridan. Such wholesale incendiarism could not have been pursued, however, without undue license being taken by the worst class of soldiers, and there have been frequent instances of rascality and pillage. Indiscriminating (for with such swift work discrimina-

tion is impracticable), relentless, merciless, the torch has done its terrible business in the centre and on either side of the valley. Few barns and stables have escaped. The gardens and cornfields have been desolated. The cattle, hogs, sheep, cows, oxen, nearly five thousand in all, have been driven from every farm. The poor, alike with the rich, have suffered. Some have lost their all.

"The wailing of women and children mingling with the crackling of flames, has sounded from scores of dwellings. I have seen mothers weeping over the loss of that which was necessary to their children's lives, setting aside their own, their last cow, their last bit of flour pilfered by stragglers, the last morsel that they had in the world to eat or drink. Young girls with flushed cheeks, and pale with tearful or fearless eye, have pleaded with and cursed the men whom the necessities of war have forced to burn the buildings reared by their fathers, and turn them into paupers in a day. The completeness of the desolation is awful. Hundreds of nearly starving people are going north. Our trains are crowded with them. They line the wayside. Hundreds more are coming—not half the inhabitants of the valley can subsist on it in its present condition. Absolute want is in mansions used in other days to extravagant luxury.

A committee, consisting of thirty-six citizens and the same number of magistrates, appointed by the county court of Rockingham for the purpose of making an estimate of the losses of that county by the execution of Gen. Sheridan's orders, made an investigation and reported as follows:

Dwelling houses burned, 30; barns burned, 450; mills burned, 31; fencing destroyed (miles), 100; bushels of wheat destroyed, 100,000; bushels of corn destroyed, 50,000; tons of hay destroyed, 3,333; cattle carried off, 1,750; horses carried off, 1,750; sheep carried off, 4,200; hogs carried off, 3,350; factories burned, 3; furnace burned, 1. In addition to which there was an immense amount of farming utensils of every description destroyed, many of them of great value, such as McCormick's reapers, and threshing machines; also household and kitchen furniture, money, bonds, plate, &c., &c., the whole loss being estimated at the enormous sum of \$35,000,000.

As Gen. Sheridan moved down the valley toward the Potomac River, he was followed close by the enemy's cavalry in considerable force, under Gen. Rosser, the infantry being further in the rear. On Oct. 9th the head of the column of infantry having entered Strasburg by the eastern road, while the rear was some four miles further south, and the enemy following the cavalry on the western road had advanced so far as to bring the infantry upon their right rear, the cavalry under Gens. Ouster and Merritt turned and made an attack. At the same time a report spread among the enemy's cavalry that the Federal infantry were flanking them. They immediately gave way, and a stampede ensued. The pursuit continued to Columbia Furnace, seven miles south of Fisher's Hill. The loss of the enemy was eleven pieces of artillery and about three hundred men. Gen. Sheridan then continued to fall back as far as Cedar Run. While at this position, on Oct. 19th, his force was suddenly attacked by the enemy before daylight, and his lines thrown into confusion with every prospect of a serious disaster. The left flank of the 8th corps was

turned and the army driven back four miles with the loss of twenty-four pieces of artillery. At this moment Gen. Sheridan arrived on the field, and re-forming his lines, awaited the attack of the enemy. This was made at 1 p.m. and repulsed. At 8 p.m. Sheridan attacked the enemy and completely routed him, capturing fifty-four pieces of artillery, including his own pieces. His despatch from the battle-field to Gen. Grant was as follows:

CEDAR CREEK, VA., Oct. 19, 10 P.M.

Lieut.-Gen. Grant, City Point:

I have the honor to report that my army at Cedar Creek was attacked at Alacken this morning before daylight, and my left was turned and driven in in confusion. In fact, most of the line was driven in confusion, with the loss of 20 pieces of artillery. I hastened from Winchester, where I was on my return from Washington, and found my army between Middletown and Newton, having been driven back about four miles. I here took the affair in hand and quickly marched the corps forward, formed a compact line of battle to repulse an attack of the enemy, which was done handsomely at about 1 o'clock, p.m. At 3 p.m., after some changes of the cavalry from the left to the right flank, I attacked with great vigor, driving and routing the enemy, capturing, according to the last report, 43 pieces of artillery and very many prisoners. * * * *

I have to regret the loss of Gen. Bidwell, killed, and Gens. Wright, Grover, and Ricketts, wounded. Wright is slightly wounded. Affairs at times looked badly, but by the gallantry of our brave officers and men disaster has been converted into a splendid victory. Darkness again intervened to shut off greater results. I now occupy Strasburg. As soon as practicable I will send you further particulars.

(Signed) P. H. SHERIDAN, Maj.-General.

On the next day he further reported as follows:

CEDAR CREEK, VA., Oct. 20, 11.30 A.M.

To Lieut.-Gen. Grant, City Point:

We have again been favored by a great victory, won from disaster, by the gallantry of our officers and men. The attack on the enemy was made at 3 p.m., by a left half-wheel of the whole line, with a division of cavalry turning each flank of the enemy. The whole line advanced.

The enemy, after a stubborn resistance, broke and fled, and were pushed with vigor. The artillery captured will, probably, be over fifty pieces. This, of course, includes what were captured from our troops early in the morning. At least 1,600 prisoners have been brought in; also wagons and ambulances in large numbers. This morning the cavalry made a dash at Fisher's Hill and carried it; the enemy having fled during the night, leaving only a small rear guard.

I have to regret the loss of many valuable officers killed and wounded. Among them is Col. James Thorburn, commanding a division of Crook's command, killed; Col. Sherwood, commanding a brigade, but would not leave the field. I cannot yet give a full account, as many of our men who were captured in the morning have since made their escape and are coming in. Ramseur, commanding a division in Early's army, died this morning.

(Signed) P. H. SHERIDAN.

The enemy were pursued nearly to Mt. Jackson. The loss of Gen. Sheridan's army in the morning was between 800 and 1,000 taken prisoners. He took afterwards from 1,500 to 2,000 of the enemy prisoners, and 800 wagons and ambulances. The losses in killed and wounded on either side have not been reported.

They are known to have been severe. With the exception of a few affairs of small consequence, this closed the military operations in the Shenandoah valley for the remainder of the year; Gen. Early's force took a position further up the valley, while Gen. Sheridan's army was scattered in detachments widely separated. On Nov. 14th the President issued the following order:

WAR DEPARTMENT, WASHINGTON, Nov. 14th, 1864.

Ordered by the President.—1. That the resignation of George B. McClellan as major-general in the United States Army, dated November 8th, and received by the Adjutant-General on the 10th inst., be accepted as of the 8th of November.

2. That for personal gallantry, military skill, and just confidence in the courage and patriotism of his troops displayed by Philip H. Sheridan on the 19th of October, at Cedar Run, whereby, under the blessing of Providence, his routed army was reorganized, a great national disaster averted, and a brilliant victory achieved over the rebels for the third time in pitched battle within thirty days, Philip H. Sheridan is appointed Major-General in the United States Army, to rank as such from the 8th day of November, 1864.

By order of the President of the United States.

E. D. TOWNSEND,

Assistant Adjutant-General.

All that district of country west of Washington and immediately south of the Potomac River was infested with guerrillas throughout the year. Col. Mosby was their leader. Many of their expeditions were conducted with great boldness. Sometimes they came within a few miles of Washington. On one occasion during the year they captured a passenger train on the Baltimore and Ohio Railroad, between Harper's Ferry and Martinsburg. A rail was removed, and the train thus running off the track was brought to a stop. Their proceedings have been thus graphically described:

In an instant we heard the guerrillas entering the cars from both ends. Surmising their errand, I jerked my watch from my pocket, handed it to a lady companion, telling her to secrete it, which she did. Just then one of the fellows stood before me with a pistol close to my head and demanded my pocket book. I obeyed with commendable diligence. He passed on to relieve my neighbor of hat, coat, watch and pocket book. Another of the band approached, pistol in hand, "Here, you d-d Yank, hand over your watch." "You're too late," I answered promptly, "it is gone." The fellow seemed satisfied with this and went on.

A very demonstrative fat lady, seated near the end of our car, just then jumped up, caught one of the rebels in her arms. "Oh my love, my dear man, you will not kill me," she screamed, and at the same time clinging to him until in ungallant anger he roared, "Confound you, let me go. I will lose my part of the plunder with your stupidity." We were then ordered out, as the train was to be set on fire. On leaving the cars we had to climb a steep sand bank about twenty feet high, there to await further orders. The passengers in the sleeping-cars fared worse, as all, with one exception, lost their hats, coats, boots, watches, and money. When they were ejected from their quarters, and ascended the hill, they presented a sorry appearance—just conscious of their loss, trembling with cold, and fearing they might be invited to visit Richmond. In one car there were sixty German emigrants bound for Ohio, who, when the thieves demanded their money,

showed fight. To intimidate the rest, two men were instantly shot by the butchers and a woman wounded. The remainder were then ordered to leave the cars, but did not understand the command. Mosby ordered his men to fire the cars and burn the "damna Dutch." The conductor begged of him to hold on until he could find a man who could speak German. The poor creatures were at last made to understand. They left the car; it was set on fire, and the two men and one wounded woman left in the flames.

There were about thirty Union soldiers on board, unarmed, returning to their commands. Those were taken prisoners, and also forty or fifty of the passengers were ordered to fall in line to be taken off. About this time I felt a little nervous, not having any strong desire to visit Libby; but fortunately as I had a screaming babe in my arms I was not one of the chosen. The whole party were soon ordered to march. Then followed hurried, agonizing farewells, and the victims moved forward. We all supposed they were on their way to Richmond, but only the soldiers met with this fate. The citizens were taken a short distance to a piece of woods and thoroughly searched and robbed of whatever money they had left and the best of their clothes. Then arose a cry that the Yanks were in the woods; the guerrillas mounted and started off in a hurry, but in five minutes they were back and exclaimed, "a false alarm!" and they fell to plundering still further. By this time the mail, express, and baggage had been robbed, and what they generally did not want was in flames, and the gentlemen were left no extra clothing, and certainly no surplus cash.

One of the ladies of our party lost all her baggage. In vain she begged a plithoric-looking guerilla to spare her clothing and that of her child. "There are no valuables in the trunk; you certainly can do nothing with its contents," she pleaded. "Pooh," sneered the "chivalry," as he swaggered past her, "they will do to help on the flame," and help the flames they accordingly did.

It was then announced by one of the officers that every rider had a place for a woman in front of him on his horse, but this beastly threat was not carried out. They then made a final search, and saw the work was complete; the train had been burned, a paymaster with \$68,000 robbed, the passengers plundered of their hats, coats, boots, watches and money, and, locking and burning the mail, express, and baggage, they made us a boisterous farewell.

Missouri became the scene of a hostile invasion under Gen. Price, in the autumn. Various rumors and threats had been in circulation among the enemy for some months previous. About the 21st of September these rumors ripened into a certainty by a movement of Gen. Sterling Price across the Arkansas with two divisions of cavalry and three batteries of artillery. He joined Gen. Shelby near Batesville, sixty miles south of the boundary line of the Missouri, and was prepared to advance with 15,000 to 20,000 mounted veterans. The Federal force then in the Department under Gen. Rosecrans consisted of 6,500 mounted men for field duty scattered over a country four hundred miles long, and three hundred broad, with partially organized new infantry regiments and dismounted men. These latter were employed to cover the great depots at St. Louis, Jefferson City, St. Joseph, Macon, Springfield, Rolla, and Pilot Knob, to guard railroad bridges and protect as far as possible the lives and property of citizens from the guerillas who swarmed over the whole country

bordering on the Missouri River. At this time Gen. A. J. Smith being at Cairo with 4,500 troops was ordered to Missouri. Preparations were made to concentrate the forces as soon as it should become manifest what course Gen. Price would pursue, and the enrolled militia of the State made ready to take the field.

When it became evident that Springfield was safe from the blow, Gen. Sanborn moved with all his available cavalry to reinforce Rolla, where Gen. McNeil was preparing to secure the depots and supply trains, while Gen. Ewing, with the 47th Missouri volunteer infantry, detachments of the 1st, 2d, and 3d State militia, and the 14th Iowa, defended Pilot Knob on Sept. 27th, and proved the presence of the enemy's entire force in southeast Missouri. The defence of Gen. Ewing was a severe blow to the enemy, and allowed time for the enrolled militia and citizens of St. Louis to prepare for its defence. At this time it was covered only by Gen. Smith's infantry and three regiments of cavalry thrown as far as practicable toward the enemy.

In the midst of the preparations at St. Louis, the 132d, 134th, 136th, 139th, 140th, and 142d regiments of Illinois hundred days' volunteers arrived, which secured the safety of that city. Meantime the 1st, 2d, 3d, 4th, 10th, 11th, 13th, and 80th regiments of enrolled militia, and the National Guard of St. Louis, organized under Gens. Pike, Wolff and Miller, to support Gen. Smith's infantry, and turn the tide of invasion westward.

The troops of the central district of the State were concentrated by Gen. Brown at Jefferson City, and being reinforced by Gen. Fisk with all the available troops north of the Missouri River, they were prepared for the defence of the State capital. In these efforts the citizens cooperated with enthusiasm.

Meanwhile, Gen. Price with his army, after awaiting a day or two at Richwood's, and threatening St. Louis, started for the State capital. At the same time Gens. McNeil and Sanborn, with all their available cavalry, moved by forced marches and reached the point of danger a few miles in advance of Price, and, uniting with Gens. Fisk and Brown, saved the State capital, and struck another blow to the hopes of the invaders.

On Oct. 8th, Gen. Pleasanton assumed command at Jefferson City, and sent Sanborn with all his mounted force, four thousand one hundred strong, to follow the enemy and harass them until the remaining cavalry and infantry supports could come up. The rear-guard of the enemy was thus driven upon their main force near Burnville, and Gen. Price was kept between the Federal force and the Missouri River until the latter were joined on the 19th by the command of Winslow, consisting of fifteen hundred men who had followed the enemy from Arkansas. This formed a provisional cavalry division of sixty-five hundred men under Gen. Pleasanton exclusive of escort

guards. On the 22d, this force fell upon Gen. Fagan at Independence and routed him, capturing two guns. On the 23d, the Big Blue was passed, and a contest with the main force of the enemy took place, by which they were driven by dark beyond the Little Santa Fé. On the 24th, after a march of sixty miles, the enemy were overtaken at midnight at Marais des Cygnes. Skirmishing began at 4 A.M. on the 25th with artillery, when the enemy were driven from the field with loss of mules, horses, etc. They fell back skirmishing to the Little Osage Crossing, where a charge was made upon two divisions of them by two advanced brigades under Cols. Benteen and Phillips, and eight pieces of artillery and nearly one thousand prisoners, including Gens. Marmaduke and Cabell, were captured. The pursuit was kept up by Gen. Sanborn's brigade with repeated and successful charges to the Marmiton, whence the enemy fled under cover of night toward Arkansas. Kansas troops and Gen. Benteen's brigade followed rapidly, and on the 28th Sanborn reached Newtonia, where the enemy made his last stand, in time to turn the tide of battle, which was going against Gen. Blunt, and routing the enemy, thus giving the final blow to the invasion.

The loss of the enemy was ten pieces of artillery, a large number of small arms, nearly all his trains and plunder, and, besides his killed, wounded and deserters, 1,958 prisoners. Gen. Price claimed to have added to his force 6,000 Missourians. All his schemes were defeated, and the injury done was confined to the narrow belt of country over which his army marched. The Federal loss was 846 officers and men. After crossing into Arkansas the force of the enemy became greatly reduced.

Some military operations took place in East Tennessee near the close of the year, the most important of which was the defeat of Gen. A. O. Gillem by the enemy under Gen. Breckinridge. On Nov. 12th Gen. Breckinridge attacked the Federal forces and drove them from their intrenchments. On the 18th he again attacked them near Russellville. Gen. Gillem gradually fell back in the direction of Knoxville, and was pursued by the enemy as far as Strawberry Plains. Gen. Gillem lost heavily in killed and wounded, besides several hundred prisoners. Later in the year an expedition from East Tennessee was made by Gen. Stoneman, in conjunction with Gen. Burbridge, with better success. On Dec. 12th Gen. Stoneman, with a mounted force of four thousand men, and the brigade of Gen. Gillem, moved against the enemy, who were drawn up at Kingsport, on the Halsten River, to dispute its passage. This force was flanked by Gen. Gillem, with a loss of a hundred men and a wagon train, and pursued to Bristol, where Gillem captured two hundred and fifty more, two trains of cars, five engines, and a large amount of stores. On Dec. 14th Gen. Burbridge advanced to attack Gen. Vaughn at Zollicoffer, but the latter withdrew to Abing-

don, which was captured by Burbridge, with much stores. A portion of the salt-works at this point was also destroyed. The pursuit of Vaughn was continued by Gen. Gillem, with the support of Brown's brigade, and some loss inflicted on him. A force was also sent to the Virginia railroad near Glade Springs, which destroyed a large number of bridges and depots, a large amount of rolling stock, and the extensive iron works near Marion. Upon the advance of the Confederate Gen. Breckinridge it withdrew to Kentucky.

The operations in Middle Tennessee became very important near the close of the year. On Nov. 4th, Johnsonville, a depot for supplies on the Tennessee River, was attacked and destroyed by Col. Forrest. The value of property burned was estimated at more than six million dollars. This result was achieved by planting batteries on the opposite bank of the river and destroying the small gunboats which lay near the place for its protection.

The movement of Gen. Sherman's force toward Savannah, with the necessary reduction of the Federal forces in Tennessee, tempted Gen. Hood to advance into that State with the hope that by the cooperation of Gen. Breckinridge in East Tennessee, the entire State might be recovered and restored to the Confederacy. On Nov. 21st Gen. Hood began to move north from the Tennessee River for the capture of Nashville, and on the 28d his army took possession of Pulaski, which had been just evacuated by the small Federal force under Gen. Hatch. Pushing forward with some skirmishing, Columbia was occupied on the 26th. Meanwhile the force left under Gen. Thomas by Gen. Sherman, continued to fall back toward Nashville. The enemy appeared before Franklin on the 30th, and Gen. Schofield prepared to make a stand. The force of Gen. Hood, however, was divided into two columns, one to attack Franklin in front, and the other to move down Harpeth River, cross over it some distance east of Franklin, and endeavor to get into the Federal rear. At 4 p. m. on Wednesday, the 30th, Gen. Hood's main column made a heavy and persistent attack on Franklin in front, but Gen. Schofield, who was in command with 15,000 men, managed to hold his own until dusk, and then ordered a retreat. This was accelerated by the news of the flanking column having crossed Harpeth River several miles east of Franklin. The retreat was continued all night, and on Thursday at daylight reached a point seven miles south of Nashville, where Gen. A. J. Smith's corps was posted. The Confederate flanking column, after crossing Harpeth River attacked a Federal cavalry brigade, and compelled it to retreat. The force reached Gen. Smith's position about the same time as Gen. Schofield. The enemy followed both, and Gen. Smith being hard pressed abandoned his position and fell back to the outer line of the Nashville intrenchments, three miles from the town.

Great consternation prevailed in Nashville. Business was suspended. The citizens and the vast army of Government laborers were put under arms. The army of Gen. Thomas was put in line of battle three miles south of Nashville, and the enemy advanced to a point five miles distant. The intervening space became a scene of constant skirmishing. Meantime Gen. Hood proposed to blockade the Cumberland River, cut the Louisville and Nashville road, and thus compel Gen. Thomas to evacuate the city. To execute this purpose more effectively, he fell back from his works before the city to intrench himself in the Overton range of hills, and thus cut off Thomas from Rousseau at Murfreesboro, and with his cavalry and Breckinridge's forces cut off Bridgeport and Chattanooga.

Reinforcements were now sent to Gen. Thomas with the greatest despatch, and he determined to dislodge Gen. Hood from his position, which he had already begun to strengthen. Accordingly, early on Dec. 15th, a feint was made on Hood's right and a real attack upon his left, which resulted in driving it from the river below the city as far as Franklin's pike, a distance of eight miles. The train and headquarters of Gen. Chalmers were captured; another train of twenty wagons, together with a thousand prisoners and sixteen pieces of artillery. During the ensuing night Gen. Hood contracted his lines back to the Brentwood range of hills, massing on the Franklin pike to keep it open, in case of retreat, and to cover his large wagon train, which was moving by by-roads into the pike. On the next morning the battle was renewed. The Federal position remained unchanged from the previous day. Steedman on the extreme left, Wood connecting with him on the left of the Franklin pike. Garrard's division of A. J. Smith's corps connecting with the right of Wood's; next came McArthur, then Col. Moore, connecting with Gen. Schofield's left. Gen. Cox formed Schofield's right and Gen. Couch his left. Wilson's cavalry came up on Schofield's right, along the Hillsboro pike, with orders to operate south of the hills, and, if possible, turn the enemy's flank and cut off his retreat. Movements commenced at 10 a. m., and in the afternoon the action became close and obstinate. Near dusk the enemy began to give way, and a rout soon followed. They were pursued until dark through the gap of the hills and along the Franklin pike. Some four thousand prisoners were captured.

The following is Gen. Thomas's report of this day's conflict:

HEADQUARTERS DEPT. OF THE CUMBERLAND, RIGHT }
MILES FROM NASHVILLE, Dec. 16-6 P. M. }
To the President of the United States, Hon. E. M. Stanton, and Lieut.-General Grant:

This army thanks you for your approbation of its conduct yesterday, and assure you that it is not misplaced. I have the honor to report that the enemy has been pressed at all points to-day on his line of retreat to the Brentwood Hill. Brig.-Gen. Hatch, of Wilson's corps of cavalry, on the right, turned the enemy's left, and captured a large number of prisoners. The number is not reported.

Maj.-Gen. Schofield's corps, next on the left wing of the cavalry, carried several hills, capturing many prisoners and six pieces of artillery.

Maj.-Gen. Smith, next on the left of Maj.-Gen. Schofield, carried the salient point of the enemy's line, with McMillan's brigade of McArthur's division, capturing sixteen pieces of artillery, two brigadier generals, and about 3,000 prisoners.

Brig.-Gen. Garrard's division, of Smith's command, next on the left of McArthur's division, carried the enemy's intrenchments, capturing all the artillery and troops of the enemy on the line.

Brig.-Gen. Wood's troops on the Franklin Pike took up the assault, capturing the enemy's intrenchments, and in his retreat also capturing eight pieces of artillery, something over 600 prisoners, and drove the enemy within one mile of the Brentwood Hill Pass.

Maj.-Gen. Stedman, commanding detachments of the different armies of the Military Division of the Mississippi, most nobly supported Gen. Wood's left, and took a most honorable part in the operations of the day. I have ordered the pursuit to be continued in the morning at daylight. Although the troops are very much fatigued, the utmost enthusiasm prevails.

I must not forget to report the operations of Brig.-Gen. Johnson, in successfully driving the enemy, with the coöperation of the gunboats under Lieut. Commander Fitch, from their established batteries on the Cumberland, below the city of Nashville, and of the success of Brig.-Gen. Croxton's brigade, in covering and protecting our right and rear in the operations of to-day and yesterday. Although I have no report of the number of prisoners captured by Johnson's and Croxton's command, I know they have made a large number.

I am also glad to be able to state that the number of prisoners captured yesterday greatly exceeds the number reported by telegraph. The woods, fields, and intrenchments are filled with the enemy's small arms, abandoned in the retreat. In conclusion, I am happy to state that all this has been effected with very small loss to us. Our loss probably does not exceed 800, and very few killed.

(Signed) G. H. THOMAS, Major-General.

Early on the next morning the Federal pursuit was renewed. A large number of wounded were captured on the road to Franklin, and also stragglers. The cavalry harassed the flanks and rear of the enemy and scattered any force that offered resistance. The following is Gen. Thomas's report of the 17th:

HEADQUARTERS DEPARTMENT OF THE CUMBERLAND, }
Near FRANKLIN, TENN., Dec. 17th, 8 P. M.

We have pressed the enemy to-day beyond Franklin, capturing his hospitals, containing over 1,500 wounded, and about 150 of our wounded, in addition to the above. Gen. Knipe, commanding a division of cavalry, drove the enemy's rear-guard through Franklin to-day, capturing about 250 prisoners and five battle-flags with very little loss on our side. Citizens of Franklin represent Hood's army as completely demoralized. In addition to the captures of yesterday, reported in my despatches of last night, I have the honor to report the capture of Gen. Rucker, and about 250 of the enemy's cavalry, in a fight that occurred about 8 o'clock last night between Gen. Rucker and Gen. Hatch of our cavalry.

The enemy has been pressed to-day both in front and on both flanks. Brig.-Gen. Johnson succeeded in striking him on the flank just beyond Franklin, capturing quite a number of prisoners—number not yet reported. My cavalry is pressing him closely through, and I am very much in hopes of getting many more prisoners to-morrow.

GEO. H. THOMAS, Major-General.

The entire loss of the enemy was 13,189 in prisoners, including several general and nearly

one thousand other officers of lower grades, and seventy-two pieces of artillery. During the same period over two thousand deserters were received. The Federal loss was about 10,000 in killed, wounded, and missing. Gen. Hood retired with his remaining force into the northern part of Alabama.

Some military expeditions were made near the close of the year. A force left Vicksburg under Gen. Dana, in the latter part of November, for the purpose of coöperating with Gen. Sherman by occupying the enemy in Mississippi. It reached the Mississippi Central Railroad on Nov. 25th, and after an obstinate engagement succeeded in destroying the Big Black River bridge. Several miles of the track of the railroad, including culverts, stations, 2,600 bales of cotton, two locomotives, four cars, twenty barrels of salt, and \$160,000 worth of stores at Vaughan station were also destroyed.

About the same time an expedition organized under the direction of Gen. Canby, consisting of a cavalry force under Gen. Davidson, left Baton Rouge. Thence it marched to Tangipahoa and destroyed the railroad to Jackson, burning bridges and railroad buildings. Thence it moved to Franklinville, capturing a mail and prisoners. Thence it moved to West Pascagoula. These movements caused a great panic in Mississippi, and created alarm for the safety of Mobile, thus effectively coöperating with Gen. Sherman.

In December a force, consisting of five divisions under the command of Maj.-Gen. Warren, made a raid upon the Weldon Railroad. The Nottoway was reached about midday Dec. 8th, and destroyed; thence the railroad track was destroyed nearly to Bellfield station, twenty miles south. On the 10th the expedition started on its return, followed by crowds of negroes, and arrived after an absence of four days. Its loss was about a half dozen men.

At the close of the year the area of territory held by the Federal armies was about the same as at the end of the previous year. The war during the year had been the cause of immense destruction to the South, both in men and property. In the latter probably there is no parallel in modern history. Its effect was apparent in the exhausted condition of the country.

The Indians on the frontier maintained a hostile attitude during a portion of the year. The plan of operations of Maj.-Gen. Pope, who was in command, embraced three objects: first, the chastisement and subjection of the bands of savages on both sides of the Missouri River, who continued refractory and hostile; secondly, the protection of the overland route to Idaho, by the establishment of strong military posts within the Indian country; thirdly, the security of the Minnesota and Iowa frontier against raids.

Several conflicts took place between the Indians and Gens. Sibley and Sully in the north-west, and Curtis in Kansas, by which their numbers were greatly reduced, and their provisions and property destroyed. For the attack on Fort Fisher, see NAVAL OPERATIONS.

ASIA. Among the empires of Asia, only three remain under the rule of native governments, China, Japan, Persia. Each is coming, from year to year, into closer contact with the civilized nations of the world, and in consequence of this intercourse undergoing a radical transformation.

China continues to court the friendship of foreign powers. Two of them have greatly aided her in her struggle against the powerful rebellion of the Taepings. Thanks to the English and French officers and contingents, the Chinese Government made, during the year 1864, very rapid progress toward the entire suppression of this rebellion, and the capture of Nankin seemed to deal but the fatal blow. (See CHINA.)

The Government of Japan, although sending a new embassy to Europe, made desperate efforts to repeal at least the concessions formerly made to foreigners. The representatives of the foreign powers were, however, found unwilling to abandon their acquired rights. New attacks upon vessels of foreign nations were made in the straits of Simonoseki, but promptly and severely punished by an expedition conjointly undertaken by ships of England, France, Holland, and the United States. After this new proof of the superior power of foreign civilized nations, both the Prince, who had directed the treacherous attack, and the Government of Yedo, showed much readiness to improve their relations with the foreigners. (See JAPAN.)

British India was generally quiet, although a petty war began and ended on the north-west frontier, and an expedition was engaged in punishing an affront offered to a British ambassador by the ruler of Bhootan. The viceregal reign of Sir John Lawrence was illustrated by a grand "Durbar," in which he addressed an assembly of great but tributary powers in the most widely known native tongue. (See INDIA.)

The steady and rapid progress which the arms of Russia are achieving in Asia are attracting the consideration of the whole world, and exciting the serious alarm of English statesmen. The barrier presented by the mountain chain of the Caucasus to the extension of the Russian dominions ceased, in 1864, to exist by the termination of the long war against the Circassians, and the Russian Government was thus enabled to devote her whole power to the accomplishment of one of the objects of her settled policy—that of attaining for herself the supremacy of Asia. Even before the Caucasus was entirely subjugated the Russians had already made good their footing in Toorkistan, having taken possession of Khiva and sent pioneers as far as Bokhara. Since the termination of the Circassian war, they have assumed the offensive with a force evidently much larger than they ever before had in the field in that part of Central Asia, to make war against the principality of Khokand. The campaign was

brought to a successful close with surprising vigor. Fort after fort was stormed in rapid succession, and, according to the latest advices, Khokand itself was taken, and the Khan, after making submission to the conquerors, was replaced on his throne, as a vassal of Russia. Thus Russia has already subjugated two of the states of Turkistan, Khiva and Khokand; and of the other two, Bokhara and the Afghan principality of Balkh; the former is governed by a king who is the chosen ally or friend of the Russians. Russia is now the most formidable military and political power of Central Asia, and only one independent state separates her dominions from those of the Government of British India. (See RUSSIA.)

France, after some hesitation respecting the policy she should pursue with the provinces ceded to her in Cochin China, concluded to keep them. The King of Cambodia appears to be entirely devoted to the French. He paid a visit to the capital of the French provinces at Saigon, and was received with all the honors which are usually shown to royalty in Europe.

The king of Siam has appointed consuls at Rangoon and Maulmain, and has given other signs of his desire to establish friendly relations with the civilized nations, an example which is, thus far, not followed by the king of Ava, who steadily opposes progress, and is remarkable only for being a gigantic monopolist.

AUSTRIA, an Empire of Europe. The reigning sovereign is Francis Joseph I., Emperor of Austria and King of Bohemia and Hungary. The Emperor has only one son, Rudolph, Archduke of Austria and heir apparent, Imperial Prince of Hungary and Bohemia, born August 21, 1858.

Austria has been a constitutional monarchy since 1849. The first constitution of March 4, which was of a very democratic character, was repealed by an imperial decree Dec. 31, 1851. The present constitution was established by an imperial diploma, dated Oct. 20, 1860, followed by a decree or "Patent" of Feb. 26, 1851. The main feature of the present constitution is a tripartite Legislature, consisting—1. Of the Provincial Diets, of which there are eighteen, viz.: Hungary, Bohemia, Lombardo-Venice, Dalmatia, Croatia and Slavonia, Galicia, Upper Austria, Lower Austria, Salzburg, Styria, Carinthia, Carniola, Bukowina, Moravia, Silesia, Tyrol, and Vorarlberg, Transylvania, Istria, and Trieste; 2. A Central Diet, called the *Reichsrath*, or Council of the Empire, consisting of two Houses; and 3. The *Enger Reichsrath*, or Partial Council of the Empire, which is formed by the full *Reichsrath*, leaving out in both Houses the representatives of Hungary and of Croatia. To these provinces a larger share of self-government is given than to the remaining ones. The Lower House is composed of 848 members, elected by the eighteen Provincial Diets in the following proportions: Hungary, 85; Bohemia, 54; Lombardo-Venice, 20; Dalmatia, 5; Croatia and Slavonia, 9; Galicia, 38; Upper Aus-

tria, 10; Lower Austria, 18; Salzburg, 8; Styria, 18; Carinthia, 5; Carniola, 6; Bukovina, 5; Moravia, 22; Silesia, 6; Tyrol and Vorarlberg, 12; Transylvania, 26; and Istria and Trieste, 6. Each Provincial Diet consists of only one assembly, composed—1st, of the archbishops and bishops of the Roman Catholic and Oriental Greek Church and the chancellors of the universities; 2d, of the representatives of great estates, elected by all landowners paying not less than one hundred florins taxes; 3d, of the representatives of towns, elected by those citizens who possess municipal rights; 4th, of the representatives of boards of commerce and trade unions, chosen by the representatives of rural communes, elected by such communes or by such inhabitants as pay a small amount of direct taxation.

To the revenue of the Empire the German-Slavonic population contributes about 65 per cent., the Kingdom of Hungary 25 per cent., and Venetia about 6 per cent. Among the most important items of the revenue is the monopoly of the Government for tobacco, which has existed since 1670, and has been continually increasing of late years. Among the items of expenditures the interest on the public debt is the largest. This debt has gradually grown up to immense proportions. While in 1768 it was 150,000,000 florins, it was 288,000,000 in 1781, 349,000,000 in 1789, and from that year until 1863 there has not been a single year in which the revenue of the year has come up to the expenditure. According to a report of the Commission on the Public Debt, published in the official Vienna Gazette of Nov. 15, 1862, the capital of the debt, both consolidated and floating, amounted, on Oct. 31, 1862, to 2,864,316,761 florins, of which the floating debt consisted of 396,972,206 florins. The sum of 2,237,983 florins, which at that moment was contained in the deposit bank, being deducted from that amount, there remained 2,862,078,829 florins as the net amount of the general debt. In addition, the Lombardo-Venetian debt amounted to 66,419,885 florins, and the debt of the land-redemption fund was 522,586,239 florins. A new loan of 80,000,000 florins was contracted in November, 1863, and another loan of 90,000,000 florins in May, 1864. The latter loan, sanctioned by the Reichsrath in the vote of the budget estimates for 1863-'64, was to defray in part the expenditure incurred in the war against Denmark.

According to official returns Austria possessed, on the peace footing, at the end of October, 1863, an army of 269,103 men, rank and file, with 42,201 horses. The navy consisted, in August, 1864, of thirty-nine steamers, with 639 guns and 11,730 horse-power, and twenty sailing vessels, with 145 guns.

The session of the Reichsrath of 1863 was brought to a close by a speech from the Emperor on the 15th of February. He said that, with great satisfaction, he observed the material and intellectual progress made by Austria.

He expressed his thanks for the support and sympathy he had received from the whole monarchy. The session had not been unfruitful, some important bills having already been sanctioned. Eastern Galicia and the Bukovina would have the advantage of railways, and a line would also be constructed in Transylvania. In conformity with the vote of the Federal Diet, and in concert with the King of Prussia, he had taken part in the federal execution in Holstein, and Schleswig had been occupied as a pledge. The Emperor said, in conclusion, "Austria has shown that, in her rejuvenated form, she preserves her good old spirit, and that the inheritance of her strength and glory abides with her on the new path of liberty which she has entered."

Notwithstanding the hopes expressed in this speech of the Emperor, very little progress was made in the conciliation of the disaffected nationalities. The state of Galicia appeared to be so alarming that, on the 28th of February, the state of siege was proclaimed in all Galicia and Cracow. The ordinances published on this occasion by the Governor, Count Mensdorff, were to the following effect:

The civil authorities are subordinated to the military commander of the kingdom of Galicia. The courts-martial have to administer justice on the basis of the civil laws wherever they are in accordance with the military laws and with the military method of procedure in criminal cases. Thus, persons guilty of high treason, misprision of treason, offences against members of the Imperial family, rebellion, sedition, murder, or disturbance of the public peace, will be punished according to laws contained in certain paragraphs of the Civil Code. The military authorities are also charged to proceed against all persons who may offend against the laws for the regulation of the public press. The commander of the forces in Galicia is empowered to commute punishment, or even to grant a full pardon, if the person convicted be not sentenced to more than one year's imprisonment. He has also the power temporarily to suspend the appearance of periodical papers, or altogether to suppress them. The new laws relative to the personal liberty of the subject and to the inviolability of his domicile are suspended.

An order was also issued for a general surrender of arms to the police authorities in Galicia within a fortnight, and that under pain of heavy fines and imprisonment. Persons attempting to conceal weapons of war and ammunition were to pay a fine of 1000 florins, or to be closely imprisoned for one year. Government officials and persons wearing the national (Polish) costume were allowed to retain their side-arms. All foreigners sojourning in Galicia were summoned to present themselves to the police authorities within forty-eight hours, and to obtain permission to remain in the country. On the 18th of March disturbances broke out in Pesth, Hungary, but they were easily suppressed. The repeated reports that the Government would convoke the Diet of Hungary, in order to make a new attempt at reconciliation, proved to be unfounded.

The Franco-Italian convention concluded on the 15th of September, led to the resignation

of Count Rechberg, who, since 1859, had been minister of foreign affairs. His resignation was accepted by the Emperor on the 27th of October, and he was succeeded by Count Mensdorff-Pouilly. According to the programme of the new minister, Austria is to assume as much as possible a defensive policy.

The new session of the Reichsrath commenced on the 12th of November. It was formally opened on the 14th by a speech, in which the Emperor declared that a good understanding and friendly relations existed between Austria and the other Great Powers, congratulated his people upon the conclusion of war with Denmark, urged legislation for the improvement of the finances and of railway communication, and announced that he was negotiating respecting the politico-economical unity of Germany. Hungary, Venetia, and Croatia were again unrepresented in the Diet. The Czech members of Bohemia, likewise, were absent, and on the 5th of December sent in a declaration to the effect that they resigned the post to which their constituents had elected them. Of the Polish members, only nine made their appearance. The lower house of the Reichsrath, in reply to the speech from the

throne, adopted an address to the Emperor, in which they express a wish that the Croatian and Hungarian Diets may be convened after the close of the session; that the Government, coöperating with the German Confederation, may assist the duchies of Schleswig and Holstein in fully obtaining their rights in the succession question; that the Government would oppose any tendency to separation adverse to the interests of the German Confederation, and endeavor to strengthen by federal reform the bond between German States; that the exceptional circumstances necessitating the proclamation of a state of siege in Galicia would shortly disappear; that a reduction may be made in the military and naval expenditure. It then declares that a law establishing ministerial responsibility is urgently needed to complete the Austrian constitution.

In October a band of a few hundred armed Italians broke into Venetia, and made an attempt to capture the town of Udine. The attempt was easily suppressed by the Government. The Government of Italy officially disapproved this attempt, and disarmed the insurgents, who were forced into the territory of Lombardy.

B

BACHE, FRANKLIN, M. D., an eminent American physician, savant, and author, born in Philadelphia, Oct. 25, 1792, died in that city March 19, 1864. He was the oldest great-grandson of Benjamin Franklin. He was educated at the University of Pennsylvania, graduating in 1810, and soon after commencing the study of medicine, received his medical diploma from the same university in 1814. In 1818 he entered the army as assistant-surgeon, and in 1814 was appointed surgeon. He remained in the army till 1816, when he resigned and commenced the practice of his profession in Philadelphia. From 1824 to 1836 he was physician to the Walnut Street prison; from 1826 to 1832, Professor of Chemistry in the Franklin Institute; from 1829 to 1839, physician to the Eastern Penitentiary; from 1831 to 1841, Professor of Chemistry in the Philadelphia College of Pharmacy; and from 1841 to his decease he was Professor of Chemistry in the Jefferson Medical College. He was also for some time President of the American Philosophical Society, and at the time of his death President of the Deaf and Dumb Asylum corporation. As an author he was perhaps best known by his share in the preparation of the successive editions of the United States Dispensatory, the first of which was published in 1833, and the last a year or two since. He was also one of the Publishing Committee of the United States Pharmacopœia, and made many valuable additions to that work and the

Dispensatory in relation to the *Materia Medica*. His profound learning, urbane manners, and amiable character won him a large measure of public esteem.

BAPTISTS. The "Baptist Almanac" for 1865 does not contain any later denominational statistics than the almanac for 1864, according to which the Regular Baptists numbered 1,089,400 in the United States, 15,285 in Nova Scotia, 8,392 in New Brunswick, 13,764 in Canada, and 86,500 in the West India Islands; total in North America, 1,113,841. Anti-Mission Baptists, 63,000; Free-Will Baptists, 57,007; Six-Principle Baptists, 3,000; Seventh-Day Baptists, 6,686; Church of God Winebrennarians, 14,000; Disciples (Campbellites), 800,000; Tunkers, 20,000.

The annual meeting of the General Baptist Benevolent Associations was held, in 1864, in Philadelphia. The following is a brief summary of the operations of the societies and their present condition: The receipts of the American Baptist Missionary Union, which held its 50th annual meeting from May 24th to May 26th, were \$135,525.25; payments, \$185,014.63; balance in treasury, April 1st, 1864, \$510.64. The number of missions in connection with the Union, is 19. In the Asiatic Missions there are 15 stations and about 400 out-stations. In the French and German Missions not far from 1,100 stations and out-stations. The number of missionaries, including those in this country, and exclusive of those in Europe,

is 40 males and 86 females. Native preachers and assistants, exclusive of those in Europe, not far from 500; in Europe, 160; total, 660. The number of churches is 660; of baptisms, 2,500. The whole number of members is 85,000.

The meeting unanimously adopted the following resolutions on the state of the country:

Resolved, That we regard the rebellion inaugurated by the Southern States for the purpose of destroying the Union which our fathers founded, and establishing a slaveholders' confederacy, as utterly causeless and inexcusable—a crime against civilization, humanity, freedom, and God, unparalleled in all centuries.

That we tender to the President and the national authorities the assurance of our confidence and of our sympathy with their efforts to maintain the integrity of the republic; of our prayers for their success; of our readiness to sustain them by the sacrifices of property and life, and of our hearty assent to the policy of conquering disunion by uprooting slavery, its cause.

That we rejoice in the interest and coöperation manifested by the Government with respect to the establishment of schools and Christian institutions throughout the recovered portions of the Southern land, as an evidence of its practical recognition of the Gospel of Christ as the only sure basis, and the best safeguard of national peace and prosperity, and that we offer it our most cordial thanks for the facilities afforded to our own kindred organizations in the prosecution of this momentous work.

That however prolonged may be the conflict, and however great the cost which we may be required to pay, our trust in the final triumph of liberty and righteousness is unshaken, and amid victory and defeat alike, we rest in the conviction that a merciful though chastening Providence will bring forth from the carnage and woe of this civil war a brighter, grander future for our country and the world.

Hon. A. Hubbell, Hon. J. R. Doolittle, U. S. Senator from Wisconsin, and M. B. Anderson, LL. D., were appointed a committee to convey the resolutions to the President of the United States. Hon. Ira Harris, U. S. Senator from New York, was elected President of the Union for the ensuing year. It was also resolved to raise a special jubilee fund of \$50,000 for the reinforcement of missions. \$15,000 were subscribed on the spot.

At the 40th anniversary of the American Baptist Publication Society, which was held on May 28d, the receipts of the year were stated to be \$108,587.60; expenditures, \$106,728.85; balance in treasury, \$1,859.25.

Twenty-six new publications have been stereotyped and added to the list during the year. Of these, including the Annual Report and Almanac, 361,000 copies have been printed.

The new editions of former publications have been—of books, 107,000 copies; of tracts, 60,000 copies; making the issues of the year, new and old, amount to 528,000 copies, containing 25,528,500 actual, or 29,186,375 18mo pages.

The Society's catalogue numbers at the present time 786 publications. Of these, 404 are bound volumes; 94 are in paper covers, and 280 are tracts. Of the tracts 11 are in the Swedish language, 7 in French, 10 in German, and 280 in English, of which 28 are for children.

Thirty-eight missionary colporteurs have been employed during the year, of whom 8 labored among the freedmen of Louisiana, North and South Carolina, and 14 in Sweden.

The American Baptist Home Mission held its 82d meeting on May 19th, and reported its receipts as \$72,904; expenditures, \$55,504. The Society employs 185 missionaries, none of whom preach in foreign languages.

A French Regular Baptist Missionary Society was established in 1863, to labor among the French in Canada and the United States, by means of pastors, evangelists, the press, and the training of young men for the missionary work.

The receipts of the American and Foreign Bible Society, whose 27th meeting was held on May 21st, were \$30,719; expenditures, \$27,668; volumes issued, 28,778; total since 1837, 1,888,886.

The 21st anniversary of the American Baptist Free Mission Society was held at Perry, N. Y., May 20th, 1864. The receipts for the year were \$22,905; the expenditures, \$19,820.

The Society unanimously adopted a resolution—

That in view of the vast and preëminent claims of the Home Missionary work in the present great crisis of the country, the receipts of the society should be \$150,000 the current year, and that the pastors and churches throughout the land be requested to do their part promptly and cheerfully in raising this amount.

The Secretary of War, at the beginning of the year, gave full and formal authority to the American Baptist Home Mission Society to take possession of every abandoned Baptist meeting-house within the limits of the insurrectionary districts, and of every other Baptist church edifice in the hands of the rebels. From Southern sources it was ascertained that Richmond College, Wake Forest College, N. C., the Furman Institute, S. C., the Mercer College, Ga., have all been suspended, and that the Female College at Richmond is closed. Of the Lutheran Baptist papers, the "Religious Herald," of Richmond, the "Biblical Recorder," at Raleigh, N. C., and the "Southern Baptist," Charleston, S. C., were still in existence, though, owing to the scarcity of paper, on a half sheet.

The Southern Baptist Convention held its last biennial session at Augusta, Ga., in May, 1868. For the means to support its missionaries in China and Africa, it is mainly dependent upon Maryland and Kentucky. By permission of the Post-Office and War Departments, the correspondence and remittances of the Convention pass through Northern channels.

The "Tunker" denomination of Baptists lost one of their most prominent men, Elder John Kline, of Rockingham, Va. The Rockingham "Register" remarks on this event:

The Rev. John Kline, of Linville's Creek, in this county, an aged Tunker preacher of considerable

prominence, and a man of great influence with and in his Church, was shot and killed near his residence about 11 o'clock, on Wednesday morning of last week (15th June.) He had gone to a neighbor's in the direction of Tunleytown, we learn, to clean a clock, and was on his return when the tragedy occurred. He was shot in the groin and breast with four balls, and is supposed to have been instantly killed. He had some money and his watch on his person when he was killed—these were not disturbed by the party by whom he was slain.

He was known as an uncompromising Union man, and during the early part of the war had been arrested by order of Gen. Jackson for disloyalty. He had, however, been honorably acquitted, and was pursuing "the even tenor of his way," passing frequently, by permission of the authorities, within the Yankee lines to preach and hold other religious services. He was a man of the strictest integrity in his business transactions, and was highly esteemed in his Church, whose membership will mourn his death as the removal of one of the pillars of the Church. The motives which induced some assassins to waylay and kill him will probably be never fully known and understood; but the cause of his death doubtless had some connection with the troubles that now afflict the country, occupying, as he was believed to do, a position of antagonism in feeling to the Confederacy. While the people differed with Mr. Kline in the erroneous views which he entertained, yet all good citizens must deplore such a lawless wreaking of vengeance upon the person of an unarmed and feeble old man. Such things show how rapidly we are drifting into scenes which must be full of terror to us all.

Sweden has now seven Baptist associations, with the following memberships on Jan. 1, 1864: Norland, 1,821; Dala, 226; Stookholm, 1,124; Nerike, 1,896; Smaland, 242; Gotland, 866; Skane, 1,017; total, 6,191. Eight hundred and forty persons were baptized during the year, and nine new churches constituted.

The "Baptist Handbook" for 1865 contains the following general summary of Baptist churches in Great Britain:

England	1,818
Wales	455
Scotland	98
Ireland	38

Total, 2,400

It would appear that of this number of churches the compilers of the "Handbook," or the Secretary to the Union, have obtained returns from 1,898—a very large proportion—as to the number of members belonging to each. The total is 198,295. Having this broad basis, an approximate estimate has been made for the remainder, which gives a total of 249,809 members of Baptist Churches in the United Kingdom, or an average of 102 members for each church.

The anniversary of the Baptist Union was held on the 25th of April, when it was stated that the increase of the reported churches for the year was only 1 5-8 per church, the lowest average for eight years. In the matter of chapel building it was found that the total amount of debt owed by Baptist churches for their chapels was \$567,500, of which \$27,500 had been paid the last year, and it was resolved to ask the denomination for \$500,000 as a building fund. The total receipts of the Mis-

sionary Society were \$176,096 (about \$40,000 more than the receipts of the American Missionary Union).

At the annual meeting of the Baptist Association of Victoria in 1864, it was reported that 22 churches had increased their memberships from 1,826 in 1863 to 1,585 in 1864. The number of Sunday school scholars advanced from 1,793 to 2,231 in 1864; and that of teachers from 197 in 1863 to 258 in 1864.

The Baptist missions in Burmah have now taken so deep root, that the missionaries called a General Convention, which was to meet at Rangoon, in November, 1864, and to take the initiatory steps for an independent organization of these churches. The views of the Executive Mission of the American Baptist Missionary Union, which has thus far supported the missionaries of the Burmah churches, are expressed in a circular to the missionaries, in which they desire information on the following points:

1. To what extent may the supervision of the Press and the Theological Seminary be committed to the proposed convention?

2. Would it be advisable at once to place all funds for missionary operations, beyond the salaries of the missionaries, in a round sum, in the treasury of your convention, to be disbursed by you? Have not such funds long enough been appropriated, to the last rupee, by a committee sitting in Boston? Is it not time the responsibility was assumed and carried by men on the banks of the Irrawadi?

3. A native agency, its importance, and how it may be called out, developed, and made most effective. Compensation of such when it should come, how large it should be, and in what manner bestowed—that is, whether as a fixed salary, or made contingent on time spent and value of service?

4. How many missionaries, speaking one and the same language, may be properly stationed in the same city or vicinity?

5. Jungle and village labor—have we had enough of it, as compared with local and town agency, especially among the Burmans?

6. Is it not time for the missionaries to be members of the churches in Burmah, and hence subject to the care and discipline of those churches?

BATES, JOSHUA, an eminent English banker and financier of American origin, born in Weymouth, Mass., in 1788, died in London, Sept. 24th, 1864. Mr. Bates came of a good and honorable family, who had borne a fair share in the doings of Plymouth Colony and Massachusetts, prior to the Revolution, and his father had been a colonel in the Revolutionary army. His early education was conducted by Rev. Jacob Norton, the clergyman of Weymouth, and at the age of fifteen he entered the counting-house of William Gray & Son, of Boston, at that time the leading merchants of New England. Here he displayed so rare an aptitude for acquiring commercial knowledge, and such sound judgment in conducting business, that even before he attained his majority, both father and son trusted him with their most complicated and difficult affairs. The Embargo Act, and the Berlin and Milan Decrees, caused great trouble to the Grays, who were largely engaged in commerce

with Europe, having seldom less than forty ships afloat, and they despatched Mr. Bates, then just of age, to Europe to manage the difficult business of protecting their interests there. This duty brought him into intimate relations with the Hopes and Barings, and other great commercial houses in Europe, and as he continued to have the control of Mr. Gray's affairs all over Europe for several years after the peace, these houses became deeply impressed with his remarkable business abilities. In 1826, through the influence of Baring Brothers & Co., he formed a house in London, in connection with Mr. John Baring, son of Sir Thomas Baring, under the firm of Bates & Baring. On the death of Mr. Holland, of the house of Baring Brothers & Co., both Mr. Bates and Mr. John Baring were made partners in the house of Baring Brothers & Co., and for many years past Mr. Bates has been the leading member of the firm, the high reputation of which has been greatly advanced by his uncommon abilities, judgment, and sterling integrity. In 1854, when a joint commission was appointed to make a final settlement of claims between citizens of Great Britain and the United States, Mr. Bates was appointed umpire between the British and American commissioners in all cases where they could not agree. The position was one of great delicacy and responsibility, but the justice and equity of his numerous decisions has never been called in question in either country. Mr. Bates, in his youth, had felt the necessity for a good public library, and though he succeeded in obtaining the books which he needed, he never forgot the difficulties encountered for the want of them. Hence, when he learned, in 1852, that the city of Boston was about taking measures for the establishment of a free public library, he immediately addressed a letter to the Mayor of Boston, offering \$50,000 toward such a library, conditioned only that the interest of the money should be spent in the purchase of books of permanent value and authority, and that the city should always provide comfortable accommodations for its use day and evening by at least one hundred readers. But his liberality did not stop there. As soon as a suitable building was undertaken he began to send books for it in large quantities; and when the building was opened, in January, 1853, he had forwarded between 20,000 and 30,000 volumes, besides those purchased from the interest of the fund. His interest in his native country did not abate to the close of his life. During the present war, his sympathies for the United States Government have been freely manifested; and it is perhaps due as much to his prudent counsels and judicious suggestions, as to those of any citizen of either country, that a war between England and the United States, which more than once has seemed imminent, has been averted.

BAVARIA. JOSEPH MAXIMILIAN II., King of, born at Munich, November 28th, 1811, died

in the same city, March 10th, 1864. He was educated at the University of Göttingen, where he distinguished himself as a student, and subsequently avoided as far as possible all connection with public affairs, devoting his whole attention to science, literature, and art, until the abdication of his father in March, 1848, called him most unwillingly from his studies, to the cares and duties of the throne. His administration was moderately liberal, the revolutions of 1848 rendering it unsafe for a German King to attempt to maintain a despotic Government; and though for a time he indulged in some tyrannical measures, such as the exile of political writers, and the dissolution of the Diet, yet he soon returned to more liberal views, and in 1855 attempted to ameliorate the condition of the Jews in his dominions, a measure upon which none of his predecessors had ever ventured. He had taken an active part in the Danish question, insisting upon the right of the Prince of Augustenburg to the Government of Schleswig-Holstein, and repudiating in the Diet the policy of Austria and Prussia, and the London treaty of 1852, in which Bavaria was not represented, and in this position he was supported by a majority of the lesser Governments of Germany. His sympathies on this question were more strongly enlisted against Denmark, probably, from the fact that his brother Otho had been expelled from the throne of Greece, and a Danish Prince crowned in his stead, to the prejudice of his own son, who he had hoped would succeed to the vacant throne. The chief merit of Maximilian II.'s reign, however, was the liberal encouragement he gave to science, literature, and art. Following the example of his father, he did his utmost to beautify his capital. A church of great magnificence in exact imitation of a Roman Basilica, a crystal palace erected for an international exhibition which did not prove a success, a noble triumphal arch standing between the Glyptothek and the Pinacothek, and broad boulevards extending in different directions, show the architectural tastes of the King; while the eminent men whom he called to places of honor and scientific distinction in Munich, exhibit his solicitude for the intellectual advancement of his capital. Ranké was appointed to preside over a historical commission; Liebig was made Professor of Chemistry; Siebold called to the Professorship of Physiology, Anatomy, and Zoology, at the Munich Institute; and Pfeiffer, Carrière, and Geibel brought from other States to adorn his capital by their scholarship. His fostering care was also extended to the scholars, philosophers, and artists already resident at his capital, and under his influence the city maintained fully its previous reputation as the musical capital of Europe. He was succeeded by his son, Ludwig Otto Frederick Wilhelm, born August 26th, 1845, under the title of Ludwig II.

BELGIUM. A kingdom in Europe. Reigning sovereign Leopold I., King of the Belgians, born Dec. 16, 1790, the son of Duke Francis

of Saxe-Saalfeld-Coburg, elected King of the Belgians by the National Congress of Belgium, June 4, 1831, accepted the offer July 12, and ascended the throne July 21, 1831. Heir-apparent of the crown, Leopold, Duke of Brabant, born April 9, 1835.

According to the charter of 1831, Belgium is a "constitutional, representative, and hereditary monarchy." The legislative power is vested in the King, the Chamber of Representatives, and the Senate. The Chambers meet annually in the month of November, and must sit for at least forty days. The Chamber of Representatives consists at present of 116 members, elected in 41 electoral districts. The right of suffrage is exercised by all citizens who pay a small amount of taxes. The eligibility is made dependent upon being a Belgian by birth, or being naturalized, and having attained the twenty-fifth year of age. Every second year one-half of the Chamber of Representatives is renewed. The members of the Senate, just one-half the number of Representatives, are chosen for eight years, and one-half of their number retire every fourth year. To be eligible as a Senator, it is necessary to be a Belgian by birth or naturalization, to be forty years of age, and to pay in direct taxes no less than £84. But if, in a province, the number of persons paying this amount of taxes is not at least in the proportion of one to six thousand of the population, the list is enlarged by the names of such citizens as stand next on the tax roll. The Belgian constitution guarantees to every citizen personal freedom and liberty of conscience.

Belgium is divided into nine provinces, the extent and population of which is as follows:

	Area in Geographical Square Miles.	Inhabitants (Dec. 31, 1862).
Antwerp.....	51,533	465,008
Brabant.....	59,300	826,124
West Flanders.....	58,928	647,871
East Flanders.....	54,645	810,588
Hainault.....	67,194	885,829
Liege.....	52,714	545,833
Limburg.....	48,948	197,916
Luxemburg.....	80,469	204,597
Namur.....	66,073	304,368
	586,543	4,386,566

The largest cities are Brussels, with 181,799 inhabitants; Ghent, 121,255; Antwerp, 117,324; Liege, 99,905. The foreign commerce of Belgium in 1862 was: imports, 588,754,000 francs; exports, 502,120,000 francs.

The arrivals and departures at the Belgian ports in 1862 were as follows: Arrivals, 3,629 vessels, of 694,800 tons; of these there were 587 Belgian ships, of 71,490 tons; clearances, 3,644 vessels, of 696,773 tons, of which 588 were Belgian ships, having 72,450 tons. The merchant marine, on Dec. 31, 1862, consisted of 103 vessels, having 28,947 tons.

The great majority of the Belgians profess the Roman Catholic religion. The number of Protestants is estimated at about 18,000, that of the Jews at 2,000. The national treasury pays a salary to the ministers of the acknowl-

edged churches. Thus the Roman Catholics received, in 1861, 3,628,180 francs; the Protestants, 45,099 francs; the Jews, 9,500 francs; and the Episcopal Church, 10,800 francs. The Catholic Church has one Archbishop and five Bishops; the former receives an income of 21,000 francs, and each of the Bishops an income of 14,700 francs. All the incomes of the clergy are, however, largely increased by the voluntary contributions of the communes. There are 383 convents in Belgium, 42 for men and 291 for women. Education, which was compulsory under the care of the Dutch Government, has ceased to be so since 1830. In the budget of 1864, the sum set down for public education amounted to 4,500,000 francs. Of the young men drawn by conscription in 1856 and 1859, there were—

Not able to read or write.....	18,848	18,938
Able only to read.....	8,778	5,511
Able to read and write.....	9,718	11,366
Of superior education.....	12,961	14,467

The following interesting facts concerning Belgium are taken from a report made by Mr. Barron, the English Secretary of Legation at Brussels:

"The entire population of Belgium is nearly five millions in round numbers; the number to the square mile is 425, and in East Flanders it is 700, while in England the population per square mile is only 377, so that Belgium, in proportion to its extent, has the largest population of any country in Europe. The income is nine millions and a half sterling, or less than £2 per head; whereas the taxation in England and Wales is £2 18s. 4d. per head. Of the nine millions and a half a considerable portion accrues from national property, such as railways, canals, and crown lands, the amount raised by taxation of all kinds being five millions and a half, or about £1 8s. 0d. per head. Fourteen years ago Belgium had a floating debt of a million sterling; but since then, says the authority we are quoting, 'the debt has gradually decreased and the balance increased, so that in 1862 the floating debt had vanished, and the balance amounted to upwards of four millions.' The management of the funded debt, we are assured, has been equally successful. In this happy condition of things, the surplus revenue over expenditure amounts to £360,000, and this sum is devoted to various purposes of internal improvement. In Belgium, taxation is raised principally from three sources—direct taxes on property, trade, licenses, and customs and excise duties."

Mr. Barron shows that the indirect taxes on salt, beer, sugar, wine, and spirits, furnish forty-four per cent. of the revenue raised, and the direct taxes on land and houses thirty-one per cent.

The most important event in the political history of Belgium of the past year is the election of a new Chamber of Deputies, which was held on the 11th of August. The struggle

was—as it has always been since the establishment of Belgian independence in 1831—between the Liberals and the Conservative, or, as it is now commonly called, the Catholic party. Before the dissolution of the Chamber, the Liberal party reckoned 59 votes, and the Catholic 57. The Catholic party, by absence, had been able to render the validity of the sittings impossible, and thus had brought on a dissolution. The election was attended with more than ordinary excitement, and resulted in a decided victory of the Liberals. In the new Chamber the Catholic party has only 52 deputies, and the Liberals reckon 64.

BENJAMIN, PARK, an American editor and poet, born at Demerara, British Guiana, August 14, 1809, died in New York City September 12, 1864. His father, a native of New England but of Welsh descent, was at the time of his birth residing in Demerara as a merchant. An illness in childhood improperly treated caused him a permanent lameness, and at an early age he was sent to his father's home in New England for medical treatment and to be educated. He entered Harvard College in 1825, and after remaining two years in that institution, removed to Trinity College, Hartford, where he graduated in 1829, and immediately commenced the study of law, and was admitted to the bar in Boston in 1832. His tastes inclined, however, much more strongly to literature than to law, and he very soon entered the editorial fraternity, becoming one of the original editors of "The New England Magazine," a periodical established by J. T. Buckingham. In 1837 he removed to New York, and, in connection with Charles Fenno Hoffman, edited the "American Monthly Magazine," and subsequently was associated with Horace Greeley, as editor of the "New Yorker." His next literary enterprise was the editing for a short time the "Brother Jonathan," a weekly literary paper, which, however, he soon abandoned in consequence of some difficulty with the publisher of the paper, and, in conjunction with Epes Sargent and Rufus W. Griswold, started a rival weekly, called the "New World," which for some years had a successful career. Some of his best sonnets and lyric poems appeared in its columns. After five years he sold his interest in this paper, and after a short experience as a bookseller and publisher, devoted himself exclusively to literature, being a frequent contributor to magazines and literary periodicals, and a lecturer and poet before lyceums and on public occasions. His poems, which embrace many popular lyrical and satirical pieces, have never been collected, but are scattered through the recent periodical literature of the country, and several of the larger poems, though often recited, have never appeared in print.

BINGHAM, PERCEPINE, an English jurist and legal writer, born in London in 1788, died in the same city November 1, 1804. He was educated at Winchester and Magdalen College,

Oxford, proceeding B. A. in 1810, and was called to the bar at the Middle Temple in 1818. He was for some years one of the Police Magistrates at Great Marborough Street, and was the author of "The Law and Practice of Executions" (London, 8vo, 1815); "A Treatise on Infancy and Coverture" (London, 8vo, 1816); "A Digest of the Law of Landlord and Tenant, with Precedents" (London, 8vo, 1820); "A System of Shorthand on the Principle of the Association of Ideas" (London, 8vo, 1821); and "Reports in the Common Pleas from Easter Term, 1819, to Michaelmas Term, 1840" (London, 19 vols. 8vo, 1821-1840). Of these the first three were compiled jointly with W. J. Broderip, Esq., the remainder by Mr. Bingham alone.

BIRNEY, DANIEL BELL, a major-general of volunteers in the service of the United States, and at the time of his death commander of the 10th army corps, born in Huntsville, Ala., in 1825, died in Philadelphia, Oct. 18th, 1864. Gen. Birney was a son of the late Hon. J. G. Birney, an Alabama planter and statesman, who emancipated all of his slaves, and coming first to Cincinnati, and afterwards to Michigan, to advocate the cause of emancipation, was, in 1844, the candidate of the liberty party for the presidency. His son received his academical education in Cincinnati, and also studied law there, but after his admission to the bar was for two or three years engaged in mercantile pursuits. In 1848 he removed to Philadelphia and opened a law office, and soon acquired a large practice. He early connected himself with one of the volunteer militia companies of that city, and at the commencement of the war was active in raising a Philadelphia regiment under the three months' call, of which he was appointed lieutenant-colonel. At the expiration of their time of service, the men re-enlisted under him as colonel, and the regiment joined the Army of the Potomac. In February, 1862, he was appointed brigadier-general, and served in all the battles of the Peninsula, as well as those before Washington. In the battle of Fredericksburg he distinguished himself, and in the battle of Chancellorsville his brigade, in Berry's division, rendered efficient service in checking the advance of Jackson's troops after the panic in the 11th corps. After the death of Gen. Berry, he took command of the division, being promoted to a major-generalship, May 28d, 1863, and led it in the battle of Gettysburg, commanding the corps after Gen. Sickles was wounded. After the 2d corps had been recruited to about 40,000 men, he was assigned to the command of one of its divisions, and in the campaign of 1864 his bravery and skill had called forth the warm commendations of his superior officers. In pushing Lee back from the wilderness, in the movements toward the North Anna, the crossing of that river and the Pamunkey, in the actions of Hanover Court House and Bethesda Church, in the battle of Cold Harbor, and in-

deed in every battle of the campaign, his division was foremost in the very heart of danger. On the 23d of July, Gen. Grant promoted him to the command of the 10th army corps, in the Army of the James. Early in October he was taken sick with malarious fever, and his constitution was so seriously impaired by the great exertions he had made at the time of the rebel attack on Kautz's cavalry corps, being then ill in bed, that it could not withstand the onset of the disease. He was brought home to Philadelphia, and though almost in a dying state, insisted on being borne to the polls (the State election being in progress) to vote before he was carried home. He was greatly esteemed and beloved both in the army and in Philadelphia.

BLANCHARD, THOMAS, an American mechanic and inventor, born in Sutton, Worcester County, Mass., June 24, 1788, died in Boston, April 16, 1864. At the age of 18 years he joined his brother, who was engaged in the manufacture of tacks by hand, a slow and difficult process. After six years of study and experiment he perfected a tack machine which would turn out 500 tacks per minute better made than they had ever been by hand. Having sold this machine and the right to make it, he next turned his attention to constructing a machine for turning and finishing gun-barrels by a single operation. He overcame the difficulty of finishing the octagon portion of the barrel at the breech, by changing the action of his lathe to vibratory motion at a given point. The invention of a lathe for turning gunstocks, afterward extended to the turning of all kinds of irregular forms, was his next achievement, and this was really one of the most remarkable inventions of the century. (For description of its mode of operation, see BLANCHARD, THOMAS, in New American Cyclopædia, vol. iii., p. 831.) He subsequently became interested in the construction of railroads and locomotives, and made numerous improvements in both. He also contrived boats which would ascend rapids, or rivers having strong currents, invented machines for bending heavy timbers into any required form, machines for cutting and folding envelopes at a single operation, and morticing machines. In all, he took out between 20 and 30 patents, but realized but little from most of them.

BRAZIL, an Empire in South America. It is, in extent of territory, the third country of the world, being exceeded only by China and Russia. The area is estimated at 147,624 geographical or 3,100,104 English square miles. The population, according to the last census of 1856, was 7,677,800, being, on an average, only three persons a square mile. About 2,500,000 of the population are negro slaves, and about 500,000 native Indians. A very extensive mixture of white, the negro, and the Indian races has taken place, and the greater part of the population consists of mixed breeds, which are distinguished as Mulattoes (offspring of a white

with a negro); *Nameluco* (a white with an Indian); *Cafuzo* (an Indian with a negro); *Ouribooco* (a *Cafuzo* with an Indian); *Yibero* (a *Cafuzo* with a negro).

The total value of imports and exports into and from the Empire in each year from 1859 to 1862 was as follows:

	Milreals.	Milreals.
1859	120,844,578	94,199,785
1860	197,181,198	104,732,223
1861	111,672,684	113,950,071
1862	110,517,101	120,735,656
	98,190,647	122,554,180

The actual income of the Empire during the years 1860-'63 was as follows: 1860-'61, 53,850,905 milreis; 1861-'62, 55,857,726; 1862-'63, 50,724,084. The budget of expenditures for the year 1864-'65 was estimated at 56,588,818, and the receipts at 52,000,000; deficit 4,588,818. The total amount of the public debt of Brazil in 1868 was as follows, according to the official statement of the Minister of Finance:

1. Foreign Funded Debt, on Dec. 31st, 1868:	
Loan of the year 1824	22,258,000
" " " 1829	585,000
" " " 1845	842,000
" " " 1859	590,000
" " " 1859	497,000
" " " 1863	3,855,000
For Don Pedro Railway Company, May 9, 1858 ..	1,833,900
For Pernambuco Railway Company and Union Industrial and Mercury Companies, March 16, 1860	1,278,600
	£10,890,900

2. Internal Funded Debt on March 31st, 1868, 74,777,409 milreis.

In the army estimates for 1863-'64, the strength of the regular force is fixed at 14,000 men, and in extraordinary cases at 25,000, and the strength of the marine troops at from 3,000 to 5,000. The navy, in 1863, consisted of 16 sailing vessels and 22 steamers.

The new session of the Brazilian Parliament was opened on the 9th of May by a speech from the throne. The Emperor announced that in no part of the Empire had the public order been disturbed. The English Government having accepted the mediation of Portugal for reestablishing the diplomatic relations between Brazil and England, the Brazilian Government had likewise accepted this offer. The relations of Brazil with other Powers were unchanged. The continuance of the civil war in Uruguay, and the complaints made by Brazilian residents in that State, had suggested to the Brazilian Government that, without violating its neutrality in the civil war of Uruguay, it ought to send a commissioner to the Government of Montevideo to claim for the Brazilian residents a compliance with those guarantees which the laws of Uruguay grant to foreign residents.

Among the laws needing amendment, the Emperor referred to that of Dec. 8, 1841, on magistracies; that on the national guard; the mortgage law; the electoral law; that concerning the administration of provinces and municipalities. The Emperor also recommended that provisions be made for the introduction

of an efficient system of recruiting, and of a military code, provisions for meeting the deficit, and the prolongation of the Don Pedro Railway.

Though a satisfactory arrangement of the difficulty between Brazil and Great Britain was not reached during the year 1864, the attention of the Brazilian people was diverted from it by the threatening aspect which the relations of the Empire to the Republic of Uruguay assumed. The Government of Brazil maintained that the claims of Brazilian residents in Uruguay for indemnification for losses which they had suffered in the civil war of Uruguay (*See URUGUAY*), had not been properly considered. It began early in 1864 to show marked sympathy with the chief of the insurgents, General Flores, and to concentrate troops on the frontier of Uruguay. On August 4, Brazil presented to the Government of Uruguay an ultimatum, and demanded a reply within six days. On October 11, the commander of the Brazilian fleet, in a circular despatch addressed to diplomatic agents residing in Montevideo, announced his intention to search all the vessels of foreign powers to prevent the landing of contraband of war. This measure called forth a joint protest from the ministers of England, France, Italy, Spain, and Portugal, as Brazil had not yet formally declared war against Uruguay, and, in particular, had not notified the foreign powers of the blockade of the ports of Uruguay. The conduct of Brazil produced in the adjacent States the universal belief that it was her intention to seize Uruguay. In such a scheme the State of Paraguay and the upper provinces of the Argentine Republic are deeply concerned, as the possession of the mouth of the Uruguay River would make their trade, to a large extent, dependent upon the Brazilian Government.

The President of Paraguay, consequently, on August 30th, issued an earnest protest against the threats uttered by Brazil against Uruguay. When it became clear that Brazil persisted in her policy, and had marched troops into the territory of Uruguay, the President of Paraguay declared war against Brazil. A despatch from Mr. Seward to the United States Minister in Paraguay expressed sympathy with the policy of the President of that State. The excitement in the provinces Corrientes and Entre Rios of the Argentine Republic was also so great, that it was expected that they would support Paraguay, even if the Central Government of the Confederation should remain on intimate terms with Brazil. On the progress of the war, *see URUGUAY*.

On October 7th the Confederate privateer Florida was captured in the Bay of Bahia by the U. S. steamer Wachusett. Intelligence of the fact reached Rio Janeiro on the 14th of October. A council of ministers, presided over by the Emperor, was at once held. The Minister for Foreign Affairs, on the 18th of

October, addressed a note to the Minister of the United States, detailing to him the facts in the case, and expressing a belief that he would hasten to give the Imperial Government assurances that the Government of the Union would attend to the just remonstrances of the Empire. (*See DIPLOMATIC CORRESPONDENCE*.)

On the escape of the Wachusett with the Florida from the port of Bahia becoming known to the Brazilian Government at Rio Janeiro, that Government at once removed the President of the Province of Bahia, and ordered to the metropolis the officers of its naval squadron and of the forts in that port, for the purpose of submitting to a court of inquiry whether they had used due exertion in repelling this violation of the territorial waters of the Empire, and in attempting to prevent the escape of the Federal ship-of-war with its capture. In addition, the Brazilian Government issued orders inhibiting the admission of the Wachusett to any port of the Empire.

For several years the Government of Brazil has endeavored to encourage European immigration. It has offered liberal inducements to settlers, and—as the stream of emigration comes mostly from the Protestant countries of Europe—it has promised to Protestant settlers not only freedom of their religious worship, but the support of their ministers, churches, and schools. A considerable number of colonies have consequently been established by emigrants, and Brazil is at present the only country in South or Central America which has a number of Protestant congregations. On the progress and present condition of these congregations interesting information has been recently furnished by a German Protestant missionary, from which the following are a few extracts:

The oldest and largest Protestant congregation in Brazil is the English congregation of Rio Janeiro. Its origin dates from the beginning of the present century, and the number of its members is from 4,000 to 5,000. There are other English Protestant congregations at Bahia and Pernambuco.

The American Presbyterians have likewise a congregation at Bahia. They also sustain missionaries in Rio Janeiro and in the city and Province of Sao Paulo.

The German Protestant congregation in Rio Janeiro was established in 1828. For sixteen years the congregation, which has now also a school and numbers about 2,500 members, has become self-supporting. The Province of Rio Janeiro has, besides the congregation in the capital, two others at New Friburg and Petropolis. They have both a church and a school, but have suffered greatly from the failure of the Brazilian Government to fulfil the contract entered into with the colonists. The congregation of Petropolis has received a missionary from the Basle Mission-House, whose interest in the fate of the German and Swiss emigrants to Brazil was enlisted in 1861 by Baron Von Tschudi, the ambassador of Switzerland in Rio Janeiro. The Basle mission-house has since sent out five more missionaries to Brazil. The Protestants of Juiz de Fora, a colony situated about twenty-four leagues from Petropolis, are connected with the congregation of the latter place.

The province of Espirito has 4 German Protestant

congregations—at Santa Isabel, with about 400 members; Santa Leopoldina, with 700 members; Rio Novo, with 90 members, and Philadelphia. There is also a congregation of Hollanders, which is served by a German pastor.

In the province of Sao Paulo there are German Protestants at 5 different places; but very little has as yet been done in point of organization.

The province of Santa Catharina has 4 German congregations—Donna Francisca, with 8,000 Protestants; Blumenau, with 2,000, and the two adjoining colonies, Theresopolis and Santa Isabel, together with 1,100 Protestants.

The largest Protestant German congregation of Brazil is at Sao Leopoldo, in the province Rio Grande de Sul. Sao Leopoldo consists of several colonies, situated at some distance from each other on a road cut into the forest, and has a population of more than 12,000 inhabitants, and 3 Protestant ministers.

Besides the places enumerated, there are a number of others which have the nucleus of Protestant congregations. Altogether, there are in Brazil 24 pastors (3 English, 5 Americans, 16 Germans) in 25 congregations (3 English, 5 American, 17 German).

BRINE, THE UTILIZATION OF.—When fresh meat has been sprinkled with salt for a few days, it is found to be swimming in brine. Fresh meat contains more than three-fourths of its weight of water, which is retained in it as in a sponge. But it has not the power to retain brine to that extent, and, in similar circumstances, absorbs only about half as much saturated brine as water; under the action of salt, therefore, flesh allowed a portion of its water to flow out. This expelled water, as might naturally be supposed, is saturated with the soluble, nutritive ingredients of flesh, which is, in fact, juice of flesh—soup—with all its valuable and restorative properties. In the large curing establishments of cities considerable quantities of this brine are produced and thrown away as useless. A process of dialysis has recently been successfully applied to this material for the removal of the salts of brine and for the production at a cheap rate of pure fresh extract of meat. A Mr. Whitelaw, of Glasgow, has introduced the process with success.

The brine, after being filtered to free it from any particles of flesh or other mechanical impurities it might contain, is then subjected to the operation of dialysis. The vessels or bags in which the operations are conducted may be made of various materials and of many shapes, but whatever might be their material or shape they are called "dialysers." Such an apparatus as the following would be found to answer the purpose: A square vat, made of a frame-work of iron, filled up with sheets of skin or parchment-paper in such a way as to be water-tight, and strengthened if necessary by stays or straps of metal. The sides, ends, and bottom being composed of this soft, dialysing material, exposed a great surface to the action of the water contained in an outer vat, in which the dialyser was placed. A series of ox-bladders, fitted with stop-cocks, or gutta-percha mouth-tubes, and plugs, and hung on rods stretching across and into vats of water,

is found to be a very cheap and effective arrangement. Skins of animals may also be employed, either as open bags or closed, and fitted with stop-cocks, or bags of double cloth, with a layer of soft gelatine interspersed between them. Other arrangements will readily suggest themselves, and may be adopted according to circumstances. But supposing the bladder arrangement were taken, which will be found practically the best, being cheap, easily managed, and exposing a great surface to the dialytic action. The bladders are filled with the filtered brine by means of fillers, and hung in rows on poles across, and suspended into vats of water. The water in those vats is renewed once a day, or oftener if required, and at the end of the third or fourth day, according to the size of the bladders employed, almost all the common salt and nitre of the brine has been removed, and the liquid contained in the bladders is pure juice of flesh in a fresh and wholesome condition. The juice as obtained from the "dialysers," might now be employed in making rich soups without any further preparation, or it might be concentrated by evaporation to the state of solid extract of meat. The liquid from the dialysers might be treated in several ways. It might be evaporated in an enamelled vessel to a more or less concentrated state, or to dryness, and in these various conditions packed in tins or jars for sale. It might be concentrated at a temperature of 120°, by means of a vacuum-pan or other suitable contrivance, so as to retain the albumen and other matters in a soluble form. Again, the more or less concentrated liquid might be used along with flour used in the manufacture of meat biscuits. The products are all highly nutritive, portable, and admirably adapted for the use of hospitals, for an army in the field, and for ships' stores. The dialysis of brine might be conducted in salt water, so as to remove the greater portion of its salt, and the process completed in a small quantity of fresh rain or other water. In this way ships at sea might economize their brine, and so restore to the meat in a great measure the nutritive power that it had lost in the process of salting. Thus, then, Mr. Whitelaw obtained an extract of flesh at a cheap rate, from a hitherto waste material. Two gallons of brine yielded one pound of solid extract, containing the coagulated albumen and coloring matter. For the production of the same directly from meat, something like twenty pounds of lean beef would be required. The quantity of brine annually wasted was very great. He believed he was considerably under the truth when he said that in Glasgow alone sixty thousand gallons were thrown away yearly. If they estimated one gallon as equal to seven pounds of meat in soup-producing power, then this was equal to a yearly waste of one hundred and eighty-seven tons of meat without bone. Estimating the meat as worth sixpence per pound, this amounted to a loss

of £10,472. In this way the waste over the country must be very great. In the great American curing establishments the brine wasted must be something enormous, as he found that in eight of the Federal States four million pigs were slaughtered and cured during the season of 1868.

BROWN, Sir WILLIAM, a British merchant, born at Ballymena, County Antrim, Ireland, March 5, 1784, died at Richmond Hill, near Liverpool, March 8, 1864. Early in the present century he migrated with his father, Alexander Brown, to Baltimore, and received his commercial education in the counting-house of what eventually became the firm of Alexander Brown and Sons, linen importers of that city. In 1809 William returned to England and established a branch of the firm in Liverpool. Within a few years additional branches were established in New York and Philadelphia, and the business, assuming by degrees a more general character, was finally confined principally to banking transactions. The reputation of the house for sagacity and probity and its known connections with both sides of the Atlantic, made it a most important medium for business communications between the United States and Great Britain. During the commercial crisis of 1837 the firm held American bills for a very large amount, including nearly £800,000 of protested paper, and had at the same time to meet engagements in England amounting to £1,950,000. Their own resources were, to a considerable extent, locked up in American securities, not immediately available, and during the panic prevailing on both sides of the Atlantic it was impossible to draw bills or to remit specie to England. But as the suspension of the firm, even for a limited time, would have greatly aggravated the commercial embarrassments of the period, the English branch succeeded in effecting a loan from the Bank of England for the whole amount of its engagements in that country, depositing securities for the advance to the amount of £5,000,000. The whole sum borrowed from the Bank was repaid in six months, and thenceforth the house enjoyed an unsurpassed reputation for business integrity both in Europe and America. In 1844 Mr Brown unsuccessfully contested the representation of South Lancashire in Parliament, but in 1846, and again in the general election of 1847, he was returned without opposition, and continued to hold his seat until 1859. He was a constant attendant on the business of the House of Commons, and though not a frequent speaker, was considered a leading authority on questions of finance and commerce. In 1850 he carried on through the columns of the "Pennsylvanian" newspaper a correspondence with Mr. Meredith, United States Secretary of the Treasury, and Abbott Lawrence, in defence of Free Trade. During the latter part of his life he was much interested in the establishment of the Museum and Free Library of Liverpool, a large portion of

the expense of which was defrayed by him. He was also a handsome contributor to the hospitals and other public charities of the city, and in the famine in Ireland, in 1847, and on other occasions, showed much philanthropic zeal. In 1852 he was appointed Deputy-Lieutenant of Lancashire, and during 1868 he served as high sheriff. About a year before his death he was created a baronet. Though so many years had elapsed since his departure from the United States, he never ceased to feel a warm interest in that country, with which his business relations always remained close, and was often its defender against unjust aspersions. The progress of the existing civil war seemed to make no change in his friendly feelings to the American people, and he is known to have liberally aided the efforts inaugurated by the latter in 1862 to send food to the suffering Lancashire operatives.

BULLIONS, Rev. PETER, D. D., an American clergyman, teacher, and author, born at Moss Side, about five miles west of Perth, Scotland, in December, 1791, died at Troy, New York, Feb. 13, 1864. His father, though in but moderate circumstances, kept him constantly at school till he was sixteen years of age, though most of the time he worked upon his father's little farm morning and evening. The next two and a half years were devoted entirely to agricultural labors, and his father was desirous that he should be apprenticed to a mechanical business. He himself, however, was very anxious to obtain a liberal education, and commenced preparing for college at a school near his father's. In the autumn of 1810 he entered the University of Edinburgh, and took a three years' course, supporting himself partly by his previous earnings and partly by teaching. In September, 1813, immediately after leaving college, he commenced the study of theology under Professor Paxton of the Associate Church, and continued under his instruction for four years, sustaining himself by teaching during his vacations. The death of his father in 1818 threw upon him the whole charge of the family, and the four years of his theological course were consequently years of intense labor and anxiety. In June, 1817, he was licensed to preach by the Presbytery of Edinburgh, and three weeks later married and embarked for New York. After spending a few months as a temporary supply to churches in Washington County, N. Y., and its vicinity, Mr. Bullions was ordained and settled in March, 1818, as pastor of the Presbyterian Church at Argyle, in that country. After a remarkably successful pastorate of six years, his health, impaired by the excessive physical exertion of attending to his duties in a congregation so widely scattered, declined so much that he was compelled to resign. In November, 1824, he accepted the professorship of languages in the Albany Academy, one of the best and most liberally endowed institutions of its class in the country. He held this professorship for twenty-four years, resigning in 1848. In 1832

he commenced preaching in Troy as a stated supply, and on the organization of the United Presbyterian congregation in that city in 1834, became its pastor, and remained in that connection until 1852, when he resigned and visited Europe. On his return he resided for some time in New York, where, in the summer of 1853, his wife died. In December of that year, having returned to Troy, he was again installed as pastor of the United Presbyterian congregation, and continued in the pastorate till his death. He was an able preacher, adhering firmly to his own views, yet wholly free from bigotry or intolerance; a useful and efficient pastor, greatly beloved by his people. As a teacher he was highly successful, alike from his exact and critical knowledge of the classics, and the thoroughness and strictness with which he trained and instructed his pupils. He prepared at different times during his long career as a teacher, a very complete series of text-books for classical instruction, which ex-

hibited his familiarity with the Greek and Latin authors and his indomitable industry. These works have come into very extensive use, and have received the sanction and approval of many eminent scholars and instructors. The following are the principal works published by him: "Practical Lessons in English Grammar and Composition;" "Principles of English Grammar;" "Introduction to Analytical English Grammar;" "Analytical and Practical English Grammar;" "Progressive Exercises in Analysis and Parsing;" "Principles of Latin Grammar;" "Latin Reader;" "Exercises in Latin Composition, and Key;" "Cæsar's Commentaries, with Notes and References;" "Sallust, with Notes and References;" "Cicero's Oration, with Notes and References;" "Latin-English Dictionary, with Synonyms;" "First Lessons in Greek;" "Principles of Greek Grammar;" "Greek Reader, with Introduction on Greek Idioms, Greek Lexicon, &c.;" "Memoir of Rev. Alexander Bullions, D. D."

C

CALCULATING MACHINE. A machine of this kind is in use at the Dudley Observatory in Albany. It is the only one ever completed; and although based on the same mathematical theory as the one contemplated by Mr. Babbage, it is yet essentially different in its mechanism. It is well known that Mr. Charles E. Babbage was the first to attempt the construction of a difference engine; but in consequence of some misunderstanding between himself and the British Government, under whose patronage the work was carried on, it was never completed. About 1834 or 1836 Mr. Scheutz, a printer at Stockholm, heard of Mr. Babbage's machine, and at once conceived the idea of building one himself. This machine is the product of his labors continued through nearly twenty years, and was purchased for the Observatory in 1856, and put in operation for a short time in 1858.

Suppose it is desired to tabulate the series of square numbers beginning with unity. Let us first see how these numbers can be produced by means of successive differences. We arrange them for convenience in the following table:

Number.	Square.	1st Diff.	2d Diff.	3d Diff.
1	1			
2	4	3		
3	9	5	2	
4	16	7	2	0

Now suppose we have three wheels, place one above the other on a vertical (shaft) axis, on each of which is inscribed zero and the nine

digits, corresponding with a like number of divisions on their surfaces. If the number 1 on the upper wheel, 3 on the second wheel, and 2 on the third wheel, be brought opposite a fixed or zero point; and the nature of these wheels be such that when set in motion by a lever from right to left, the second wheel adds its number to the upper wheel, and by a motion of the lever from left to right, the third wheel adds its number to the second (being in this case constant and always equal to 2); from this arrangement we shall be able to compute a table of square numbers.

We begin by moving the lever from right to left; when 3 (the number on the second wheel) will be added to 1 (the number on the upper wheel), making 4, the square of 2. On moving the lever back, 2 on the third wheel is added to 3 on the second wheel, making 5. Moving our lever back again from right to left, 5 is added to 4 on the upper wheel, making 9, the square of 3. Repeating the process, we next get 7 on the second wheel, which, added to 9 on the upper, makes 16, the square of 4.

Having given the fundamental principles on which the machine is constructed, we will add a few particulars. This machine can be used to 15 places of figures, of which 8 places are printed, at the time of making the computation. Thirty seconds is the time necessary for a complete result.

Before starting the machine for any computation, it is necessary to set the proper wheels, after which it needs no further attention; for so long as the last order of differences is constant, it will continue to produce the required numbers. Thus for producing a table of squares, it is only necessary to give the machine three

numbers, 1, 8, and 2; and from these data we can compute the squares of all numbers up to 80,000,000. In the same manner, by giving the machine the numbers 1, 7, 6, 8, we can produce a table of cubes, the limit being 15 figures. The same principles apply in the computation of logarithms, or any series of numbers whatever.

CALIFORNIA, the oldest of the Pacific States, first settled in 1769, ceded to the United States by Mexico in March, 1848, and admitted into the Union in 1850. Its capital is Sacramento, and its area formerly stated as 188,982 square miles, is now ascertained by surveys to be only 158,687 square miles. Its population in 1860, as stated by the corrected census, was 865,489, and its estimated population in 1864 was 460,000, of whom not far from 40,000 are Chinese, Mexicans, and Indians.

The Governor till December, 1867, is Frederick F. Low, of Yuba, Republican, who receives a salary of \$7,000 in gold. The Governor, Lieutenant-Governor, Secretary of State, Comptroller, Treasurer, Attorney-General, Surveyor-General, and Superintendent of Public Instruction, are all elected for four years.

There was no State or judicial election in California in 1864, but at the election for President, November 8th, 1864, members of Congress were also chosen. The vote for President was: for Abraham Lincoln, 58,698; for George B. McClellan, 42,255. Lincoln's majority 16,443. The members of Congress elected were: 1st District, Donald O. McKuer; 2d, William Higby; 3d, John Bidwell. They were all Union Republicans.

The Legislature, in 1864, constituted three new counties, Alpine, county seat Silver Mountain; Coso, county seat —; and Lassen, county seat Susanville. There are now 49 counties.

In a recent message on the finances of the State, Gov. Low estimates the total debt of the State, on the 1st of January, 1864, at \$5,865,640.71, but does not, for some reason, include, in the aggregate, the debt on the Indian war bonds and the donation to the Pacific Railroad. Adding these, the whole debt is \$6,084,509.25.

The receipts of treasure at San Francisco from the interior, for the first six months of 1864, were \$26,293,427; the export of treasure for the same period, from that port, were \$28,998,711.27, and for the year over \$56,000,000. The number of periodicals and newspapers published in the State, in 1864, was 118, of which 21 were daily papers, 83 weekly or oftener, 7 monthly or semi-monthly, and 2 annual. In December, 1864, the first number of a monthly magazine of high character was issued in New York and San Francisco, called "The Pacific Monthly." Though edited, printed, and published in New York, its editors and publishers are Californians, and the aim of the magazine is to foster literature, art, and science on the Pacific slope.

The agricultural progress of California, especially in the directions of grape culture and wool growing, are treated under the head of AGRICULTURE. The State has developed its mining resources considerably during the year 1864, the tailings or refuse from the washings of the gold having been worked with great advantage by new processes. Late in the year its extensive deposits of asphaltum and petroleum in Santa Barbara, San Luis Obispo, and Buena Vista Counties attracted much attention, and companies with large capital were formed for working them. It is thought that the State will prove as rich in these as in other mineral products. The Pacific Railroad, California division, is under contract to Virginia City, Nevada, and will be completed during the present year.

The assessable property of the State, from the returns of 1862, the latest yet published, was, in real estate and improvements, \$80,785,855.35; personal property, \$72,647,666.01; total, including mining claims, \$160,899,071.81. The returns of 1864 will doubtless show a material increase. The number of acres of improved lands in 1862, was 6,950,852.

CAMPBELL, Rev. JOHN N., D. D., an American Presbyterian clergyman and scholar, born in Philadelphia, March 4, 1798, died in Albany, N. Y., March 27, 1864. He was a pupil for a number of years of James Ross, a celebrated teacher of Philadelphia, and at an early age entered the University of Pennsylvania, but for some reason did not complete his collegiate course. At about the age of 16 or 17 he commenced a course of theological study with Rev. Ezra Stiles, D. D., and after some time went to Virginia, where he continued his theological course, being for some months also connected with Hampden Sydney College as teacher of languages. In May, 1817, when but 19 years of age he was licensed to preach by the Presbytery of Hanover, Va. In 1820 he was chosen chaplain to Congress; and filled the position with ability and acceptance. After the close of the session he returned to Virginia, and for the next two years preached as a stated supply in Petersburg, Va., and Newbern, N. C., and perhaps some other places. In 1823 he became the assistant of Rev. Dr. Balch of Georgetown, D. C., and about the beginning of 1825 accepted a call to the pastorate of the New York Avenue Presbyterian Church, in Washington, D. C., where his remarkable eloquence and ability soon gathered a very large congregation. He remained in this pastorate for six years, being at the same time one of the most active managers of the American Colonization Society. In 1831, Chief Justice Spencer, a member of the congregation of the First Presbyterian Church in Albany, being then in Congress, and an attendant on Mr. Campbell's preaching, resolved to secure him as pastor of the Albany Church, then without a minister. The call to Albany was made and accepted in September, 1831, and Mr. Campbell remained

the pastor of that church till his death. He was also for more than twenty years one of the Regents of the University of the State of New York, a position of honor, and one involving much severe labor, but without emolument. Dr. Campbell was a man of remarkably quick perception, tenacious memory, great decision of character, and of courteous and dignified manners. He possessed great executive ability, methodical habits, and admirable taste; and though possessed of extraordinary eloquence and the other graces which adapted him to his profession, it was often remarked that he might have filled with equal ability and success any other station in the State or nation. His last sickness was very brief, lasting but five days. Though a vigorous and able writer, Dr. Campbell had published very little; a few sermons, some of the reports of the Board of Regents, and occasional addresses are, we believe, all his avowed publications.

CANADA. His Excellency, the Right Hon. Charles Stanley, Viscount Monck, Baron Monck of Ballytramon, in the County of Wexford, Captain-General and Governor-in-Chief in and over the Provinces of Canada, Nova Scotia, New Brunswick, and the Island of Prince Edward, and Vice-Admiral of the same, &c., &c.

The Cabinet: President of the Council, George Brown, Receiver-General and Minister of Militia Affairs; Colonel Sir E. P. Taché, Premier; Attorney-General for Upper Canada, John A. Macdonald; Attorney-General for Lower Canada, G. E. Cartier; Minister of Finance, A. T. Galt; Provincial Secretary, William McDougall; Commissioner of Crown Lands, A. Campbell; Minister of Agriculture and Statistics, T. D. McGee; Postmaster-General, W. P. Howland; Commissioner of Public Works, J. O. Chapais; Solicitor-General for Upper Canada, James Cockburn; Solicitor-General for Lower Canada, H. L. Langwin.

In the latter part of May, 1862, the Coalition Administration of Messrs. Cartier and Macdonald (John A.), after governing Canada with little or no intermission for a period of eight years, was defeated upon the third stage in the passage of the Volunteer Militia Bill—an elaborate measure calculated to place the citizen soldiery of the Province on a more efficient footing, and to do much else toward the defence of the country in the event of sudden aggression. Although a majority in the Assembly decided against the enactment of this very necessary piece of legislation, it is not to be supposed that the members who composed it were actuated by a spirit of disloyalty, or that they had a disregard to the wants of the country on defence. The measure was looked upon as an expensive one, and this appeared to be the main objection to it. The formation of a new Ministry was entrusted to Mr. Sandfield Macdonald, a gentleman who had previously held a sort of middle course in politics, with a leaning toward the Reform party. He, with the coöperation of Mr. Sicotte, the leader of

the *Bouge* party from Lower Canada, called to the Council-board prominent members of the Reform party, and with a policy which consisted of what is known in Canada as "*Double majority*," or governing each section of the Province by its own preponderance of representatives in the House; with retrenchment in the civil expenses of the Government; extension of the Northwest Territory, and the construction of the Inter-Colonial Railway (i. e. between Canada and the Lower or maritime Provinces), as to its salient points, endeavored to administer the affairs of the country, although standing in a minority in both Houses of Parliament. The new Government, although composed of many gentlemen of integrity and ability, and allowed the fullest opportunity by the Opposition (led by the Hon. John A. Macdonald, a British-American statesman of great acknowledged ability), to propound and carry out their policy, after a year's tenure failed to satisfy the Assembly of their ability further to hold the seals of office. By an adverse vote* in May, 1863, Parliament declared its want of confidence in the occupants of the Treasury benches. A change in the *personnel* in the Lower Canada portion of the Government (the substitution of M. Dorion for M. Sicotte in the leadership) took place, and with this and other changes, not the least of which was the abandonment of the "Double Majority" principle, an appeal to the people was made. The general election took place in the middle of the summer season, a very inappropriate time, and the Government, as remodelled, gained a large majority in Upper Canada. But if they were successful in one section of the country they lost heavily in the other. The Opposition, strengthened by the accession to its ranks of the expelled portion of the cabinet, carried every thing before them in Lower Canada. Three ministers of the Crown were defeated in their several constituencies—one of whom courting his ill-fate in two places.

The session of Parliament which followed in the fall of the year, was one of the fiercest—in point of antagonism and strife between the two parties—ever held in Canada. The curious anomaly was presented of Government and Opposition standing on a footing of equality in party strength, or nearly so. The former possessed a majority of three, and upon several divisions not even that. All useful legislation was stopped; the whole time of the House was taken up in party disputes. Yet notwithstanding the efforts of a powerful, united, and persistent Opposition, ministers maintained a precarious existence against the repeated attacks of their Parliamentary assailants.

Previous to the general election, Mr. George Brown, the former leader of the Reform party in Upper Canada, who, upon his defeat for Toronto in 1861, had temporarily retired from

* The Resolution was moved by the leader of the Opposition in a powerful and logical speech, which will be long remembered in the Canadian Parliament.

public life, again entered the political arena as a member of the Assembly. Although having great cause of complaint against his party for the ill treatment he had experienced at their hands since the first of these events, he nevertheless, after his return to Parliament, lent the Reform government the full force of his support and that of his influential journal, the Toronto "Globe;" and this, no doubt, contributed in a great measure to their success in the Western Province. Mr. Brown, since his advent into public life, had set himself up as the champion of Upper Canada rights. He had demanded for her increased representation in Parliament according to her excess of population over Lower Canada. The majority in each section is composed of people of different nationalities and of different creeds, and it may well be supposed that such a demand would be viewed by the weaker of the two with great distrust and as a covert design upon its liberties. It is not here asserted that this was the intention or the object of the demand, which, on a fair consideration of the case, may be deemed a sufficiently just one, but such was the light in which it was looked upon by the French Canadians of the Lower Province. A feeling of wide-spread and deep-seated antipathy between both people, which manifested itself on every possible occasion, had arisen out of the discussion of this question, and not a Parliamentary election took place in Canada but the main issue rested upon "Representation by Population." Many a statesman who had adorned the Senate-halls of his country had been driven with ignominy from public life by the people of Upper Canada because his convictions would not allow him to countenance the principle. Such was the result of the influence of the views of Mr. Brown, that at times vague fears were apprehended for the peace of the country. To counteract these, and to preserve inviolate the Constitutional Union of the two Provinces, was the object of the Liberal Conservative party of which Mr. John A. Macdonald was the leader. Suffice it to say of Mr. Macdonald, that if to-day Canada holds an important place on the map of the world, it is more or less the result of his labors during his twenty odd years of parliamentary and ministerial generalship.*

The Government continued, with few changes, to hold office until the session of March, 1864; yet, notwithstanding their every effort, failed to strengthen themselves. Indeed, it would seem that their present policy was such as to have the effect of curtailing the support they had possessed during the previous session. One good measure, and only one, emanated from them that has been of considerable benefit to Canada: the establishment of schools for the professional education of officers of the Volunteer Force. In the mean time the Opposition or "British Constitutional party," as

they were now called, was slowly but steadily gathering strength. In two or three casual election contests which ensued, victory was declared on their side, and in many places they were the recipients of demonstrations and ovations in their honor.

These events would seem to have had their due effect upon the ministry, for shortly after the assembling of Parliament, finding himself and his colleagues unequal longer to hold the reins of power, Mr. S. Macdonald sent in his and their resignations. A crisis arrives. The Opposition, although in a small majority, are deemed too weak to occupy the vacant seats at the Cabinet board. Negotiations are entered into between prominent men on each side, between Sir E. P. Taché and Mr. Cartier on the one part, and Mr. McDougall, a rising statesman who has already attained an eminent position in Canada, and Mr. Ferguson Blair on the other; but both resulted in a want of agreement. The Governor-General at length entrusts the formation of a Cabinet to Sir E. P. Taché and Mr. J. A. Macdonald without the aid of the Liberal party. A Ministry is formed which in the *personnel* numbers men of rare talents and abilities and great Parliamentary knowledge and experience. The policy of the new Government is such as to satisfy the expectations formed by their friends, but not so the ex-ministerial party; and with all the power and strength of which the latter is capable, the members of the Upper Canada section of the Government are assailed at their reflection. One minister alone, however, is defeated. The expectations of the Government to carry through the remainder of the session of Parliament and to develop their policy are doomed to disappointment; for, on a sudden, they are attacked by a motion, not affecting their policy, or, indeed, in any way relating to the Administration to which they belong, but to a particular member who had held office in a previous Government, and the result of the motion is shown in a majority of two against them. The Ministry resign, and again for the second time within a few months a ministerial crisis ensues. Things had come to a "dead-lock" and some arrangement between the two parties had to be come to. This was the germ of the Confederation policy of the Canadian Government. In the dilemma in which political parties were placed Mr. Brown stepped forth to the relief of the Ministry. He was the man whom, of all others, had brought about the present state of affairs, and it was meet that he should be the instrument of conciliation, and the party who should restore harmony to the system of Government. In the preceding session Mr. Brown had put upon the "notice paper" a motion for a committee for the ostensible purpose of taking into consideration the claims of Upper Canada to increased representation, and if possible to devise some scheme that would have the effect of satisfying this claim. The committee had not been appointed

* Many men have wrought for the public weal in Canada, but none so ably and none so effectually as him we speak of.

until the present session, and its report had but just been made to the House. It recommended the adoption of the Federal principle in British North America as a necessary step toward the attainment of the object in view. In the negotiations which ensued between Mr. Brown and the leaders of the Government, he demanded the adoption of this report as the basis of the policy of the Government; and it is but justice to the leaders of the Lower Canada section of the Administration to say, that in acceding to this proposition they manifested a spirit of patriotism for their country worthy of all praise. Mr. Brown entered the Government, taking the place of Mr. Buchanan as President of the Council, and brought with him two prominent and able members of the Liberal party (Messrs. McDougall and Mowat), who had held office in the previous Cabinet.

In the meanwhile, previous to the occurrence of these events, the several Governments of the Maritime Provinces (Nova Scotia, New Brunswick, and Prince Edward Island) had resolved upon a Federal Union among themselves, the first-named of which Provinces had taken the initiative in the matter. A joint conference of delegates from each Government took place at Charlottetown on 1st September for the above purpose. Thither the members of the Canadian Government proceeded upon the invitation of their Colonial brethren, and there they unfolded the object of their mission. After the various addresses had been made by prominent members as to the desirability of Union between the whole of British North America and the mutual advantages likely to result from such connection, the conference closed, and the second one was appointed to take place at Quebec on 15th October. Previous, however, to returning home, the Canadian ministers were the recipients of various demonstrations, proving unmistakably that the best wishes of the people of the Lower Provinces were with them in their endeavors to build up a great Northern Anglo-Saxon nationality. The conference at Quebec was composed of the following members:

Canada.—Hon. Messrs. Sir E. P. Taché, John A. Macdonald, Brown, Cartier, Galt, McGee, McDougall, Campbell, Mowat, Cockburn, Chapais, and Langwin.

Nova Scotia.—Hon. Messrs. Tupper, Henry, McCully, Dickey, and Archibald.

New Brunswick.—Hon. Messrs. Tilley, Steeves, Johnson, Mitchell, Chandler, Gray, and Fisher.

Prince Edward Island.—Hon. Messrs. Gray, Palmer, Pope, Macdonald, Coles, Haviland, and Whelan.

Newfoundland.—Messrs. Carter and Shea appeared for the purpose of watching the proceedings on behalf of this Colony.

The Executive Secretary was Major Hewitt Bernard, the Chief Clerk of the Crown Law Department of Canada.

As the result of perhaps one of the most memorable meetings of the kind held on this continent* we give a copy of the resolutions adopted at the Conference. (See PUBLIC DOCUMENTS.)

After the rising of the Conference the Dele-

gates paid a rapid visit to the various cities and towns in the Province, and were everywhere received by the people with the utmost enthusiasm. The manner in which the resolutions were received by the Home Government is shown in the following letter:

DOWNSIDE STATION, 3d December, 1864.

MR. LORD.—Her Majesty's Government have received with the most cordial satisfaction your Lordship's despatch of the 7th ultimo, transmitting for their consideration the Resolutions adopted by the Representatives of the several Provinces of British North America, who are assembled at Quebec.

With the sanction of the Crown, and upon the invitation of the Governor-General, men of every Province, chosen by the respective Lieutenant-Governors, without distinction of party, assembled to consider questions of the utmost interest to every subject of the Queen, of whatever race or faith, resident in those Provinces: and have arrived at a conclusion destined to exercise a most important influence upon the future welfare of the whole community.

Animated by the warmest sentiments of loyalty and devotion to their Sovereign; earnestly desirous to secure for their posterity, throughout all future time, the advantages which they enjoy as subjects of the British Crown, steadfastly attached to the Institutions under which they live,—they have conducted their deliberations with patient sagacity, and have arrived at unanimous conclusions on questions involving many difficulties, and calculated, under less favorable auspices, to have given rise to many differences of opinion.

Such an event is in the highest degree honorable to those who have taken part in these deliberations.

It must inspire confidence in the men by whose judgment and temper this result has been attained, and will ever remain on record as evidence of the salutary influence exercised by the Institutions under which these qualities have been so signally developed.

Her Majesty's Government have given to your despatch and to the Resolutions of the Conference, their most deliberate consideration. They have regarded them as a whole, and as having been designed by those who framed them, to establish as complete and perfect a Union of the whole, into one Government, as the circumstances of the case and a due consideration of existing interests would admit. They accept them, therefore, as being, in the deliberate judgment of those best qualified to decide upon the subject, the best framework of a measure to be passed by the Imperial Parliament for attaining that most desirable result.

The point of principal importance to the practical well-working of the scheme, is the accurate determination of the limits between the authority of the Central and that of the Local Legislatures, in their relation to each other. It has not been possible to exclude from the Resolutions some provisions which appear to be less consistent than might, perhaps, have been desired with the simplicity and unity of the system. But, upon the whole, it appears to her Majesty's Government that precautions have been taken which are obviously intended to secure to the Central Government the means of effective action throughout the several Provinces, and to guard against those evils which must inevitably arise, if any doubt were permitted to exist as to the respective limits of Central and Local authority. They are glad to observe that, although large powers of legislation are intended to be vested in local bodies, yet the principle of central control has been steadily kept in view. The importance of this principle cannot be overrated. Its maintenance is essential to the practical efficiency of the system and to its harmonious operation, both in the General Government and in the Governments of the several Provinces. A very important part of this subject is the expense

* The Conference sat sixteen days.

which may attend the working of the Central and the Local Government. Her Majesty's Government cannot but express the earnest hope that the arrangements which may be adopted in this respect, may not be of such a nature as to increase—at least in any considerable degree—the whole expenditure, or to make any material addition to the taxation, and thereby retard the internal industry, or tend to impose new burdens on the commerce of the country.

Her Majesty's Government are anxious to lose no time in conveying to you their general approval of the proceedings of the Conference. There are, however, two provisions of great importance which seem to require revision. The first of these is the provision contained in the 44th Resolution, with respect to the exercise of the Prerogative of Pardon. It appears to her Majesty's Government that this duty belongs to the Representative of the Sovereign, and could not with propriety be devolved upon the Lieutenant-Governors, who will, under the present scheme, be appointed, not directly by the Crown, but by the Central Government of the United Provinces.

The second point which her Majesty's Government desire should be reconsidered is the Constitution of the Legislative Council. They appreciate the considerations which have influenced the Conference in determining the mode in which this body, so important to the Constitution of the Legislature, should be composed. But it appears to them to require farther consideration whether, if the members be appointed for life, and their number be fixed, there will be any sufficient means of restoring harmony between the Legislative Council and the popular Assembly, if it shall ever unfortunately happen that a decided difference of opinion shall arise between them.

These two points, relating to the Prerogative of the Crown and to the Constitution of the Upper Chamber, have appeared to require distinct and separate notice. Questions of minor consequence and matters of detailed arrangement may properly be reserved for a future time, when the provisions of the bill intended to be submitted to the Imperial Parliament shall come under consideration. Her Majesty's Government anticipate no serious difficulty in this part of the case, since the Resolutions will generally be found sufficiently explicit to guide those who will be entrusted with the preparation of the Bill. It appears to them, therefore, that you should now take immediate measures, in concert with the Lieutenant-Governors of the several Provinces, for submitting to their respective Legislatures this project of the Conference; and if, as I hope, you are able to report that those Legislatures sanction and adopt the scheme, Her Majesty's Government will render you all the assistance in their power for carrying it into effect. It will probably be found to be the most convenient course that, in concert with the Lieutenant-Governors, you should select a deputation of the persons best qualified to proceed to this country, that they may be present during the preparation of the Bill, and give to her Majesty's Government the benefit of their counsel upon any questions which may arise during the passage of the measure through the two Houses of Parliament.

(Signed) EDWARD CARDWELL.
Governor Viscount Moxley.

During the latter part of the year Canada became involved, to a certain extent, in the difficulties existing in the United States. Their adjacent position to United States territory, and the neutral policy which they have preserved, in accordance with the spirit of the Queen's proclamation to that effect, have rendered the British American Provinces, since the commencement of the war, a secure retreat and asylum for all manner of political and military refugees from the South. That many of these persons, acting under the authority of the Confederate Government, should have violated the hospitality which they thus enjoyed, by concocting plots and raids upon the adjoining republic, and otherwise endeavoring to embroil the Government of Great Britain, speaks little to the credit of the Confederates, and has filled the minds of the Canadian people and the Government with indignation.

It was feared as the result of one of these raids—that upon the town of St. Albans and vicinity, in the State of Vermont, in the month of October, by Lieut. Bennett H. Young and his associates (an account of which is elsewhere given), that complications would arise between the Governments of the United States and Canada, which would ultimately lead to any but a pacific settlement.

The raiders, after the commission of the offence before mentioned, being pursued by the authorities of the United States, fled across the Canadian frontier, claiming British protection, on the ground of the neutrality of Great Britain. Being arrested and brought before the judge of the Court of Quarter Sessions (an inferior judicial official maintained in the cities of Canada) at Montreal, they, after the lapse of some time, were released from custody by the judge (Mr. Coursol) on the ground of "no jurisdiction"—a wrong interpretation of the statute for the trial of offences of this nature. This decision aroused a spirit of much dissatisfaction on the part of the authorities of both countries; the celebrated proclamation of Gen. Dix followed, which, but for the prompt and commendable action of the President in revoking it, would, if carried out, have had the almost certain effect of provoking the Government of Great Britain into war with the United States. The Canadian people were ready to defend their own soil from aggression, and the mother country was both able and willing to supplement them in their patriotic endeavors. It is but justice to the Canadian Government to say that, viewing Mr. Coursol's decision as bad in law, as unjust in principle, they at once, after its rendering, took measures to counteract the bad effects it would be likely to give rise to, and also to preserve the public peace, both from the incursions of the Federal authorities and the depredations of any future raiders.

A proclamation was issued offering rewards for the rearrest of Young and the other raiders, under which he and most of his accomplices were apprehended. A large and efficient body of police were appointed for service on the frontier, under the command of experienced leaders. About two thousand of the volunteer militia force of the Province were also called out to aid the civil power in the same locality, should this extreme course have to be resorted to. Stipendiary magistrates (empowered to act over a large extent of country, entrusted with large powers, and receiving salaries from Government) were placed on the commission of the peace. Both volunteers and militia, as well as the last-named functionaries, were still serving at their several posts on the 1st January, 1865; the term of service of the volunteers extends to the 1st May, 1866, when, very probably, they will be replaced by a new brigade. Parliament was convened for an early period (19th January), in order that other and, if possible, more stringent measures might be devised for the preservation of the public peace.

All the acts of the Canadian authorities bethroken a lively desire on their part to maintain amicable relations with the United States. The expense of these measures will be considerable, and has been estimated at \$100,000 per month. Meanwhile Young and his associates, at the close of the year, were confined in the Montreal jail, awaiting their trial before the Superior Court of Lower Canada.

CARLISLE, GEORGE WILLIAM FREDERICK HOWARD, seventh Earl of, born in London April 18, 1802, died at Castle Howard, Dec. 5, 1864. He was educated at Eton and Christ Church College, Oxford, where he attained a high reputation as a scholar, being especially distinguished for his skill in versification. In 1821 he obtained two of the University prizes for his poems, the Chancellor's prize for Latin, and the Newdegate for English verse. He took his degree in 1823 and was first class in classics. At this time and until his elevation to the peerage he bore the courtesy title of Lord Morpeth. In 1826 he accompanied his uncle, the late Duke of Devonshire, to Russia to attend the Coronation of the Emperor Nicholas, and was a great favorite in St. Petersburg from his rank and his engaging manners. Soon after his return he was elected to the House of Commons for the family-seat of Morpeth, and one of his earliest speeches (in 1830) was a defence of the character of the Russian Emperor, who was charged with great cruelties in suppressing the Polish insurrection. This occasioned, at first, some displeasure on the part of the Liberals, with whom Lord Morpeth had ranged himself on entering the House; but his evidently strong sympathies for Reformatory measures and for every measure which would elevate the working classes soon won their confidence. After the passage of the Reform Bill, in 1832, Lord Morpeth represented the West Riding of Yorkshire from 1838 to 1844, when he was defeated by the Conservatives. From 1835 to 1841, under the Melbourne Administration, he was Secretary of State for Ireland. In 1844 he visited the United States, and made an extended tour, carefully investigating its institutions and the social and intellectual condition of its people, and after his return prepared a lecture on the United States, which he delivered before the Mechanics' Institute at Leeds and to other bodies of workingmen, which was afterward published, and did much to diffuse correct views in regard to the United States among the community. In 1847 he was appointed Lord-Lieutenant of the East-Riding of Yorkshire, and from 1846 to 1848 he sat in the House of Commons for the West Riding of Yorkshire. In October, 1848, the death of his father caused his elevation to the peerage as Earl of Carlisle, and under the Russell administration he took his seat in the Cabinet as Chancellor of the Duchy of Lancaster, which office he held from 1849 to 1851. In 1853 he was elected Lord Rector of the University of Aberdeen. From 1851 to 1855 he did not hold office, and visited the East. After his return, he published a graceful and pleasant volume of his travels, entitled "A Diary in Turkish and Greek Waters." On the accession of Lord Palmerston to the Premiership, in 1855, he was nominated Lord-Lieutenant of Ireland and held the position till the incoming of the Derby Ministry in 1858, when he was superseded, but after the return of

Lord Palmerston to power, he resumed the Viceroyalty, which he retained till August, 1864, when he resigned, in consequence of ill health. His administration in Ireland was very popular, and he won the good-will of all classes by his amiable manners and his deep interest in all that concerned the working-classes. In 1858 he published a work on the prophecies, entitled "The Second Vision of Daniel." Lord Carlisle had taken a great interest in the reformation of juvenile delinquents, and had not only encouraged and regulated the establishment of reformatories throughout the United Kingdom, but had established a model institution of the kind on his estate at Castle Howard. He had also commenced the erection of a church at Welburn, near his estate, but died before its completion.

Throughout the struggle in which we have been engaged for the past four years, the Earl of Carlisle has ever been the fast friend of the United States, and had, in public and in private, avowed his firm belief in our final success, and his earnest sympathy with our cause. These avowals had drawn forth the hostility and displeasure of many of the English nobility, but his manner and bearing, as well as his intimate knowledge of American affairs, were well-fitted to disarm prejudice and add weight to the cause he advocated. The Earl was unmarried, and is succeeded by his brother the Hon. and Rev. William George Howard, Rector of Landesborough in Yorkshire.

CHASE, IRAH, D. D., an American Baptist clergyman and theologian, born in Stratton, Vermont, Oct. 5, 1798, died at Newtonville, Mass., Nov. 1, 1864. He graduated at Middlebury College in 1814, and immediately entered the Theological Seminary at Andover, Mass. In 1817 he was ordained as a Baptist minister, and after a year of missionary labor in Western Virginia became, in 1818, a professor in the theological school at Philadelphia of which Rev. Dr. Staughton was the presiding officer, and which was soon after transferred to Washington. He continued in this professorship for seven years, one of which he spent in Europe. In 1825 he removed to Massachusetts, and took a prominent part in the establishment of the Newton Theological Institution at Newton Centre, Mass. In this Institution he was a Professor for twenty years, but resigned in 1845, to devote himself to theological and literary investigations. In 1830 he visited Europe a second time, and was instrumental in founding the Baptist Mission in France. Since that period he has published "The Life of John Bunyan;" "The Design of Baptism, viewed in its relation to the Christian Life;" "The work claiming to be the Constitution of the Holy Apostles, including the Canons, revised from the Greek;" "Infant Baptism an Invention of Man;" together with a large number of Sermons and Essays, and numerous contributions to theological reviews on questions of Church history and doctrine.

CHILI, a Republic in South America. The President of the Republic is José Joaquín Pérez, who was elected, by a unanimous vote, on September 7, 1861. The President is assisted in his executive functions by a Council of State and a Ministry, divided into four departments, namely: the Ministry of the Interior and of Foreign Affairs, the Ministry of Finance, the Ministry of Justice, of Public Instruction, and of Ecclesiastical Affairs, and the Ministry of War and Marine. The ministers appointed for these four departments on June 20th, 1862, were Manuel Antonio Tocornal, Victorino Lastarria, Miguel Guemes, and Marcos Maturano. The excitement produced in Chili in consequence of the seizure of the Chincha Islands by Spain, led to the resignation of two of the ministers, those of the Interior and of Finance, who were succeeded by Alvaro Covarrubias for the Interior, and Alexander Reyes for the Finances. The Council of State is composed of the ministers, two members of the Courts of Justice, one ecclesiastical dignitary, one general, and several other high functionaries.

According to a report of the Minister of the Interior, the population of the Republic amounted, on December 31st, 1863, to 1,700,055 inhabitants; 849,384 men, and 850,771 women.

The receipts of the Government in 1861 amounted to 5,850,821 piastres, and in 1862 to 6,287,155 piastres. In the budget of 1863 the receipts were estimated at 6,244,887 piastres, the expenditures at 7,585,988 piastres, and the deficit at 1,341,096 piastres.

The Home Debt in December, 1862, amounted to 8,185,635 piastres, and the Foreign Debt to 1,485,800 piastres.

The army, on April 20, 1863, consisted of 2,871 troops of the line, and 28,077 national guards. The fleet, according to a report furnished by the Minister of War to Congress, was, in August, 1863, composed as follows: 1 screw corvette, of 200 horse power, with 20 guns; 1 screw allop, of 200 horse power, with 6 guns; and two paddle steamers, of 100 horse power, with 3 guns; total, 4 steamers, with 27 guns.

The movement of commerce in 1862 was as follows: Imports, 17,226,655 piastres, against 16,676,814 in 1861; exports, 21,994,482, against 20,849,684 in 1861. In 1863, the imports amounted to 20,487,517 piastres, an increase over those of 1862 of 3,260,862 piastres.

The number and tonnage of vessels which entered and cleared at the ports of the Republic in 1861 and 1862 were as follows:

	ENTERED.		CLEARED.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
1861.....	2,450	834,909	2,428	874,887
1862.....	2,890	985,528	2,739	971,565

The mercantile marine of Chili consisted, at the end of 1862, of 259 vessels, of 57,111 tons burthen, with 2,866 sailors.

The Government and people of Chili took a very active interest in the difficulty between Peru and Spain. (*See PERU.*) The current of public opinion was strongly in favor of aiding Peru in case of a war. The Congress of Chili passed a resolution, by which the Spanish war vessels were forbidden to coal in the ports of Chili. Another resolution was adopted objecting to the recognition of a Mexican monarchy.

This Congress terminated its sittings on Dec. 27th. They approved the public expenditures for the year 1865, and also sanctioned an increase of two millions of dollars on the estimates for public purposes, most of which will be expended on the augmentation of the navy. For this purpose two vessels are under construction in England.

The Government of Chili has for some time devoted its attention to the best means to be adopted for the colonization of the vast tracts of rich country at their disposal, and a decree appointing a commission to report on the subject has been passed. The commissioners met on the 25th of December, and approved of the following measures:

1. The foundation of an emigration office, with branches in Europe.
2. The acquisition by the Government of lands in the central provinces, to instal the emigrants provisionally.
3. A system of contracts between owners of estates and the emigrants by medium of the Central Emigration Office.
4. The assignment of an annual sum by the Government to encourage emigration.

Already a considerable progress has been made by Chili in this object. Admiral Fitzroy, in a speech made before the English Royal Geographical Society on May 9, 1864, pointed to the fact that the new German colony of Port Montt, in a region which, when he surveyed the coast, was peopled only by small bodies of savages, had in ten years become a town of 15,000 inhabitants. A little further to the north there was a place where twenty or thirty ships at a time were loading coal; while at the period of his visit only but a few fragments of coal were seen lying about, which no one thought worth picking up. The range of the Andes is rich in minerals, and the whole of the country to the west is well timbered. Indeed, the country is already becoming the abode of civilized men; for a number of new settlements have lately sprung into existence along the eastern coast and in the Straits of Magellan, as well as on the western side. The forests of the Chilean side include extensive clusters of apple trees of good edible varieties, and the country also possesses three different kinds of potatoes, better than any he had ever eaten at home. Admiral Fitzroy was only surprised, considering the deterioration of the potato plant in England, that some adventurous Englishman had not been out to this region to procure a stock of fresh plants.

An interesting report was made on March 7, 1864, by the Engineer Durois, upon the new Pass through the Andes, and its practicability, with a view to the construction of a railway. According to this report a railroad could be built within four years, and for a sum not exceeding eight millions of dollars, from the valley of Curico to the summit of the Cordillera, which for security and durability would not be surpassed by any mountain road, and it is believed not more obstructed by the snows of winter than the railways of northern New York and Lower Canada. East of the summit there are no serious difficulties to be encountered. "This grand railway completed," says the report of Durois, "the vast and magnificent Argentine Republic would give to her sister of the Pacific a fraternal embrace on the summit of the mountains, which, until the present, have caused their separation, and the entire world would feel the influence of a railway between the Atlantic and the Pacific, as it would not only facilitate and shorten the communication of the Indies and the Pacific with Europe, but afford invaluable advantages to commerce.

CHINA, an empire in Eastern Asia. Emperor Ki-Tsang (before his accession to the throne, Tsai-Sung), born in 1855, succeeded his father, Hung-fund, in August 22, 1861. Prime Minister, Yih-soo, Prince of Kung. Population, in 1849, estimated at 415,000,000. Area, estimated by McCulloch, at 78,815 geographical square miles; by Malte Brun, at 69,840; by Barrow, at 60,072.

The State Council consists of six members. Subordinate to the State Council are eight colleges, each of which is presided over by a chief director. These colleges are: 1, for external affairs; 2, for nominating and watching the civil officers of the empire; 3, for finances; 4, for worship; 5, for war; 6, for justice; 7, for public labors; 8, for receiving the ambassadors from the tributary countries.

The college of public censors is independent of the State Council. It consists of from forty to fifty members, and it alone has the right to lay remonstrances and complaints before the Emperor. A member of this college always attends the meetings of the eight ministerial departments, without, however, taking part in the discussions. Others are travelling through the empire, and exercising a control over the administration and the higher officers.

The commerce of the ports of Canton and Shanghai, during the years 1860-'62, was as follows:

	CANTON.		SHANGHAI.	
	Imports.	Exports.	Imports.	Exports.
1860.....	4,356,743	8,893,988	13,324,493	10,779,819
1861.....	2,919,996	8,557,590	14,008,063	9,958,957
1862.....			22,368,956	14,667,406

Sir Macdonald Stevenson, to whom is justly accorded the first place amongst the enterpris-

ing men who have achieved the establishment of railways in British India, paid, in 1864, a visit to China, to ascertain what could be done with the Chinese Government with regard to constructing a railway system in China. The plan proposed by Stevenson is to make the main lines first, leaving the branch lines for a time. Assuming Hankow to be a great commercial centre, one trunk line, in his opinion, should run east to Shanghai, 650 miles, one from Shanghai to Peking, 850 miles, one from Hankow to Canton, 850 miles, and one from Hankow to British India, 1,600 miles. Stevenson does not advocate all this being undertaken in the first instance, but lays down a comprehensive plan as the principle on which railroads in China should be constructed. He recommends short lines being commenced with all speed between Tientsin and Peking, and between Shanghai and Soochow, and presumes that these would not only cost little, but would exhibit to the people and the Government the great advantages to be derived from railroads. Stevenson instances the capacity of the Chinese to appreciate cheap and swift travel, by reference to the steamers which ply between Hongkong and Canton. When the fare was one dollar the average daily number of passengers was about two hundred; on the fare being reduced to twenty-five cents, the number rose at least fourfold. The difficulties in the way are classified by Stevenson under three heads: 1st. The coöperation and concurrence of the Chinese Government. 2d. The financial arrangements; and 3d. The engineering difficulties. He meets these by the following considerations: The 1st is a subject for diplomacy—every point being taken to explain to the Imperial Government the advantages of railways, and the means of constructing them. The 2d he also deems a diplomatic affair, depending on the success of the first. That is to say, should a good understanding be come to with the Imperial Government, an arrangement of such a nature could be made as would satisfy capitalists. The 3d he considers to be partially ascertained from the surveys of the Catholic missionaries of the eighteenth century, which he has closely studied. He advocates, of course, proper surveys being made to confirm or condemn those of the padres.

Should the three points above named be satisfactorily solved, there is no doubt that before long there will be the beginning of a great railway system in China.

The cotton trade in the Chinese empire is progressing most favorably. At Canton and Shanghai, up to June, 1864, 52,000 bales of cotton were actually shipped for London and Liverpool, against 12,000 in the corresponding period the year before. Large as this quantity is as compared with former years, the operations of the market are said to have been sadly crippled by the state of the money market, and the scarcity of sycee silver, in which the native dealers are alone willing to make settlements.

The following table shows the number of Protestant missionaries in China in 1864:

NAMES OF TOWNS.	Missionaries.	Missions.	Converts Estimated.
Canton	19	6	150
Swatow	6	2	100
Amoy	12	3	700
Fuchau	11	3	150
Ningpo	18	4	500
Shanghai	12	5	850
Hankow	2	2	30
Tientsin	7	3	30
Chefoo	3	2	40
Tangchow	6	2	10
Pekin	10	6	440
Hongkong	10	4	2,500
	111	42	

The year 1864 opened with new and serious disasters for the Taeping rebellion. Major Gordon, early in the year, proceeded to the westward, forty miles from Soochow, to a city named E-shing, on the opposite side of the Tae-hoo Lake. The stockades about this place he took on February 29th. On the 2d of March the garrison evacuated the place without firing a shot. In the attacks on the stockades, Gordon had two or three killed, and four wounded. He next proceeded northwestward for twenty-five miles to a city named Li-ying, which was captured on March 9th, without the loss of a single life. The rebels who here laid down their arms were about 20,000, some 4,000 of whom, who resided not far distant, returned at once to their homes. The commander of this place, Taze Wang, who was equal in rank to Ohang Wang, had been abandoned by his own men. Having taken a portion of his troops out of the stockades to oppose the approaching enemy, he found, on his return, the gates shut against him. Li-ying is an important place in a military point of view, as it cut the rebel district into two portions, and established a communication with the Imperialists in the west. From Li-ying Major Gordon marched upon Kintang, a district town thirty miles north of Li-ying, and the same distance to the west of Chan-chow-foo. An attack upon this town, on March 21st, was, however, repulsed with severe loss to the assailants, and Major Gordon himself severely wounded; and having learned that the Imperialists were falling back from Chan-chow-foo, and that his communications were threatened, he returned to Li-ying. The important city of Kiashing fell into the hands of the Imperialists on March 20th, after a long siege, during which the Imperialist Gen. Ching, one of the ablest officers of the Chinese army, was mortally wounded. On March 31st the city of Hangchow was captured by the Franco-Chinese and the Imperialist troops, and thus nearly the entire Chekeang province cleared of rebels.

The Taepings, in the meanwhile, had reënforced their army by some ten to fifteen thousand Kwang-tung and Kwangsimen, who seem to have surpassed the rest of the rebel army in ferocity. They travelled without any commis-

sariat, devastating villages, and committing frightful atrocities. They showed neither mercy nor consideration toward foreigners, and killed them just as they did others who fell in their power. It was these men who repulsed the Imperial troops at Chang-chow, and who afterwards attacked Kiang-yin, Chang-zu, and other places. On Kiang-yin their attack failed, but at other places they succeeded. Gordon, after his repulse at Kintang, determined on attacking this body of rebels. He came up to a party of them on the 26th March, about ten miles from Kiang-yin, and although he had but 500 men with him, he easily scattered them, on account of their being badly armed. He then made up his mind to attack their main body, which lay near Chang-zu. On the 30th March he despatched Rhode and Howard, with 1,000 men, to attack and drive in the extreme line of the enemy. These officers, however, were completely surrounded, and in cutting their way out lost seven officers and about 150 men.

In April, Major Gordon, having recovered from his wound, again took the field, and on the 11th April attacked and defeated the Taepings at a place called Waisoo. Previous to the action the Taepings mustered over 15,000, while the Imperialists were not more than 10,000. Maj. Gordon next made a move upon the city of Chang-chow-foo, which, after a siege of several weeks, was captured by him in May. Soon after the Imperialist army suffered a very severe loss by the withdrawal of Gordon. From the official correspondence between Sir F. Bruce, the English Minister in Peking, Gordon, and the English Government, it appears, that before the occupation of the city of Soo-chow (December, 1863), a promise had been given upon the recommendation of Gordon, to the chiefs of the Taepings, or, as they are called, the "Wangs," that their lives should be spared. Notwithstanding this promise the principal Chinese officer, named the Footae, ordered the eight chief Wangs to be brought before him and to be beheaded. As soon as Gordon heard of the particulars he at once decided to retire from the Chinese service unless the Footae, whose name was Li, was removed from the command by the Chinese Government and a public statement made by that Government that he (Gordon) was entirely innocent of all connection with the affair. So far as Gordon's innocence was concerned, the Chinese Government, the Footae himself, and all the parties concerned, made no scruple of bearing witness to it; but they were not so compliant as related to the removal of the Footae. He was a man of great influence in the army, and the state and the Government being either unable or unwilling to remove him, set to work to apologize for his conduct toward the Taeping chiefs; indeed, his conduct in putting them to death was too much in accordance with Chinese customs to be condemned by them with any thing like sincerity. The result was that

the Footae was not removed, and that after considerable correspondence a letter was written by Earl de Grey and Ripon, dated War-office, April 26, 1864, in which Maj.-Gen. Brown, the commander of the British troops at Shanghai, was desired to inform Gordon that the English Government directed him to quit the Chinese service. Lord de Grey and Ripon, however, added: "But if you should deem it advisable to employ him in defending Shanghai and the 30-mile circle around it you are at liberty to do so, pending a reference to me, provided an arrangement can be made by which he would receive his orders direct from yourself, and would not be in the employment of the Chinese Government."

Although withdrawing from active service, Gordon continued, however, to aid the Chinese with his advice, and commenced at Shanghai, under Gen. Brown's direction, the formation of a camp of instruction, as well for the protection of the 30-mile boundary as for the operations beyond it. This camp of instruction was near Junkiang, and was to comprise Chinese already drilled in artillery practice, as well as fresh relays of men to whom such training was new. The plan was that fresh regiments should always replace those that had received a certain amount of instruction. Col. Gordon also went to Nanking and inspected its defences personally. The following decree was issued by the Emperor, bestowing high praises upon Gordon, and conferring upon him the rank of Ti-t'u (General), and the yellow jacket (a distinction about equal to the English grand cross of the Bath):

Formerly, on account of Gordon's having acted as leader of our Imperial forces against the enemy, and having assisted to take Chang-chow, we issued an edict, expressing our will that he should be elevated to the honorary rank of Ti-t'u, and should be presented from ourself with a banner and a medal to mark our appreciation of his services. Li-Hung-Chang now reports that the "ever-victorious army" which Gordon used to lead has been disbanded in the most satisfactory manner, and he begs us to heap further distinction on Gordon's head. Such is the substance of his despatch. Since the spring of last year Gordon has headed the "ever-victorious army," and aided the ordinary Imperial forces in the subjugation of Fushan, the relief of Chang-shu-hsien, the capture of Tait-sang-chou, Quin-san-hsien, Wu-kong-hsien, and, at last (toward the close of the year), the provincial city of Soochow. Then, again, he this year captured Yib-shing-hsien, and Li-yang-hsien, while he compelled the retreat of the rebels at Yang-shai. He finally captured Chang-chow-fu, thus continually heaping meritorious acts one upon another. Moreover, he has, in the most satisfactory and peaceful manner, completed the disbandment of the disciplined army. There was no uncertainty about Gordon's services; he was ever inspired with that bravery and strategic talent which enabled him to prove so formidable. He was also intimately acquainted with the relations existing between China and other Powers. It is, therefore, most necessary for us to mark our approval. Gordon is, therefore, presented with the yellow jacket and a short peacock's feather. He is also presented with the official robes and paraphernalia belonging to the rank of Ti-t'u. Thus will our favor be manifested to him.

Respect this.

On July 19, the city of Nanking, so long the centre of disaffection in China, and the point from which so many gangs of insurgents started on their raids upon the peaceful and wealthy cities of Central China, was captured by the Imperialist army under the command of Tseng-kwo-shuen, the Governor of Chekiang, and brother of the viceroy of the provinces of Kiang-Nan and Kiang-Su. The city was stormed through a breach, caused by a mine sprung under the wall, near the east gate. When the Imperialists made good their entrance into the city, they found that the palace of the Tien-Wang, the leader of the rebellion, and the claimant for many years past of divine honors and attributes, had been burnt to the ground. It was said that the renowned Tien-Wang and his immediate attendants lay buried in its ruins. The Chung-Wang, the most restless and determined of the Taeping generals, was captured. After the assault he managed to leave the city with a few followers, but he was captured three days subsequently by a party of cavalry. The Emperor directed the Chung-Wang to be conveyed to Peking; but this order was subsequently rescinded, and he was ordered to be "cut into a thousand pieces" at Nanking, which sentence was duly carried into execution. From depositions made by the Chung-Wang, at his trial, it appears that missionaries and others were deceived when they believed in a moral inspiration as acting on the Taipings. The Wangs were only ambitious rebels, anxious to overthrow one Government to replace it by another for the sake of their own aggrandizement.

Although the Taipings suffered a severe loss by the capture of their capital, they were not entirely destroyed. They endeavored to collect their forces in the provinces of Nyang-wei and of Kiang-Ti. One of their armies defeated a numerous division of the Imperial army in a pitched battle on the 3d of August. The Peking Government saw consequently that it could not yet disband the army, and requested that the Franco-Chinese corps should continue to serve. At the end of August the Franco-Chinese army occupied the city of Hoochow, the last of the large cities in the hands of the rebels. The latter, much to the surprise of the besiegers, evacuated the place without any conceivable reason, as in the engagements preceding the evacuation of the city, the advantages had been decidedly on their side. Thousands of Taipings still continued to roam about in the country, pursuing their career of robbery and despotism, but they ceased to be a danger to the empire. In November a battle was again fought at Kuang-sing-fu in the province of Kiang-si, between the Imperialist forces and a rebel army led by Hung-Yuancheng, a near relative of the deceased Tien-Wang, and Li-Shui-seng, a relative of the Chung-Wang, whose title was Yu-Wang, or the admired King. The former was killed in action, and the latter was captured. The loss was serious on both sides;

the rebels, however, were totally defeated. In December a body of rebels was in the vicinity of Amoy, but no danger was apprehended from them.

COMMERCE. The commerce of the year with Europe was limited in consequence of the increased duties on imports and the favorable harvests abroad, which diminished the demand for breadstuffs. The official statement of the Treasury Department gives the following results of the trade of the country for the fiscal years 1863 and 1864. The fiscal year ends on June 30th. The specie export for 1863 should be increased \$18,207,879, to embrace a large unusual shipment made from California to England for safety of transit.

Imports		1863.	1864.
Goods	\$252,781,969	\$252,781,969
Specie	9,535,643	13,127,374
Total	\$262,317,612	\$265,909,343
Exports		1863.	1864.

Total	\$384,803,649	\$435,720,961

The import valuations are in specie, being the invoice value. The export values are in legal tender prices. The advance in gold, as compared with legal tender notes and the increase of taxes, has seriously affected the price of articles sold for consumption. The following is a comparative table of the prices of sixteen articles which will serve as an illustration:

	March, 1862.	March, 1863.	March, 1864.	December, 1864.
Cordage, Manila	\$9 00 a 10 00	\$18 00 a 18 50	\$19 00 a 20 00	\$24 00 a 25 00
Indigo	1 25 a 2 50	9 00 a 9 85	1 60 a 2 50	9 00 a 9 85
Coffee, Rio, 100 lbs.	17 25 a 19 50	20 50 a 24 00	24 00 a 27 50	44 00 a 48 00
India rubber	48 a 50	85 a 87	88 a 88	1 14 a 1 20
Gunny cloth, 100 yards	11 00 a 11 50	16 00 a 16 75	15 50 a 15 75	20 50 a 21 00
Hides, Rio, 100 lbs.	21 00 a 21 50	30 00 a 31 00	32 50 a 30 00	21 00 a 22 00
Plaster of Paris	1 50 a 1 75	8 00 a 8 75	8 25 a 8 50	4 50 a 4 80
Leather, oat. mid.	27 00 a 30 00	40 00 a 42 00	45 00 a 47 00	49 00 a 50 00
Mahogany	35 00 a 45 00	45 00 a 55 00	100 00 a 150 00	75 00 a 110 00
Molasses, No. gall.	50 a 55	45 a 47	70 a 80	1 10 a 1 25
Silk, raw	5 00 a 5 50	10 00 a 10 50	9 50 a 9 75	14 00 a 15 00
Cassia, 100 lbs.	21 00 a 22 50	45 00 a 46 00	62 50 a 65 00	100 00 a 105 00
Gin	26 00 a 27 00	55 00 a 56 00	108 00 a 110 00	210 00 a 225 00
Sugar, Cuba, 100 lbs.	6 87 a 8 75	9 25 a 11 50	13 25 a 14 75	16 25 a 22 25
Tin, Banca	30 00 a 32 00	56 00 a 58 00	56 00 a 57 00	70 00 a 72 00
Spalter	5 50 a 5 70	9 00 a 9 87	13 50 a 13 00	15 00 a 15 00
	\$223 25 a 254 25	\$270 55 a 296 56	\$516 13 a 577 07	\$679 11 a 729 22

This average aggregate rise has been as follows:

	Gold premium.	16 articles.	Rise per cent.
March, 1862	1 1/2	241 80	...
" 1863	54	838 55	60
" 1864	59	548 56	120
Dec., 1864	1 25	709 19	194

This table shows that the price of commodities keeps always in advance of that of gold. Thus the premium on gold is 125 per cent., and the advance in the articles has been 150 per cent. on the gold price of those articles. These higher prices include the duties, the cost of gold with which payment is made, the price of exchange, the stamps and other taxes, and all the expenses and profits of the importers. Before the goods reach the consumers they are thus loaded with expenses, charges, taxes, and profits, which therefore necessarily diminish the ability of the consumers to take the usual quantities. The home manufacturers have had less to contend with. They have been charged with three per cent. tax, and other charges, and the rise in raw materials and wages, but they have been sustained by a large and effective demand from the Government for most materials of clothing, munitions, etc., at rates which have left a considerable profit. The manufacturing sections have indeed never been so prosperous as during the past year. It is the case, nevertheless, that the stocks of merchandise generally, as well in first hands as those on the shelves of stores, and in posses-

sion of consumers, are far less than in ordinary years.

The revenue of the port of New York during 1864, shows a gain of about \$3,000,000 over the corresponding figures of the previous year:

	1863.	1864.
January	\$4,127,906 58	\$5,128,200 00
February	3,590,712 47	7,474,000 00
March	4,544,480 12	7,632,770 00
April	3,997,197 57	12,922,000 00
May	3,878,865 42	8,335,100 00
June	3,788,984 06	3,211,140 00
July	4,912,718 49	3,535,900 00
August	6,206,785 58	4,227,000 00
September	7,270,548 05	4,954,000 00
October	6,298,943 46	3,670,100 00
November	5,075,846 24	3,453,100 00
December	5,248,180 08	3,444,000 00
Total	\$58,884,054 42	\$58,987,120 00

In the previous year the imports were considerable, and the entries were large, making the apprehension of higher duties. By the act of Congress in May doubling the duties, the merchandise taken out of bond was very large in value, thus making the revenue from January to May \$35,296,890.09. These duties represented a large amount of goods taken out of bond, and put on the market at lower rates, and which continued to supply it during the year. The revenue of the last eight months was about 90 per cent. of that of the first four months. The duties of the last eight months being at much higher rates, represent a much smaller amount of goods, and the quantity is

bond at the close of the year was small. To maintain the amount of revenue, it is apparently necessary to reduce the rate of taxation, in order that the present prohibitory tendency of the tariff may be modified, and so permit of greater receipts. The effect of the duty on the cost of goods is also greatly increased by the depreciation of the currency. Thus a certain description of woollens pay sixty per cent. tax in gold, and the same article of home manufacture pays five per cent. in paper. It operates as follows:

Premium cost.....	\$1 00
Premium on exchange.....	\$1 37
Gold duty.....	80
Gold duty premium.....	76
Total tax.....	2 93
Cost imported goods.....	\$5 05

The tax on the home-made article of the same description being only five cents per dollar; as soon, therefore, as the duty becomes prohibitory, the Treasury loses sixty cents in gold and gets only five cents in paper. The imports at the port of New York, monthly, for the year, are shown in the following table:

	1860.	1861.	1862.	1863.	1864.
January.....	\$31,754,978	\$34,873,411	\$12,590,899	\$15,789,576	\$18,977,294
February.....	19,804,979	14,841,707	13,372,140	12,097,846	\$1,448,987
March.....	28,280,136	13,804,361	19,719,866	13,890,095	23,647,119
April.....	16,971,253	14,894,898	12,303,893	17,895,815	22,168,081
May.....	16,948,151	14,940,981	14,843,531	14,894,925	23,975,144
June.....	19,193,769	13,648,738	12,844,193	12,097,516	22,995,514
July.....	14,199,449	14,983,061	20,535,308	15,006,677	22,928,399
August.....	22,895,524	5,595,928	14,804,848	15,083,128	15,928,458
September.....	14,903,629	7,805,461	16,147,917	15,699,940	10,528,459
October.....	14,731,543	5,538,741	15,418,906	16,594,987	10,038,308
November.....	14,421,148	5,628,019	10,805,898	15,045,065	8,667,505
December.....	21,304,068	9,614,931	18,973,418	17,126,065	9,985,000
Total.....	\$282,940,400	\$169,812,790	\$174,632,317	\$168,074,579	\$218,125,761

The effect of the fluctuations of the currency in reducing the credit system and forcing cash transactions upon those engaged in business, is very apparent in the returns made of the number of failures and the amount of the liabilities of the parties in the few last years, as follows:

	Number.	Liabilities.
1857.....	4,357	\$365,812,000
1858.....	5,113	12,803,767
1859.....	2,909	\$1,914,000
1860.....	2,735	\$1,750,477
1861.....	5,895	178,093,179
1862.....	1,628	22,049,390
1863.....	495	7,900,000
1864.....	510	3,073,709

The year 1857 was one of panic, and in 1861 the war, by cutting off resources, caused a con-

siderable amount of distress, but the curtailment of credit has since given a very effectual check to that mercantile evil.

The imports at the port of New York for the year 1864 were as follows:

Dry goods.....	\$71,069,709
Other goods.....	144,970,886
Specie.....	2,963,639
Total.....	\$218,125,700

The amount in 1863..... \$197,614,987

Among the general imports of the year, cotton and wool, formerly articles of export, still hold a prominent place.

The following table shows the quantities and invoiced specie values of the principal foreign imports, other than dry goods and specie, at New York, during 1864:

FOREIGN IMPORTS AT THE PORT OF NEW YORK FOR THE YEAR 1864.

Figs.....	34,433	Lithograph stone.....		Grand total.....	\$133,473,734

In the list are the following items, which were articles of export before the war :

Wool, bales.....	115,734	\$9,423,409
Cotton ".....	76,095	11,187,449
Tar, bbls.....	19,896	106,379
Turpentine, spirits.....	4,118	204,894

The items of import were formerly on the export list, and, added to the exports of grain and other products of the soil, assisted to pay the value of imports. This is one of the changes caused by the war. The exports from New York, monthly, during 1864, were as follows :

MONTH.	1860.	1861.	1862.	1863.	1864.
January.....	10,1	\$11,302,787	\$14,000,000	\$19,000,000	\$17,000,749
February.....	10,1	11,307,388	14,000,000	22,400,148	17,811,778
March.....	10,1	11,381,394	11,000,000	22,000,000	16,888,394
April.....	10,1	11,708,079	12,000,000	14,000,940	19,754,000
May.....	11,1	11,792,595	15,000,000	14,000,780	21,632,900
June.....	11,1	12,007,081	20,000,000	14,495,298	25,987,531
July.....	14,1	20,028,000	25,000,000	21,092,787	33,565,806
August.....	15,1	9,990,449	17,000,000	14,454,809	20,677,868
September.....	15,1	10,178,846	19,000,000	15,492,518	21,738,526
October.....	12,1	12,173,409	20,000,000	21,319,549	20,481,739
November.....	12,1	14,577,291	20,000,000	17,392,486	20,473,099
December.....	11,1	15,194,446	18,000,000	19,619,894	27,414,489
Total.....	\$145,098,451	\$142,961,151	\$215,871,843	\$220,465,084	\$262,843,154

These values are in currency, and much greater than were realized abroad. The wheat and corn exports of 1861 compare with 1864 as follows :

	1861.	1864.
Wheat, bushels.....	29,899,914	12,198,423
Wheat flour, bbls.....	2,110,846	1,918,588
Corn, bushels.....	12,456,905	848,961

To these should be added the export of petroleum, of which 84,792,972 gallons were shipped in the year 1864 against 28,250,731 in 1863. The export of petroleum bids fair to be greatly increased during the next year. This following table shows the exports from the port of New York of the articles which make up the bulk of the export trade for the year :

EXPORTS FROM NEW YORK OF CERTAIN LEADING ARTICLES OF DOMESTIC PRODUCE FOR FOUR YEARS.

Notwithstanding the petroleum interest has apparently attracted a very large amount of capital during the past year, still the quantity produced has not much increased. For instance the total amount taken for consumption at New York, and exported from New York, Boston, &c., during 1863 and 1864, was as follows:

	1863.	1864.
Exported from New York.....bbls.	493,090	533,394
Taken for consumption in New York.	814,481	943,187
Total—New York.....	908,171	776,567
Boston—exported.....	51,295	43,807
Philadelphia.....	194,598	194,408
Baltimore.....	28,294	28,294
Portland.....	8,553	1,799
Total.....	1,230,747	1,069,315

Thus there appears no material change. There

are several reasons for this. In the first place it should be remembered that the increase of capital the past year, actually employed in producing petroleum, is not so great as might be supposed. Many companies have been formed, and of large nominal capital, but very few of them have their stock all taken up, and much of the money that has been paid in has been given to those organizing the companies for the land they have purchased, while another large portion of it is paid out in commissions. Besides this, very little of the land upon which the new companies are based has, as yet, been developed. It requires time to accomplish much in that way. The coming year, however, must show the effect of these new investments. Thus far, production has not kept pace with the growing demand, and prices, therefore, have ruled high.

WHOLESALE PRICES OF FOREIGN AND DOMESTIC PRODUCE AT NEW YORK.

The rise in prices, as compared with last year, extends to every article upon the list, except some productions of the Southern States, and is very strongly marked with regard to all articles of food. If compared with the year 1860, there will be found to be a rise of about 150 per cent.

The exports of general merchandise from New York were on a very limited scale as compared with former years. The exports of breadstuffs to Great Britain and the Continent in 1864 since September 1, were as follows:

	Flour.	Wheat.	Corn.
1861.....	1,393,585	14,710,838	4,985,480
1862.....	894,928	12,899,804	3,378,818
1863.....	402,850	4,987,984	289,459
1864.....	54,996	1,923,888	54,988

In this return are the exact figures to indicate the ratio of decline in our foreign trade. The value of these exports for the four months embraced in the figures, according to the Liverpool price in gold, is as follows:

1861.....	\$42,500,000	1862.....	\$8,900,048
1863.....	27,842,000	1864.....	1,850,819

Thus the trade is nearly extinguished. This is due, no doubt, as well to the good harvests of England and Western Europe as to the state of the currency here. The latter cause will, however, continue to act with ever increasing force, because the cost of producing wheat here is enhanced by the higher prices of all the farmer consumes. For instance, it adds to the cost of labor, the cost of transportation, the amount of commissions and interest, and above all, to the taxes, local, State, and federal. These are all no doubt paid in paper, but they enhance the cost upon the exported wheat in proportion to the price of gold. Breadstuffs are not articles of monopoly, like cotton, for which the American article commands the markets of the world, but are those in which the sharpest competition exists; and those of the United States having further to go, at greater cost of transportation, maintain their footing only with difficulty while not subjected to taxation.

During 1864, the number of ships transferred from the American to the British flag was 106; the tonnage 92,652. The number transferred since the beginning of the war is 715; the tonnage 480,882.

The following table shows the quarters of wheat imported into Great Britain for the last nine months of 1864, with the value in pounds sterling. Wheat is now entered in Great Britain by the hundredweight, instead of measure. The quantity bought of the United States, including California, was about 40 per cent. of the whole purchase, at prices rather less than those paid other countries. Thus the cost of Prussian wheat was 10s. 4d. per cwt., while that of the United States was 9s. 4d.:

WHEAT—FROM	Quantity, cwt.	Value.
Russia.....	2,325,408	\$1,214,911
Prussia.....	3,611,145	1,886,038
Denmark.....	308,056	873,328
Mecklenburg.....	466,292	285,685
Hanse Towns.....	465,647	303,451
France.....	451,073	228,499
Turkey and Wallachia.....	877,848	162,683
Egypt.....	866,880	262,334
United States.....	7,100,048	2,242,349
British North America.....	894,806	585,547
Other countries.....	846,308	159,328
Total.....	17,722,288	28,325,558

This reduction in the quantities exported, as a matter of course, reduces the supply of bills, and those who are required to remit for sugar and other merchandise avail themselves of a fall in gold to make those remittances, and the fall is thereby checked. On the other hand, much of the gold paid out by the Government is sold, and the banks also, which are making arrangements to convert their business from State to federal authority, are selling gold. Dealing in gold, both buying and selling, has become a very important occupation in this country. The amount collected by the Federal Government in 1864 through the purchase of importers was \$102,816,152, or very nearly \$2,000,000 per week. One-half of that amount was paid out for interest, and found its way again to the brokers, and the other half was sold by the Treasury in the open market. Thus the Government operation, in collecting, paying, and selling, amounts to \$200,000,000 per annum; at the same time the importers bought in addition \$50,000,000 to remit in payment of goods, and about \$12,000,000 arrived from California. It is evident from these facts that gold dealing is a leading business, and employs a great number of brokers. It was, however, of a troublesome and hazardous nature, since the gold in bags had to be passed from hand to hand, at more or less risk. For this reason it was determined to make a common depository at the Bank of New York of the gold held, and to transfer it from hand to hand by orders. The amount of gold so deposited was in the first week of January about \$1,200,000. There was besides a good deal of gold deposited with other banks by customers for safe keeping, and in some cases did not enter into the returns of the banks. The gold movement was comparatively as follows:

Specie in banks and Sub-Treasury December 1....	\$38,961,208
Received from California in December.....	2,308,619
Imported from foreign ports in December.....	114,976
Gathered in from hoards in December.....	4,976,964

Supply.....	\$86,158,887
Exported in December.....	6,104,877

Leaves in bank and Sub-Treasury, Jan. 1, 1865... \$80,054,450

COMMERCIAL INTERCOURSE. Some modification was made in the conditions of commercial intercourse with places within the limits of the insurrectionary States during the year. On June 26th, by order of the President, all restrictions on trade in Missouri and

Kentucky were annulled and abrogated, and all products and goods were allowed to be freely brought within those States as in time of peace; but no goods were allowed to pass from these States into any State declared to be in insurrection.

Any person residing within an insurrectionary State was allowed freely to bring any goods or products for sale to any place where a supervising special agent of the Treasury was located. It was further ordered that,

Whenever the owner of said goods and products shall not reside within the lines of national military occupation, such goods and products shall be sold by the supervising special agent, or assistant special agent; and all such sales of goods and products shall take place on Monday of each week, at the place of receipt, and shall include all complete lots on hand at the time of the sale; and the supervising special agent, or the assistant special agent, as the case may be, shall pay to said owner or his agent, if the said owner shall have taken oath, and is not excepted from said amnesty, nor prove disloyal or hostile, twenty-five per cent. of the gross proceeds of said sales, and shall pay the remainder of said proceeds after deducting the necessary and proper expenses of sale, and one per cent. as his additional compensation, into the Treasury of the United States, and shall give the owner of each lot sold, or his agent, a receipt or certificate describing the property.

All sales, whether private or public, shall be for notes of the United States or Treasury notes, exclusively, and all proceeds of goods and products paid into the Treasury under the foregoing resolution shall be restored without interest to the owner of the goods and products sold, in case he shall establish, on return of peace and the full practical restoration of the authority of the Union, his title to said goods and products, and that since the sales thereof he has conducted himself in all respects as a good and loyal citizen of the United States, and has done nothing inconsistent with the terms of the oath prescribed by the President's Proclamation of Amnesty.

Nothing in either of the foregoing additional regulations shall authorize the conveyance of supplies beyond the lines of military occupation, or, except under the regulations of September 11, 1863, within said lines.

By a proclamation of the President the port of Brownsville, in Texas, was opened to trade on February 18th, and the ports of Norfolk, Virginia, Fernandina and Pensacola, Florida, on December 1st; and commercial intercourse with them, except for persons and things and information contraband of war, authorized.

On the 10th of May, Gen. Washburn, at Memphis, issued the following order:

HEADQUARTERS DISTRICT OF WEST TENNESSEE, }
MEMPHIS, TENN., May 10, 1864.

General Orders No. 4.

The practical operation of commercial intercourse from this city with the States in rebellion has been to help largely to feed, clothe, arm, and equip our enemies. Memphis has been of more value to the Southern Confederacy since it fell into Federal hands, than Nassau. To take cotton belonging to the rebel government to Nassau, or any other foreign port, is a hazardous proceeding. To take it to Memphis and convert it into supplies and greenbacks and return to the lines of the enemy, or place the proceeds to the credit of the rebel government in Europe, without passing again the rebel lines, is safe and easy. I have undoubted evidence that large amounts of cotton have been, and are being brought here to be sold, belonging to the rebel government.

The past and present system of trade has given strength to the rebel army, while it has demoralized and weakened our own. It has invited the enemy to hover around Memphis as his best base of supply, when otherwise he would have abandoned the country. It renders of practical non-effect the blockade upon the ocean, which has cost and is costing so many millions. It opens our lines to the spies of the enemy, and renders it next to impossible to execute any military plan without its becoming known to him long enough in advance for him to prepare for it.

The facts here stated are known to every intelligent man in Memphis. What is the remedy for these great and overshadowing evils? Experience shows that there can be but one remedy, and that is total prohibition of all commercial intercourse with the States in rebellion.

It is therefore ordered: That on and after the 15th of May, 1864, the lines of the Army at Memphis be closed, and no person will be permitted to leave the city, except by river, without a special pass from these headquarters after that date. All persons desirous of coming into the city will be permitted to do so, but should be notified by the pickets that they will not be allowed to return. All persons who desire to leave the city to go beyond our lines, must do so before the 15th inst.

By order of Maj.-Gen. C. C. WASHBURN,
WM. H. MORGAN, Asst. Adj.-Gen.

A similar order was issued by Col. Farrar, at Natchez, and by Gen. Sherman, at Vicksburg. It was asserted that similar results followed the trade at Helena, Little Rock, Hudson, Baton Rouge, Plaquemine, Donaldsonville, and New Orleans. The amount of trade through the lines at all these points with the isolated localities where trade stores were situated, was estimated at not less than a half million dollars daily. It was further asserted that Memphis was of as much advantage to the enemy as Wilmington. At the mouth of White River, where there was only a wood-yard and a small garrison for its protection, a trade store had a business of nearly one hundred thousand dollars per month. At Milken's Bend, where there was a small force of negroes for the protection of the plantations in the vicinity, and only one white family living within the lines, a trade store had a business of a thousand dollars per day. This occurred at other points on the river wherever any pretence could be found for setting up a store. Numerous small steamers were also allowed to move up and down on trading excursions. It was a matter of notoriety that these boats were on the best of terms with the guerrillas, and other rebel cavalry that they encountered, and oftentimes the rebel officers and soldiers visited the boats and opened direct trade for supplies in exchange for cotton. Gen. Washburn found that these boats were in many instances furnishing arms, ammunition, and medicines to the enemy, and on one occasion a trading boat ferried a rebel battery across the river, and received \$2,000 in gold as compensation for so doing.

Notwithstanding individuals might pervert this trade, there is no doubt that a large body of Union inhabitants would have suffered extremely except for the aid thus derived, and

for the market thus opened for articles otherwise of no value in their hands.

In December Secretary Fessenden issued new regulations for the purchase of the products of the insurrectionary States. New Orleans, Memphis, Nashville, Norfolk, Beaufort, in North Carolina, Port Royal, and Pensacola were designated as marts. Agents were appointed by the Secretary of the Treasury to make purchases at other points for the United States, who will give bonds and have no personal interest in those purchases. The prices paid were not to exceed three-fourths of the market value in the city of New York, deducting revenue taxes, permit fees, etc. The agents were required to purchase all property offered, but not to assume any other liability in the matter. Safe conduct was to be allowed to all persons having such articles to sell, and a certificate of the facts of sale to be given. All products so purchased could be sold weekly at public auction, under restrictions imposed by the Secretary; and they were to be allowed transportation to a loyal State if desired. The proceeds of sales and such other moneys as the Secretary shall furnish are to constitute a "purchasing fund," to be employed for the purposes indicated. The President approved the regulations, and issued an "executive order" on the subject, authorizing all persons, except those in military or naval service, having products of States declared in insurrection, to carry them to the places of purchase, and authorizing them to pass with the necessary means of transportation to these points and to return. Such persons were to be permitted by the military authority to purchase from any authorized dealer, or any other in a loyal State, merchandise and articles not contraband of war, or prohibited by the War Department, to the value of one-third of the articles sold by him, and to have safe conduct for them. All persons hindering or preventing such safe conduct were deemed guilty of a military offence, and punished therefor. Persons making purchases, except in pursuance of these regulations, were to be held guilty of military offence, and the goods forfeited. Persons engaged in the military or naval service were forbidden from engaging in such trade.

A letter from Major-General Canby, at New Orleans, written at the close of the year, states that if the trade with the insurrectionary States is carried on in the manner and to the extent claimed by speculators who now control it, the inevitable result, in his judgment, will be to add strength and efficiency to the rebel armies east and west of the Mississippi, equivalent to an addition of fifty thousand men, and will stimulate into active opposition to the successful prosecution of the operations at least ten thousand men within our lines. Cotton speculators in the Mississippi Valley have a prospective hope to have an actual interest in every bale of cotton within the enemy's lines. They know that expeditions within the enemy's

country are followed by the capture of cotton, or its destruction, to prevent its falling into our hands, and hence it is to their interest to give information to the rebels of every contemplated movement. He has not sent an expedition into the enemy's lines without finding agents of this character in communication, giving them information regarding our movements, and nearly every expedition has been foiled to some extent in some of its objects by information so communicated. He has now several speculators, captured in the enemy's country, awaiting trial for giving information to the enemy; but the punishment of these men is no compensation for the evil they have occasioned, and will not secure us from future disasters from the same cause.

The rebel armies east and west of the Mississippi River have been supported mainly during the past twelve months by the unlawful trade carried on upon that river. The city of New Orleans, since its occupation by our forces, has contributed more to the support of these armies, more to the purchase and equipment of privateers that are preying upon our commerce, and more to maintain the credit of the Confederate Government in Europe, than any other portion of the country, with the single exception of Wilmington!

The necessary steps were taken by Congress to annul the reciprocity treaty relative to the Canadas. This treaty between the United States and Great Britain was ratified at Washington, June 5th, 1854. It secured to the inhabitants of the United States, in common with the subjects of her Britannic Majesty, the liberty to fish, except for shell-fish, on the coast and shores, and in the bays, harbors, and creeks of Canada, New Brunswick, Nova Scotia, Prince Edward Island, and of the several islands thereunto adjacent, without being restricted to any distance from the shore. It also secured in like manner the right to citizens and inhabitants of the United States to navigate the St. Lawrence and the canals of Canada used as a means of communicating between the great lakes and the Atlantic Ocean. It also provided that the following articles, being the growth and produce of either country, shall be admitted into the other respectively free of duty:

- Grain, flour, and breadstuffs of all kinds.
- Animals of all kinds.
- Fresh, smoked, and salted meats.
- Cotton, wood, seeds, and vegetables.
- Undried fruits and dried fruits.
- Fish of all kinds.
- Products of fish and all other creatures living in water.
- Poultry, eggs.
- Hides, furs, skins, or tails undressed.
- Stone or marble in its crude or unwrought state.
- Slate.
- Butter, cheese, tallow, lard.
- Horns, minerals, ores of metals of all kinds, coal.
- Pitch, tar.
- Timber and lumber of all kinds, round, hewed, and sawed, unmanufactured in whole or in part.
- Firewood.

Plants, shrubs, and trees.
 Pelts, wool.
 Fish-oil.
 Rice, broom corn, and bark.
 Gypsum, ground and unground; hewn, or wrought
 or unwrought burr or grindstones.
 Dye-stuffs.
 Flax, hemp, and tow, unmanufactured.
 Unmanufactured tobacco.
 Rags.

While the subject of abrogation was under discussion several of the Boards of Trade, in their action, expressed the opinion that the treaty should be continued until a new one was made. The Board of Trade of Detroit made a report on the subject, from which some of the most important arguments in favor of the treaty and objections against it are thus summarily condensed:

From the year ending June 30th, 1821, to June 30th, 1863, the total exports to Canada and the other British American Provinces were \$423,443,981; the total imports for the same time were \$280,827,900—making a balance in favor of the United States of \$162,116,081.

We find the principal argument in favor of an abrogation of the treaty to be the fact, that, since the treaty went into effect, the Parliament of Canada has largely increased the duties on manufactured articles produced by us, causing a large decrease in the demand for such articles, and consequently acting injuriously upon our interest. We say this is no valid objection, as these duties do not touch one single article named in the treaty; and further, no one claims that any infringement of the treaty has taken place. On the contrary, it is admitted on all hands that both parties have been scrupulously exact in the observance of its terms, in spirit and in letter.

The second argument used is, that the people of Canada and the British Isles have no sympathy with us in our present struggle; that, on the other hand, all their best wishes and feelings are with our enemies. This view of the case is largely dwelt upon to create a prejudice against the treaty. We consider this no kind of argument, as it has nothing to do with the subject under discussion; and it is not in keeping with the dignity of a great and powerful nation like the United States, to allow itself to be betrayed into hasty and ill-advised acts of legislation, because a portion of the inhabitants of certain countries do not like us. This is not a question of likes or dislikes; it is a question of trade and commerce, affecting the well-being of 70,000,000 of people.

It is further argued that our lumber interests suffer by the competition of the Canadian lumber merchants. We consider this a most wholesome as well as needful competition. It is well known that the pineries of the great West are being rapidly taken up by large capitalists, and that in a few years monopolists will hold the most of these lands; this result will leave the consumer at the mercy of these great landholders, who would then control the price of lumber, and put it to such a rate as would greatly retard the building and improving of our cities, towns, and villages, and weigh heavily upon our farming interests.

Coal is covered by the same argument as lumber. Coal-masters are combining all over the land to raise and keep up the price of fuel, and we are only sorry that Nova Scotia does not export to the cities of our Atlantic seaboard twenty times more coal than she does; because if she did, we would have a much larger and cheaper supply at the West. In helping us to coal and lumber at a reasonable price, the treaty is a real blessing.

Touching the fisheries, although they have not been near so profitable to us as was anticipated, the settlement of a question that was rapidly drifting the

two countries into an attitude hostile to each other, was a boon so great to both parties that, had the treaty affected nothing else, it would have been worth all the advantages its enemies claim we have given to Canada.

We now come to breadstuffs. It is claimed by those opposed to the treaty that this portion of it affords great and improper advantages to the Canadians. We claim the advantages are on the side of the United States and not of Canada. Instead of being injured by the importation of Canadian grains we are largely benefited. We will try and prove this, and we think the proof is conclusive. In 1863 we imported at Detroit 300,000 bushels of Canadian white wheat, on which Americans received the following sums for labor, freight, insurance, elevating charges, and commission:

Elevation and shipping charge on 300,000 bushels, 2c.....	\$4,000 00
Fire insurance on value here, \$450, 1c.....	1,125 00
Freight to Buffalo on 300,000 bushels, 6c.....	18,000 00
Transfer at Buffalo, 1c.....	3,000 00
Canal freight to New York, 90c.....	\$90,000 00
Measuring at New York, 1c.....	3,000 00
Commission on value at New York, at \$1.90 per bushel, \$454,350, 2½ per cent.....	14,250 00
Lake insurance on \$584,350, at ½ per cent, premium.....	2,921 25

Total charge paid Americans..... \$108,295 25

With the revenue law as it stands at present, the Government would have received directly, as its portion of the benefit, the following sums:

On canal and lake freight, \$78,000, at 2½ per cent.....	\$1,950 00
On gross sales, \$584,350, at ½ of one per cent.....	780 80
On stamps for time drafts for \$400,000, at 50c. per 1,000.....	200 00

Assuming that all parties interested netted the moderate sum of \$10,000 on this property, it added just that amount to the net incomes of the various parties interested, so that with a five per cent. income tax, the Government would get another sum out of the transaction of..... 500 00

Amount paid to treasury..... \$2,890 00

Here we have a sum of \$111,676.55 paid to the Government and people on one lot of 300,000 bushels of white wheat. Every transaction of the same nature resulted more or less in the same way. The opponents of the treaty say that this wheat would have come in under a twenty per cent. *ad valorem* duty, and that we should have had all these profits and the duty besides. To this we reply: We would not have received one single bushel of the wheat with a twenty per cent. duty, for the simple reason that the amount of this tax would have paid the freight charges, insurance, and commission, from the point or way-port from which the grain started in Canada to Montreal, where it would have sold for a larger sum than it would have done in Detroit.

Our commission merchants complain that a vast quantity of flour is now purchased in Toronto by parties who used to make their purchases in Detroit, and claim that the treaty ought to be repealed on that account. To say the least, this complaint is rather selfish and ungenerous; for the plain English of the desire is to get a law passed by Congress that will compel the New England consumer to purchase his flour in Detroit, whether it is to his interest to do so or not. A better and more natural way would be for our merchants to offer our New England friends flour at fair rates instead of holding it from one to two dollars per barrel above all other markets, as they have generally done for the past few years, and by this cause have driven the flour trade that used to centre here, to Toronto, Chicago, Milwaukee and Toledo. A spirit of utter variance with the ordinary rules of trade has lost us this business, and nothing else.

The next complaint against the treaty is, that it fosters and sustains rival transportation interests through a foreign country. This is the most ground-

less complaint of all. There is not one single merchant in the Northwest but knows that the facilities to transport the products of this region to the seaboard, through American territory, is utterly inadequate to the task—that, in the busy season of the year, freights are so crowded on the American lines, that the cost of transportation is largely increased, and delays so numerous that the mercantile and farming interests suffer great damage from these two causes. We do not use more severe language than is called for, when we state that members of Congress and others who make this complaint, show an amount of ignorance on the subject that can hardly be explained or excused. The only real ground of complaint your committee can make clear, is, that the Grand Trunk Railway (one of the rival lines) has not increased its rolling stock to a point where it could carry off an average of at least 10,000 barrels of flour per day from Detroit, instead of the present small and insignificant amount it can transport. If it could do this, it would add five cents per bushel to the value of all the wheat grown in Michigan, for the reason that its increased facilities would reduce the cost of conveying a barrel of flour from this point to the seaboard at least 25 cents per barrel. In other words, the saving yearly, for all time to come, would be almost equal to the original cost of the land on which the wheat was produced.

CONFEDERATE STATES. The history of these States during 1864 presents them as absorbed in one great effort to maintain a successful war, the effects of which had reached every man and every family. The ardor of the early campaigns had passed away, and with it went the sanguine hopes of a speedy and certain triumph. Doubt, uncertainty of the result, and apprehension of the future, heretofore strangers, now found a place in every mind; yet, with the heroic resolution of once American citizens no words of fear or faintness are allowed to appear in their public or official proceedings. The tone of these documents is, however, more subdued, their extreme demands less often appear, and the disappearance of passion has softened all the intercourse with their opponents. These changes have increased with the progress of the year, until at its close it might safely be said, that the Confederate States were no longer fighting for independence and a separate nationality, but for favorable terms of settlement.

Many of the elements which enter into such a struggle were abundant. The crops of 1864 were larger than those of 1863. At no time during the year has there been any lack of quantity. The difficulty was in the distribution. Wherever the Federal soldier has penetrated, he has found granaries filled with corn until they overflow; gardens in which grow all the luxuries of the season; pastures and hills not deserted by flocks and herds; yards frequented by fowls, and dove-cotes not abandoned by the innocent inmates. The cavalry horses, in the season, waded through clover knee-deep, and the growing wheat brushed their sides as they passed. As one writer says: "Even the maidens stand in the doorways and smile on us as we pass in spite of their hatred of the Yankees in the abstract."

VOL. IV.—13 A

Manufactures of necessary articles have become prosperous. Paper-mills, in Georgia and other States, turn out large quantities. Cloth mills at Lynchburg, Mobile, Raleigh, Charleston, in Georgia, Alabama, and Mississippi are in successful operation; their most important machinery having been imported from Europe. Establishments for the manufacture of cannon, small arms, powder, shot, shell, percussion-caps, harnesses, wagons, ambulances, and all the materials of war, more than supply the great demand. The physical welfare of the people distant from the scenes of conflict has steadily improved since the first year of the war.

The commerce of these States was carried on entirely by swift vessels running the blockade. In February Congress passed an act "forbidding the export of cotton," except under such regulations as should be made by the President of the Confederate States. He ordered that half the cotton thus taken should be on government account. Another order in regard to cotton carried out of Texas, provided that the owner of transportation to be used in exporting cotton into Mexico should present to the commander of the department a list of wagons and persons employed; and if the commander should "be satisfied of the loyalty and fidelity of the applicant, and that the application might be safely granted," he might grant a license. The owners of the cotton must get a permit, under the same restrictions, with the additional provision that the owner shall file his permit before selling off his cotton, and also a bond in double the value of the cotton in Confederate money, conditioned that at least one-half the value be invested in "goods and merchandise," and brought into the Confederacy within sixty days. The prohibition relative to the export of cotton was extended to tobacco, naval and military stores, molasses, sugar, and rice. It was likewise forbidden to send these articles to any point occupied by a Federal force. At the beginning of the year it was estimated that the Government had sent twenty thousand bales to Europe, lost fifty thousand by the Federal troops, and had on hand 329,551 bales at an average cost of \$16.85. The limited commerce thus carried on was of great advantage to the Government and people. The latter, however, must have reached extreme destitution of some articles, but for the aid derived from the trade within the Federal lines.

The foreign relations of the States continued without change through the year. It appears to be a stretch of presumption to expect France and England to recognize their independence. On the one hand, they had no commerce with the Confederate States, but a lucrative trade with the Northern States. Recognition was of no practical value unless followed by armed assistance, and these countries were not in a condition to go to war with a friendly power to relieve one unknown, and of no strength on the ocean. The recognition of the Confederate States as a belligerent, while it deceived the

people by exciting large expectations, was a great measure in favor of the European powers, as it practically annihilated any opposition from the United States to their schemes and plans. Mr. Davis, in his message of Nov. 7th, says:

It is not in my power to announce any change in the conduct of foreign powers. No such action has been taken by the Christian nations of Europe as might justly have been expected from their history, from the duties imposed by international law, and from the claims of humanity. It is charitable to attribute their conduct to no worse motive than indifference to the consequences which shake only the republican portion of the American continent; and not to ascribe to design a course calculated to insure the prolongation of hostilities.

A change took place in the Treasury Department by the resignation of Mr. Memminger, and the appointment of Mr. G. A. Trenholm. Mr. Davis, in his message of Nov. 7th, refers to the report of the Secretary, saying: "The facts therein disclosed are far from discouraging, and demonstrate that, with judicious legislation, we shall be enabled to meet all the exigencies of the war from our abundant resources, and avoid, at the same time, such an accumulation of debt as would render at all doubtful our capacity to redeem it."

The operations of the Treasury for the six months ending Oct. 1, 1864, present the following details; receipts, \$415,191,550.

From four per cent. registered bonds, act 17th February, 1864.....	\$15,368,500
From six per cent. bonds, \$500,000,000 loan act, February 17, 1864.....	14,481,050
From four per cent. call certificates, act 17th February, 1864.....	20,978,100
From tax on old issue of certificates, redeemed.....	14,440,566
From repayments by disbursing officers.....	20,115,880
From treasury notes, under act 17th February, 1864.....	277,576,950
From war tax.....	42,294,814
From sequestration.....	1,393,782
From customs.....	50,004
From export duty.....	4,320
From coin seized by authority of the Secretary of War.....	1,652,200
From premium on loans.....	4,522,249
From soldiers' tax.....	903,622

Expenditures.

The expenditures during the same period are as follows:

War Department.....	\$946,267,442
Navy Department.....	16,564,802
Customs.....	93,585
Civil, miscellaneous, and foreign intercourse....	10,427,674
Total.....	\$973,378,503
Public debt—for payment of interest.....	10,772,888
Public debt—for payment of principal.....	881,757,444
Total.....	\$614,988,880
The balance in the treasury on 1st April, 1864, was.....	209,283,722
The amount received since is.....	415,191,550
Total.....	\$723,474,272
Deduct amount of expenditures.....	614,988,880
The balance in the treasury is.....	\$108,585,442
The balance is made up as follows:	
Treasury notes (new issue) and specie.....	\$22,153,208
Treasury notes (old issue) to be cancelled.....	\$6,392,289
Total.....	\$108,585,442

The Public Debt.

The public debt on the first of October, 1864, was as follows:

FUNDED DEBT.	
Total issue of bonds and stocks.....	\$263,416,150
Total issue of call certificates.....	197,572,579
Total issue of certificates of indebtedness.....	19,010,000
Total issue of produce certificates, act April 21, 1862.....	\$2,500,000
Amount of 7-30 interest notes, which have assumed the character of permanent bonds.....	99,954,906
Total.....	\$683,450,439
Reduced by amount redeemed, to wit:	
Act May 16, 1861, principal.....	\$2,976,000
Act Aug. 19, 1861, principal.....	1,267,700
Call certificates, act Dec. 24, 1861, six per cent.....	70,722,080
Call certificates, act March 23, 1862, five per cent.....	70,000,000
Call certificates, act March 23, 1862, four per cent.....	1,825,000
Total.....	\$141,119,880
Total.....	\$541,340,000
UNFUNDED DEBT.	
Amount 3-68 interest notes outstanding.....	\$516,000
Total issue of treasury notes—old issue.....	\$973,281,968
Reduced by amount called in for cancellation.....	640,947,945
Total issue treasury notes, new issue.....	\$334,309,818
Total issue treasury notes, new issue.....	288,890,150
Total funded and unfunded debt.....	\$1,149,894,106

The Secretary says the foreign debt, consisting of a single item, is omitted; the whole amount, being £2,200,000, is adequately provided for by the cotton owned by the Government even at sixpence per pound, the quantity being about 250,000 bales.

In April, the note department of the Treasury was removed to Columbia, South Carolina. To increase the resources of the Government, the following act was adopted in February:

Sec. 1. *The Congress of the Confederate States of America do enact*, That in addition to the taxes levied by the "act to lay taxes for common defence, and to carry on the Government of the Confederate States," approved 24th of April, 1863, there shall be levied from the passage of this act, on the subjects of taxation hereafter mentioned, and collected from every person, copartnership, association or corporation liable therefor, taxes as follows, to wit:

I. Upon the value of property, real, personal, and mixed, of every kind and description, not herein-after exempted or taxed at a different rate, five per cent.; *Provided*, That from this tax on the value of property employed in agriculture shall be deducted the value of the tax in kind delivered therefrom, as assessed under the law imposing it, and delivered to the Government; *Provided*, That no credit shall be allowed beyond five per cent.

II. On the value of gold and silver wares and plate, jewels, jewelry, and watches, ten per cent.

III. The value of property taxed under this section shall be assessed on the basis of the market value of the same, or similar property in the neighborhood where assessed in the year 1860, except in cases where land, slaves, cotton, or tobacco have been purchased since the first day of January, 1862, in which case the said land, slaves, cotton and tobacco so purchased, shall be assessed at the price actually paid for them by the owner.

Sec. 2. On the value of all slaves or interests held in any bank, banking company, or association, canal, navigation, importing, exporting, insurance, manufacturing, telegraph, express, railroad, and dry-dock

companies of every kind, whether incorporated or not, five per cent.

The value of property taxed under this section shall be assessed upon the basis of the market value of such property in the neighborhood where assessed, in such currency as may be in general use at the time, in the purchase and sale of such property, at the time of assessment.

Sec. 3. I. Upon the amount of all gold and silver coin, gold dust, gold or silver bullion, whether held by the banks or other corporations, or individuals, five per cent; and upon all moneys held abroad, or upon the amount of all bills of exchange drawn therefor on foreign countries, a tax of five per cent.; such tax upon money abroad to be assessed and collected according to the value thereof of the place where the tax is paid.

II. Upon the amount of all solvent credits, and of all bank bills, and all other papers issued as currency, exclusive of non-interest-bearing Confederate Treasury notes, and not employed in a registered business, the income from which is taxed five per cent.

Sec. 4. Upon profits made in trade and business, as follows:

I. On all profits made by buying and selling spirituous liquors, flour, wheat, corn, rice, sugar, molasses or syrup, salt, bacon, pork, hogs, beef or beef cattle, sheep, oats, hay, fodder, raw hides, leather, horses, mules, boots, shoes, cotton yarns, wool, woollen, cotton, or mixed cloths, hats, wagons, harness, coal, iron, steel or nails, at any time between January 1, 1863, and January 1, 1865, ten per cent. in addition to the tax on such profits as income under the "act to lay taxes for the common defence, and carry on the Government of the Confederate States, approved April 24, 1863.

II. On all profits made by buying or selling money, gold, silver, foreign exchange, stocks, notes, debts, credits, or obligations of any kind, and any merchandise, profits, or effects of any kind, not enumerated in the preceding paragraph between the times named therein, ten per cent. in addition to tax on such profits as income, under the act aforesaid.

III. On the amount of profits exceeding twenty-five per cent. made in either of the years 1863 and 1864, by any bank or banking company, insurance, canal, navigation, importing and exporting, telegraph, express, railroad, manufacturing, dry dock, or other joint stock company of any description, whether incorporate or not, twenty-five per cent. on such excess.

Sec. 5. The following exemptions from taxation under this act shall be allowed, to wit:

I. Property of each head of family to the value of five hundred dollars; and for each minor child of the family to the further value of one hundred dollars; and for each son actually engaged in the army or navy, or who has died or been killed in the military or naval service, and who was a member of the family when he entered the service to the further value of five hundred dollars.

II. Property of the widow of any officer, soldier, sailor, or marine, who may have died or been killed in the military or naval service, or where there is no widow, then of the family, being minor children, to the value of one thousand dollars.

III. Property of every officer, soldier sailor, or marine, actually engaged in the military or naval service, or of such as have been disabled in such service, to the value of one thousand dollars; *Provided*, That the above exemptions shall not apply to any person whose property, exclusive of household furniture, shall be assessed at a value exceeding one thousand dollars.

IV. That where property has been injured or destroyed by the enemy, or the owner thereof has been temporarily deprived of the use or occupancy thereof, or of the means of cultivating the same by reason of the presence or proximity of the enemy, the assess-

ment on such property may be reduced in proportion to the damage sustained by the owner, or the tax assessed thereon may be reduced in the same ratio by the district collector on satisfactory evidence submitted to him by the owner or assessor.

Sec. 6. That the taxes on property laid for the year 1864 shall be assessed as on the day of the passage of this act, and be due and collected on the first day of June next, or as soon after as practicable, allowing an extension of ninety days west of the Mississippi River. The additional taxes on incomes or profits for the year 1863, levied by this act, shall be assessed and collected forthwith; and the taxes on incomes or profits for the year 1864 shall be assessed and collected according to the provisions of the tax and assessment acts of 1863.

Sec. 7. So much of the tax act of the 24th day of April, 1863, as levies a tax on incomes derived from property or effects on the amount of value of which a tax is levied by this act and also the first section of said act, are suspended for the year 1864, and no estimated rent, hire, or interest on property or credits herein taxed *ad valorem*, shall be assessed or taxed as incomes under the tax act of 1863.

Sec. 8. That the tax imposed by this act on bonds of the Confederate States heretofore issued shall in no case exceed the interest on the same; and such bonds when held by or for minors or lunatics, shall be exempt from the tax in all cases where the interest on the same shall not exceed one thousand dollars.

The prices of articles in the markets did not decline during the year.

The position of the currency, on March 31st, was as follows:

Statement of the issue of non-interest-bearing Treasury Notes since the organization of the Confederate Government:

Fifty cents.....	\$311,258 50
Ones.....	4,882,000 00
Twos.....	6,096,830 00
Fives.....	79,090,815 00
Tens.....	157,992,750 00
Twenties.....	317,422,130 00
Fifties.....	183,063,000 00
Total.....	\$978,377,868 50

Statement showing the amount of non-interest-bearing Notes outstanding on March 31, 1864:

Act May 15, 1861—Ten-year notes.....	\$7,201,575 00
Act Aug. 10, 1861—General currency.....	154,256,684 00
Act April 19, 1863—Ones and twos.....	4,516,509 00
Act Oct. 18, 1863—General currency.....	118,997,321 00
Act Mar. 23, 1863—General currency.....	511,182,586 50
Total.....	\$796,354,435 50

The difference between the issues and the amount outstanding is the amount that had been redeemed. It was also provided that Treasury notes should be funded in twenty year four per cent. bonds, or surrendered for new issues at the rate of three of the old for two of the new issues. The hundred dollar notes were to be taxed ten per cent. a month from May 2d, 1864, and all notes outstanding at the end of the year were to be taxed one hundred per cent. These measures, however, were insufficient to reduce the depreciation of the new issues.

Of all the difficulties encountered by the administrative bureau of the Government, the greatest was caused by the deficiency of transportation. With the coasting trade cut off and all the great rivers under command of the Federal fleet, the only reliance for internal trade and communication was ne-

cessarily on the railroads. These were never designed or provided with means for the task now upon them. They had, besides, suffered much from inability to command the supplies of iron, implements, and machinery, and from many sacrifices and losses in war. The deficiency in skilled labor was also a great embarrassment in requisite repairs. Some of the shorter and less important lines were thus sacrificed, and the iron and machinery taken for the maintenance of the leading roads, and for the construction of some essential and less exposed interior links of connection.

The military operations absorbed all the energies of the people, and required the sacrifice of every private interest to secure their success. If these failed, their cause was lost. But armies could be raised and sustained only while hope invigorated the spirits of the people. In this respect the year 1864 brought the severest test which had yet been felt. The waning proportions of the military territory and of the armies to resist their foes, depressed the hopes of the rulers and people, and foreboded what the result would be. Hence unusual efforts were made to rouse their energies; political differences and dissensions began to appear; the subject of peace was openly discussed; and new and unusual measures of assistance, such as the enlistment of negro troops, were advocated.

On October 17th, the Governors of Virginia, North Carolina, South Carolina, Georgia, Alabama (*see ALABAMA*), and Mississippi, met together at Augusta, in Georgia, and after a full consultation and expression of opinion, adopted the following resolutions as indicating their views:

Resolved, That there is nothing in the present aspect of public affairs to cause any abatement of our zeal in the prosecution of the war to the accomplishment of a peace, based on the independence of the Confederate States. And to give encouragement to our brave soldiers in the field and to strengthen the Confederate authorities in the pursuit of this desirable end, we will use our best exertions to increase the effective force of our armies.

Resolved, That the interests of each of our States are identical in the present struggle for self-government, and wisdom and true patriotism dictate that the military forces of each should aid the others against invasion and subjugation; and for this purpose we will recommend to our several Legislatures to repeal all such laws as prohibit the Executives from sending their forces beyond their respective limits, in order that they may render temporary service wherever most urgently required.

Resolved, That whilst it is our purpose to use every exertion to increase the strength and efficiency of our State and Confederate forces, we respectfully and earnestly request that the Confederate authorities will send to the field every able-bodied man, without exception, in any of its various departments, whose place can be filled by either disabled officers and soldiers, senior reserves, or negroes, and dispense with the use of all provost and post guard, except in important cities, or localities where the presence of large bodies of troops make them necessary, and with all passport agents upon railroads not in the immediate vicinity of the armies, as we consider these agents an unnecessary annoyance to good citizens and of no possible benefit to the country.

Resolved, That we recommend our respective Legislatures to pass stringent laws for the arrest and return to their commands of all deserters and stragglers from the Confederate armies or State troops; and that it be made the special duty, under appropriate penalties, of all civil and military officers to arrest and deliver to the proper authorities all such delinquents.

Resolved, That the course of the enemy in appropriating our slaves who happen to fall into their hands to purposes of war, seems to justify a change of policy on our part; and whilst owners of slaves under the circumstances should freely yield them to their country, we recommend to our authorities, under proper regulations, to appropriate such part of them to the public service as may be required.

And lastly, we deem it not inappropriate to declare our firm and unalterable purpose, as we believe it to be that of our fellow-citizens, to maintain our right of self-government, to establish our independence, and to uphold the rights and sovereignty of the States, or to perish in the attempt.

The desertions from the armies, which had reached a hundred thousand men, and the limited force in the field to resist the advance of Gens. Sherman and Grant, were facts which demanded the most stringent measures on the one hand, and expressed the discouragement of the people on the other. Mr. Davis, in a public speech at Macon, in September, closed with these words:

If one-half of the men now absent without leave will return to duty, we can defeat the enemy. With that hope I am going to the front. I may not realize this hope; but I know that there are men who have looked death in the face too often to despond now. Let no one despond. Let no one distrust, and remember that if genius is the beau ideal, hope is the reality.

At this time the granary of the State of Georgia was occupied by the army of Gen. Sherman. The loss of this vast agricultural interest, the people of that State and of all the Southern Atlantic States were totally unprepared to retrieve and ill-prepared to endure. Its effect was to withdraw from market necessary food, to increase the population by refugees, thus causing an increased demand on the agriculture of other portions, and to increase the prices, thereby still further depreciating the currency. These considerations were replied to by Mr. Davis, at Augusta, in October, as follows:

Those who see no hope now, who have lost confidence, are to me like those of whose distorted vision it is said they behold spots upon the sun. Such are the croakers who seem to forget the battles that have been won, and the men who have fought; who forget that in the magnitude of those battles, and the heroism of those men, this struggle exceeds all that history records. We commenced the fight without an army, without a navy, without arsenals, without mechanics, without money, and without credit. Four years we have stemmed the tide of invasion, and to-day are stronger than when the war began; better able now than ever to repulse the vandal who is seeking our overthrow. Once we imported the commonest articles of daily use, and brought in from beyond our borders even bread and meat. Now the State of Georgia alone produces food enough not only for her own people and the army within it, but feeds, too, the Army of Virginia. Once we had no arms, and could receive no soldiers but those who came to us armed. Now we have arms for all, and are beg

ging men to bear them; this city of Augusta alone produces more powder than the army can burn; all things are fair, and this Confederacy is not yet, in the familiar parlance of the croaker, "played out," as those declare who spread their own despondency over the whole body politic.

We are fighting for constitutional liberty; upon us depends its last hope. The Yankees, in endeavoring to coerce the States, have lost that heirloom of their fathers, and the men of the South alone must sustain it.

Ours is not a revolution. We are a free and independent people in States that had the right to make a better government when they saw fit. They sought to infringe upon the rights we had, and we only instituted a new government on the basis of these rights. We are not engaged in a Quixotic fight for the rights of man; our struggle is for inherent rights, and who would surrender them? Let every paper guarantee possible be given, and who would submit? From the grave of many a fallen hero the slain would cry out against such a peace with the murderers. The women of the land driven from their homes; the children lacking food; old age hobbling from the scenes of its youth; the fugitives, forced to give way to the Yankee oppressor, all proclaim a sea of blood that freemen cannot afford to bridge. There is but one thing to which we can accede—separate State independence. Some there are who speak of reconstruction with slavery maintained; but are there any who would thus measure rights by property? God forbid. Would you see that boy, with a peach bloom on his cheek, grow up a serf—never to tread the path of honor, unless he light the torch at the funeral pyre of his country? Would you see the fair daughters of the land given over to the brutality of the Yankees?

If any imagine this would not be so, let him look to the declaration of Mr. Lincoln—the terms he offers; let him read the declarations of the Northern press; let him note the tone of the Northern people, and he will see there is nothing left for us but separate independence.

Some dissatisfaction arose, particularly in Georgia, respecting the financial and currency measures of the Government, which were the Tax and Funding Acts. They were designed to reduce the amount of currency in circulation. These measures, although regarded as improper, unwise, and unjust, were, however, acquiesced in. The Military Act, which put every man under military control between seventeen and fifty years of age, also excited much dissatisfaction. But the suspension of the writ of *habeas corpus* was regarded as the most exciting and the most important question. Gov. Brown, of Georgia, sent a message to the Legislature on this subject, which rallied in its support every disaffected and disappointed man in the Confederacy. This message was supported by Vice-President Stephens, whose argument on the question, in a public speech, is thus stated:

"The privileges of the writ of *habeas corpus* may be suspended by Congress, but in doing so no man shall be deprived of his liberty without due process of law, nor shall any man be subjected to seizure, except on probable cause, supported by oath or affirmation." It will be observed that, according to this argument, no suspension of the writ of *habeas corpus* is constitutional which provides for the imprisonment of any person "without due process of law;" and no suspension is constitutional which provides for an arrest, except for probable cause, "supported by oath or affirmation." This article is based upon the two following provisions of the Constitution: 1. "No

person shall be deprived of life, liberty, or property, without due process of law." 2. "The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated; and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the person or things to be seized."

"Due process of law," according to the argument of Mr. Stephens, means a judicial proceeding. Therefore all arrests not based upon a warrant issued by some judicial officer, are unconstitutional, though authorized by an express act of Congress.

The Act of Congress which forbid a clearance to be given to a vessel unless half of the cargo was on Government account, caused a protest from the Governors of Georgia, Mississippi, Alabama, and North Carolina. The Legislature of these States had each authorized the Governor to purchase vessels to run the blockade. Although this act was a serious interference with the advantages accruing to the States, it was acquiesced in.

The question of Peace was present to every mind. But one view, however, controlled the Government and the majority of the people. When the North is prepared to acknowledge the independence of the Confederate States, the war will close and peace prevail. As there was not the slightest indication of such an act on the part of the North, all these parties urged forward the war. In North Carolina, during 1863, there were those who not only desired peace but demanded some immediate steps to be taken to open negotiations. In their minds the success of the Confederacy was considered impossible, as they sanguinely anticipated some favorable arrangements between the contestants. This agitation led to the following correspondence:

STATE OF NORTH CAROLINA, }
EXECUTIVE DEPARTMENT, RALEIGH, Dec. 30th, 1863. }
His Excellency President Davis:—MY DEAR SIR: After a careful consideration of all the sources of discontent in North Carolina, I have concluded that it will be impossible to remove it except by making some effort at negotiation with the enemy. The recent action of the Federal House of Representatives, though meaning very little, has greatly excited the public hope that the Northern mind is looking toward peace. I am promised by all men who advocate this course that, if fair terms are rejected, it will tend greatly to strengthen and intensify the war feeling, and will rally all classes to a more cordial support of the Government. And, although our position is well known as demanding only to be let alone, yet it seems to me that for the sake of humanity, without having any weak or improper motives attributed to us, we might, with propriety, constantly tender negotiations. In doing so, we would keep conspicuously before the world a disclaimer for the responsibility for the great slaughter of our race, and convince the humblest of our citizens—who sometimes forget the actual situation—that the Government is tender of their lives and happiness, and would not prolong their sufferings unnecessarily one moment. Though statesmen might regard this as useless, the people will not, and I think our cause will be strengthened thereby. I have not suggested the method of these negotiations or their terms. The effort to obtain peace is the principal matter.

Allow me to beg your earnest consideration of this suggestion.

Very respectfully, yours,

Z. B. VANCE.

EXECUTIVE OFFICE, RICHMOND, Jan. 8, 1864.

DEAR SIR: I have received your letter of the 30th ultimo, containing suggestions of the measures to be adopted for the purpose of removing "the sources of discontent" in North Carolina. The contents of the letter are substantially the same as those of the letter addressed by you to Senator Dortch, extracts of which were by him read to me. I remarked to Mr. Dortch that you were probably not aware of the obstacles to the course you indicated, and without expressing an opinion on the merits of the proposed policy, I desired him in answering your letter to write suggestions as to the method of opening negotiations, and as to the terms which you thought should be offered to the enemy. I felt persuaded you would appreciate the difficulties as soon as your attention was called to the necessity of considering the subject in detail. As you have made no suggestions touching the manner of overcoming the obstacles, I infer that you was not apprised by Mr. Dortch of my remarks to him.

Apart from insuperable objections to the line of policy you propose (and to which I will presently advert) I cannot see how the more material obstacles are to be surmounted. We have made three distinct efforts to communicate with the authorities at Washington, and have been invariably unsuccessful. Commissioners were sent before hostilities were begun, and the Washington Government refused to receive them or hear what they had to say. A second time I sent a military officer with a communication addressed by myself to President Lincoln. The letter was received by Gen. Scott, who did not permit the officer to see Mr. Lincoln, but promised that an answer would be sent. No answer has ever been received. The third time, a few months ago, a gentleman was sent, whose position, character, and reputation were such as to insure his reception, if the enemy were not determined to receive no proposals whatever from the Government. Vice-President Stephens made a patriotic tender of his services in the hope of being able to promote the cause of humanity, and although little belief was entertained of his success, I cheerfully yielded to his suggestion that the experiment should be tried. The enemy refused to let him pass through their lines or to hold any conference with them. He was stopped before he ever reached Fortress Monroe on his way to Washington.

To attempt again (in the face of those repeated rejections of all conference with us) to send commissioners or agents to propose peace, is to invite insult and contumely, and to subject ourselves to indignity without the slightest chance of being listened to. No true citizen, no man who has our cause at heart, can desire this, and the good people of North Carolina would be the last to approve of such an attempt, if aware of all the facts. So far from removing sources of discontent, such a course would receive, as it would merit, the condemnation of those true patriots who have given their blood and their treasure to maintain the freedom, equality, and independence which descended to them from the immortal heroes of King's Mountain and other battle-fields of the Revolution. If, then, these proposals cannot be made through envoys because the enemy would not receive them, how is it possible to communicate our desire for peace otherwise than by the public announcement contained in almost every message I ever sent to Congress? I cannot recall at this time one instance in which I have failed to announce that your only desire was peace, and the only terms which formed a *sine qua non* were precisely that you suggested, namely, "a demand only to be let alone."

But suppose it were practicable to obtain a conference through commissioners with the Government of President Lincoln, is it at this moment that we are to consider it desirable or even at all admissible? Have we not just been apprised by that despot that

we can only expect his gracious pardon by emancipating all our slaves, swearing allegiance and obedience to him and his proclamation, and becoming, in point of fact, the slaves of our own negroes? Can there be in North Carolina one citizen so fallen beneath the dignity of his ancestors as to accept or to enter into conference on the basis of these terms? That there are a few traitors in the State who would be willing to betray their fellow-citizens to such a degraded condition in hope of being rewarded for treachery by an escape from the common doom, may be true. But I do not believe that the vilest wretch would accept such terms for himself. I cannot conceive how the people of your State, than which none has sent nobler or more gallant soldiers to the field of battle (one of whom it is your honor to be), can have been deceived by anything to which you refer in "the recent action of the Federal House of Representatives." I have seen no action of that House that does not indicate, by a very decided majority, the purpose of the enemy to refuse all terms to the South except absolute unconditional subjugation or extermination. But if it were otherwise, how are we to treat with the House of Representatives? It is with Lincoln alone that we ever could confer, and his own partisans at the North avow unequivocally that his purpose in his message and proclamation was to shut out all hope that he could ever treat with us on any terms. If we will break up our government, dissolve the Confederacy, disband our armies, emancipate our slaves, take an oath of allegiance binding ourselves to obedience to him, and of disloyalty to our own States, he proposes to pardon us, and not to plunder us of any thing more than the property already stolen from us, and such slaves as still remain. In order to render his proposals so insulting as to secure their rejection, he joins to them a promise of support with his army to one-tenth of the people of any State who will attempt to set up a government over the other nine-tenths, thus seeking to sow discord and suspicion among the people of the several States, and to excite them to civil war in furtherance of his ends.

I knew well it would be impossible to get your people, if they possessed full knowledge of these facts, to consent that proposals should now be made by us to those who control the Government at Washington. Your own well-known devotion to the great cause of liberty and independence, to which we all have committed whatever we have of earthly possessions, would induce you to take the lead in repelling the bare thought of abject submission to the enemy. Yet peace on other terms is now impossible. To obtain the sole terms to which you or I could listen, this struggle must continue until the enemy is beaten out of his vain confidence in our subjugation. Then, and not till then, will it be possible to treat of peace. Till then all tender of terms to the enemy will be received as proof that we are ready for submission, and will encourage him in the atrocious warfare which is waging.

I fear much, from the tenor of the news I receive from North Carolina, that an attempt will be made by some bad men to inaugurate movements which must be considered as equivalent to aid and comfort to the enemy, and which all patriots should combine to put down at any cost. You may count on my aid in every effort to spare your State the scenes of civil warfare which will devastate its homes if the designs of these traitors be suffered to make headway. I know that you will place yourself in your legitimate position in the lead of those who will not suffer the name of the Old North State to be blackened by such a stain. Will you pardon me for suggesting that my only source of disquietude on the subject arises from the fear that you will delay too long the action which now appears inevitable, and that by an over-earnest desire to reclaim by conciliation men whom you believe to be sound at heart but whose loyalty is more than suspected elsewhere, you will permit them to

gather such strength as to require more violent measures than are now needed? With your influence and position, the promoters of the unfounded discontent now prevalent in your State would be put down without the use of physical force, if you would abandon a policy of conciliation and set them at defiance. In this course, frankly and firmly pursued, you would rally around you all that is best and noblest in your State, and your triumph would be bloodless. If the contrary policy be adopted, I much fear you will be driven to the use of force to repress treason. In either event, however, be assured that you will have my cordial concurrence and assistance in maintaining with you the honor, dignity, and fair name of your State, and in your efforts to crush treason, whether incipient, as I believe it now to be, or more matured, as I believe, if not firmly met, it will in our future inevitably become.

I have the honor to be, very respectfully, yours,

JEFFERSON DAVIS.

His Ex. Z. B. VANCE, Gov. N. C.

Some resolutions were adopted by the Legislature of Georgia, and subsequently approved by the Congress. But here the discussion of the subject rested generally until the public mind was again aroused by the action of the Presidential Convention at Chicago, which adopted a resolution relative to an ultimate convention of all the States, for the settlement of difficulties. Previous to this, however, two informal attempts had been made by individuals in the Union States to inaugurate measures for the opening of negotiations, which attracted attention chiefly in those States. (*See UNITED STATES.*) The proposition for a convention as made by the assemblage at Chicago, was received with favor by some, and with objections by others. Vice-President Stephens, under date of Sept. 22d, said:

The resolutions of the Georgia Legislature, at its last session, upon the subject of peace, in my judgment embodied and set forth very clearly those principles upon which alone there can be permanent peace between the different sections of this extensive, once happy and prosperous, but now distracted country.

Easy and perfect solution to all present troubles, and those far more grievous ones which loom in prospect, and portentously threaten in the coming future, is nothing more than the simple recognition of the fundamental principle and truth upon which all American constitutional liberty is founded, and upon the maintenance of which alone it can be preserved—that is, the sovereignty, the ultimate, absolute sovereignty of the States. This doctrine our Legislature announced to the people of the North and to the world. It is the only key-note to peace—permanent, lasting peace—consistent with the security of the public liberty.

The old Confederation was formed upon this principle. The old Union was afterwards formed upon this principle. No league can ever be formed or maintained between any States, North or South, securing public liberty, upon any other principle.

The whole framework of American institutions, which in so short a time had won the admiration of the world, and to which we were indebted for such an unparalleled career of prosperity and happiness, was formed upon this principle. All our present troubles sprung from a departure from this principle, from a violation of this essential law of our political organization.

The idea that the Old Union or any Union between sovereign States, consistently with this fundamental truth, can be maintained by force is preposterous.

This war springs from an attempt to do this preposterous thing. Superior power may compel a Union of some sort, but it will not be the Union of the old Constitution or of our new. It would be that sort of Union that results from despotism.

The subjugation of the people of the South by the people of the North would necessarily involve the destruction of the Constitution, and the overthrow of their liberties as well as ours. The men or party at the North to whom you refer, who favor peace, must be brought to a full realization of this truth in all its bearings before their efforts will result in much practical good. Any peace growing out of a union of States established by force will be as ruinous to them as to us.

The action of the Chicago Convention, so far as its platform of principles goes, presents, as I have said on another occasion, a ray of light, which, under Providence, may prove the dawn of the day to this long and cheerless night, the first rays of light I have seen from the North since the war began. This cheers the heart, and toward it I could almost exclaim, "Hail, holy light, offspring of Heaven, first born! Or of the eternal co-eternal beam may I express thee unblamed, since God is light."

Indeed, I could have quite so exclaimed, but for the sad reflection that whether it shall bring healing in its beams or be lost in the dark and ominous eclipse ere its good work be done, depends so much upon the action of others who may not regard it as I do. So at best it is but a ray, a small and tremulous ray, enough only to gladden the heart and quicken the hope.

The prominent and leading idea of that convention seems to have been a desire to reach a peaceful adjustment of our present difficulties and strife through the medium of a convention of the States. They propose to suspend hostilities, to see what can be done, if any thing, by negotiations of some sort. This is one step in the right direction. To such a convention of the States I should have no objection, as a peaceful conference and interchange of views between equal and sovereign powers, just as the convention of 1787 was called and assembled.

The properly constituted authorities at Washington and Richmond, the duly authorized representatives of the two confederacies of the States now at war with each other, might give their assent to such a proposition. Good might result from it. It would be an appeal on both sides from the sword to reason and justice. All wars which do not result in the extinction or extermination of one side or the other, must be ended sooner or later by some sort of negotiation.

From the discussion or interchange of views in such a convention, the history as well as the true nature of our institutions and the relation of the States toward each other and toward the Federal head, would doubtless be much better understood generally than they now are; but I should favor such a proposition only as a peaceful conference, as the convention of 1787 was. I should be opposed to leaving the questions at issue to the absolute decision of such a body.

Delegates might be clothed with powers to consult and agree, if they could, upon some plan of adjustment, to be submitted for subsequent ratification by the sovereign States whom it affected, before it should be obligatory or binding, and then binding only on such as should so ratify it. It becomes the people of the South, as well as the people of the North, to be quite as watchful and jealous of their rights as their common ancestors were.

Mr. Herschell V. Johnson, of Georgia, one of the candidates for the Vice-presidency in 1860, not only expressed himself in favor of such a convention, but explained the Southern views of the nature of the contest, thus:

I look with anxiety to the approaching Presiden-

tial election in the United States. For although the Chicago Platform falls below the great occasion, and the nominee still lower, yet the triumph of the Democratic party of the North will certainly secure a temporary suspension of hostilities and an effort to make peace by an appeal to reason. They confess that four years of bloody war, as a means of restoring the Union, has proven a failure. They declare that the true principles of American government have been disregarded and trampled under foot by the present Executive of the United States. Their success will bring a change of Administration, and, with that, a change of policy. It will do no more, and what is of infinitely greater importance, it will bring the two contending parties face to face in the arena of reason and consultation. Then and there can be discussed the history of all our difficulties, the principles involved in the bloody issue, and the respective interests of both Governments. Such is my conviction of the omnipotence of truth and right, that I feel an abiding confidence that an honorable peace would ultimately spring from such deliberations.

In their long-cherished devotion to the Union of the States—a sentiment which challenges my respect—the people of the North, it seems to me, have fallen into two grave and capital errors. On the one hand, they attach an undue importance to the mere fact of form of Union, ignoring the principles and subjects of the Union, and forgetting that it ceases to be valuable when it fails to secure that object and maintain those principles. On the other hand, they think that the States of the Confederacy have separated from the United States in contempt of that Union, in a want or disposition to insult its flag, and to destroy the Government of which it is the emblem. Both opinions are wrong. The old Union was an organization of States. But it was more; it was such an organization, founded upon great principles, in order to give the most efficient security for the maintenance of those very same principles. These principles are the sovereignty of the States—the right of the people to govern themselves; the right of each to regulate its own domestic affairs, to establish its own municipal institutions, to organize its own system of labor, and to pursue its own career of enterprise, subject to no restrictions except such as are expressed in the Federal Constitution. On these the Union was based, and constituted the solemn guarantee of all, that each State should be protected in their undisturbed enjoyment. When it failed to do this, or what is worse, when the Government passed into the administration of those whose avowed policy and measures must lead to the overthrow of these principles, it was virtually at an end, and, in their opinion, ceased to be valuable to the people of the Confederate States. Hence, secession was not resorted to merely to throw off the Union. Our people loved the Union, and honored its once glorious flag for the rich memories that clustered around it. They left it with a reluctance and regret to which history will scarcely do justice. They were, as they are now, wedded to the principles on which the Union was founded; they separated from it but to vindicate and maintain them. Whether they acted wisely or unwisely must be left to the impartial arbitration of time and coming events. But no people were ever prompted to so momentous a step by loftier devotion to constitutional liberty. For this we are denounced as rebels against the Government of the United States, and threatened with the bloody doom of traitors; our country is invaded, our homes desolated, and our people slain by hostile armies. We are told that we must be conquered or exterminated. The North is fighting us to maintain the mere fact or form of Union by force. We are defending ourselves to preserve the great principles which lay at the foundation of the Union. If we be rebels against the one, if disposed to bandy epithets, we might reply that they who advocate and wage this war against us, are traitors to the other. If there is

a wrong on either or both sides, let impartial history decide who are the greatest sinners. This is the naked truth. When thus viewed, how cruel and unnatural is this war!

Mr. Boyce, a member of Congress from South Carolina, on Sept. 29, addressed a letter to Mr. Davis on the subject, in which he said:

But fortunately Mr. Lincoln and those he represents are not all of the North. There is a powerful party there which condemns his policy. That party is rational on the subject of slavery. It represents whatever of amity or conservatism is left at the North. This party proposes that the war shall cease, at least temporarily, and that all the States should meet, in amicable council, to make peace, if possible. This is the most imposing demonstration in favor of peace made at the North since the war broke out. I think the only hope of a satisfactory peace, one consistent with the preservation of free institutions, is in the supremacy of this party at some time or other. Our policy, therefore, is to give this party all the capital we can. You should, therefore, at once, in my opinion, give this party all the encouragement possible, by declaring your willingness to an armistice, and a convention of all the States in their sovereign capacity, to enter upon the subject of peace. The theory upon which this party goes is, that we are willing to cease hostilities, at least temporarily, and meet in council to attain peace, if possible. The theory upon which Mr. Lincoln goes is, that there is no use to attempt any negotiation with us; that the sword is the only possible arbiter. Our policy is to show that the theory of the Chicago platform is the true one.

It may be said, the proposed convocation of the States is unconstitutional. To this I reply, we can amend the Constitution. It may be further objected that to meet the Northern States in convention is to abandon our present form of Government. But this no more follows than that their meeting us implies an abandonment of their form of Government. A congress of the States in their sovereign capacity is the highest acknowledgment of the principles of State Rights. This imposing assemblage is, in my opinion, the best, while it is the most august tribunal to which the great question of peace could possibly be referred. Imagine this grand council of States in the act of convening after the people, everywhere in possession of the right to elect their ambassadors, had done so. What a sublime spectacle it would present! There would be nothing to compare with it in moral grandeur in ancient or modern times. The friends of humanity and progress and civilization, and all Christians in every land, would rejoice at the spectacle, and millions in every clime, the good everywhere, would mingle their prayers in all tongues for an auspicious issue to these great deliberations. The question rests with you; the responsibility is with you; the consequence will be with your country. You and Mr. Lincoln can never make peace. You may traverse indefinitely the same bloody circles you have been moving in for the last four years, but you will never approach any nearer than you are now. Your only hope of peace is in the ascendancy of the conservative party North. Fortify that party if you can by victories, but do not neglect diplomacy. It was the boast of Philip the great king, that he gained more citizens by his policy than by his arms. A weak power, engaged with a stronger, must make up in sagacity for what it lacks in physical force, otherwise the monuments of its glory will be the tomb of its nationality.

The first official action on this form of negotiation took place in the Legislature of Georgia, where the following resolutions were introduced on Nov. 9th.:

1. The General Assembly of the State of Georgia

do resolve, that the independence of the Southern Confederate States, based upon the constitutional compact between the sovereign States composing the Confederacy, and maintained through nearly four years of gigantic war, justly claims from the world its recognition as a rightful fact.

2. That all the States which compose the late American Union, as well those embraced within the present United States as those embraced within the Southern Confederacy, are what the original thirteen States were declared to be by our fathers of 1776, and acknowledged to be by George III. of England—independent and sovereign, not as one political community, but as States, each one of them constituting such a "people" as have the inalienable right to terminate any Government of their former choice, by withdrawing from it their consent, just as the original thirteen, through their common agent, acting for, and in the name of each one of them, by the withdrawal of their consent, put a rightful termination to the British Government, which had been established over them with their consent and eager desire.

3. That the sovereignty of the individual States is the only basis of permanent peace on the American continent; and will, if the voice of passion and war can once be hushed, and reason allowed to resume her sway, lead to an early and lasting solution of all the matters of controversy involved in the present lamentable war, by simply leaving all the States free to form their political associations with one another—not by force of arms, which excludes the idea of "consent," but by a rational consideration of their respective interests, growing out of their natural situations.

4. That as the very point of controversy in the present war is the settlement of the political association of the States, a treaty of peace cannot be perfected consistently with the sovereignty of their individual States without State action on the part of at least those States whose preference may justly be regarded as doubtful, and have not yet been expressed through the appropriate organs, and, therefore, opposition to all State coöperation in perfecting a peace cannot be consistent with a desire for its establishment on a basis of the States.

5. That we hail with gratification the just and sound sentiment coming from a large and growing party in the North, that all associations of these American States must be voluntary and not forcible, and we give a hearty response to their proposition to suspend the conflict of arms and hold a convention of States to inaugurate a plan for permanent peace.

6. That the appropriate action of such convention would be not to form any "agreement or consent" between States, but only to frame and propose a plan of peace, and the assembling of such a convention for this purpose would be relieved from all possible constitutional objections by the consent of the two Governments; and with such consent the proposed convention would but act as commissioners for the negotiation of peace, subject to the ratification of both Governments, and in all points involving the sovereignty or integrity of the States, subject also to the ratification of the particular States whose sovereignty might be so involved.

7. That we respectfully but most earnestly urge upon our own Government the propriety and wisdom of not only expressing a desire for peace through Presidential messages and Congressional manifestos, but of making, on all suitable occasions, and especially just after signal successes of our arms, official, open, and unequivocal offers to treat for peace through the medium of a convention of States, leaving our adversary to accept our offers, or by rejecting them to prove to his own people that he is waging this unnatural war not for peace, nor the good of his country, but for purposes of the most unholty and dangerous ambition.

These resolutions were the occasion of the following letter from Mr. Davis, stating his views on the action of a Convention of the States:

RICHMOND, VA., Nov. 17, 1864.

To the Honorable Senators of Georgia, Messrs. A. R. Wight, President Senate, J. L. Guerry, J. M. Chambers, Thomas E. Lloyd, Frederick K. Nast, R. B. Nesbit.

GENTLEMEN: I answered by telegram this morning your letter of 11th inst., as requested, and now respectfully comply with your desire that I should express my views on the subject to which you invite my attention. In forwarding to me the resolutions introduced into the House of Representatives of Georgia by Mr. Stephens, of Hancock, you state that you are not inclined to favor the passage of these or any similar resolutions, believing them to have conduced to create divisions among ourselves, and to unite and strengthen our enemies; but that it is asserted in Milledgeville that I favor such action on the part of the States, and would be pleased to see Georgia cast her influence in that way. You are kind enough to say that if this be true, and if the passage of this or similar resolutions would in the slightest degree aid or assist me in bringing the war to a successful and speedy close, you will give them your earnest and hearty support. I return you my cordial thanks for this expression of confidence, but assure you that there is no truth in the assertions which you mention, and I presume that you will already have seen, by the closing part of my annual Message, which must have reached you since the date of your letter, that I have not contemplated the use of any other agencies in treating for peace than that established by the Constitution of the Confederate States. That agency seems to me to be well adapted to its purpose, and free from the injurious consequences that would follow any other means that have been suggested. The objection to separate State action, which you present in your letter, appears to be so conclusive as to admit of no reply. The immediate and inevitable tendency of such distinct action by each State is to create discordant instead of united counsels—to suggest to our enemies the possibility of a dissolution of the Confederacy, and to encourage them by the spectacle of our divisions to more determined and united action against us—they would readily adopt the false idea that some of the States of the Confederacy are disposed to abandon their sister States and make separate terms of peace for themselves, and if such a suspicion, however unfounded, were once engendered among our own people it would be destructive of that spirit of mutual confidence and support which forms our chief reliance for success in the maintenance of our cause. When the proposal of separate State action was first mooted it appeared to me so impracticable—so void of any promise of good that I gave no heed to the proposal—but upon its adoption by citizens whose position and ability gave weight to the expression of their opinions, I was led to a serious consideration of the subject. My first impressions have not been changed by reflection. If all the States of the two hostile federations are to meet in convention, it is plain such a meeting can only take place after an agreement as to time, place, and terms on which they are to meet. Now, without discussing the minor, although not trifling difficulties, of agreeing as to time and place, it is certain that the States would never consent to a Convention without a previous agreement as to terms on which they were to meet. The proposed Convention must meet on the basis either that no State should, against its own will, be bound by the decision of the Convention, or that it should be so bound—but it is plain that an agreement on the basis that no State should be bound without its consent by the results of the deliberations would be

an abandonment on the part of the North of its pretended right of coercion—would be an absolute recognition of the independence of the several States of the Confederacy—would be, in a word, so complete a concession of the rightfulness of our cause that the most visionary cannot hope for such an agreement in advance of the meeting of a Convention. The only other possible basis of meeting is that each State should agree beforehand to be bound by the decision of the Convention, and such agreement is but another form of submission to Northern dominion, as we well know in such a Convention we should be outnumbered nearly two to one on the very threshold of the scheme proposed. Therefore, we are met by an obstacle which cannot be removed. Is not the impracticable character of the project apparent? You will observe that I leave entirely out of view the suggestion that a Convention of all the States of both federations should be held by common consent, without any previous understanding as to the effect of its decision—should meet merely to debate and pass resolutions that are to bind no one. It is not supposed that this can really be the meaning attached to the proposal by those who are active in its support, although the resolutions to which you invite my attention declare the function of such a Convention would be simply to propose a plan of peace with the consent of the two belligerents, or in other words to act as negotiators in treating for peace. This part of the scheme is not intelligible to me—if the Convention is only to be held with the consent of the belligerents, that consent cannot be obtained without negotiation—the plan then would resolve itself into a scheme that the two Governments should negotiate an agreement for the appointment of negotiators to make proposals for a treaty. It seems much more prompt and simple to negotiate for peace at once than to negotiate for the appointment of negotiators who are to meet without power to do anything but make proposals. If the Government of the United States is willing to make peace it will treat for peace directly; if unwilling, it will refuse to consent to a Convention of the States. The author of these resolutions, and those who concur in his views, appear to me to commit the radical error of supposing that the obstacle to obtaining the peace which we all desire consists in the difficulty of finding proper agencies for negotiating, so that the whole scope of the resolutions ends in nothing but suggesting that if the enemy will treat, the best agency would be State delegates to a Convention; whereas the whole and only obstacle is that the enemy will not treat at all or entertain any other proposition than that we should submit to their yoke, acknowledge that we are criminals, and appeal to their mercy for pardon. After this statement of objections it may appear superfluous to add others of less gravity; but as you invite a full expression of my views, I will add that history is replete with instances of the interminable difficulties and delays which attend the attempt to negotiate on great and conflicting interests where the parties to the negotiation are numerous; if this has been the case where the parties possessed full power to conclude a treaty, what can we hope from an assemblage of negotiators from thirty or forty States, who, in the midst of an exasperating warfare, are to meet without power to conclude any thing? In the history of our country we find that in a time of profound peace, where the most cordial brotherhood of sentiment existed, and where a long and bloody war had been brought to a triumphant close, it required two years to assemble a convention and bring its deliberations to an end, and another year to procure the ratification of their labors. With such a war as the present in progress the views of the large assemblage of negotiators proposed would undergo constant changes, according to the vicissitudes, according to the struggle, and the attempts to secure concordant views would soon be abandoned, and leave the parties more em-

bittered than ever, less hopeful of the possibility of successful negotiation. Again, how is the difficulty resulting from the conflicting pretensions of the two belligerents in regard to several of the States to be overcome? Is it supposed that Virginia would enter into a Convention with a delegation from what our enemies choose to term the State of West Virginia, and thus recognise an insolent and violent dismemberment of her territory? Or would the United States consent that West Virginia should be deprived of her pretensions to equal rights, after having formally admitted her as a State and allowed her to vote at a Presidential election? Who would send a delegation from Louisiana, Tennessee, Kentucky, Missouri? The enemy claim to hold the Governments of those States, while we assert them to be members of the Confederacy. Would delegates be received from both sides? If so, there would soon be a disruption of the Convention. If delegates are received from neither side, then a number of the States most vitally interested in the result would remain unrepresented; and what value could be attached to mere recommendations of a body of negotiators under such circumstances? Various other considerations suggest themselves, but enough has been said to justify my conclusion that the proposal of separate State action is unwise, impracticable, and offers no prospect of good to counterbalance its manifold injurious consequences to the cause of our country.

Very respectfully, yours, etc.,
JEFFERSON DAVIS.

A proposition was made by Gen. Sherman to Gov. Brown and others of Georgia, in September, for an informal meeting to negotiate for peace, which received much attention in that State. (*See GEORGIA.*) The meeting, however, was declined.

The use of the slaves as soldiers with the reward of freedom to those who survived, was strongly advocated during the year. From the beginning of hostilities they were the laborers on the fortifications in all parts of the Confederacy. At the same early period both the free and slave offered their services, and the former in considerable numbers enrolled themselves. In June, 1861, the Legislature of Tennessee passed an act to authorize the Governor to receive into the military service free persons of color between the ages of fifteen and fifty. Pay and rations were assigned to them. In September one regiment, numbering fourteen hundred, appeared on the field at the review of troops in New Orleans. In February, 1862, the subject of enrolling the free negroes was discussed in the Legislature of Virginia, and an act passed to provide for their enlistment. The next step was the threat to draft slaves to work on the fortifications when refused to hire them. This was made by Gov. Brown, of Georgia, in November, 1862. During the next year they were extensively employed as pioneers, sappers, cooks, nurses, and teamsters, and their employment as a military arm in defence of the country was advocated in Congress. In February, 1864, Congress passed an act making all "male free negroes (with certain exceptions) between the ages of eighteen and fifty," liable to perform such duties in the army, or in connection with the military defenses of the country, in the way of work upon

fortifications, or in Government works, etc., as the Secretary of War might from time to time prescribe, and providing them rations, clothing, and compensation. The Secretary of War was also authorized to employ for similar duty twenty thousand male negro slaves, and their owners were guaranteed against escape or death. He was authorized to impress the slaves when he could not hire them; and general orders No. 82, March 11, 1864, directed the enrollment of the free negroes, and their assignment to the performance of the duties mentioned in the act. Also the employment and impressment of slaves was ordered by the same general orders.

A convention of the Southern Governors next recommended the measure. Other prominent men approved of it, and at the close of the year the arming of the slaves upon certain conditions of service, was considered as sure to ensue.

The end of nearly four years of war presented the people of the Southern States under a Government in the exercise of every power of a national, central, military despotism. Conscription was carried to its last limit. Every man between seventeen and fifty was subject to military authority. None were exempt except on considerations of public interest. Direct taxes were laid in defiance of the theory of their constitution. Such vast amounts of paper money had been issued as to unsettle all values. The holders of this paper money were compelled to fund it or lose one third. All the railroads were seized by the Government, and some were destroyed, and others built. A universal system of impressment of property was established at Government prices in Government money. Of the exportations of the great staples the Government held the monopoly. Those citizens who were permitted to remain at home were required to execute a bond to furnish their products to the Government at its prices. The *habeas corpus* was suspended and a passport system was established. Notwithstanding all these sacrifices, the military operations had resulted in loss in every State, and the theatre of activity was reduced to three Atlantic States.

The action of the Federal Congress in 1861-'2, in imposing a tax on real estate in insurrectionary States, and providing for its prompt sale on non-payment, with a brief term for redemption, has produced thus far uncertain results. In some instances capitalists were convinced that they would fail to secure sufficient suitable labor to make their investment profitable, and declined to purchase. In others a conflict of titles has arisen, which has prevented the cultivation of the land. All these transactions have been confined to districts permanently held by the Federal troops.

CONFISCATION. The President having, in the proclamation accompanying his message of December 8th, 1863, declared a full pardon, with restoration of all rights of property ex-

cept as to slaves, to all who should take and subscribe a certain oath, great numbers, whose persons and property had come under the operation of the confiscation laws, took the oath prescribed. In February, the following letter was issued from the office of the Attorney-General to the district attorneys for their direction in such cases:

WASHINGTON, February 21.

Sir: Many persons against whom criminal indictments or against whom property-proceedings under the confiscation laws are pending in the courts of the United States, growing out of the participation of such persons in the existing rebellion, have in good faith taken the oath prescribed by the Proclamation of the President of the 8th of December, 1863, and have therefore entitled themselves to the full pardon and restoration of all rights of property, except as to slaves, and where the rights of third parties have intervened, which that proclamation offers and secures. The President's pardon of a person guilty of acts of rebellion will, of course, relieve that person from the penalties incurred by his crime, and, where an indictment is pending against him therefor, the production of the pardon, signed by the President, or of satisfactory evidence that he has complied with the conditions on which the pardon is offered, if he be not of the class exempted from the benefits of the proclamation, will be a sufficient reason for discontinuing such criminal proceedings and discharging him from custody therein. Nor is it less doubtful that a *bona fide* acceptance of the terms of the President's proclamation by persons guilty of acts of rebellion, and not of the excepted class, will secure to such a person a restoration of all the rights of property, except as to slaves, and where the rights of third parties shall have intervened; notwithstanding such property may, by reason of those acts of rebellion, have been subject to confiscation under the provisions of the confiscation acts of August 6, 1861, chapter 69, and July 17, 1862, chapter 185. For, without adverting to any other source of power in the President to restore their rights of property, the 18th section of the act of July 17, 1862, authorizes the President at any time thereafter, by proclamation, to extend to persons who may have participated in the existing rebellion, in any State or part thereof, pardon and amnesty, with such exceptions and at such times and on such conditions as he may deem expedient for the public welfare. It will hardly be questioned, I suppose, that the purpose of this section, inserted in a law mainly intended to reach the property of persons engaged in the rebellion, was to invest the President with full power to relieve such persons on such conditions as he should prescribe from the penalty of loss of their property by confiscation.

Although the proceedings for confiscation under the acts of August 6, 1861, and July 17, 1862, are *in rem* against the property seized, yet under both acts the ground of condemnation is the personal guilt of the owner in aiding the rebellion. By the pardon and amnesty, not only is the punishment of that personal guilt remitted, but the offence itself is effaced, that being the special effect of an act of amnesty of the Government. Of course, it arrests and puts to an end all penal proceedings founded thereon, whether they touch the person or the property of the offender. There is, therefore, no case of judicial proceedings to enforce the penalties of acts of rebellion which cannot be reached and cured by the constitutional or statutory powers of the President to grant pardon and amnesty, whether those proceedings be against the person of the offender by criminal indictment, or against his property under the confiscation acts referred to.

The President has accordingly directed me to instruct you, that in any case where proceedings have

been commenced and are pending and undetermined in the district or circuit courts of the United States for your district, against a person charged with acts of rebellion, and not of the excepted class, whether they be by indictment or seizure and libel of his property for confiscation, the rights of other parties not having intervened, you will discontinue and put an end to these proceedings, whenever the person so charged shall produce evidence satisfactory to you that he has, in good faith, taken the oath and complied with the conditions prescribed by the President's proclamation of the 8th of December, 1863. Nor is it necessary that the evidence he produces should be a deed of pardon signed by the President. It would be quite impossible for the President to furnish the multitude who are now availing themselves of the benefits of the proclamation, and who are likely to do so hereafter, with this formal evidence of pardon; it will be sufficient to justify your action if the party seeking to be relieved from further proceeding shall prove to your full satisfaction that he has in good faith taken the oath, and brought himself within the conditions of pardon and amnesty set forth in the proclamation.

If in any case you have good reason to believe that the oath has been taken for the mere purpose of obtaining the possession of personal property seized under the confiscation acts, with intent to remove it from the subsequent reach of the officers of the law, you will make report of the facts and reasons for your belief at this office before discontinuing the proceedings or restoring such property to the possession of the owner.

Fugitives under section 5 of the act of July, 1861, chapter 8, are not of the class reached by the President's proclamation; for under that act, the question whether the property seized is subject to forfeiture depends upon the predicament of the property itself, and not upon the personal guilt or innocence of its owner. In this respect, forfeitures under that act have more resemblance to cases of prizes of war captured at sea as enemy's property, than to proceedings under the act of August, 1861, and July, 1862. Such forfeitures are provided, not so much to punish the owner for disloyal acts, as to prohibit commercial intercourse and weaken the public enemy, which are always efficient instruments and legitimate effects of public war. But although the remission of forfeitures under the act of July, 1861, is thus not within the scope of the proclamation of pardon, still ample power is conferred on the Secretary of the Treasury by the 8th section of that act to mitigate or remit all forfeitures and penalties incurred under the act. And it is not to be doubted that in all proper cases under that act, where the owner of the property residing in the territory in rebellion complies with the condition of the proclamation, the Secretary of the Treasury will exercise the power of remission of such forfeiture in the same spirit of generous forbearance and liberality which inspired and characterized the proclamation.

Very respectfully, &c.,

TITIAN J. COFFEE, Acting Att'y-Gen.

In conflict with the opinion of Judge Betts, of the U. S. District Court for the Southern District of New York, in the case instituted against Leroy M. Wiley (*ANNUAL CYCLO.* for 1863, p. 220), there was given the decision of Judge Davis, of the Supreme Court, rendered in the U. S. Circuit Court at Indianapolis.

In the case of the *United States vs. Two second-hand Steam Engines*, the proceeding was a libel under the act of July, 1861, to confiscate the engines, which were the property of John Cannon, alleged to be a rebel. The property was in New Albany. Captain G. W. Stewart, of New Albany, intervened, claiming to have

purchased the engines from Cannon, the alleged rebel, and setting up that Cannon was not a rebel. Judge Smith, of the District Court, had decided, at the previous term, that it was not competent for Stewart to set up that Cannon was not a rebel; and Cannon having been notified merely by publication in a newspaper of the pendency of the libel, a default was taken against him, and a decree of condemnation of the property was rendered, without any proof whatever. Judge Davis, deciding the case on appeal, reversed the decision on both these points, holding that it was competent for Stewart to plead the loyalty of Cannon, and that proof must, in all cases of default, on notice by mere publication, be offered of disloyalty. He also held that the circumstance that the property seized belongs to a citizen of a rebellious State, does not preclude the defendant from appearing to the action, and contesting the allegation that he is a rebel.

This decision substantially corroborated a recent decision made in the Floyd Circuit Court, by Judge Bicknell, in the Knoefel case.

The action of all the courts in reference to the declaration of the forfeiture was in opposition to the decision of Judge Underwood. (*See ANNUAL CYCLO.*, 1863, p. 229.) On June 8th, fourteen cases, prosecuted under the confiscation act of July 17th, 1862, came before the U. S. Court at Washington. The court passed decrees of confiscation, and ordered early sales after due advertisement of all the right, title, and interest in the estate of the respective owners for and during their natural lives, excepting one case, in which the property was personal, and the forfeiture, therefore, absolute.

In one of the cases passed upon by the court, an undivided half was libelled as the property of Hon. Geo. S. Houston, of Alabama. A quantity of evidence, however, was brought to the notice of the court, that he had adhered to the Union throughout the troubles. On motion of the District Attorney the case was suspended indefinitely.

This conforms to the opinion of Judge Davis, cited above.

CONGREGATIONALISTS. Returns from all the Congregational churches in this country give the following result: Total number of churches, 2,856; number of members, 268,015; of whom 84,898 are reported absent. The additions were 16,225, of whom 9,828 were by profession. The removals by death were 4,987, and by excommunication 641; infant baptisms, 4,462; members of Sabbath-schools, 286,798.

For some time a movement has been going on among the Congregationalists of the United States to effect a National organization, after the example of the Congregational Union of England. During the year 1864, this movement assumed a more definite shape. In August, an informal meeting was held in New Haven, at the house of Rev. Dr. Bacon, of deputies of the General Association of Connee-

Hout, Massachusetts, Ohio, and a number of members of New York, Wisconsin, and Nebraska, in order to discuss the best method, time and place of assembling the various State Committees for a preliminary or preparatory meeting on the subject of a National American Congregational Convention. It was unanimously agreed that the trustees of the American Congregational Union should be requested to call that meeting together at such time and place, after consultation and inquiry, as to them should seem best. The trustees of the Congregational Union issued a letter convening the Conference at the Broadway Tabernacle, in the city of New York, and urging the attendance of delegates from all the States. They say in their letter:

The time and place of holding the Convention, the basis of representation in the body, the subjects proper to be mentioned in the call as a guide to its deliberations, are topics that demand careful thought and mature counsel. In this view, the preliminary Conference has been appointed at a time remote from any general ecclesiastical preoccupation, and at a place where ready communication can be had with the officers of such benevolent societies as are directly interested in the Convention and its objects. In the present condition of the country this movement is so important to the future of Congregationalism, that we earnestly hope every member of each State Committee will come to the Conference in November, even at great personal inconvenience.

In answer to this call, upwards of forty delegates, representing fifteen States, appeared punctually at the place of meeting. The name agreed upon for the proposed convocation is "A National Council of Congregational Churches." The basis of representation in the council was a point of a good deal of embarrassment. All felt that a mass meeting would impose too great a burden upon the hospitalities of the place selected, and would impair the national character and weight of the council by subjecting it to a local or sectional majority. At last it was decided to make ten churches, acting in Conference, the unit of a representation by two delegates, one of whom should be a pastor. Where district Conferences exist, it will be easy to secure a delegation. In other localities the State committees, or a provisional committee for this purpose, will address a circular letter to the churches, inviting them to convene by tens at some designated time and place, and to choose their delegates. Thus the council will emanate directly from the churches, whose independence of action has been zealously guarded in all these preliminary proceedings.

The deliberations of the National Council will embrace the following topics:

1. The work of Home Evangelization in the West and in the South. This will include the condition and wants of the freedmen.

2. Parochial evangelization.

3. Education for the ministry, with special reference to colleges and theological seminaries.

4. Ministerial support.

5. A statement of their polity.

6. A declaration of Christian faith as held in common by the Congregational churches.

7. The systematization of the agencies of Christian benevolence.

Rev. Dr. Sturtevant, of Illinois College, was appointed to preach the opening sermon, and Rev. Dr. Post, of St. Louis, his alternate. Arrangements were made also for a special service of devotion with reference to the country, at an early stage in the session of the council.

The first council will be held in Boston on the 14th of June, 1865.

According to the English Congregational year-book for 1865, the statistics of Congregationalism in Europe are as follows:

Congregational Churches.

In Great Britain, Ireland, and the islands of the British Seas.....	2,768
In the American colonies.....	117
In the Australian colonies.....	124
In foreign lands.....	217
	<hr/> 3,226

Free Churches (Independent) in the French Empire..	108
In Belgium.....	20
	<hr/> 128

In Switzerland and Italy the numbers are unknown.

Congregational Ministers.

In England.....	1,780
In Wales.....	409
In Scotland.....	97
In Ireland.....	26
In the colonies.....	215
In foreign lands.....	176
	<hr/> 2,653

Students in theological colleges.....	425
" " under private instruction.....	30
	<hr/> 455

In London there are 207 Congregational chapels, 166 pastors, and 98 ministers without charges. The number of students at Hackney, Cheabunt, and New Colleges, is 118.

Fifty-seven new Congregational chapels have been opened, 11 enlarged or improved, and 20 new schools built, during the past year.

The number of Nonconformist chapels registered, of all kinds, according to the census, is 14,662; of Congregational chapels, to end of December, 1861, 1,824; Nonconformist chapels registered for marriage down to the end of 1864, 4,564; Congregational ditto, 1,498.

The independent churches of France ("Union of Free Evangelical Churches") held their 9th synod at Paris on the 24th of November, and the following days. The President was Dr. Fish, and Vice-Presidents, Pastor Pozzi and Mr. V. de Pressensé. Three new churches—Nîmes, Saint Hippolite and Codoignan—were admitted into the Union, raising the whole number to thirty-five. The Synod decided that in each church should be a body of collectors to promote regular contributions, and that the Synod should name a commission of Finance, composed of five members, to stimulate and systematize the contributions of the churches, to see that the central funds are sufficiently

sustained for necessary purposes, such as assistance to weak churches and theological students, and other objects determined by the Synod Commission for local and general interests.

CONGRESS, CONFEDERATE. All important debates in the Congress at Richmond were conducted in secret session. Some proceedings in each House commenced in public session are reported; as soon, however, as the debate assumed a special importance, it was continued only in a secret session. The session which commenced in November, 1863, adjourned in February, 1864. The state of the army, and the conduct of the war, were the chief subjects of debate at this session.

In the Senate, Mr. Brown, of Mississippi, urged the following views: The two greatest needs of the country were to strengthen the army and improve the currency. If the legislative branch of the Government and the executive power will give themselves entirely to the country, these results may in a short time be accomplished. The question which addresses itself most earnestly to our consideration is simply this: "Shall the Confederacy stand or fall?" If it is to stand, the pedestal must be built with all our hearts. All criminations and recriminations, and differences between the different branches of the Government, must cease. We must determine to stand together in one common defence, or fall together in the common grave. Our success is certain if the patriotism of the people holds out to the end. Our chief reliance in this contest is in the hearty and earnest patriotism of the people. He had this settled conviction—that when the States conceded the war-making power to the control of the Government, they gave every incidental power to make the main power effective. The framers of the Constitution were fully vindicated from the absurdity of getting us into a war, and then trammelling us so that we could not conduct it successfully. He first proposed to strengthen the army by declaring every white male person residing in the Confederate States, and capable of bearing arms, to be in the military service. He proposed to take all, without reference to age or occupation; to make but one inquiry, "Is he capable of bearing arms?" Whether he be Jew or Gentile, Christian or infidel, if he is capable of bearing arms, he should be put into the army. What is it that has brought disaster upon us? Where we have sowed we have not been prepared to reap. If the whole military power of this Confederacy had been at Manassas, the war would have been ended soon after its commencement. We wasted the first year of the war by keeping handfulls of men in the army. We wasted the second year of the war by only conscripting those between the ages of eighteen and thirty-five. We stand to-day with an army too weak to reap when the harvest is ready for the sickle. Shall we go on blundering to the end of the chapter, or concentrate our military

strength and hurl it like an avalanche against the enemy? Is it not better to make short, speedy work of the whole matter? Cease this system of killing off your armies by detail. What rivers of blood have been caused to flow by the fatal error that we were to have a short and cheap war. We now see the necessity of enlarging the army, and shall we not say to men of every profession, "If you are capable of taking up arms, you must do it." He would include the President, members of Congress, and governors of States in this call. Talk not of "invading the rights of the States." The best mode of preserving the rights of a State is to defend the State from a ruthless enemy. Better invade the rights of a State by calling out all arm-bearing citizens, than dispute over constitutional quibbles whilst the Yankee army wrests the whole State from your possession. He was not unaware that provisions must be produced. The army and the people at home must be fed and clothed, munitions of war must be made, &c. But when you have taken every man capable of bearing arms, how many would be left out to take charge of all these things? He calculated them by hundreds of thousands, and if they are not sufficient to carry on the necessary home pursuits, his fourth proposition provided for the detail of such other persons as will be "absolutely needed in civil pursuits." He also proposed to repeal all laws granting exemptions and allowing substitutes, and he would take occasion to express his thanks to the House of Representatives for making a clean sweep of the substitute law, which had sown the seeds of discord and dissension from the Potomac to the Rio Grande. He was for putting in the army these substitute gentlemen who were strutting about the country in borrowed plumage, knowing no more about setting a squadron in the field than a spinster. Next to the substitute law, the exemption law has given more dissatisfaction than any other measure of Congress. What crowds the saloons, hotels, and theatres, like boxes of red herring, and fills up all the avenues of travel with men capable of bearing arms? Why is it that the streets of Richmond are crowded with athletic young men? Why is it so all over the Confederacy? First, the fatal error of Congress in passing these laws; second, the mal-administration of those laws. The remedy is in sweeping them from the statute books. Have neither exemptions nor substitutes. Do this, and you clear the streets, close the theatres, inspire and recruit the army, and secure victory where you have defeats. Our flag will no longer trail in the dust, but will wave in triumph over the foe. Refuse to do these things, and the hearts of your soldiers will grow weak. He expressed his cordial concurrence in the views of the Secretary of War on the substitute question, and argued at some length to show that no contract existed between the Government and those who had employed substitutes.

He next discussed his proposition authorizing

the President to issue a proclamation requiring all foreigners to take up arms or leave the country in sixty days. He was tired of feeding drones. Whilst we were blessed with abundance, and these people were of no disadvantage, he was willing to tolerate their presence. But now they are eating out our substance, and, by their speculative proclivities, are depreciating our currency. They were of no earthly use to us. On the contrary, their presence here was of great disadvantage. He knew of no international law which forbid us from saying to them, "the time has come when we can entertain you no longer." Shall we fail in doing our duty to ourselves, for fear some foreign power may take offence? It may be safely assumed that nineteen-twentieths of these people are engaged in traffic. They are the men who run the blockade, depreciate our currency, and appreciate the Yankee currency. The man who goes secretly to New York, or any other Yankee city, and brings goods here, knowing that in doing so he violates our laws, that man is not to be trusted in making communications to the enemy. He would rather this day have a regiment of Yankees turned loose on this city, than longer tolerate the presence of such people. There will, he said, be no burthen on the Government if you enact wise laws, and have them faithfully administered. But if you hesitate every time a little doubt as to power is raised, he would not be responsible for the consequences. In the midst of plenty, the wives and children of our soldiers are starving, and their limbs are exposed to the blasts of winter. Will Congress arouse from its lethargy and apply a remedy? How long will the farmers of Virginia be allowed to extort the whole month's pay of a soldier in the field for a bushel of meal? This is done by men who are allowed to remain at home "that the army may be fed." How long are we to tolerate this state of things? He would say to these farmers, "Disgorge! you can't be allowed to stay at home while others are in the army, and, under the wretched plea of a 'depreciated currency,' wring from the soldiers' families their last cent!" Mr. Brown said he would commence by picking these men up and poking them into the army. This proceeding would no doubt surprise these grandees, who think they have grown too great to serve the country. If there is to be any substantial improvement of the currency let us stop this tinkering with it. No government ever yet restored its credit by taking up notes that did not bear interest, and issuing bonds that do bear interest. That is the proposition of the Secretary of the Treasury. Never could he be brought to vote for any such proposition. He proposed the counter proposition of levying taxes upon the property of the country. He agreed with the President, that the debt is the debt of the people. It is growing into frightful proportions, and the time has come to commence its extinguishment. Better undertake to pay now \$400,000,000 in non-interest bear-

ing notes than \$60,000,000 in gold after the war. He proposed to tax Treasury notes about twenty-five per cent., and the man who assessed should collect the tax. To avoid the concealment of the notes, he would appoint a convenient time and place for the notes to be presented. Let the agent retain one-fourth as a tax and stamp the other three-fourths. All notes not so stamped should, at the end of three months, cease to be currency. By this plan, assessment and collection would be simultaneous, counterfeits would be detected, and what would be left of the currency would be sound. Mr. Brown further discussed the financial question, and advocated the proposition to make Treasury notes a legal tender. His next proposition was to prohibit all traffic in gold and silver. Nothing, he said, has contributed so much to the depreciation of our currency, and the traffic should therefore be prohibited. He found the power to do this in the necessity of sustaining the public credit. It is nonsense to tell him that the framers of a piece of political machinery designed that it should run down like a clock, and none to have the power of winding it up again. Without a strong army and a sound currency what is the Constitution worth? We are not living under a constitution which requires us to sacrifice our liberties. If he had taken an oath to support such a constitution he would disregard it, because he believed there was no such constitution. He had sworn to support a constitution which gave to the Government just such powers as would enable it to conduct this war to a successful conclusion. Lastly, he proposed to declare these laws war measures, and make those violating them amenable to the military courts. He was unwilling to submit legislation upon which hangs the destiny of this Confederacy to the judgment of every little petty State Judge, who, by his decisions, may turn loose the flood of Yankee despotism to overspread the whole land. He believed that all of the laws he had advocated were absolutely necessary to sustain the country in its imperilled condition.

In the House on Jan. 30th a debate ensued on the bill to amend the act of Jan. 5th, by abolishing exemptions (*see* ARMY, CONFEDERATE), of which the following debate is reported:

Mr. Smith, of North Carolina, said:

We had at this time 400,000 men on our muster-rolls. How many were actually in the field he was unable to state; probably it was one-half were not there, and it was well known that we were unable to feed the fractional part who were in the field. If, however, there were half—if 200,000 should require the possible seizure of one-half of the provisions of the country—where, he would ask, were the means to feed the ten times that number who remained at home? With this condition of affairs staring us in the face, it was now proposed to break up the farms, and reduce the agricultural interests of the country

to about naught. Look at the condition of the country around Richmond; but this was scarcely more than a type of every other part of the Confederacy.

Congress did not propose to reduce the efficiency of the different bureaus; it did not reduce, for instance, the efficiency of the ordnance and nitre bureaus, because the men must be furnished with munitions of war. And yet munitions of war were not all that we could rely on. We must feed and clothe the army, and not only the army but the people at home. Private appeals were daily coming to the members of Congress from soldiers in the army speaking of the sufferings at home; how many of their families are wanting the necessaries of life, when they are unable to send them any part of their scant pay; how many asking for relief to the farming interests; how some, stimulated by the prospects of starvation at home, and the deficiency of food in the army, are driven to despair and desertion. With these things constantly before it, would Congress still break down and cripple the limited resources that were left us to carry on this war?

Mr. Chambers, of Virginia, said that manufactories were as necessary as agriculture, and there was as great a deficiency in clothing to-day as there was in food. Did the gentleman mean to say that our soldiers deserted to the Yankees because they were not fed? We could, he believed, feed double two hundred thousand men in the field; and if we could not, then the sooner we made terms with Abraham Lincoln the better for us. We must have more than two hundred thousand men in the field next spring; we have now all the supplies we will have then, for the farmers' productions won't be available until next winter. Everybody admits and expects that next spring will be the worst and the heaviest and most decisive campaign that will occur, and yet there is a demand for more exemptions. He was not opposed to the exemption of planters; whether they furnished substitutes or not, it made no difference. But he was opposed to class legislation.

Mr. Dupre, of Louisiana, believed that if Congress had given more attention to transportation, the subject of food would not now be exciting so many fears. He had travelled a long way in getting here, and from Western Louisiana to this place he had seen very large quantities of provisions, which only wanted transportation to be distributed to the people and the army. The cry of scarcity was a stratagem employed by traitors, and it misled many honest and conscientious men, who really believed what they said. It was a stratagem to excite the spirits and the efforts of the Northern people, and disaffection and hopelessness in our own.

Mr. Goode, of Virginia, was able to state upon the best authority, that in reply to inquiries propounded them by Col. Preston, Chief of the Conscrip Bureau, all of the en-

rolling officers of the State, who were assembled here a few days ago, said that the State could not stand another draft. It had been said that the agriculturists necessary at home might be enrolled and detailed. If men were wanted outside the army, it was our duty to exempt them by law, and not leave it to the Secretary of War and the President to dole out details. He was not one of those who delighted in the Quixotic pastime of making a man of straw and tilting at him; he had no fears, and the people need have no fears of the Executive, and it was with no feeling of want of confidence in the Executive when he said that he preferred this Congress to pass its own laws rather than call upon that branch of the Government to do it for them. The great danger to-day to our cause did not come from our own Executive, it came from the tyrant at Washington, and it should be the effort of this Government to use all its energies in providing against the calamities which that tyrant would endeavor to inflict upon us.

Mr. Holcombe, of Virginia, said that by the bill of which this was an amendment, the entire agricultural population would be put in the army, and that in a country whose agricultural population greatly outbalances that of the cities and towns. Napoleon, in the ruthless conscription which he inflicted on France, never went above the age of thirty years. We proposed to put in all, of every age, and when it was known that it was a precarious matter to supply from week to week the army in the field. When the supplies were known to be so scarce, the slaves were to be withdrawn from the fields, and it was proposed in time to draw still more largely upon the vital resources of the country. From his district would be drawn one hundred men for the army, and stop two thousand laborers now engaged in producing grain for the army. We had now five hundred thousand men in the field to provide for; the new law would add one hundred thousand more, and was it possible to escape starvation when there were none at home to provide for them? Where was the weak point of the enemy? Certainly not in want of provisions. It was not probable, then, that a decisive victory could be fought this spring, and no such desperate hope should be allowed to animate us to such desperate measures as that of putting everybody in the army. The weak point of the enemy was in its financial condition. It was our policy to protract the war. Time and distance were our great allies. We must remember that, in reference to this State at least, our last crops were far below the average. Our space had been contracted, and all now must be devoted to the production of provisions for the next year. Take away the men, and starvation at home and ruin in the army would be, in his opinion, the inevitable result.

Mr. McRae, of Mississippi, believed that the most certain way of feeding the army was to

increase its numbers in the field. The insufficiency existed because there were so many of the enemy within our borders, and we had not sufficient numbers to drive them out. Some had attributed the scarcity to corruption in the Commissary Department, and though unprepared for an opinion as to the truth of that charge, he still believed that that department was inefficient; others attributed it to want of transportation, and want of transportation had certainly much to do with it. We had now but one line of railroad; the Knoxville and Chattanooga being in the possession of the enemy, left us with a vast auxiliary cut off. He believed that there was no deficiency in the country, and that if we could drive the enemy back, we could feed the army, no matter what its numbers.

After further desultory debate the bill was passed by yeas 41, nays 81.

The bill provided that each person exempted shall devote himself and the labor he controls to the production of provisions and family supplies; that there shall be contributed for the use of the army from every farm, besides the tithes required by tax, an additional tenth of all the pork or bacon produced; and that if required, the persons exempted shall sell all their surplus provisions for the use of soldiers' families, or the army, at prices fixed by commissioners.

On February 1, the House discussed the bill reported from the Committee on Military Affairs, to increase the efficiency of the army by the employment of free negroes and slaves under certain circumstances.

An unsuccessful attempt to go into secret session was made, the pending question being upon an amendment offered by Mr. Baldwin, of Virginia, to add to the first section the words: "And no free negro engaged in the production of food and forage shall be taken under this act."

Mr. Barksdale, of Mississippi, said that it was no harm to say that we needed troops, and it was the duty of Congress to place men in the army, and fill up those serried ranks now so gallantly maintaining our cause in the field. The chairman of the Military Committee had informed the House that the proposed measure would bring forty thousand troops into the field—more than had been engaged in any great battle—without materially diminishing our resources, and yet we were met at the threshold by a question relative to exchange. Suppose these free negroes were taken prisoners; the free negro is not a useful ingredient of our society. He was astonished, a few days ago, at the assertion of the gentleman from Virginia (Mr. Baldwin) that this class was a useful one in his State. He would leave it to the gentleman's colleagues to answer that, but would say that, according to his observation, the free negro was a blot upon our escutcheon, and pernicious to our slave population. Neither were they engaged in agricultural pursuits.

The amendment of the gentleman from Virginia proposed to make a most unjust discrimination against the poorer white classes. He says to the free negro, You shall not bear the burdens of this war—while he goes to the dwelling of the humble white citizen, and says to him, You must take your place in the army. It was contrary to the usages of Government to regard a negro as a citizen, and yet the gentleman proposed to discriminate between them and the poorer white classes.

Mr. Baldwin: Does the gentleman wish to place the negroes and whites on an equality?

Mr. Barksdale said that he was in favor of the bill just as it came from the committee. He would employ negroes in menial service in the army, and thus increase its efficiency by placing able-bodied white men, now performing those services, in the ranks.

Mr. Atkins, of Tennessee, called the question; which was ordered, and Mr. Baldwin's amendment was rejected.

Mr. Wright, of Texas, said he would like to vote for the bill, but a constitutional difficulty suggested itself to his mind. He would inquire of the chairman of the Military Committee if the proposition to pay negroes eleven dollars per month was not unconstitutional?

Mr. Miles thought the objection not a very subtle one. When the constitution provided that no private property should be taken without just compensation to the owner, it did not deprive Congress of the privilege of fixing the compensation. It did not make it obligatory that it should be fixed by a jury. If Congress determined to employ negroes in menial operations in the army, it was perfectly competent to determine the compensation to be paid to the owner. While we were paying soldiers but eleven dollars per month, he thought the compensation ample for the services of negroes.

Mr. Smith, of Alabama, moved to strike out the first section of the bill. It was proposed to put into the fortifications and in the army, in the capacity of teamsters, free negroes—a class who were inimical to our cause. Many of them could read, write, and draw, and being introduced into our fortifications, and becoming acquainted with their details, had only to communicate them to the enemy. So with regard to teamsters. They might, by carrying devices, clog the movements of a whole army.

Mr. Elliott, of Kentucky: Does the gentleman suppose free negroes are more inimical to our cause than slaves?

Mr. Smith had never heard that free negroes had done any thing good to our cause. He was willing to pass the second section, which provides for the employment of slaves, but opposed the free negro feature *in toto*.

Mr. Chambliss, of Virginia, said that he represented a district that was overwhelmed with free negroes, and since the departure of the slaves, they were the only laborers that could be procured. There were many dependent females, who had no other means of procuring

subsistence or fuel. There was, however, a clause in the bill which authorized the President to exempt such free negroes as the interests of the country might require; and he was willing to trust to the justice of the Executive in this respect, and should vote for the bill. He was quite as willing to trust free negroes in the army as slaves, however much we might be attached to the latter class. He hoped the section would not be stricken out. It was his intention to vote for every measure to increase the army, and he invoked the House to stand coolly up to its responsibility. If our cause failed, this Congress would be handed down to posterity with contempt, because it refused to make use of the measures within its reach.

Mr. Smith's amendment was lost.

Various other amendments were proposed, some of which were adopted and others rejected, and the bill finally passed.

This measure was distinct from the proposition brought before the Congress, at its session in November, to arm the slaves, and put them in the ranks as soldiers.

At this session the following resolutions and address, introduced into the Senate by Mr. Hill, of Georgia, were adopted by both Houses:

Joint resolutions declaring the disposition, principles, and purposes of the Confederate States in relation to the existing war with the United States.

Whereas, It is due to the great cause of humanity and civilization, and especially to the heroic sacrifices of their gallant army in the field, that no means consistent with a proper self-respect, and the approved usages of nations, should be omitted by the Confederate States to enlighten the public opinion of the world with regard to the true character of the struggle in which they are engaged, and the disposition, principles, and purposes by which they are actuated; therefore,

Resolved by the Congress of the Confederate States of America, That the following manifesto be issued in their name, and by their authority, and that the President be requested to cause copies thereof to be transmitted to our commissioners abroad, to the end that the same may be laid before foreign Governments.

Manifesto of the Congress of the Confederate States of America relative to the existing war with the United States.

The Congress of the Confederate States of America, acknowledging their responsibility to the opinion of the civilized world, to the great law of Christian philanthropy, and to the Supreme Ruler of the Universe, for the part they have been compelled to bear in the sad spectacle of war and carnage which this continent has, for the last three years, exhibited to the eyes of afflicted humanity, deem the present a fitting occasion to declare the principles, the sentiments, and the purposes by which they have been, and are still, actuated.

They have ever deeply deplored the necessity which constrained them to take up arms in defence of their rights, and of the free institutions derived from their ancestors; and there is nothing they more ardently desire than peace, whenever their enemy, by ceasing from the unhallowed war waged upon them, shall permit them to enjoy in peace the sheltering protection of those hereditary rights, and those cherished institutions. The series of successes with which it has pleased Almighty God in so signal a manner to bless our arms on almost every point of our invaded border since the opening of the present

campaign, enables us to profess this desire of peace in the interest of civilization and humanity, without danger of having our motives misinterpreted, of the declaration being ascribed to any unmanly sentiment, or any mistrust of our ability fully to maintain our cause. The repeated and disastrous checks, foreshadowing ultimate discomfiture, which their gigantic army, erected against the capital of the Confederacy, has already met with, are but a continuation of the same providential successes for us. We do not recur to the successes in any spirit of vain boasting, but in humble acknowledgment of that Almighty protection which has vouchsafed and granted them.

The world must now see that eight millions of people, inhabiting so extensive a territory, with such varied resources, and such numerous facilities for defence as the benignant bounty of nature has bestowed upon us, and animated with one spirit to encounter every sacrifice of ease, of health, of property, of life itself, rather than be degraded from the condition of free and independent States, into which they were born, can never be conquered. Will not our adversaries themselves begin to feel that humanity has bled long enough; that tears, and blood, and treasure enough have been expended in a bootless undertaking, covering their own land, no less than ours, with a pall of mourning, and exposing them far more than ourselves, to the catastrophe of financial exhaustion and bankruptcy, not to speak of the loss of their liberties by the despotism engendered in an aggressive warfare upon the liberties of another and kindred people? Will they be willing by a longer perseverance in a wanton and hopeless contest, to make this continent, which they so long boasted to be the chosen abode of liberty and self-government, of peace and a higher civilization, the theatre of the most causeless and prodigal effusion of blood which the world has ever seen, of a virtual relapse into the barbarism of the ruder ages, and of the destruction of constitutional freedom by the lawlessness of usurped power?

These are questions which our adversaries will decide for themselves. We desire to stand acquitted before the tribunal of the world, as well as in the eyes of omniscient Justice, of any responsibility for the origin or prolongation of a war as contrary to the spirit of the age as to the traditions and acknowledged principles of the political system of America.

On this continent, whatever opinions may have prevailed elsewhere, it has ever been held and acknowledged by all parties that government, to be lawful, must be founded on the consent of the governed. We were forced to dissolve our Federal connection with our former associates by their aggressions on the fundamental principles of our compact of union with them; and in doing so we exercised a right consecrated in the great charter of American liberty—the right of a free people, when a Government proves destructive of the ends for which it was established, to recur to the original principles, and to institute new guards for their security. The separate independence of the States, as the sovereign and co-equal members of the Federal Union, had never been surrendered, and the pretensions of applying to independent communities, so constituted and organized, the ordinary rules for coercing and reducing rebellious subjects to obedience was a solecism in terms, as well as an outrage on the principles of public law.

The war made upon the Confederate States was, therefore, wholly one of aggression. On our side it has been strictly defensive. Born freemen, and the descendants of a gallant ancestry, we had no opinion but to stand up in defence of our invaded firesides, of our desecrated altars, of our violated liberties and birthright, and of the prescriptive institutions which guard and protect them. We have not interfered, nor do we wish in any manner whatever, to

interfere with the internal peace and prosperity of the States arrayed in hostility against them, or with the freest development of their destinies in any form of action, or line of policy, they may think proper to adopt for themselves. All we ask is a like immunity for ourselves, and to be left to ourselves in the undisturbed enjoyment of those inalienable rights of "life, liberty, and the pursuit of happiness," which our common ancestors declared to be the equal heritage of all the parties to the social compact.

Let them forbear aggressions upon us and the war is at an end. If there be questions which require adjustment by negotiations, we have ever been willing, and are still willing to enter into communication with our adversaries in a spirit of peace, of equity, and of manly frankness. Strong in the persuasion of the justice of our cause, in the manly devotion of our citizen soldiers, and of the whole body of our people, and above all in the gracious protection of heaven, we are not afraid to avow a sincere desire for peace on terms consistent with our honor, and the permanent security of our rights; and an earnest aspiration to see the world once more restored to the beneficent pursuits of industry and of mutual intercourse and exchanges, so essential to its well-being, and which have been so gravely interrupted by the existence of this unnatural war in America.

But, if our adversaries, or those whom they have placed in power, deaf to the voice of reason and justice, steeled to the dictates of prudence and humanity, by a presumptuous and delusive confidence in their own numbers, or those of their black and foreign mercenaries, shall determine upon an indefinite prolongation of the contest, upon them be the responsibility of a decision so ruinous to themselves, and so injurious to the interest and repose of mankind.

For ourselves, we have no fear of the result. The wildest picture ever drawn by a disordered imagination comes short of the extravagance which would dream of the conquest of eight millions of people, resolved with one mind "to die freemen rather than live slaves," and forewarned by the savage and exterminating spirit in which this war has been waged upon them, and by the mad avowals of the supporters of the worse than Egyptian bondage that awaits them in the event of their subjugation. With these declarations of our dispositions, our principles, and our purposes, we commit our cause to the enlightened judgment of the world, to the sober reflections of our adversaries themselves, and to the solemn and righteous arbitrament of heaven.

The first session of the Second Congress* under the permanent Constitution convened at Richmond on May 2d. Forty new members had been elected, and fifty-seven old members.

* SENATE.

Alabama—R. W. Walker, Robert Jamison.
Arkansas—R. W. Johnson, Aug. H. Garland.
Florida—James M. Baker, A. E. Maxwell.
Georgia—H. V. Johnson, Benjamin H. Hill.
Kentucky—William E. Simms, H. C. Burnett.
Louisiana—Edward Sparrow, Thomas J. Semmes.
Mississippi—J. W. O. Watson, A. G. Brown.
Missouri—L. M. Louis, W. P. Johnson.
North Carolina—William A. Graham, William T. Dortch.
South Carolina—James I. Orr, R. W. Barnwell.
Tennessee—G. A. Henry, L. C. Haynes.
Texas—W. S. Oldham, L. T. Wigfall.
Virginia—R. M. T. Hunter, A. T. Caperton.

HOUSE.

Alabama—Thomas J. Foster, William R. Smith, W. R. Cobb,* M. H. Crunkank, Francis S. Lyon, W. P. Chilton, David Clifton, James L. Pugh, J. S. Dickinson.

* Mr. Cobb did not take his seat, but withdrew to Kansas.

The most important subject discussed at this session arose on resolutions relative to peace. The brief debates which are published serve to explain the views of members:

In the House of Representatives, on the 4th of May, Mr. James M. Leach, of North Carolina, asked leave to make a personal explanation. He noticed in the *Examiner* an article making an attack upon the people of North Carolina in general, and those of his district and himself in particular. After reading the article, he entered into a lengthy criticism upon it. He said the rumors and charges against his people originated in the State; that they came from a clamor gotten up by certain disappointed parties who had vented their spleen by grossly misrepresenting those who had received the support and countenance of the people. It originated with men who once denounced the present Governor as a peace man and a traitor. Mr. — said he was a peace man—a peace man upon the principle of recognizing the independence of the Southern Confederacy. Said he was in favor of the appointment of Commissioners to be ready to treat

Arkansas—Felix I. Batson, Rufus K. Garland, Vacancy, Thomas B. Hanly.

Florida—St. George Rogers, R. B. Hilton.

Georgia—Julian Hartridge, William E. Smith, Mark H. Blanford, Clifford Anderson, J. T. Shewmake, J. H. Echols, James M. Smith, H. P. Bell, George N. Lester, Warren Aiken.

Kentucky—William B. Machen, George W. Triplett, Henry E. Read, George W. Ewing, James S. Chrisman, Theo. L. Burnett, H. W. Bruce, Humphrey Marshall, Ely M. Bruce, James W. Moore, Benjamin F. Bradley, John M. Elliott.

Louisiana—Charles J. Villers, Charles M. Conrad, Duncan F. Kenner, Lucius J. Dupre, Vacancy, John Perkins, Jr.
Mississippi—John A. Orr, W. D. Holder, Israel Welch, Henry C. Chambers, Otho E. Singleton, Ethel Barksdale, J. T. Lamplin.

Missouri—Thomas L. Sneed, N. L. Norton, John R. Clark, A. H. Conrow, George G. Vest, Peter S. Wilkes, R. A. Hatcher.

North Carolina—W. H. N. Smith, Robert E. Bridgers, J. T. Leach, Thomas C. Fuller, Josiah Turner, Jr., John A. Gilmer, James M. Leach, James G. Ramsay, R. Galtier, George W. Logan.

South Carolina—J. M. Witherspoon, W. Porcher Miles, Lewis M. Ayer, W. D. Simpson, James Farrow, W. W. Boyce.

Tennessee—Joseph B. Heiskell, William G. Swan, A. S. Colyar, John P. Murray, Henry S. Foote, F. A. Keeble, James McCallum, Thomas Meneces, J. D. C. Adkins, John V. Wright, M. W. Oluskey.

Texas—Stephen H. Darden, Claiborne C. Herbert, A. M. Branch, Frank B. Sexton, J. R. Baylor, S. H. Morgan.

Virginia—Robert L. Montague, Robert H. Whitfield, William C. Wickham, Thomas S. Gholson, Thomas S. Boock, John Goode, Jr., William C. Rives, D. C. De Jarnette, David Funsten, F. W. M. Holliday, John B. Baldwin, Walter R. Staples, Fayette McMullen, Samuel Miller, Robert Johnston, Charles W. Russell.

TERRITORIAL DELEGATES.

Arizona—M. H. Macwillie.

Cherokee Nation—E. C. Boudinot.

Choctaw Nation—R. M. Jones.

Creek and Seminole Nations—S. B. Callahan.

OFFICERS OF THE SENATE—R. M. T. Hunter, President pro tem.; J. H. Nash, of North Carolina, Secretary; E. Stevens, of South Carolina, Assistant Secretary; C. T. Bruen, of Virginia, Journal Clerk; J. W. Anderson, Recording Clerk; Lafayette H. Fitzhugh, of Kentucky, Sergeant-at-Arms; James Page, of South Carolina, Doorkeeper.

OFFICERS OF THE HOUSE—Thomas S. Boock, of Virginia, Speaker; Albert R. Lamar, of Georgia, Clerk; James McDonald, De Louis Dalton, Henry G. Lowring, Assistant Clerks; R. H. Wayne, of Alabama, Doorkeeper.

with the United States whenever they were willing to treat with us, as had been done in the Revolutionary war, in the war of 1812, and during the Mexican war.

He said the people of his district were as loyal and devoted to the Southern cause as those of any other in the Confederacy. He said they had sent to the army more men in proportion to their population than any district in the South; that they had proved their devotion to the cause upon almost every battlefield—had nobly fallen with "their feet to the enemy and their face to the sky." He said he was prepared to prove that there had been fewer desertions from the troops of North Carolina than from those of any other State in the South.

He said the views he entertained upon peace were the same that had been expressed by the Vice-President of the Confederacy, and many other distinguished men in the South. He said that it was true that there was much opposition to the late act passed for the suspension of the writ of *habeas corpus*, and since the publication of Mr. Stephens's speech it had much increased. He had intended himself to introduce a bill to repeal the late act. He heard that the act had been passed for the purpose of suppressing public sentiment in North Carolina. If so, its object has been and would be defeated. While the people of North Carolina were willing to make any and every sacrifice for the honorable prosecution of the war, they would not quietly submit to the destruction of their rights and liberties.

Mr. J. T. Leach also rose to a personal explanation. The article in the *Examiner*, he had no doubt, alluded to him. He said he endorsed every word that had been said by his colleague. He was a peace man—for an honorable peace—peace that will do justice to those that commenced the war, and those that have sacrificed their all upon the altar of their country. He said he was a Southern man, and would stand by the cause of the "sunny South," and was willing to make any proper sacrifice for its success. But he said is it any discredit to a man to be in favor of peace? How are you to put an end to the war without negotiation, and how are you to negotiate without being in favor of peace? Commissioners had been appointed in all wars we ever had to bring about the cessation of hostilities, and put a stop to the shedding of blood. He said we must lay aside all this spirit of vilification and prejudice which seemed to fill the minds of many persons upon this subject. The people of North Carolina had been abused and vilified more than those of all the States of the South, and why was it? Was it because she had furnished so many thousand noble and true men, who had sacrificed their all for the cause?

He said that it was true there was disloyalty there—a disloyalty that he was proud of—a disloyalty that is opposed to bad laws and

worse administration. He said that the recent act* suspending the writ of *habeas corpus* had created disloyalty there.

Mr. Staples desired to ask the gentleman a

** A Bill to suspend the privilege of the writ of Habeas Corpus in certain cases.*

WHEREAS, The Constitution of the Confederate States of America provides, in Article I, section 9, paragraph 2, that "the privileges of the writ of *habeas corpus* shall not be suspended, unless when, in case of rebellion or invasion, the public safety may require it;" and whereas, the power of suspending the privilege of said writ, as recognized in said Article I, is vested solely in the Congress, which is the exclusive Judge of the necessity of such suspension; and whereas, in the opinion of the Congress, the public safety requires the suspension of said writ in the existing case of the invasion of these States by the armies of the United States; and whereas, the President has asked for the suspension of the writ of *habeas corpus*, and informed Congress of the condition of the public danger which render the suspension of the writ a measure proper for the public defence against invasion and insurrection; now, therefore,

Sec. 1. That during the present invasion of the Confederate States the privileges of the writ of *habeas corpus* be, and the same is hereby suspended; but such suspension shall apply only to the cases of persons arrested or detained by order of the President, Secretary of War, or the General Officer commanding the Trans-Mississippi Military Department, by authority and under the control of the President. It is hereby declared that the purpose of Congress in the passage of this act, is to provide more effectually for the public safety by suspending the writ of *habeas corpus* in the following cases, and no other:

I. Of treason or treasonable efforts or combinations to subvert the Government of the Confederate States.

II. Of conspiracies to overthrow the Government or conspiracies to resist the lawful authority of the Confederate States.

III. Of combining to assist the enemy, or of communicating intelligence to the enemy, or giving him aid and comfort.

IV. Of conspiracies, preparations, and attempts to incite servile insurrection.

V. Of desertions and encouraging desertions, of harboring deserters, and of attempts to avoid military service: *Provided*, that in cases of palpable wrong and oppression by any subordinate officer, upon any party who does not legally owe military service, his superior officer shall grant prompt relief to the oppressed party, and the subordinate shall be dismissed from office.

VI. Of spies and other emissaries of the enemy.

VII. Of holding correspondence or intercourse with the enemy, without necessity, and without the permission of the Confederate States.

VIII. Of unlawful trading with the enemy and other offences against the laws of the Confederate States, enacted to promote their success in the war.

IX. Of conspiracies, or attempts to liberate prisoners of war held by the Confederate States.

X. Of conspiracies, or attempts or preparations to aid the enemy.

XI. Of persons aiding or inciting others to abandon the Confederate cause, or to resist the Confederate States, or to adhere to the enemy.

XII. Of unlawfully burning, destroying or injuring, or attempting to burn, destroy or injure any bridge or railroad, or telegraph line of communication, or other property with the intent of aiding the enemy.

XIII. Of treasonable designs to impair the military power of the Government by destroying or attempting to destroy the vessels or arms or munitions of war, or arsenals, foundries, workshops, or other property of the Confederate States.

Sec. 2. The President shall cause proper officers to investigate the cases of all persons so arrested or detained, in order that they may be discharged if improperly detained, unless they can be speedily tried in the due course of law.

Sec. 3. That during the suspension aforesaid no military or other officer shall be compelled, in answer to any writ of *habeas corpus*, to appear in person, or to return the body of any person detained by him by the authority of the President, Secretary of War, or the general officer commanding the Trans-Mississippi Department; but upon the certificate under oath of the officer having charge of any one so detained that such person is detained by him as a prisoner under the authority aforesaid, further proceedings under the writ of *habeas corpus* shall immediately cease and remain suspended so long as this act shall continue in force.

Sec. 4. This act shall continue in force for ninety days after the next meeting of Congress, and no longer.

question. Are you for peace on any other terms than that of the independence of the South?

Mr. Leach.—I am for peace on the basis of the independence of the South if it can be obtained; but if not, then I am for peace on the best terms we can get, short of subjugation. Is the gentleman satisfied?

Mr. Staples—"I am not." And he was about to proceed to address the House, when Mr. Atkins, of Tennessee, objected, a unanimous consent being necessary, and further debate prevented.

In the House, May 23, Mr. J. T. Leach, of North Carolina, submitted the following preamble and resolutions:

Whereas, The unconstitutional enactment of laws by the Congress of the United States, upon subjects of vital importance to the harmony and independence of the States, the happiness and prosperity of the people, the preservation and perpetuation of the Union, against the demands of justice, the appeals and admonitions of her best and wisest statesmen, made it our painful duty to fall back upon the rights for which the colonies maintained the war of the Revolution, and which our forefathers asserted and maintained to be clear and inalienable.

Resolved, By the Congress of the Confederate States, That the delegates from each State, acting in its sovereign and independent character, for the purpose of adding moral to our physical force, and placing ourselves properly before the civilized world, do most earnestly appeal to the President, by and with the advice and consent of the Senate, to appoint Commissioners whose duty it shall be to propose an armistice of ninety days, to the proper authorities of the Federal Government, preliminary to negotiation upon State sovereignty and independence; and the said Commissioners shall report in writing to the President the answer received from the Federal Government upon the subject.

Resolved, That should the peace-making power of the Federal Government accede to the proposition for an armistice of ninety days, the President be requested to convene the Congress of the Confederate States for the purpose of appointing Commissioners, by and with the consent and advice of the Senate; and that he be also requested to notify the Executives of the several States of the fact, and ask their co-operation by appointing Commissioners, either by the Legislature or Convention, to cooperate with the Commissioners appointed by the President, and to negotiate with the Commissioners appointed by the Federal Government, upon such terms of peace as will be consistent with the honor, dignity, and independence of the States, and compatible with the safety of our social and political rights.

Resolved, That in maintaining the rights guaranteed to us by the blood and treasure of our revolutionary fathers, and dear at all times to freemen, *we desire to be let alone*. We take no man's property; we fight not for conquest, but for our rights, the independence of the States, our equality, our civil and religious liberties.

Resolved, That such terms of peace as are agreed to by the Commissioners, ought to be indorsed by the President and Senate, and submitted to the people for their ratification or rejection.

Mr. Foote, of Tennessee, moved the reference of the preamble and resolutions to the Committee on Foreign Affairs.

Mr. McMullen inquired whether the subject of the resolution was not a proper one for the secret session.

Mr. Leach said he desired it to be discussed in open session.

Mr. Conrad rose to a point of order. A rule was adopted at the last session, which is still in force, requiring that all such resolutions be received and discussed in secret sessions.

The Speaker said that such a rule had been adopted, but it had special reference to the last session.

Mr. Leach insisted that the importance of the question involved in the resolutions should commend them to the gravest considerations of the body. They were not his views only, but the views of his constituents, and a good portion of the people of North Carolina.

Mr. Garland, of Arkansas, hoped the gentleman would not proceed until the Chair had settled the point of order that had been raised.

Mr. Foote renewed his motion to refer the resolutions to the Committee on Foreign Affairs.

Mr. McMullen moved to lay the resolutions upon the table.

Mr. Marshall, of Kentucky, rose to a point of order. The gentleman from North Carolina (Mr. Leach) had the floor, and he had not yielded it. The gentleman from Virginia (Mr. McMullen) was usurping the floor.

Mr. Foote didn't want to cut off any remarks the gentleman from North Carolina might have to make in support of his resolutions.

Mr. Leach said the presentment of the resolutions was a duty he owed to himself and his constituents. If the House didn't like the resolutions, it could dispose of them in any manner that it saw proper. All he asked was a full and impartial hearing; that accorded him and his resolutions, he would be satisfied.

Mr. McMullen withdrew his motion, and Mr. Heiskell, of Tennessee, renewed his—the call for the ayes and noes upon laying the resolutions upon the table.

The ayes and noes were taken, and the resolutions tabled.

After a short interval, Mr. Conrad, of Louisiana, rose to a personal explanation. He had read over the peace resolutions submitted by the gentleman from North Carolina (Mr. Leach), and he found that they look to separate State action in the prosecution of peace. Taking that view of them, he could not give them his countenance nor support. He asked leave to change his vote on the motion to lay them upon the table. He had voted "aye," he would vote "no."

Mr. J. T. Leach said he held in his hand the address of the last Congress to the people of the Confederate States. The principles there announced were embodied almost wholly in these resolutions.

Mr. Swan, of Tennessee, asked and obtained leave to change his vote on the motion to lay the resolutions on the table.

Mr. Read, of Kentucky, moved to reconsider the vote by which the resolutions were disposed of, so that all the members might use their discretion in voting.

Mr. Marshall, of Kentucky, was for treating the resolutions of the gentleman from North Carolina with becoming respect. They did not represent his views more than the views of his Congressional District. He thinks they are proper and right, and so think his constituents.

The debate soon began to be somewhat stormy and personal, and, after much wrangling, the resolutions were tabled by 62 yeas to 22 nays.

The subject was brought up again at the next session which commenced in November.

On Dec. 16th, Mr. Turner, of N. C., under a suspension of the rules, introduced resolutions that the President, by and with the advice and consent of the Senate, be and he is hereby requested to appoint thirteen commissioners, one from each of the States of the Confederate States, to tender propositions for a conference in order to negotiate terms of peace, and failing in this, said commissioners shall use all their influence to secure an exchange of prisoners and to mitigate the horrors of the existing war.

Mr. Turner supported his resolutions at some length. He did not believe that the United States Government would listen to any terms which we could offer, but believed the offer or such an effort on our part, would be most salutary in silencing the objections and murmurings of the lukewarm and faint-hearted. He did not favor separate State action. As to his State, the disaffected did not talk against the war, but against the Administration.

In North Carolina the two political parties—Whigs and Democrats—had been kept alive by the discussion of the question of secession, the Democrats favoring and the Whigs opposing the measure. These party dissensions had never been quieted there, but were fanned and kept alive by the fact or supposition that those who had been most active in favor of secession, and most violent in the protestation of their determination to shed their blood, if necessary, in maintaining our independence, were now sheltered from serving the country in the field behind petty officers, under the appointment of the Confederate Government. The belief that scarcely any except Democrats had been appointed to fill the offices in the gift of the Government, had so dissatisfied the people that, although before the war the majority of the North Carolina delegation was Democratic, now only a single member of the delegation remains to represent that party, and he holds his position by the tenure of sixteen votes.

The people of North Carolina and a part of Georgia had gotten it into their heads that something could be effected by peace negotiations; and if the action proposed by his resolutions had no other effect—and he confessed he did not anticipate any other—it would at least quiet the minds of many thousands of persons on the subject.

Mr. Barksdale, of Miss., offered the following resolutions as a substitute for those presented by the gentleman from North Carolina:

Whereas, The people of the Confederate States having been compelled, by the acts of the non-slaveholding States, to dissolve their connection with those States, and to form a new compact in order to preserve their liberties; and

Whereas, The efforts made by the Government of the Confederate States, immediately upon its organization, to establish friendly relations between it and the Government of the United States having proved unavailing by reason of the refusal of the Government of the United States to hold intercourse with the Commissioner appointed by this Government for that purpose; and

Whereas, The Government of the United States having since repeatedly refused to listen to propositions for an honorable peace, and having declared to foreign powers in advance that it would reject any offer of mediation which they might be prompted to make in the interest of humanity for terminating the war; and thus, having manifested their determination to continue it, with a view to the reduction of the people of these States to a degrading bondage, or to their extermination; therefore be it

Resolved, That while we reiterate our readiness to enter upon negotiations for peace whenever the hearts of our enemies are so inclined, we will pursue, without faltering, the course we have deliberately chosen, and for the preservation of our liberties will employ whatever means Providence has placed at our disposal.

Resolved, That the mode prescribed in the Constitution of the Confederate States for making treaties of peace afford ample means for the attainment of that end, whenever the Government of the United States abandon their wicked purpose to subjugate them, and evince a willingness to enter upon negotiations for terminating the war.

Pending the consideration of which, the morning hour having expired, the subject was postponed.

On the next day the question recurring upon the resolutions offered by Mr. Barksdale as a substitute for those offered by Mr. Turner, Mr. McMullen, who was entitled to the floor, offered the following resolution as a substitute for those offered by Mr. Barksdale:

Whereas, According to the Declaration of Independence of the United States and the Constitution of the Confederate States, the people of each of said States, in their highest sovereign capacity, have a right to alter, amend, or abolish the Government under which they live, and establish such other as they may deem expedient; and

Whereas, The people of the several Confederate States have thought proper to sever their political connection with the people and Government of the United States for reasons which it is not needful here to state; and

Whereas, The people of the Confederate States have organized and established a distinct Government for themselves; and

Whereas, Because the people of the Confederate States have thus exercised their undoubted rights in this respect, the people and Government of the United States have thought proper to make war upon them; and

Whereas, There seems to be a difference of opinion on the part of the respective governments and people as to which of the contending parties is responsible for the commencement of the present war; therefore,

Resolved, That while it is not expedient, and would

be incompatible with the dignity of the Confederate States, to send commissioners to Washington City for the purpose of securing a cessation of hostilities, yet it would be, in the judgment of this body, eminently proper that the House of Representatives of the Confederate States should despatch, without delay, to some convenient point, a body of Commissioners, thirteen in number, composed of one Representative from each of said States, to meet and confer with such individuals as may be appointed by the Government of the United States, in regard to all outstanding questions of difference between the two Governments, and to agree, if possible, upon the terms of a lasting and honorable peace, subject to the ratification of the respective Governments and of the sovereign States respectively represented therein.

Mr. McMullen proceeded to address the House at considerable length, urging the policy and the propriety of the Government proposing some terms of peace to the United States Government. He believed this to be an unholy, uncivilized, barbarous war, and thought that the Government should exhaust all means consistent with its honor for the attainment of a speedy peace.

Mr. Atkins, of Tennessee, said he would like to know of the gentleman from Virginia (Mr. McMullen) if he or any other member of the House had one iota of information or intimation that propositions for peace would be entertained or even received by the United States Government.

Mr. McMullen said that he had information of a very important character. He had information from Bishop Lay that Gen. Grant had signified to him that any Commissioners appointed by the Confederate Government would be received by the United States authorities at any point they might designate. And that an equal number of Commissioners or persons would be appointed on the part of the North to meet them, to have a free and full interchange of views upon the subject of peace. Mr. McMullen proceeded to urge that our Government should take some initial steps looking to bringing the war to a termination. Governor Brown and Vice-President Stephens had said that we were unwilling to open negotiations with the enemy for securing a peace. Let the Government open negotiations for peace. Let Congress despatch its Commissioners into the enemy's lines; let us show to the world that we are willing to accept an honorable peace, and the mouths of Governor Brown and his friends will be stopped.

Without Mr. McMullen concluding his remarks, the morning hour expired, and the consideration of the subject was postponed.

In the Senate, on Nov. 18th, Mr. Henry, of Tennessee, introduced the following joint resolutions, declaring the determination of the Congress and the people to prosecute the war until their independence is acknowledged, which were read, ordered to be printed, and subsequently referred to the Committee on Foreign Relations:

Resolved (by the Congress of the Confederate

States of America), That the people of the Confederate States are endowed by their Creator with the inalienable rights of life, liberty, and the pursuit of happiness; that to secure these high rights governments were instituted among men, deriving their just powers from the consent of the governed; and whenever any Government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute a new government, laying its foundation on such principles and organizing its powers in such form as to them shall seem most likely to effect their safety and happiness; that in these principles, embodied in the Declaration of American Independence, the United Colonies, in 1776, dissolved the connection that bound them to the Government of Great Britain, and on them the Confederate States have severed the bonds of that political union which connected them with the people and the Government of the United States of America, rather than submit to the repeated injuries inflicted upon them by that people, and to the usurpations of that Government, all of which had the direct object to deprive them of their rights, rob them of property secured to them by constitutional guarantees and to establish an absolute tyranny over these States.

Resolved, That the Confederate States appealed to arms in defence of these rights, and to establish these principles, only after they had in vain conjured the people and the Government of the United States, by all the ties of a common kindred, to discountenance and discontinue these injuries and usurpations, and after they had petitioned for redress in the most appropriate terms, and received in answer only a repetition of insults and injuries, which foreshadowed usurpations still more dangerous to liberty.

Resolved, That after nearly four years of cruel, desolating and unnatural war, in which the people of the Confederate States have unquestionably established their capacity for self-government, and their ability to resist the attempts of the enemy to subjugate them, this Congress does not hesitate to aver its sincere desire for peace, and to that end proclaims to the world the readiness of the Government of the Confederate States to open negotiations to establish a permanent and honorable peace between the Confederate States and the United States, upon the basis of the separate independence of the former.

Resolved, That the time has come when the Confederate Congress, in the name of the people of the Confederate States, deem it proper again to proclaim to the world their unalterable determination to be free, and that they do not abate one jot of their high resolve to die freemen rather than live slaves; and further, if the people of the United States, by reflecting Abraham Lincoln, mean to tender to them four years more of war, or reunion with them on any terms, deeply deprecating the dire necessity so wantonly thrust upon them, and relying upon the justice of their cause and the gallantry of their soldiers, they accept the gage of battle, and leave the result to the righteous arbitrament of Heaven.

Resolved, That in view of the determination of the enemy to prosecute this horrid war still further, against which the Confederate States have at all times protested, and which the enemy have waged with extraordinary vigor, and which has been marked by acts of extraordinary atrocity, in violation of the usages of civilized warfare, the Congress of the Confederate States will, from this hour, dedicate themselves anew to the great cause of self-defence against the combined tyranny of the enemy. That it shall no longer be the momentous occupation of the Congress and the people of the Confederate States, but the business of their lives, to gather together the entire strength of the country in men and material of war, and put it forth, as with the will of one man, and with an unconquer-

able determination to defend their altars and their firesides till the last votary of freedom falls around them.

On December 18th the Committee reported favorably on the resolutions, with a verbal amendment, when the resolutions were passed.

In the House on Nov. 10th the subject of the employment of slaves in the armies was discussed. The views in opposition to the measure are expressed in the following remarks of Mr. Chambers, of Mississippi. The measure was debated chiefly in secret session:

On motion of Mr. Chambers, of Mississippi, the special order was called up, which was the consideration of his resolution and those by Messrs. Schaun and Foote, all relating to the employment of negroes in the army. Mr. Chambers' resolution is as follows:

Resolved, That the valor, constancy, and endurance of our citizen soldiers, assisted by the steady coöperation of all classes of our population not in the field, will continue a sufficient guaranty of the rights of the States, and of the independence of the Confederate States.

The following is Mr. Schaun's resolution:

Resolved, That in the judgment of this House no exigency now exists, nor is likely to occur in the military affairs in the Confederate States, to justify the placing of negro slaves in the army as soldiers in the field.

The resolutions offered by Mr. Foote embrace a series of propositions. The propositions assert that a general levy of the slaves for soldiers is unwise; that their withdrawal from labor would be inexpedient so long as we can otherwise obtain as large an army as we can maintain; that if the alternative be presented of subjugation or their employment in the ranks, the latter should be preferred; that for the uses to which they are now applied, their ownership by the Government, with prospective emancipation by the consent of the States, as the reward of faithful service, would be expedient; that the number so employed should be increased to forty thousand; concluding with a resolution affirming that it was necessary to have the antecedent consent and sanction of the States to any attempt at conferring emancipation by the Confederate authorities.

The Speaker explained that the House had decided to take up and consider all these resolutions at the same time, as they referred to the same subject. Yet the House could only vote upon one at a time. The first one in order was that of Mr. Chambers. When that was considered and disposed of, that of Mr. Schaun would come up, and so on, each taking their turn.

So the resolution of Mr. Chambers coming up for consideration, that gentleman proceeded to express his views in its support. He said that the resolution offered by him only declared an abiding confidence in our citizen soldiery to maintain our cause, and that they needed no other assistance than they were receiving from all other classes of our population. In other

words, his resolution declared that they did not need the assistance of negro troops. When the President proposed to put forty thousand negroes in the field—when the member from Tennessee favored it—when the member from South Carolina said he had not made up his mind about it—the question could no longer be evaded. It must be met.

The question had been raised at the end of a campaign the most successful that had ever been vouchsafed to the Confederate arms. If our army was prostrated and our people threatened with subjugation—but he did not until then—he could understand how such a proposition could be made. But why is the country agitated by it now, when the military horizon is bright and encouraging to us?

[Mr. Chambers here read from that portion of the President's Message reviewing the operations of the armies east and west of the Mississippi, to show that the President himself had presented a most hopeful view of the military prospects of the South.]

Continuing, Mr. Chambers said the whole matter hinged upon the simple question, "Are we approximating exhaustion?" He would lay it down as an undeniable fact, that our army was as large to-day, compared with that of the enemy, as at any time during the war. Taking both sides of the Mississippi, he believed the two armies held the same ratio as they did at the beginning of the campaign. It was said by some that our army was diminished by death, by disease, and by desertions, but it had not suffered as much from these causes as the Yankee army. He confessed that desertions in our army were great, but not half so great as in the Yankee army. There were thousands of men at home, from the non-execution of the laws, who should be in the army. The President had said in his Macon speech, that two-thirds of the army were absent. This was the subject that should demand the attention of Congress, rather than to be made the plea for employing negroes as soldiers in our armies. The authorities must be made to know, that when laws are passed by Congress they must be enforced and obeyed. Unless Congress correct the system of furlough and enforce the laws we will not be able to drive back the enemy. There are 250,000 men at home subject to military duty under the present law, and he could prove it by the papers upon his desk, if it did not consume too much time. Yet gentlemen say we are sinking, and appeal to African troops to save us! They appeal to them to come and help us to secure our independence. The President appeals to the sympathy of the negro. He held out to him the promise of a home. But the Yankee said he would give him a home and the right of property. The President can offer him no motive which the enemy cannot easily counteract by offering him a higher one. To our offer of freedom they would offer freedom and a home in the South after our subju

gation, as well as exemption from military service meanwhile.

How did gentlemen propose to fight negro troops? He hoped they did not propose to commingle them with our brave white soldiers. How would they fight them? Not by regiments; not by brigades; not by corps; but by companies. Place the negroes in the front; put a company here and a company there, and all mutual rivalry is lost by the interposition of this timid material, our line wavers and is swept away.

Mr. Chambers said he was ashamed to debate the question. All nature cries out against it. The negro was ordained to slavery by the Almighty. Emancipation would be the destruction of our social and political system. God forbid that this Trojan horse should be introduced among us.

It is not denied that the negro will fight, but will he fight well enough to resist the Yankee armies? The negro cannot be made a good soldier. The law of his race is against it. Of great simplicity, of disposition tractable, prone to obedience, and highly imitative, he may be easily drilled; but timid, averse to effort, without ambition, he has no soldierly quality. Being adapted by nature to slavery, as he makes the best of slaves, he must needs make the worst of soldiers. He could recollect no instance in the war of '76 where negro troops were used in regular organization and regular battle, except the battalion of slaves which Lord Dunmore brought into the fight near Norfolk against the Virginia militia, and in that affair, we are told by the historian Botta, they "acted shabbily, and saved themselves by flight."

When, in 1798, the English landed on the island of Saint Domingo they found it defended by over twenty thousand troops, chiefly mulattoes and negroes, but with less than one thousand men captured several important strongholds, and with less than two thousand finally seized upon Port au Prince, the capital of the island. The French authorities, in their extremity, offered freedom to the slaves—over four hundred thousand in number—on condition of military service for the occasion, in defence of their homes, as we would say, yet only six thousand availed themselves of the offer, although these slaves were still bloody from the insurrection of 1790. They preferred slavery to military service.

So, in the beginning of this war, the negro escaped at every opportunity to our enemies, to avoid work; but since the system of negro conscription has been adopted by the United States Government he now remains with us, true to the instincts of his race. It is not slavery he desires to avoid; it is work in any form, but especially work in the form of dangerous service. This Government possessed the war power originally possessed by all the people of the several States. With wise design they have delegated the whole, with little or no reservation. It is not too much to say

that not the Czar of Russia—not even Peter the Great, whose despotism was restrained by no traditions and alarmed by no fears—could have brought into the field so promptly and thoroughly the entire war power of that despotism as this Government has elicited the war power of the several States in defence of the rights of the States.

For this purpose the first gun at Fort Sumter moved them to arms; they will again fly to arms in the same sacred cause, whenever and by whomsoever menaced. When the last man shall have sunk in his tracks, when the last steed shall have fallen beneath his rider, and the last morsel of food shall have vanished from the land, then, and not till then, will the war power of this Government be exhausted.

Mr. Goode, of Virginia, said he was opposed to the employment of negroes as soldiers under any circumstances. He was opposed to it because it was a confession of weakness to the enemy. He was opposed to it because he thought it would end in abolition. He was opposed to it because it was degrading to our men. He believed that the right place for Cuffee was in the corn field.

At quarter-past two o'clock, on motion of Mr. Russell, of Virginia, the House went into secret session to consider a bill reported from the Judiciary Committee.

A bill to arm the slaves subsequently passed the House, but was lost in the Senate by one vote. The Legislature of Virginia instructed her Senators to vote for it. Whereupon it was reconsidered in the Senate in the following form:

A Bill to Increase the Military Forces of the Confederate States.

The Congress of the Confederate States of America do enact, That in order to provide additional forces to repel invasion, maintain the rightful possession of the Confederate States, secure their independence, and preserve their institutions, the President be and he is hereby authorized to ask for and accept from the owners of slaves the services of such number of able-bodied negro men as he may deem expedient, for and during the war, to perform military service in whatever capacity he may direct.

SECTION 2. That the General-in-Chief be authorized to organize the said slaves into companies, battalions, regiments, and brigades, under such rules and regulations as the Secretary of War may prescribe, and to be commanded by such officers as the President may appoint.

SEC. 3. That while employed in the service the said troops shall receive the same rations, clothing, and compensation as are allowed to other troops in the same branch of the service.

SEC. 4. That if, under the previous section of this act, the President shall not be able to raise a sufficient number of troops to prosecute the war successfully and maintain the sovereignty of the States and the independence of the Confederate States, then he is hereby authorized to call on each State, whenever he thinks it expedient, for her quota of three hundred thousand troops, in addition to those subject to military service under existing laws, or so many thereof as the President may deem necessary, to be raised from such classes of the population, irrespective of color, in each State, as the proper authorities thereof may determine.

SEC. 5. That nothing in this act shall be construed to authorize a change in the relation of the said slaves.

The Senate amended it as follows:

Provided, That not more than twenty-five per cent. of the male slaves between the ages of eighteen and forty-five in any State shall be called for under the provisions of this act.

It was then passed and sent to the House, where the amendment was approved by the following vote:

YEAS—Messrs. Anderson, Barksdale, Batson, Baylor, Blandford, Bradley, H. W. Bruce, Carroll, Clark, Clopton, Conrad, Darden, De Jarnette, Dickinson, Dupre, Elliott, Ewing, Funsten, Gaither, Goode, Gray, Hanley, Johnston, Keeble, Lyon, Machen, Marshall, McMullen, Meyers, Miller, Moore, Murray, Perkins, Read, Russell, Simpson, Snead, Staples, Triplett, and Villere—40.

NAYS—Messrs. Atkins, Baldwin, Chambers, Colyar, Cruikshank, Fuller, Gholson, Gilmer, Hart-ridge, Hatcher, Herbert, Holliday, J. M. Leach, J. T. Leach, Logan, McCallum, Ramsay, Rogers, Sexton, J. M. Smith, Smith of North Carolina, Turner, Wickham, Wilkes, Witherspoon, Mr. Speaker—26.

When the bill was on its passage in the Senate, after the instructions of the Virginia Legislature, Mr. Hunter of Virginia said: When we left the old Government we had thought we had gotten rid forever of the slavery agitation; that we were entering into a new Confederacy of homogeneous States where the agitation of the slavery question, which had become intolerable under the old Union, was to have no place. But to his surprise he finds that this Government assumes the power to arm the slaves, which involves also the power of emancipation. To the agitation of this question, the assumption of this power, he dated the origin of the gloom which now overspreads our people. They knew that if our liberties were to be achieved it was to be done by the hearts and the hands of free men. It also injured us abroad. It was regarded as a confession of despair and an abandonment of the ground upon which we had seceded from the old Union. We had insisted that Congress had no right to interfere with slavery, and upon the coming into power of the party who, it was known, would assume and exercise that power, we seceded. We had also then contended that whenever the two races were thrown together, one must be master and the other slave, and we vindicated ourselves against the accusations of Abolitionists by asserting that slavery was the best and happiest condition of the negro. Now what does this proposition admit? The right of the central Government to put the slaves into the militia, and to emancipate at least so many as shall be placed in the military service. It is a clear claim of the central Government to emancipate the slaves.

If we are right in passing this measure we were wrong in denying to the old Government the right to interfere with the institution of slavery and to emancipate slaves. Besides, if we offer slaves their freedom as a boon we confess that we were insincere, were hypocritical, in asserting that slavery was the best state for the negroes themselves. He had been sincere

in declaring that the central Government had no power over the institution of slavery, and that freedom would be no boon to the negro.

He now believed, as he had formerly said in discussion on the same subject, that arming and emancipating the slaves was an abandonment of this contest—an abandonment of the grounds upon which it had been undertaken. If this is so who is to answer for the hundreds of thousands of men who had been slain in the war? Who was to answer for them before the bar of Heaven? Not these who had entered into the contest upon principle and adhered to the principle, but those who had abandoned the principle. Not for all the gold in California would he have put his name to such a measure as this unless obliged to do it by instructions. As long as he was free to vote from his own convictions nothing could have extorted it from him.

Mr. Hunter then argued the necessity of freeing the negroes if they were made soldiers. There was something in the human heart and head that tells us it must be so; when they come out scarred from this conflict they must be free. If we could make them soldiers, the condition of the soldier being socially equal to any other in society, we could make them officers, perhaps, to command white men. Some future ambitious President might use the slaves to seize the liberties of the country, and put the white men under his feet. The Government had no power under the Constitution to arm and emancipate the slaves, and the Constitution granted no such great powers by implication.

Mr. Hunter then showed from statistics that no considerable body of negro troops could be raised in the States over which the Government had control without stripping the country of the labor absolutely necessary to produce food. He thought there was a much better chance of getting the large number of deserters back to the army than of getting the slaves into it. The negro abhorred the profession of a soldier. The commandant of conscripts, with authority to impress twenty thousand slaves, had, between last September and the present time, been able to get but four thousand; and of these, thirty-five hundred had been obtained in Virginia and North Carolina, and five hundred from Alabama. If he, armed with all the powers of impressment, could not get them as laborers, how will we be able to get them as soldiers? Unless they volunteer they will go to the Yankees; if we depend upon their volunteering we can't get them, and those we do get will desert to the enemy, who can offer them a better price than we can. The enemy can offer them liberty, clothing, and even farms at our expense. Negroes now were deterred from going to the enemy only by the fear of being put into the army. If we put them in they would all go over.

In conclusion, he considered that the measure, when reviewed as to its expediency, was worse than as a question of principle.

CONGRESS, UNITED STATES.—The first session of the 38th Congress* commenced on the 7th of December, 1863. In the Senate the Vice-President took the chair.

Objections were made to the administration of the oath to the Senators from West Virginia by Mr. Garrett Davis, of Kentucky, on the ground that West Virginia was not a State of the United States. A motion to administer the oath was carried—yeas, 36; nays, 5.

Before the result was announced, Mr. Hale, of New Hampshire, objected to the vote of Mr. Wilson, of Missouri, on the ground that he had been appointed a Senator by the Governor of Missouri, subsequent to which appointment the Legislature of the State had assembled and adjourned without electing a Senator.

Mr. Henderson, of Missouri, said: "The General Assembly of my State, elected in November, 1863, met in December, 1863, and adjourned in March, 1863, to a future day, the second Tuesday in November, 1863. The Gen-

eral Assembly, before the adjournment in March, 1863, called a joint session for the purpose of electing Senators, which joint session was to meet on the Thursday succeeding the second Tuesday in November of 1863. On the 18th day of November last the General Assembly elected Mr. Brown in the place of my colleague."

The question was considered on the next day, and Mr. Wilson was declared not to be entitled to a seat.

In the House Mr. Colfax, of Indiana, was elected Speaker by 101 votes, and Edward McPherson was elected clerk by 102 votes. The vote for Speaker was as follows:

Whole number of votes cast, 181; necessary to a choice, 91; of which—

Mr. Colfax received.....	101
Mr. Cox.....	49
Mr. Dawson.....	13
Mr. Mallory.....	10
Mr. Stebbins.....	8
Mr. King.....	6
Mr. Blair, of Missouri.....	3
Mr. Siles.....	1

* The following is a list of the members of Congress:

SENATE.

California—John Conness, James A. McDougall.
Connecticut—James Dixon, Lafayette S. Foster.
Delaware—James A. Bayard, Willard Saulsbury.
Illinois—William A. Belderson, Lyman Trumbull.
Indiana—Thomas A. Hendricks, Henry S. Lane.
Iowa—James Harlan, James W. Grimes.
Kansas—Samuel C. Pomeroy, James H. Lane.
Kentucky—Garrett Davis, Lazarus W. Powell.
Maine—Lot M. Morrill, William Pitt Fessenden.
Massachusetts—Charles Sumner, Henry Wilson.
Maryland—Beverly Johnson, Thomas H. Hicks.
Michigan—Zachariah Chandler, Jacob M. Howard.
Minnesota—Alexander Ramsey, Morton S. Wilkinson.
Missouri—John B. Henderson, B. Gratz Brown.
New Hampshire—Daniel Clark, John P. Hale.
New Jersey—William Wright, John C. Ten Eyck.
New York—Edwin D. Morgan, Ira Harris.
Ohio—Benjamin F. Wade, John Sherman.
Oregon—Benjamin F. Harding, James W. Nesmith.
Pennsylvania—Charles K. Buckalew, Edgar Cowan.
Rhode Island—William Sprague, Henry B. Anthony.
Vermont—Solomon Foot, Jacob Collamer.
Virginia—Lemuel J. Bowden, John S. Carlile.
West Virginia—Peter G. Van Winkle, William T. Willey.
Wisconsin—James R. Doolittle, Timothy O. Howe.

 burn, Henry L. Dawes.
Michigan—Fernando C. Beaman, Charles Upson, John W.
 Longyear, Francis W. Kellogg, Augustus G. Baldwin, John
 F. Briggs.

Minnesota—William Windom, Ignatius Donnelly.
Missouri—Francis P. Blair, Jr., Henry T. Blow, John G.
 Scott, Joseph W. McClurg, Samuel E. Boyd, Austin A.
 King, Benjamin F. Loan, William A. Hall, James S. Rollins.
New Hampshire—Daniel Marcy, Edward H. Rollins,
 James W. Patterson.

New Jersey—John F. Starr, George Middleton, William
 G. Steele, Andrew J. Rogers, Nehemiah Parry.

New York—Henry G. Stebbins, Martin Kalbfleisch, Moses
 F. Odell, Benjamin Wood, Fernando Wood, Elijah Ward,
 John W. Chandler, James Brooks, Anson Herrick, William
 Redford, Charles H. Winfield, Homer A. Nelson, John B.
 Steele, John V. L. Pruyn, John A. Griswold, Orlando Kel-
 logg, Calvin T. Halburd, James M. Marvin, Samuel F. Mil-
 ler, Ambrose W. Clark, Francis Kernan, De Witt C. Little-
 John, Thomas T. Davis, Theodore M. Pomeroy, Daniel Mor-
 ris, Giles W. Hotchkiss, Robert B. Van Valkenburg, Freeman
 Clark, Augustus Frank, John B. Gannon, Reuben E. Fenton.
Ohio—George H. Pendleton, Alexander Long, Robert O.
 Behnsen, J. F. McKinney, Frank C. LeBlond, Chilton A.
 White, Samuel S. Cox, William Johnson, Warren P. Noble,
 James M. Ashley, Wells A. Hutchins, William E. Finck,
 John O'Neill, George Bliss, James R. Morris, Joseph W.
 White, Ephraim E. Eckley, Rufus P. Spaulding, James A.
 Gardfield.

Oregon—John R. McBride.

Pennsylvania—Samuel J. Randall, Charles O'Neill, Leam-
 ard Myers, William D. Kelley, M. Russell Thayer, John D.
 Sikes, John M. Broomall, Sydenham E. Ancona, Thaddeus
 Stevens, Myer Struever, Philip Johnson, Charles Dennison,
 Henry M. Tracy, William H. Miller, Joseph Ralby, Alexan-
 der H. Coffroth, Archibald McAllister, James T. Hale, Glenn
 W. Boodell, Amos Myers, John L. Dawson, James K. Moor-
 head, Thomas Williams, Jesse Leaser.

Rhode Island—Thomas A. Jencks, Nathan F. Dixon.
Vermont—Frederick E. Woodbridge, Justin S. Merrill,
 Fortie Baxter.

Virginia—Joseph E. Segar, Lucius H. Chandler, Benjamin
 M. Kitchen.

West Virginia—Jacob B. Blair, William G. Brown, Kilian
 V. Whaley.

Wisconsin—James S. Brown, Elmer G. Shea, Amasa
 Cobb, Charles A. Eldridge, Ezra Wheeler, Walter D.
 Melinda.

Delegates from Territories.

Arizona—
Colorado—Elihu F. Bennett.
Dakota—William Jayne.
Idaho—John M. Camaday.
Nebraska—Samuel G. Dally.
Nevada—Gordon N. Mott.
New Mexico—Francisco Puelco.
Utah—John F. Kinney.
Washington—George E. Cohn.

The following is the vote in detail :

For Mr. Colfax—Messrs. Alley, Allison, Ames, Anderson, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, William G. Brown, Blaine, Jacob B. Blair, Blow, Boutwell, Boyd, Brandegee, Broomall, Ambrose W. Clark, Freeman Clarke, Clay, Cobb, Cole, Creswell, Henry Winter Davis, Thomas T. Davis, Dawes, Deming, Dixon, Donnelly, Driggs, Dumont, Eckley, Eliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Grinnell, Hale, Higby, Hooper, Hotchkiss, Asabel W. Hubbard, John H. Hubbard, Hulburt, Jenckes, Julian, Kasson, Kelley, Francis W. Kellogg, Orlando Kellogg, Littlejohn, Loan, Longyear, Lovejoy, Marvin, McBride, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel F. Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Pomeroy, Price, William H. Randall, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smith, Smithers, Spaulding, Starr, Stevens, Thayer, Thomas, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Webster, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge.

For Mr. Cox—Messrs. James C. Allen, William J. Allen, Augustus C. Baldwin, Bliss, James S. Brown, Cravens, Dawson, Eden, Edgerton, Eldridge, English, Finck, Harrington, Charles M. Harris, Herrick, Holman, Hutchins, William Johnson, Kalbfleisch, Knapp, Law, Le Blond, Long, Marcy, McDowell, McKinney, Middleton, James B. Morris, Morrison, Noble, John O'Neill, Pendleton, Perry, Robinson, Rogers, Ross, William G. Steele, Sweat, Voorhees, Wheeler, Chilton A. White, and Joseph W. White.

For Mr. Dawson—Messrs. Ancona, Bailly, Coffroth, Cox, Dennison, Philip Johnson, Lazear, McAllister, William H. Miller, Samuel J. Randall, Stiles, and Strouse.

For Mr. Mallory—Messrs. Brooks, Grider, Harding, Benjamin G. Harris, King, James S. Rollins, Stuart, Wadsworth, Ward, and Yeaman.

For Mr. Stebbins—Messrs. Ganson, Griswold, Kernan, Nelson, Odell, Pruyn, John B. Steele and Winfield.

For Mr. King—Messrs. Chanler, Hall, Mallory, Radford, Scott, and Fernando Wood.

For Mr. Blair, of Missouri—Messrs. Cottman and Field.

For Mr. Stiles—Mr. Benjamin Wood.

In the House, on the 15th, Mr. Stevens, of Pennsylvania, reported a series of resolutions referring portions of the President's message to the various committees, one of which was as follows :

Resolved, That so much of the President's message as is contained in the proclamation, and as refers to the constitution and treatment of the rebellious States, be referred to a special committee of nine, &c.

Mr. Davis, of Maryland, offered the following as a substitute :

That so much of the President's message as relates to the duty of the United States to guaranty a republican form of government to the States in which the governments recognized by the United States have been abrogated or overthrown, be referred to a select committee of nine, to be named by the Speaker ; which shall report the bills necessary and proper for carrying into execution the foregoing guarantee.

He said :—"The language of the resolution reported by the Committee of Ways and Means is very general, and perhaps does not point precisely to the object the gentleman who drew it had in his own mind. It would cover the whole subject of the war. So much, I think it

says in substance, of the President's message as relates to the condition and treatment of the rebel States, shall be referred to a select committee. What does not relate to the condition and treatment of the rebel States? It includes the conduct of the war: the treatment of the people not in arms in the rebellious districts, and the policy the military governors shall pursue; it includes, in a word, the whole treatment of the States which are the theatre of the rebellion.

"I take it that that was not what the Committee of Ways and Means contemplated. I presume they intended to point to what, in the very inaccurate phraseology of the day, is known as the question of reconstruction.

"Now, as I think there has been no destruction of the Union, no breaking up of the Government, I carefully avoid the use of any such word. The fact, as well as the constitutional view of the condition of affairs in the States enveloped by the rebellion, is that a force has overthrown, or the people, in a moment of madness, have abrogated the governments which existed in those States, under the Constitution, and were recognized by the United States prior to the breaking out of the rebellion.

"The Government of the United States is engaged in two operations. One is the suppression of armed resistance to the supreme authority of the United States, and which is endeavoring to suppress that opposition by arms. Another—a very delicate and perhaps as high a duty—is to see, when armed resistance shall be removed, that governments shall be restored in those States republican in their form."

Mr. Brooks, of New York, said :—"As I understand the gentleman from Maryland—so far as I do understand him—I am much more disposed to follow the lead of the gentleman from Pennsylvania (Mr. Stevens), who introduced the original resolution, rather than the lead of the gentleman from Maryland. I think his formula is a better one. In this particular condition of the House, I am opposed to the construction of a special committee. But if the proposition of the gentleman from Maryland shall be persisted in, I should be disposed to add that this committee be instructed to inquire also whether republican governments have not been abrogated and overturned north of the Potomac as well as south of the Potomac since this revolution began."

Mr. Lovejoy, of Illinois, followed, saying :—"Now, Mr. Speaker, I do not know that this is the point to take our departure one way or the other; still, so far as I have heard the debate, I shall follow the lead of the gentleman from Maryland (Mr. Davis), unless I take it myself. At any rate, I shall follow the principles indicated by his resolution, and the remarks with which he has accompanied it. I do not believe, strictly speaking, that there are any rebel States; I know that there are States

which rebels have taken possession of and overthrown the legitimate governments for the time being; and I hold, with the gentleman from Maryland, as I understood him, that those governments still remain; and that as soon as we can get possession of them we will breathe into them the spirit of republican life—a free soul once again. I am for the Constitution as it is and the Union as it was. Yes, I am for the Constitution as it is, and not as it has been falsely interpreted, and for the Union as it was before it was taken possession of by slaveholding tyrants.”

The amendment was adopted—yeas, 91; nays, 80.

In the Senate, on Dec. 16th, Mr. Wilson, of Massachusetts, from the Committee on Military Affairs, reported the joint resolution of the House relative to Gen. Grant. It directed that the thanks of Congress be presented to Major-Gen. Ulysses S. Grant, and through him to the officers and soldiers who have fought under his command during this rebellion, for their gallantry and good conduct in the battles in which they have been engaged; and requested the President of the United States to cause a gold medal to be struck, with suitable emblems, devices, and inscriptions, to be presented to Major-Gen. Grant. When the medal shall have been struck, the President is to cause a copy of the joint resolution to be engrossed on parchment, and to transmit it, together with the medal, to Major-Gen. Grant, to be presented to him in the name of the people of the United States of America.

It passed immediately.

In the House, on May 23d, Mr. Grinnell, of Iowa, offered the following resolution, which was laid over:

Resolved, That the President be requested to communicate to this House whether by any order of the Government, or by any officer thereof, the *World* and *Journal of Commerce*, newspapers in the city of New York, were suspended from being published; and if so, that said order be communicated to this House, and the proceedings in the execution of that order.

On the same day, Mr. Pruyn, of New York, asked leave to introduce the following resolution:

Resolved, That the conduct of the executive authority of the Government in recently closing the offices and suppressing the publication of the *World* and *Journal of Commerce*, newspapers in the city of New York, under circumstances which have been placed before the public, was an act unwarranted in itself, dangerous to the cause of the Union, in violation of the Constitution, and subversive of the principles of civil liberty, and as such is hereby censured by this House.

It was objected to. Subsequently Mr. Pruyn moved to suspend the rules in order to introduce the resolution, which was refused by the following vote:

YEA—Messrs. James C. Allen, Augustus C. Baldwin, Bliss, Brooks, James S. Brown, Chanler, Cofroth, Cox, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Grider, Harding, Charles M. Harris,

Herrick, Holman, Hutchins, Philip Johnson, William Johnson, Kalbfleisch, Kernan, King, Knapp, Law, Lazear, Mallory, Marcy, McAllister, McDowell, William H. Miller, Morrison, Nelson, Noble, John O'Neill, Pendleton, Pruyn, Radford, Samuel J. Randall, Robinson, James S. Rollins, Ross, Scott, John B. Steele, William G. Steele, Strouse, Voorhees, Wadsworth, Ward, Wheeler, Joseph W. White, and Fernando Wood—54.

NAYS—Messrs. Alley, Ames, Arnold, John D. Baldwin, Baxter, Beaman, Jacob B. Blair, Blow, Boutwell, Boyd, Broomall, William G. Brown, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Creswell, Henry Winter Davis, Thomas T. Davis, Dawes, Deming, Dixon, Donnelly, Driggs, Eckley, Eliot, Farnsworth, Garfield, Gooch, Grinnell, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, Ingersoll, Jenckes, Julian, Kelley, Francis W. Kellogg, Loan, Longyear, Marvin, McBride, McClurg, Samuel F. Miller, Moorhead, Morrill, Amos Myers, Leonard Myers, Charles O'Neill, Orth, Patterson, Perham, Pike, Pomeroy, Price, William H. Randall, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smith, Smithers, Spalding, Stevens, Thayer, Thomas, Upson, Elihu B. Washburne, William B. Washburn, Webster, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge—79.

On the same day, Mr. Arnold, of Illinois, offered the following:

Resolved, That the Committee on the Judiciary be instructed to inquire and report what, if any, additional legislation may be necessary to punish the forgery and publication of official documents, and what legislation is necessary to punish those who through the press or otherwise give information, aid, or comfort to the rebels.

It was adopted.

In the Senate, on May 26th, Mr. Powell offered the following resolution:

Resolved, That the conduct of the executive authority of the Government, in recently closing the offices and suppressing the publication of the *World* and *Journal of Commerce*, newspapers in the city of New York, under circumstances which have been placed before the public, was an act unwarranted in itself, dangerous to the cause of the Union, in violation of the Constitution, and subversive of the principles of civil liberty, and as such is hereby censured by the Senate.

It was laid over.

In the House, on Dec. 17th, Mr. Harrington, of Indiana, offered the following resolutions, and demanded the previous question on their adoption:

Whereas the Constitution of the United States (article 1, section 9) provides, “The privilege of the writ of *habeas corpus* shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it;” and whereas such provision is contained in the portion of the Constitution defining legislative powers, and not in the provisions defining executive power; and whereas the Constitution (article four of the Amendment) further provides: “The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, &c.; and whereas the 37th Congress did, by act, claim to confer upon the President of the United States the power, at his will and pleasure, to suspend the privileges of the writ of *Habeas Corpus* throughout the United States without limitations or conditions; and whereas the President of the United States, by proclamation, has assumed to suspend such privileges of the citizens in the loyal States; and whereas the people of such States have been subjected to arbitrary arrests without process of law, and to unrea-

sonable search and seizures, and have been denied the right to a speedy trial and investigation, and have languished in prisons at the arbitrary pleasure of the chief Executive and his military subordinates: Now, therefore—

1. *Resolved*, That no power is delegated by the Constitution of the United States, either to the legislative or executive power, to suspend the privileges of the writ of *habeas corpus* in any state loyal to the Constitution and Government not invaded, and in which the civil and judicial powers are in full operation.

2. *Resolved*, That Congress has no power under the Constitution to delegate to the President of the United States the authority to suspend the privilege of the writ of *habeas corpus*, and imprison at his pleasure, without process of law or trial, the citizens of the loyal States.

3. *Resolved*, That the assumption of the right by the Executive of the United States to deprive the citizens of such loyal States of the benefits of the writ of *habeas corpus*, and to imprison them at his pleasure, without process of law, is unworthy the progress of the age, is consistent only with a despotic power unlimited by constitutional obligations, and is wholly subversive of the elementary principles of freedom upon which the Government of the United States and of the several States is based.

4. *Resolved*, That the Judiciary Committee be instructed to prepare and report a bill to this House, protecting the rights of the citizens in the loyal States, in strict accordance with the foregoing provisions of the Constitution of the United States.

They were rejected by the following vote:

YEAS—Messrs. James C. Allen, William J. Allen, Ancona, Augustus C. Baldwin, Bliss, Brooks, James S. Brown, Chanler, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, English, Finck, Ganson, Grider, Hall, Harding, Harrington, Benjamin G. Harris, Herrick, Holman, William Johnson, Kernan, King, Knapp, Law, Le Blond, Long, Mallory, Marcy, McAllister, McDowell, McKinney, Middleton, William H. Miller, James R. Morris, Morrison, Nelson, Noble, Odell, John O'Neill, Pendleton, Perry, Radford, Samuel J. Randall, Robinson, Rogers, Ross, Scott, John B. Steele, William G. Steele, Stiles, Strouse, Sweat, Voorhees, Wadsworth, Ward, Wheeler, Chilton A. White, Joseph W. White, Winfield, and Fernando Wood—67.

NAYS—Messrs. Alley, Allison, Ames, Arnold, Ashley, John D. Baldwin, Beaman, Blaine, Blow, Boutwell, Brandegee, Broomall, William G. Brown, Ambrose W. Clark, Freeman Clarke, Clay, Cobb, Cole, Creswell, Henry Winter Davis, Thomas T. Davis, Dawes, Dixon, Donnelly, Briggs, Dumont, Eckley, Eliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Grinnell, Hale, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Jenckes, Julian, Kasson, Kelley, Francis W. Kellogg, Orlando Kellogg, Loan, Longyear, Lovejoy, Marvin, McBride, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Perham, Pike, Pomeroy, Price, William H. Randall, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Schofield, Shannon, Sloan, Smith, Smithers, Spaulding, Stevens, Thayer, Tracy, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge—90.

On Feb. 29th, Mr. Pendleton, of Ohio, offered the following resolution, and moved the previous question:

Resolved (as the sense of this House), That the military arrest, without civil warrant, and trial by military commission, without jury, of Clement L. Vallandigham, a citizen of Ohio, not in the land or naval forces of the United States, or the militia in ac-

tive service, by order of Major-Gen. Burnside, and his subsequent banishment by order of the President, executed by military force, were acts of mere arbitrary power, in palpable violation of the Constitution and laws of the United States.

It was rejected by the following vote:

YEAS—Messrs. James C. Allen, Ancona, Augustus C. Baldwin, Brooks, Chanler, Coffroth, Cox, Dawson, Dennison, Eden, Eldridge, Finck, Ganson, Harding, Harrington, Herrick, Holman, Hutchins, Kernan, Knapp, Law, Long, Marcy, McDowell, McKinney, William H. Miller, Morrison, Nelson, Noble, John O'Neill, Pendleton, Radford, Samuel J. Randall, Rogers, Ross, Scott, Stebbins, John B. Steele, William G. Steele, Stiles, Strouse, Stuart, Sweat, Voorhees, Wadsworth, Chilton A. White, and Winfield—47.

NAYS—Messrs. Alley, Allison, Anderson, Arnold, Bailey, John D. Baldwin, Baxter, Francis P. Blair, Blow, Boutwell, Boyd, Brandegee, Ambrose W. Clark, Freeman Clarke, Clay, Cobb, Cole, Creswell, Henry Winter Davis, Dawes, Deming, Dixon, Donnelly, Driggs, Dumont, Eliot, Farnsworth, Frank, Grinnell, Hale, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Jenckes, Julian, Kelley, Francis W. Kellogg, Orlando Kellogg, Loan, Marvin, McBride, McClurg, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Patterson, Perham, Pomeroy, Price, William H. Randall, John H. Rice, Schenck, Schofield, Shannon, Sloan, Smithers, Starr, Stevens, Thayer, Thomas, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge—76.

On March 21st, Mr. Eldridge, of Wisconsin, offered the following resolution:

Resolved, That the President of the United States be respectfully requested, and that the Secretary of State and the Secretary of War be directed to report and furnish to this House the names of all persons, if any there are, arrested and held in prison or confinement in any prison, fort, or other place whatsoever, for political offences, or any other alleged offence against the Government or authority of the United States, by the order, command, consent, or knowledge of them, or either of them, respectively, and who have not been charged, tried, or convicted before any civil or criminal (not military) court of the land; together with the charge against such person, or cause for such arrest and imprisonment, if there be any; and the name of the prison, fort, or place where they are severally kept or confined. Also, whether any person or persons, for any alleged like offence, have been banished or sent from the United States, or from the States not in rebellion to the rebellious States, and the names, times, alleged offence, and cause thereof: and whether with or without trial; and if tried, before what court.

It came up on April 4th, when Mr. Rollins, of New Hampshire, moved to lay it upon the table, which was ordered by the following vote:

YEAS—Messrs. Alley, Allison, Ames, Anderson, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blaine, Blow, Boyd, Broomall, William G. Brown, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Thomas T. Davis, Dixon, Driggs, Eckley, Eliot, Frank, Grinnell, Hale, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, Jenckes, Julian, Francis W. Kellogg, Longyear, McBride, McClurg, Samuel F. Miller, Moorhead, Morrill, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Price, Alexander H. Rice, Edward H. Rollins, Shannon, Spaulding, Stevens, Thayer, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne,

William B. Washburn, Wilder, Windom, and Woodbridge—62.

NAYS—Messrs. James C. Allen, Ancona, Augustus C. Baldwin, Bliss, Chanler, Cox, Cravens, Dawson, Dennison, Eden, Eldridge, English, Finck, Grider, Griswold, Harrington, Herrick, Holman, Philip Johnson, Kalbfleisch, Law, Lazear, Long, Mallory, Marcy, McKinney, Middleton, James B. Morris, Morrison, John O'Neill, Pruyn, Samuel J. Randall, Robinson, Rogers, John B. Steele, Wheeler, Chilton A. White, Winfield, and Yeaman—39.

In the Senate, on June 20th, Mr. Morrill, of Maine, offered the following bill, which was referred to the Judiciary :

Be it enacted, That upon all arrests under section 8, of chapter 200, of an act approved the 17th of July, 1862, bail shall be admitted, and such bail, on the demand of the party so arrested, may be taken before any judge of the United States, any chancellor, judge of a supreme or superior court, or chief or first judge of court of common pleas, of any State, who shall exercise their discretion therein, regarding the nature and circumstances of the offence, and of the evidence and of the usages of law.

In the Senate, on the 18th of December, the following resolution, previously offered by Mr. Sumner, was taken up from the table :

Resolved, That the following be added to the rules of the Senate: "The oath or affirmation prescribed by act of Congress of July 2, 1862, to be taken and subscribed before entering upon the duties of office, shall be taken and subscribed by every Senator in open Senate, before entering upon his duties. It shall also be taken and subscribed in the same way by the Secretary of the Senate; but the other officers of the Senate may take and subscribe it in the office of the Secretary."

Mr. Saulsbury, of Delaware, with a view to have a judicial decision of the Senate whether the oath prescribed by the act of Congress was in conformity with the Constitution, offered the following substitute :

Resolved, That the Committee on the Judiciary be instructed to inquire whether Senators and Representatives in Congress are included within the provisions of the act, entitled "An act to prescribe an oath of office, and for other purposes," approved July 2, 1862; and whether the said act is in accordance or in conflict with the Constitution of the United States.

Mr. Saulsbury said: "It was decided by the Senate, on a solemn vote, in the early history of this Government, that a Senator is not a civil officer under the Government of the United States; and the act of Congress simply provides that this oath shall be taken by officers in the civil or military service of the United States.

"Again, sir, the oath requires that a Senator (if it be held to apply to Senators) shall purge himself that he has not been in the past guilty of certain acts. Just as competent is it for the Senate to require that when a man presents himself here with all the constitutional qualifications for a seat on this floor, he shall purge himself that he has never been guilty of the commission of an assault and battery, or any other offence against either State or Federal law."

Mr. Trumbull, of Illinois, in objection, said: "I do not know, sir, that another decision upon

that subject will be any more satisfactory than the one which has already been made. The law referred to could not have been enacted without the sanction of this body; and when that law was under consideration, it was objected to as being unconstitutional. It was argued in the Senate; that point was presented; and the Senate, notwithstanding the arguments that were presented against the constitutionality of the proposed law, thought proper to pass the bill. The House of Representatives concurring, and the President approving the bill, it became the law of the land. The Senate has decided that this law is constitutional, by its passage; and it is a novel proceeding, when it becomes the duty of Senators to execute a law of the land, that in the first place they are to refer the question whether the law is the law of the land or not, to one of the committees for consideration. It is as much our duty to obey a law, as it is the duty of any other citizen in any portion of the country to do so."

Mr. Saulsbury, in reply, urged that it had never been decided by either House, or by any other tribunal, that this act of Congress did include members of either House, and said: "My colleague (Mr. Bayard) at the last session appeared in this body, took the constitutional oath, entered upon his duties as a Senator, was here in open session, was here in secret session, was here acting as a Senator after the statement deliberately made by the Senator from Illinois, the chairman of the Judiciary Committee, that those who chose to take the additional oath might take it, and those who chose not to take it need not take it. That was at a time when a debate sprang up which threatened to last several days, on the obligatory character of this oath. Then, sir, at the present session, after my colleague has acted in this body, both in public and in secret session, this order is introduced. All that my colleague asks, all that I ask, is that before he is required to take the oath, some committee of this body, or the body itself, decide that the act applies to members of the Senate and members of the House of Representatives. Is there anything unreasonable in this?"

Mr. Johnson, of Maryland, urged that two questions were presented, thus: "The first is, what is the true meaning of the act of Congress—does it, or does it not embrace members of Congress? The other is, if it does embrace members of Congress, whether Congress had the constitutional power to pass that act? Now, with reference to the first of these questions, there can be no possible objection, that I can see, to our having from the Judiciary Committee a well-considered opinion. I do not know that the proposed rule has been before any committee of the body heretofore; and I think it will tend, perhaps, to establish the construction of that act the one way or the other, so as to determine all further controversy upon the subject, if the Judiciary Committee will

take the matter into consideration, and express their own opinion, after considering as to the true operation of the act as it stands.

"Upon the other question, to which the honorable member from Illinois has referred as one over which, as he supposes, the committee has no right, and the body can give the committee no right, I submit that perhaps the chairman of the committee is mistaken. He thinks there is no authority to refer to a committee the question whether an act upon the statute-book is constitutional or not. I beg him to reconsider that opinion, and if he does I incline to think he will come to a different conclusion. The act, as long as it stands upon the statute-book, is in one sense obligatory; it is apparently the law of the land; but if, in point of law, it be repugnant to the Constitution of the United States, then it is not the law of the land; and if it should, upon investigation, be found that Congress had not authority to pass this act, Congress owes it to itself that it should repeal it."

Mr. Collamer, of Vermont, said: "The rule proposed is to give a practical construction to the act by saying that it extends to Senators, and that they shall take the oath. I at present have no opinion to express in relation to that question. That is the question, and that being the question, I understand that the Senator from Delaware desires that it may go to the Judiciary Committee. What can be the objection to that, seriously?"

Mr. Sumner, of Massachusetts, replied: Is there any Senator who is not ready at this moment to vote on the question of the constitutionality of that act of Congress? The Senate in passing the act has already given its opinion upon its constitutionality. Is there any Senator who is not ready to vote at this moment on the question whether or not that act of Congress is applicable to Senators and members of the House of Representatives? I doubt if there is any single Senator who needs any light on this question. I doubt if there is any one who has a particle of doubt upon it. There are Senators, I dare say, who have already made up their minds that the act is not constitutional, or that it is not applicable to members of this body; and there are other Senators who have made up their minds just the contrary; but I ask if there is any Senator who will confess any real doubt on the question. Some few may be one way, and others may be the other way. But whether one way or the other way, their minds are made up.

Mr. McDougall, of California said: "I know of no more grave matter that can come before the Senate than the question which is now presented to us. I can see no reason why the Senate should refuse to refer it. It is my opinion that a Senator of the United States is a constitutional officer, and that in occupying his place, he is not subject to any thing except what the Constitution dictates. That is my opinion, and it is very near my conviction; but I am

prepared to be informed by the Judiciary Committee.

The question of reference was further debated and lost—yeas, 15; nays, 26. The postponement of the subject for a few days was then carried.

On the 21st the question came up again, and on a motion to postpone, Mr. Bayard, of Delaware, stated the facts relative to the original bill and the proceedings under it, and desired a further postponement, to prepare his views on the question of law. A further postponement was made, after urgent objections by Mr. Sumner, to the 19th of January, when Mr. Bayard addressed the Senate. He said: "As I am the only member of the Senate present at this session who has not taken the oath, it is but a rational inference that the rule now proposed is intended to operate personally upon me, although I was sworn in at the special session and acted as a Senator both on committees and in the Senate since my reelection in March last for the term of six years, ending on the 3d of March, 1869. In the objections, however, which I have to present to this proposed rule, I shall consider it without reference to any personal effect it may have upon my own action.

"The adoption or rejection of this rule involves two general questions: First, is the action on which it professes to be founded repugnant to the Federal Constitution, or is it within the powers delegated to Congress? Second, is a member of the Senate included by its provisions when construed according to the language and meaning of the Federal Constitution?"

"This act of July 2, 1862, is repugnant to at least three, I think four, provisions of the Federal Constitution. It is invalid because it prescribes a further qualification for a member of Congress before entering upon the performance of his duties. This was the question, and the only question, argued before the passage of the law, or noticed in the debate.

"The third clause of the third section of article one of the Constitution prescribes the qualifications of a Senator—age, residence, and citizenship: the age thirty years; residence at the time of election in the State which elects him; and citizenship for nine years preceding the election. The third clause of the sixth article requires that Senators and Representatives shall be bound by oath or affirmation to support the Constitution. Does this provision admit any oath varying in substance from the oath so required? It has been admitted, and indeed cannot well be denied, than no oath other than that of which the form is prescribed in the Constitution can be imposed upon the President of the United States; and upon the same principle the substance of the oath prescribed for Senators and Representatives, and members of the State Legislatures, and all officers of the States as well as of the United States, must be adhered to, though Congress

may unquestionably prescribe the form in which it is to be administered. Variations of form are quite immaterial. The form adopted originally was prescribed by the first act of the first Congress of the United States, and will be found at page 23 of the first volume of the Statutes at Large. I refer to it both for its simplicity and to show the views which that body took of the authority they were exercising, that it was merely the prescription of the form of an oath required by the Constitution. The first section is:

That the oath or affirmation required by the sixth article of the Constitution of the United States shall be administered in the form following, to wit: "I, A B, do solemnly swear or affirm (as the case may be) that I will support the Constitution of the United States.

"The power assumed in that act was merely to prescribe the form of the oath required by the Constitution, by legislation, and that power is not questioned. I cannot doubt that as regards members of Congress either House might have prescribed the form by its own resolution; but for the sake of uniformity, as the oath is required by the Constitution, of course it was wiser that a general provision should be made by legislation. Indeed, this law recognizes the fact that either House would have possessed that authority, because it provides that the oath shall be administered within three days to every member, and also to the members and the Speaker of the House of Representatives, who had not taken a similar oath by virtue of a resolution of the House.

"The second objection to the constitutionality of this act is that it is in conflict with the fifth article of the amendments to the Constitution of the United States. The fifth article of the amendments to the Constitution provides that—

No person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall he be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law.

"Mr. President, this article is a restriction upon power, intended to secure individual rights against the aggressions of Government, as, indeed, are all the first ten amendments adopted immediately after the formation of the Constitution. In one form or another, similar limitations of power have been incorporated into the constitution of every State in this Union. The principle comes to us from *Magna Charta*, though in England it is but a restraint on the Crown, Parliament, in their theory of government, being the ultimate power and omnipotent; but in this country we hold that the sovereignty is in the people, and both in the General and State governments limitations upon power apply to all branches of govern-

ment. The limitation in this article is one of the great guarantees of civil liberty in free governments, and should be liberally expounded. If those guarantees are to be frittered away by a narrow construction, then indeed will written constitutions, which in the past have been the pride and glory of American statesmen and the American people, become unmeaning nullities and the frailest of barriers against the encroachments of despotism and tyranny.

"By this act of 1862 every one who is required to take the oath it prescribes is 'held to answer' for a capital crime; and if he refuses, whether guilty or not guilty, the law assumes for its own purposes his guilt, and punishes him by disqualification and a refusal of his rights. He is deprived of those rights without due process of law. The legal presumption of innocence is reversed as to every citizen, and this law, without accusation, without trial, without proof, and without conviction, inflicts punishment as a consequence of silence. It seeks to ascertain facts in a peculiar manner unknown to the common law, and prohibited by the Constitution, not by the judgment of a court of competent jurisdiction, but by a forced confession of the offender, and holds his silence as evidence of guilt. No matter how legitimate or desirable the object to be attained—the exclusion of persons guilty of treason from Congress—such means of effecting it are repugnant to the Constitution, and cannot, therefore, be lawfully used.

"But, sir, there is still a third objection to this act. The act is repugnant to the second section of the second article of the Constitution. By the second section of the second article of the Constitution the pardoning power is vested exclusively in the President of the United States:

He shall have power to grant reprieves and pardons for offences against the United States, except in cases of impeachment.

"It is an executive authority, exclusively in the President, and the effect of the pardon is that it absolves the party from all the consequences of his crime, and when pardoned he stands with the same rights as if the crime had never been committed. I am supposing a case where a party has really been guilty of these offences, and of course could not take this oath, and yet has been pardoned by the President. While I would oppose the Executive in any encroachments upon the power of the Legislature or the assumption of any powers not granted to him, I would equally sustain him in the exercise of all the authority which has been delegated to him by the Constitution. Suppose a southern citizen who has voluntarily borne arms against the United States during this revolt, becoming convinced of his error while the war continues, should return to his allegiance, and be pardoned by the President, and be elected to the Senate by a Legislature whose authority to elect you recognized. He

certainly could not take this oath without being guilty of perjury, and therefore, in effect, this law impairs and abrogates the pardoning power of the President to that extent. Is that constitutional? Can you obstruct by legislation of this kind, direct or indirect, the legal effect of a power which is vested in the executive branch and not in the legislative branch of the Government? This law punishes the member elect, in defiance of the executive pardon, by disqualification for the office or trust to which he has been legally and constitutionally elected.

"There is a still further and fourth objection to the validity of this law. By the Constitution of the United States no *ex post facto* law can be passed; and yet by the imposition of this oath you prescribe the penalty of disqualification for office as the punishment for a crime committed before the passage of the law, though it was subject to no such punishment at the time of its commission.

"I have closed with the objections I have to make to the constitutionality of the act of 1862, and proceed now to the discussion of the second question which I stated. The answer to that question depends upon another, whether a Senator or Representative is a civil officer or holds a civil office within the meaning of the Federal Constitution. This question became a subject of inquiry early in the history of the country, on the impeachment of William Blount by the House of Representatives in the year 1798; and it was decided then by the Senate on a plea to the jurisdiction on the 11th of January, 1790."

This case was cited at some length by the Senator, and reference made to the Constitution as sustaining the decision of the Senate, that a Senator was not a civil officer. He then concluded as follows:

"Mr. President, I have now concluded my argument against the validity of the act of July 2, 1862, and the rule proposed under it. The oath prescribed in that act has been frequently designated as 'the oath of loyalty'; and doubtless there are those who may consider my declining to take that oath as evidence of disloyalty. The words 'loyal' and 'loyalty' have become familiar terms during the progress of this disastrous civil war. I will not pause to inquire whether loyalty in its usual acceptation is not more appropriate to the relations and personal devotion of a subject to his prince than of a citizen to his Government in a republic. Accepting the term as applicable, I define loyalty in a Government such as ours—a representative Republic—to mean a steadfast adherence to the Constitution or organic law under which and by virtue of the adoption of which by the people of the several States the Government was established; a cheerful and ready obedience to all laws passed in pursuance of that Constitution; and a devoted and ardent support of those guarantees of civil liberty which it was a primary

object with its framers to maintain and perpetuate, and thus 'secure to themselves and their posterity the blessings of liberty.' I have sworn to support that Constitution; and as I believe that the rule proposed and the law which it is intended to enforce are repugnant to its provisions, I call upon the tribunal which has exclusive jurisdiction of all questions affecting the elections, returns, and qualifications of its members, to decide judicially whether the act is constitutional, and give to it its proper legal construction. If it be disloyal to support the Constitution of my country, then I cheerfully accept the imputation of disloyalty; but if made on any other ground, I shall meet it with calm contempt."

Mr. Collamer, of Vermont, followed, saying: "In 1862, at the time of the passage of this act, there were a variety of laws relating to the subject of treason, and its effect upon this Government. The attempts to remedy it were all begun in their incipient stages independent of each other. Some of them were passed at one period and some at another. Some of the statutes which were commenced first, were ultimately passed after many others that were commenced afterward; but in ascertaining their purpose and purport, I take it, we must look to them all as *in pari materia*."

"Now, what was our trouble which was intended, in some measure, to be corrected by these laws, this one among the others? I do not intend to occupy a great deal of time in undertaking a description of our condition at that time. Up to the year 1861, and for several months in that year, men occupied seats in this Senate and in the other House, but especially in this Chamber, who disclaimed all allegiance to our Government, who claimed the right to dismember that Government, as a constitutional right, who set on foot plans to execute these purposes, and who openly declared such to be their purposes. They were a body of men distinguished for ability, domineering over the party of which they were in a great measure a majority, and which party was the dominant party of the Senate. They did this defiantly, menacingly, superciliously. This was the arena on which they put forth all their gladiatorial efforts of treason."

"The time finally came when those men departed from this Chamber, and from this city, as Catiline did from Rome, to go into the country and carry into effect by blood the conspiracy which they here concocted. They did go, and we soon learned, before the year 1862, that they did put in operation these their combinations, and that their hands were red with the blood of our people."

"The question at once arose in this body, how can this country be secured against the repetition of this? Those men, and men like them, must be put out of this body, and they must be kept out of this body. No other course could secure the country. Whenever the opportunity occurred, whenever the ma-

jeoity was obtained by those whom they had left here, and by the places which were filled by the people, those men were expelled from the body.

"The next question is, how are they to be kept out? It is clear, sir—it is not necessary that I should take up your time in proving that—if the interests of this Government are to be put into the keeping of men who avow their enmity to its existence, and who boldly plot its destruction, it is utterly impossible that that Government can long exist. If men of that character and men of that conduct can have seats and retain seats here, then there is an end of this Government. If the Constitution is so framed that it is subject to this infirmity incurably, it is an abortion, it is a total failure; and if any construction can be given to this Constitution which, in practical application, can produce this effect, it is as much a destruction of this Government as secession is.

"Such was our condition, and such were the demands upon us. It became necessary to inquire what was the mode of correction. It was quite evident that the taking of an oath to support the Constitution did not amount to any correction. All those men had that oath on them, and it furnished no sufficient security. The Constitution provided that a man should have certain qualifications in order to be admitted as a Senator; that he should be thirty years of age, a citizen of the United States for nine years, and a resident of the State electing him. If no other qualifications or disqualifications could by any possibility be framed and constitutionally executed, then those men were entitled to have their seats here if they could but get here, and, if entitled to take them, entitled to keep them. The question then returned directly on the mind is, is it true that such is the Constitution of this Government that you can have no other qualifications or disqualifications than those mentioned in the Constitution? If you have no others, then clearly it was subject to the infirmity of which I have spoken."

Mr. Hendricks, of Indiana, in reply said: "Whoever comes here, being duly elected, and having the qualifications prescribed by the Constitution, has a right to his seat, and his State may well demand it for him. The right of his State to be represented by him is conferred by the Constitution, and cannot be denied or impaired by any rule of this body or by any act of Congress. I will not stop to inquire whether the language of the act, considered in the light of established rules of construction and of adjudged cases, includes Senators and Representatives; but will maintain that if construed to include them, it is so far in conflict with the Constitution, and null and void. Nor will I stop to question that terms may be added to the oath of obedience to the Constitution required of all officers, but such additional terms cannot add to or take from the qualifications prescribed by the Constitution.

The Constitution provides that 'no person shall be a Senator who shall not have attained the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.' A person not thirty years of age, or who has not been nine years a citizen, or who is not an inhabitant of the State for which he is chosen, is not qualified to be a Senator, but all other persons are qualified, and there is no power in the Government to disqualify or render them ineligible. By declaring these three circumstances of disqualification, touching the age, citizenship, and residence of the party, the Constitution excludes every other disqualification. The rule of construction is well stated by Story in his work on the Constitution. He says:

It would seem but fair reasoning, upon the plainest principles of interpretation, that when the Constitution established certain qualifications as necessary for office, it meant to exclude all others as prerequisites. From the very nature of such a provision, the affirmation of these qualifications would seem to imply a negative of all others. * * * A power to add new qualifications is certainly equivalent to a power to vary them.

"The Senator from Illinois (Mr. Trumbull) cited the oath required of United States judges by the judiciary act of 1789, and claimed it as a conclusive precedent and authority upon the question. With great deference to that gentleman, both because of his conceded ability as a jurist, and because of his position in this body at the head of the Judiciary Committee, I cannot admit that he has found either a precedent or an authority for the measure he now advocates. It is true that the Constitution requires the judges to take an oath of obedience to it; and it is also true that the act of 1789 adds terms to that oath; but has it escaped the attention of the Senator that the oath of office required of the judges is in no respect retrospective, but is altogether prospective, and looks only to a faithful discharge of the duties of their high office? By the terms of that oath no qualifications are superadded to the qualifications prescribed by the Constitution, and no persons are by it excluded from the bench who are eligible under the Constitution. When a judge of the United States courts swears that he will obey the Constitution, and 'will administer justice without respect to persons; and do equal right to the poor and the rich, and impartially discharge and perform all the duties incumbent upon him,' he gives a solemn assurance of official fidelity in the future, but he looks not over his past life; nor is he required to forswear either follies, faults, or crimes. He is not denied the office because he cannot swear that he is without fault in respect to the law, the Constitution, or, it may be, his allegiance.

"But, sir, the measure now before the Senate is almost if not altogether otherwise. It is not prospective, nor does it seek to secure fidelity in office; but for the most part is re-

tropective, and seeks to exclude from seats in this Chamber persons who are not excluded by the Constitution, and to establish disqualifications unknown to that instrument.

"It cannot be said that the proposed rule requires an oath but does not prescribe a qualification, for, if the oath be required, an entire class is excluded; as effectually excluded as if the cause were interpolated among the disqualifications prescribed in the Constitution. Could this body by a rule, or Congress by a law, require Senators before taking their seats to take an oath that they were over forty years of age, or that they have been twenty-one years citizens of the United States? All will agree that it could not be done. And why not, sir? For the obvious reason that it would be going beyond the constitutional disqualifications, and attempting to exclude classes not excluded by that instrument.

"The measure before the Senate is proposed by the Senator from Massachusetts (Mr. Sumner). Will that Senator allow me to remind him that when he took his seat in this body, twelve years ago, Senators of his political views were in a small minority; that both branches of Congress were controlled by men who, standing upon the adjudications of every department of the Government, believed that the Constitution not only allowed but required legislation on the part of Congress securing the return of fugitive slaves; and that good faith, as well as the harmony of the sections and the unity of the Republic, required that the laws enacted for that purpose should be faithfully executed. As I understand, that Senator came with avowed convictions adverse to the constitutional power of Congress to enact laws upon that subject, and disclaiming all obligation on the part of the citizen to aid in their enforcement. Now, sir, had Congress by law, or the Senate by a rule, required that Senator, before taking his seat, by solemn oath or affirmation to declare that in the past he had given no countenance, counsel, or encouragement to persons engaged in resisting the execution of the fugitive slave laws, and that in the future he would be loyal to their requirements and obligations, what course would the honorable Senator then have felt it his duty to pursue? If animated by the lofty sentiments of the great men his State has produced, he would have returned to her and at her feet laid down the commission she had put into his hands, and the robes of office she had placed upon his shoulders, and made report to her that he had been denied his seat in a 'Senate of equals;' that terms had been required of him unknown to the Constitution; and that it was for the ancient Commonwealth to maintain her Federal rights and equality, and to vindicate her wounded honor. To resist the laws of the United States in South Carolina is a grievous crime; but, sir, is it any less a crime in Massachusetts? The act in either State disturbs the foundations of public authority; and,

upon principle, as well may test oaths and solemn disclaimers of crime be required of Senators from the one State as from the other. As a question of constitutional right, he who comes here, being duly chosen by a sovereign State, and having the constitutional qualifications, is entitled to demand his seat, and to deny it is to break the Federal compact.

"The proposition before the Senate, Mr. President, involves other and quite as important considerations. It reaches to questions involved in the reorganization and reconstruction of the Federal Union. This war cannot continue forever. The time will come when it shall have ceased to agitate the world, leaving, it may be, scenes of desolation to mar the face of our country; society distracted; and, scattered upon every side, the broken 'columns and arches' of our institutions. Then will arise the questions that appertain to a state and condition of peace. To restore and reestablish will then be the duty of the statesman. Is it not well now, sir, to anticipate that condition of our affairs, and to avoid that which may render the duty and labor of reconstruction more difficult?"

Mr. Johnson, of Maryland, followed in opposition. He said: "Mr. President, the resolution upon your table, as I understand it, offers for the consideration of the Senate three questions. The first is, whether the act of July 2d, 1862, requiring an oath to be taken by certain officers of the Government, includes Senators. The second is, if it does include Senators, whether to that extent it is constitutional. The third is, whether, if it has not operation by its own force but is to become operative only by the Senate's adopting the rule which forms the subject of the resolution upon your table, it is expedient to adopt it.

"Does that act embrace the case of a Senator? Now, if there be any principle established as a principle of sound constitutional law, without which the Government cannot progress satisfactorily, beneficially, it is that these questions, when they arise, or any questions of constitutional law when they have arisen and have been decided, and the decision has been acquiesced in by every department of the Government, are to be considered as finally decided. I do not mean, Mr. President, that it is upon the ground that such a decision has the authority of a judicial judgment, binding as authority upon all succeeding judicial functionaries; but I mean to say that the law of expediency, the law of propriety, the law of safety, looking to the wholesome administration of the Government, demands that when questions of that sort have been so decided, and for years acquiesced in, they should be considered as settled. In the case of Blount (I shall not occupy the time of the Senate by taking up the book) the very question was presented, is a Senator of the United States an officer within the meaning of that clause of the Constitution of the United States which pro-

vides for the impeachment of officers? and the Senate, by a vote of 14 to 11, after an argument of great power, *pro* and *con*, by the managers upon the part of the House of Representatives, Messrs. Bayard and Harper, and by the counsel for the accused, decided that he was not; and from that day to this there has not only been expressed no opinion to the contrary entitled to be considered as authority, but, as far as any opinion has been expressed, it has been in accordance with that precedent.

"But further, to proceed with the question, let us consider it as now for the first time before the Senate. Is a Senator a civil officer? The language of the statute in that respect is precisely the same as is the language of the clause providing for impeachments in the Constitution itself. What 'civil officer' means in the one, the same term means in the other. Let me call the attention of Senators, not at length, but very briefly, to such clauses as I suppose bear upon the particular question. The question for us to decide is, is a Senator or a Representative in the other House the occupant of a civil office, or a civil officer within the meaning of the Constitution? I say he is not. The Senator from Vermont (Mr. Collamer) says, but did not attempt to prove it as far as I heard, that he is. The sixth section of the first article of the Constitution contains this provision:

No Senator or Representative shall during the time for which he was elected, be appointed to any civil office under the authority of the United States.

"Now, stopping there, as we see, the words 'Senator or Representative,' or the Senator or the Representative, is spoken of in contradistinction to every other office. If it had been in the view of the Convention to place, with reference to this clause, Senators and Representatives upon the same footing with all others, and according to their view they were civil officers, then all that would have been necessary would be to say that no one during the time for which he hold his office shall be appointed to any other office. Such is not the language. The prohibition is upon the Senator or Representative in that character, not as an officer, not as holding a civil office, but in his character of Senator or Representative as contradistinguished from a civil office, according to the terms of the Constitution; and it therefore provides, as they were obliged to provide, if their meaning was, as I suppose it to have been, that he should not be appointed to any civil office.

"But the conclusion of the paragraph makes it, as I think, still more obvious:

And no person holding any office under the United States shall be a member of either House during his continuance in office.

"Now, what is the meaning of the term 'holding any office' as here used? Is it that the word 'office' was used for the purpose of including a Senator or Representative? Then the provision would have been absurd, because as Senator or Representative he is then holding

an office. Was it the purpose to say that he should not hold any other office. If it had been, and they considered a Senator or Representative as the incumbent of an office, then the provision would have been that he should not hold any other office under the United States. But the provision being that he shall not hold any office under the United States, as I think conclusively demonstrates that, in the view of the Convention, the term 'office' was not designed to include a Senator or Representative; and for the same reason the term 'Senator or Representative' was not intended to include the same thing as the term 'office;' in other words, that in the judgment of the Convention the two were entirely separate.

"But that is not the only clause. The eighth clause of the ninth section of the first article provides:

And no person holding any office of profit or trust under them, shall, without the consent of the Congress, accept of any present, &c.

"Drawing a distinction, as I think, evidently between the Congress of the United States, the Senators and Representatives who constitute the Congress of the United States, and those who hold offices under the appointing power which the Government contains.

"But again, sir, the second paragraph in the first section of the second article contains a clause which is pregnant with instruction upon this question:

Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.

"Here, as in the former instance, the distinction is kept up, and the term 'Senator or Representative' is used not as equivalent to, or identical with, the term 'person holding an office,' but as standing in a different relation to the Government, and Senators and Representatives are included in the disqualification—no ingenuity can suggest a different reason—because, in the opinion of the Convention, if they had not been specially mentioned they might have been electors.

"So, again, in the second section of the same article, it contains provisions for the appointment of officers under the United States. It says that the President shall have power, by and with the advice and consent of the Senate, to appoint 'ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States.'

"The third section provides that all officers of the United States are to be commissioned by him. The language of the concluding part of that section being—

He (the President) shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

"Now, Mr. President, when we come to the

immediate succeeding section, which gives the power to impeach, we find the language to be—

The President, Vice-President, and all civil officers of the United States, shall be removed from office on impeachment.

Why were the President and Vice-President included in this impeaching clause? What was the necessity for it? If it be true that they were civil officers, why would it not have been sufficient to say, 'All civil officers of the United States shall be removed from office on impeachment?' Can any other reason be given than that which I have suggested in relation to the other clauses; that it was because the Convention did not esteem the President and Vice-President civil officers; but intended by the term 'civil officers,' as here found, to exclude all who are not appointed officers under the Constitution; and because the President of the United States is elected by the people, and the Vice-President is elected by the people, and it was desirable, upon grounds of public policy, to subject them to the impeaching powers of Congress, they are inserted; but the *insertio unius est exclusio alterius* is a familiar rule of interpretation. Their insertion demonstrates that in the intentment of the Convention they were not civil officers, and the omission to insert Senators and Representatives in the same clause demonstrates that it was not the purpose of the Convention to subject Senators or Representatives to the same clause; and we can very readily, as I think, see the reasons for the distinction.

"How do we get here? By any appointment under the Government of the United States? Certainly not. We owe our appointment to our respective State Legislatures by the very terms of the Constitution, and we could not derive it from any other quarter. How do the Representatives get into the opposite Chamber? By the election of the people, and in no other way. They are therefore a part of the Government, to administer the Government, holding their offices paramount to the Government, by a title superior to any thing to be found in the Constitution which creates the Government, and they are intended to be responsible only to the appointing power—the Legislatures in the first case, the constituents of Senators; and the people in the other case, the constituents of the members.

"What is the Senate of the United States? Is each member of the Senate the Senate? Certainly not. In what, then, does the Senate consist? What is it? It is a body of men (and so of the House); numerous because obliged to be numerous, but constituting but one body—a Senate—deriving their powers not under but by the Constitution; holding them not subject to any other power except the restraints to be found in the Constitution; bound to yield obedience to no other department of the Government, except so far as they are made immediately amenable by constitutional provision. Has the President of the United States any

authority to call in question the conduct of the Senate? Certainly not. Have the House of Representatives any authority to call it in question? Certainly not. Why? Because we constitute a coördinate department of the Government, existing by virtue of a higher power, or as high a power as that which brings into existence the President or the House of Representatives, and entitled to stand exempt from all right of challenge.

"I have said now, Mr. President, as much as I propose to say on the first of these questions. Next as to the second. I do not know why the Senator from Massachusetts thinks it is necessary to incorporate the provisions of this law in the form of a rule. If he supposes that the law would have no operation until it becomes a rule of the Senate, the proposition which he presents is more liable to objection than the one which I am about to argue; for, however true it may be that Congress in its legislative capacity may impose an oath other than that which the Constitution proposes to Senators of the United States, I suppose no one will contend, except the Senator from Massachusetts—if he holds that opinion, and I do now know that he does—that it is in the power of the Senate by any such rule to require any such additional oath. If it is not, then your proposed rule is altogether unnecessary. If the law does not operate by its own terms it cannot operate at all. If, as the Presiding Officer of this body, it is not your duty, sir, to administer this oath because of the law, as it is to administer the oath prescribed by the Constitution, you cannot get the authority to administer it by the mere adoption of a resolution.

"Now, what is the oath required by the Constitution? An oath to support the Constitution of the United States. When? Then, when taken, and for all time thereafter. Not an oath that they had from the beginning supported it. Not an oath negatively denying that they had committed any act which would have been hostile to the Constitution of the United States in the past, but an oath dealing with the present and the future, that now and hereafter I will support the Constitution. Suppose the oath is taken; that is one way to test it. Suppose the oath is taken and the man is loyal now, repentant of his past offence, aroused to the necessity of allegiance, loyal now and continues loyal, would you turn him out by an indictment for perjury for the violation of that oath upon proving that he had at some antecedent time committed the offence of treason against the United States? Everybody will say not. Whether they were wise or unwise in making the oath of allegiance to commence at the period when it is taken and to date thereafter, or whether it would have been better to make it retroactive, is a matter with which the Senate have nothing to do. That was a question before the Convention. The Convention had a right to decide for itself, and the people had a right to decide for themselves

when they adopted it, what kind of oath they would require; and if they required an oath binding only to present and future obedience, I should like to see any reason upon which the authority can be placed, that Congress can require an oath more than coextensive, inconsistent with that oath of office."

Mr. Sumner, of Massachusetts, on the 25th of January, in reply, said: "There is a time for all things; but there are times when certain things are out of place, and this principle is especially applicable to the present debate. The question is on the adoption of a rule of the Senate to carry out an existing statute. It is not on the passage of the statute or on its proposed repeal, but it is simply on its recognition as an existing statute, and the enforcement of its plain requirement. Considering the simplicity of the question, we may well be astonished at much that has been intruded into this debate.

"The Senate is a branch of the legislative power, in conjunction with the House of Representatives and the President. Neither of these branches alone, can make a law or unmake a law. The concurrence of all three is essential to a valid act of legislation. And as it takes all three to make a law, so it takes all three to unmake a law. So long as the law exists, there is no difference between the obligations of the Senate and the obligations of the humblest citizen—except, perhaps, that the Senate, which helped to make the law, is bound to set an example of obedience beyond any citizen.

"Therefore I put aside as entirely irrelevant much that we have heard against the proposed rule. This is not the time to say that the oath is unconstitutional, or that it is *ex post facto*. These are considerations properly arising on the passage of the statute, or on a proposition for its repeal. The Senator from Delaware (Mr. Bayard) and the Senator from Maryland (Mr. Johnson), who have argued these topics so exhaustively, were either too late or too early. The statute is already the law of the land, and there is no new bill introduced for its repeal.

"Putting aside the irrelevant matter which has been introduced, and presenting the single point in issue, the question becomes too plain for argument. It is simply this: Will the Senate obey an existing statute? And this question opens another: What is the meaning of the statute?

"That the Senate will openly refuse obedience to an existing statute, recently enacted in support of loyalty, is not to be supposed without an impeachment of the loyalty of the Senate. It is only because the question of obedience has been complicated with other questions, that there has been for a moment any doubt on this head. Clearly, the Senate will not disobey an existing statute. It is then on the statute alone, and nothing else, that any question can arise.

"And here I ask leave to recall the Senate from the learned commentary and elaborate

diversion of the Senator from Delaware. The actual question is one which may be treated without learning and without effort. It arises on the following words of the statute:

Hereafter every person *elected* or appointed to any office of honor or profit under the Government of the United States, *either in the civil, military, or naval departments of the public service*, excepting the President of the United States, shall, before entering upon the duties of *such office*, and before being entitled to any of the salary or other emoluments thereof, take and subscribe the following oath or affirmation [here follows the oath]; which said oath, so taken and signed, shall be preserved among the files of the Court, *House of Congress*, or Department to which the said office may appertain—12 Statutes at Large, p. 502.

"It will be observed here, that the language is plain rather than technical. Every person 'elected' or 'appointed' to any 'office' in the 'civil, military, or naval department of the public service,' must take the oath. What words could be broader than 'departments' and 'public service'?

"Obviously, and beyond all question, a Senator is 'elected.' Therefore on this point there is no question.

"The inquiry recurs, is a Senator an 'officer' in the 'civil department of the public service'?

"Is he an 'officer'?

"Is he in the 'civil department'?

"It seems absurd to raise these questions, but I have not raised them. This has been done by others. You might as well raise the questions, if a man is a creature, and belongs to the human family.

"But let us look at these questions in their order.

"1. Is a Senator an 'officer?' Here please to look at the dictionary. I turn to Webster:

"OFFICE.—'Offices are civil, judicial, ministerial, executive, legislative, political, municipal, diplomatic, military, ecclesiastical,' &c.—Webster.

"Thus, plainly offices are legislative. But why summon the dictionary? And yet the zeal of the other side seems to leave me no alternative.

"Not content with the dictionary, I call your attention to the use of the word in other authoritative places, and pardon me if I begin with the constitution of Massachusetts, written originally by John Adams.

"In the bill of rights of the constitution of Massachusetts, section five, it is declared:

All power residing originally in the people and being derived from them, the several magistrates and officers of government, whether legislative, executive, or judicial, are their substitutes and agents, and are at all times accountable to them.

"Here are members of the Legislature classed among officers, and thus this word received its interpretation.

"In another part of this same constitution it is provided:

Any person chosen Governor or Lieutenant-Governor, Counsellor, Senator, or Representative, and accepting the trust, shall, before he proceed to execute

the duties of his *place* or *office*, take and subscribe the following declaration.

"Here the *place* or *trust* of a *Senator* or *Representative*, is called an *office*. But this same use of these terms as synonymous and as applicable to the post of *Senator* and *Representative* is continued, as follows:

Every person chosen to either of the places or *offices* aforesaid (meaning the *offices* of Governor, Lieutenant-Governor, *Senator*, or *Representative*), shall, before he enters on the discharge of the business of his *place* or *office*, take and subscribe, &c.

"The authority of New Hampshire is like that of Massachusetts. Her constitution declares:

All power residing originally in, and being derived from the people, all the magistrates and *officers* of government are their substitutes and agents, and at all times accountable to them.

"Here the word *officers* obviously means the *substitutes* and *agents* of the people. But who are substitutes and agents of the people more than *Senators*?

"Then again in the same constitution it is declared:

No *office* or place whatsoever in Government shall be hereditary.

"Here the word '*office*' is made synonymous with '*place*.'

The constitution of Vermont testifies as follows:

All power being originally invested in and consequently derived from the people, therefore all *officers* of government, whether *legislative* or executive, are their trustees.

"Thus in Vermont, members of the Legislature are '*officers*.'

"The constitution of New Jersey testifies also, in the clause prescribing the qualifications which shall entitle a person to vote:

For representatives in Council and Assembly, and also for all other public *officers* that shall be elected by the people of the county at large.

"Here, again, members of the *Legislature* are treated as '*public officers*.'

"The constitution of Pennsylvania testifies as follows:

Members of the General Assembly and all *officers*, executive and judicial, shall be bound by oath or affirmation to support the constitution of this Commonwealth, and to perform the duties of their respective *offices* with fidelity.

"Here members of the General Assembly are classed with those '*holding offices*.'

"The original constitution of New York is more positive. Here are the words:

The chancellor and judges of the Supreme Court shall not hold any other *office* except that of Delegate to the general Congress upon special occasions; and the first judges of the county courts in the several counties shall not, at the same time, hold any other *office*, except that of *Senator* or Delegate to the general Congress.

"Here the post of a Delegate to the general Congress, and also of a '*Senator*,' is treated as an '*office*.'

"Surely here is enough on this head. The post of *Senator* is an office of honor or profit, and a '*Senator*' is an '*officer*.'

"2. But assuming that the post of *Senator* is an '*office*,' and that a *Senator* is an '*officer*,' the question occurs, to what '*department* of the public service' does he belong?

"Clearly he is not of the '*military*' or '*naval*' department. But if not '*military*' or '*naval*,' he must be '*civil*.' Here again consult the dictionary:

"CIVIL.—'It is distinguished from *ecclesiastical*, which respects the church, and from *military*, which respects the army and navy.' 'This term is often employed in contrast with *military*, as, a *civil* hospital; the *civil* service.'

"CIVIL LIST.—'In England, formerly a list of the entire expenses of the *civil* government; hence the officers of *civil* government, who are paid from the public treasury; also, the revenue appropriated to support the *civil* government.'

"CIVIL STATE.—'The whole body of the laity or citizens not included under the military, maritime, and ecclesiastical states.'—Webster.

"To say that a *Senator* is not included under this comprehensive but distinctive term, is simply an absurdity.

"It is evident that Congress adopted the words of the statute because they were comprehensive and distinctive. They obviously comprehended all '*officers*' in the '*public service*,' whether '*elected*' like a *Senator*, or '*appointed*' like a judge. But, beyond their plainness, these words had this added advantage, that already for more than a generation, they had received a practical interpretation from Congress.

"Here is the Blue Book, so familiar to our hands. Its title-page begins as follows:

Register of *officers* and *agents*, *civil*, military, and naval, in the service of the United States.

"If we turn to the contents, we shall find in this list members of Congress, including *Senators* and *Representatives*, with the '*officers* and *agents*' of the two Houses.

"If we go back to the Blue Book for 1820, which is now in my hands, we shall find the same title, and the same enumeration of *Senators* and *Representatives*.

"This Blue Book is still published in pursuance of a joint resolution by Congress, originally adopted as long ago as 27th April, 1816, with the following title:

Resolution requiring the Secretary of State to compile and print, once in every two years, a register of all *officers* and *agents*, *civil*, military, and naval, in the service of the United States.

"If *Senators* can properly be included in such a register, it is only as belonging to the '*civil* department of the public service,' which is precisely where they have been placed by the recent act of Congress.

"The only apology for the objection which has been urged from the beginning of this debate with so much pertinacity, is founded on the case of Mr. Blount, the *Senator* expelled and afterwards impeached, at the close of the last century. I shall not take time to consider

this case. It has already been amply done by others. On former occasions I have done it at length. And yet I will not leave it without protesting again that it is absolutely inapplicable to the present occasion. If that case were out of the way, nobody would have thought of saying that a 'Senator' was not an 'officer' in the civil department of the public service.' Now, what did this case decide? Let another give the summary. I quote the words of Mr. Wharton, in the notes to his edition of the State Trials:

In a legal point of view, all that this case decides is that a Senator of the United States, who has been expelled from his seat, is not, after such expulsion, subject to impeachment; and perhaps from this, the broader proposition may be drawn, that none are liable to impeachment except officers of the Government, in the technical sense, excluding thereby members of the national Legislature.—Page 317, note.

"The case of Mr. Blount has no application to the present question. It is not an interpretation of the statute, and so far as it illustrates the Constitution, it simply concerns the liability to impeachment. But even this case has often been drawn into doubt. And if we look into the proceedings of the time, we shall find that the decision, such as it was, encountered an able and earnest opposition.

"But whatever may be the signification of this word in the Constitution, even conceding all that is claimed for it there, the instance is entirely inapplicable to the interpretation of the statute in question. If there be any doubt on the Constitution, there is none on the statute. The latter is plain, and there are no associate words to interfere with its natural and unequivocal signification.

"I conclude this branch of the subject as I began, by putting aside all irrelevant matter—all supernumerary questions—all surpluses—all topics which are not properly germane to this debate. There is no question of the Constitution—no question of *ex post facto*—but a simple question on the meaning of a statute.

"The oath has been prescribed by Congress. It is too late to debate its constitutionality thus incidentally. It only remains for us to obey it; promptly, swiftly, patriotically. The procrastination of this debate is of evil example to the country. How can we expect the alacrity of loyalty among the people if the Senate hesitates?"

Mr. Johnson, of Maryland, in reply said: "Now, Mr. President, there are two questions upon which I have but a single remark or two to make before ceasing to trouble the Senate at all in this debate. The first is, whether the act of July 2, 1862, embraces a Senator. The honorable member from Massachusetts bolsters up, or seeks to bolster up, his view of that question by referring us to the constitutions of the several States, and the laws of the several States which have been passed in pursuance of those constitutions—not a legitimate source of argument, as I think, as far as the particular question is concerned. The question before

the Senate is, what is the meaning of the words 'civil officer,' as found in the Constitution of the United States, with reference to this question? That must be ascertained, as I humbly suggest to the honorable member from Massachusetts, by looking to the Constitution itself; nor is it to be ascertained by going to Webster, and conning from Webster the various significations that he attaches to the particular word. The interpretation of that word is in the Constitution. The Constitution is its own interpreter, and must be its own interpreter, unless we are willing to run the hazard of being wrong. The reason why, as I suppose, and those who agree with me have supposed heretofore, that the words 'civil officer' do not embrace a Senator, as those words are used in this act of Congress, is, that a Senator is not an officer under the Government, but above the Government; he does not derive his authority from the Government, but from the creators of the Government; his commission comes from his State, and his State issues the commission to him under the authority of the Constitution. He is a part of the Government, and not an officer holding a commission or exercising any authority under the Government in the sense which this debate involves."

The resolution was adopted by the following vote:

YEAS—Messrs. Anthony, Brown, Chandler, Clark, Collamer, Conness, Dixon, Fessenden, Foster, Grimes, Hale, Harlan, Henderson, Howard, Lane of Kansas, Morgan, Morrill, Ramsey, Sherman, Sprague, Sumner, Ten Eyck, Trumbull, Van Winkle, Wade, Wilkinson, Willey, and Wilson—23.

NAYS—Messrs. Buckalew, Carlile, Cowan, Davis, Doolittle, Harris, Howe, Johnson, Powell, Saulsbury, and Wright—11.

In the Senate on the 26th Mr. Bayard, of Delaware, came forward and took the oath prescribed, after which, resigning his seat in the Senate, he said: "Mr. President, in the course of the debate upon the rule adopted yesterday by the Senate, I stated that the body having exclusive jurisdiction over the subject, I should hold myself bound by its action, and that but one alternative remained if the rule was adopted: either to comply with the decision or relinquish my seat in the Senate. Subsequent reflection has convinced me I was partially in error. Another course is open: to submit to the decision and resign.

"The gravest consideration has induced me to pursue this latter course; and in a brief period my connection with this body, which has lasted nearly thirteen years, will cease.

"I desire to assign the reasons which control my action. Without any decision upon the constitutional validity of the act of July, 1862, all the members of the Senate and House to whom it applied belonging to the political party with which I have acted have voluntarily taken the oath prescribed by that act, deeming, doubtless, that the constitutional questions involved were of less moment and the precedent made less dangerous than they seemed to my

mind. I could not but reflect that this unanimous action of those with whom I coincided in general political views might give cause even to men unbiased by the perverting influences of political or personal hostility, who did not know me personally, to doubt, if not to believe, that I declined to take the oath for reasons other than the consideration that, in my judgment, it was a dangerous innovation upon fundamental principles of the Constitution.

"As I believed that the law had been passed without full discussion, and as a decision on its validity by the proper tribunal had been waived at the special session when I was not present, I was content to leave others to their own action, and govern mine by my convictions of duty. The decision has now, however, been judicially made, after hearing my objections to the act and the oath it imposes, and that decision, though in my belief a dangerous precedent, is obligatory to the extent of taking the oath, as I have already held the seat for nearly one year since my reelection.

"Sir, I admit that I covet the approbation of the good, the wise, and the reflecting, and would not willingly subject myself to their censure or to reasonable suspicion as to my motives of action; though I am utterly indifferent to those calumnious, groundless, and vindictive attacks to which every man in public life, even in less excited times, is subjected by personal malevolence or political hostility. But though I desire such approbation, I have never made either opinion or popularity my standard of action, but my own sense of right and duty; and I owe a respect to my own sincere convictions of public duty which I will never sacrifice. Many of you are aware that before civil war commenced I expressed fully my views as to the course of action which I thought the welfare and prosperity of the whole country required after the secession of seven States. Those views differed from the course pursued subsequently by the Administration, and its course was approved by a majority of Congress, and indeed by the people at large after their passions had become excited by actual war.

"I told you then that I did not consider secession a constitutional or reserved right of the States, but an act of revolution; but a revolution by organized communities—not rebellion in the modern sense of the word, but only in its old Roman sense—the revolt of a people. I told you, also, that, in my judgment, conciliation, and the removal of real or even apprehended grievances or dangers, and not coercion by arms, was, in such a crisis, the true policy of the statesman; and that the framers of the Constitution had wisely left such a state of affairs without any provision as one of those 'mortal feuds' which, in the language of Hamilton, 'when they happen, commonly amount to revolutions and dismemberments of empire.' I admitted that secession was a breach of the compact by which the Federal Government

was established, and that it rested with the United States to determine whether they would and could, by war, compel the seceding States to repair the breach, or whether the act by which they severed their political relations with us should be assented to, and a peaceful separation permitted, in the hope that past memories and the ties of blood and marriage, with continued commercial intercourse, might in a few years restore those seven States to the Union; similar influences having at the origin of the Government induced North Carolina and Rhode Island, after a year's delay, to become members of the Union, though the former had in the first instance rejected the Constitution, and the latter had refused to be represented in the Convention. I may be pardoned here for quoting a short extract from a speech I made on the 'condition of the country,' in March, 1861, as illustrative of my opinions before the sword had been drawn:

You may attempt by war to keep the States united—to restore the Union; but the attempt will be futile. Conciliation and concession may reunite us; war, never! The power may be exercised for the purpose of punishment and vengeance. It may be exercised if you propose to conquer the seceding States, and reduce the nation into a consolidated nation; but if your intention be to maintain the Government which your ancestors founded—that is, a common Government over separate, independent communities—war can never effect such an intention.

"I preferred then peaceful separation to civil war as the lesser evil, but the Administration and the dominant party decided to resort to an enforcement of the laws by the coercion of arms, as against an insurrection. Civil war has since raged, and its events and consequences have strengthened my convictions that the prosperity of my country and the happiness and morals of the people cannot be promoted by its continuance. To these views an overwhelming majority of Congress is opposed, and, so far as the elections of the past year can be accepted as evidence of public sentiment, that majority is sustained by the people. It is true that new questions have arisen in the progress of war as to its mode of conduct and object, and have produced conflict of opinion among the people. But on the question of peace—even by temporary separation if essential—the Democratic party with which I have been connected is divided, and many of its leading and most influential adherents indulge in the visionary idea that a common Government, based on 'the consent of the governed,' over separate political communities, with diversified habits, manners, customs, and institutions, can be restored and maintained by the sword, without the abandonment of a federal and its conversion into an imperial and centralized Government. So thought not the President of the United States or the Secretary of State on the 10th of April, 1861, before war had begun, and to my mind such an idea is a delusion and a mere chimera. I have also the fixed opinion and belief that the life of a nation depends upon

the preservation of its liberties, and not upon the extent of its dominion. Standing, therefore, almost alone in this body, I have lost the hope that I can longer be of service to my country or my State. Never an ambitious man, the passion of ambition has with the advance of life so diminished that I prefer the repose of private life to the embittered contests of the political arena in these tempestuous times.

"I have lived to see the elective franchises trodden under foot in my native State by the iron heel of the soldier, and "Order No. 55," not the people of Delaware, represented in one Hall of Congress. I have lived to see her citizens torn from their homes and separated from their families on the warrant of a self-styled detective, without any charge expressed on its face, and without any known accuser; and then, without hearing or trial, these citizens banished from their State, beyond the protection of the laws, into a State in which the laws of the United States are now neither enforced, nor enforceable. Yet in the State of Delaware the courts have been always open, and at no period has there existed the semblance of a conspiracy or combination to resist the authority of the United States. Such an allegation is a gross calumny, and utterly groundless, come from what source it may.

"And now, Mr. President, the Senate of the United States have, by their decision enforcing an expurgatory and retrospective test-oath, repugnant to both the letter and spirit of the Constitution, made a precedent which, in my judgment, is eminently dangerous, if not entirely subversive of a fundamental principle of representative government. Under these circumstances, with my construction of the Constitution, having held the seat, I am bound to submit to your judicial decision as to the validity of the act of July, 1862, and have therefore taken the oath it prescribes. I cannot doubt that the precedent now made will be followed, and yet I regard all test-oaths as useless and demoralizing acts of tyranny. It has been as truly as beautifully said by a brilliant and distinguished advocate:

They are the first weapons young oppression learns to handle; weapons the more odious since, though barbed and poisoned, neither strength nor courage is necessary to wield them.

"With a firm conviction that your decision inflicts a vital wound upon free representative government, I cannot, by continuing to hold the seat I now occupy under it, give my personal assent and sanction to its propriety. To do so, I must forfeit my own self-respect and sacrifice my clear convictions of duty for the sake merely of retaining a high trust and station with its emoluments. That will I never do, but retiring into private life, shall await, I trust, with calmness and firmness, though certainly with despondency, the further progress of a war which it is apparent to my vision will in its continuance subvert republican insti-

tutions, and sever this Federal Union into many arbitrary governments.

"Among these, wars for dominion will arise and continue until, from exhaustion, the different divisions subside into separate nationalities, leaving not the vestige of a republic remaining. If the lessons of history be not deceptive and valueless, such will be the inevitable result of protracted war; for a single centralized Government over so vast a territory, inhabited by so intelligent and energetic a people, could it be organized through military genius and power, and be successful for the hour, would not outlive the generation in which it was established.

"I close these remarks with the language in which a historian of the Constitution so eloquently portrays the universal sentiment of the American people (alas! how changed now) at the time of its adoption, and the great object they intended to accomplish in thus cementing more firmly a Federal Union: "

They beheld that republican and constitutional liberty which with all that it comprehends and all it bestows was not only altogether lovely in their eyes, but without which there could be no peace, no social order, no tranquillity, and no safety for them and their posterity.

This liberty they knew must be preserved. They loved it with a passionate devotion. They had been trained for it through a long and exhausting war. Their habits of thought and action, their cherished principles, their hopes, their life as a people, were all bound up in it; and they knew that if they suffered it to be lost, there would remain for them nothing but a heritage of shame and ages of confusion, strife, and sorrow.

In the Senate on Feb. 26th, a bill proposing to repeal the law which prohibits colored people from being employed as carriers of the mail, which was reported from the Committee on Post Offices and Post Roads with an amendment, was considered. The amendment was as follows:

SEC. 2. *And be it further enacted*, That in the courts of the United States there shall be no exclusion of any witness on account of color.

Mr. Collamer, of Vermont, said: "In relation to the bill, it is sufficiently explicit in itself; but the committee were of the opinion that if persons of color were to be employed and rendered eligible to be employed as carriers of the mail by those who have contracted to carry the mail and who wish to employ them, it would be unsafe to commit to their hands the mail, when they could not themselves be witnesses against those who should violate that mail, steal it, rob it, commit depredations on it. Inasmuch as in many of the States persons of color cannot be witnesses in the courts, we thought it was necessary to add this section to make them witnesses in the United States courts, in order to render the bill safe to the community.

"By our general law, the rules of evidence in the courts of the United States are the same as those existing in the particular State in which

our courts sit; and therefore in those States where such a law exists these colored people cannot be witnesses, and hence they cannot be safely intrusted with the carrying of the mails; but it is within the power of Congress to render them competent witnesses in the United States courts, and therefore the committee reported the amendment which is the second section of the bill."

Mr. Sumner, of Massachusetts, followed, saying: "Before the vote is taken, I desire for only one moment to call attention to the origin of the legislation which it is now proposed to sweep out of our statute-book. I think if the Senator from Indiana who opposes the bill under consideration were fully aware of the origin of the legislation which it seeks to remove, that we should have his vote, notwithstanding his eloquent speech.

"I have before me the American State Papers, the first volume, relating to the Post Office. In that volume, on page 27, is a letter from Gideon Granger, dated March 28, 1802. He was at the time, it will be remembered, Postmaster General of the United States. This letter is addressed to the Hon. James Jackson, Senator from Georgia. It is as follows:

GENERAL POST OFFICE, March 28, 1802.

SIR: An objection exists against employing negroes, or people of color, in transporting the public mails, of a nature too delicate to engraft into a report which may become public, yet too important to be omitted or passed over without full consideration. I therefore take the liberty of making to the committee, through you, a private representation on that subject. After the scenes which St. Domingo has exhibited to the world, we cannot be too cautious in attempting to prevent similar evils in the four southern States, where there are, particularly in the eastern and old settled parts of them, so great a proportion of blacks as to hazard the tranquillity and happiness of the free citizens. Indeed, in Virginia and South Carolina (as I have been informed) plans and conspiracies have already been concerted by them, more than once, to rise in arms, and subjugate their masters.

Every thing which tends to increase their knowledge of natural rights, of men and things, or that affords them an opportunity of associating, acquiring, and communicating sentiments, and of establishing a chain or line of intelligence, must increase your hazard, because it increases their means of effecting their object.

The most active and intelligent are employed as post-riders. These are the most ready to learn, and the most able to execute. By travelling from day to day, and hourly mixing with people, they must, they will acquire information. They will learn that a man's rights do not depend on his color. They will, in time, become teachers to their brethren. They become acquainted with each other on the line. Whenever the body, or a portion of them, wish to act, they are an organized corps, circulating our intelligence openly, their own privately.

Their travelling creates no suspicion, excites no alarm. One able man among them, perceiving the value of this machine, might lay a plan which would be communicated by your post-riders from town to town, and produce a general and united operation against you. It is easier to prevent the evil than to cure it. The hazard may be small and the prospect remote, but it does not follow that at some day the event would not be certain.

With respect and esteem, GIDEON GRANGER.
HON. JAMES JACKSON, Senator from Georgia.

"There, sir, is the origin of the offensive legislation which we now seek to remove. It grew out of a proposition to sustain Slavery, communicated in private to a Senator from Georgia. The legislation is a part of that system which Congress has so long imposed upon the country under the domineering influence of Slavery, and it was expressly recommended on the ground that if colored persons were allowed to carry the mails 'they would learn that a man's rights do not depend on his color.' It was to subvert that principle that the offensive legislation was enacted. But now, since the resurrection of our day, since liberty is at last asserting her rights in the Republic, Congress, it seems to me, can do nothing less than to go back to its original policy under Washington and the fathers of the Republic, when no such legislation existed."

Mr. Powell, of Kentucky, moved to amend by inserting after the word "States," the words: "in all cases for robbing or violating the mails of the United States."

No further progress was made in the bill.

Subsequently on June 25th, the Civil Appropriation bill being before the Senate, Mr. Sumner offered the above proviso. To this Mr. Buckalew, of Pennsylvania, offered the following amendment:

Nor in civil actions because he is a party to or interested in the issue tried.

The entire amendment was as follows:

Provided, That in the courts of the United States there shall be no exclusion of any witness on account of color, nor in civil actions because he is a party to or interested in the issue tried.

It was concurred in by the following vote:

YEAS—Messrs. Anthony, Brown, Chandler, Clark, Conness, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Hale, Harlan, Harris, Howard, Howe, Lane of Indiana, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sherman, Sprague, Sumner Ten Eyck, Wade, Wilkinson, and Wilson—29.

NAYS—Messrs. Buckalew, Carlisle, Hendricks, Hicks, NeSmith, Powell, Saulsbury, Trumbull, Van Winkle, and Willey—10.

It was approved in the House by the following vote:

YEAS—Messrs. Allison, Ames, Arnold, Ashley, Bailey, John D. Baldwin, Beaman, Boutwell, Boyd, Broomall, Cobb, Cole, Thomas, T. Davis, Dawes, Deming, Dixon, Donnelly, Driggs, Eckley, Eliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Highy, Hooper, Hotchkiss, Hulburd, Ingersoll, Jenckes, F. W. Kellogg, Orlando Kellogg, Knox, Littlejohn, Loan, Longyear, McBride, McClurg, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Patterson, Perham, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smithers, Spalding, Stevens, Thayer, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Williams, Wilder, Wilson, and Windom—67.

NAYS—Messrs. Ancona, Augustus, C. Baldwin, Blair, Bliss, Brooks, William G. Brown, Chanler, Coffroth, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Harding, Benjamin F. Harris, Charles M. Harris, Herrick, Holman, William Johnson, Knapp, Le Blond, Mallory, Marcy, James R. Morris, Morrison, Noble, John O'Neill, Pendleton, Perry, Samuel J. Randall, Robinson, Ross, John B. Steele,

William G. Steele, Stiles, Strouse, Stuart, Thomas, Tracy, Wadsworth, Ward, Webster, Whaley, Wheeler, Chilton A. White, and Joseph W. White—47.

In the Senate, on the 31st of March, the House bill of the usual form to provide a temporary government for Montana was considered in Committee of the Whole, when Mr. Wilkinson proposed as an amendment to strike out the words "white male inhabitant," and to insert "male citizen of the United States, and those who have declared their intention to become such."

The amendment was agreed to, and also other amendments. When the bill was reported to the Senate, the amendments ordered to be engrossed, and the bill read a third time, Mr. Saulsbury, of Delaware, called for the Yeas and Nays, saying: "My object in asking for the yeas and nays is simply on account of the amendment which has been adopted to this bill. As I understand it, the amendment which has been adopted, if, as is contended by those who now administer the affairs of this Government, a negro is a citizen of the United States, gives the privilege to every negro in the land who shall be in this Territory for the period of thirty days, not only to vote but to be eligible to any office in that Territory; and it may be, if the people shall be so unwise as to do it, that a negro may be elected to the office of legislator of the Territory, or Delegate in Congress. Being opposed to the whole system of giving to this subordinate race any such privileges, I, for this reason, shall record my vote against the passage of this bill."

Mr. Johnson, of Maryland, suggested as follows: "I was about to say, in order to explain my reason for asking for the reading of the amendment, that if the object of the Senator from Minnesota (Mr. Wilkinson) is to put it beyond all doubt that Africans in the Territory shall be permitted to exert all the political rights that under the bill will be exercised by white men, he had better say 'all black men,' instead of saying 'all citizens,' because the Supreme Court of the United States has decided, and that question was directly before the court in the Dred Scott case, that a person of African descent is not a citizen of the United States. The objection to the authority of that decision did not apply at all to that particular question; it was to the other question which a majority of the court decided as to the unconstitutionality of the Missouri restriction. The opinion of a large part of the public, not only confined to what may be called laymen, but including a great many professional men, was that, so far as that question was concerned, the decision of the court was extra-judicial; but as far as related to the other question, the capacity of the African to sue in the courts of the United States, there was no doubt in the mind of any body that the decision, until it shall be reversed by the court itself, is conclusive, and conclusive upon the question that a

person of African descent is not a citizen of the United States within the meaning of the Constitution."

Mr. Wilkinson, of Minnesota, in reply said: "I am willing that it shall stand as it is, and let the decision of the Supreme Court be whatever it may. I simply wish to strike out the qualifying term there, and let the results take care of themselves. I neither want 'white' nor 'black' put into this bill."

Mr. Sumner, of Massachusetts, followed, saying: "I take it that each branch of the Government can interpret the Constitution for itself. I think that Congress is as good an authority in its interpretation as the Supreme Court, and I hope that Congress, in its legislation, will proceed absolutely without any respect to a decision which has already disgraced the country, and which ought to be expelled from its jurisprudence."

Mr. Johnson replied: "Mr. President, if the opinion of the Senator from Massachusetts was conclusive upon all such questions, guided and controlled the public mind, it might be considered now as settled that the decision of the Supreme Court in that case was a disgrace. But I have yet to be advised that the honorable member, either by nature or by education, has attained so much intellectual celebrity, or possesses such transcendent mental ability as to be able to pronounce *ex cathedra* against a decision pronounced by the Supreme Court of the United States. There are many men, the equals of the honorable Senator, to say the least, intellectually, who think that that decision was any thing but an outrage."

"The suit was instituted by Dred Scott, who was of African descent, in the courts of the United States. The master against whom the application for his freedom was instituted, pleaded that because he was an African he was not a citizen; and as the act of 1789, constituting the circuit courts of the United States, limited the jurisdiction of that court in cases of that description to controversies between citizens of different States (following in that respect the language of the Constitution), he maintained that upon that ground—irrespective of the question whether he was free or not, by having been carried into the State of Illinois where slavery did not exist, or having been carried north of the Missouri compromise line, where slavery was prohibited—the suit itself must be dismissed. The Supreme Court decided—contrary to the opinion of the court below, who ruled against the objection—that the objection was well taken; and of course they decided that any judgment pronounced in that case by the court below, whatever may have been the judgment, or any judgment which the Supreme Court should have pronounced in that case, would be of no avail if the court had no jurisdiction over the parties to the controversy."

"The Chief Justice in giving the opinion of the court, however, and speaking in that par-

ticular for six of the judges, I think, supposed that there was a difference between cases brought into the Supreme Court of the United States upon writ of error or appeal from the circuit courts of the United States, and cases brought before it by appeal or writ of error under the twenty-fifth section of the judiciary act; that in the latter class of cases, by the very terms of the judiciary act of 1789, the jurisdiction of the court was confined to certain specific questions; questions involving the Constitution of the United States; questions involving the constitutionality of a law of a State on the ground that it was in conflict with the Constitution of the United States; questions involving the constitutionality or construction of an act of Congress; but he supposed, speaking for the court—whether correctly or not I am not here to contend—that in a case brought up from a circuit court of the United States, it was the right and duty of the Supreme Court to decide the case upon all the grounds on which it had been decided in the court below; and, inasmuch as the court below decided against the plea to the jurisdiction, and then went on to decide that having jurisdiction the party was not entitled to his freedom, to which the Supreme Court concurs, yet the Supreme Court thought it proper to examine into the latter question as well as the first."

Mr. Sumner answered: "The Senator from Maryland invoked the Dred Scott decision as a reason why Congress should not recognize colored persons as citizens. In the remark which I made, it was my purpose to vindicate the right of Congress to interpret the Constitution without any constraint from the Supreme Court. Each branch of the Government must interpret the Constitution for itself, according to its own sense of obligation under the oath we have all taken. And God forbid that Congress should consent to wear the straight-jacket of the Dred Scott decision!"

Mr. Hale, of New Hampshire, said: "I do not propose to enter into this discussion, but simply to make a single remark, in which I am compelled to differ with my honorable friend from Massachusetts. He says that the Dred Scott decision was a disgrace, to the Supreme Court of the United States. I do not believe that I think any better of that decision than he does: I think it was an outrage upon the civilization of the age, and a libel upon the law; but I do not think it was a disgrace to the Supreme Court of the United States." (Laughter.)

The bill was then passed by the following vote:

YEA—Messrs. Brown, Clark, Collamer, Conness, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Hale, Harlan, Harris, Henderson, Howard, Howe, Lane of Indiana, Morgan, Morrill, Nesmith, Pomeroy, Ramsey, Sherman, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, and Wilson—29.

NAY—Messrs. Buckalew, Davis, Johnson, Powell, Riddle, Saulsbury, Van Winkle, and Willey—8.

The House, on the 31st, refused to concur in the amendments of the Senate, and, on a mo-

tion to reconsider the vote on April 2d, Mr. Pendleton, of Ohio, said: "The provision of the particular amendment to which I refer is intended, and I think it will be so admitted by all its friends, to give to negroes the right to vote at the first election in the Territory of Montana. The amendment differs in its provisions from any bill organizing a Territory of the United States which has ever been passed by either House of Congress. It strikes out the words 'free white inhabitants,' and substitutes for them the words 'male citizens of the United States.' If I may be permitted to allude to what has since been made public, the debates in the other House, although attention was called to the fact that under the decision of the Supreme Court no man of the African race can be a citizen of the United States, yet the amendment was expressly intended to overrule that decision, and to provide that all persons, of whatever color, who are otherwise qualified, shall have the right to vote in that Territory. I only desire to state this proposition to the House. I only desire that the House shall be thoroughly informed of the character of the amendments sent to it by the Senate. I only desire them to understand that now, for the first time in the history of the Government, one of the branches of Congress has endeavored to establish negro political equality. If they do so, they can vote understandingly upon this proposition."

The motion to reconsider was then withdrawn, and a committee of conference was appointed by the Senate and House. On the report of this committee, the House adopted the following resolution:

Resolved, That the House non-concur in the report of the committee of conference on the disagreeing votes of the two Houses on the bill of the House (No. 15) to provide a temporary government for the Territory of Montana; and further insist on disagreeing to the Senate's amendments, and ask a further conference; and that said committee be instructed to agree to no report which authorizes any others than free white male citizens, and those who have declared their intention to become such, to vote.

The vote was as follows:

YEA—Messrs. James C. Allen, William J. Allen, Bailey, Augustus C. Baldwin, Francis P. Blair, Bliss, Brooks, James S. Brown, William G. Brown, Chandler, Clay, Coffroth, Cox, Cravens, Creswell, Henry Winter Davis, Dawson, Dennison, Eden, Eldridge, Finck, Ganson, Grider, Hall, Harding, Benjamin G. Harris, Herrick, Holman, Hutchins, William Johnson, Kalbfleisch, Kernan, Knapp, Law, Loxear, Long, Mallory, Marcy, McBride, McDowell, McKinney, William H. Miller, James R. Morris, Morrison, Nelson, Noble, Odell, Pendleton, Radford, Samuel J. Randall, William H. Randall, Robinson, Rogers, James S. Rollins, Ross, Scott, Smith, Smithers, Stebbins, John B. Steele, William G. Steele, Strouse, Stuart, Sweet, Thomas, Tracy, Voorhees, Webster, Whaley, Wheeler, Chilton A. White, Joseph W. White, Winfield, Fernando Wood, and Yeaman—75.

NAY—Messrs. Alley, Allison, Ames, Anderson, Ashley, John D. Baldwin, Baxter, Beaman, Blaine, Boutwell, Boyd, Broomall, Ambrose W. Clark, Cobb, Cole, Dawes, Deming, Driggs, Dumont, Farnsworth, Frank, Gooch, Grinnell, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Jenckes,

Julian, Kelley, Francis W. Kellogg, Orlando Kellogg, Loan, Longyear, Marvin, McClurg, McIndoe, Samuel F. Miller, Morrill, Daniel Morris, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Pomeroy, Price, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Shannon, Sloan, Stevens, Thayer, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburne, Williams, Wilder, Wilson, Windom, and Woodbridge—67.

Whereupon the Senate declined to agree to a committee of conference in the manner asked for by the House.

In the Senate, a motion was made by Mr. Wilkinson, of Minnesota, that the Senate insist on their amendments and agree to a further conference.

Mr. Doolittle, of Wisconsin, said: "So far as this amendment applies to white or colored men in the Territory, it is the merest abstraction in the world. There is not a negro in the Territory, and probably will not be for years. It has no practical bearing or effect."

Mr. Hale, of New Hampshire, replied: "It is not so. It is one of the most practical questions that was ever presented to the American Senate, as it is involved in the proposition of the Senator from Minnesota. Here is an immense territory that we are about to organize into a territorial government. The question is, whether at its start, when there are no inhabitants there, we shall by its fundamental law educate the people to this absurd and barbarous prejudice. What a spectacle we present of ourselves to the world to-day! We are calling on this colored race to fight for us, and they are responding. They are taking their arms and going out and exposing their lives in battle; and we see how gallantly they stood at the fort that has recently been taken, and they were massacred at their arms. And at a time when they are responding to this call and going out, their lives in their hands, and laying down their lives in defence of the country and for its salvation, we proceed to declare that in this vast territory, which is now unoccupied, and which waits for the march of civilization and improvement, they shall be forever debarred from living with the privileges of freemen."

Mr. Trumbull, of Illinois, said: "I think the Senator from New Hampshire is entirely mistaken when he says that the amendment in dispute between the two Houses is not an abstraction, a mere temporary matter. This bill does not propose to fix fundamentally and forever the right of suffrage in this Territory. It is to have no operation except at the first election. When the Territorial Legislature meets it is to fix the right of suffrage. We have been informed here that there is not a single colored person in the proposed Territory. The amendment of the Senate will have no practical effect. It is the merest abstraction, precisely what the Senator from Wisconsin has stated; and I can see no good to arise from it."

Considerable discussion ensued on different days. Mr. Doolittle, of Wisconsin, said: "For myself, so far as this Territory of Montana is

concerned, I care but very little in which form the bill shall pass, whether in the form proposed by the Senator from Minnesota or in the form proposed by the Committee on Territories of the House, sanctioned by that House and sanctioned by the committee of this body; but, sir, that against which I enter my most earnest protest is the raising of this new issue, in form or in substance, out of this controversy between the two Houses; against throwing that issue, at this time and in the present state of the country, as a new element to inflame and embitter the great controversy to come off in the ensuing presidential election; I mean the issue of negro suffrage. Although perhaps in the form of the words employed this issue is not necessarily involved, yet it is so generally understood throughout the country by the press and by the people."

The motion of Senator Wilkinson was adopted.

In the Senate, on the 19th of May, the Committee of Conference made another report.

Mr. Morrill, of Maine, said: "I will state in a word that the effect of the amendment of the Committee of Conference is to authorize the temporary organization of the Government of Montana by that class of persons that were authorized to organize the Territory of Idaho."

Mr. Sumner, of Massachusetts, asked: "What class of persons was that?"

Mr. Morrill replied: "They were, as I recollect the qualification, white citizens of the United States, and such others as had declared their intention to become citizens. As it now stands, the qualification in Montana will be that the voters at the first election will be citizens of the United States, and such as have declared their intention to be citizens of the United States, and such as are qualified by the fifth section of the act organizing the Territory of Idaho."

Mr. Sumner: "That is, free white persons, I understand."

Mr. Morrill: "That is what it comes to."

Mr. Sumner: "I understand that the point of difference between the two Houses was simply as to the word 'white' or 'black.'"

Mr. Morrill: "That was the principal question, and on that point I desire to say precisely how the committee found the question. It will be seen that the whole provision for the qualification relates to the temporary organization of the Territory. When it is temporarily organized, which is to be at once, in the contemplation of the bill, as the necessities of the times demand it, the whole question of suffrage is left to the Territory; so that the question of suffrage as presented to us applies entirely to the temporary organization of the Territory; and the committee became satisfied that the question presented was this practical question, whether it was advisable to organize the Territory at the present time. If it were necessary to organize it, we became satisfied that this difference between the two Houses must be overcome in some such way as this; and the com-

mittee, believing there was no practical importance in the Senate amendment, as there was believed to be no colored person in the Territory, and probably would not be any colored persons actually resident in the Territory who, by an possibility, could vote on this occasion, did not see that it was worth while to make a question on what the honorable Senator from Massachusetts perhaps might regard as a principle, when, by no possibility, could it affect the question practically."

Mr. Sumner replied: "I hope the Senate will adhere to its original position, and I believe that the statement of that principle at this moment is more important than the bill."

Mr. Wade, of Ohio, thus expressed his views: "The bill was presented here with the old form that had grown into a custom in the days of negro-phobia, when it prevailed to the highest extent here, and the word 'white' was inserted everywhere wherever there was any chance to insert it, in order to discriminate between white and black. I was always opposed in principle to that, and I do not propose now to depart from my principle. I have no concealments to make on this subject or upon any other. I am opposed to this discrimination between white and black in voting. I do not think it forms an intelligible line of demarkation. Some black men are infinitely more capable of voting intelligently than a great many whites, and *vice versa*. The color of a man, whether black or white, is no criterion, and I will never consent to make it a criterion of voting. I think that in a republican form of government like ours a man has a right to vote, an inalienable right to vote; although I know that that principle is combated here by some. I believe that the right to participate in the Government under which we live is as sacred and as much a natural right as any other; and I believe that no other rights that belong to man can long be maintained when he is deprived of this; and therefore, sir, I go right straight to the work when there is any occasion for it, and I should have said nothing now on this subject only that the vote I intend to give here might be construed to be a vote by me against the principle that I have now avowed.

"I never legislate or act in reference to mere shadows. Gentlemen may call them principle or not principle. I look to the effect of a measure when my vote is required. I cannot be bluffed off by the mere form or shadow of a thing. What is this? When I agreed to the original bill it had the word 'white' in it, and I so reported it. I did not like it; but when I came to consider that it was the mere shadow of a shade, that it would not affect the rights of any body, I did not care to make a controversy over it. I did not care to compel gentlemen to vote upon that question when I saw difficulties in the way. I had much rather it had passed there, and I did not care which, because the effect of it would be just nothing at all. There are no negroes in the Territory. It

is not pretended that there is a black man in this whole territory. Why then should we detain the Senate here in fixing a principle that can have no application whatever? It is a bare abstraction as it stands, I do not care in what form of words it is; but I give gentlemen notice whenever this question shall be raised in such sort as to affect the rights of any man, I shall take the broad principle of right and stand by it as firmly as anybody else. But when the principle is invoked in a case where it can have no effect, I am not going to be biassed by it; nor am I going to be prevented from effecting a good purpose because I am told that I violate the ghost of some principle."

Mr. Hale, of New Hampshire, replied: "If there is any thing in this principle, I differ entirely with my honorable friend from Ohio in this particular: if you want to assert a principle that you believe in, it is vastly more easy practically to assert it in reference to a wilderness where there is not a man, than in reference to a mixed people consisting of the various classes that would be affected by your legislation."

Mr. Sumner, of Massachusetts, further said: "Senators may say that our fathers in the Declaration of Independence were not practical. I am not of that number. Senators may say that our fathers in the Constitution of the United States, which contains no discrimination of color, were not practical. I am not of that number. Sir, I believe that the authors of this ordinance and also the authors of the Declaration of Independence, and of the Constitution of the United States, were eminently practical when they excluded from all of those instruments any discrimination of color. But it is said that there are no persons in the new Territory to whom this principle is now applicable. This can make no difference. It is something to declare a principle, and I have no hesitation in saying that at this moment the principle is much more important than the bill. The bill may be postponed; but the principle must not be postponed."

Mr. Saulsbury, of Delaware, moved that the Senate adjourn, saying: "It is very seldom, as the Senate and the country know, that I speak on a subject of this character, and therefore I apologize for saying a word on the present occasion. I think we have had enough of the negro to-day for all the members of the Senate who wish to transact the legitimate business of the public."

The motion was lost, and the vote on agreeing with the report of the committee was taken, as follows:

YEAS—Messrs. Buckalew, Carlile, Collamer, Cowan, Davis, Doolittle, Foot, Foster, Harding, Harris, Henderson, Hendricks, Howard, Johnson, Lane of Indiana, Morrill, Nesmith, Powell, Ramsey, Saulsbury, Ten Eyck, Trumbull, Van Winkle, Wade, Wilkinson, and Willey—28.

NAYS—Messrs. Anthony, Chandler, Clark, Dixon, Grimes, Hale, Harlan, Lane of Kansas, Morgan, Pomeroy, Sprague, Sumner, and Wilson—18.

The report was adopted in the House. Yeas, 102; nays, 26.

In the Senate, on the 12th of May, a bill to amend the charter of the city of Washington, &c., was taken up, when Mr. Cowan, of Pennsylvania, moved to insert the word "white" before "male" in the first section. Mr. Morrill, of Maine, also offered an amendment to insert, as follows:

And shall within the year next preceding the election have paid a tax, or been assessed with a part of the revenue of the District, county, or cities therein, or been exempt from taxation having taxable estate, and who can read and write with facility, shall enjoy the privileges of an elector.

Mr. Cowan said: "I may state that I should regret such a modification as is suggested by the Senator from Maine; because, although the standard which he sets up as a qualification to vote is much less objectionable to my mind than the one contemplated by the bill, it is still obnoxious to this objection: it would have the effect in some cases of admitting negroes to the right of suffrage, which I may say is obnoxious to the vast bulk of the people of the border States, whatever it may be to those States lying upon the extreme frontier, and would also prevent white men who are unable to read and write from enjoying that suffrage."

"My principal objection to the introduction of any innovation at this time on this subject is the state of the country. I think it is a wrong time to introduce reforms, and particularly is it a wrong time to introduce any reform which goes to the basis of our institutions, which would strike at the fundamental principles on which they rest."

Mr. Morrill, of Maine, said: "The honorable Senator from Pennsylvania makes color the test; the complexion of a man; every 'white citizen' of the United States may do so and so, but by no possibility shall men of African descent exercise this privilege. Is that rational? No man will undertake to defend that on the ground of rationality; no man will undertake to defend such a proposition as that on the ground of right. It cannot be defended. What is the defence? The Senator from Pennsylvania says he does not want any new issue in these troublesome times. He objects to this upon the ground of an innovation; and I have no doubt that when he proposes to put the word 'white' into this bill he sincerely does not suppose that he himself is innovating; that he is laying himself obnoxious to precisely the charge he makes upon the bill."

Mr. Wilkinson, of Minnesota, said: "Mr. President, I hope that the Senate will adhere to the position it assumed upon the question of suffrage when the bill for the organization of the Territory of Montana was before it, and this question was directly presented for its decision. I do not know but that there may be instances in which I may be willing to yield my opinion upon this question of allowing negroes

to vote. I might do so, perhaps, in a case where my action would have no practical effect, as perhaps in the case of a Territory where there are none of that class; but I never will, under the present condition of things, yield this right where it is of any practical importance whatever."

Mr. Ten Eyck, of New Jersey, said: "The Senator from Minnesota says it only applies to this District. Sir, it is the principle that is objectionable. This is the centre; strike this chord here and it will vibrate to the utmost limits of the Republic, and agitate the country almost as deeply and profoundly as the rebellion has itself. Sir, it is madness now to do this thing."

"Then, sir, conceding it to be theoretically right, is this a proper time to press upon the country such a measure? There are many things in ethics and in morals which, although abstractedly right, cannot practically be used under all and every circumstance. What will be its effect upon our soldiers? The sympathies of my friend from Minnesota embrace these colored troops. He cannot see why men rushing to the ranks to preserve the blessings of this Government, whose skins are black, shall not have the right to exercise this franchise. Sir, why should men whose skins are white, residents of this District, unable to read and write, who have listened to their country's call, gone forth to battle, and bathed the land with their best blood, be forgotten by the Senator from Minnesota?"

Mr. Howe, of Wisconsin, said: "The only reason which the Senator from Pennsylvania suggests for depriving any one of the right of suffrage in the District of Columbia is that he is black. I do not and I never did consider that an adequate reason. Twice in the State of Wisconsin I have been called upon to vote on this very question, and both times I voted to extend the right of suffrage to people of this color, and both times I did it before the negro was much in fashion. I did it when black was not the popular style [laughter], and having done it then, I beg leave to have the advantage of the fashion, now that it has come in vogue."

Mr. Wilson, of Massachusetts, opposed the amendment, saying: "Mr. President, I cannot vote for the amendment proposed by the Senator from Pennsylvania, nor can I ever vote for the amendment suggested by the Senator from Maine. While I am anxious to extend to colored citizens in this District, and especially to those who are bravely fighting the battles of the country, the right of suffrage, I am not willing to take that right from those who now possess it. I never have voted, I never can vote to take from any man the right, the inestimable privilege of the suffrage."

Mr. Lane, of Kansas, said: "So far as I am concerned, I hope the time may come, and soon come, when we can safely extend to the colored men of our country all the political rights that we enjoy ourselves. It is known to the

members of the Senate that I have believed, and have so expressed myself, that they cannot obtain real liberty with us where we are in the majority. I have therefore introduced before the Senate a proposition to separate them from us, to give them the opportunity of occupying a country where they can be the majority race and enjoy all the liberties both social and political that we enjoy. The people I represent are opposed to granting to freedmen the right of suffrage at once. It was tested before our last Legislature. We are unwilling to extend to them the right of suffrage at once, but I believe they will sustain me in voting for a proposition to give to all men over twenty-one years of age the right of suffrage after sufficient time has been allowed them to qualify themselves to exercise that right."

Mr. Cowan, of Pennsylvania, further said: "Mr. President, I have from the beginning protested against new issues. When this rebellion broke out, it was our business to make war, and put it down by war. It was our business to present to the loyal people of the North that single issue, war or separation, war or a dissolution of the Union; and I say that in my judgment, if we had stood upon that single idea, if we had presented that single issue and let all other things abide, we should be to-day in a hundred times better position than we are now, and I might say, too, that to-day we should have been in a hundred times better position in regard to that peculiar institution, which some of our friends are so anxious to have destroyed, than we are to-day.

"What has been the consequence? From what shrub, from what source, from what flower does the copperhead distill his venom? Where does he get the poison with which he infects the community? I was going to say, ask the honorable Senator from Illinois [Mr. TRUMBULL]. He derives his capital, he extracts his noxious juices from these side issues which we get up here without any cause or any hope of reward whatever, and which never have done us any good and never will do so. This is one of them. Of what great benefit would it be to this nation that a few ignorant negroes in the District of Columbia should exercise, or, I beg pardon, should abuse the elective franchise, if the country is to be lost and the Union is to be dissolved, and all the elements of this empire let loose to take such direction as their weight may incline them to take? Of what avail, I say, would that be? And yet this great result is put in peril by introducing constantly this and cognate schemes which are of the most minute importance when thrown into the great scale."

This bill made no further progress; but a joint resolution amending the charter of Washington passed both Houses. During its consideration in the Senate, May 25th, Mr. Sumner offered the following amendment:

Provided, That there shall be no exclusion of any person from the register on account of color.

This was further amended and rejected. Yeas, 18; nays, 20.

YEAS—Messrs. Anthony, Chandler, Clark, Dixon, Foot, Foster, Hale, Harlan, Howard, Howe, Lane of Kansas, Morgan, Pomeroy, Ramsey, Sherman, Sumner, Wilkinson, and Wilson—18.

NAYS—Messrs. Buckalew, Carlile, Cowan, Davis, Grimes, Harris, Hendricks, Hicks, Johnson, Lane of Indiana, McDougall, Morrill, Nesmith, Powell, Richardson, Saulsbury, Ten Eyck, Trumbull, Van Winkle, and Willey—20.

ABSENT—Messrs. Brown, Collamer, Conness, Doolittle, Fessenden, Harding, Henderson, Kiddle, Sprague, Wade, and Wright—11.

In the Senate on Feb. 10th, Mr. Sumner, of Massachusetts, offered the following resolution:

Resolved, That the Committee on the District of Columbia be directed to consider the expediency of further providing by law against the exclusion of colored persons from the equal enjoyment of all railroad privileges in the District of Columbia.

Mr. Sumner said: My special motive in offering this resolution is to call attention to a recent outrage which has occurred in this District. I do it with great hesitation. At one moment I was disposed to keep silence with regard to it, believing that upon the whole the good name of our country required silence; but I notice that it has already found its way into the journals, and I think therefore it ought to find its way into this Chamber.

An officer of the United States with the commission of a major, with the uniform of the United States, has been pushed off one of these cars on Pennsylvania Avenue by the conductor for no other offence than that he was black. Now, sir, I am free to say that I think we had better give up railroads in the District of Columbia if we cannot have them without such an outrage upon humanity and upon the good name of our country. An incident like that, sir, is worse for our country at this moment than a defeat in battle. It makes for our cause abroad enemies, and sows distrust. I hope, therefore, that the Committee on the District of Columbia—I know the disposition of my honorable friend the chairman of that committee—in the bills which we are to consider relative to the railroads in this District will take care that such safeguards are established as will prevent the repetition of any such outrage.

Mr. Hendricks, of Indiana, replied: It seems to be considered a great outrage that the negroes in the District of Columbia are not allowed to take their seats in the same cars with the white men and women who travel on the railroads of this city. If I were to express any opinion on the subject, I should say the outrage would be the other way. But perhaps it is due to the company to say that I have observed the fact, as I suppose other Senators have observed it, that there are cars furnished for the colored people of the District, and those cars are plainly indicated, so that there can be no mistake. I do not understand from the Senator who has introduced this resolution, that any negro has been denied

the right to ride in the cars which, at the expense of the company, have been provided for their accommodation; but the difficulty, I suppose, has arisen because the negro declined to ride in the cars that are provided for persons of his color, and claimed the right to ride in the cars that are provided for the white men and women who travel on these railroads.

Mr. Sumner replied: Mr. President, I am sure that the Senator from Indiana is mistaken in regard to the provision for colored persons. There may be here and there, now and then, once in a long interval of time, a car which colored persons may enter; but any person who traverses the Avenue must see that those cars come very rarely, and if any person takes the trouble to acquaint himself with the actual condition of things, he will know that there are great abuses and hardships, particularly among women, growing out of that outrage. I use plain language, sir, for it is an outrage; it is a disgrace to this city; it is a disgrace to this Government which sanctions it under its eyes. It is a mere offshoot of the slavery which happily we have banished from Washington.

The resolution was agreed to by the following vote:

YEAS—Messrs. Anthony, Brown, Chandler, Clark, Collamer, Conness, Cowan, Dixon, Fessenden, Foot, Foster, Grimes, Hale, Harlan, Harris, Howard, Howe, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sherman, Sprague, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, and Wilson—80.

NAYS—Messrs. Buckalew, Davis, Harding, Hendricks, Nesmith, Powell, Richardson, Riddle, Saulsbury, and Van Winkle—10.

Mr. Willey, of West Virginia, from the committee to whom the resolution was referred, reported on the 24th, that the act by which the company was incorporated, made no distinction as to passengers over said road on account of color; and that in the opinion of the committee, colored persons were entitled to all the privileges of the road equally with others.

On the 17th of March, the bill to incorporate the Metropolitan Railroad Company of the District of Columbia being considered in the Senate, Mr. Sumner, of Massachusetts, offered the following amendment to be added to the 14th section:

Provided, That there shall be no regulation excluding any person from any car on account of color.

Mr. Johnson, of Maryland, said: "Mr. President, I could wish, very sincerely wish, that the difference between these two races could for a moment be forgotten, and the Senate could be brought to devote itself more exclusively to the actual business of the country which involves issues touching at the very life of the nation. I am not sure that I am accurate, but I think that at least one-half of the business of the session, as far as the Senate is concerned, has been taken up by debating the respective rights of these two classes. Now, whether a white man is to ride in a black car if he think proper to ride there—I mean in a

car with black passengers—or whether a black man is to ride in a car appropriated to white passengers, is a matter that I do not think touches any of the great issues which are now before the country. I do not see that upon any ground, even of military necessity, there is any occasion for the continuance of a debate of this description; nor, with due deference to the honorable member from Massachusetts, do I see why it is necessary to provide more special guarantees for the black man than are provided for the white man. If the black man is improperly excluded from one of these cars, as the committee who had the subject before them on a former occasion held, he has the right to go to the courts and seek his remedy there, and the white man has no greater right. If that is the object of the Senator from Massachusetts, they are both in that respect upon an exact equality; their rights (provided the opinion which I entertain be the correct opinion) are the same, and the remedies which the law furnishes for a violation of such rights, under which they can obtain a redress for all the consequences attending such a violation, are equally open to them as they are open to the white man.

"Mr. President, there is one thing that cannot be done. Gentlemen may talk as sentimentally as they think proper, and as they no doubt feel; for when the mind runs upon a particular topic and wishes to come to a particular conclusion upon it, it sees nothing that stands in the way of that conclusion. If gentlemen are anxious to bring about absolute equality, not under the law alone, not for the purpose of establishing equal rights under the law, but that equality which seems now to be sought after, social equality, political equality, they will find, I think, in the end that there will be obstacles in the public judgment, that they will be unable to resist, and before which they will be unable perhaps to stand at some future day.

"The Senate are not to be told—we all know it—that, whether wisely or unwisely, whether humanely or otherwise, there is by white men and by white women, as a general thing—it is not universal—a preference, when the question of social intercourse is concerned, for white men and white women; and I believe the same may be said of the other class. God knows I have no feeling against them, and never have had; certainly have none now. I am perfectly willing to give them, and shall vote for every measure that may be deemed necessary to accomplish that end, all the rights necessary to enable them to be protected in life and property. But when we come to the question of political rights and social enjoyment, there are other considerations that enter into such inquiries. Nature has deeply fixed in the heart what may be called a prejudice or not, as gentlemen think proper. If it be a prejudice—if it be not irreligious so to say—it is a prejudice that comes from our Creator; a preference on

our part for the society of those whom we deem God has created our equals.

"Now, I remember, and it must be fresh in the recollection of the honorable member from Massachusetts—I do not think I can be mistaken in my recollection—I remember that when Major-General Dix, who was at that time in the command of the department including Fortress Monroe, was overburdened with these 'contrabands,' who were coming to the post and claiming protection, and he proposed to send five or six hundred of them to Massachusetts, the Governor of that State refused to receive them, on the ground, I think, that he thought the climate would not agree with them. If it be so, and I do not say it is not so—I will not dispute such high authority as the Governor of Massachusetts—that of itself proves that there is a natural distinction between the two races. The honorable member from Massachusetts, and every other man that I ever saw from Massachusetts who was white, looked as if the climate agreed with him; and, if there be any thing in the climate that is detrimental to this particular class, it only proves that nature has made a difference between us. Let us not try to improve upon nature. I do not think we are equal to it.

"The condition of this class is now such—I do not mean those who have been free for years—that it would be very perilous, as I think, to adopt this political and social equality. I do not know how many have escaped from the South where our armies have gone; but I suppose hundreds of thousands. Thousands and thousands are here from Virginia, and from the other slave States. Are they fit to take part in the great political questions which are now distracting the country? Are they fit companions for ourselves and our wives and our daughters? The question is not whether they can be fit, not whether nature has not endowed them with a mental capacity equal to that of the white. Upon that point differences of opinion are entertained. I have seen some of them who, as I thought, had as much natural capacity as any white man I ever saw; but apparently those instances were exceptions.

"But however that may be, one thing is certain, and he who has eyes to see must have seen it, that, speaking of those who have just escaped from slavery, they are not the people to exercise the elective franchise, and to mix in society with the educated classes of which, and from which, the public councils of the country should always be composed and taken. Just imagine some five or six or more of them holding a balance of power in this Senate, having seats in this body, and any of the great topics were presented for discussion and for action. How would you manipulate them so as to get them to go with either party? By reason? No; they know not what it is, except to a very limited degree. By persuasion? Yes. Persuasion, founded upon what, and appealing

to what? Founded upon ignorance, and appealing to ignorance. It might happen that the vote of one of these men, if not bereft of reason, bereft of all the qualities fitted for this Chamber, would outweigh, or weigh at least as much as the opinion and vote of the honorable Senator from Massachusetts. What would he think if a measure was carried by a vote of that description as against his own intelligent voice? Would he think the country was benefited?

"Let me refer to this idea of social equality in another aspect, and I shall do so certainly with no invidious purpose. There may be some few men deranged enough to be willing to go to that extent, but I am sure that no white educated man in the United States could be induced to contract a contract of marriage with a black woman. He could still less be willing to see any white woman, bound to him by any of those ties which bind woman to man in the domestic circle, contract that contract with a black man. He would hide his head in very shame, and his life would be embittered to its very end, if he could see the daughter of his heart wedded to a man of that description, and a progeny growing up the result of that marriage. He would feel that to him it would be a kindness to take his life, because such a measure to him would be infinitely worse than a calamity of that description. A man can meet death, if he be a man, in a just cause, without feeling even the sensation of fear; but no man can meet a calamity such as I suppose that would be felt by every man, with any thing but a continued, trembling, anxious, depressing, harassing, crushing fear.

"It may be in the providence of Heaven, that in some hundreds of years the problem which is now before us, of social and political equality, may be solved, particularly the first; but as it is, as we now are, he who hopes to see it solved so as to produce at once such equality, sins, as I think, against all the signs of the times, and wars, as I believe, against all the natural feelings of the human race.

"I conclude, Mr. President, by saying that I trust upon reflection the honorable member from Massachusetts will see that there is no necessity for his amendment.

Mr. Sumner replied: "Mr. President, the question before the Senate is very simple; it is as plain as one of the ten commandments; but the Senator from Maryland, with that nimbleness of speech which belongs to him, while undertaking to discuss it, has ranged over a very extensive field. He has treated the Senate to a discourse on almost every subject and something else also: the electoral franchise, social privileges at the presidential mansion, the equality of races, the intermarriage of different races, the state of slavery in Maryland, also in some other States, and then the state of slavery generally. Now, sir, I do not propose to follow the Senator on any of those topics. My desire is to bring the discussion to the pre-

cise point in issue. I think the Senate will then be the sooner prepared to vote.

"But the Senator from Maryland will allow me to remind him that he seemed to exhibit in what he said a rare inconsistency: first, so far as he declared the absolute right under the statute of colored people to a seat in the cars, and then went on to argue that on every consideration of social life and of principle they ought not to be admitted to any such privilege. The two parts of his argument did not go together. If colored people have the legal right to enter these cars, why does the Senator argue that they ought not to have that right? I agree with the Senator in the first argument. They have the legal right to enter these cars, and the proprietors are trespassers when they undertake to exclude them. On that point I agreed with the Senator the other day. To my mind it is clear, because any other conclusion authorizes a corporation to establish a *caste*, offensive to religion and humanity, injurious to a whole race now dwelling among us, and bringing shame upon our country.

"Now, the Senator asks why, as I agreed the other day to this conclusion, do I bring forward the present proposition? To this there are two answers, either of which is sufficient. The first is that in the last railroad statute which we have passed this provision has been introduced, and I have never heard of any complaint or trouble from it. Let us in the one now before us introduce it also, and make the two uniform. That is one reason. But the better reason is that while, beyond all question, colored persons have the legal right under the statute, even without this amendment, yet that legal right has been called in question. In point of fact they are excluded from the cars. The Senator from Maryland refers to one case because it had become well known. I have known of a great many other cases. Indeed, they are brought to my attention almost daily. There is then an abuse at this moment by the exclusion of colored persons from these cars. They are kept out of their rights. And permit me to say we cannot afford at this crisis of our history to sanction injustice. Every such act rises in judgment against us and hangs on the movement of our armies, checking even the currents of victory.

"The Senator admits their rights; but he says let them go to the courts. Sir, what is that for a poor, humble person, without means and without consideration? The Senator knows something of the law's delay and the law's expense; and I ask him whether it is right to subject this oppressed people to this additional oppression, when by a few words Congress now in session can remove the difficulty?"

The amendment was agreed to by the following vote:

YEA—Messrs. Anthony, Brown, Clark, Conness, Fessenden, Foot, Foster, Grimes, Harlan, Howe, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sumner, Wade, Wilkinson, and Wilson—19.

NAY—Messrs. Buckalew, Carlile, Davis, Doolittle, Harding, Harris, Hendricks, Johnson, Lane of Indiana, Powell, Riddle, Saulsbury, Sherman, Ten Eyck, Trumbull, Van Winkle, and Willey—17.

The bill was then passed by the Senate.

In the House, on June 18th, a motion was made to amend the bill by striking out this proviso, which was rejected by the following vote:

YEA—Messrs. James C. Allen, William J. Allen, Ancona, Bailey, Augustus C. Baldwin, Blair, Bliss, Brooks, James S. Brown, William G. Brown, Chandler, Coffroth, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Ganson, Grider, Griswold, Harding, Charles M. Harris, Holman, Hutchins, Philip Johnson, William Johnson, Kernan, Knapp, Law, Lasear, Le Blond, Long, Marcy, McDowell, McKinney, Middleton, William H. Miller, James R. Morris, Morrison, Nelson, Noble, Pendleton, Perry, Pruyn, Radford, Samuel J. Randall, Ross, Scott, John B. Steele, Stiles, Stuart, Thomas, Wadsworth, Ward, Whaley, Wheeler, Joseph W. White, and Winfield—60.

NAY—Messrs. Alley, Ames, Anderson, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blaine, Boutwell, Boyd, Brandegee, Broomall, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Dawes, Deming, Dixon, Driggs, Eckley, Eliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Ingersoll, Julian, Kelley, Orlando Kellogg, Knox, Loan, Longyear, Marvin, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Pomeroy, Price, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smithers, Stevens, Thayer, Upson, Elihu B. Washburne, William B. Washburn, Williams, Wilder, Wilson, Windom, and Woodbridge—76.

In the Senate, on June 21st, a supplement to the charter of the Washington and Georgetown Railroad Co. being considered, Mr. Sumner offered the following amendment to the first section:

And provided further, That there shall be no exclusion of any person from any car on account of color.

The amendment was rejected, but subsequently agreed to by the following vote:

YEA—Messrs. Brown, Clark, Conness, Dixon, Foot, Hale, Harlan, Howe, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sprague, Sumner, Wade, and Wilson—17.

NAY—Messrs. Buckalew, Carlile, Cowan, Doolittle, Foster, Grimes, Johnson, Lane of Indiana, Powell, Riddle, Saulsbury, Sherman, Ten Eyck, Trumbull, Van Winkle, and Willey—16.

The bill passed the Senate, but failed in the House, in consequence of the rejecting of a House amendment, and the insertion of the above proviso by the Senate.

On June 24th, the civil appropriation bill being before the Senate, Mr. Sumner moved to amend by adding the following section:

And be it further enacted, That sections eight and nine of the act entitled "An act to prohibit the importation of slaves into any port or place within the jurisdiction of the United States from and after the 1st day of January, in the year of our Lord 1808," which sections undertake to regulate the coastwise slave trade, are hereby repealed, and the coastwise slave trade prohibited forever.

Mr. Johnson, of Maryland, opposing the amendment, said: "I take it for granted every body will admit that however the opinions of individual senators may be upon the subject, there is nothing in the Constitution of the United States which prohibits slaves from being transported in vessels from one port of the United States to another port. If I am right, that is to say, that the courts hold that the act is not unconstitutional, the honorable member proposes to repeal the eighth and ninth sections of that act, and I inquire of him whether he has looked, with the acuteness which he always brings to the consideration of questions of that character, to the effect of his amendment. If the Constitution of the United States of itself would authorize a slave to be carried from one port of the United States to another port of the United States, then they may be carried, except so far as Congress under the commercial power may think proper to restrain it, and the object of the two sections he proposes to repeal is to restrain it. The eighth section prohibits their being carried in vessels of a less tonnage than forty tons. That he proposes to repeal. Then if I am right—and I am sure I am right—in the judgment of the courts they may be carried in vessels of a less amount of tonnage than that. The ninth section, the other one which he proposes to repeal, provides for the manner in which they may be carried in vessels of forty tons or more than forty tons; and for the purpose of protecting one who is claimed to be a slave, but who may be free against being sold into captivity in a State where he may not be able to establish his freedom by evidence, certain regulations are prescribed by Congress for the protection of the freeman, who, because he is black, when he gets into a State where slavery exists, may be sold and may be held in slavery forever thereafter.

"If the honorable member repeals that section, what is the result? The result is, that in all vessels of any amount of tonnage slaves may be carried, no matter at what hazard to the slave, no matter at what hazard of life or liberty, provided I am right, and I repeat I know that I am, and the courts will hold, that under the Constitution of the United States there is nothing to prohibit it except in the power which it confers upon Congress to regulate commerce between the States and foreign nations, and consequently, in the absence of such regulation, these people may be carried. If I wanted to accomplish the object which the honorable member supposes southern men in the past, at any rate, were anxious to accomplish, to open this trade entirely, to permit the slaves to be carried from one port to another without restraint, I would join hands with him and repeal these two sections of the act of March, 1807. Nothing is clearer in my judgment than that they may be carried in a vessel of any amount of tonnage, and they may be carried in any manner in which the master of

that vessel and the master of the slave think proper to have them carried, if those two sections are repealed. Instead, therefore, by this particular measure, of accomplishing the purpose which the honorable member says he always has in his mind's eye, of striking at the institution of slavery wherever it exists, he will grant a larger license to the institution than our ancestors granted, and a license which they intended to restrain by the very sections which the honorable member proposes to repeal."

Mr. Sumner: "Of course I differ radically from the senator from Maryland (Mr. Johnson) on the merits of this proposition. He is always willing to interpret the Constitution for slavery. I interpret it for freedom. And yet he is anxious lest the repeal of the two obnoxious sections regulating the coastwise slave trade should leave it open to unrestrained practice. I do not share his anxiety.

"Where will the slaves come from? Not from the rebel States, for emancipation is the destined law there. Not from his own State, for emancipation will soon be the law there. But even should slaves be found for this traffic (which, thank God, cannot be the case) I am unwilling that Congress should continue to regulate the ignoble business. Our statute-book should not be defiled by any such license. Remove this license and the Constitution, rightly interpreted, will do the rest.

"It is here that the difference arises between the Senator and myself. He proceeds as if those old days still continued when slavery was installed supreme over the Supreme Court, giving immunity to slavery everywhere. The times have changed, and the Supreme Court will yet testify to the change. To me it seems clear that, under the Constitution of the United States, no person can be held as a slave on shipboard within the national jurisdiction, and that the national flag cannot cover a slave. The Senator thinks differently, and relies upon the Supreme Court; but I cannot doubt that this regenerated tribunal will yet speak for freedom as in times past it has spoken for slavery. And I trust, should my life be spared, to see the Senator from Maryland, who bows always to the decisions of that tribunal, recognize gladly the law of freedom thus authoritatively pronounced. Perhaps he will be astonished that he was ever able to interpret the Constitution for slavery. If he is not, others will be.

"But my special purpose now has been to remove odious provisions, and I have contented myself with words of repeal, in the hope of presenting the proposition in such a form as to unite the largest number of votes. My own disposition has been to go further, and to add words of positive prohibition. But, at the present moment, I am willing to waive this addition, and content myself with the simple repeal, that our statute-book may no longer be degraded, trusting that the Constitution right-

ly interpreted will do the rest. And yet the positive prohibition, which the Senator seems to invite or to challenge, would not only purify the statute-book, but effectually guard against the future, so that both Constitution and law would be arrayed against an infamous traffic. Clearly this ought to be done; and if I have not moved it, do not set it down to indifference or inattention, but simply to my desire that the proposition, moved as it is on an appropriation bill, should be limited to the necessity of the occasion. To do less than I propose would be wrong. I should be glad to do more."

Mr. Hendricks, of Indiana, said: "I am surprised that any Senator should oppose the proposition of the Senator from Massachusetts, for we all know that eventually it will be adopted. The objection as to its materiality or proper connection with this measure is but an objection of time. No gentleman can question that the Senator from Massachusetts will eventually carry his proposition. Why, sir, about two weeks ago this body, after full discussion, deliberately voted that the Constitution imposed a duty upon Congress and the President of the United States; the present incumbent of the presidential chair in his inaugural address said that that duty rested as an oath upon the conscience of every Senator to see that there was an efficient and adequate law for the return of fugitive slaves; and yet under some process, not the force of argument, but through some influence that the uninitiated cannot understand, after the Senate had rejected the proposition in its original form, it was carried through yesterday by a large vote.

"Why then contest the matter longer? Let the Senator bring in his propositions. The Senator from Ohio (Mr. Sherman) made an effort to stay the progress at one point upon the Constitution, and did for a while save the act of 1793 and the signature of George Washington; but the Senator from Ohio finally failed yesterday, and it all went by the board. He may for this hour and in this debate, upon a technical point, prevent the adoption of the measure of the Senator from Massachusetts upon this bill; but that it will come in this body I have no doubt. It may as well come now as at any time. Let it be understood that all the positions assumed by our fathers touching the relations of these States are to be wiped out at once, and then I suppose the Senators that accomplish so much will undertake the work of reconstruction or the formation of a new Union!

"Sir, I regret to see this. Every law put upon the statute-book by our fathers with a view of carrying out the provisions of the Constitution, or in pursuance of the spirit of the union between the States, I regret to see wiped out; but we have witnessed it, and I think the effort to delay is useless. We may just as well let it come now as at any time. If misfortune comes of it I am not responsible, and there are other Senators who are not responsible. I be-

lieve this Union is to be restored upon the Constitution, if it is ever restored, and I do not believe that there is wisdom or patriotism or virtue enough now to make a new Union, and if we do not come back again upon the old Union substantially and upon the basis of the Constitution, I do not hope for a new Union.

"Mr. President, I am not satisfied that the true friends of the Union are the men who are breaking all the bonds that our fathers made to hold the States together. One ligament after another gives way in the presence of the sentiment of the hour; and yet Senators who will adopt these measures call themselves specially Union men, and upon some occasions doubt the fidelity to the Union of Senators who oppose this policy. I claim to be a Union man because I stand upon the bond of the Union, the covenant that brought these States together; and if I go outside of that covenant I cannot well claim to be a Union man.

"Sir, at the commencement of this war the North was a unit and the South was divided. Now the North is divided and the South is a unit. Why? Let Senators that ask for success in the war, answer the question, why? Because here in this Senate you said to the honest people of the country that this war should be to preserve the Union and the Constitution and not to break down the institutions of any of the States, and the people believed you, and they rallied from the wheat-fields and the corn-fields and shops everywhere to make a glorious army. You did not have to send provost marshals after the young men then, for they rushed forward themselves, and the question was who should get into the first regiment. Now the bloodhounds of war have to be sent upon the track of the young men of the country to bring them into the army; and why? Because faith has been broken with the people, not by the statesmen with whom it is my pride and pleasure to think and to act, but by Senators and Representatives who have attempted to take advantage of this convulsion in our country to break down the institutions of the States. The country had a right to demand of the Senate, the country had a right to demand of Congress and of the President faith to the Crittenden resolution, the highest faith, because you asked the people for their money, you asked them for their blood, and you said it should be upon that proposition. I put it to the honor of any Senator, has it been upon that proposition? Has not every possible opportunity been taken advantage of to strike at the peculiar institution of one section of the country? I have never considered, as a public man, the question of slavery in a moral aspect. Our fathers have agreed to it; they wrote it down in the Constitution that it should be respected and protected in certain regards; and as they have covenanted in respect to it, so I have looked to it. To stand upon that covenant and agreement I felt to be my highest duty as a citizen, and especially

when I took an oath to respect the Constitution that they made."

Mr. Collamer, of Vermont, said: "Mr. President, I shall content myself simply with reading the opinion of the Supreme Court in the case of *Groves vs. Slaughter*, reported in 15 Peters. In that case the State of Mississippi had inserted in its constitution a provision that slaves should not be brought into that State for sale. Some slaves were brought in and sold, and a note was taken-up and sued in the circuit court. The defence was that the note was unlawfully made. Various points arose in the case, and among others this one: whether that was an attempt on the part of the State to regulate commerce between the States, and, if so, whether it was an encroachment upon the power of Congress to regulate commerce between the States; because the power to regulate commerce between the States does not exist in the alternative, with the States or with the General Government, as each may choose to exercise it; but it is an exclusive grant of power to Congress. In considering that point, Judge McLean says:

In the case of *Gibbons vs. Ogden* (9 Wheat., 186), this court decided that the power to regulate commerce is exclusively vested in Congress, and that no part of it can be exercised by a State.

The necessity of a uniform commercial regulation, more than any other consideration, led to the adoption of the Federal Constitution. And, unless the power be not only paramount but exclusive, the Constitution must fail to attain one of the principal objects of its formation.

It has been contended that a State may exercise a commercial power if the same has not been exercised by Congress; and this power of the State ceased when the Federal authority was exerted over the same subject-matter.

"He goes on to repudiate that, and says:

Can the transfer and sale of slaves from one State to another be regulated by Congress under the commercial power?

"I ask gentlemen to pay attention to this.

If a State may admit or prohibit slaves at its discretion, this power must be in the State and not in Congress. The Constitution seems to recognize the power to be in the States. The importation of certain persons, meaning slaves, which was not to be prohibited before 1808, was limited to such States, then existing, as shall think proper to admit them. Some of the States at that time prohibited the admission of slaves, and their right to do so was as strongly implied by this provision as the right of other States that admitted them.

The Constitution treats slaves as persons. In the second section of the first article, which apportioned Representatives and direct taxes among the States, it provides, "The numbers shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons." And again, in the third section of the fourth article, it is declared that "no person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due."

By the laws of certain States slaves are treated as

property; and the constitution of Mississippi prohibits their being brought into that State by citizens of other States for sale, or as merchandise. Merchandise is a comprehensive term, and may include every article of traffic, whether foreign or domestic, which is properly embraced by a commercial regulation. But if slaves are considered in some of the States as merchandise, that cannot divest them of the leading and controlling quality of persons by which they are designated in the Constitution. * * *

The constitution of Ohio declares that there shall be neither slavery nor involuntary servitude in that State except for the punishment of crimes. Is this provision in conflict with the power in Congress to regulate commerce? It goes much further than the constitution of Mississippi. That prohibits only the introduction of slaves into the State by the citizens of other States as merchandise; but the constitution of Ohio not only does this, but it declares that slavery shall not exist in the State. Does not the greater power include the lesser? If Ohio may prohibit the introduction of slaves into it altogether, may not the State of Mississippi regulate their admission?

"After arguing this at some length he comes to this conclusion:

The power over slavery belongs to the States respectively. It is local in its character and in its effects; and the transfer or sale of slaves cannot be separated from this power. It is, indeed, an essential part of it.

Each State has a right to protect itself against the avarice and intrusion of the slave dealer; to guard its citizens against the inconveniences and dangers of a slave population.

The right to exercise this power by a State is higher and deeper than the Constitution. The evil involves the prosperity and may endanger the existence of a State. Its power to guard against or to remedy the evil rests upon the law of self-preservation, a law vital to every community, and especially to a sovereign State.

"Chief Justice Taney on this same point said:

In my judgment, the power over this subject is exclusively with the several States; and each of them has a right to decide for itself whether it will or will not allow persons of this description to be brought within its limits from another State, either for sale or for any other purpose; and also to prescribe the manner and mode in which they may be introduced, and to determine their condition and treatment within their respective territories; and the action of the several States upon this subject cannot be controlled by Congress, either by virtue of its power to regulate commerce or by virtue of its power conferred by the Constitution of the United States.

"Now, Mr. President, I consider that that case has decided that this subject of the introduction or passage of slaves from one State to another is entirely within the power of the several States; that it does not fall within the power given to Congress to regulate commerce between the States; and for the main reason which I have given before. It was essentially for this: that if we can prohibit it we can allow it; and if we can allow it, we can defeat the purpose of the State altogether. The great point in the case is that they are, as Judge McLean says, persons, not property, not articles of commerce and trade, and therefore do not fall within this delegated power that is given to Congress. I say, therefore, that the sections of the law of 1807 which it is proposed to

repeal, ought to be repealed, because they attempt to regulate it. I must say further, I consider any attempt by Congress to prohibit, or allow, or regulate this subject is to treat these persons as property, articles of merchandise, and to endeavor to exercise the power of Congress under that delegation of power to regulate commerce as covering it is contrary to the decision of the Supreme Court. This last clause which the honorable Senator had added to his amendment prohibiting the coastwise slave trade is an attempt to exercise this power, and I therefore shall be obliged to vote against the amendment."

Mr. Sumner replied: "I merely wish to make one remark as to the question of power. I say nothing as to whether Congress under the Constitution may undertake to regulate the trade in slaves between the States on the land. I waive that question. The proposition before the Senate simply undertakes to prohibit the coastwise slave trade. Now, sir, I hold in my hand Brightley's Digest. By turning to that you will find there is one head entitled 'coasting trade,' containing no less than forty-eight different sections, each section being in the nature of a regulation by Congress on that subject. I turn, then, to another head entitled 'passengers.' There I find seventeen sections, each section being in the nature of a regulation on that subject; and in point of fact it is well known to the Senate that Congress has, by most minute regulations, determined the conditions on which passengers shall be carried in ships. It is known that those regulations are applied especially on board the California steamers, and also the steamers between this country and Europe. In the one case the steamers are foreign; in the other they are domestic; or the trade, if I may so say, is domestic. In view of this minute and ample legislation of Congress on the subject of passengers and of the coasting trade, I submit there can be no question that Congress can go further, and by a final regulation declare that in that coasting trade there shall be no such thing as the slave trade."

The amendment was finally agreed to by the following vote:

YEAS—Messrs. Anthony, Brown, Chandler, Conness, Dixon, Doolittle, Fessenden, Foot, Harlan, Harris, Howard, Howe, Lane of Kansas, Morgan, Merrill, Pomeroy, Sprague, Sumner, Ten Eyck, Wade, Wilkinson, and Wilson—33.

NAYS—Messrs. Buckalew, Carlile, Clark, Hendricks, Hicks, Johnson, Lane of Indiana, Nesmith, Powell, Richardson, Sealsbury, Sherman, Trumbull, Van Winkle, and Willey—14.

The amendment was agreed in the House without a division.

In the Senate, on the 19th of April, the bill to repeal the Fugitive Slave Law was reported without amendment, ordered to be engrossed for a third reading and was read the third time. The bill was as follows:

Be it enacted, &c., That all acts of Congress, or parts of acts, providing for the rendition of fugitives from service or labor, be, and the same are hereby, repealed.

Mr. Sherman, of Ohio, said: "This bill includes not only the law of 1850, which I have always denounced as unconstitutional and unjust, but also the law of 1793. The only doubt I have on the subject is whether we ought to repeal that law, it being a law made by the framers of the Constitution."

Mr. Sumner, of Massachusetts, replied: "I will say the committee took that into consideration; but they felt that we had better make a clean thing of it, purify the country, lift the country up before foreign nations, and let us now wash our hands of all support of slavery."

Mr. Sherman answered: "I am not guided exactly by the motives of the honorable Senator from Massachusetts. He desires to extirpate the whole of these laws. I wish to give to the people of the southern States, the few that are left who have the right to enforce the Constitution against us, their constitutional rights fully and fairly. The law of 1850, I believe, is subject to a fatal objection, and it ought to be repealed. I would have voted for its repeal any time since it was passed. But I submit to the Senator whether it is worth while now to carry this proposition further. The law of 1793 was framed by the men who framed the Constitution. It has been declared valid and constitutional by every tribunal that has acted upon it."

Mr. Sumner further replied: "I beg the Senator's pardon. It was declared to be unconstitutional by the Supreme Court of the United States in the Prigg case; and the Senator knows very well that it is among the records in the life of Judge Story, who gave the opinion in the Prigg case, that the fatal objection to the act of 1793, that it did not give a trial by jury in a case of human freedom, was never argued before the court, and that he personally considered it an open question. I put it to the Senator whether he can doubt that any human being whose freedom is called in question under the Constitution of the United States is entitled to a trial by jury? And if that trial is not given to him by the statute which undertakes to doom him to slavery, I pronounce that statute unconstitutional."

Mr. Sherman said: "Without engaging in any debate on these controverted propositions, and feeling the weight of constitutional obligation upon me, I shall content myself in this case with recording my vote on the bill, and by placing it simply on the ground that I do not wish to extend this repeal back to a law which was framed by the men whom I reverence as the founders of this Government, a law that they believed it to be their duty to pass, that was acquiesced in for more than fifty years—a law that I believe has been sanctioned by the courts and by the people of this country. To repeal that act now, in this time

of revolution, when we are in the midst of war, it seems to me is carrying the matter too far. It can only operate in favor of a very few men comparatively in the State of Kentucky. Maryland has already substantially or soon will abolish slavery. Kentucky is the only State not within the proclamation of the President where this act could have any effect. There are portions of other States excluded from the proclamation; but Kentucky is the only State practically to be affected."

Mr. Sumner said: "Then, Mr. President, I understand that the Senator from Ohio has no doubt that under the Constitution of the United States a human being may be given over to slavery without a trial by jury."

Mr. Sherman replied: "I will not go into the discussion of that question. I only know that that law has been upon the statute-book almost since the foundation of the Government; that it was framed by the men who framed the Government. The very men who passed that law framed the Constitution. Under these circumstances, I will not pronounce it unconstitutional."

Mr. Sherman then moved to add at the end of the bill the words "except the act approved Feb. 12th, 1793, entitled, &c."

Mr. Johnson, of Maryland, said: "The Constitution as it is now, according to my interpretation of it, not only authorizes the passage of the act of 1793, and the passage of the act of 1850, but made it the duty of Congress to pass some law of that description. The honorable member from Massachusetts is mistaken, I think, in supposing that Mr. Justice Story ever even doubted the constitutionality of the act of 1793."

"But, Mr. President, even if the act of 1850 or that of 1793, considered as original propositions, would now for a moment be maintained to be unconstitutional, there is one question which is perfectly plain under the adjudications of the Supreme Court, and particularly in the judgment pronounced by Mr. Justice Story, that the Constitution itself is a fugitive slave act. In the case of *Prigg vs. the State of Pennsylvania*, with which the Senate no doubt is familiar, that court decided, the opinion being given by Mr. Justice Story, that a master had a right, without process and independent of any legislation, national or State, to seize his slave wherever he might find him, and return him to slavery by taking him to the State in which he resided, not only without being guilty of any trespass, but in so doing he was in the full discharge of what the Constitution gave him a right to perform to recover his property. In that particular, and because of that, there was a difference of opinion between the members of that court. The present Chief Justice of the United States was of the opinion (in that respect not agreeing with his colleagues of the majority) that the obligation under the Constitution was an obligation upon the States as well as the United States. The majority of the

court took the opposite view, that all State legislation on the subject was illegal and wholly inoperative. The Chief Justice, with one, I think, or perhaps two members of the bench, thought that the States had a right to pass laws to effect the same purpose, and that so far as they were not inconsistent with the laws which Congress may have passed, they were to be considered as valid."

"What practical good is to be the result of this measure? Will one single slave be returned under these laws? Does the honorable member believe that a single slave will be returned under them? The passage of this bill may create some unpleasant feeling in that part of the South which is sectionally loyal, and among many in that part of the South which, though sectionally disloyal, are themselves loyal."

"The men who framed the Constitution, I suppose, knew what the meaning of that Constitution was just as well as my honorable friend from Massachusetts can know, or as any member of this body can know. The president of the Convention by which it was framed—no friend of slavery, earnestly desiring, as we see by his writings, its early extermination—I suppose is just as likely to have known what the meaning of the Constitution was in this clause at least, which more especially affected his own region of country, as the honorable member from Massachusetts. The men who passed the act of 1793, most of whom had been members of that Convention, were just as likely to know what the Constitution is in this particular as the honorable member from Massachusetts. If he will look at the proceedings of each branch of Congress when the act of 1793 was passed, he will find that nobody ventured to breathe a suspicion either that Congress had no authority to pass it, or that it was not the duty of Congress to pass it. The bill passed both branches unanimously."

"The courts of every State in the Union, and every court of the United States, district or supreme, that has been called upon to pass judgment upon the constitutionality of the act of 1793, has maintained its constitutionality. During the whole series of years which have elapsed from the passage of the act of 1793 up to a comparatively recent day no member of Congress suggested the repeal of that act, either upon grounds of expediency or of unconstitutionality; and no State in the Union by any one of its departments of government ever questioned publicly the validity of that act. Recently, I know, new views have been taken on the subject. The Constitution recently, first, construed with reference to the principles to be found in the Declaration of Independence, and secondly, construed by itself through very many of the clauses which relate to personal freedom, has been held to be so inconsistent with slavery that an act of this description cannot be maintained as valid. The honorable Senator himself, in this report, if I remember it correctly, takes the ground that the clause in

question never was intended to embrace slaves, but apprentices."

Mr. Sumner: "The Senator misunderstood me. I did not doubt that the persons who drew up that clause meant slavery, but I insisted that, according to all just rules of interpretation, which neither the Senator nor myself are at liberty to disobey, the language they employed cannot be interpreted to mean slavery; for according to those rules slavery cannot stand on inference. It requires a positive text to sustain it."

Mr. Johnson: "I do not know what the honorable member supposes to be the limited effect of inference. I suppose when we are called upon to construe words, we are to construe them according to their intent. Now, I understand the honorable member to say that the intent of the persons by whom those words were used was to embrace slavery, but he says they have not carried out their intent."

Mr. Sumner: "As occurs very often in a will or contract."

Mr. Johnson: "But wills and contracts are not made by such men as composed that Convention. The brightest intellects that ever shed glory upon the world were to be found in that Convention. Every clause in the Constitution was carefully penned in the first instance, submitted to the most careful criticisms throughout, and not adopted until every man in the Convention knew what every other man in the Convention meant. If there was any member of that Convention who supposed that these words would not comprehend slaves, and he kept that to himself, he did not deal fairly with his compatriots. Why do not the words include slaves? Why is it a matter of inference? Do they not include apprentices? They include somebody, some class of people; and if they do, what class is included? Are apprentices included? The honorable member will admit that."

Mr. Sumner: "And redemptioners."

Mr. Johnson: "And redemptioners; and why? Because they are held to service. Is he who is held to service for life less held to service than he who is held to service for a few years? The honorable member may assail the laws of the States and deny that there can be any law in any State which can make one man the servant of another for life; but, assuming the validity of those laws (and the very object of repealing this act of 1793 and the act of 1850 is because it is assumed that the laws would operate upon them), then it would follow that slaves are included within the term 'held to service,' unless it be true that he who is held to service for life is not held to service equally with him who is held to service for a month or a year."

Mr. Davis, of Kentucky: "Will the Senator from Maryland allow me to call his attention to the third clause of the second section of the first article of the Constitution? It is in these words?"

Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons."

"Who are meant by the words 'three-fifths of all other persons?'"

Mr. Johnson: "I am obliged to my friend from Kentucky for his reference to that clause. The language of the particular clause in question is this:

No person held to service or labor in one State, under the laws thereof.

"All we have to ascertain is, is there a law in Maryland which gives me a right to the service of a slave for life? If there is, then according to the words of the provision if he escapes he is to be returned to me. But if there could be any doubt, looking to the terms themselves which are to be found in this clause, that doubt would be removed by the particular clause referred to by the honorable member from Kentucky. The question between the honorable member from Massachusetts and myself, and between him and Washington and every member of the Convention, all the State Legislatures, every State court, every district court of the United States, and the Supreme Court of the United States, with Marshall at their head, is whether the term, 'held to service,' as used in what is called the fugitive slave clause, embraces slaves."

Mr. Sumner: "The Senator will pardon me. That is not the question. The question is whether the whole clause is applicable to slaves. The Senator will observe that there are still other operative words. The clause is as follows:

No person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

"The Senator will observe this clause speaks of a party, not of a thing. It speaks of a person held to service or labor, not of a thing; of a person held to service or labor pursued into another State where he is claimed by one to whom such service or labor may be due. All that implies contract. It does not imply a condition of slavery. No service or labor is due from a slave to his master; of course not."

Mr. Johnson: "I do not expect to satisfy the honorable member. I do not think anybody could satisfy him. I knew exactly what his reading of that clause was, and whatever might be urged he would be 'of the same opinion still.' He says now that it applies only to a person who is under a contract to render service to the party from whom he has escaped. Where does he get that meaning? The words used are, 'any person held to service or labor under the laws of a State,' not under contract, and the apprentice would be included, and the indented servant would be included, not be-

cause he was an apprentice by contract, not because he was an indented servant by contract, but because by the law of the State that contract was one from which he could not escape, because by the law of the State he was bound, having entered into the contract, to render the service for which the contract stipulated. But if the law of the State gave to one man a right to the service of another, and that law is legal (which is not involved in this question), if slavery as it exists in the States is legal, then he who owes service in a slave State to a citizen of the slave State owes service to such citizen 'under the laws thereof.'

Mr. Sumner: "A slave cannot owe service, the Senator will bear in mind."

Mr. Johnson: "I cannot bear that in mind. I cannot get it into the mind."

Mr. Sumner: "It is very essential in discussing this question."

Mr. Johnson: "I know it is absolutely essential to come to your conclusion; but it is a conclusion I think that no other gentleman can well come to, because no other gentleman can well get that into his mind. But I was about to say that the clause referred to by the member from Kentucky is pregnant with meaning on the question:

Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years.

"Now, one of your classes is provided for. Your apprentices and your indented servants are 'bound' only 'for a term of years.' They are to be added. Who are to be excluded? 'Indians not taxed' are to be excluded. Who else is to be added? 'Three-fifths of all other persons.' What is the meaning of these words?

"Now, who are the 'persons,' three-fifths of whom are to be added for the purpose of determining the question of representation and the other question of taxation? If you take the apprentices out, and the indented servants out, and the Indians out, are there any other persons than slaves? The honorable member is not to be told, Mr. President, that one of the political objections to slavery which the North has urged, and which was quite a sound one if they were about to make a constitution for themselves, was that three-fifths of the slaves were added for the purpose of increasing the representation of the South, when the North was denied the right to increase its own representation by having added in any way for that purpose any portion of its property, whatever that might be. The objection was a political one. It was that this clause gave to the South greater weight in the councils of the country than their white free population entitled them to; and the objection was, not that apprentices were added, for they were white, not that indented servants were added, for they were

white, but that what the South considered as property, slaves, were added. In all the debates upon that subject, that has been a fruitful topic of complaint, and the North no doubt in a few years after the Constitution was adopted, and particularly after the southern States began to multiply and this slave population began to multiply, would have changed the Constitution if they could in that particular. When the Constitution was adopted, it was a matter comparatively unimportant; but when you added southern State after southern State, and brought in slaves by the thousand, the disproportion between the white population and the slave population became so great that in point of fact you made an aristocracy of the South, and they ruled the North, not by their own numbers, but because they were masters of the slaves.

"But what was the object of the ninth section of the first article? That is a provision which was taken out of the amendatory clause, and that ninth section says:

The migration or importation of such persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the year 1808.

"What is the meaning of 'persons' there? Were there any white apprentice boys in Africa? Were there any laws of apprenticeship in Africa? Did any there by contract owe service to any master in Africa? Did any there by contract agree to owe service to any man who would come there and take them away? We know it was not so. That ruthless and barbarous traffic, the disgrace of civilization, the dishonor of England more than of ourselves, was a trade of violence. They were snatched from their country by force or by fraud, subjected to all the dangers of the passage hence, dying by thousands and hundreds of thousands, after suffering excruciating tortures that make the blood run cold even when we read of them at this distant day; they were brought here and made slaves, and we said that they might continue to be brought for a time, as included under the term 'persons;' and the honorable member, therefore, unless he is able to read that word 'persons' in the ninth section as comprehending only apprentices, cannot read the same word to be found in the fugitive slave clause as meaning only apprentices.

"The Senate is not to be told, Mr. President, that I share as earnestly as the honorable member from Massachusetts can in a desire to see the institution terminated. The difference between us is, as I think, that he takes a different view of constitutional obligation. It is, as I think, that the Constitution recognizes the institution in plain terms, that it was the purpose of our fathers to make such a recognition, that they acted in pursuance of that purpose during the whole period of their own lives upon earth, that every act of legislation passed by them during the time that they were guiding the councils of the country recognized the institu-

tion and deemed it the duty of every department of the government, as long as the institution should remain, to protect it."

Mr. Sumner: "I shall not be betrayed into any extended debate; but shall content myself with replying directly to what has been said on the other side.

"There is first the Senator from Ohio (Mr. Sherman), who intervened to arrest the generous purpose of the Senate, as it was about to vote, by a proposition to keep alive the old act of 1793. Strange that now, while we are in deadly conflict with slavery, it should be proposed to keep alive an ancient support of slavery. But the Senator gravely insists, and the Senator from Maryland (Mr. Johnson) insists with him. But the Senator from Ohio does not seem to be aware of the character of the statute which he proposes to keep alive. Let me remind him that by this statute which he cherishes so warmly a fellow-man may be hurried before a magistrate and doomed to slavery without a trial by jury. Can this be constitutional? Will the Senator sanction such an enactment?

"But the Senator from Maryland, not content with affirming the constitutionality of the act of 1793, has plunged into a general discussion on the fugitive clause of the Constitution. He insists laboriously that it was intended to cover fugitive slaves. When I reminded him that its authors might have intended it to cover fugitive slaves, without succeeding in their attempts, he then insists that it does cover fugitive slaves. Well, sir, there I meet him point-blank. I insist that, whatever may have been the original intention of the framers of that clause, they did not succeed in making it cover fugitive slaves. It is a question of construction, and the language employed is not applicable to fugitive slaves. It does not describe them, and cannot by any just tribunal be extended to embrace them. If the prejudices of the Senator were not already enlisted, I should not doubt his judgment on this point, which in the light of jurisprudence is so clear.

"There is a rule of interpretation which the Senator will not call in question. Where any language is open to two constructions, one favorable and the other odious, that which is odious must be rejected. I do not stop to give authorities. The rule is unquestionable and the authorities are ample. But do not forget the conclusion: that which is odious must be rejected. Now, the Senator has already admitted that the language of the clause is applicable to apprentices. Very well. That is enough. In its application to apprentices, redemptioners, and the like, it is exhausted, so that it cannot be made to cover a slave without offending against the rule which requires us to adopt the construction which is the least odious. And, sir, if we go further and scan nicely the language of the clause, we shall find that the words employed are all applicable to a relation of contract or debt, and not to a relation

founded on force. The clause is applicable to a 'person,' and not to a thing, and this 'person' is to be surrendered on the claim of the person to whom his service or labor may be due. But clearly no labor or service can be due from a slave to a master. The whole pretension is an absurdity. And, if you give to this word its legitimate application, you must restrain it to a case of contract or debt. In this glance I omit the argument founded on history, and the well-known opinions of leading minds in the Convention, and confine myself to the text of the Constitution.

"But the Senator dwelt especially on the words 'held to service or labor in one State under the laws thereof,' and triumphantly insisted that slaves were included under this language. Here again he is mistaken. Apprentices and redemptioners were held under 'laws;' but I need not remind the Senator of the admission repeatedly made on this floor by Mr. Mason, that there were no 'laws' for slavery in any slave State; at least, that none could be produced. Besides, as a jurist, the Senator cannot have forgotten the ancient truth that injustice cannot be 'law,' but is always to be regarded as an 'abuse' or a 'violence,' even though expressed in the form of 'law.' In presence of this principle, which has the sanction of as great a lawyer as St. Augustine, and in the face of the positive assertion of Mr. Mason, that no 'law' for slavery could be found in the slave States, what becomes of the argument of the Senator? No, sir. The case is clear. No ingenuity of honest effort can make the words that the Senator cites or any others in that clause sanction slavery and the hunting of slaves. In order to proceed with his argument the Senator must begin by setting aside those commanding rules of interpretation which are binding on him as on myself. If, where words are susceptible of two significations, one favorable and the other odious, the former only can be taken, then must the Senator restrain this clause to that signification which is not odious. And again, if every word is always to be construed so as most to favor liberty, then must the Senator follow implicitly this rule. But these two rules make it impossible to torture this clause into any odious or tyrannical signification. They keep it clean and pure from slavery.

"Sir, I feel humbled by the necessity of this discussion; that at this late day I should be called to vindicate the Constitution of my country against glosses and interpretations in the interest of slavery. Pardon me if for a moment, leaving the two Senators who seek to foist slavery into the Constitution, I turn to the question itself, not so much for argument as for statement. If I seem to repeat, it is because there are certain points which I desire to impress upon the Senate. To my mind nothing is clearer than that, according to unquestionable rules of interpretation, the clause of the Constitution, whatever may have been the

intent of its authors, cannot be considered applicable to slaves. Such is slavery that, from the nature of the case, it cannot be sanctioned or legalized except by 'positive' words. It cannot stand on inference. This rule, which no reason can shake, drove Lord Mansfield to his great judgment in *Somerset's* case. African slavery had for two generations prevailed in England. It had been pronounced to be legal by eminent lawyers and judges. Some of the brightest names in Westminster Hall had given to it the sanction of professional opinion and of judicial decision. At last a person at that time unknown, Granville Sharp, struck by the injustice of slavery, devoted himself to consider the grounds on which its legality was recognized. He studied the laws of England, and all the evidences of its constitution. In the course of these studies, he was gratified to find that there was no positive establishment of African slavery in England, and, indeed, that the words 'slave' and 'slavery' were nowhere to be found in the British constitution. He next applied himself to the accumulation of well-known rules of interpretation, requiring, in any case of doubt or question, that the interpretation should be on the side of liberty, and especially that any man was 'impious' and 'cruel' who did not favor liberty. Impiety and cruelty are not light burdens for an honest conscience. The conclusion was irresistible that slavery could not exist in England.

"But the unanswerable argument of Granville Sharp was rejected at first by the bar, who regarded it as an attempted innovation. The direct precedents, and the weight of authority, were the other way, and this with most lawyers is enough. Harvey said that no person above 'forty' accepted his discovery of the circulation of the blood. And Granville Sharp found himself in the same predicament. But this good man was not disheartened. He knew well that there was no statute of limitations against principles; and, better still, that principles must finally prevail over precedents. Principles are immortal, and bloom with perpetual youth. Precedents are mortal, and die from age, decrepitude, and decay. Against principles, precedents may for a while prevail; but the time must surely come when that which is mortal must yield to that which is immortal. In this conviction he persevered, until at last lawyers were convinced, and then the court.

"The judgment of Lord Mansfield on this occasion, constitutes a landmark of law which will be remembered proudly when all his contributions to commercial law and general jurisprudence are forgotten. It was a contribution to the British constitution and to human rights. Like every principle of natural law, it approves itself at once to the reason and conscience. And this authority I now invoke in the interpretation of the fugitive clause.

"At this moment of severe trial, I wish my country to put itself right with that Supreme

Power which holds in its hands the destinies of nations. It is as true in the life of nations as in the life of individuals, that if you would have equity, you must do equity; but the great equity which we must do is to be found in justice to an oppressed race. It is vain that you complain of disaster to your arms, of colored soldiers and their brave officers cruelly treated at Fort Wagner, of colored soldiers and their brave officers massacred at Fort Pillow, if you yourselves continue to set the example of injustice. The story of the Israelites will be revived, and plague after plague will be sent, sounding forever the old commandment, 'Let my people go.' If the plagues that have been sent already are not enough, another and yet another will visit us. There is one assurance of obedience which you can give. It is to expunge from your statute-book all support of slavery. Be in earnest here, and you will be practical. Then, having done equity, you may fearlessly ask for equity.

The question being taken by yeas and nays, resulted—yeas 24, nays 17; as follows:

YEAS—Messrs. Buckalew, Carlile, Collamer, Cowan, Davis, Dixon, Doolittle, Foster, Harris, Henderson, Hendricks, Howe, Johnson, Lane of Indiana, McDougall, Nesmith, Powell, Riddle, Saulsbury, Sherman, Ten Eyck, Trumbull, Van Winkle, and Willey—24.

NAYS—Messrs. Anthony, Brown, Clark, Conness, Fessenden, Grimes, Hale, Howard, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sprague, Sumner, Wilkinson, and Wilson—17.

So the amendment was agreed to.

Mr. Conness moved to lay the bill on the table, which was disagreed to—yeas 9, nays 81. No further action was taken upon it in the Senate.

In the House, on June 13th, a House bill was considered to repeal the fugitive slave law. The bill repealed sections three and four of the act of Feb. 12th, 1793, and an act supplementary passed Sept. 1850.

Mr. King, of Missouri, said: "The framers of our Constitution spoke for themselves and their children, and the children of those and their posterity, whose delegates they were. Those who vote to repeal this law, certainly will not attempt to place its passage on any such utopian theories as those to which I have been referring; nor will they, I trust, take the other ground, assumed by those visionary theorists of the same political party to which I have already referred, who take as their theory the exact reverse, and declare that ours is a pro-slavery Constitution, and that the Union, of which it is the only bond, by reason thereof, is a lie. 'The American Union is an imposture, a covenant with death, and an agreement with hell.' It must be overthrown. 'Up with the flag of disunion.'

"I will not do gentlemen the injustice to charge that they take either of the grounds to which I have been referring. If, however, they do, it will take a little more than the ability of plain 'Mr. Granville Sharp,' who by

his common sense and powerful arguments drove Lord Chief Justice Mansfield from his opinions of constitutional law. They must encounter first the opinions of the framers of our Constitution, and their sentiments uttered by such men as Alexander Hamilton, Fisher Ames, James Madison, Luther Martin, Patrick Henry, and other distinguished statesmen. Yes, more, they must encounter the sentiments delivered by Washington to Congress, by the unanimous order of the Convention, when he submitted the Constitution to Congress. In his letter to the president of Congress, among other reasons for its adoption, he says:

It is obviously impracticable, in the Federal Government of these States, to secure all rights of independent sovereignty to each, and yet provide for the interest and safety of all. Individuals entering into society must give up a share of liberty to preserve the rest. The magnitude of the sacrifice must depend as well on situation and circumstance, as on the object to be obtained. It is at all times difficult to draw with precision the line between those rights which must be surrendered and those which may be reserved; and on the present occasion this difficulty was increased by a difference among the several States as to their situation, extent, habits, and particular interests.

In all our deliberations on this subject we kept steadily in our view that which appears to us the greatest interest of every true American—the consolidation of our Union—in which is involved our prosperity, felicity, safety, perhaps our national existence. This important consideration, seriously and deeply impressed on our minds, led each State in the Convention to be less rigid on points of inferior magnitude than might have been otherwise expected, and thus the Constitution which we now present is the result of a spirit of amity and of that mutual deference and concession which the peculiarity of our political situation rendered indispensable.

"These are the sentiments uttered by Washington on behalf of the Convention which adopted our Constitution. How worthy now, in this dark day of our troubles, in the midst of a revolution brought on us by a disregard of these sentiments, that we should emulate the noble example here set us. Would that these patriot sages were now here, in this their country's day of trial, with their lessons of wisdom, and to commend them to national approval.

When the Constitution was referred by Congress to the various States for its adoption, we find the same enlarged views taken, and often by the same men who had been in the Convention, urging reasons why it should be adopted. In the northern States the effort was to satisfy the people of the necessity there was for securing to the South their rights in slave property, and that by the compromise the North received more than an equivalent in the advantages secured to their commerce and navigation. The solemn compact between the slaveholding and non-slaveholding States was adopted by the unanimous votes of the States then present in the Convention. The dissent of a single State might have marred the whole scheme of compromises so elaborately prepared as a basis of the new Constitution, and remit-

ted the States of the Confederacy to a condition little short of anarchy.

"That the Constitution of 1787 was in truth founded on a deliberately-formed scheme of compromises and equivalents is a historical fact denied by none in terms, but virtually and practically by many who believe themselves to be statesmen, but who are nevertheless politicians merely. The importance of this historical fact justifies, if it does not demand, an exhibition of the evidence, in part at least, by which it is sustained.

"Here are the declarations of Alexander Hamilton to the New York convention, assembled at Poughkeepsie, in June, 1788, to pass on the new Constitution submitted to the States by the General Convention assembled at Philadelphia. I read from Eliot's Debates, page 212. He said:

In order that the committee may understand clearly the principles upon which the Convention acted, I think it necessary to explain some particular circumstances.

Sir, the natural situation of the country seems to divide its interests into different classes. There are navigating and non-navigating States; the northern are properly the navigating States: the southern appear to possess neither the means nor the spirit of navigation. This difference of situation naturally produces a dissimilarity of interests and views respecting foreign commerce. It was the interest of the *northern States* that there should be no restraints on their navigation, and that they should have full power, by a *majority* in Congress, to make commercial regulations in favor of their own and in restraint of the navigation of foreigners. The *southern States* wished to impose a restraint on the northern, by requiring that *two-thirds* in Congress should be requisite to pass an act in regulation of commerce; they were apprehensive that the restraints of a navigation law would discourage foreigners, and by obliging them to employ shipping of the northern States, would probably enhance their freight. This being the case, they insisted strenuously on having this provision ingrafted on the Constitution; and the northern States were as anxious in opposing it.

"Again.

Much has been said of the impropriety of representing men who have no will of their own. Whether this be reasoning or declamation I will not presume to say. It is the unfortunate situation of the southern States to have a great part of their population, as well as property, in blacks. The regulation complained of was one result of the spirit of accommodation which governed the Convention, and without this indulgence no Union could possibly have been formed. And, sir, considering some *peculiar advantages* which we derive, it is entirely just that they should be gratified. The southern States possess certain staples, tobacco, rice, indigo, &c., which must now be capital objects in treaties of commerce with foreign nations; and the advantages which they necessarily procure in these treaties will be felt throughout all the States.

It became necessary, therefore, to compromise, or the Convention would have dissolved without effecting any thing. Would it have been wise and prudent in that body, in this critical situation, to have deserted their country? No. Every man who hears me, every wise man in the United States, would have condemned them. The Convention were obliged to appoint a committee for accommodation. In this committee the arrangement was formed as it now stands, and their report was accepted. It was a

delicate point, and it was necessary that all parties should be indulged.

"So much for the testimony of a distinguished northern statesman to the fact that the Constitution was a deliberately concocted system of compromises—the work of 'a committee for accommodation,' specially appointed for the purpose, and in which committee the rights of the slaveholders were distinctly recognized and guaranteed. And stronger still is his evidence as the representative of a great navigating and commercial State, as to the value and importance of the equivalents given by the South for all the concessions made in the Convention by the North connected with the subject of slavery.

"The eloquence and fervid zeal of Fisher Ames, who, like Hamilton, was cut off in the full bloom of his intellectual powers, urged the acceptance of the new Constitution in the Convention of Massachusetts. He said:

Shall we put every thing that we hold precious to the hazard by rejecting this Constitution. *We have great advantages* by it in respect of navigation, and it is the general interests of the States that we should have them. But if we reject it, what security have we that we shall obtain them a second time, against the local interests and prejudices of other States?

"I could refer to the opinions at that day of other distinguished northern statesmen as to the absolute necessity of introducing these compromises into the Constitution, and without which no Union could ever have been formed, but I deem it unnecessary.

"To the same effect, and with like arguments, southern statesmen urged in their conventions the adoption of the Constitution. In reference to the fugitive slave clause, Edmund Randolph, in the Virginian convention, said:

Were it right to mention what passed in Convention on the occasion, I might tell you that the southern States—even South Carolina herself—conceived this property to be secured by these words.

"And Judge Iredell, in the North Carolina convention, referring to this clause of the Constitution, says:

In some of the northern States they have emancipated all their slaves. If any of our slaves go there and remain a certain time they would by their present laws be entitled to their freedom, so that their masters could not get them again. This would be extremely prejudicial to the inhabitants of the southern States, and to prevent it this clause is inserted in the Constitution.

"In the South Carolina convention for the adoption of the Constitution we have these emphatic expressions from Charles Cotesworth Pinckney:

We have obtained a right for the recovery of our slaves in whatever part of America they may take refuge, which is a right we had not before.

"Mr. Speaker, I may add truly that no such right existed under our Articles of Confederation, yet it is equally true that this Congress of the Confederation would not pass the celebrated Ordinance of 1787, in reference to the Northwestern Territory, until a clause for delivering up fugitive slaves was inserted.

"Mr. Speaker, I could add, if necessary, contemporaneous expressions going to sustain the same view from the Legislatures and conventions of every State to which the Constitution was submitted for its adoption. I now refer briefly to the view taken by the courts and the learned commentators upon the Constitution since its adoption.

"The passage of the act in reference to fugitive slaves in 1798 was not called for by any complaints from the South, but it is historically known that, upon a call for remedial legislation upon the subject of the surrender of fugitives from justice, this question also naturally pressed itself upon Congress, many of its members having been in the Convention when the Constitution was adopted.

"The owner of a slave, in the absence of any law, has the right under the Constitution, upon the principles of recapture at the common law, to seize and recapture his slave whenever he can do it without a breach of the peace. But cases may often arise when he cannot lay his hands on him by reason of obstacles thrown in the way, and hence the necessity of some legislation. This opinion and position is fully sustained by Mr. Justice Story in the opinion delivered in the case of *Prigg vs. The State of Pennsylvania*. In this decision, announced by a northern judge, he says:

The full recognition of this right and title was indispensable to the security of this species of property in all the slaveholding States, and was so vital to the preservation of their domestic interests and institutions that it constituted a fundamental article, without the adoption of which the Union could not have been formed.

"I will read no more of that decision. It is lengthy, and fully discusses the constitutional question as to the rights of the slave States upon this subject. I am aware that, since the death of Judge Story, some fanatic has procured a note to be appended to the decision, stating that Judge Story had said, out of court, that the constitutionality of the act was not considered in making the decision. The facts of this note are so irreconcilable with the decision that I will not insult the intelligence of the House by further comment upon it. It has emanated from the brain of some abolitionist who never had more than one idea in his head at a time, and that not a very clear one.

"To the same effect is the opinion of the supreme court of Pennsylvania, by Chief Justice Tilghman, in the case of *Wright vs. Deacon*, 5 S. and R., 63. He says:

Whatever may be our opinion on the subject of slavery, it is well known that our southern brethren would not have consented to have become parties to a Constitution under which the United States have enjoyed so much prosperity, unless their property in slaves had been secured.

"And I may add that all our distinguished writers and commentators upon this subject are to the same effect."

Mr. Hubbard, of Connecticut, followed, saying: "I deny that any constitutional question

whatever properly arises under the consideration of the subject-matter of the bill. The Constitution does not anywhere provide for an enactment by Congress of any law for the rendition of fugitive slaves; and if it did, I hold that by the treason of slavery the people are absolved from that obligation upon their part. This is so by the common law, and in the nature and fitness of things it must be so."

Considerable debate ensued, when the bill was passed by the following vote:

YEAS—Messrs. Alley, Allison, Ames, Ashley, John D. Baldwin, Baxter, Beaman, Blaine, Blair, Blow, Boutwell, Boyd, Brandegree, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Creswell, Henry Winter Davis, Thomas T. Davis, Dawes, Dixon, Donnelly, Driggs, Eckley, Eliot, Farnsworth, Frank, Garfield, Gooch, Griswold, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Ingersoll, Jenckes, Julian, Kelley, Francis W. Kellogg, Littlejohn, Loan, Longyear, Marvin, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Price, Alexander H. Rice, John H. Rice, Schenck, Scofield, Shannon, Sloan, Spalding, Starr, Stevens, Thayer, Thomas, Tracy, Upson, Van Valkenburgh, Webster, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge—83.

NAYS—Messrs. James C. Allen, William J. Allen, Augustus C. Baldwin, Bliss, Brooks, James S. Brown, Chanler, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, English, Finck, Ganson, Grider, Harding, Harrington, Charles M. Harris, Holman, Hutchins, Kalbfleisch, Kernan, King, Knapp, Law, Lasear, Le Blond, Mallory, Marcy, McDowell, McKinney, William H. Miller, James B. Morris, Morrison, Odell, Pendleton, Pruyn, Radford, Robinson, James S. Rollins, Ross, Smithers, William G. Steele, Stiles, Strouse, Stuart, Sweet, Wadsworth, Ward, Wheeler, Chilton A. White, Joseph W. White, and Fernando Wood—57.

NOT VOTING—Messrs. Ancona, Anderson, Arnold, Bailey, Broomall, William G. Brown, Clay, Deming, Dumont, Fenton, Grinnell, Hale, Hall, Benjamin G. Harris, Herrick, Philip Johnson, William Johnson, Kasson, Orlando Kellogg, Long, McAllister, McBride, Middleton, Nelson, Noble, John O'Neill, Perry, Pomeroy, Samuel J. Randall, William H. Randall, Rogers, Edward H. Rollins, Scott, Smith, Stebbins, John B. Steele, Voorhees, Elihu B. Washburne, William B. Washburn, Winfield, Benjamin Wood, and Yeaman—42.

This bill of the House was considered in the Senate on June 28d, and a motion was made to amend it by excepting from repeal the act of Feb. 12th, 1798; thus making it similar to the bill of the Senate. This motion failed, and the bill from the House was passed by the following vote:

YEAS—Messrs. Anthony, Brown, Chandler, Clark, Conness, Dixon, Fessenden, Foot, Grimes, Hale, Harlan, Harris, Hicks, Howard, Howe, Lane of Indiana, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sprague, Sumner, Ten Eyck, Trumbull, Wade, and Wilson—27.

NAYS—Messrs. Buckalew, Carlile, Cowan, Davis, Johnson, McDougall, Powell, Richardson, Riddle, Saulsbury, Van Winkle, and Willey—12.

ABSENT—Messrs. Collamer, Doolittle, Foster, Harding, Henderson, Hendricks, Nesmith, Sherman, Wilkinson, and Wright—10.

In the Senate, on the 28th of March, the
VOL. IV.—17 A

following joint resolution relative to amendments to the Constitution, was taken up for discussion:

ART. 1. Slavery or involuntary servitude, except as a punishment for crime, shall not exist in the United States.

ART. 2. The Congress, whenever a majority of the members elected to each House shall deem it necessary, may propose amendments to the Constitution, or, on the application of the Legislatures of a majority of the several States, shall call a convention for proposing amendments, which in either case shall be valid, to all intents and purposes, as part of the Constitution, when ratified by the Legislatures of two-thirds of the several States, or by conventions in two-thirds thereof, as the one or the other mode of ratification may be proposed by Congress.

To this resolution the Committee on the Judiciary proposed the following amendment by striking out all after the resolving clause:

(Two-thirds of both Houses concurring). That the following article be proposed to the Legislatures of the several States as an amendment to the Constitution of the United States, which, when ratified by three-fourths of said Legislatures, shall be valid, to all intents and purposes, as a part of the said Constitution, namely:

ART. XIII.—SEC. 1. Neither slavery nor involuntary servitude, except as punishment for crime, whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

SEC. 2. Congress shall have power to enforce this article by appropriate legislation.

Mr. Trumbull, of Illinois, took the floor and said: "It is a proposition so to amend the Constitution of the United States as forever to prohibit slavery within its jurisdiction, and authorize the Congress of the United States to pass such laws as may be necessary to carry this provision into effect.

"Without stopping to inquire into all the causes of our troubles, and of the distress, desolation, and death which have grown out of this atrocious rebellion, I suppose it will be generally admitted that they sprung from slavery. If a large political party in the North attributes these troubles to the impertinent interference of northern philanthropists and fanatics with an institution in the southern States with which they had no right to interfere, I reply, if there had been no such institution there could have been no alleged impertinent interference; if there had been no slavery in the South, there could have been no abolitionists in the North to interfere with it. If, upon the other hand, it be said that this rebellion grows out of the attempt on the part of those in the interest of slavery to govern this country so as to perpetuate and increase the slaveholding power, and failing in this that they have endeavored to overthrow the Government and set up an empire of their own, founded upon slavery as its chief cornerstone, I reply, if there had been no slavery there could have been no foundation on which to build. If the freedom of speech and of the press, so dear to freemen everywhere, and especially cherished in this time of war by a large party in the North who are now opposed to interfering with slavery, has been denied us

all our lives in one-half the States of the Union, it was by reason of slavery.

"If these Halls have resounded from our earliest recollections with strifes and contests of sections, ending sometimes in blood, it was slavery which almost always occasioned them. No superficial observer, even, of our history North or South, or of any party, can doubt that slavery lies at the bottom of our present troubles. Our fathers who made the Constitution regarded it as an evil, and looked forward to its early extinction. They felt the inconsistency of their position, while proclaiming the equal rights of all to life, liberty, and happiness, they denied liberty, happiness, and life itself to a whole race, except in subordination to them. It was impossible, in the nature of things, that a Government based on such antagonistic principles could permanently and peacefully endure, nor did its founders expect it would. They looked forward to the not distant, nor as they supposed uncertain period when slavery should be abolished, and the Government become in fact, what they made it in name, one securing the blessings of liberty to all. The history of the last seventy years has proved that the founders of the Republic were mistaken in their expectations; and slavery, so far from gradually disappearing as they had anticipated, had so strengthened itself that in 1860 its advocates demanded the control of the nation in its interests, failing in which they attempted its overthrow. This attempt brought into hostile collision the slaveholding aristocracy, who made the right to live by the toil of others the chief article of their faith, and the free laboring masses of the North, who believing in the right of every man to eat the bread his own hands had earned."

He then proceeded to state the various acts of Congress since the war began, and the measures of the Administration relative to slaves, and said: "If, then, we are to get rid of the institution, we must have some more efficient way of doing it than by the proclamations that have been issued or the acts of Congress which have been passed.

"Then, sir, in my judgment, the only effectual way of ridding the country of slavery, and so that it cannot be resuscitated, is by an amendment of the Constitution forever prohibiting it within the jurisdiction of the United States. This amendment adopted, not only does slavery cease, but it can never be reestablished by State authority, or in any other way than by again amending the Constitution. Whereas, if slavery should not be abolished by act of Congress or proclamation of the President, assuming that either has the power to do it, there is nothing in the Constitution to prevent any State from reestablishing it. This change of the Constitution will also relieve us of all difficulty in the restoration to the Union of the Rebel States when our brave soldiers shall have reduced them to obedience to the laws.

"To secure its passage requires, in the first

instance, a vote of two-thirds in its favor in each branch of Congress, and its ratification subsequently by three-fourths of the States of the Union. Can these majorities be obtained? It is very generally conceded, I believe, by men of all political parties, that slavery is gone; that the value of slavery is destroyed by the rebellion. What object, then, can there be on the part of any one, in the present state of public feeling in the country, to giving the people an opportunity to pass upon this question?"

Mr. Wilson, of Massachusetts, followed with a very full statement of his views relative to slavery, and thus referred to the pending question: "But, sir, the crowning act in this series of acts for the restriction and extinction of slavery in America is this proposed amendment to the Constitution prohibiting the existence of slavery for ever more in the Republic of the United States. If this amendment shall be incorporated by the will of the nation into the Constitution of the United States, it will obliterate the last lingering vestiges of the slave system; its chattelizing, degrading, and bloody codes; its dark, malignant, barbarizing spirit; all it was and is, every thing connected with it or pertaining to it, from the face of the nation it has scarred with moral desolation, from the bosom of the country it has reddened with the blood and strewn with the graves of patriotism. The incorporation of this amendment into the organic law of the nation will make impossible for ever more the reappearing of the discarded slave system, and the returning of the despotism of the slavemasters' domination.

"Then, sir, when this amendment to the Constitution shall be consummated, the shackle will fall from the limbs of the hapless bondman, and the lash drop from the weary hand of the taskmaster. Then the sharp cry of the agonizing hearts of severed families will cease to vex the weary ear of the nation, and to pierce the ear of Him whose judgments are now avenging the wrongs of centuries. Then the slave mart, pen, and auction-block, with their clanking fetters for human limbs, will disappear from the land they have brutalized, and the school-house will rise to enlighten the darkened intellect of a race imbruted by long years of enforced ignorance. Then the sacred rights of human nature, the hallowed family relations of husband and wife, parent and child, will be protected by the guardian spirit of that law which makes sacred alike the proud homes and lowly cabins of freedom. Then the scarred earth, blighted by the sweat and tears of bondage, will bloom again under the quickening culture of rewarded toil. Then the wronged victim of the slave system, the poor white man, and sand-hiller, the clay-eater of the wasted fields of California, impoverished, debased, dishonored by the system that makes toil a badge of disgrace, and the instruction of the brain and soul of man a crime, will lift his abashed forehead to the skies and begin to run the race of im-

provement, progress, and elevation. Then the nation, 'regenerated and disenthralled by the genius of universal emancipation,' will run the career of development, power, and glory, quickened, animated, and guided by the spirit of the Christian democracy that 'pulls not the highest down, but lifts the lowest up.'

Mr. Saulsbury, of Delaware, opposed the joint resolution, saying: "I may be about to announce a heresy, but if it is a heresy I firmly believe in the truth of it, that if the Senate of the United States were to adopt this joint resolution, and were to submit it to all the States of this Union, and if three-fourths of the States should ratify the amendment, it would not be binding on any State whose interest was affected by it if that State protested against it. I know the popular doctrine is, that if a convention is called by two-thirds of the States and proposes any amendments whatever to the Constitution, which amendments are ratified by three-fourths of the States, such amendments then become the supreme law of the land, and are binding on each and every State—those who had not assented to them as well as those who had. Such is not the opinion which I entertain of this matter. I may be in error; I know my view is against the popular opinion; but let us test it and see who is right and who is wrong. Who framed this Constitution? Who made it?"

"Sir, that Constitution was framed by the States, by the people of the States, who elected delegates to their conventions or Legislatures. It was submitted separately to each State. It never was submitted to the people of the United States as an aggregate body. It was not even submitted to the Congress of the United States elected by the people from the particular States. It was not submitted to a general convention of delegates elected in the different States, but it was submitted directly and immediately to the States themselves. It was to bind no State, and had no effect in any State except those States which, in their independent and separate character, ratified it.

"Our seceding fathers withdrew not *en masse* from the old Articles of Confederation. The State which I have the honor in part to represent, although now one of the least populous in the Union, was the first seceder. New Jersey, Pennsylvania, and other States followed, until finally New Hampshire made secession complete from the other States by ratifying that Constitution. New York, Virginia, North Carolina, and Rhode Island were left to determine the great issue of peaceable separation or forcible opposition to it. They were left to try the power of military coercion or to exclaim that their wayward sisters might depart in peace. New York and Virginia soon seceded from the old Confederation and came in, and finally North Carolina; but Rhode Island would not whip them back again.

"The Constitution of the United States is a contract made for the government of the peo-

ple of the whole United States. It is a contract to which, in the language of Mr. Madison, the States themselves are parties, and it is to be construed, just as any other contract is to be construed, by its own terms and by the surrounding circumstances showing the objects and the purposes for which it was formed. What were those purposes? To form a union among the States for common purposes, not to give them the control over the domestic relations existing in the States, not to regulate the right and title to property in the States; but there were great common purposes to be subserved by the formation of this Union which could be better subserved by the States in the aggregate than by the States separately. They were intrusted with the interests of the States so far as intercourse with foreign nations was concerned, with the regulation of commerce, with the coinage of money, and many other things. But the framers of that instrument show in it the object which they had in forming it, because they delegate the powers which the Federal Government should have, and then declare that the powers not therein delegated, and not prohibited to the States, are reserved to the States respectively or to the people.

"Do any suppose if, at the time of the formation of that Constitution, it had been suggested that, by allowing it to be amended by the ratification of three-fourths of the States, a future convention would undertake to invade the rights of the States and to determine what should be property in the States, or to regulate the relation of parent and child, husband and wife, master and slave, within those States, that the fathers would ever have entered into such an agreement? Why, sir, even with the omission from that Constitution of the provision which provides for the rendition of fugitive slaves, we are told by so high an authority as Justice Story, the Constitution could not have been framed. Do you suppose that men who were so tenacious of their rights—men who had waged a long seven years' war for the achievement or preservation of those rights, after all their experience in that bloody conflict—would ever have committed to any body of men, present or in the future, the power to regulate the relation of parent and child or husband and wife?"

"Sir, if you can go into the States and attempt to regulate the relation of master and slave, you can go into a State and attempt to regulate the relation between parent and child or husband and wife. If you have a right to go into a State and say that one particular species of property which has heretofore been property shall not in the future be property, you have a right to say that any other subject of property heretofore shall not be property in the future; and you have a right to say in that case, by way of amendment, that there shall be no such thing as property at all. It will not do to answer me by saying that no convention of the States would do this; that three-fourths

of the States could not be found to ratify any such provision as that. Why, sir, the thing is just as likely now to be done in the future as it was likely, when that Constitution was framed, that in seventy-five years a dominant party in this country would attempt to invade a State to determine the question of what should be property by abolishing an existing institution.

"But, sir, this provision goes further. It is not only prospective in character so as to effect future rights, but it absolutely proposes by an amendment of the Constitution to sweep away and blot out hundreds of millions' of dollars worth of property in the States. That is the destruction of property. It operates for the destruction of property, because if this amendment becomes incorporated in the Constitution and is submitted to, that property ceases. Then, I ask, where is the difference in principle between the destruction of this amount of property invested in slaves, and the destruction of that amount of property invested in manufactures, in agriculture, or in the mechanic arts?

"Again, can a convention frame an amendment, or can Congress propose an amendment to the Constitution, which, being ratified by three-fourths of the States, shall become the supreme law of the land, by which there shall be made an equal distribution of property throughout the United States? Can they do that? Let it be known that it is within the power of three-fourths of the States to do that, and a party may rise up in the country most clamorous for the exercise of that power. I apprehend, however, it will be admitted that a convention of three-fourths of the States cannot propose an amendment, which, being ratified by three-fourths of the States, can do any of the things that I have mentioned.

"The sinfulness of slavery or the evil of slavery among those with whom it exists is not to be invoked as affording power, in the absence of any thing else, to make this proposed change. If that be the source whence is derived the authority to make this amendment to the Constitution it is an authority against which I cannot argue, for the simple reason that I and my antagonist never could agree."

Mr. Clark, of New Hampshire, followed, saying: "Mr. President, I do not propose to discuss at large the power of Congress to propose this amendment to the States. I find in the Constitution as it now stands this provision:

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, &c.

"I understand that course to be now proposed. I understand that Congress is about to propose to the States certain amendments to this Constitution. I understand that when those amendments shall be ratified, if they ever

are, by three-fourths of the States, they will be, in the language of the Constitution now, 'valid to all intents and purposes.' But, says the Senator from Delaware, you cannot amend the Constitution in this particular; the framers of the Constitution did not anticipate that such an amendment would be proposed. Has the Senator from Delaware carefully considered the provisions of this Constitution?

"The framers of the Constitution said that you might amend it in this way, and it should be valid to all intents and purposes except in three particulars: one was in regard to the slave trade; another was in regard to the capitation tax; and the third was in regard to the equal representation of the States in this branch of Congress. Why, sir, article five of this Constitution shows conclusively that the framers of the Constitution had the subject of slavery directly under their thought and control when they said, you shall not amend it in regard to the slave trade for twenty years, but was silent as to every thing else in regard to it, and you may amend it. There is no provision here that you shall not abolish domestic servitude. There was and is a provision that you should not touch the slave trade within twenty years, but you might abolish slavery. The implication is clear and forcible that you may do it whenever two-thirds of both Houses of Congress see fit to propose the amendment, and three-fourths of the States to accept it."

The amendment of Mr. Davis was lost—yeas, 5; nays, 32.

The question now came up on the amendment reported by the Judiciary Committee.

Mr. Hale, of New Hampshire, said: "Mr. President, permit me to say that this is a day that I and many others have long wished for, long hoped for, long striven for. It is a day when the nation is to commence its new life, or if it is not the day, it is the dawning of the day; the day is near at hand. The day is to come when the American people are to wake up to the meaning of the sublime truths which their fathers uttered years ago, and which have slumbered dead letters upon our Constitution, of our Declaration of Independence, and of our history—a day when the nation is to be dis-embarrassed of the inconsistencies which have marked its history and its career, patent to the world and to ourselves when we have had the courage faithfully, fairly, and boldly to look the truth in the face.

"Sir, what is the truth? We have had upon the pages of our public history, our public documents, and our public records, some of the sublimest truths that ever fell from human lips; and there never has been in the history of the world a more striking contrast than we have presented to heaven and earth between the grandeur and the sublimity of our professions and the degradation and infamy of our practice. That day is to pass away, and to pass away, I trust, right speedily.

"Sir, when the great founder of the Dutch

republic, William the Silent, I think he was called, after losing his armies, his treasure, his finances, and every thing but his own indomitable courage and his Christian faith, counselled his followers again to rally and again to strike for freedom, they asked him, 'Have you secured any alliances? Are there any of the potentates and Powers of the earth that you could associate with, that will aid you in the struggle in which you propose to engage?' His answer was, 'Yes; I have allied myself to the King of kings, and in His strength I invite you to go to battle.' Sir, that is the position and the only position this nation can occupy. If we cannot do that, if we cannot put away from us the great sin and the great crime which has separated us not only from the sympathies of the Christian world, but from the blessings of the God of the Christian world, then indeed is our cause hopeless and our struggle desperate.

"But, sir, whenever unconditionally and without equivocation we come up to the mark and place ourselves on the high standard of Christian duty, and resolve that despite of all extraneous circumstances, of all doubtful contingencies, of all questions of expediency, we will place ourselves firmly upon the everlasting rock of duty and our action shall be in accordance with our conscientious convictions, then, and not till then, will that pillar of cloud by day and fire by night which led the chosen people from the house of bondage to the land of promise, be ours. Then we shall indeed and in truth be worthy of our genealogy and our history. Then the sublime teachings of the Pilgrim fathers who left every thing behind them that they might come hither and plant in this wilderness a temple of liberty, and throw wide open its doors for the oppressed of earth to enter and be at rest—then will all that be realized. Then without shame, without reproach, and without apology, we can stand in this nineteenth century, soldiers of the new civilization and of an old Christianity, going forth to battle with every impulse of our hearts and every purpose that we entertain in full accordance with the best wishes and hopes of the good on earth and of the God in heaven; when we take this position and take it firmly and ably, then and not until then shall we triumph; then and not till then shall we see the beginning of the end."

Mr. McDougall, of California, followed, saying: "I thought when I came here that the business of the Federal Congress, the business of the Executive of the Federal Union, the business of this Government, was by the exercise of its full power to put down the rebellion; but what has been the fact? From the time I took my place here until this day, until these last ten minutes, hardly a quarter of an hour has passed that has not been occupied by discussing the status of negroes in the southern confederacy. Our home policy, our finances, our legitimate business, our foreign relations, have all been ignored.

I, as I said on rising, do not propose to discuss this question here: my argument is an affirmation that we have no business with meddling with so grave a question of fundamental and elementary law while we have a war to maintain for the purpose of reestablishing the Republic. I have from the first protested against the continuous discussion of this question not belonging to armies, not belonging to forces, but belonging to a sentiment or opinion which could not be made use of for any legitimate purpose in the controversy before us. I have asked the Senators on both sides of the Chamber to assert the strength of the Republic and compel obedience to the Constitution and the laws, and so I shall say as long as I occupy my place in this Chamber; but I protest against occupying the time of the Senate of the Republic of North America entirely in discussing subjects that have nothing to do with the reestablishing of the Republic that has been disintegrated by hostile forces having no faith in the system as it exists."

Mr. Hendricks, of Indiana, following, said: "Ought not the people deliberately to consider any proposition for an amendment of the Constitution? Ought it not to be considered more deliberately than any ordinary measure of government or of administration? Sir, what is our condition? We are in a state of war. The minds of the people are greatly excited. They come to conclusions now not so much upon reflection and argument and reason as they do upon the passions of the hour. I ask Senators whether a time like this is favorable to consider amendments of the organic law?

"I ask Senators in what condition are Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Mississippi, Missouri, Tennessee, Texas, and Virginia, to consider amendments to the Constitution? Is this to be their Constitution as well as ours? Is this to be a Constitution for Louisiana as well as Indiana, for Florida as well as New Hampshire? Then, sir, if it is to be their great law to which they will owe allegiance and render obedience, shall they not be in a condition to consider so important an amendment before it is proposed to them?"

Mr. Howard, of Michigan, answered: "If those States are not in a condition to participate in the amendment of the Constitution, as is contemplated by this joint resolution, whose fault will it be? Can a party in that attitude take advantage of his own fault, of his own wrong?"

Mr. Hendricks said: "I ask the Senator, is it not to be their Constitution as well as ours, and must not this amendment be considered by them and acted upon by them, so as to secure three-fourths of the thirty-five States, before it becomes a part of the Constitution?"

Mr. Collamer, of Vermont, replied: "If those States were voting and were in favor of the amendment, they would vote for it and would be satisfied with it, if it were adopted, and if

they were opposed to it they would vote against it. Now, in counting the thirty-five States so as to get three-fourths to agree to it, those States that have not voted at all are counted the same precisely as if they had voted against it."

The resolution came up again on April 8th, when Mr. Sumner, of Massachusetts, after taking a view of the Constitution in reference to any support it might afford to the institution of slavery, said:

"We have already seen that slavery can find no support in the Constitution. Glance now at the positive provisions by which it is brought completely under the control of Congress.

"1. First among the powers of Congress, and associated with the power to lay and collect taxes, is that 'to provide for the common defence and general welfare.' It has been questioned whether this is a substantive power, or simply incident to that with which it is associated. But it seems difficult, if not absurd, to insist that Congress should not have this substantive power. Shall it not provide for the common defence? Shall it not provide for the general welfare? If it cannot do these things it had better abdicate. In the discussions on the Constitution in the Virginia convention, Mr. George Mason, one of its most decided opponents, said, 'That Congress should have power to provide for the general welfare of the Union, I grant.' (2 *Eliot's Debates*, 827.) But the language of Patrick Henry, to which allusion has been already made, was still more explicit. He foresaw that this power would be naturally directed against slavery, and he said:

Slavery is detested. We feel its fatal effects. We deplore it with all the pity of humanity. Let all these considerations, at some future period, press with full force on the minds of Congress. Let that urbanity which, I trust, will distinguish Americans, and the necessity of national defence—let all these things operate on their minds; they will search that paper [the Constitution] and see if they have the power of manumission. And have they not, sir? Have they not the power to provide for the general defence and welfare? May they not think that they call for the abolition of slavery? May they not pronounce all slaves free? And will they not be warranted by that power? This is no ambiguous implication or logical deduction. The paper speaks to the point. They have the power in clear and unequivocal terms, and will clearly and certainly exercise it. —*Eliot's Debates*, vol. 3, p. 590.

"Language could not be more positive. To all who ask for the power of Congress over slavery, here is a sufficient answer; and remember that this is not my speech, but the speech of Patrick Henry, who says that the Constitution 'speaks to the point.'

"2. Next comes the clause, 'Congress shall have power to declare war; to raise and support armies; to provide and maintain a navy.' A power like this is from its very nature unlimited. In raising and supporting an army, in providing and maintaining a navy, Congress is not restrained to any particular class or color. It may call

upon all, and authorize that contract which the Government makes with an enlisted soldier. But such a contract would be in itself an act of manumission; for a slave cannot make a contract. And if the contract be followed by actual service, who can deny its completest efficacy in enfranchising the soldier-slave and his whole family? Shakspeare, immortal teacher, gives expression to an instinctive sentiment when he makes Henry V., on the eve of the battle of Agincourt, encourage his men by promising,

"For he to-day that sheds his blood with me,
Shall be my brother; be he ne'er so vile,
This day shall gentle his condition."

"3. There is still another clause: 'The United States shall guaranty to every State in this Union a republican form of government.' There again is a plain duty. But the question recurs, what is a republican form of government? John Adams, in the correspondence of his old age, says:

The customary meanings of the words republic and commonwealth have been infinite. They have been applied to every government under heaven; that of Turkey and that of Spain, as well as that of Athens and of Rome, of Geneva and San Marino.—*John Adams's Works*, vol. x., p. 378.

"But the guarantee of a republican form of government must have a meaning congenial with the purposes of the Constitution. If a Government like that of Turkey, or even like that of Venice, could come within the scope of this guarantee, it would be of little value. It would be words and nothing more. Evidently it must be construed so as to uphold the Constitution according to all the promises of its preamble, and Mr. Madison has left a record, first published to the Senate by the distinguished Senator from Vermont (Mr. Collamer), the chairman of the Committee on the Library, showing that this clause was originally suggested in part by the fear of slavery. The record is important, disclosing the real intention of this guarantee. But no American need be at a loss to designate some of the distinctive elements of a republic according to the idea of American institutions. These will be found, first, in the Declaration of Independence, by which it is solemnly announced 'that all men are endowed by their Creator with unalienable rights; that among these are life, liberty, and the pursuit of happiness.' And they will be found, secondly, in that other guarantee and prohibition of the Constitution, in harmony with the Declaration of Independence, 'no person shall be deprived of life, liberty, or property without due process of law.' Such are some of the essential elements of a 'republican form of government,' which cannot be disowned by us without disowning the very muniments of our liberties; and it is these which the United States are bound to guarantee. But all these make slavery impossible. It is idle to say that this result was not anticipated. It would be, then, only another

illustration that our fathers 'builded wiser than they knew.'

"4. But, independent of the clause of guarantee, there is the clause just quoted, which in itself is a source of power: 'no person shall be deprived of life, liberty, or property without due process of law.' This was a part of the amendments to the Constitution proposed by the First Congress, under the popular demand for a Bill of Rights. Brief as it is, it is in itself alone a whole Bill of Rights. Liberty can be lost only by 'due process of law,' words borrowed from the old liberty-loving common law, illustrated by our master-in-law, Lord Coke, but best explained by the late Mr. Justice Bronson, of New York, in a judicial opinion where he says:

The meaning of the section then seems to be, that no member of the State shall be disfranchised or deprived of any of his rights or privileges unless the matter shall be adjudged against him upon trial had according to the course of common law. The words "due process of law" in this place cannot mean less than a prosecution or suit instituted and conducted according to the prescribed forms and solemnities for ascertaining guilt or determining the title to property.—*4 Hall's Reports, 146.*

"Such is the protection which is thrown by the Constitution over every 'person,' without distinction of race or color, class or condition. There can be no doubt about the universality of this protection. All, without exception, come within its scope. Its natural meaning is plain; but there is an incident of history which makes it plainer still, excluding all possibility of misconception. A clause of this character was originally recommended as an amendment by two slave States, North Carolina and Virginia, but it was restrained by them to freemen, thus: 'No freeman ought to be deprived of his life, liberty, or property but by the law of the land.' But when the recommendation came before Congress the word 'person' was substituted for 'freemen,' and the more searching phrase 'due process of law' was substituted for 'the law of the land.' In making this change, rejecting the recommendation of two slave States, the authors of this amendment revealed their purpose, that no person wearing the human form should be deprived of liberty without due process of law; and the proposition was adopted by the votes of Congress and then of the States as a part of the Constitution. Clearly on its face it is an express guarantee of personal liberty, and an express prohibition against its invasion anywhere.

"In the face of this guarantee and prohibition—for it is both—how can any 'person' be held as a slave? But it is sometimes said that this provision must be restrained to places within the exclusive jurisdiction of the national Government. Let me say frankly that such formerly was my own impression, often avowed in this Chamber; but I never doubted its complete efficacy to render slavery unconstitutional in all such places, so that 'no person' could be held as a slave at the national

capital or in any national territory. Constitutionally slavery has always been an outlaw wherever that provision of the Constitution was applicable. Nobody doubted that it was binding on the national courts, and yet it was left unexecuted—a dead letter, killed by the predominant influence of slavery, until at last Congress was obliged by legislative act to do what the courts had failed to do, and to put an end to slavery in the national capital and national territories.

"But there are no words in this guarantee and prohibition by which they are restrained to any exclusive jurisdiction. They are broad and general as the Constitution itself; and since they are in support of human rights they cannot be restrained by any interpretation. There is no limitation in them, and nobody now can supply any such limitation, without encountering the venerable maxim of law, *Impius ac crudelis qui libertatis non favet*—'Impious and cruel is he who does not favor liberty.' Long enough courts and Congress have merited this condemnation. The time has come when they should merit it no longer. The Constitution should become a living letter under the predominant influence of freedom. It is this conviction which has brought petitioners to Congress, during the present session, asking that the Constitution shall be simply executed against slavery and not altered. Ah! sir, it would be a glad sight to see that Constitution, which we have all sworn to support, interpreted generously, nobly, gloriously for freedom, so that everywhere within its influence the chains should drop from the slave. If it be said that this was not anticipated at the adoption of the Constitution, I remind you of the words of Patrick Henry at the time when he said, 'the paper speaks to the point.' No doubt. It does speak to the point. Cicero preferred to err with Plato rather than to think right with other men. And pardon me if, on this occasion, when my country is in peril from slavery, and when human rights are to be rescued, I prefer to err with Patrick Henry, the contemporary of the Constitution, rather than to think right with Senators who hesitate against slavery.

"Mr. President, thus stands the case. There is nothing in the Constitution on which slavery can rest, or find any the least support. Even on the face of that instrument it is an outlaw; but if we look further at its provisions we find at least four distinct sources of power, which, if executed, must render slavery impossible, while the preamble makes them all vital for freedom: first, the power to provide for the common defence and general welfare; secondly, the power to raise armies and maintain navies; thirdly, the power to guarantee to every State a republican form of government; and fourthly, the power to secure liberty to every person restrained without due process of law. But all these provisions are something more than powers; they are duties also. And yet

we are constantly and painfully reminded in this Chamber that pending measures against slavery are unconstitutional. Sir, this is an immense mistake. Nothing against slavery can be unconstitutional. It is only hesitation which is unconstitutional."

The Senator then noticed various objections to the resolution, and said: "Putting aside, then, all objections that have been interposed, whether proceeding from open opposition or from lukewarm support, the great question recurs, that question which dominates this whole debate, How shall slavery be overthrown? The answer is threefold: first, by the courts, declaring and applying the true principles of the Constitution; secondly, by Congress, in the exercise of the powers which belong to it; and, thirdly, by the people, through an amendment to the Constitution. Courts, Congress, people, all may be invoked, and the occasion will justify the appeal."

Mr. Sumner closed by moving to strike out the first and second sections of the report of the committee, and insert the following:

Section 1. All persons are free (equal) before the law, so that no person can hold another as a slave; and the Congress may make all laws necessary and proper to carry this article into effect everywhere within the United States and the jurisdiction thereof.

Mr. Powell, of Kentucky, in reply said: "Adopt this amendment, say to the people of the Southern States that they are to be deprived of their property and the earnings of their labor, that their whole domestic policy is to be overthrown, and four millions of miserable blacks turned loose among them, if you please, and do you think they will yield while they have arms to strike? Never, sir; and in my honest judgment (I always speak plainly what I think) those fanatical gentlemen on the other side of the House who desire the passage of this measure, intend to do one of two things—either to destroy the institution of slavery or to destroy the Union. If they can make the preservation of this Union a pretext by which they can be enabled to strike down slavery, they will do so. If they find that they cannot, in my judgment they will be willing to recognize the South. Their whole policy indicates that to my mind. Pass this amendment and you make an impassable chasm, as if you were to put a lake of burning fire between the adhering States and those who are out. You will then have to make it a war of conquest and extermination before you can ever bring them back under the flag of the Government. There is no doubt about that proposition.

"Why, sir, suppose you were to propose and pass an amendment to the Constitution laying your hand upon the property interest in New England, I will not say equal but half equal to the property interests of the Southern States which you now propose to strike down; does any man believe that all New England would not be in revolution to-morrow? Yes, sir, one-

half of the violation of their property rights by an attempted amendment of the Constitution of the United States inflicted upon them would put all New England in revolt to-morrow.

"Knowing that this will be the best disunion measure that was ever adopted, and desiring as I do a restoration of the Union as it was with the Constitution as it is, I oppose it, and shall oppose it here and everywhere, with all the power that I have.

"The Senator from Massachusetts to-day has quoted from Patrick Henry, and he has eulogized him very much. Certainly he does not feel any more admiration for that distinguished orator than I do. Does not the Senator know that an amendment to the Constitution has been adopted since Patrick Henry made that speech, which says that private property shall not be taken for public uses except on just compensation? and that is an answer to his whole quotation from Mr. Henry. I do not believe that Mr. Henry was right in the position he assumed in the speech from which the Senator quoted. Mr. Henry was engaged at that time in making an assault on the Constitution in a slave State; he wished to reject it; he did not like it; but even if what he then stated were true, the amendment since adopted explodes the whole of the Senator's argument on that branch of the case, and Mr. Henry's argument along with it."

Mr. Sumner's amendment was withdrawn after some discussion.

Mr. Davis, of Kentucky, said: "Mr. President, if the men who are to pass this amendment were as much interested in this property as those who are opposing it here and elsewhere, there is not one of them but would be found in opposition to it. It is a very beautiful operation, to be sure. They say to us, 'We will take from you your property; we will make you no compensation for it; and we will do it under the power to amend the Constitution.' Sir, property is a matter of State or domestic institution. The General Government have not legitimately, and were never intended to have, any jurisdiction or authority over the subject of property. What subjects should constitute property, how it should be regulated, whether it should exist and continue in one subject or be discontinued in another subject, are questions which were never intended to be intrusted to the General Government. That is a great and fundamental feature of our Federal and State system of governments. The proposed amendment takes that principle to be true in relation to but one subject of property; but if it strikes at it in relation to one subject of property, it may in relation to all.

"The power of amendment as now proposed to be exercised imparts a power that would revolutionize the whole Government, and that would invest the amending power with a faculty of destroying and revolutionizing the

whole Government. In my judgment, it is absurd to say that the power of amendment, which is simply a power to reform, a power to improve, imparts and authorizes the exercise of a power to destroy."

The following was the vote on the passage of the joint resolution:

YEAS—Messrs. Anthony, Brown, Chandler, Clark, Collamer, Conness, Cowan, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Hale, Harding, Harlan, Harris, Henderson, Howard, Howe, Johnson, Lane of Indiana, Lane of Kansas, Morgan, Morrill, Nesmith, Pomeroy, Ramsey, Sherman, Sprague, Sumner, Ten Eyck, Trumbull, Van Winkle, Wade, Wilkinson, Wiley, and Wilson—38.

NAYS—Messrs. Davis, Hendricks, McDougall, Powell, Riddle, and Saulsbury—6.

The Vice-President announced that the joint resolution having received the concurrence of two-thirds of the Senators present, was passed.

Mr. McDougall, of California, said: "I desire to ask a question for the purpose of understanding a ruling of the Chair. The ruling, I understand, is that the vote as it stands now has no relation to the States not represented on the floor. I think our vote now being a final vote should have relation to all the States as recognized under the Constitution."

The Vice-President replied: "The Chair rules that a majority of all the Senators is a quorum, and two-thirds of the number voting, provided a quorum votes, is sufficient to pass any resolution proposing an amendment to the Constitution."

Mr. McDougall: "I only desire the privilege of saying that such is not the opinion I entertain."

In the House the joint resolution was considered on June 14th. Mr. Pruyn, of New York, opposed it, saying: "Can three-fourths of the States, under this power to amend, overturn the institutions, subvert the authority, and change the condition of the other States? If so, the States might as well in the outset have surrendered all their sovereignty to the General Government, and the amendment declaratory of their reserved rights was meaningless. Is there any person who will venture to claim that any State which adopted the Constitution, placed any such construction on this power to amend?"

"Can Maryland and Delaware and New Jersey (for this illustrates the principle) force upon Pennsylvania an entire change of her domestic policy and institutions? Can Vermont, Massachusetts, and Connecticut compel New York to submit to their domination over her internal affairs, and to lay down rights at their bidding which she never agreed to surrender? If three-fourths of the States can take away rights now clearly reserved to their associates, what is to prevent the absorption of their territory by other States? If one right can be taken away, several can be—all can be. If one principle can be swept away, all can be. Under such a doctrine States may be annihilated and a monarchy built up. These it may

be said are extreme cases, but they are legitimate results from the power to amend now claimed. The right to amend is not a right to extend and enlarge the powers granted under the Constitution. It was only intended through its instrumentality to provide for the better and more convenient exercise of the powers expressly granted, in case defects should be found to exist in the practical working of the system. The amendment as to the manner of electing the President and Vice-President illustrates this view.

"To construe the Constitution as authorizing three-fourths of the States to impose upon the residue terms and conditions of Union not agreed upon or assented to by them, would be a wide departure from its spirit, and a monstrous usurpation of power; and this it is which we are now called upon to do; to take a further step to alienate the feelings of the South, and to embarrass and impede their return to the Union. No matter what the question may be, whether that of slavery or of any other domestic institution or right reserved to the States; so long as it is reserved, Congress has no right to interfere with it in any way."

Mr. Wood, of New York, said: "Mr. Speaker, I see many objections to this amendment, while I fail to find one reason in its favor. I am opposed to it because it aims at the introduction of a new element over which Government shall operate. It proposes to make the social interests subjects for governmental action. This is the introduction of a principle antagonist to that which underlies all republican systems. Our Union was made for the political government of the parties to it, for certain specified objects of a very general character, all of them political, and none of them relating to or affecting in any manner individual or personal interests in those things which touch the domestic concerns. There is no feature or principle of it giving to the Federal power authority over them. These were reserved and left exclusively to the jurisdiction of the States and 'the people thereof.' Of this character are the marital relations, the religious beliefs, the right of eminent domain within the territorial limits of the States, other private property, and all matters purely social. Slavery where it exists is a system of domestic labor; it is not the creature of law. It existed without law before this Government was established. It is incorporated into the organization of society as part of the existing domestic regulations. It cannot be brought within constitutional jurisdiction any more than can any or either of the other private and personal interests referred to."

Mr. Higby, of California, replied: "Sir, the whole debate on the other side of the House upon this proposition has been upon the presumption that whatever action is taken by us as a legislative body is conclusive; that if this resolution passes this House—it having already

passed the Senate—it becomes a finality, and whatever is embraced in it becomes a portion of the Constitution of the United States. Let no such fallacy sink deep into the heart of any man. The Constitution has most amply and cautiously provided that the national legislative branch of the Government can make no such amendment. Why, sir, the resolution simply gives the amendment in so many words, and proposes its ratification, and then the amendment goes to the State legislatures, and must be ratified by them."

The debate subsequently extended to the general subject of slavery, and was continued at much length. The vote was taken on the next day, and two-thirds not voting in favor, the joint resolution failed to pass.

The vote was as follows:

YEAS—Messrs. Alley, Allison, Ames, Anderson, Arnold, Bailey, John D. Baldwin, Baxter, Beaman, Blaine, Blair, Blow, Boutwell, Boyd, Brandegee, Broomall, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Creswell, Dawes, Deming, Dixon, Donnelly, Driggs, Eckley, Eliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Griswold, Hale, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Ingersoll, Jenckes, Julian, Kasson, Kelley, Francis W. Kellogg, Orlando Kellogg, Littlejohn, Loan, Longyear, Marvin, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Odell, Charles O'Neill, Orth, Patterson, Perham, Pike, Price, Alexander H. Rice, John H. Rice, Schenck, Schofield, Shannon, Sloan, Smith, Smithers, Spaulding, Starr, Stevens, Thayer, Thomas, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne, Webster, Whaley, Wheeler, Williams, Wilder, Wilson, Windom, and Woodbridge—93.

NAYS—Messrs. James C. Allen, William J. Allen, Ancona, Ashley, Augustus C. Baldwin, Bliss, Brooks, James S. Brown, Chanler, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, English, Finck, Ganson, Grider, Harding, Harrington, Herrick, Holman, Hutchins, Philip Johnson, William Johnson, Kalbfleisch, Kernan, King, Law, Lazear, Le Blond, Long, Mallory, Marcy, McAllister, McDowell, McKinney, William H. Miller, James R. Morris, Morrison, Noble, John O'Neill, Pendleton, Pruyn, Radford, Samuel J. Randall, Robinson, Rogers, James S. Rollins, Ross, Scott, John B. Steele, William G. Steele, Stiles, Strouse, Stuart, Sweet, Wadsworth, Ward, Chilton A. White, Joseph W. White, and Fernando Wood—66.

NOR VOTING—Messrs. William G. Brown, Clay, Henry Winter Davis, Thomas T. Davis, Dumont, Grinnell, Hall, Benjamin G. Harris, Charles M. Harris, Knapp, McBride, Middleton, Nelson, Perry, Pomeroy, William H. Randall, Edward H. Rollins, Stebbins, Voorhees, William B. Washburn, Winfield, Benjamin Wood, and Yeaman—28.

In the House on Dec. 14, 1863, Mr. Arnold of Illinois, offered the following bill which was read the second time and referred to the Committee on the Judiciary:

A bill to aid the President of the United States in carrying into more immediate execution the proclamation of emancipation issued by him on the 1st day of January, A. D. 1863, prohibiting the holding of certain persons as slaves in all that portion of the United States designated therein.

Whereas the President of the United States, by his proclamation issued on the 1st day of January, in the year 1863, as commander-in-chief of the Army thereof, did, as a fit and lawful means of suppressing the rebellion, in accordance with the laws of war

and with the dictates of justice and humanity, order, proclaim, and declare that all persons held as slaves within the limits of certain States and parts of States therein designated were, and should thereafter and forever be, free; and that the executive, military, and naval authorities would and should thenceforward recognize and maintain the freedom of all such persons; and whereas by said proclamation and order the President has guaranteed to all such persons their freedom, and has pledged the faith and honor of the country that their freedom shall be recognized and forever maintained; and whereas it is the right and the duty of Congress to make all laws which may be necessary and proper for carrying into execution all the powers, whether civil or military, vested by the Constitution in the President as Commander-in-Chief of the Army and Navy; and among such military powers is that of making and executing the proclamation aforesaid; and whereas all persons heretofore held as slaves, as aforesaid, within said designated States or parts of States, are now of right free, and ought to be hereafter forever unmolested in the enjoyment of that freedom which the Government of the United States is bound to "recognize and maintain;"

Now, therefore, for the purpose of carrying into more complete and immediate execution the aforesaid proclamation, and to secure forever the recognition and maintenance of the freedom of all persons designated therein, and thereby to provide more effectually for the suppression of the rebellion, the securing of domestic tranquillity, the maintaining of the common defence, and the preservation of the liberties of the people;

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all States and parts of States designated in said proclamation as in rebellion, the reenslaving or holding, or attempting to hold, in slavery or in involuntary servitude of any person who shall have been made or declared to be free by said proclamation, or any of their descendants, from and after the date of said proclamation, otherwise than in punishment of crime whereof the accused shall have been duly convicted, is and shall be forever prohibited, any law or regulation of either of such States to the contrary notwithstanding.

Subsequently, on June 15th, the proposition to repeal the commutation clause of the enrolment act, being under consideration, Mr. Boutwell, of Massachusetts, said:

"I am not disposed to despair at all of the Republic, or of the power of the Government to maintain itself. The gentleman from Kentucky (Mr. Mallory) said this morning that the whole policy of the country was changed by the proclamation of the President, and he attributed that proclamation to the meeting of the Governors of certain States at Altoona. I am not here to be put upon the witness-stand, but it so happens that I have the means of knowing that the proclamation of September, 1862, was entirely independent of and antecedent to the meeting of the Governors at Altoona. The meeting of the Governors had no connection with the proclamation. The gentleman from Kentucky should remember that prior to the issuing of that proclamation we had met with but few successes, and that we had endured many, many reverses. Lee had battled for four days under the fortifications of the capital, and had finally crossed the Potomac into Maryland. It was not until the country put itself on the side of justice that it had a right to expect the favor of

Divine Providence, or any of those successes which have rendered this war glorious in the cause of freedom, truth, and justice."

Mr. Mallory, of Kentucky, said: "Will the gentleman state when that convention of Governors assembled at Altoona?"

Mr. Boutwell: "I think it assembled at Altoona previous to the 22d of September, but I assert as within my own knowledge that the issuing of the proclamation was determined upon previous to the meeting at Altoona."

Mr. Mallory: "Can the gentleman inform me when the issuing of that proclamation was determined upon?"

Mr. Boutwell: "I cannot go far in this matter. I assert distinctly the fact which is within my own knowledge that the President previous to the meeting of the Governors at Altoona had decided in a certain contingency, which happened upon the Wednesday preceding the 22d of September, to issue the proclamation, and therefore the inference I draw is in contravention of the declaration of the gentleman from Kentucky that that proclamation was the result of the meeting of the Governors at Altoona."

Mr. Mallory: "Will the gentleman tell us the contingency on the happening of which that proclamation was to be issued?"

Mr. Boutwell: "I said, Mr. Speaker, when I mentioned this fact, that I was not to be put upon the stand as a witness. I have made a statement as of a fact within my own knowledge, and history will confirm the statement."

Mr. Mallory: "If the gentleman from Massachusetts does not wish to answer the question or to state the fact, I will not insist."

Mr. Boutwell: "I have done nothing more than this—to put my statement of a fact, which I assert to be within my own knowledge, against the declaration of the gentleman from Kentucky, that the proclamation of emancipation, or the monitory proclamation of emancipation, was issued in consequence of the meeting of Governors at Altoona."

Mr. Mallory: "We know that the President himself stated on the 18th of that month that he had no idea of issuing such a proclamation, and that he argued against issuing it. I want to know from the gentleman from Massachusetts whether it was between the 18th and 22d, and if so, at what point between these two periods, the President had prepared the proclamation, and had determined to issue it upon a certain contingency. I would also like to know what that contingency was."

Mr. Boutwell: "The gentleman from Kentucky is good at questioning, but I have to keep myself within the position which I stated."

Mr. Pendleton: "I desire to ask the gentleman from Massachusetts upon what event happening on a certain Wednesday the issuing of the President's emancipation message was contingent?"

Mr. Boutwell: "The wisdom of the remark with which I prefaced my first statement is more and more manifest as I proceed. The

questions put to me are not founded upon any thing I have said. The gentleman's question states that the event was to happen on Wednesday."

Mr. Pendleton: "It did happen on Wednesday."

Mr. Boutwell: "I have already stated to my friends on that side of the House that I do not intend to answer that question. With all due respect to them, I do not intend to answer that question. I stated just exactly what I wanted to say, for the purpose of repelling, so far as I could, the imputation that the President was controlled in issuing his emancipation proclamation by any assembly of men anywhere. If what the gentleman from Kentucky (Mr. Mallory) has asserted be true, of which I have no knowledge, then so much higher is my opinion of the President's wisdom that he abandoned a policy which had brought nothing but disaster upon the country, and raised himself to the contemplation of the supreme truth that justice to the enslaved was involved in this contest, and that neither he nor the country could hope for the blessing of God until they saw the injustice of slavery, and determined by one supreme decree to strike down slavery and slaveholders."

Mr. Pendleton: "Will the gentleman yield to me?"

Mr. Boutwell: "Certainly."

Mr. Pendleton: "I ask the gentleman whether the issuing of that proclamation did not depend upon a victory* being obtained by the Union forces? I will be satisfied with any answer, but I want an answer."

Mr. Boutwell: "In regard to these questions, I have already said I would not answer."

In the Senate, on January 27th, the bill to promote enlistments and for other purposes was taken up. Mr. Powell, of Kentucky, moved to strike out the third section, as follows:

SEC. 3. And be it further enacted, That when any person of African descent, whose service or labor is claimed in any State under the laws thereof, shall be mustered into the military or naval service of the United States, he, his mother, and his wife and children, shall forever thereafter be free, any law, usage, or custom whatsoever to the contrary notwithstanding.

* The battle of Antietam was fought Wednesday, Sept. 17th. A letter from Mr. Owen Lovejoy, member of Congress from Illinois, dated 23d February, 1864, was published. The following is an extract from this letter:

"Recurring to the President, there are a great many reports concerning him which seem to be reliable and authentic, which, after all, are not so. It was currently reported among the anti-slavery men of Illinois that the emancipation proclamation was extorted from him by the outward pressure, and particularly by the delegation from the Christian Convention that met at Chicago. Now the fact is this, as I had it from his own lips: he had written the proclamation in the summer, as early as June, I think—but will not be certain as to the precise time—and called his Cabinet together and informed them he had written it and meant to make it, but wanted to read it to them for any criticism or remarks as to its features or details. After having done so, Mr. Seward suggested whether it would not be well for him to withhold its publication until after we had gained some substantial advantage in the field, as at that time we had met with many reverses and it might be considered a cry of despair. He told me he thought the suggestion a wise one, and so held on the proclamation until after the battle of Antietam."

ing; and all laws and parts of laws inconsistent herewith are hereby repealed.

He said: "Mr. President, this section of the bill, to my mind, is clearly and palpably unconstitutional. I should like the chairman of the Military Committee, who reported the bill, to point me to the clause of the Constitution which authorizes the passage of such a section as this. I believe it has heretofore been admitted on all hands, by all political organizations of this country, with very few exceptions, that the institution of African slavery in the States where it exists is a matter of local concernment that cannot be interfered with by the action of the Federal Government. Now, this section proposes that if a man of African descent shall be enlisted in the Army or join the Army of the United States, not only he himself, but also his mother, his wife, and his children shall all be free in consequence of that act, any law or usage or custom to the contrary notwithstanding. Well, sir, suppose that a slave belonging to a rebel in the State of Mississippi, if you please, or any other State, were to enlist into the Army, and he should have children or a mother or a wife, who were the slaves of loyal men in adhering and loyal States, under this provision they would be free, provided this law could have any efficacy whatever. There is certainly no power in this Congress to pass any such law. It is depriving loyal men of loyal States of their property by the legislative enactment of this Congress."

Mr. Henderson, of Missouri, said: "I move to amend the section by striking out the words 'his mother, and his wife and children,' in the fifth line; and after the word 'notwithstanding,' in the seventh line, to insert, 'and his mother, his wife and children shall also be free, provided that by the laws of any State they owe service or labor to any person or persons who have given aid or comfort to the existing rebellion against the Government since July 17, 1862.'"

Mr. Grimes, of Iowa, said: "I believe the amendment proposed by the Senator from Missouri is substantially the law as it stands today. Any person of African descent now held in bondage, and whose service is claimed by a person in rebellion, or who has furnished aid and comfort to the rebellion, if he enlists into the service of the United States becomes a free man. The proposition in the third section of this bill is to extend that existing law so as to set free any colored person, whether he belongs to a loyal citizen or to a disloyal citizen, if he shall enlist into the service of the United States, and shall remain in the service for the period of three years."

Mr. Johnson, of Maryland, asked: "Without compensation to the owner?"

Mr. Grimes replied: "That is a question which is not provided for in this bill, but which will undoubtedly come up hereafter. If the Government sets free a person to whom some one has a legitimate and legal claim, recog-

nized as such by the Government, unquestionably he would be entitled to pay. The reason why I shall vote for this section is, that I am exceedingly anxious to pass a law by which it shall be declared that if a man who has perilled his life for me and for the institutions of my country at Port Hudson—I care not what kind of a claim may be set up to his service or who may set it up—is claimed by any one, that claim shall not be regarded. I am unwilling that after he has thus perilled his life and been wounded in my defence, he shall be taken off to slavery by any person or under any sort of institution. I think that such a proposition as this will meet the approval and commendation of the country, and I rejoice that the Senator from Massachusetts and the Committee on Military Affairs have given us an opportunity to record our votes in favor of it."

Mr. Wilkinson, of Minnesota, said: "There is no necessity for the adoption of the amendment offered by the Senator from Missouri. The thirteenth section of the act of July 17, 1862, 'to amend the act calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions, approved February 28, 1795, and the acts amendatory thereof, and for other purposes,' contains the following proviso:

Provided, That the mother, wife, and children of such man or boy of African descent shall not be made free by the operation of this act except where such mother, wife, or children owe service or labor to some person who, during the present rebellion, has borne arms against the United States, or adhered to their enemies by giving them aid and comfort.

"That is the law as it now stands; and if the Senator from Missouri wishes to carry out the purpose or to retain this provision of the existing law, all he has to do is to oppose this section entirely. I think, Mr. President, that the clause I have just read is the most disgraceful legislation of the Congress which passed that law. It is a disgrace to the nation to pass such a law, and I am very much rejoiced that the Committee on Military Affairs have introduced this bill wiping it out. What are the facts? We muster a man into the service of the United States and free him if he serves in the armies of the Union to put down this rebellion, but we suffer his mother, his wife, and his children to remain in slavery. What is freedom worth to a man who has served in the armies of the Union to put down this rebellion, if you take his family away from him and keep them in slavery?"

Mr. Henderson: "Mr. President, the proposition contained in the third section of this bill is, that when a slave, or one who is held as a slave under the laws of one of the States, shall be mustered into the service of the United States, the relatives of that slave shall all be free. I ask the Senator from Minnesota, and the Senator from Iowa, who have advocated this proposition, and I desire them

to answer, if Congress has the power by the mere fact of a slave serving for an hour or two hours, or a day, to emancipate all his relatives, has it not also the power to-day to pass a law emancipating the slaves of Kentucky and Missouri, entirely upon the broad ground that slavery stands in the way of our peace, that it is an institution which has originated the rebellion, and that in order to put down the rebellion it is necessary to get rid of it, and therefore we have the power to pass it?"

Mr. Grimes: "I will say very frankly that I have not any doubt of it at all, and I shall be very anxious to have an opportunity to vote for the passage of such a law as that."

Mr. Henderson: "Do I understand the Senator to assume the ground that this power would not exist in the Congress of the United States but for the existence of the present civil war? Is that his position? I understand that it is. He assents to it. Well, now, Mr. President, of course, upon an amendment of this character, I am not disposed to go into a discussion of the extended or enlarged powers of the Government during the existence of a civil war. I see no necessity whatever for the legislation proposed in the third section of the bill before us. If I could vote for it I could vote for the proposition which the Senator from Iowa says he is prepared to vote for, and which he desires to vote for. That question ought to be tested; and if it be desired to abolish slavery throughout the United States by an act of Congress, let the proposition be made and let us meet the question boldly and manfully."

The subject again came up in the Senate on February 2d, when Mr. Sherman, of Ohio, said: "Mr. President, the bill now before the Senate presents not only the question of the employment of negroes in the military service of the United States, but also, in my judgment, the question of the emancipation of the whole negro race in this country. The second section of the bill provides that all persons of African descent who have been or may be hereafter employed in the military or naval service, shall receive the same uniform, pay, arms, and equipments as other soldiers of the regular or volunteer forces of the United States other than bounty. The third section provides that 'when any person of African descent whose service or labor is claimed in any State under the laws thereof, shall be mustered into the military or naval service of the United States, he, his mother, his wife, and children, shall forever thereafter be free.' It is manifest, Mr. President, that if a slave is employed in the military service, the inevitable result of that employment is emancipation. It would appear to be just, when a slave renders military service and exposes his life in a civil war like this, that it should inure to the benefit of his wife, his mother, and his children. It is equally clear that if by the laws of war all slaves who enter into the military service in the Southern States, and all who are connected with them by the

ties of blood shall be emancipated, the tenure of slavery in this country would become so uncertain as to result in universal emancipation. I will, therefore, treat this proposition according to its logical effect, and as involving the emancipation of the negro race in this country.

"Has Congress or the President power to employ slaves in the military service? Can we emancipate them either as a punishment of rebels, or as a reward for military service? If these powers exist, to what extent and in what way should we exercise them? These questions present the most difficult problem of the war, which requires in its solution more than human wisdom.

"Have we this power, and if so whence is it derived and to what extent can we execute it? The power to emancipate a slave by Congress or the President certainly does not exist in time of peace. This is an axiom in American politics.

"It is equally true that the existence of a mere insurrection in our country will not justify interference with slavery. This has been settled now by many cases in our courts. I have listened very often to the argument made by the Senator from Kentucky (Mr. Davis) on this point, but the difficulty with him is that he does not distinguish between insurrection and war. The line is broad and deep.

"It will be necessary for Senators to keep in view these distinctions, because upon them rests the whole argument in the case. Civil war is where an insurrection has assumed such power and strength as to invoke armies, where victories and defeats alternate, when the matter ceases to be a mere insurrection or rising against the civil authority, and when marshals and constables are no longer necessary, but armies must be called upon to decide the conflict. The law of 1795 defines what an insurrection is. I have not the laws before me, but the words are familiar. In such cases, the President must call out the militia of the State, through its Governor, the riot act must be read, and various precautions are prescribed; constables and marshals must be employed to a certain extent; notice must be given to the insurgents; and they must be dispersed in that way, if possible. The law of 1795 provides the manner in which an insurrection shall be treated, but when the insurrection assumes the magnitude of civil war, other laws must govern; the law of 1795 ceases to apply; and the laws of war as recognized among the civilized and Christian nations of the world must then decide the contest.

"It is sometimes difficult to ascertain when an insurrection melts into rebellion, and when a rebellion assumes the proportions of a civil war is often difficult of ascertainment; but in the present case, the character of the struggle in which we are engaged has been ascertained and definitely settled by every department of the Government. The Supreme Court of the

United States has already declared that this is no longer an insurrection, but a civil war. Every department of the Government concurs that this is a civil war and not an insurrection. When the President of the United States originally called out seventy-five thousand volunteers he treated it partly as an insurrection and partly as a civil war—a kind of incongruous condition, not easily understood; but Congress, as soon as it convened, treated it as a civil war, authorized the employment of half a million men, and called it war. The President issued a proclamation declaring a blockade, a thing not known as against insurgents. Finally, the decision of the Supreme Court in the prize cases during the December term, 1862, declared that it was civil war and not insurrection.

"The decision goes on upon that basis, treats these rebels, as we commonly call them, these enemies, as enemies in war, open war, to be put down according to the laws of war. That point was, however, previously settled by another tribunal. We are one of the family of nations. Great Britain, with a hasty indecency, before the facts were known, when our minister was on his way to take his place at that court, a minister whose very name should have commanded the respect of Great Britain, recognized the insurgents as belligerents; and France followed her example. By that fact we are bound, as one of the family of nations; and after that acknowledgment by Great Britain and France we dared not treat the rebels as simple insurgents, but we were bound to wage the war against them according to the laws of war.

"Mr. President, the effect of civil war in substituting new laws for our Government is stated very clearly by Vattel, and at the risk of being wearisome I will read an extract:

A civil war breaks the bands of society and government, or at least suspends their force and effect; it produces in the nation two independent parties, who consider each other as enemies, and acknowledge no common judge. Those two parties, therefore, must necessarily be considered as thenceforward constituting at least for a time two separate bodies, two distinct societies. Though one of the parties may have been to blame in breaking the unity of the State, and resisting the lawful authority, they are not the less divided in fact. Besides, who shall judge them? who shall pronounce on which side the right or wrong lies? On earth they have no common superior. They stand therefore in precisely the same predicament as two nations who engage in a contest, and, being unable to come to an agreement, have recourse to arms.—*Vattel*, page 425.

"The Constitution of the United States now furnishes no guide. There are no rules prescribed in the Constitution pointing out how we shall treat public enemies who are regarded as such. The Constitution only deals with people in a state of peace, or, at most, in a state of insurrection. It does not define our relations or our duties to enemies. When these people assumed the power and position of enemies, you could no longer look in the Constitution of the United States, or to the laws

made in pursuance thereof, for the mode and manner in which you should treat them. This principle is clearly laid down in the laws of nations. By their unity, by their vigor, by their strength they have won the position of enemies, and you cannot treat them as insurgents. Civilized society would not allow you to treat these enemies, who by their vigor and courage have held you at bay for nearly three years, as common insurgents or traitors and felons. You must treat them as enemies.

"Now, Mr. President, let us apply these principles to the bill before us. We are in war. Have we the right in war as against public enemies to emancipate their slaves? Have we a right according to the laws of war to employ the slaves of our own citizens in arms against the public enemy? Have we a right in accordance with the laws of war to emancipate them and their families, those that are connected with them by domestic ties? These are the questions. I have already passed over the principal difficulty in the way, and that is the argument so often made that we are restrained from doing this because these enemies are our fellow-citizens. I have shown you that the men in rebellion have won a position beyond the reach of your Constitution; that our war with them must be tested by the laws of war; and these questions must be decided by the laws of war as recognized and practiced among civilized nations in ancient and modern times. That is the position which I hold.

"Then, by the laws of war, have we a right to arm our own slaves, and to arm the slaves of our enemies and emancipate them? Now, sir, I say that there never was a country in the world, in ancient or modern times, which held slaves, that did not at some period of its history arm them, and employ them against the common enemy; and there never was a case where, when those slaves were so employed, they were not emancipated. This proposition, I think, will be sustained by the most careful examination of history."

Mr. Sherman then proceeded to state the actions of the Grecians and Romans, and of the Governments of Great Britain and the United States, in their wars.

He said: "I have thus, Mr. President, perhaps at the risk of being wearisome, shown that in ancient and in modern times, by all civilized nations, by our own country and by our enemies, in all of our wars, negro soldiers both free and slave have been used in the military service, and in every case where slaves have been so used they have been secured their liberty. It would be an intolerable injustice, to which no people would ever submit, to serve in the military service without securing that greatest of boons. My answer, then, to the main question, whether the employment of negroes, free or slave, is justified by the laws of war, is, that by the practice of all nations it is justified.

I come then to another question that it is

necessary for me briefly to refer to, and that is whether there is any thing in the Constitution of the United States that forbids us from employing free negroes or slaves. On that point there can be no doubt. The only restraint upon the law of war contained in the Constitution is in article three of the Amendments, which provides that 'no soldiers shall in time of peace be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.' With this exception, all the practices of civilized nations may be used in this war.

"On the subject of emancipation, I am ready now to go as far as any one. Like all others, I hesitated at first, because I could not see the effect of the general project of emancipation. I think the time has now arrived when we must meet this question of emancipation boldly and fearlessly. There is no other way. Slavery is destroyed, not by your act, sir, or mine, but by the act of this rebellion. I think, therefore, the better way would be to wipe out all that is left of the whole trouble; the dead and buried and wounded of this system of slavery. It is obnoxious to every manly and generous sentiment. The idea that one man may hold property in the life of another, may sell him like cattle, is obnoxious to the common sentiment of all. Now, when the power is in our hands, when these rebels have broken down the barriers of the Constitution, when they must be treated by the laws of war, when we dictate those laws, not the President, let us by law meet this question of emancipation boldly and fearlessly. I am prepared to do it, and to vote to-day, to-morrow, or any day for a broad and general system of emancipation. Then, sir, I would couple with that idea, fair, honest compensation to those loyal men who, in the adhering States, own this class of property. The amount paid to them would be insignificant compared to the cost of this war."

Mr. Carlile, of Virginia, followed, saying: "Let me state as I understand them the positions assumed by the Senator from Ohio in his speech to which I have referred. They are these: That the struggle in which we are engaged is with States as such united under a common Government, and not with individuals; that we are not engaged in suppressing an insurrection or rebellion, but in open, flagrant war with a belligerent Power, which we have recognized as such; that, being engaged in civil war, we are only bound by the laws of public war, and are not restrained by the Constitution of the United States in the means we employ, the measures we adopt, or the manner in which we conduct the war; that Congress is not authorized by the Constitution to emancipate slaves, but in time of civil war Congress derives the power to emancipate from the laws of war.

"To prove that such power is conferred upon Congress, the Senator cites the clause authorizing Congress to raise armies. He denies

that the President possesses the power under the Constitution. He denies that his emancipation proclamation can have any effect upon slaves who are not brought within its operation during actual hostilities. Now, sir, granting that we have the constitutional power, where can any law that we may enact on this subject have any effect during the existence of this rebellion beyond our military lines? If you can derive the power to emancipate slaves from the power to raise armies, it seems to me it would be a less stretch of the imagination to suppose that the President possessed the power when he was sworn to preserve, protect, and defend the Constitution.

"In opposition to the authority of the Senator on this subject, that we derive any legislative power from the laws of war, I will quote the opinions of Mr. John Quincy Adams. In a speech made by him in New York, in 1839, in speaking of the powers of Government as divided between the different departments, he said:

The legislative powers of Congress are, therefore, limited to specific grants contained in the Constitution itself, all restricted on one side by the power of internal legislation within the separate States, and on the other by the laws of nations, otherwise and more properly called the rights of war and peace, consisting of all the rules of intercourse between independent nations. These—

"That is, the laws of war—are not subject to the legislative authority of any one nation, and they are, therefore, not included within the powers of Congress.

"But the very nature of the Government, being one of limited and delegated powers, being a compact between the people of the several States in their separate and distinct character of States, is conclusive as to the power of Congress to legislate beyond the grants contained in the instrument which creates Congress itself. The very first section of the very first article of the Constitution declares that

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

"To the Constitution, then, not to the laws of war, we must look for all power which we can rightfully exercise as the legislative branch of this Government. All powers not granted were not reserved to the people in the aggregate, but were reserved to the States respectively, and to the people thereof; clearly showing that the Government of the United States is the result of compact between the States, and that the Union created by the Constitution is a Union only to the extent of the powers granted, and no further. To attempt, therefore, to make war against the States as such, is, in my judgment, and in the view which I have presented of the power of the Federal Government, an unwarrantable and arbitrary assumption of power which the States as such would be justified before the civilized world in resisting. To assume such a position is to give to the rebellion, which we have been engaged for

nearly three years in subduing, a position which it never could have attained for itself. It is to acknowledge that the experiment our fathers made, and the institutions under which we have lived and grown, can no longer be maintained by the people; not that the experiment itself, or that the institutions themselves are failures, but that the people to whom their preservation has been intrusted have become unworthy of them, and are lacking in that virtue and intelligence which are necessary to enable them to preserve institutions won for and bequeathed to them by the founders of the Government.

"The whole scope and plan of the powers of the Government, as ascertained by the Constitution, is to operate upon individuals and not States. The Government of the United States enforces obedience to its Constitution and laws, by exacting their rigid observance from individuals and not from States. You have no power under the Constitution to coerce a State. You have no power under the Constitution to use force against a State as such; but you are confined in the employment of all the force which belongs to you under the Constitution, to its assertion as against individuals and not against States. This very proposition, to authorize the Government that was about to be formed, to use force against a State, was made in the Convention that framed the Constitution of the United States, and was postponed without a dissenting voice. In the plan of a Constitution and form of Government submitted to the Convention by Mr. Randolph, in the shape of resolutions, the sixth resolution contained a grant of power 'authorizing an exercise of the force of the whole against a delinquent State,' and when it came up for consideration—

Mr. Madison observed that the more he reflected on the use of force, the more he doubted the practicability, the justice, and the efficacy of it, when applied to people collectively and not individually. A union of these State containing such an ingredient seemed to provide for its own destruction. The use of force against a State would look more like a declaration of war than an infliction of punishment; and would probably be considered by the party attacked as a dissolution of all previous compacts by which it might be bound. He hoped that such a system would be framed as might render this unnecessary, and moved that the clause be postponed. This motion was agreed to, *nem con.*—*The Madison Papers*, vol. 2, p. 761.

"Here, then, we have the authority which is claimed by the Senator from Ohio denied in the Convention that framed the Constitution, and the nature of the force and against whom it is to be used clearly defined.

"Now, sir, what are the war powers of the General Government? They are contained in the Constitution. Congress has the power To declare war, grant letters of marque and reprisal, and make rules concerning captures of land and water; to raise and support armies; but no appropriation of money to that use shall be for a longer term than two years; to provide and maintain a Navy; to make rules for the government and regulation of the land and naval forces.

"That is the extent of the war powers of Congress. When Congress has declared war, when Congress has raised its army, the mode and manner of conducting that war is intrusted to the Executive and the military authorities of the Government, and they are to be bound in its conduct, by the laws of war. To suppose that a Government created by each State for itself, a Government that could have no force or effect in any single State until it was ratified and adopted by that State for itself, would contain a grant of power to make war upon the State so adopting, is to suppose that the men who created it were wholly irrational. It is to suppose that they had learned nothing in the war out of which they had just come. The Government of the United States is the child of civil war. It is the creature of civil war. It was framed by men who resorted to civil war for the purpose of severing the tie which united them with the mother country. It was established upon the principle that there could be a union in the same Government for common purposes between States of different local interests and different local institutions. The principle that was established by the foundation of this Government was, that a union of States having different interests and dissimilar local institutions could be formed for purposes of common defence. If the power which is proposed to be exercised here is exerted, and if it is necessary to be exerted to maintain territorial unity, it is a declaration that after seventy years of trial that principle has proven to be a failure, and we are at war in 1864 to destroy what it took seven years of war from 1776 to 1783, and six years of peace, to establish.

"Mr. President, I have no interest in this question of slavery. I dislike to discuss it. I only refer to it because it has been selected as the institution to be annihilated, and because through it State rights are to be stricken down and State sovereignty ignored. The argument that slavery is the cause of the war, that there can be no union with slaveholding States, is an argument against the facts asserted and the principles established by the formation of the Government; it is an argument against the right of a State to govern itself and to prescribe and regulate within its own jurisdiction its own domestic and internal policy; it is an argument which, if acquiesced in, must inevitably destroy our present beautiful system of Government and erect upon its ruins a strong central Government; it is an argument tending to consolidation of power in the central Government; it is an argument against any union between States of different geographical interests and of dissimilar local institutions. If we are unable by constitutional means to resist the power of secession and preserve the Union, then has our experiment proven a failure.

"We have never as a Congress recognized the Confederate States as a belligerent power. If it be true, as the Senator from Ohio says, 'that they have won a position beyond the

reach of your Constitution, that our war with them must be tested by the laws of war; and these questions must be decided by the laws of war as recognized and practiced among civilized nations in ancient and modern times; I ask you for your authority under the Constitution of the United States, and as a Government created by it, to wage this war. I regard the admission contained within that sentence as pregnant with meaning, and, if correct, fatal to the cause of reunion."

Mr. Richardson, of Illinois, said: "I do not understand that Congress has any power in time of war that it has not in time of peace. Since our national existence we have passed through two wars, and no party, no department of the Government, no man in the Government, no court has ever held that Congress had more power in time of war than it has in time of peace. The power of Congress in both cases is derived from the same source—the Constitution of the United States. It can draw no power from any other source. The claim that the President or Congress has power derived from war above the Constitution is of recent origin.

"But, Mr. President, extraordinary as it may seem, the Senator from Ohio says that we are engaged in a war, that this is not an insurrection which we are putting down, that the war is being carried on between belligerents, and that Congress derives its power from the law of nations governing war. Sir, let me ask what power Congress can derive from the law of nations? Is there any additional power whatever it can derive which is not granted by the Constitution? Can Congress change the law of nations in any particular? Of course we must be governed by the laws of civilized warfare, but how can Congress derive any authority from the law of nations?

"If the Senator from Ohio is right, if his position is correct, I maintain that there are but two things which can be done in reference to this matter. If this is a war between belligerents all we can do is to treat or conquer, and no law that Congress may make will have any influence or power on our enemies so long as they are belligerents. I shall not trouble myself to hunt up the writers on the law of nations and read long extracts, but I lay down the proposition, and I invite the Senator from Ohio to discuss it.

"The Senator from Ohio says there is nothing in the Constitution preventing the course which he proposes. I do not state his precise language, but that is the substance of what he said. Sir, that statesman in search of power for Congress who is driven to this argument is argumentless. It cannot be supported by precedent; it cannot be supported by reason; it cannot be supported by principle. I do not propose to amplify on these propositions; I merely state them. I am speaking without notes and with very little preparation.

"But the Senators, however much they may

differ in reference to the point from which they derive the power, all seem to concur in the proposition that it is necessary in order to bring this war to a successful issue that you shall dispose of the question of slavery. I concur to some extent with those who say that the institution of slavery is gone; but I say you may wipe it from existence to-morrow, and you advance no step toward the putting down of the rebellion, if it is a rebellion, or the ending of the civil war, if it is civil war. We have tried that for three years, and how far has it advanced our cause? Your Proclamation of Emancipation gave to Jeff. Davis fifty thousand bayonets when his cause was sinking. Your acts of confiscation gave to him armies when he could not have got armies by any other means. You have pursued this line of policy, this course of legislation, and it has accomplished nothing. All the interests of the country, the interests of the white race, demand that we should bring this war to a speedy close, preserving the integrity of the Union and the rights of the States.

"Now, Mr. President, I differ from some of my own friends on this side of the Chamber. In the army of the Confederacy they have not to-day over two hundred and fifty thousand men; they had not during last year over three hundred thousand; they have never had over four hundred thousand men at any time during the progress of the war. We have to-day seven hundred thousand, that is we are feeding and paying that many. The President has called for five hundred thousand more. We have never had less than six hundred thousand in the field, often eight hundred thousand. The credit of Mr. Davis's government is worthless. The people inside of their lines are suffering for many of the necessaries of life, and the supplies both of materials of war, ammunition, and the like, and food, are scarce and difficult to be obtained for their army.

"Why is it that this civil war has been permitted to linger so long? You have all the departments of the Government and such an army as the sun has never shone upon. Why did you not end it last year? Why do you not do it now? You have armies and resources, credit and money. Why don't you end the war?

"I will tell you why you cannot. Your thoughts are turned upon the negro; your legislation is directed for his benefit; your ideas all float in and around him, from your Executive down. Instead of turning your attention to putting down the rebellion, to enforcing the laws of the Union under the Constitution, which you have the right to do you are legislating for the benefit of the negro. That white man who has borne civilization so far, you have lost sight of and ignored. Sir, you are responsible before the American people to-day for the continuance of this war. You have made no call for troops that has not been answered. You have had the resources of the country with you. Any other country on the face

of the earth with the blunders of this Administration would have been destroyed and utterly ruined. It shows the immense resources of this country and its great powers of endurance, when it can stand so many blunders and so much mismanagement. But, sir, suppose we adopt a little different policy; suppose that instead of pursuing this policy that has done so much mischief we turn our attention to another. We have the lights of history thrown along our path. Let us be instructed by them. Let us proclaim to these people real amnesty—not such as has been proclaimed by Mr. Lincoln—and give them six or nine months to accept it, and limit the time of its operation. Do that, and this difficulty will be settled very speedily. Open some door to those men who have gone into rebellion by which they can escape from the position which they are in, and they will retire from it very soon. My opinion is that if the President of the United States had proclaimed universal amnesty at any time within the last eighteen months, this war would now be over.”

On the 21st of March the subject came up again in the Senate, on the following amendment, proposed by Mr. Wilson, of Massachusetts:

That when any person of African descent, whose service or labor is claimed in any State under the laws thereof, shall be mustered into the military or naval service of the United States, his wife, meaning thereby the woman regarded and treated by him as such, and his children, if any he have, shall forever thereafter be free, any law, usage, or custom whatever to the contrary notwithstanding.

Mr. Davis offered the following as an amendment to the amendment:

And the loyal owner or owners of the wife or children of all slaves taken into the military service of the United States shall be entitled to a just compensation for such wife and children of said slaves, which may be taken from such owner or owners, to be ascertained by three commissioners to be appointed by the judge of the United States district court for the district in which the wife and children of any slave so mustered into the military service may reside, which commissioners shall make a detailed report to said judge, who shall approve or remand the same to the said commissioners, and when the report shall have been affirmed by said judge, the owner or owners of any wife and children aforesaid, shall be paid such sums as said report may state they are entitled to, out of any money in the Treasury not otherwise appropriated.

He said: “Mr. President, I assumed some days ago, and I think established by the most overwhelming amount of authority, that property existed in slaves, and furthermore, that I thought no sane man could controvert that position. I shall consider both these propositions to be established by the authorities which I then adduced, and shall treat the subject as though the property of the owners of slaves, as well in the husband that is taken into the military service as in his wife and children, was conceded; at any rate that it is established.

“I hold, sir, that the Constitution and the laws in relation to private property, and the

power of the General Government over private property, are the same exactly without regard to the class of property. The General Government has no higher right to interfere with property in slaves than it has in lands, or horses, or any other subject of property. Here is a plainly-written provision of the Constitution of the United States, and almost every State in the Union has in its constitution a similar provision:

No person shall be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

“Sir, what does this bill propose to do? To take the wife and the child of every slave man who may be mustered into the military service of the United States from their owners, not only without just compensation but without any compensation at all. Was there ever a more unjust and unconstitutional proposition made in a legislative body? I estimate that the average number of slaves to the soldier that would be taken by this provision would be four—a wife and three children. The average price of the wife and three children would be at least \$500, and I believe more. I have entire confidence that if the United States Government would cease its war upon that property it would soon rise largely above that sum. It is now proposed in the Senate of the United States, as a legislative measure, under a Constitution guaranteeing to all property-holders a just compensation for their property before it shall be taken for public use, to deprive the owners of every such wife and children of them of a property worth \$2,000, without making any compensation for that property.”

Mr. Wilkinson, of Minnesota, dissented, saying: “Mr. President, if I believed that slaves were property, if I entertained on that question the same views which are entertained by the Senator from Kentucky (Mr. Davis), I should certainly vote for his amendment. If I believed that under the Constitution of the United States slaves are property in the sense in which the honorable Senator regards them, I should support his amendment. But as I do not believe that a human being who is in the Constitution denominated a ‘person’ is to be regarded as property in the same sense in which a horse or a mule is considered property, I dissent entirely from the positions he has assumed.

“This bill, Mr. President, is to give freedom to the wives and children of the soldiers who fight our battles for the Government and for freedom. It has been claimed that if this bill shall pass it will work the emancipation of the whole negro race within the United States. It has also been argued that it is unjust to free the wife and children of a soldier in our Army where they belong to or are claimed as the slaves of a loyal man. To this I answer that it will be equally unjust to free the soldier himself where he belongs to a party who is loyal to the Government. Yet nobody claims—even the

Senator from Kentucky will hardly assume—that this Government can afford to commit an act so atrocious as to call upon a slave to serve in our armies and then remand him back to slavery again after he shall have aided in the suppression of this rebellion by his valor and his bravery upon the battle-field.”

Mr. Willey, of West Virginia, said: “I see in the Constitution which I have taken an oath to support a very plain provision that we shall not take private property for public use without just compensation; and it seems to me that the plain principles and obligations of constitutional law and the simple dictates of justice should compel the Senate to incorporate in a bill of this character a provision looking to that result. It will not do to tell me that there can be no property in slaves, and that, therefore, there ought to be no compensation for them. The very terms of the bill negative any such idea as that. I agree perfectly with Senators as to whether slaves should have been regarded as property in the first place; but we are to look at things as they are and at facts as they exist. I say, then, the very terms of the bill itself include the idea of property in slaves. Else where the necessity for the emancipation of the slaves whose husband and father enlists in the service of the United States? The main and fundamental principle of the bill is predicated upon the very idea that there is property in a slave. It is to take him out of the custody of his master and give him to himself. I should like, therefore (for I want to vote for this bill), to see this plain requirement of the Constitution recognized in the provisions of the bill, this plain response to the dictates of common justice, and I had nearly said of common honesty, heeded and obeyed under our obligation to the Government.”

No further progress was made in this bill.

In the House, on the 18th of January, Mr. Wilson, of Iowa, from the Committee on the Judiciary, reported a joint resolution to amend a joint resolution, explanatory of the act to suppress insurrection, &c., which he thus explained: “Mr. Speaker, the law affected by the joint resolution just reported from the Committee on the Judiciary, is in the following language:

Resolved by the Senate and House of Representatives, &c., That the provision of the third clause of the fifth section of “An act to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes,” shall be so construed as not to apply to any act or acts done prior to the passage thereof; nor to include any member of a State Legislature, or judge of any State court, who has not, in accepting or entering upon his office, taken an oath to support the constitution of the so-called Confederate States of America; nor shall any punishment or proceedings under said act be so construed as to work a forfeiture of the real estate of the offender beyond his natural life.

“The only part of that resolution affected by the one now under consideration is the last clause, which provides that no punishment or

proceeding under the confiscation act shall be so construed as to work a forfeiture of the real estate of the offender beyond his natural life. The object of the resolution which I have reported, is to so amend that last clause of the resolution of July, 1862, as to make it conform to section third of article third of the Constitution of the United States. In other words, it proposes to substitute for the language embraced in that resolution of 1862, the language of the Constitution, which is as follows:

The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture, except during the life of the person attained.

“We do not propose by the resolution to determine the question of the legislative construction of the Constitution, whether we may provide for forfeiture of fee, or confiscation of the real estate during life. The pending resolution leaves the whole matter to the court. In other words, we simply submit the section of the Constitution relating to the forfeiture of real estate to the courts of the country to determine whether forfeiture may be in fee or only for life.”

Mr. Kernan, of New York, who was unable to agree with the majority of the Committee, said: “Now, sir, the confiscation act was passed by Congress, and sent to the President, and before the joint resolution now proposed to be amended was passed, the President prepared a message to veto the original confiscation act, and I beg to read from that message which the President transmitted to the House as his views of the confiscation act. I read from the ‘Congressional Globe:’

That to which I chiefly object pervades most part of the act, but more distinctly appears in the first, second, seventh, and eighth sections. It is the sum of those provisions which results in the divesting of title forever.

For the causes of treason and ingredients of treason, not amounting to the full crime, it declares forfeiture extending beyond the lives of the guilty parties; whereas the Constitution of the United States declares that “no attainder shall work corruption of blood or forfeiture except during the life of the person attained.” True, there is to be no formal attainder in this case: still I think the greater punishment cannot be constitutionally inflicted, in a different form, for the same offence.

I may remark that the provision of the Constitution, put in language borrowed from Great Britain, applies only in this country, as I understand, to real or landed estate.

“After the President, having this confiscation act under consideration, had, as he says to Congress, prepared this message to veto it, because it was unconstitutional, as purporting to take away, as part punishment of treason, a greater estate in lands than a life estate, Congress passed the resolution explanatory of the confiscation act, and sent it to the President; and the language of the explanatory resolution now in question I beg leave to read again:

Nor shall any punishment or proceeding under said act be so construed as to work a forfeiture of the real estate of the offender beyond his natural life.

"After Congress had passed and the President had approved that act and the explanatory resolution, he returned them to Congress, using this language in his message returning them with his approval:

Considering the bill for "An act to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes," and the joint resolution explanatory of said act as being substantially one, I have approved and signed both.

"So that we have from the President a statement: first, that any attempt by Congress or by the law-making power, to make as a part punishment of treason the forfeiture of a greater estate in lands than a life estate of the offender, would be unconstitutional; and secondly, that he only approved the act because he regarded the joint resolution, now proposed to be changed, a part of the act. And as the law now stands, there is no doubt that the forfeiture incurred as to the real estate of the traitor is only of his life estate. Believing as I do that that is as far as we can affect real estate as a part punishment of treason, I deem it wise to allow the law to stand. I agree with the President that the true construction of the Constitution is, that we have no power to cut off the inheritance of innocent heirs as part punishment for treason."

Mr. Kernan then passed to the consideration of the expediency of the change. It would render the meaning of the law doubtful; persons buying an estate under a decision of an inferior court that may be reversed in a higher court, might be involved in the misfortune of losing what they had paid; would it be wise to take away forever the estate in the land?

Mr. Kernan further said: "I submit that the punishment for treason, like the punishment for every other crime, should fall upon the guilty party only, and that we should not seek to affect his innocent children and heirs. Take away from the guilty party his life estate, his right to dispose of it, but do not take away the right of inheritance from the innocent heirs, who will show themselves loyal, else they never will have the right to come into court and ask to be heard.

"I submit again, if there is a desire to press this matter through now, that this law and joint resolution are and speak as one law as they stand; that the law could not have been passed but from the fact that the joint resolution was made a part of it. The act was amended in accordance with the President's suggestion of what it ought to be. Now, repeal the joint resolution, or so amend it that it speaks anew from this time, and how will it affect men who have been guilty of treason since July, 1862, when the law was enacted? At least it will raise very embarrassing questions in reference to proceedings now pending, because the rule is that, if you repeal a penal law, all proceedings under it not completed before the repeal, fall."

Mr. Orth, of Indiana, followed, with a brief sketch of the prominent features of the law of treason in Great Britain, whence is derived the principal part of our jurisprudence, and proceeded to examine the law-making power of Congress over the subject, and the penalties which it was authorized to prescribe, and said: "The whole question, then, of the extent of our power to provide a punishment for treason, which in our judgment shall be adequate to the suppression of the crime, rests upon the construction to be given to the limitation in the clause of the Constitution. The words of limitation are: 'but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.'

"The intent of the framers of the Constitution," he said, "was not to be found expressed either in the debates of the Convention, or in contemporaneous exposition." He then quoted the opinions of Rawle, Story, and Curtis, as commentators, as not being of sufficient weight to deter further examination, and proceeded as follows: "The language of this section, we must remember, is, 'but no attainder of treason shall work corruption of blood or forfeiture, except during the life of the person attainted.' If the Constitution had intended to prohibit corruption of blood or forfeiture altogether, why add the words 'except during the life of the person attainted?' Had these latter words been omitted the restriction would have been absolute, and Congress could not, by any punishment whatever, have deprived the person attainted of any property for even a single day or hour. But these words, 'except during the life of the person attainted,' are part of the Constitution; and shall we be driven, in their construction, to the absurd position that such forfeiture shall only extend to the lifetime of the traitor and then cease? Did our Constitution, else so redolent with wisdom and statesmanship, intend to provide for such a farce as that the property of the traitor should be forfeited to the Government only for that brief space of time which should intervene between the day of sentence and the day of execution? Is it rational or logical to suppose that such a construction of this section, where the forfeiture at best would probably be from thirty to ninety or one hundred and twenty days, could in any just sense of the term be called a punishment? Can it be supposed that the Constitution intended to regard the high and damning crime of treason with more lenity than the criminal code regards the comparatively insignificant crime of horse-stealing or petit larceny?

"If you cannot by forfeiture deprive the traitor of his property, how can you collect any fine which may be assessed against him? Forfeiture is a method of alienating property, and by the act of the last Congress you authorized a fine to be assessed against the traitor of not less than \$10,000. This fine becomes a judgment of court, and a lien upon the real estate of the culprit, and the same judgment also de-

nounces the sentence of death. A warrant issues to the officer to carry into effect the sentence of death, and a writ of *hæri facias* to collect the fine by seizure and sale of the real and personal estate. Both writs are in process of execution at the same time. With the one the officer makes a levy on the real and personal estate and gives notice of the day of sale; by virtue of the other he purchases a rope and erects a scaffold. The defendant is to be hung in thirty days after sentence, but the sale cannot be had without giving, say forty days' notice of the time and place. The traitor is hung, life becomes extinct, the attending physician pronounces him dead; and the opposite construction of the Constitution pronounces the writ of *hæri facias* also defunct and the forfeiture a nullity. For, they say, you can only forfeit, take, alienate the estate for the period of his life, and if you proceed to sell property by virtue of the *hæri facias*, you sell, alienate, convey the fee simple thereof, and to do this would be, in the opposite view, a violation of the Constitution.

"Absurd and ridiculous as such a conclusion is, it is the legitimate result of a contrary construction of this section of the Constitution.

"What, then, is the fair import of these words, 'except during the life of the person attainted' ? To my mind they will admit of but a single rational interpretation, and that is that there shall be no forfeiture after the death of the person attainted. In other words, the judgment of the court shall be rendered against him while he is alive, after he has had a fair trial, with opportunity to confront his accusers, meet them face to face, and combat their accusations. That after his death, whether according to the course of nature or by process of law, no judgment or sentence shall be had the effect of which shall be to forfeit his estate, unless that judgment shall be final and irrevocable prior to his death. If I were disposed to indulge in mere verbal criticism I might animadvert upon the word 'except' used in that section. The word 'except,' we are told by lexicographers, is equivalent to the word 'unless,' and a century ago, as reference to the writers of that age will show, was used almost exclusively in the same sense as we now use the word 'unless.' Numerous instances of this are found in the Holy Bible, where the word 'except' is used in sentences in which at the present day we should invariably use the word 'unless;' thus:

Except the Lord build the house, they labor in vain that build it.

Except the Lord of Hosts had left unto us a very small remnant we should have been as Sodom.

Can two walk together, except they be agreed.

Except a man be born again, he cannot see the kingdom of God.

Except ye repent, ye shall all likewise perish.

"In all these instances, and they could be multiplied almost *ad infinitum* from writings of that age, both sacred and profane, the word 'except' is used in the sense in which we of the present

day would use the equivalent word 'unless.' Now, then, let us, in further illustration of my position, substitute the word 'unless' for the word 'except' in the clause under consideration. It will then read:

But no attainer of treason shall work corruption of blood or forfeiture, unless during the life of the person attainted.

"Unless what or when? The attainer shall not work forfeiture unless it be worked, completed, during the lifetime. If the prisoner die after verdict of guilty and before judgment, there can be no forfeiture. If the prisoner die after sentence of death and before judgment of forfeiture, there can be no forfeiture. If the prisoner be executed after sentence of death and before judgment of forfeiture is entered, there can be no forfeiture. The sentence of death and the judgment of forfeiture are not necessarily simultaneous acts. They may be rendered separately, on separate days, if you please, and the right is thus reserved to the prisoner to move in arrest of the judgment of forfeiture even after sentence of death is passed upon him; for the criminal law holds the rights of the prisoner in such regard that it will take no step against him in any of the stages of trial, from arrest to final execution, without giving him an opportunity of being heard in his defence.

"In further support of my position, let me advert to the fact that in England, long prior to and at the adoption of our Constitution, attainer of treason after the death of the supposed traitor (I mean his natural death before trial or even accusation) was of frequent occurrence. This was a monstrous doctrine, shocking to every principle of justice upon which the criminal code is founded, to accuse a man of crime after death, when none is to speak for his innocence, to proceed to trial and judgment, to wrest from innocent hands that property which by law upon his death descended to and vested in his heirs, and forfeit their property, not his property, to the Government for his supposed criminal conduct. Is it not more just and reasonable to suppose that the Constitution intended to embrace and provide against this monstrous perversion of natural justice than that they intended so absurd a proposition as that the forfeiture of estate should only be for that brief period of time between sentence of death and its execution?"

On the 14th of January the question came up again in the House, and Mr. Cox, of Ohio, said: "Mr. Speaker, the gentleman from Indiana, in his elaborate and learned speech, drew from the old feudal system, from the black-letter laws, from the whole history of our common law with reference to forfeiture, to show that there should be another and a different interpretation given to the Constitution from that which was given by the men who made the Constitution, by the men who passed the law of 1790, to carry out that clause of the Constitution to which I have referred, and by all the interpreters of the Constitution to whom he himself has referred. He

says that the science of philology is progressive, and that a word which meant one thing at one time and in one age may mean another thing at another time and in a different age, and upon that principle he says that the word 'except' in the Constitution means 'unless,' and then he draws, the conclusion that the only meaning of the Constitution is that the proceedings shall be commenced in the life of the person attainted.

"It will be borne in mind that the phraseology of our Constitution was most carefully guarded. It was as pure and simple as the spirit of the Constitution was kind and liberal. The word *except*, in 1787, had as plain a meaning then as it has now. The word 'unless' was not its synonym then, nor is it now, except in very rare and remote instances.

"But suppose the gentleman should by some technical logomachy find out that the word 'except' meant sometimes 'unless;' he does not find the word 'unless' in the Constitution, and if he had it would make no difference in the argument. The word 'except,' according to my philology, which has not progressed very rapidly, is derived from the Latin words *ex* and *capio*, to take from, to exclude from, to leave out. This is the primary, and not the secondary meaning into which the gentleman would distort it. That is the meaning always attributed to it by all the public writers who have commented on this part of the Constitution. This, too, is the ordinary and simple meaning of the Constitution. It reads in this way, and cannot be made to read in any other: 'But no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.' There are some clauses which interpret themselves. Discussion only obscures, and does not elucidate their meaning. This clause is one of them.

"Now, suppose the gentleman inserts his favorite word 'unless;' how does that help him? It is still a limitation on the power which works corruption of blood or forfeiture, and that limit is during the life of the person attainted of treason. That word 'unless' does not change the meaning of it at all. You may use it with all emphasis, and still the limitation would be on forfeiture during life.

"But, Mr. Speaker, there can be no such construction given to it. The word 'except,' according to Worcester, Webster, and all other dictionaries, in its first and best meaning simply means 'to exclude from;' so that when the Constitution said that the attainder of treason should not work forfeiture of property except during the life of the person attainted, it meant that the forfeiture should exclude the fee. It was taken out of and from the effects of the forfeiture. The forfeiture never went beyond the life. And there are good reasons for such a construction which the gentleman from Indiana seemed to overlook. He might have found them laid down by Judge Story. He might have found them in the United States courts decisions. He might have found them in com-

mon sense. He might have found them in the history of the English parliament. He might have found them in the history of English and Irish confiscations. It was intended by our Constitution to prevent forever this crime of Government taking from those not in legal existence, from minors, from the weak and helpless, from those not guilty, from those incapable of crime, that property which always in cases of intestacy, and generally in cases of will, the law gives to the children, and which by natural right, and according to every code of inheritance known among men, always goes to the children in the absence of a will. The only authority which can be offered by the gentleman for his construction is this Virginia judge. The gentleman has brought no authority here for the purpose of sustaining his view—none whatever. He has evidently been diligent, and has run over all the authorities, and found them against him. Can the gentleman name one authority which sustains his view of the case except this trashy decision of this Judge Underwood? Not one."

Mr. Davis, of Maryland, followed, saying: "No attainder shall work corruption of blood or forfeiture, except during the life of the person attainted. Now I take it that the meaning of that clause is that the forfeiture worked shall, must be effected during life. The honorable gentleman from Ohio, and those who think with him, would construe it to be that the forfeiture when worked shall only endure for the life of the party. Palpably the latter is the incorrect and the former the legal meaning. The purpose assumed is the protection of the offspring from punishment for the guilt of the ancestor. But a fine is equally taken from the offspring, as land; yet no one denies the right to fine a person attainted. There was, however, an effect of attainder that did punish the offspring, and the offspring alone. Every student of Blackstone knows this, that the judgment convicting a person of treason operated a corruption of blood. The corruption of blood stopped the transmission of hereditary blood to any heir of the person attainted; so that the legal effect of conviction for treason under the law of England was, first, to forfeit all the property, real and personal, of the person attainted, and, secondly, to corrupt his blood, destroy its hereditary quality, so that he could neither take land by descent himself, nor transmit hereditary blood to the persons who would, but for his attainder, have been his heirs. He could, in the language of the law, have no heirs. The attainder corrupted his blood, and there was no hereditary blood transmitted to them.

"Now, suppose any ancestor of any person convicted and attainted for treason died the day after the execution, owning lands, they could not pass to his son, nor to any collateral relation claiming by descent through him, because the operation of judgment, besides forfeiting the land owned by the party in his lifetime, had corrupted his blood, and no one could trace

descent through him. He was a bar, cutting off the relationship between grandfather and grandson. Land which would have come to the grandson if the father had not been a person attainted, instead of going to the heir, was arrested in transit to the heir by the corruption of blood, and passed either to the lord of the fee or to the king.

"So that the Constitution deals merely with corruption of blood and its operation. There shall be no corruption of blood worked by attainder or forfeiture except during the life of the person. Attainder worked no forfeiture after the death of the party except by corruption of blood. The forfeiture of a fee-simple estate was not a forfeiture after the life of the party; the whole fee was in the person attainted, his heirs had no interest in it, and no lawyer would ever dream of describing a forfeiture for life by the words of the Constitution, or describe the forfeiture of a fee-simple estate as a forfeiture worked by attainder after the life of the party. It was one of the settled laws of England at that time, and which also prevailed in some of the States of this Union, that the corruption of blood did, what the gentleman from Ohio so properly execrates, operate upon innocent persons with reference to their rights coming from a different source after the criminal had expiated his crime. Now, without meaning to say positively that that is the meaning and operation of the section, I say that in my judgment it comes nearer an intelligible exposition of it than any such theory as this, that you cannot take lands in fee, but you may take all his personal property absolutely, which was the ground of the President's threatened veto of last year; that you can fine a man to the extent of his estate, but you cannot take his lands to pay the fine. And being unintelligible, with all respect to our recent friends, they are driven to say, that in the punishment of treason the Constitution has been guilty of this intolerable folly: that for robbing the mail, or piracy, for any ordinary offence, or murder on the seas or in the army or navy; that for any ordinary crime, Congress may prescribe what punishment they please; take the land in fee; but in providing for the punishment of treason, the greatest crime, the most dangerous crime, it has feebly attempted to protect innocent offspring by saving the lands of the convict, but leaving his life and all his personal property at the mercy of the law; that it has been guilty of sanctioning the unrepugnant discrimination between real and personal property, and adopting the aristocratic idea that land was something that must not be taken, but preserved for the heir, that must come down to him by a perpetual constitutional entail. And this anti-republican view is urged to fetter us in breaking the power of an aristocratic rebellion founded on land in large bodies and on negroes. Were there no other objection than this, that simple *reductio ad absurdum* disposes of the argument.

"But, Mr. Speaker, the question here, as I have said, is not, what is the true meaning of this clause of the Constitution, but does it declare that no forfeiture, that no confiscation under any process of law shall affect land for a longer period than the life of the owner? Does it apply to any case where there is no attainder, no conviction?

"The law of the last Congress prescribed a different process from conviction in a court of law of the person guilty of the crime. It provides that upon proceedings in the district court in the nature of proceedings in admiralty, the lands of certain classes of persons, and all their personal property, shall be forfeited for the use of the Government.

"And the Constitution provides that the property of citizens shall not be taken without due process of law. Now, the question which gentlemen on the other side of the House have to argue is, not the law of attainder, but whether the process in the district courts of the United States to confiscate the property of persons proved to be of the specified classes is due process of law for depriving a man of his property under the Constitution. If they cannot maintain that that is not due process of law within the meaning of the Constitution, they cannot throw the least doubt on the constitutionality of this mode of procedure."

On the 22d the question being again before the House, Mr. Stevens, of Pennsylvania, said: "I begin simply by denying that the Constitution has the least reference to any one of the provisions of the bill in question, and I intend to show that the act of 1862, which was modified by a resolution which it has been truly said was passed under duress very little to the credit of the Congress that passed it—that act of 1862 is not affected directly or indirectly by any one of the provisions of the Constitution, and that especially that part of the act which provides for seizing property and confiscating it in fee-simple is purely a proceeding under the laws of war and under the law of nations, over which the Constitution has no control, and in regard to which it has no effect whatever. The first section of the act of 1862 punishes the crime of treason with death and the forfeiture of personal estate. That, I believe, is not objected to, because personal estate, once forfeited, is forfeited forever. There is no such thing as a life estate in personal property. He who gets it for an hour gets it forever. That is the plainest principle of law. The second provision is that those who incite to rebellion shall be punished with fine and imprisonment. That has nothing to do with the Constitution. It is not pretended, I suppose, that the Constitution in any way affects it. Then comes the clause of the bill to which gentlemen take exception; and what is that? It is to be found in the statute-books of that session of Congress, page 818. It provides that, to insure the speedy termination of the present rebellion, it shall be the duty of the President of the United States

to cause the seizure of all the estate and property, money, credits, &c., of the persons guilty, and apply the proceeds thereof to the support of the army of the United States.

"Here is no attainder for treason, here is no confiscation of property under any provision of the Constitution. Then the law goes on to state how you are to seize and condemn property. It is to be seized and proceeded against *in rem*, according to the law for that purpose, and condemned. As what? As the property of traitors? No such thing. Condemned as 'enemies' property.' Does not that show that the Constitution has nothing to do with it on the question of treason? Here are a body of men in arms against the United States. This act of Congress, so far as it refers to seizures of property in fee, refers to them as seizures of the property of alien enemies, to be treated as such.

"Now, where is there a word about attainder of treason? That part of the act does not seize property as traitors' property at all. But the learned gentleman from Ohio (Mr. Spalding) has well said all that I intended to say with reference to attainder for treason. Attainder for treason is impossible under the laws of the United States as they now stand. Without an express act making a conviction and sentence and execution for treason an attainder of treason, there is no attainder of treason in the United States; and there is no such law here.

"It is, however, essential to ascertain what relation the seceded States bear to the United States, that we may know how to deal with them in reestablishing the national Government. There seems to be great confusion of ideas and diversity of opinion on that subject. Some think that those States are still in the Union and entitled to the protection of the Constitution and laws of the United States, and that, notwithstanding all they have done, they may at any time, without any legislation, come back, send Senators and Representatives to Congress, and enjoy all the privileges and immunities of loyal members of the United States. That whenever those 'wayward sisters' choose to abandon their frivolities and present themselves at the door of the Union and demand admission, we must receive them with open arms and throw over them the protecting shield of the Union, of which it is said they had never ceased to be members. Others hold that, having committed treason, renounced their allegiance to the Union, discarded its Constitution and laws, organized a distinct and hostile government, and by force of arms having risen from the condition of insurgents to the position of an independent Power *de facto*, and having been acknowledged as a belligerent both by foreign nations and our own Government, the Constitution and laws of the Union are abrogated so far as they are concerned, and that, as between the two belligerents, they are under the laws of war and the laws of na-

tions alone, and that whichever Power conquers may treat the vanquished as conquered provinces, and may impose upon them such conditions and laws as it may deem best.

"It is obvious that this question is of vast importance. If the first position should be established, then the rebel States, after having been conquered and reduced to utter helplessness through the expenditure of many billions of money and the shedding of oceans of loyal blood, may lay down their arms, which they can no longer wield, claim to be legitimate members of the Union, send Senators and Representatives to Congress, retain all their lands and possessions, and leave the loyal States burdened with an immense debt, with no indemnity for their sufferings and damages, and with no security for the future.

"If the latter proposition prevails, then Congress will readjust the Government on the firm basis of individual and public justice; will protect the innocent and pardon the least guilty; will punish the leading traitors; seize their lands and estates; sell them in fee-simple; pay the proceeds into the national Treasury to discharge the expenses and damages of the war, and provide a permanent fund for pensions to the widows and orphans and the maimed and mangled survivors of this infamous war; and, above all, will forever exclude the infernal cause of this rebellion—human bondage—from the continent of North America.

"In order rightly to determine this question we must inquire whether the "Confederate States" are to be considered as a hostile people, entitled to no other protection or privileges than are due to foreign nations at war with each other. Is the present contest to be regarded as a public war, and to be governed by the rules of civilized warfare, or only as a domestic insurrection, to be suppressed by criminal prosecutions before the courts of the country? If the latter, then the insurgents when proceeded against have a right to invoke the protection of the Constitution and municipal laws. If the former, then they are subject to the laws of war alone.

"Another important question is, is this war waged by States in their corporate capacity, or is it merely a treasonable outbreak by guilty individuals? Vattel, pp. 424, 425, says:

When in a republic the nation is divided into two opposite factions, and both sides take up arms, this is called a civil war. The sovereign indeed never fails to bestow the appellation of *rebels* on all such of his subjects as openly resist him; but when the latter have acquired sufficient strength to give him effectual opposition, and oblige him to carry on the war against them according to the established rules, he must necessarily submit to the use of the term "civil war."

On earth they have no common superior. They stand precisely in the same predicament as two nations who engage in a contest, and, being unable to come to an agreement, have recourse to arms.

"When an insurrection becomes sufficiently formidable to entitle the party to belligerent rights, it places the contending powers on pre-

cisely the same footing as foreign nations at war with each other. For all the consequences of war, of combat, and of conquest they are foreign nations. Judge Grier, in a most able, lucid, and conclusive opinion delivered in the prize cases, says:

The parties belligerent in a public war are independent nations.

"No one acquainted with the magnitude of this contest can deny to it the character of a civil war. For nearly three years the Confederate States have maintained their declaration of independence by force of arms. True, they have met with sad defeats. But success has not been all on one side. But what renders their position beyond controversy is, the great powers of Europe have acknowledged them as belligerents, entitled from foreign nations to equal rights with the parent Government. What is still more conclusive, we have acknowledged them as belligerents ourselves. With unfortunate haste we blockaded their ports. A blockade is declared only against a foreign nation. If they were still members of the Union we should repeal the laws granting ports of entry. A nation does not blockade itself. We have treated their captive soldiers as prisoners of war, not as rebels; we have exchanged prisoners; we have sent and received flags of truce. This is not the usage awarded to an unorganized banditti.

"What, then, is the effect of this public war between these belligerents, these foreign nations? Before this war the parties were bound together by a compact, by a treaty called a 'Constitution.' They acknowledged the validity of municipal laws mutually binding on each. This war has cut asunder all these ligaments, abrogated all these obligations.

The conventions, the treaties made with a nation, are broken or annulled by a war arising between the contending parties.—*Vattel*, Book 3, chap. 10, sec. 126.

"Phillimore says, p. 662:

It was at one time an international custom that the belligerents should, at the breaking out of the war, make a public and solemn proclamation that the obligation of treaties between them had ceased. That custom has become obsolete. In the place of it has arisen the general maxim that war, *ipso facto*, abrogates treaties between the belligerents.

"Chancellor Kent says:

As a general rule, the obligations of treaties are dissipated by hostility.—1 *Kent*, 175.

"Professor Lieber, the most learned of living publicists, in a communication to Major-General Halleck, containing instructions for the government of our armies, which were revised by a board of officers and approved of by the President, treats the rebel States as subject to martial law only, and not subject to the municipal laws of the United States or to the Constitution. On page 8 he says:

All municipal law of the ground on which the armies stand or of the countries to which they be-

long is silent and of no effect between armies in the field.

"Hence he declares the slaves free, and not to be reenslaved, *passim*.

"The Supreme Court of the United States (in *Hilton vs. Jones, Dalt.*, 224) lays down the same doctrine. It decided that the revolted provinces of America, by the Declaration of Independence, the formation of a government, and supporting it by arms, became an independent foreign nation in 1776. Years before their independence was acknowledged by any other nation, courts applied the law of prize to them as to other foreign nations. Sergeant Wildman (page 8) says:

The primary effect of war is to extinguish all civil intercourse, and to place all the subjects of belligerents in the condition of enemies. This principle extends not only to the natural-born subjects, but to all persons domiciled in the enemy's territories; to all who come to reside there with knowledge of the war, and who having come to reside before the war, continued their residence after the commencement of hostilities for a longer time than is necessary for their convenient departure.

"But it is said that this must be considered a contest with rebel individuals only, as States in the Union cannot make war. That is true so long as they remain in the Union. But they claim to be out of the Union; and the very fact that we have admitted them to be in a state of war, to be belligerents, shows that they are no longer in the Union, and that they are waging war in their corporate capacity under the corporate name of the 'Confederate States,' and that such major corporation is composed of minor corporations called States, acting in their associated character. It is idle to say that townships and counties and parishes within such States are at peace while the States by acknowledged majorities have declared war. It is still more idle to say that individuals within the belligerent territory, because they were opposed to secession, and were loyal to the parent Government, are the State, though comprising but five per cent. of the people, and hence that the States are not at war. This is ignoring the fundamental principle of democratic republics, which is that majorities must rule, that the voice of the majority, however wicked and abandoned, is the law of the State. If the minority choose to stay within the misgoverned territory, they are its citizens and subject to its conditions. The innocence of individuals forms no protection (except in a personal point of view) to those residing in a hostile territory. *Vattel*, page 811, says:

When the sovereign or ruler of a State declares war against another sovereign, it is understood that the whole nation declares war against another nation. Hence the two nations are enemies, and all the subjects of the one are enemies of all the subjects of the other. Since women and children are subjects of the State and members of the nation, they are to be ranked in the class of enemies.

"Even the innocence of women and children does not screen them from the fate of their nation. True, in dealing with them personally,

great difference is made between the innocent and the guilty. But how can it be said that the States are not at war? Individuals do not make war. Individuals may take life, but they cannot make war. They cannot be recognized as belligerents. War is made by chartered or corporate communities, by nations or States.

"Phillimore, vol. 3, p. 101, sec. 69, says:

Nevertheless, as war is the conflict of societies, that is, of corporate bodies recognizing and governed by law in all their actions, &c.

"On page 100, sec. 68, he says:

A war between private individuals, who are members of a society, cannot exist. The use of force in such a case is a trespass or violation of municipal law, and not war.

"The Supreme Court of the United States, in the prize cases decided at its last session, says:

Hence, in organizing this rebellion, they have acted as States claiming to be sovereign over all persons and property within their respective limits, and asserting a right to absolve their citizens from their allegiance to the Federal Government."

Mr. Smith: "I do not exactly understand the position of the gentleman, nor do I know that the question which I propose to ask will cause any difference in the result at which the gentleman arrives; but from the remarks already made by him, I desire to ask him this question: whether he takes the ground that a State, and not the individuals of a State, commits the crime of treason against the Government of the United States?"

Mr. Stevens: "I take the ground, sir, that when you cannot punish them as traitors, you can make war with them as belligerents. It is not a question of punishing under the Constitution, but outside of it. These men are enemies, and we are treating them as enemies; and I have no doubt that, as States, they are at war with us."

Mr. Smith: "The question that I mean to put directly, if the gentleman will allow me, is this: whether the Government has power to punish a State in its corporate capacity, and not the citizens of a State as individuals?"

Mr. Stevens: "I mean to say that if a State, as a State, makes war upon the Government and becomes a belligerent power, we treat it as a foreign nation, and when we conquer it we treat it just as we do any other foreign nation. That is my position, very distinctly."

Mr. Smith: "I understand the rule of law to be that a corporation has neither body nor soul; and therefore I would like to ask the question whether we can punish a State which, as a corporation, has neither body nor soul?"

Mr. Stevens: "If the gentleman be right, how then could we punish Great Britain when we make war upon her? If she has no soul to be damned, she certainly has a body to be lost. When we conquer her we shall take good care, let me tell the gentleman, that she shall be properly punished, if we have any regard for our people at all."

Mr. Bliss: "I ask the gentleman from Pennsylvania, if the seceded States are foreign governments, what right we have to adjudicate upon their private property."

Mr. Stevens: "When we seize it as the property of enemies during a war we have a right to take it."

Mr. Bliss: "And hold jurisdiction over the soil of a foreign country?"

Mr. Stevens: "That is what I should call amphibious action, which the gentleman will understand from my remarks."

All persons residing within this territory whose property may be used to increase the revenues of the hostile power, are in this contest liable to be treated as enemies, though not foreigners.

"This seems to me to settle the question. This may work a hardship on loyal men opposed to the war. But to escape the condition of enemies they must change their domicile—leave the hostile State; for I again repeat there can be no neutrals in a hostile State. As the United States are at war with an acknowledged belligerent, with a foreign nation, and as such war has abrogated all former compacts existing between them, neither the United States nor the Confederate States can, as against the other, claim the aid of the Constitution or the laws passed under it. If they still exist, the slaveholder of South Carolina might claim the aid of the fugitive slave law to regain his absconded slave. So Gen. Barksdale with others was murdered, because he was shot down without being tried and condemned according to the provisions of the Constitution."

"By the law of nations, the captain and crew of a vessel are supposed to be standing on the soil of the nation whose flag the ship bears, although in distant seas. Those armed vessels that belong to no nation and make war are pirates. The Alabama and its fellows are not treated as pirates, and must therefore belong to an acknowledged nation. That nation is the Confederate States. But if the territory of the Confederate States is our territory, then he who treads the decks of the Alabama or Florida stands on our soil, and plundering on the high seas, is a pirate. We do not so treat them until we have conquered the country held by the Confederate States. Covered by the confederate flag, it is a foreign country. When we do conquer it, it is a conquered country. Any other principle would render all our conduct inconsistent and anomalous."

"If the rebel States are still in the Union I see no reason why they should not elect the next President of the United States. Any number of them might meet and choose electors, who might cast their votes for President and Vice-President, and demand that they should be counted by Congress. Or if the rebels decline to vote, then a hundred loyal men, 'who are the State,' might meet and choose electors. The few loyal men around Fortress Monroe, or Norfolk, or Alexandria, and a few cleansed patches in Louisiana, being

one-thousandth part of the States, might choose electors for their whole States.

"The idea that the loyal citizens, though few, are the State, and in State municipalities may overrule and govern the disloyal millions, I have not been able to comprehend. If ten men fit to save Sodom can elect a governor and other State officers for and against the eleven hundred thousand Sodomites in Virginia, then the democratic doctrine that the majority shall rule is discarded and dangerously ignored. When the doctrine that the quality and not the number of voters is to decide the right to govern, then we have no longer a republic, but the worst form of despotism. The saints are the salt of the earth; but the 'salt of the earth' do not carry elections and make governors and presidents. Within the State of South Carolina a rebel's vote weighs just as much as a loyal voter's. We may conquer rebels and hold them in subjection, and legislate for them as a conquered people; but it is mere mockery to say that, according to any principle of popular government yet established, a tithe of the resident inhabitants of an organized State can change its form and carry on government because they are more holy or more loyal than the others.

"From all this the legitimate conclusion is, that all the people and all the territory within the limits of the organized States which, by a legitimate majority of their citizens, renounced the Constitution, took their States out of the Union, and made war upon the Government, are, so far as they are concerned, subject to the laws of the State; and, so far as the United States Government is concerned, subject to the laws of war and of nations, both while the war continues and when it shall be ended.

"If the United States succeed, how may she treat the vanquished belligerent? Must she treat her precisely as if she had always been at peace? If so, then this war on the part of the United States has been not only a foolish but a very wicked one. But there is no such absurd principle to restrain the hands of the injured victor.

"By the laws of war the conqueror may seize and convert to his own use every thing that belongs to the enemy. This may be done while the war is raging to weaken the enemy, and when it is ended the things seized may be retained to pay the expenses of the war and the damages caused by it. Towns, cities, and provinces may be held as a punishment for an unjust war, and as security against future aggressions. The property thus taken is not confiscated under the Constitution after conviction for treason, but is held by virtue of the laws of war. No individual crime need be proved against the owners. The fact of being a belligerent enemy carries the forfeiture with it.

"To my mind there can be no doubt as to what we have a right to do if, as I will not permit myself to doubt, we should finally conquer the Confederate States. What it will be

policy to do may be more difficult to determine. My mind is fixed. The rebels have waged the most unjust, cruel, and causeless war that was ever prosecuted by ruthless murderers and pirates. They have compelled the Government in self-defence to expend billions of money. Every inch of the soil of the guilty portion of this usurping power should be held responsible to reimburse all the costs of the war; to pay all the damages to private property of loyal men; and to create an ample fund to pay pensions to wounded soldiers and to the bereaved friends of the slain. Who will object to this? Who will consent that his constituents and their posterity shall be burdened with an immense load caused by these bloody traitors? Their lands if sold in fee would produce enough for all these purposes, and leave a large surplus. Such confiscation of course would spare the property of those who took no part in the war, and of the common soldiers, who were compelled by the laws of their States to enter the army.

"All this done, and yet the half would be left undone. Oppressive as would be the debt and grievous the loss of our loyal citizens, yet if an honorable and safe peace were made our free and prosperous people would bear it without a murmur. But if a disgraceful peace were made, leaving the cause of this rebellion, and the fruitful cause of future wars, untouched and living, its authors would be the objects of the deepest execration and of the blackest infamy. While the Constitution protected the institution of slavery, very few desired to disturb it in the States. There were not three thousand abolitionists, properly so called, in the United States. But since those States have voluntarily thrown off that protection, and placed themselves under the law of nations alone, it is not only our right but our duty to knock off every shackle from every limb."

Mr. Broomall, of Pennsylvania, expressed his views as follows: "There are two positions taken by very opposite parties upon the status of those engaged in the rebellion. One is that they are for all purposes public enemies, and to be treated as such; the other is that for all purposes they are our fellow-citizens, and entitled to the benefits of the Constitution and laws of the United States. I think both these positions erroneous. I think the true theory is this: the rebels are in the wrong by their own voluntary act; they are therefore not entitled to any of the advantages of their position, but are subject to all the disadvantages of it. Against the Government they cannot claim to be either public enemies or subjects, but the Government at its election may treat them in either capacity, sometimes and for some purposes in one, and sometimes and for other purposes in the other. When subjects revolt, the sovereign, if they are few, applies the civil law, and hangs them or pardons them. In theory he may do so without regard to the number of the revolting subjects. But in practice, as the

number increases, the difficulty and the cruelty of enforcing civil law increase, and the more humane laws of war gradually step in. Captives, instead of being hanged for treason, are treated as prisoners of war. Other nations interfere in defence of their subjects. Aiding and abetting traitors is treason; supplying traitors with food and arms is aiding and abetting them. To prevent the consequences of this, other nations require the granting of belligerent rights to insurgents. Thus the laws of war take the place of the civil law. But as between the sovereign and the revolted subjects the right to enforce civil law is not changed. The laws of war are only superadded, to be exercised at the option of the sovereign, subject to the rights of other nations and of humanity. Subject to these rights it is for the sovereign to elect, in every particular case, under which code of laws he will treat those in revolt. The Government therefore may seize and confiscate the property of traitors absolutely, under the laws of war; or it may fine and forfeit absolutely under the civil law; but it cannot extend the effects of attainder for treason beyond the life of the person attained."

Mr. Wadsworth, of Kentucky, followed, saying: "I am astonished how any gentleman can refer us to the laws of nations in support of this act which the bill now before us proposes to amend, in the support of the amendment or in support of the position taken by the gentleman from Pennsylvania (Mr. Stevens) and those who agree with him.

"Why, sir, the usages of nations in modern times forbid the very means which the gentleman would employ, and the whole policy which he advocates. The laws of nations recognize the right of conquest between the parties to a public war, but do not authorize the seizure and confiscation of private property on land only in excepted cases; they do not authorize the conquest of individual property. On the contrary, they forbid it.

"I am not going into a lengthy citation of authorities. They have been quoted freely in the discussions upon this bill. They were cited fully and pertinently the other day by the honorable gentleman from Ohio (Mr. Finck), and I content myself now, in the main, with a mere reference to them. I rely upon all writers upon the public law who state the rule among civilized nations in modern times. Their testimony is uniform and explicit, uttering a united voice of condemnation upon the policy which the honorable gentleman from Pennsylvania (Mr. Stevens) demands. I rely upon the principles declared by all the civilized nations of the world in modern times, French, British, and American, in State papers, treaties, and diplomatic assemblies, to support the declaration of the elementary writers, that by the usages of the civilized nations of modern times, private property upon land is exempt from the spoiliations of war, exempt from seizure and confiscation, except in certain specified cases.

Wheaton states the rule in clear and precise terms:

But by the modern usages of nations, which has now acquired the force of law, temples of religion, public edifices devoted to civil purposes only, monuments of art, and repositories of science, are exempted from the general operations of war. Private property on land is also exempt from confiscation, with the exception of such as may become booty in special cases, when taken from enemies in the field or in besieged towns, and of military contributions levied upon the inhabitants of the hostile territory. This exemption extends even to the case of an absolute and unqualified conquest of the enemy's country.—*Elements, &c.*, p. 421.

"This doctrine is supported by all writers who state the usages of modern nations. I forbear to quote them again to the House. But I call attention to the language of Chief Justice Marshall in *United States vs. Percheman*, 7 Peters, 86:

It is very unusual, even in cases of conquest, for the conqueror to do more than to displace the sovereign and assume dominion over the country. The modern usage of nations, which has become law, would be violated; that sense of justice and of right which is acknowledged and felt by the whole civilized world would be outraged, if private property should be generally confiscated, and private rights annulled. The people change their allegiance; their relation to their ancient sovereign is dissolved; but their relations to each other and their rights of property remain undisturbed.

"In another part of the opinion he speaks of the attempt on the part of the new sovereign to confiscate the private property of the inhabitants occupying the acquired territory as 'a wrong to individuals condemned by the practice of the whole civilized world.' Again, speaking of the eighth article of the treaty by which we acquired Florida, Chief Justice Marshall says:

This article is apparently introduced on the part of Spain, and must be intended to stipulate expressly for that security to private property which the laws and usages of nations would, without express stipulation, have conferred.—Page 88.

"I cite also the letter of a former American Secretary of State of distinguished reputation to the French minister, written in the course of that discussion which grew out of the Paris declarations of 1856. By the laws of nations as previously existing, private property on land was exempt from seizure and spoliation in time of war; and it was proposed by the Paris conference to abolish privateering, and to that extent accord the same immunity to private property on the ocean. This Government was asked to assent to that principle being embodied in the laws of nations. The then Secretary of State (Mr. Marcy) replied very properly in behalf of this Government, that this Government would not assent to the proposition unless the nations represented in the Paris congress would also agree to abolish the right to seize private property on the seas by public armed vessels, placing all private property on the high seas in the same position as private property on land. Mr. Marcy in that letter gives the weight of his

sanction to the principle I now contend for, and I quote a part of it to establish the fact.

The prevalence of Christianity and the progress of civilization have greatly mitigated the severity of the ancient mode of prosecuting hostilities. It is a generally-received rule of modern warfare, so far at least as operations on land are concerned, that the persons and effects of non-combatants are to be respected. The wanton pillage or uncompensated appropriation of individual property by an army even in possession of an enemy's country is against the usage of modern times. Such a proceeding at this day would be condemned by the enlightened judgment of the world, unless warranted by particular circumstances. Every consideration which upholds this conduct in regard to a war on land favors the application of the same rule to the persons and property of citizens of the belligerents found upon the ocean.—*Mr. Marcy to the Count de Sartiges, July 28, 1856.*

"The proposition of this Government to extend the principle recognized as prevailing on land to the sea was declined. On the whole I am inclined to doubt the propriety of the proposed extension so far as we are concerned. I do not know how blockades are to be made effective if private property of the enemy on the high seas is to be exempt from capture; nor does it seem wise to exempt commerce, the parent of so many wars, from its principal dangers.

"Yet the present Secretary of State, by direction of the President, has offered to accede to the Paris declaration, so great regard has the present Administration for the sanctity of private property not only on land but on the sea also.

"John Quincy Adams, in his correspondence both with the British minister and the American Secretary of State, affirmed the inviolability of private property on land, even in the case of slaves. I call the attention of the House to this great authority. In a letter to the American Secretary of State, August 22, 1815, he says:

Our object is the restoration of all the property, including slaves, which by the usages of war among civilized nations ought not to have been taken. All private property on shore was of that description. It was entitled by the laws of war from capture.

"Again, to Lord Castlereagh, Feb. 17, 1816:

But as by the same usages of civilized nations private property is not the subject of lawful capture in war upon the land, it is perfectly clear that in every stipulation private property shall be respected, or that upon the restoration of places taken during the war it shall not be carried away—*4 American State Papers*, 116, 117, 122, 128.

"Mr. Adams contended that the British Government had violated the usages of civilized nations in taking away after the war was over, or in capturing during the war, slaves, because they were property upon land. It is known, sir, that by the treaty of 1814 indemnity was accorded by Great Britain for this very violation of the laws of war.

"But it has been said, and there is a case—Brown's case—8th Cranch, referred to often to maintain the position that a nation has a right to do these things which the laws of nations

forbid; that a sovereign accepts the laws of nations as addressed to his reason and justice and morality, but that if he chooses to disregard them he may do so. But, sir, my own opinion on that subject has been so well expressed by a distinguished judge—I mean Judge Hoffman—and concurred in by two of the judges upon the supreme bench in the New Almaden mine case (2 Black.), that I beg the attention of the House while I read a short extract from it:

But, if it be admitted that humanity, Christianity, and the usages and rules observed by all civilized nations (which constitute public law), forbid even in war the use of certain means, the discussion whether such rights abstractly exist, would seem to be a disputation savoring rather of the subtlety of the schools, than of that practical sense which seeks to discover and establish the actual rules by which nations in a state of war are governed. That the rights of war, as deduced by Bynkershoek, from a consideration of its abstract nature, are mitigated by the laws of war as established by the general consent of nations, with respect to the effects of conquest as well as to the mode of warfare, is proved by the general recognition of the principle that, on the conquest of an enemy's territory, private rights of property are to be protected.

But, if "a nation which has injured another is to be considered as confiscated, with all that belongs to it, to the nation that has received the injury," this confiscation must extend to private as well as public property.—*Judge Hoffman, with concurrence of Catron and Wayne, 2 Black, United States vs. Castillero, p. 368.*

"I can add nothing to the force of these observations. Let it be remembered that it does not matter how much power or how little the Constitution gives Congress to seize and confiscate private property on land, the laws of nations and of war stamp the exercise of such power as inhuman, immoral, infamous.

"I consider, sir, the maxims of Christian nations in modern times on that subject too well established to detain the House with further reference to them. They deny the right in this Congress, in the exercise of its war powers, or its belligerent powers, to attack temples of religion, to spoil works of art, or in general to seize and confiscate private property upon land, and when we do it we do it in the face of the indignant and protesting Christian world. We are then outside of the pale of Christian nations. We boldly spurn their maxims, and despise and trample under foot their morality; and unless Christian nations reverse the judgments of the best and most enlightened men and multitudes and times, we must stand condemned and disgraced.

"The honorable gentleman takes the position that the eleven States now and formerly subject to the rebel power are out of the Union, and that we may make a conquest of them. Suppose I were to grant it. Shall we then put aside that law of nations which protects private property—a law sanctified by the self-interest of the conqueror, all the dictates of humanity, and the public opinion of the world? No; even conceding, which I do not, his right

of conquest, no right to seize and confiscate private property upon land in general would be conceded.

"But, sir, touching this contest carried on within the State, right of conquest and all other sovereignty rights admitted by the laws of nations are limited and definitely bounded by our Constitution. I must recur to the distinction I have endeavored to establish, or which at all events I have stated—and I cannot do much more than state my position upon this occasion—that we do not look to the law of nations, or the laws of war, for a definition of our rights either in a public or civil war, for that matter. War is the remedy for a violated or obstructed right. We prosecute our right by force; that is, make war. We look to the laws of nations for the rules which are to govern the conduct of the war, but not for the objects for which we may lawfully wage it, or the manner in which we may realize its acquisitions, or the extent of our sovereign rights. Where are our rights declared? Whence do they come? Our rights for which we wield the sword—where do we get them? From the laws of nations? If we get them from the laws of nations one of two things follows: either the laws of nations carry over the conquered country the qualified and limited sovereignty of the United States, or it gives them an unlimited sovereignty.

"I undertake to say that the laws of nations recognize in the conqueror an unlimited sovereignty. In a conquered province the laws of nations consent that you may set up a monarch, found orders of nobility, erect churches dependent upon the State, pass *ex post facto* laws, strike out equal State representation in the Federal Senate—you may do every thing and any thing you choose to do by your sovereign power. The laws of nations favor this. The laws of nations have no objections to kings, emperors, nobles, bishops. The protest against this infringement of the rights of man comes from America. Almost solitary and alone in the family of nations we are found to protest against the State with a king united to a church with a bishop. Yet, if it is there that we get our right of conquest and our sovereign right to rule the conquest, if it is there we go for a definition of our sovereign rights against a foreign and a domestic foe, and to interpret the manner in which we may enjoy the rights of conquest won either from foreign or domestic foes, to these conclusions must we come at last, or we come to the other, that by the laws of nations the conqueror does not conquer the sovereignty of a hostile Power, but merely substitutes his own sovereignty in place of that which has been expelled.

When Russia conquers Poland she strikes down elective monarchy and substitutes hereditary despotism in its place. If Turkey conquers a Christian province, the crescent is substituted for the cross. England makes a conquest, and by the omnipotence of unlimited

power Parliament governs it according to its will. But if the Republic of America acquires territory, the exercise of sovereign right in that territory depends, not upon the laws of Congress, of nations, of war, but upon the will of the sovereign people of America as expressed in the Constitution.

"I understood the gentleman from Pennsylvania (Mr. Stevens) to inquire where is the sovereignty of this country. The sovereignty of Russia is in the emperor. The sovereignty of Great Britain is in Parliament. Both are unlimited. The sovereignty of the United States is in the President and the army. But should it be there? I deny it. It is in the sovereign American mass, in the people. There is no sovereign but the people. The people of America have delegated a portion of their sovereignty to the States, and another portion they have delegated to the Federal Government, our glorious, and I trust, imperishable Union. The rest they have reserved to themselves. Consult that tenth article of the Amendments, which I believe this House did not quite lay upon the table when I had the honor to move it the other day; consult that and see 'the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.' That sovereignty which in America can do no wrong like the sovereignty of Europe, at least no wrong for which it is criminally responsible, has delegated a portion only of that mighty sovereignty to the Federal Government. And in whom does it rest? In Congress, and not in the President and his army. Conquests made by this country, foreign or domestic—if you admit such a monstrosity as a domestic conquest—are to be appropriated and settled and enjoyed and governed according to the laws of Congress, and by Congress admitted to the equal fellowship of States.

"The war powers, whatever they may be, are vested in Congress, and not in the Executive; and if the gentleman from Pennsylvania (Mr. Stevens) is as logical in action as in argument, the Executive of the United States must meet with his determined opposition. I understand him, indeed, in the very speech to which I have directed my attention, to sneer at the pretence that the Executive of the United States is vested with the Federal or State sovereignty at all. He denies the right of ten men to govern a hundred by the aid of the army and navy. I deny it, too, and it is an error which will die in the midst of its worshippers sooner or later, unless the central idea of American civilization is a falsehood, and the Declaration of Independence a cheat and delusion.

"If I am correct in the position I have stated, that the sovereignty was in the mass of the American people, and that they delegated a part to the States, and a part to the Federal Government, how then, admitting the principle of

the gentleman from Pennsylvania of the right of conquest, does the successful conquest of eleven States vest the President with sovereign power in the States?"

Mr. Stevens: "I will interrupt the gentleman one moment to correct him. My position was, that the sovereignty was vested in Congress."

Mr. Wadsworth: "That was the position I assumed. I said there was no sovereignty in this country but in the sovereign mass, and that they had vested a portion of that in the States, and a portion in the United States, to be exercised by Congress. We seem, then, to agree. I was only inveighing against the presidential plan, and contended that the gentleman himself should lend his weighty support to overthrowing that plan, and all who plant their feet upon the neck of popular sovereignty. By his own principle Congress should undertake to settle the fate of eleven States. I prefer that Congress should do it. Woe worth the day when the American people consent that that portion of the sovereignty which they delegated to the States shall, by the accidents of fortune, or the malice of men, be vested in one man, and he the holder of the sword and the purse. But it is plain to any man who recurs to first principles, that none of these consequences follow. These States are in the Union, and there is no power short of successful revolution that can drive them out of it; and, Mr. Speaker, it is no longer worth while for men of intellect and courage to deny the fact—rebellion, double damned as it is, has been met on our part and confronted with revolution; a revolution of the Federal Government against the States, of the rulers against the people, the sword against privilege, of power against liberty.

"Sir, this is a much larger business, developing by the logic of events, than African slavery. We have got far beyond that. In this very act which you propose to amend, there are the seeds of ruin that stretch beyond all questions of African slavery. You have heard it proclaimed that it rests upon the right of conquest, the obliteration of eleven—therefore of thirty-four—States. What, then, is in truth the real issue before the country? It is a question whether revolution shall go on, or whether the American people shall arrest it. What a spectacle does it present in this the nineteenth century! A revolution of power against the people, of the ruler against the masses, of the Executive and the army, if I am to believe its representatives on this floor, against the people. Shall the Executive of the United States have these vast powers confided to him? Shall we consent that by the conquest of Louisiana and ten other States he has become lord paramount in that country, the sovereignty of this people vested in him to be parceled out to his sworn adherents, and we to furnish our blood and money to support the ten men against the ninety?"

On motion of Mr. Wilson, the words "except

during his life" were stricken out, and the words "contrary to the Constitution of the United States" inserted in their place in the resolution. On the 5th of February it passed the House by the following vote:

YEAS—Messrs. Alley, Allison, Ames, Anderson, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blow, Boutwell, Boyd, Brandegres, Broomall, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Crewell, Henry Winter Davis, Thomas T. Davis, Dawes, Deming, Donnelly, Driggs, Elliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Grianell, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Jenckes, Julian, Kasson, Kelley, Francis W. Kellogg, Orlando Kellogg, Loan, Longyear, Marvin, McBride, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Ferham, Pike, Pomeroy, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smithers, Spaulding, Stevens, Thayer, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Williams, Wilson, Windom, and Woodbridge—68.

NAYS—Messrs. James C. Allen, Ancona, Bailey, Augustus C. Baldwin, Jacob B. Blair, Bliss, Brooks, James S. Brown, William G. Brown, Chanler, Clay, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Ganson, Grider, Harding, Harrington, Benjamin G. Harris, Herrick, Holman, Hutchins, William Johnson, Kalbfleisch, Kernan, King, Knapp, Law, Lazear, Le Blond, Long, Mallory, Marcy, McDowell, McKinney, Middleton, William H. Miller, James K. Morris, Morrison, Nelson, Noble, Odell, John O'Neill, Pendleton, Pruyn, Radford, Samuel J. Randall, William H. Randall, Robinson, Rogers, James S. Rollins, Ross, Scott, John B. Steele, William G. Steele, Strouse, Stuart, Thomas, Voorhees, Wadsworth, Webster, Whaley, Wheeler, Chilton A. White, Joseph W. White, Winfield, Fernando Wood, and Yeaman—74.

The following is the resolution:

That the last clause of a "joint resolution explanatory of 'An act to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes,'" approved July 17, 1862, be, and the same hereby is, so amended as to read: "nor shall any punishment or proceeding under said act be so construed as to work a forfeiture of the estate of the offender contrary to the Constitution of the United States: *Provided*, That no other public warning or proclamation under the act of July 17, 1862, chapter ninety-five, section six, is or shall be required than the proclamation of the President made and published by him on the 25th day of July, 1862, which proclamation so made shall be received and held sufficient in all cases now pending, or which may hereafter arise under said act."

In the Senate on February 17th, Mr. Johnson, of Maryland, from the committee on the judiciary reported back the joint resolution of the House, with a recommendation that it do not pass.

On June 27th Mr. Trumbull, of Illinois, offered the following as an additional section to the bill to establish a Freedman's Bureau:

And be it further enacted, That the last clause of a joint resolution explanatory of an act to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes, approved July 17, 1862, be, and the same is hereby, repealed.

Mr. Trumbull said: "The object of the amend-

ment is to repeal the last clause of the joint resolution which was passed after the passage of the confiscation act. The Senator from Indiana may remember that a joint resolution was passed explanatory of the confiscation act, the last clause of which was as follows:

Nor shall any punishment or proceedings under said act be so construed as to work a forfeiture of the real estate of the offender beyond his natural life.

"My amendment proposes to repeal those words, and leave the confiscation to extend to life or to be absolute as the Constitution may be decided to provide. I propose to leave it where the Constitution has left it."

Mr. McDougall, of California, said: "I desire to ask the Senator from Illinois how he can reconcile his position with the provisions of the Constitution?"

Mr. Trumbull replied: "I reconcile it with the Constitution in the same way that I reconcile with it the right to shoot a traitor, to destroy him, to destroy his property and every thing that he has for the purpose of putting down this wicked rebellion. When we are engaged in war we have a right to do whatever is necessary to accomplish the just ends and objects and purposes for which the war is waged, and in order to put down this rebellion we may take the lives of men, their property, and every thing else."

Mr. McDougall again said: "Then I understand that although the Senator has often taken the oath to support the Constitution of the United States and the laws made under it, and although he took that oath upon entering his present office, and although his right to his present place in the Senate is dependent upon that oath, nevertheless he thinks himself justified in trampling upon a plain provision of the Constitution."

Mr. Trumbull again replied: "I say no such thing. I say it is as constitutional to take the rebel's property as his life; and does the Senator from California sit there and pretend that we may not take the life of the rebel without going to a court? What sort of a war would that be which should be prosecuted by jury trials and constables, when your armies are opposing each other, and when hundreds of thousands of men are arrayed against the Government? I am not to be put in any such position as that of advocating an unconstitutional measure. It is clearly and palpably constitutional, and as clearly and palpably right, in my opinion, as it is to exert the power of this Government in any other way to suppress this wicked rebellion."

Mr. McDougall: Mr. President, the provision of the Constitution to which I have called the attention of the Senate was adopted by men who were just out of the struggles of the Revolution, where for a time they occupied the position of rebels against English authority, subject to the laws of attainer and confiscation as they existed under English rule. With the lessons learned in the struggles of the Rev-

olution, they said then for themselves and for the persons that were to come after them, that the law confiscating the property of persons in arms, guilty of treason, if you please, or rebellion, is an oppressive and unjust law. In affirming this opinion they but repeated the expressed judgment of the great teachers of moral, social, and governmental ethics. They laid down the constitutional rule of law with exact reference to questions such as the one now pending, and made it part of the fundamental law of the Republic. It is so plain that he who runs may read it. It cannot be misunderstood; it cannot be misconstrued."

Mr. Carlile, of Virginia, followed, saying: "I confess, Mr. President, that I was not prepared for the proposition submitted by the Senator from Illinois, because, if my recollection is not at fault, that Senator, in his discussion of this subject when it was before this body at the last Congress, maintained the ground that real estate could not be confiscated beyond the life of the owner. That is my recollection of the discussion of this subject when it was before the Senate. The Senator will correct me if I am wrong."

Mr. Trumbull, in reply, said: "The Senator from Virginia is wrong so far as the confiscation of property in the rebel districts of country where there are no courts, is concerned. I always maintained that the clause in the Constitution limiting the effect of a conviction for treason, had nothing in the world to do with the waging of war in a district of country governed by the military power, and where there were no civil tribunals. I agree now, that if in any of the loyal States an individual were arrested and tried for treason, convicted, and hung, that would be a sufficient punishment; and his real estate, if he had any, might go to his descendants. But I always insisted that the provision of the Constitution applied only to trials in courts of law, and had nothing to do with the prosecution of war where there were no courts of law, and nothing to do with the estates of persons who were not brought to trial in courts of law and could not be. I always insisted that a traitor who escaped from the country, like Slidell or Mason, and left real estate behind, could not therefore escape the punishment of the confiscation of his property because he was beyond our reach to be tried for treason."

Mr. Carlile: "Mr. President, I should like to know from the Senator where he gets his authority to confiscate the property of traitors or anybody else, unless he derives it from the Constitution."

Mr. Trumbull: "I do get it from the Constitution."

Mr. Carlile: "The proposition is now by law, not by armies, not by virtue of the military power of this Government, but under the forms of law to deprive not the traitor, not the rebel, of his property, because the Constitution gives you the power to do that but it is to

take from the innocent child that he may have left, or from the injured wife of his bosom, the means of support which the framers of the Constitution designed should be left to them. They were too familiar with proceedings of this sort; they themselves had just before the formation of that instrument been rebels; success made them patriots. It is only from the Constitution that the Senate derives any power on this subject. The Senate can in conjunction with the other House declare war, and they can make rules and regulations for the Government of the land and naval forces; but they have no power through the forms of law and by virtue of their legislative character, to transcend the limits of the Constitution, which expressly forbids the confiscation of the estate of any one guilty of treason beyond the traitor's life. There is no exception in favor of the suspension of that provision of the Constitution in time of war. No department of this Government is ever relieved from its obligations to maintain the Constitution, which it solemnly swears to do before it enters on the discharge of its duties. The Executive is as much governed by the Constitution in time of war as he is in time of peace. So is the Congress of the United States. The oath that members of Congress take to support the Constitution, has in it no exception that it shall not be obligatory in time of war; but, wisely looking forward to what those men knew must occur in the history of the Government that they were forming, they declared in the instrument itself the powers that this Government should exercise in war as well as in peace.

"The Senator speaks of his right under the Constitution to shoot down a rebel. Sir, I deny him such right. He cannot go out in the street to-day and shoot down a rebel without being guilty of murder. Not in his capacity of Senator is he justified in shooting down even a rebel. Were he in the armies of the country, then it would become his duty to do so.

"This amendment proposes to repeal a part of a resolution which Congress adopted in order to obtain the signature of the President to the confiscation bill. It was made known to Congress, if I am not mistaken in the history of that resolution, and if I am the Senator will correct me—it was made known to Congress that that bill could not receive the approval of the President, and could only become a law by the passage of this very joint resolution, a portion of which is now proposed to be repealed, and that portion, too, which the President required should be adopted before he would approve it.

"Now, sir, what is the position in which you will place your Executive? Well may the Senator from Massachusetts, who feels a deep interest in the passage of this scheme, ask the Senator from Illinois not to load his bill with this proposition. Unless the President has reread his constitutional duties, unless he understands now differently his constitutional

oath from what he did when he affixed his signature to that resolution, he never can sign this bill with this proposition in it. There might have been some excuse for such a proposition at that time. Then it was urged on Congress as an auxiliary in the suppression of the rebellion. Now it cannot be urged for any such purpose.

"I do not intend to prolong this discussion; I regret that I have felt it my duty to say what I have said; but my object was to call the attention of Senators to it, for I cannot believe, until I see it by a vote, that the Senate has changed its position within the last two years, and that gentlemen read their constitutional powers now differently than they did two years ago."

Mr. Cowan, of Pennsylvania, opposed the resolution, saying: "The Constitution provides that 'No attainder of treason shall work corruption of blood or forfeiture [of estate], except during the life of the person attainted.' The true question is, whether by any law we can make here, the estates of traitors can be forfeited absolutely and for the fee. Because to repeal the joint resolution of 17th July, 1862, would give the act it qualifies that operation; if it did not, the repeal would be useless and inoperative.

"Now I propose to show that from the very nature and necessity of the matter, Congress cannot enact laws of war; to attempt it would be an absurdity. Under ordinary circumstances, it would be enough to say to reasonable men, that one nation or one belligerent could not make laws of war, because the laws of war must bind both belligerents; and it is manifestly absurd to suppose that if one belligerent were to lay down the law to govern the struggle, the other would be bound to obey it. It could only be the law when both agreed to be bound by it; if they did not, then it would be mere idle proclamation, or, as lawyers say, *brutum fulmen*.

"Again, even if a foreign nation or nations were to join with the United States in establishing new rules or laws to be added to the international code, Congress would have nothing whatever to do with the matter.

"This can be illustrated in a very simple manner. I have said that the Constitution adopted the international code ready made, by conferring power upon Congress to affix a proper punishment for its violation in certain cases, such as piracy, &c., to declare war, grant letters of marque and reprisal, and to make rules concerning captures on land and water (that is, what disposition shall be made of prizes of war, and not what shall be prize of war as has been argued). Here the power of Congress ends and the power of the President and Senate begins. The President appoints, and the Senate confirms ambassadors to foreign courts; they also make treaties; and lastly, the courts decide all cases arising under the laws of nations, especially prize cases.

"Now, it is well known that the great Powers of Europe, in congress assembled in Paris, in 1856, proposed certain ameliorations in the laws of nations regulating war, as follows: first, to abolish privateering; second, enemy cargo (except contraband of war) to be covered by neutral flags; third, neutral goods (except contraband of war) not seizable under enemy flags.

"The United States were invited to agree to those changes, and the Federal Government was willing to do so, provided another change was made, namely, 'that private property of enemies should not be prize of war at sea any more than on land.'

"Now, allow me to ask, suppose our Government had agreed, by what agency under our Constitution could that result have been brought about? Surely no one will say it would be Congress; but every one must know that the President, through his ministers abroad, would have entered into treaty with the Powers proposing; that we would have been called on to ratify it in this Senate; and that, so far from the House of Representatives having any thing to do with it, we would have been bound not to let them know any thing about it until our action had been taken.

"Here we see, beyond dispute, that to the President and the Senate is intrusted the power of proposing and agreeing to alterations and amendments to the laws of nations.

"Now, I wish to say further in this connection, that in pursuance of the doctrine I have advanced, we have established courts to decide cases arising under the laws of nations, and that in deciding those cases an act of Congress would have no binding force whatever, because if it contravened the well-settled principles of public law, the court would be bound to disregard it."

"I do not know whether the honorable Senator from Illinois is aware of it or not, but I assert here that he is trying to make a law to seize the real estate of belligerents as such, to condemn and confiscate it as prize of war, and to do all that I call adding a new provision to the laws of nations and of war. If you take an enemy's private ship at sea it may be condemned as prize by the laws of nations, but if you take an enemy's private plantation, it cannot be forfeited as prize under those laws. They are defective in that respect; indeed they say expressly it cannot be done, and that the title is the same after the conquest as before. This is the difficulty the honorable Senator is trying to remove, and in doing so if he succeeds he must repeal (or violate) the laws of nations and enact a new and different rule here. He says himself that he claims the right to do this on the same grounds precisely that he has a right to shoot a rebel on the field of battle; that is, that it is a war right. Now war rights are regulated by the laws of war, which, as he has well said, are the 'laws of nations in reference to war.' The truth is he is trying to do that

which is forbidden by the laws of war and by the Constitution also if it were attempted as municipal law. Nothing can be clearer than this, and he may just as well submit to these limitations first as last. Let him read the latter if he wants to know what he may rightly inflict upon rebels as citizens for violating their allegiance, and let him read the laws of war for what he may do to them as public enemies. At present I am for confining myself to these latter strictly. I think we are bound to make war according to the rules they furnish us, and I would as soon think of transcending them or violating them as I would think of trampling a statute under foot. The crime is the same in both cases, for both are laws of the land.

"The true question is, can we make prize of war of the real and personal estates of those who have been engaged in this rebellion, and can we forfeit their real estates absolutely? We have seen that we cannot do this by due process of municipal law; can we do it by virtue of the laws of war as settled by civilized and Christian nations? I answer that we cannot; that there is to-day no conflict of authority whatever on the question; there is not a book that treats of it or a chapter devoted to it which does not lay down the rule that we cannot—all for the best reason in the world, namely, that we can make war far more successfully by not being able to exercise any such power.

"Mr. President, I have sometimes doubted whether we could be serious when we expect any good results to come from such measures as this, which not only exposes us to ridicule but does harm to our cause. What was wanting in this crisis of our history with new criminal legislation, when the code was complete before? We had a statute punishing treason with death, a just and proper punishment, one well according with the magnitude of the crime as well as with the majesty of the law which inflicted it. For all those who conspired the dismemberment of the Republic, who used the means and perverted the State governments to bring it, this is the fitting punishment, because it is the highest, and falls upon the guilty alone, where it ought. I would have had no additional laws; in war they are not needed. I would have contemplated no reforms within the area of the rebellion; they cannot be made at such a time. What we wanted was men and money; these granted, the true function of Congress was over until peace was restored and all parties again represented. But above all things I would not have played into the hands of the enemy; I would not have done that which the rebels most desired to have done, because I have no doubt that this and all kindred schemes have been the very ones which they most wanted us to adopt. I do not know that Jefferson Davis ever prays; but if he does, I have no doubt he would pray—"

Mr. Wade: "Pray for just such an advocate."

Mr. Cowan: "Pray for just such a statesman as the honorable Senator from Ohio, the most effective ally he ever had or could have."

"He would have prayed for measures on our part which were obnoxious to all people of the South, loyal and disloyal, Union and disunion. He would have prayed that we should outrage all their common prejudices and cherished beliefs; that we should do these things by giving ourselves over to the guidance of men whom it was part of their religion to hate; to hate personally and by name, with an intensity rarely witnessed in the world before. He would have prayed for confiscation general and indiscriminate; threatening as well the victims of the usurpation as the usurpers themselves; as well those we were bound to rescue as those we were bound to punish. Fervently he would have prayed for our emancipation laws and proclamations as means to fire the southern heart more potent than all others; they would rally the angry population to his standard of revolt as if each had a personal quarrel. He would then have a united South; while as the result of the same measures a distracted and divided North."

"That is the way I think he would have prayed and would pray now. Is any man so stupid as not to know that the great desire on the part of every rebel is to embark in revolt with him the whole people of the disaffected districts? Is not and has not that been considered enough to insure success to him? And where does history show the failure of any united people, numbering five or six millions, when they engaged in revolution? Nowhere; there is no such case."

"What did we do to bring this unity about in the South? We forgot our first resolve in July, 1861, to restore the Union alone, and we went further and gave out that we would also abolish slavery. Now that was just exactly the point upon which all southern men were most tender, and at which they were most prone to be alarmed and offended. That was of all things the one best calculated to make them of one mind against us; there was no other measure, indeed, which could have lost to the Union cause so many of them. It is not a question, either, as to whether they were right or wrong—that was matter for their consideration, not ours—for if we were so desirous of a union with them we ought not to have expected them to give up their most cherished institutions in order to effect it. Unions are made by people taking one another as they are, and I think it has never yet occurred to any man who was anxious to form a partnership with another that he should first attempt to force that other either to change his religion or his politics. Is not the answer obvious; would not the other say to him, 'If you do not like my principles why do you wish to be partner with me? Have I not as good a right to ask you to change yours as a condition precedent?'"

"So it was with the southern people; they were all in favor of slavery, but one-half of them were still for union with us as before, because they did not believe we were abolitionists. The other half were in open rebellion because they did believe it. Now, can any one conceive of greater folly on our part than that we should destroy the faith of our friends and verify that of our enemies? Could not anybody have foretold we would have lost one-half by that, and then we would have no one left to form a union with? We drove that half over to the rebels and thereby increased their strength a thousand-fold."

"Is not all this history now? The great fact is staring us full in the face to-day; we are contending with a united people desperately in earnest to resist us. Our most powerful armies most skilfully led have heretofore failed to conquer them, and I think will fail as long as we pursue this fatal policy."

"Now, Mr. President, I appeal to Senators whether it is not time to pause and inquire whether that policy which has certainly united the southern people in their cause and which quite as certainly has divided the northern people in their support of ours, ought not to be abandoned at once. Why persist in it longer? Can we do nothing to retrieve our fortune by retracing our steps? Can we not divide the rebels and unite the loyal men of the loyal States by going back to the single idea of war for the Union; or is it now too late? Have we lost irrevocably our hold on the affections of our countrymen who were for the Union in 1861—even in 1862? Is there no way by which we could satisfy them that we yet mean union, and not conquest and subjugation? And what a difference in the meaning of those two phrases! The first offers the hand of a brother, the second threatens the yoke of a master. Or are we obliged now to exchange the hopes we had of southern Union men for that other and miserable hope in the negro? Is he all that is left of loyalty in the South, and the only ally we can rely upon to aid us in restoring the Union? Ye gods! what have we come to at last? Either to yield to an unholy rebellion, to dismember an empire, or to go into national companionship with the negro. Is this the alternative to which our madness has brought us?"

"Mr. President, these things are enough to drive a sane man mad. After all our pretension, all our boasting, how absurd will we appear in the eyes of all other nations if we fail in this struggle? Especially as almost all the measures about which we have occupied ourselves for the last three years have been based upon our success already assumed as a fixed fact. We provided for confiscating the estates of rebels before we got possession; we emancipated slaves before we got them from their masters, and we provided for the disposition of conquests we have not made; we have disposed of the skin of the bear and the bear itself is yet

uncaught. All this we have put upon the record; the statute-book will bear witness against us in all coming time; and we cannot escape the consequences if we fail."

Mr. Wilson, of Massachusetts, followed, saying: "I desire to say a single word to the Senator from Pennsylvania. I was sorry to hear him say here to-night what is said so often without the semblance of being sustained by the facts before the country, that the emancipation policy of this Government had united the South and divided the North. There is not the shade of a shadow of truth about it. The South is more divided to-day than it was three years ago, and everybody knows it. How was it in Delaware three years ago to-day? It was doubtful if the loyal men had the State at all. How was it in Maryland? She was held by twenty or thirty thousand men, held only by the military power of this nation, and all her leading influences were in favor of the rebellion; and to-day Maryland is for the country and for the Government, a free State of this Union. How was it with West Virginia? West Virginia was then divided and struggling in civil war; now she is a free State, and for the country. How was it in Kentucky? Kentucky three years ago was under the control of men who were talking about armed neutrality, and rolling back the armies of the Union and the armies of the rebellion, and dictating a peace when both parties were exhausted by war. Kentucky is more united to-day than she was three years ago for the country. How is it in Missouri? She is almost as united for the Government to-day as any free State in the Union, and three years ago she was overrun and held by rebel influences. How is it in Tennessee? How is it in Arkansas? How is it in Louisiana? How is it even in North Carolina? There is not a slave State in this Union to-day that is not more divided and where we have not more real supporters of the Government of the United States than we had two or three years ago. This is God's truth, and every man knows it; and yet men get up here and tell us that our policy is uniting the South and dividing the North! Why, sir, the loyal men of the South are stronger for the Government to-day than ever before, and they are for emancipation. I do not know a man for slavery in this country who is really for this Government. I have yet to see one.

"How is it with the North? I know that when the firing took place upon Sumter, when the people rose in their majesty, there were men in the country who bowed to the storm, bowed to the current; but, sir, at the first opportunity, and even before your confiscation bill or your emancipation proclamation, they were everywhere in their party lines, under their party flags; and when the emancipation proclamation was issued to the country these very men had taken almost all the States of the North under their control. That emancipation proclamation had hardly gone to the country

before the people began to comprehend it and to understand it. They rose in their majesty, and they hold to-day the control of almost every free State of this Union. They are stronger to-day for this policy in every State of the Union; and I say here now there is not a loyal State in this Union where naked, raw abolitionism is not stronger than any political party in that State. The Republican party or the Union party in no portion of the country is so strong to-day as is the anti-slavery party; and the men who march square up to that policy are the men who will guide, direct, and control, and be supported by the people."

Mr. Hale, of New Hampshire, said: "My friend from Pennsylvania is a man, whatever may be said of his politics, of remarkably clear intellect; and where he has not suffered his intellect to be led away by the absurdities of black-letter English law, I have no doubt is a good lawyer; but, sir, there is a natural delusion upon this subject. We are in more absolute dependence to-day upon Great Britain than we were before the Revolution of 1776. We have got all the offensive and odious provisions of her constitution fastened upon us. This idea of the independence of the judiciary, and that there must be a life-tenure to our judicial officers, is an inheritance from England that we cannot get rid of; and the same is true—it is not declared in express terms, but is practically so—making a life-tenure in our officers in the army and the navy. That is another of those sad inheritances that come down to us from the original sin of our ancestors being born under the monarch of Great Britain. Notwithstanding our fathers gave utterance to some of the sublimest truths that ever fell from human lips in the Declaration of Independence, we have not begun to act upon the first principles, the first elements of the doctrines which they enunciated.

"My friend from Pennsylvania has confounded two things that are as different as it is possible for two things to be. The one is, what the sovereign power of the United States may do, and the other is what it has delegated to its courts to declare. The Constitution of the United States does not undertake to limit, nor measure, nor control in the slightest degree what the sovereign power of the nation may do, but it simply declares what the sovereign power has delegated to its courts to do, and it says that 'no attainder of treason,' that is, an attainder of treason judicially declared, 'shall work corruption of blood, or forfeiture, except during the life of the person attainted.' Instead of that measuring the sovereignty, it measures what the sovereignty has delegated to the courts; and yet the American mind has got so befogged by English precedents that it does not construe that right either. There was a great struggle in England on this subject, where the Government was oppressive, and convictions of treason were easily obtained, and for very trifles. The humanity

of the English heart, working through acts of Parliament, was constantly ameliorating that, and introducing provisions tending to restrain the ferocity of such judges as Jeffries.

"This doctrine that we cannot take the estates of rebels, that we cannot confiscate them, would result in this absurdity: take for instance these handsome estates in Newport, R. I.; their owners are fighting against us, taking their rents to arm armies to destroy the nation, overthrow our liberties, and ruin the country; and according to this doctrine we must preserve their estates, see that the tenants do not commit waste upon them, hold them safe, not touch them, and if by and by the rebellion should happen to be over and the country should be saved, we must institute a commission to roam anywhere and everywhere to find out where are the descendants of these traitors, that they may come and take this property and hold and enjoy it, and we must not exercise this power because there is no such case as this exactly put down in the Constitution. That is what this doctrine would lead to.

"Mr. President, the Constitution never contemplated such a time, such an occasion, such circumstances as we are now living in. Instead of consulting the precedents of a dead past for wisdom to guide us in contingencies which they never thought of, we ought to be making precedents to guide our children in coming generations for just such a time as this if it should ever come again. We ought to see, to meet, to understand and appreciate our condition, and when an emergency occurs consult common sense clear and plain, instead of hunting in the musty folios of the dead past to gather wisdom for a state of things that the dead past never dreamed of."

The amendment was then agreed to, as follows:

YEAS—Messrs. Anthony, Brown, Chandler, Conness, Foot, Grimes, Hale, Harlan, Harris, Howe, Lane of Indiana, Lane of Kansas, Morgan, Morrill, Pomeroy, Sherman, Sprague, Sumner, Trumbull, Van Winkle, Wade, Wilkinson, and Wilson—23.

NAYS—Messrs. Carlile, Clark, Collamer, Cowan, Davis, Doolittle, Henderson, Hendricks, Hicks, McDougall, Powell, Riddle, Saulsbury, Ten Eyck, and Willey—15.

ABSENT—Messrs. Buckalew, Dixon, Fessenden, Foster, Harding, Howard, Johnson, Neamith, Ramsey, Richardson, and Wright—11.

Subsequently, on the same day, Mr. Hendricks, of Indiana, moved to strike out this section; which was disagreed to by the following vote:

YEAS—Messrs. Buckalew, Carlile, Clark, Cowan, Davis, Doolittle, Hendricks, McDougall, Powell, Riddle, Ten Eyck, Van Winkle, and Willey—18.

NAYS—Messrs. Anthony, Chandler, Conness, Foot, Harlan, Howe, Lane of Indiana, Morgan, Morrill, Pomeroy, Ramsey, Sprague, Sumner, Trumbull, Wilkinson, and Wilson—13.

ABSENT—Messrs. Brown, Collamer, Dixon, Fessenden, Foster, Grimes, Hale, Harding, Harris, Henderson, Hicks, Howard, Johnson, Lane of Kansas, Neamith, Richardson, Saulsbury, Sherman, Wade, and Wright—20.

The bill to establish a Bureau of Freedmen then passed—yeas, 21; nays, 9.

In the House, on July 2d, the bill was considered with this amendment of the Senate, and postponed to Dec. 20th. By this postponement the proposition to repeal the joint resolution amendatory of the confiscation act failed to pass. Each House passed a repealing section, but neither passed the other's.

In the House, on Feb. 15th, Mr. Davis, of Maryland, from the Committee on Rebellious States, reported a bill to guarantee to certain States a Republican form of Government. It was read a first and second time, ordered to be printed, and recommitted to the committee.

On March 22d the motion to recommit the bill was reconsidered, and the bill came before the House, and the question was on ordering it to be engrossed and read a third time.

The bill authorized the President to appoint in each of the States declared in rebellion a Provisional Governor, with the pay and emoluments of a Brigadier, to be charged with the civil administration until a State government therein shall be recognized. As soon as the military resistance to the United States shall have been suppressed, and the people sufficiently returned to their obedience to the Constitution and laws, the Governor shall direct the Marshal of the United States to enroll all the white male citizens of the United States resident in the State, in their respective counties; and wherever a majority of them take the oath of allegiance, the loyal people of the State shall be entitled to elect delegates to a convention to act upon the reestablishment of a State Government—the proclamation to contain details prescribed. Qualified voters in the army may vote in their camps. No person who has held or exercised any civil, military, State, or Confederate office, under the rebel occupation, and who has voluntarily borne arms against the United States, shall vote or be eligible as a delegate. The convention is required to insert in the Constitution provisions—

1. No person who has held or exercised any civil or military office (except offices merely ministerial and military offices below a colonel), State or Confederate, under the usurping power, shall vote for, or be a member of the legislature or governor.

2. Involuntary servitude is forever prohibited, and the freedom of all persons guaranteed in said State.

3. No debt, State or Confederate, created by or under the sanction of the usurping power, shall be recognized or paid by the State.

Upon the adoption of the Constitution by the convention and its ratification by the electors of the State, the Provisional Government shall so certify to the President, who, after obtaining the assent of Congress, shall, by proclamation, recognize the government as established and none other, as the constitutional government of the State; and from the date of such recognition, and not before, Senators and Representatives and electors for President and Vice-

President may be elected in such State. Until reorganization, the Provisional Governor shall enforce the laws of the Union, and of the State before rebellion.

The remaining sections are as follows:

Sac. 12. That all persons held to involuntary servitude or labor in the States aforesaid are hereby emancipated and discharged therefrom, and they and their posterity shall be forever free. And if any such person or their posterity shall be restrained of liberty, under pretence of any claim to such service or labor, the courts of the United States shall on habeas corpus discharge them.

Sac. 13. That if any person declared free by this act, or any law of the United States, or any proclamation of the President, be restrained of liberty, with intent to be held in, or restored to involuntary labor, the person convicted before a court of competent jurisdiction of such act shall be punished by fine of not less than \$1,500 and be imprisoned not less than five nor more than twenty years.

Sac. 14. That every person who shall hereafter hold or exercise any office civil or military except offices merely ministerial and military offices below the grade of colonel, in the rebel service, State, or Confederate, is hereby declared not to be a citizen of the United States.

Mr. Davis, of Maryland, said: "Mr. Speaker, the bill which I am directed by the Committee on the rebellious States to report is one which provides for the restoration of civil government in States whose governments have been overthrown. It prescribes such conditions as will secure not merely civil government to the people of the rebellious States, but will also secure to the people of the United States permanent peace after the suppression of the rebellion. The bill challenges the support of all who consider slavery the cause of the rebellion, and that in it the embers of rebellion will always smolder; of those who think that freedom and permanent peace are inseparable, and who are determined, so far as their constitutional authority will allow them, to secure these fruits by adequate legislation. The vote of gentlemen upon this measure will be regarded by the country with no ordinary interest. Their vote will be taken to express their opinion on the necessity of ending slavery with the rebellion, and their willingness to assume the responsibility of adopting the legislative measures without which that result cannot be assured, and may wholly fail of accomplishment. Their vote will be held to show whether they think the measure now proposed, or any which may be moved as a substitute, is an adequate and proper measure to accomplish that purpose. It is entitled to the support of all gentlemen upon this side of the House, whatever their views may be of the nature of the rebellion, and the relation in which it has placed the people and States in rebellion toward the United States; not less of those who think that the rebellion has placed the citizens of the rebel States beyond the protection of the Constitution, and that Congress, therefore, has supreme power over them as conquered enemies, than of that other class who think that they have not ceased to be citizens and States of the United States, though incapa-

ble of exercising political privileges under the Constitution, but that Congress is charged with a high political power by the Constitution to guaranty republican governments in the States, and that this is the proper time and the proper mode of exercising it. It is also entitled to the favorable consideration of gentlemen upon the other side of the House who honestly and deliberately express their judgment that slavery is dead. To them it puts the question whether it is not advisable to bury it out of sight that its ghost may no longer stalk abroad to frighten us from our propriety.

"What is the nature of this case with which we have to deal—the evil we must remedy, the danger we must avert? In other words, what is that monster of political wrong which is called secession? It is not, Mr. Speaker, domestic violence, within the meaning of that clause of the Constitution, for the violence was the act of the people of the States through their government, and was the offspring of their free and unforced will. It is not invasion, in the meaning of the Constitution, for no State has been invaded against the will of the government of the State by any Power except the United States marching to overthrow the usurpers of its territory. It is, therefore, the act of the people of the States, carrying with it all the consequences of such an act. And therefore it must be either a legal revolution which makes them independent, and makes of the United States a foreign country, or it is a usurpation against the authority of the United States, the erection of governments which do not recognize the Constitution of the United States, which the Constitution does not recognize, and, therefore, not republican governments of the States in rebellion. The latter is the view which all parties take of it. I do not understand that any gentleman on the other side of the House says that any rebel government which does not recognize the Constitution of the United States, and which is not recognized by Congress, is a State government within the meaning of the Constitution. Still less can it be said that there is a State government, republican or un-republican, in the State of Tennessee, where there is no government of any kind, no civil authority, no organized form of administration except that represented by the flag of the United States, obeying the will and under the orders of the military officer in command. It is the language of the President of the United States in every proclamation, of Congress in every law on the statute-book, of both Houses in their forms of proceeding, and of the courts of the United States in their administration of the law. It is the result of every principle of law, of every suggestion of political philosophy, that there can be no republican government within the limits of the United States that does not recognize, but does repudiate, the Constitution, and which the President and the Congress of the United States do not, on their part, recognize.

Those that are here represented are the only governments existing within the limits of the United States. Those that are not here represented are not governments of the States, republican under the Constitution. And if they be not, then they are military usurpations, inaugurated as the permanent governments of the States, contrary to the supreme law of the land, arrayed in arms against the Government of the United States; and it is the duty, the first and highest duty, of the Government to suppress and expel them. Congress must either expel or recognize and support them. If it do not guarantee them it is bound to expel them; and they who are not ready to suppress them are bound to recognize them.

"We are now engaged in suppressing a military usurpation of the authority of the State government. When that shall have been accomplished, there will be no form of State authority in existence which Congress can recognize. Our success will be the overthrow of all semblance of government in the rebel States. The Government of the United States is then, in fact, the only Government existing in those States, and it is there charged to guarantee them republican governments.

"What jurisdiction does the duty of guaranteeing a republican government confer, under such circumstances, upon Congress? What right does it give? What laws may it pass? What objects may it accomplish? What conditions may it insist upon, and what judgment may it exercise in determining what it will do? The duty of guaranteeing carries with it the right to pass all laws necessary and proper to guarantee. The duty of guaranteeing means the duty to accomplish the result. It means that the republican government shall exist. It means that every opposition to republican government shall be put down. It means that every thing inconsistent with the permanent continuance of republican government shall be weeded out. It places in the hands of Congress the right to say what is and what is not, with all the light of experience and all the lessons of the past, inconsistent, in its judgment, with the permanent continuance of republican government; and if, in its judgment, any form of policy is radically and inherently inconsistent with the permanent and enduring peace of the country, with the permanent supremacy of republican government, and it have the manliness to say so, there is no power, judicial or executive, in the United States that can even question this judgment but the people; and they can do it only by sending other Representatives here to undo our work. The very language of the Constitution, and the necessary logic of the case, involves that consequence. The denial of the right of secession means that all the territory of the United States shall remain under the jurisdiction of the Constitution. If there can be no State government which does not recognize the Constitution, and which the authorities of the United States do not recog-

nize, then there are these alternatives, and these only. The rebel States must be governed by Congress till they submit and form a State government under the Constitution; or Congress must recognize State governments which do not recognize either Congress or the Constitution of the United States; or there must be an entire absence of all government in the rebel States; and that is anarchy. To recognize a government which does not recognize the Constitution is absurd, for a government is not a constitution; and the recognition of a State government means the acknowledgment of men as Governors and legislators and judges actually invested with power to make laws, to judge of crimes, to convict the citizens of other States, to demand the surrender of fugitives from justice, to arm and command the militia, to require the United States to repress all opposition to its authority, and to protect it from invasion—against our own armies; whose Senators and Representatives are entitled to seats in Congress, and whose electoral votes must be counted in the election of the President of a Government which they disown and defy! To accept the alternative of anarchy as the constitutional condition of a State, is to assert the failure of the Constitution, and the end of republican government. Until, therefore, Congress recognize a State government, organized under its auspices, there is no government in the rebel States except the authority of Congress. In the absence of all State government, the duty is imposed on Congress to provide by law to keep the peace, to administer justice, to watch over the transmission of decedents' estates, to sanction marriages; in a word, to administer civil government until the people shall, under its guidance, submit to the Constitution of the United States, and, under the laws which it shall impose, and on the conditions Congress may require, reorganize a republican government for themselves, and Congress shall recognize that government.

"There is no fact that we have learned from any one who has been in the South, and has come up from the darkness of that bottomless pit, which indicates such repentance. There is no fact that any one has stated on authority at all reliable, that any respectable proportion of the people of the Southern States now in rebellion are willing to accept any terms that even our opponents on the other side of the House are willing to offer them.

"It has been repeatedly asserted—Governor Seymour, of New York, in his message asserted—that peace could be had upon any reasonable terms. That was his guess; it was his wish; it was his fond, vain hope. In fact there is no ground for such hope, and to-day no man can stand before the American people and say that there is the least reason to suppose that any public man in the South has declared himself willing to consider peace on any conditions but that of independence.

"In my judgment it is not safe to confide

the vast authority of State Governments to the doubtful loyalty of the rebel States, until armed rebellion shall have been trampled into the dust, until every armed rebel shall have vanished from the State, until there shall be in the South no hope of independence and no fear of subjection, until the United States is bearded by no military power and the laws can be executed by courts and sheriffs without the ever-present menace of military authority. Until we have reached that point, this bill proposes that the President shall appoint a civil Governor to administer the Government under the laws of the United States, and the laws in force in the States respectively at the outbreak of the rebellion, subject, of course, to the necessities of military occupation.

"When military opposition shall have been suppressed, not merely paralyzed, driven into a corner, pushed back, but gone, the horrid vision of civil war vanished from the South, then call upon the people to reorganize in their own way, subject to the conditions that we think essential to our permanent peace, and to prevent the revival hereafter of the rebellion; a republican government in the form that the people of the United States can agree to.

"Now, for that purpose there are three modes indicated. One is to remove the cause of the war, by an alteration of the Constitution of the United States, prohibiting slavery everywhere within its limits. That, sir, goes to the root of the matter, and should consecrate the nation's triumph. But there are thirty-four States—three-fourths of them would be twenty-six. I believe there are twenty-five States represented in this Congress; so that we on that basis cannot change the Constitution. It is therefore a condition precedent in that view of the case that more States shall have governments organized within them. If it be assumed that the basis of calculation shall be three-fourths of the States now represented in Congress, I agree to that construction of the Constitution, which I understand to be that of the chairman of the Judiciary Committee, the gentleman from Pennsylvania (Mr. Stevens), and not without countenance in high judicial quarters. I think it was never contemplated that the supreme political power should pass away from the Government of the United States. But that view will probably encounter as much doubt as the bill before the House, besides involving serious delay; and under any circumstances, even upon that basis, it will be difficult to find three-fourths of the States, with New Jersey, or Kentucky, or Maryland, Delaware, or other States that might be mentioned, opposed to it under existing auspices, to adopt such a clause of the Constitution after we shall have agreed to it. If adopted, it still leaves the whole field of the civil administration of the States, prior to the recognition of State governments, all laws necessary to the ascertainment of the will of the people, and all restrictions on the return to power of the lead-

ers of the rebellion, wholly unprovided for. The amendment of the Constitution meets my hearty approval; but it is not a remedy for the evils we must deal with.

"The next plan is that inaugurated by the President of the United States in the proclamation of the 8th December, called the amnesty proclamation. That proposes no guardianship of the United States over the reorganization of the governments, no law to prescribe who shall vote, no civil functionaries to see that the law is faithfully executed, no supervising authority to control and judge of the election. But if, in any manner, by the toleration of martial law, lately proclaimed the fundamental law, under the dictation of any military authority, or under the prescriptions of a provost marshal, something in the form of a government shall be presented, represented to rest on the votes of one-tenth of the population, the President will recognize that, provided it does not contravene the proclamation of freedom and the laws of Congress; and, to secure that, an oath is exacted.

"Now you will observe that there is no guarantee of law to watch over the organization of that government. It may combine all the population of a State; it may combine one-tenth only; or ten governments may come competing for recognition at the door of the Executive mansion. The executive authority is pledged; Congress is not pledged. It may be recognized by the military power, and may not be recognized by the civil power, so that it would have a doubtful existence, half civil and half military, neither a temporary government by law of Congress, nor a State government; something as unknown to the Constitution as the rebel government that refuses to recognize it.

"But, Mr. Speaker, let us regard its operation on a great fundamental measure—the existence of slavery, the condition of future peace. How does it accomplish the final removal of slavery? How does it accomplish the reorganization of the government on the basis of universal freedom? The only prescription is, that the government shall not contravene the provisions of that proclamation. Sir, if that proclamation be valid, then we are relieved from all trouble on that score. But, if that proclamation be not valid, then the oath to support it is without legal sanction, for the President can ask no man to bind himself by an oath to support an unfounded proclamation, or an unconstitutional law, even for a moment, still less till it shall have been declared void by the Supreme Court of the United States. It is the paramount right of every American citizen to judge for himself, on his own responsibility, of his constitutional rights; and an oath does not bind him to submit to that which is illegal. If, therefore, he shall have taken the oath, he can, in good conscience as well as in good law, disregard it the next moment. So that, in point of fact, the law leaves us where the

proclamation does. It adds nothing to its legality, nothing to its force.

"By the bill we propose to preclude the judicial question by the solution of a political question. How so? By the paramount power of Congress to reorganize governments in those States, to impose such conditions as it thinks necessary to secure the permanence of republican government, to refuse to recognize any governments there which do not prohibit slavery forever. Ay, gentlemen take the responsibility to say, in the face of those who clamor for speedy recognition of governments tolerating slavery, that the safety of the people of the United States is the supreme law; that their will is the supreme rule of law, and that we are authorized to pronounce their will on this subject. Take the responsibility to say that we will revise the judgments of our ancestors; that we have experience written in blood which they had not; that we find now, what they darkly doubted, that slavery is really, radically inconsistent with the permanence of republican governments; and that being charged by the supreme law of the land on our conscience and judgment to guarantee, that is, to continue, maintain, and enforce, if it exists, to institute and restore when overthrown, republican governments throughout the broad limits of the Republic, we will weed out every element of their policy which we think incompatible with its permanence and endurance. The purpose of the bill is to preclude the *judicial* question of the validity and effect of the President's proclamation by the decision of the *political* authority in reorganizing the State governments. It makes the rule of decision the provisions of the State constitution, which, when recognized by Congress, can be questioned in no court; and it adds to the authority of the proclamation the sanction of Congress. If gentlemen say that the Constitution does not bear that construction, we will go before the people of the United States on that question, and by their judgment we will abide."

An extended debate ensued. Mr. Pendleton, of Ohio, on May 4th, opposed the bill, saying: "The gentleman maintains two propositions, which lie at the very basis of his views on this subject. He has explained them to the House, and enforced them on other occasions. He maintains that, by reason of their secession, the seceded States and their citizens 'have not ceased to be citizens and States of the United States, though incapable of exercising political privileges under the Constitution, but that Congress is charged with a high political power by the Constitution to guarantee republican government in the States, and that this is the proper time and the proper mode of exercising it.' This act of revolution on the part of the States has evoked the most extraordinary theories upon the relation of the States to the Federal Government. This theory of the gentleman is one of them. The ratification of the Constitution by Virginia estab-

lished the relation between herself and the Federal Government; it created the link between her and all the States; it announced her assumption of the duties, her title to the rights of the confederating States; it proclaimed her interest in, her power over, her obedience to the common agent of all the States. If Virginia had never ordained that ratification she would have been an independent State; the Constitution would have been as perfect and the union between the ratifying States would have been as complete as they now are. Virginia repeals that ordinance of ratification, annuls that bond of union, breaks that link of confederation. She repeals but a single law, repeals it by the action of a sovereign convention; leaves her constitution, her laws, her political and social polity untouched. And the gentleman from Maryland tells us that the effect of this repeal is not to destroy the vigor of that law, but is to subvert the State government, and to render the citizens 'incapable of exercising political privileges;' that the Union remains, but that one party to it has thereby lost its corporate existence, and the other has advanced to the control and government of it.

"Sir, this cannot be. Gentlemen must not palter in a double sense. These acts of secession are either valid or they are invalid. If they are valid, they separated the State from the Union. If they are invalid they are void; they have no effect; the State officers who act upon them are rebels to the Federal Government; the States are not destroyed; their constitutions are not abrogated; their officers are committing illegal acts, for which they are liable to punishment; the States have never left the Union, but so soon as their officers shall perform their duties or other officers shall assume their places, will again perform the duties imposed, and enjoy the privileges conferred by the Federal compact, and this not by virtue of a new ratification of the Constitution, nor a new admission by the Federal Government, but by virtue of the original ratification, and the constant, uninterrupted maintenance of position in the Federal Union since that date.

"Acts of secession are not invalid to destroy the Union, and valid to destroy the State governments and the political privileges of their citizens. We have heard much of the two-fold relation which citizens of the seceded States may hold to the Federal Government—that they may be at once belligerents and rebellious citizens. I believe there are some judicial decisions to that effect. Sir, it is impossible. The Federal Government may possibly have the right to elect in which relation it will deal with them; it cannot deal with them at one and the same time in inconsistent relations. Belligerents being captured are entitled to be treated as prisoners of war; rebellious citizens are liable to be hanged. The private property of belligerents, according to the rules of modern war, shall not be taken without compensa-

tion; the property of rebellious citizens is liable to confiscation. Belligerents are not amenable to the local criminal law, nor to the jurisdiction of courts which administer it; rebellious citizens are, and the officers are bound to enforce the law, and to exact the penalty of its infraction. The seceded States are either in the Union or out of it. If in the Union, their constitutions are untouched, their State governments are maintained; their citizens are entitled to all political rights, except so far as they may be deprived of them by the criminal law which they have infringed. This seems incomprehensible to the gentleman from Maryland. In his view the whole State government centres in the men who administer it; so that when they administer it unwisely, or put it in antagonism to the Federal Government, the State government is dissolved, the State constitution is abrogated, and the State is left, in fact and in form, *de jure* and *de facto*, in anarchy, except so far as the Federal Government may rightfully intervene. This seems to be substantially the view of the gentleman from Massachusetts (Mr. Boutwell). He enforces the same position, but he does not use the same language.

"I submit that these gentlemen do not see with their usual clearness of vision. If by a plague or other visitation of God every officer of a State government should at the same moment die, so that not a single person clothed with official power should remain, would the State government be destroyed? Not at all. For the moment it would not be administered, but as soon as officers were elected, and assumed their respective duties, it would be instantly in full force and vigor.

"If these States are out of the Union their State governments are still in force unless otherwise changed. And their citizens are to the Federal Government as foreigners, and it has in relation to them the same rights, and none other, as it had in relation to British subjects in the war of 1812, or to the Mexicans in 1846. Whatever may be the true relation of the seceded States, the Federal Government derives no power in relation to them or their citizens from the provision of the Constitution now under consideration, but in the one case derives all its power from the duty of enforcing the 'supreme law of the land,' and in the other from the power 'to declare war.'

"The second proposition of the gentleman from Maryland is this. I use his language:

That clause vests in the Congress of the United States a plenary, supreme, unlimited political jurisdiction, paramount over courts, subject only to the judgment of the people of the United States, embracing within its scope every legislative measure necessary and proper to make it effectual; and what is necessary and proper the Constitution refers in the first place to our judgment, subject to no revision but that of the people.

"The gentleman states his case too strongly. The duty imposed on Congress is doubtless important, but Congress has no right to use a

means of performing it forbidden by the Constitution, no matter how necessary or proper it might be thought to be. But, sir, this doctrine is monstrous. It has no foundation in the Constitution. It subjects all the States to the will of Congress; it places their institutions at the feet of Congress. It creates in Congress an absolute, unqualified despotism. It asserts the power of Congress in changing the State governments to be 'plenary, supreme, unlimited'—'subject only to revision by the people of the whole United States.' The rights of the people of the State are nothing; their will is nothing. Congress first decides; the people of the whole Union revise. My own State of Ohio is liable at any moment to be called in question for her constitution. She does not permit negroes to vote. If this doctrine be true, Congress may decide this exclusion is anti-republican, and by force of arms abrogate that constitution and set up another, permitting negroes to vote. From that decision of the Congress there is no appeal to the people of Ohio, but only to the people of Massachusetts, and New York, and Wisconsin, at the election of Representatives; and if a majority cannot be elected to reverse the decision, the people of Ohio must submit. Woe be to the day when that doctrine shall be established, for from its centralized despotism we will appeal to the sword!

"Sir, the rights of the States were the foundation corner of the Confederation. The Constitution recognized them, maintained them, provided for their perpetuation. Our fathers thought them the safeguard of our liberties. They have proved so. They have reconciled liberty with empire; they have reconciled the freedom of the individual with the increase of our magnificent domain. They are the test, the touchstone, the security of our liberties. This bill, the avowed doctrine of its supporters, sweeps them all instantly away. It substitutes despotism for self-government; despotism the more severe because vested in a numerous Congress elected by a people who may not feel the exercise of its power. It subverts the Government, destroys the Confederation, and erects a tyranny on the ruins of republican governments. It creates unity—it destroys liberty—it maintains integrity of territory, but destroys the rights of the citizen.

On the same day the bill was passed in the House by the following vote:

YEAS—Messrs. Alley, Allison, Ames, Anderson, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blow, Boutwell, Broomall, Cole, Creswell, Henry Winter Davis, Dawes, Daming, Dixon, Donnelly, Driggs, Eliot, Farnsworth, Fenton, Frank, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Julian, Kelley, Francis W. Kellogg, Orlando Kellogg, Littlejohn, Loan, Longyear, Marvin, McBride, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Pomeroy, Price, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smithers, Spalding, Thayer, *et cetera*.

William B. Washburn, Williams, Wilder, Wilson, Windom, and Woodbridge—78.

NAYS—Messrs. William J. Allen, Ancona, Augustus C. Baldwin, Blair, Brooks, James S. Brown, William G. Brown, Chanler, Clay, Cox, Dawson, Dennison, Eden, Eldridge, Finck, Ganson, Grider, Hale, Hall, Harding, Benjamin G. Harris, Charles M. Harris, Herrick, Holman, Philip Johnson, William Johnson, Kernan, Knapp, Law, Laxear, Le Blond, Long, Marcy, McAllister, Middleton, Morrison, Noble, Odell, John O'Neill, Pendleton, Perry, Radford, Samuel J. Randall, William H. Randall, James S. Rollins, Ross, Scott, Smith, John B. Steele, William G. Steele, Stiles, Strouse, Stuart, Ward, Webster, Whaley, Wheeler, Chilton, A. White, and Yeaman—59.

In the Senate on July 1st, this bill was called up by Mr. Wade, of Ohio, when Mr. Brown, of Missouri, moved the following amendment:

That when the inhabitants of any State have been declared in a state of insurrection against the United States by proclamation of the President, by force and virtue of the act entitled "An act further to provide for the collection of duties on imports, and for other purposes," approved July 13, 1861, they shall be, and are hereby declared to be incapable of casting any vote for electors of President or Vice-President of the United States, or of electing Senators or Representatives in Congress, until said insurrection in said State is suppressed or abandoned, and said inhabitants have returned to their obedience to the Government of the United States, nor until such return to obedience shall be declared by proclamation of the President, issued by virtue of an act of Congress hereafter to be passed, authorizing the same.

"I desire to state that in offering this amendment I have been prompted chiefly by the fact that the session is drawing so near its close that we have not time to discuss a measure of this importance as it should be discussed. I, for one, am not sufficiently familiar with the details of this bill, and there are certain features of it that do not meet my approbation which I would like to amend, to alter, and to change; but it is very apparent as matters now stand it will be impossible to do so. The present amendment provides all the security which can be asked in regard to the exercise of electoral privileges in these districts. That is the necessity of the hour. I propose to provide for that necessity, and to leave the matter of reconstruction to a later day when events shall have perhaps altered some of the relations in which these districts now stand to us. I do not think, furthermore, that the attitude of the country to which this bill is proposed to apply, is sufficiently distinct and sufficiently developed to justify us at this hour in passing upon the work of reconstruction. I therefore move the amendment, which is to strike out all after the enacting clause and make the provision there recited."

Mr. Wade, of Ohio, followed, saying: "This great question is pending before the country; it will not lie still; the Administration will force it on our consideration frequently, and it will arise in a thousand ways before us as long as this war shall continue, and afterwards. The question will be asked of every man who goes out to canvass during the coming election,

'What do you propose to do with these seceded States in regard to their coming back?' Every one says that the Union must be reestablished in some form; but how? That question is in the mind of every man, woman, and child in the country. The Union is to be preserved; but upon what principle will you permit these people to come back into the Union? It is a very natural question; it arises every day to everybody that considers the subject at all, and we must be prepared to give an answer to it. Here Congress has been in session seven months; we are about to leave and go back among the people, and they will say, 'You have talked very much and very long and very loud about reconstruction; some of these States have sent their agents and demanded readmission into the Union; you have voted them out; you have refused to receive them; but have you declared on what principle you will permit them to come in?' Our political opponents will say to us, 'It is your deliberate purpose to subdue these people, to subjugate them, to tyrannize over them, and never to let them come back into the Union on equal terms with the other States; when they have in form made a free constitution and elected Senators according to the forms of law, and who as they believed were entitled to seats here, you have thrust them out, but you do not declare any principle on which you will admit them.' That would be wrong. We ought to be able to answer authoritatively everybody that demands to know upon what principle they shall be admitted.

"The amendment that is now offered to this bill will give the people no information upon that subject. It is a bare negative. It declares that they shall not come in until Congress shall provide some principle for their admission, and of course it leaves it entirely a blank how that shall be. This bill goes on to prescribe precisely on what principle we are willing to admit these people into the Union again, and that pressing question it seems to me should now be decided. I hold that there is nothing tyrannical or oppressive in this bill, but that it proceeds upon the most liberal grounds of equality. On the one hand it guards the Federal Government against the admission of dangerous persons who still adhere to the confederate notions, and it prescribes the principle on which all the loyal people of the States can come back, and it provides for them a just and equitable government during the period of their transition state while they remain outside of the Union as States. It guards their rights most sedulously; and it undertakes to deal most equitably with those that are not in a condition safely to be admitted into the Union again. It prescribes deliberately and plainly the principle of organization and when they can be permitted to come back, and the bill escapes many of those questions that have been agitated in debate both in this and the other House.

"What is the relation that these seceded States hold to the General Government now? Gentlemen differ widely on that subject. It is a most important question, however, to be ascertained and declared by Congress, for the Executive ought not to be permitted to handle this great question to his own liking. It does not belong, under the Constitution, to the President to prescribe the rule, and it is a base abandonment of our own powers and our own duties to cast this great principle upon the decision of the executive branch of the Government. It belongs to us; and the House of Representatives, in the performance of their duty, have in my judgment wisely performed this great function. I know very well that the President from the best motives undertook to fix a rule upon which he would admit these States back into the Union. It was not upon any principle of republicanism; it would not have guaranteed to the States a republican form of government, because he prescribed the rule to be that when one-tenth of the population would take a certain oath and agree to come back into the Union they might come in as States. When we consider that in the light of American principle, to say the least of it, it was absurd. The idea that a State shall take upon itself the great privilege of self-government when there are only one-tenth of the people that can stand by the principle, is most anti-republican, anomalous, and entirely subversive of the great principles that underlie all our State governments and the General Government. Majorities must rule, and until majorities can be found loyal and trustworthy for State government, they must be governed by a stronger hand. It is a necessity imposed upon the General Government by the Constitution itself.

"I have said that it is the duty of the Federal Government to guarantee to every State a republican form of government, and here, Senators, remember that the bill moving upon this great principle moves under the broad ægis of the Constitution of the United States. It sets up no fanciful principle of government outside of that instrument. It disposes of that grave question, what is the condition of these States and what is their relation to the General Government? It does not go outside of the Constitution of the United States itself. I say again, it leaves nothing to gentlemen's judgment or the different fancies that may spring up among different individuals.

"It has been contended in the House of Representatives, it has been contended upon this floor, that the States may lose their organization, may lose their rights as States, may lose their corporate capacity by rebellion. I utterly deny that doctrine. I hold that once a State of this Union, always a State; that you cannot by wrong and violence displace the rights of anybody or disorganize the State. It would be a most hazardous principle to assert that. No, sir; the framers of your Constitution intended

no such thing. They did not leave this great question untouched; and when we study that great instrument I can hardly help but stop and contemplate the all-embracing wisdom that seemed to actuate them, for you can find hardly an exigency that may arise in the complicated affairs of government that they did not anticipate and provide for. They did foresee that in the progress of the Government some of the States might go into rebellion, that they might undertake themselves to absolve their connection with the General Government and set up some hostile government of their own; and they expressly provided for just such a case; and how gentlemen with this principle of the Constitution staring them in the face can fancy that States can lose their rights because more or less of the people have gone off into rebellion, is marvellous to me. The principal of law everywhere is that no honest man shall lose a right by wrong or usurpation. The act of rebellion is void. It may have physical force for the moment to displace rights; but the law never yields to any such power as that. The law never anywhere acknowledges that right can be overthrown by wrongful action. They, then, who contend that the State governments are lost, obliterated, blotted out, are contending against the face and eyes of the Constitution. Has that said any such thing? No, sir. It has said that the Federal Government shall guarantee to every State a republican form of government; and if a portion of the people undertake to overthrow their Government and set up another, it is the manifest duty of the General Government immediately to interfere, and, if necessary, to interpose the strong arm of its power to prevent such a state of things. Precisely that state of things is upon us, and this bill proceeds upon that idea and discards absolutely the notion that States may lose their rights and that they may be abrogated and may be reduced to the condition of Territories. It denies any such thing as that. No sound principle can be adopted that warrants any such thing.

"Mr. President, the question is so large that when one gets into it he is tempted into details that I feel there is no time now to indulge in. The bill prescribes, as I have said, that there shall be a military governor in each of these States until he can ascertain that a majority are willing to return to it; and he is to ascertain just as soon as it can be done by the appointment of certain commissioners who are to go out and take a census of the people, and ascertain their wishes and desires on this subject, and ascertain whether there are really a majority of the people in the State that propose to come back, who are truly loyal and could maintain a government. The bill provides that the military governor shall do this; and the very moment it becomes certain that there are a majority able to do this, the military governor's power is to cease, and it is to be resigned into civil hands who are to go on and organize the State. Who

will say that is not right? Of course it is right. So the bill goes on to prescribe the form of proceeding; and I do not suppose that any man here will object to all that, and therefore I leave it.

"The latter part of the bill goes on to define the principles which shall be adopted in the new constitution that they shall frame, and that, I suppose, will be the portion of the bill which will receive more criticism than any other. The bill prescribes that each of these States shall have a republican form of government; and now the question is, how can you, with the light of our present experience, set up a republican form of government? I think that the great Union party of the country are altogether convinced that slavery mixed up in a Government is so unsafe, so liable to overthrow, that it cannot be admitted as an element in a State government. The sad experience of this terrible revolution has, as we Union men believe, grown out of the institution of slavery alone, and this war is the legitimate and natural fruit of that state of things. Would we then, in guaranteeing a republican form of government, suffer it to be mixed up with anomalous elements calculated to immediately destroy what we set up? In the light of our present experience, that, to say the least of it, would be folly. Therefore this bill has taken special pains to say that the new government shall, in its constitution, proclaim emancipation as a condition upon which it shall be permitted to come into the Union.

"There was a time when a precedent like this would have been deemed unconstitutional. I know it made a great controversy whether, when a State was about to come into the Union, we might prescribe any particular principle for its State constitution. We have done so, however, in every State that we have ever admitted, and yet perhaps it never was entirely settled. But in the light of our present experience I ask any man who is a lover of peace and who intends to make a constitution that shall live forever, saying nothing of the wrong, saying nothing of slavery in any other than a political point of view, would it be safe, would it be wise for us in admitting States back into this Union to permit them to come with the very element that had carried them out, with the very seeds of destruction which had destroyed them already? No, sir, we would not do it. The framers of this bill have sedulously shut it out, and made it a condition on which the seceded States shall come back, that it shall be a fundamental principle of their constitution that slavery is excluded. If there is a Republican in the Senate who objects to that I am sorry for it.

"The amendment of the Senator from Missouri, as I said before, gives the whole question the go-by. It establishes nothing. It does not enlighten the people of the seceded States upon what principle they are to be admitted into this Union again. It barely postpones the settle-

ment. It does not answer the question which as I said has been and will be asked every day and every hour; and the people will ask, if we adopt it, how it happened that at this long session when the question was before us we gave it the go-by. Your political enemies will stand by saying it was because you dared not utter the objectionable sentiments that you intend to bind upon the South; that you have dodged the entire question when it was before you, because you dared not show your hand and give them a principle of equity, justice, and right to go upon. They will have a right to say it. We have no right to blink the question. It is a great question that is most anxiously looked to in all the seceded States by every loyal man. He is told by our political enemies, 'They will not let you back on any equitable terms; they intend to make you hewers of wood and drawers of water, to reduce you to servitude.' That is the cry."

Mr. Carlile, of Virginia, said: "If I supposed that the amendment offered by the Senator from Missouri could be adopted, I should not detain the Senate by a word of remark on this proposition; and now, until after a vote can be had to ascertain the sense of the Senate as to the proposed amendment, I will refrain from entering into any discussion of the bill further than to show, if I can, that all the bill proposes to do to remedy existing evils will be accomplished by the adoption of the amendment.

"A part of the Senator's argument was as able an argument as any Senator can make on this floor on this bill. He tells us that the Executive has no right to prescribe the rules upon which these States may be received back into the Union, and he tells us that we have no power to overthrow the State governments; once a State, with him always a State. I agree with him in that. He says that he does not maintain that the State governments are obliterated, and that he who does is contending against the Constitution. I agree fully with the Senator from Ohio in that, and the marvel with me is how the Senator can advocate this bill which does all this. This bill not only maintains that the State governments are overthrown, but so far as in its power lies, recognizes and assumes the right to overthrow the State governments if that work is not already accomplished. If there be a State where the rebel, the traitor to his country and his God, has failed in overthrowing the State government, this bill accomplishes that work which he, the traitor, began. If the President of the United States has no right to prescribe rules for the return of the rebellious States, will the Senator from Ohio, able as he is, be kind enough to enlighten one humble as myself by pointing out to me the provision of the Constitution authorizing him, as a Senator, to exercise any more power upon this subject than the President can exercise?"

Mr. Wade: "Congress."

Mr. Carlile: "Then as part of Congress or

as the whole of Congress, I challenge the Senator from Ohio to show me the authority in Congress to exercise this power. The truth is that the title of this bill is an insult to the understanding of every intelligent man in the nation, and the bill itself is one of the most revolutionary that ever was proposed in a deliberative body claiming to be the representatives of a free people. Unwilling as I am to trespass on the time of the Senate, anxious as I am for an early adjournment, refraining as I have done for the last six months from occupying fifteen minutes even of the time of this body, I am unwilling to allow such a measure as this to pass without giving to it such consideration and such discussion as I may be able to do.

"Mr. President, years back in our history, forty odd years ago, a question far beneath this in importance and significance was mooted in the Congress of the United States that gave such alarm to the author of the Declaration of Independence, that he said it fell upon his ear like the fire-bell at midnight; and what was that question compared to this? It was insignificant; it was but a grain of sand upon the sea-shore compared to the mountain. That was a proposition on the part of the United States to impose upon the then inhabitants of the Territories seeking admission into the Union, a restriction upon their right of self-government when they became a State; and after one of the most exhaustive and learned debates that is connected with our history or that ever graced the Capitol of the nation, that assumption for Congress was abandoned. It remained for the last Congress to revive it and to do what its predecessors would not do. It was permitted to rest as the settled law of the land that the Congress of the United States had no power to impose by law limitations affecting the right of the people of a State to regulate their own domestic affairs, even when sought to be applied to the inhabitants of a Territory seeking admission into the Union; and such was the settled action of Congress until reversed at its last session, when Congress assumed to create a State out of a portion of the territory of the State which I represent. I say 'assumed,' for it was but an assumption. The debate to which I have referred established the want of power in Congress, and so plain was it made that the advocates of the power sought to be exercised, abandoned the discussion and abandoned the assumption.

"No State can have a republican form of government, no State has a republican government, when that government, no matter what are its provisions, is prescribed to them by another outside of their limits. A republican form of government must emanate and emanate alone from the people that are to be governed. It belongs not to the Congress of the United States; it belongs not to thirty-three States of this Union to prescribe for the smallest State within its folds a constitution or form of gov-

ernment. If you have a right to impose a limitation upon this power as to one subject of domestic legislation, you have a right to impose it upon every subject. If you have the right to make one provision of a constitution for a people, you have the right to make the entire instrument itself."

Mr. Wade: "I should like to ask the Senator this question: Suppose a State should undertake to set up a monarchy in defiance of the General Government, what would be its duty?"

Mr. Carlile: "Its duty is as plain as the noonday sun in a clear and cloudless sky; its duty is prescribed in the instrument which we have sworn to support; and that is to guarantee to the people there a republican form of government which they had adopted for themselves, and which was in existence at the time the attempted monarchy was sought to be substituted for it. There is the answer to the Senator. The Senator would claim for the Congress of the United States sovereign powers, powers exercised alone by a despot and a tyrant, by governing through appointees of their own the sovereign States of this Union.

"Mr. President, the Senator from Ohio regards these States as States still, States in the Union. He regards an attempt at the overthrow of their governments, I take it from his argument, to be treason. He regards it his constitutional duty to prevent by all the means within the power of the Government that attempted overthrow. Now, I put this question to the Senator, and I hope he will answer it: Where does he as a member of the Congress of the United States derive the constitutional power to govern a State by a Federal appointee? Where does the Senator derive the power to appoint a Governor for a State, a State which he acknowledges to be in existence, a State government that he acknowledges to be in existence, a State government that he acknowledges it to be his duty to protect and maintain? By what provision of the Constitution does the Senator derive the authority to appoint for such a State an executive head?"

Mr. Wade: "Does the Senator want an answer now?"

Mr. Carlile: "Certainly."

Mr. Wade: "As I have frequently said, the Constitution of the United States provides that Congress shall guarantee to every State in the Union a republican form of government. When any State undertakes to set up a government in defiance of the Government of the United States, to establish an aristocracy or a monarchy, or any thing but a republican government, the Constitution gives the power to the General Government to guarantee a republican government, and when it has given the power to it, it has given the means necessary to perform it. Is not that good law?"

Mr. Carlile: "No, sir. Now, Mr. President, I will satisfy the Senator himself, I think; and really it is not necessary for me to attempt to satisfy him, for he is too good a lawyer not to

know the meaning of the word 'guarantee.' What is it? Does the authority to 'guarantee to each State in this Union a republican form of Government' authorize this Union to set up a government, to create a government, or to make a government? Is the maker of a note the man who guarantees its payment? There is no man in the Senate who knows better the definition and legal significance of the word 'guarantee' than the Senator from Ohio, and none, I am sure, is more familiar, too, with the power that was intended to be conferred by this provision of the Constitution."

Mr. Wade: "I want an argument square. I do not like this dodging."

Mr. Carlile: "There is no dodging with me. I am going to meet it squarely."

Mr. Wade: "Suppose a State of this Union undertakes to set up a monarchy, suppose it has elected its monarch, suppose he is on the throne, and sets up a government hostile to the United States, how shall the United States guarantee a republican government to the people of that State? They have got to do it. The Constitution says it shall be done. How? By keeping out of the boundary of the State? By this letting alone principle that we hear of? Is that it?"

Mr. Carlile: "The Senator is wandering entirely from the question. I answered the Senator awhile ago how he was to get rid of the monarchy. I told him it was his duty, made so by this provision of the Constitution, to bring to bear the power of this Government to relieve the people of the State from that monarchy, and maintain them in the possession and enjoyment of their State government, organized by themselves, and which existed before the attempted monarchy was forced upon them."

Mr. Wade: "Let us stop right there. Suppose now that we have conquered them and the people are still bent on their monarchy, shall we not guarantee a republican government to them by putting one over them?"

Mr. Carlile: "No, sir. If the Senator be right, Mr. Madison, the author of the Constitution, was wrong. I supposed that the Senator was familiar with the 'Federalist,' and the Senator ought to be familiar with the discussions of this very same provision when the Constitution came before the people of the several States to be ratified or rejected. The 'Federalist' is looked upon as a correct exposition of these very powers, and one of the objections by the many objectors at that day was, not that the provision conferred power to do what is proposed to be done by this bill, but that an unscrupulous Congress, unmindful of their constitutional obligations, unmindful of their duty as representatives, regardless of the rights and liberties of the people, and of the rights of their States that they were created for the purpose of protecting, might use as a pretext this provision to assert the very power the Senator proposes in this bill, and what is

the reply? I read from the forty-third number of the 'Federalist':

6. "To guarantee to every State in the Union a republican form of government; to protect each of them against invasion; and on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence."

In a confederacy founded on republican principles, and composed of republican members, the superintending government ought clearly to possess authority to defend the system against aristocratic or monarchical innovations.

"The very case put by the Senator; and how it is to be done is stated:

The more intimate the nature of such a Union may be, the greater interest have the members in the political institutions of each other; and the greater right to insist that the forms of government under which the compact was entered into should be *substantially maintained*.

It may possibly be asked, what need there could be of such a precaution, and whether it may not become a pretext for alterations in the State governments without the concurrence of the States themselves. These questions admit of ready answers. If the interposition of the General Government should not be needed, the provision for such an event will be a harmless superfluity only in the Constitution. But who can say what experiments may be produced by the caprice of particular States, by the ambition of enterprising leaders, or by the intrigues and influence of foreign Powers? To the second question it may be answered that if the General Government should interpose by virtue of this constitutional authority, it will be of course bound to pursue the authority. But the authority extends no further than to a *guarantee* of a republican form of government, which supposes a *preexisting government* of the form which is to be guaranteed.

"Now, sir, is the Senator answered? The people of the State, whether there is an attempt to overthrow the State government, or whether it has been a successful attempt as against the State itself, are to be relieved by the action of this Government in pursuance of the authority therein granted. It is not claimed or pretended, I suppose, by the Senator from Ohio or by any advocate of this bill, that under any other provision of the Constitution can a pretext be afforded for the assertion of such a power as this bill proposes to assert."

Mr. Wilkinson: "Suppose the people of the State of South Carolina have determined that they will not have a republican form of government in that State, what would the Senator have the Government of the United States do under such circumstances?"

Mr. Carlile: "I would have the Government of the United States do nothing that it has not the power under the Constitution to do, because I believe that the Government of the United States is a Government of limited powers. I believe it to be its duty under the grant of power in the Constitution, to guarantee the existence of a preëxisting republican government. That government existed in South Carolina; the people have not determined, at least before this war they had not determined, to have any other than a republican form of government. We had recognized that govern-

ment as a republican form of government by the recognition of the State in all its departments and the admission of all its national representatives. It is made the duty of the Government of the United States, not of Congress; and I desire to call the attention of the Senator to that, because it bears upon his assumption for Congress of power which does not belong to the Executive. It is not alone the duty of Congress to guarantee a republican form of government to the people of the several States; the extent of that guarantee is not limited alone to the means which Congress may employ; but the words of the Constitution are 'the United States shall guarantee.' Hence every department of the Government is equally bound; and Congress being the legislative branch, of course participates to a greater extent in the discharge of that duty."

Mr. Clark: "I do not wish to interrupt the Senator to ask any question not entirely agreeable to him, but I desire to ask of him whether if the Government be overthrown in any one State by the people of that State, it is not the duty of the Government of the United States to restore that to its republican form even if a majority of the people in that State are opposed to the republican form."

Mr. Carlile: "The fact of my being here, I think, should be an answer to the Senator's question. The people of each State of this Union have, by becoming parties to the Constitution, bound themselves by that compact; and they have not the right to overthrow the State government which recognizes that obligation by any power short of that which results in success; but if they are able to prevent the United States through its power, from enforcing this provision of the Constitution, then I suppose they can do it, but otherwise not."

Mr. Clark: "That does not quite meet the question. They have not the right to overthrow, that is very clear; but suppose they actually have done it, have overthrown, then the question I desire to put is whether it is not the duty of this Government to restore it."

Mr. Carlile: "How, though? By pursuing the authority conferred upon the United States, not by creating a new government, not by restricting them in the exercise of any one prerogative that belongs to them, not by separating one of their local limbs of sovereignty that belonged to them and bringing them into the Union amputated, with the badge of inequality and degradation placed upon them, as you placed upon the so-called State of West Virginia."

Mr. Clark: "Then will the Senator allow me to inquire, if it becomes necessary, in order to restore that government, to set up within that State a provisional government, is not the power clearly given to Congress or the United States Government to set it up? Does he not recognize the decision of the Supreme Court that when a power is given all the requisites

to its exercise are given, if not absolutely prohibited by the Constitution?"

Mr. Carlile: "It is not essential to this argument for me to answer the Senator from New Hampshire; not that I am not disposed to do it—"

Mr. Clark: "I do not desire an answer particularly."

Mr. Carlile: "Or that I cannot do so; but the Senator from New Hampshire will bear in mind that what I called his attention to in the opening of this argument, was the second section of this bill which does propose a provisional government as a war measure, and to last only while the rebellion remains; but it does not propose to exercise any governmental power except what is exercised through its appointee as governor, until after military resistance shall have been suppressed."

Mr. Clark: "I understand that entirely. I understand that the people are to be held by this provisional governor until the rebellion is subdued, and this is to be the provisional means of bringing back the old form of government."

Mr. Carlile: "I should like to ask the Senator from New Hampshire to tell me how one Federal appointee, called a governor, is to hold a State which your armies have as yet been unable to hold."

Mr. Clark: "He is to hold it by means of the army until the rebellion is entirely done, the same as we have held Tennessee."

Mr. Carlile: "You have no authority to appoint a governor or any civil officer in that State, unless you are compelled to resort to military power to carry out your constitutional obligations and to remove the obstacles which are in the way of the exercise of civil authority through the agents of the people themselves, which they have established by virtue of their existing government. No such power is given under any provision of the Constitution; none could have been given without your entirely changing the whole character of this Government, which is based upon the fundamental principle that the military power shall always be subordinate to the civil. One of the brightest spots in the character of the Father of his Country, is the fact, that during our revolutionary struggle, he ever maintained the supremacy of the civil power; and so highly was that estimated by the Congress that received from him his resignation as Commander-in-Chief of the armies, that the President, Thomas Mifflin, who was instructed to make the address, alluded to it in the most flattering and complimentary terms:

Called upon by your country to defend its invaded rights, you accepted the sacred charge before it had formed alliances, and while it was without funds or a Government to support you. You have conducted the great military contest with wisdom and fortitude, invariably regarding the rights of the civil power through all disasters and changes.

"I regret, sir, that truth compels me to say that such a speech could not be made now to

those who have conducted the military power of this country in this war. But, sir, the Senator from Ohio says the Union is to be preserved. So say I. Upon what principle are these States to come back into the Union? The people, says the Senator from Ohio, will meet you with that inquiry. Sir, when was ever such an inquiry suggested to the brain of any loyal man in this Union? When was such an inquiry ever put? Never until after a policy different from that which characterized the commencement of this struggle was entered upon by the party in power. All said the Union was to be restored; all accepted the struggle as the use of the military power of the Government in the restoration of the Union. What Union? The Union of the Constitution. The Union into which new States are to be admitted. It is not into "a Union," but into "this Union" that the States are admitted. What Union? The Union of the Constitution, none other; and he who seeks to preserve the Union, can only do it by an observance of the Constitution and the use of the constitutional means to restore it, not reconstruct it.

"Where do you derive the power to reconstruct this Union? What Union are you the representatives of? What is the Union which has given to you your seats? It is the Union as it has existed from 1789; it is the Union of which the Constitution of the United States is the only bond; it is a Union of limited and delegated powers, bounded, as Mr. Adams said, on one hand by the right of the States to internal legislation, and on the other by the laws and usages of nations. In this Union, created by this Constitution, of limited and delegated powers, all prescribed and written in the instrument, you propose to exercise your legislative power by usurping the rights and liberties of the people, a power which all the people you represent could not use or could not exert without the destruction of the Union which the Constitution formed. There is no power in this Government, there is no power in the parties to this Government, there is no power in all the States of this Union to prescribe a constitution for the little State of Rhode Island. If every other State in the Union, the adhering as well as the rebellious States, if every man, woman, and child in them were to meet and prescribe a constitution for the people of Rhode Island, they would have no power or authority to do so under the Union; and tell me where the people's representatives derive the power to do that which all the people in their collective capacity, save the small minority that constitutes that State, cannot do?

"When I heard the learned Senator from Wisconsin, now occupying the chair (Mr. Doolittle), a few days ago on this floor say that after this war we were to have a better Union than we have ever had, the expression of the sentiment not only astonished me, but it sunk into my heart and impressed itself upon my memory never to be effaced. Where do you derive the

power or the authority to give us any other Union than that which the Constitution created? Who is willing to intrust, even to Senators of this day, the right of forming a Union which it is to be supposed will be superior and above the Union that the patriots of the Revolution formed?

"The Senator from Ohio, in the remarks which he has submitted upon this bill, has said that he did not wish to subjugate these people, and he denied our right to subjugate them. He was not for subjugating them, and not for letting them into the Union upon equal terms with the other States. I put it to the Senator from Ohio, if this bill itself is not a subjugation of the people upon whom it is proposed to operate. You provide that after the suppression of this rebellion, this provisional governor may summon a convention to form a constitution, not to amend the existing constitution, but to form a constitution and to prescribe—"

Mr. Wade: "I presume they can take the one they have if they like it better in that shape."

Mr. Carlile: "Let the Senator wait a bit and I will get his attention to this section of the bill. That convention is to meet a convention composed of delegates alone, who have sworn allegiance to the Constitution of the United States, who have taken upon themselves the solemn obligation which the last Congress provided should be taken by all holding office under the Government of the United States in the act of July 2, 1862; I believe, that convention to be selected, alone, by electors who have taken the oath of allegiance to the United States; and yet if that convention does not impose the restrictions which this bill seeks to impose upon these States, it is to be dissolved. That convention is not to be allowed, under this bill to adopt if it chooses, a constitution, republican in form, but it must adopt certain provisions prescribed in this bill; and if they, in the exercise of the rights that belong to an unsubjugated people, refuse to adopt these provisions, they are to be dissolved and dispersed, and the privilege of erecting a government for themselves denied to them, and they are to go out into the country, after military resistance has ceased, after there is no obstruction to the execution of the laws, after all the various machinery of this Government is working smoothly and quietly, and remain until the President shall become satisfied that another convention composed of subjugated delegates, will do what this bill declares they shall do before they can ever resume the right of self-government and have the benefit of the civil administration of the laws under that government which they have formed for themselves. If I understand the word 'subjugate,' no exertion of power that can be conceived of by the autocrat of Russia, or by any tyrant that ever sat upon a throne, more completely subjugates a free people than this provision of this bill.

"There is another feature in connection with

this subject which the gentleman from Ohio and the advocates of this bill seem to me to have entirely overlooked. The existence of the institution of slavery in a State or any other domestic institution, does not make the government republican or anti-republican in form. It is not a governmental power that recognizes the existence of any particular institution in a State. It is derived from the legislative power, from the law-making power.

"Mr. President, the Senate will bear in mind that the bill now under consideration, in those provisions to which I have already invited the attention of the body, is not and cannot be claimed to be a war measure. I think it important that this fact shall be kept in view in order to confine the discussion, if we can, to those propositions and considerations that naturally arise upon these particular provisions of the bill. Indeed, its title would indicate that its authors did not predicate any claim for support upon any such ground. It is not claimed that the bill is to aid the Government of the United States in the existing struggle. It is not pretended that it will contribute in the slightest degree to the success of our arms and the assertion of Federal authority within the States named; but it is, as I have before remarked, purely a revolutionary measure, and just as much as our power is greater than the power of the rebellion, to that extent does it more successfully accomplish the same end which the rebellion was inaugurated to accomplish, to wit, the overthrow of the State governments.

"Now, sir, it is a fact familiar to every one at all acquainted with our history, that this Government, the Government of the United States, in the name of which it is sought to perpetrate this injustice upon the States, emanated itself from the States. The States existed prior to the Government of the United States. The Government of the United States is the creature of the States, emanating directly from them, and the greatest good expected to be accomplished by the States in the formation of this Government was to protect them in the enjoyment and possession of their own rights of self-government within their respective limits. That was the chief object for the formation of the Government. Then how can it be supposed that this Government, emanating, as I have said before, from the States, can send down to the States a governor for them and prescribe for them their form of government? This assumption of power alone, if there were no other considerations involved in the measure, is sufficient, it seems to me, to stamp the absurdity of the proposition.

"But, sir, it goes further. It is a declaration to these States that they are never to be received into the Union, that all the benefits of the Union which they aided in creating and forming are to be denied them, their State governments are permitted to be overthrown, the only question being whether they shall be over-

thrown by traitors in arms or whether they shall be overthrown by a Government of their own creation which they formed for the purpose of protecting them in the enjoyment of their own State governments and the right of self-government. Thus, sir, it declares to the people of these States, that are admitted to be States by the chairman of the committee that reported the bill, and who advocated it to-day; it says to them in the form of law and to the extent that this Congress has the power to commit the loyal people of the adhering States, commits the loyal people of the United States to the declaration that the States now in the power of those who inaugurated this rebellion are never to enjoy Federal rights without a surrender of their local sovereignty.

"It does more, Mr. President; it is a declaration as plain as you can make it to the people of this country and to the civilized world that, so far as the powers of the Government of the United States can be wielded by those to whom its administration is at the present time intrusted, the Union that the Constitution formed shall never again be enjoyed by the people. It is a declaration that the effort for the restoration of the Union is to be abandoned, that the time has now arrived when it becomes us to give up the 'old Union,' as some gentlemen have styled it, and to enter upon the new work of reconstruction. If that be so, how can you attempt to maintain your consistency, by the military power of this Government to compel a minority of the States of the Union containing a minority of the population of the Union to submit to the reconstruction of the Union? To do this we must discard all the obligations of the Constitution. It cannot be disguised that such will be the effect of this bill."

The amendment was adopted—yeas, 17; nays, 16.

Mr. Sumner, of Massachusetts, then offered the following amendment:

And be it further enacted, That the proclamation of emancipation issued by the President of the United States on the 1st day of January, 1863, so far as the same declares that the slaves in certain designated States and portions of States thenceforward should be free, is hereby adopted and enacted as a statute of the United States, and as a rule and article for the government of the military and naval forces thereof.

It was lost by the following vote:

YEAS—Messrs. Chandler, Conness, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sumner, Wade, Wilkinson, and Wilson—31.

NAYS—Messrs. Brown, Carlile, Davis, Doolittle, Grimes, Hale, Harris, Henderson, Hendricks, Johnson, Lane of Indiana, McDougall, Powell, Richardson, Riddle, Saulsbury, Sherman, Sprague, Ten Eyck, Trumbull, and Van Winkle—21.

ABSENT—Messrs. Anthony, Buckalew, Clark, Colamer, Cowan, Dixon, Fessenden, Foot, Foster, Harding, Harlan, Hicks, Howard, Howe, NeSmith, Willey, and Wright—17.

The bill passed by the following vote:

YEAS—Messrs. Brown, Chandler, Conness, Doolittle, Grimes, Hale, Harlan, Harris, Henderson, Johnson, Lane of Indiana, Lane of Kansas, McDougall, Morgan, Pomeroy, Ramsey, Riddle, Sherman,

Spregue, Sumner, TenEyck, Tramball, Van Winckle, Wade, Wilkinson, and Wilson—26.

NAYS—Messrs. Davis, Powell, and Saulsbury—3.
ABSENT—Messrs. Anthony, Buckalew, Carlile, Clark, Collamer, Cowan, Dixon, Fessenden, Foot, Foster, Harding, Hendricks, Hicks, Howard, Howe, Morrill, Neamith, Richardson, Willey, and Wright—20.

The House non-concurred in the amendment of the Senate, and asked a Committee of Conference, when the Senate receded from its amendment—yeas, 18; nays, 14.

The bill then went to the President for his approval. On July 9th he issued the following proclamation relative to it:

Whereas, At the late session, Congress passed a bill to guarantee to certain States whose Governments have been usurped or overthrown a republican form of government, a copy of which is herewith annexed;

And whereas, The said bill was presented to the President of the United States for his approval less than one hour before the *sine die* adjournment of said session, and was not signed by him;

And whereas, The said bill contains, among other things, a plan for restoring the States in rebellion to their proper practical relation in the Union, which plan expressed the sense of Congress upon that subject, and which plan it is now thought fit to lay before the people for their consideration;

Now, therefore, I, Abraham Lincoln, President of the United States, do proclaim, declare, and make known that while I am—as I was in December last, when by proclamation I propounded a plan for restoration—unprepared by a formal approval of this bill to be inflexibly committed to any single plan of restoration; and while I am also unprepared to declare that the free-State Constitutions and Governments, already adopted and installed in Arkansas and Louisiana shall be set aside and held for naught, thereby repelling and discouraging the loyal citizens who have set up the same as to further effort, or to declare a Constitutional competency in Congress to abolish slavery in the States, but am at the same time sincerely hoping and expecting that a Constitutional amendment abolishing slavery throughout the nation may be adopted;

Nevertheless, I am fully satisfied with the system for restoration contained in the bill as one very proper for the loyal people of any State choosing to adopt it; and that I am, and at all times shall be, prepared to give the executive aid and assistance to any such people, so soon as military resistance to the United States shall have been suppressed in any such State, and the people thereof shall have sufficiently returned to their obedience to the Constitution and the Laws of the United States—in which cases Military Governors will be appointed, with directions to proceed according to the bill.

In testimony whereof, I have hereunto set my hand, and caused the seal of the United States to be affixed.

Done at the City of Washington, this 8th day of July, in the year of our Lord one thousand eight hundred and sixty-four, and of the independence of the United States the eighty-ninth.

[L. S.]

ABRAHAM LINCOLN.*

By the President.

WILLIAM H. SEWARD, Secretary of State.

* PROTEST OF SENATOR WADE AND H. WINTER DAVIS, M.C. To the supporters of the Government:

We have read without surprise, but not without indignation, the proclamation of the President of the 8th of July, 1864.

The supporters of the Administration are responsible to the country for its conduct; and it is their right and duty to check the encroachments of the Executive on the authority of Congress, and to require it to confine itself to its proper sphere.

In the House, on the 16th of February, Mr. Dawes, of Massachusetts, called up the case of James M. Johnson, claiming to be a Representative from Arkansas, and stated the facts to be as follows: "The gentleman himself, his brother, and brother-in-law, the present Provisional Governor of Arkansas under the new constitution lately adopted, were residents of the same town and congressional district, and in the first month of the war, in 1861, they were driven from the State and from their homes by the rebels because of the course they took at the threshold against the rebellion. From that moment they entered into the Union armies. This gentleman has served in those armies, and in many battles of the Southwest he has had the honor, as a colonel of one of the Union regiments of Arkansas, to distinguish himself. He holds a commission in that capacity at this moment. While he was absent in the army, never being able to set his foot in his own State except at the head of the forces of the Union, the loyal people of the State of Arkansas met in convention and adopted a State constitution, and sent him here as the bearer of the constitution of a free State, the first unwilling fruit which this rebellion has borne. In his absence, and without his knowledge, the voters of the second congressional district of Arkansas, numbering four or five thousand, elected himself as their Representative upon this floor. He offers his credentials through the ordinary channels of the House, and though he has had the honor of bearing here the first free-State constitution out of the fire and smoke of this war, and though he comes here covered with honorable scars won in defence of the flag of his country, with a commission as a Representative elect to this House, he is denied so much as a hearing.

"The State of Arkansas was districted according to the law of the United States before the rebellion broke out; and it was divided into three congressional districts according to the number assigned by the last census.

"I know not whether upon an investigation by the Committee of Elections there will be sufficient law or sufficient facts to justify the admission of this gentleman to a seat upon the floor as a Representative from Arkansas. It is because I want to know whether there is law or constituency enough to justify us in admitting him here that I move that these credentials be referred to the Committee of Elections."

Mr. Davis, of Maryland, said: "I made this motion to lay on the table because, as I supposed, as now it turns out to be the fact, that it is not a mere question of election law which

It is impossible to pass in silence this proclamation without neglecting that duty; and, having taken as much responsibility as any others in supporting the Administration, we are not disposed to fail in the other duty of asserting the rights of Congress.

The President did not sign the bill "to guarantee to certain States whose government have been usurped, a Republican form of government"—passed by the supporters of his Administration in both Houses of Congress after mature deliberation.

would be involved, but a question of the recognition, or the refusal to recognize the organization of a State government in Arkansas. That question I am not willing to have passed upon

The bill did not therefore become a law; and it is, therefore, nothing.

The proclamation is neither an approval nor a veto of the bill; it is, therefore, a document unknown to the laws and Constitution of the United States.

So far as it contains an apology for not signing the bill, it is a political manifesto against the friends of the Government.

So far as it proposes to execute the bill which is not a law, it is a grave Executive usurpation.

It is fitting that the facts necessary to enable the friends of the Administration to appreciate the apology and the usurpation be spread before them.

The proclamation says:

"And whereas the said bill was presented to the President of the United States for his approval less than one hour before the *sine die* adjournment of said session, and was not signed by him—"

If that be accurate, still this bill was presented with other bills which were signed.

Within that hour the time for the *sine die* adjournment was three times postponed by the votes of both Houses; and the least intimation of a desire for more time by the President to consider this bill would have secured a further postponement.

Yet the committee sent to ascertain if the President had any further communication for the House of Representatives reported that he had none; and the friends of the bill, who had anxiously waited on him to ascertain its fate, had already been informed that the President had resolved not to sign it.

The time of presentation, therefore, had nothing to do with his failure to approve it.

The bill has been discussed and considered for more than a month in the House of Representatives, which it passed on the 4th of May. It was reported to the Senate on the 27th of May, without material amendment, and passed the Senate absolutely as it came from the House on the 2d of July.

Ignorance of its contents is out of the question.

Indeed, at his request, a draft of a bill substantially the same in material points, and identical in the points objected to by the proclamation, had been laid before him for his consideration in the winter of 1862-1863.

There is, therefore, no reason to suppose the provisions of the bill took the President by surprise.

On the contrary, we have reason to believe them to have been so well known that this method of preventing the bill from becoming a law without the constitutional responsibility of a veto, had been resolved on long before the bill passed the Senate.

We are informed by a gentleman entitled to entire confidence, that before the 29th of June, in New Orleans, it was stated by a member of General Banks's staff, in the presence of other gentlemen in official position, the Senator Doolittle had written a letter to the department that the House Reconstruction bill would be staved off in the Senate to a period too late in the session to require the President to veto it in order to defeat it, and that Mr. Lincoln would retain the bill, if necessary, and thereby defeat it.

The experience of Senator Wade, in his various efforts to get the bill considered in the Senate, was quite in accordance with that plan; and the fate of the bill was accurately predicted by letters received from New Orleans before it had passed the Senate.

Had the proclamation stopped there, it would have been only one other defeat of the will of the people by the Executive perversion of the Constitution.

But it goes further. The President says:

"And whereas the said bill contains, among other things, a plan for restoring the States in rebellion to their proper practical relation in the Union, which plan expresses the sense of Congress upon that subject, and which plan it is now thought fit to lay before the people for their consideration—"

By what authority of the Constitution? In what forms? The result to be declared by whom? With what effect when ascertained?

Is it to be a law by the approval of the people, without the approval of Congress, at the will of the President?

Will the President, on his opinion of the popular approval, execute it as a law?

Or is this merely a device to avoid the serious responsibility of defeating a law on which so many loyal hearts reposed for security?

But the reasons now assigned for not approving the bill are full of ominous significance.

The President proceeds:

on the collateral matter of the investigation of the right of a gentleman to a seat on this floor."

Mr. Mallory, of Kentucky, said: "Does the

"Now, therefore, I, Abraham Lincoln, President of the United States, do proclaim, declare, and make known that, while I am (as I was in December last, when by proclamation I propounded a plan for restoration) unprepared by a formal approval of this bill to be inflexibly committed to any single plan of restoration."

That is to say, the President is resolved that people shall not by *lose* take *any* securities from the rebel States against a renewal of the rebellion, before restoring their power to govern us.

His wisdom and prudence are to be our sufficient guarantee! He further says:

"And while I am also unprepared to declare that the free-State constitutions and governments already adopted and installed in Arkansas and Louisiana shall be set aside and held for naught, thereby repelling and discouraging the loyal citizens who have set up the same as to further effort—"

That is to say, the President persists in recognizing those shadows of governments in Arkansas and Louisiana which Congress formally declared should not be recognized—those representatives and senators were repelled by formal votes of both Houses of Congress—which it was declared formally should have no electoral vote for President and Vice-President.

They are mere creatures of his will. They are mere oligarchies, imposed on the people by military orders under the form of election, at which generals, provost marshals, soldiers and camp-followers were the chief actors, assisted by a handful of resident citizens, and urged on to premature action by private letters from the President.

In neither Louisiana nor Arkansas, before Banks's defeat, did the United States control half the territory or half the population. In Louisiana General Banks's proclamation candidly declared: "The fundamental law of the State is martial law."

On that foundation of freedom he erected what the President calls "the free constitution and Government of Louisiana."

But of this State, whose fundamental law was martial law, only sixteen parishes out of forty-eight parishes were held by the United States; and in five of the sixteen we held only our camps.

The eleven parishes we substantially held had 228,135 inhabitants; the residue of the State not held by us, 275,617.

At the farce called an election the officers of General Banks returned that 11,846 ballots were cast; but whether any or by whom the people of the United States have no legal assurance; but it is probable that 4,000 were cast by soldiers or employees of the United States military or municipal, but none according to any law, State or national, and 7,000 ballots represent the State of Louisiana.

Such is the free constitution and Government of Louisiana; and like it is that of Arkansas. Nothing but the failure of a military expedition deprived us of a like one in the swamps of Florida; and before the Presidential election like ones may be organized in every rebel State where the United States have a camp.

The President, by preventing this bill from becoming a law, holds the electoral votes of the rebel States at the dictation of his personal ambition.

If those votes turn the balance in his favor, is it to be supposed that his competitor, defeated by such means, will acquiesce?

If the rebel majority assert their supremacy in those States, and send votes which elect an enemy of the Government, will we not repel his claims?

And is not that civil war for the Presidency inaugurated by the votes of rebel States?

Seriously impressed with these dangers Congress, "the proper constitutional authority," formally declared that there are no State governments in the rebel States, and provided for their erection at a proper time; and both the Senate and the House of Representatives rejected the senators and representatives chosen under the authority of what the President calls the free constitution and government of Arkansas.

The President's proclamation "holds for naught" this judgment, and discards the authority of the Supreme Court, and strides headlong toward the anarchy his proclamation of the 8th of December inaugurated.

If electors for President be allowed to be chosen in either of those States, a sinister light will be cast on the motives which induced the President to "hold for naught" the will of Congress rather than his government in Louisiana and Arkansas.

That judgment of Congress which the President defies was the exercise of an authority exclusively vested in Congress

gentleman from Maryland assert, in his opinion, that the State government is destroyed in Arkansas; that she is obliterated as a State; that she is no longer one of the States of the Union;

and that she must come back into the family of States upon application, just as a State comes in from a Territory?"

Mr. Davis replied: "A State should exist

by the constitution to determine what is the established government in a State, and in its own nature and by the highest judicial authority binding on all other departments of the Government.

The Supreme Court has formally declared that, under the 4th section of the 17th article of the Constitution, requiring the United States to guarantee to every State a republican form of government, "it rests with Congress to decide what government is the established one in a State;" and "when senators and representatives of a State are admitted into the councils of the Union, the authority of the Government under which they are appointed, as well as its republican character, is recognized by the proper constitutional authority, and its decision is binding on every other department of the Government, and could not be questioned in a judicial tribunal. It is true that the contest in this case did not last long enough to bring the matter to this issue; and as no senators or representatives were elected under the authority of the Government of which Mr. Dorr was the head, Congress was not called upon to decide the controversy. Yet the right to decide is placed there.

Even the President's proclamation of the 8th of December formally declares that whether members sent to Congress from any State shall be admitted to seats constitutionally rests exclusively with the respective houses, and not to any extent with the Executive."

And that is not the less true because wholly inconsistent with the President's assumption in that proclamation of a right to institute and recognize state governments in the rebel States, nor because the President is unable to perceive that his recognition is a nullity if it be not conclusive on Congress.

Under the Constitution, the right to senators and representatives is inseparable from a State Government.

If there be a State Government the right is absolute.

If there be no State Government there can be no senators or representatives chosen.

The two Houses of Congress are expressly declared to be the sole judges of their own members.

When, therefore, senators and representatives are admitted, the State Government under whose authority they were chosen is conclusively established; when they are rejected, its existence is as conclusively rejected and denied; and to this judgment the President is bound to submit.

The President proceeds to express his unwillingness "to declare a constitutional competency in Congress to abolish slavery in States" as another reason for not signing the bill.

But the bill nowhere proposes to abolish slavery in States.

The bill did provide that all *slaves* in the rebel States should be *manumitted*.

But as the President had already signed three bills manumitting several classes of slaves in States, it is not conceived possible that he entertained any scruples touching that provision of the bill respecting which he is silent.

He had already himself assumed a right by proclamation to free much the larger number of slaves in the rebel States, under the authority given him by Congress to use military power to suppress the rebellion; and it is quite inconceivable that the President should think Congress could vest in him a discretion it could not exercise itself.

It is the more unintelligible from the fact, that except in respect to a small part of Virginia and Louisiana, the bill covered only what the proclamation covered—added a Congressional title and judicial remedies by law to the disputed title under the proclamation, and perfected the work the President professed to be so anxious to accomplish.

Slavery as an institution can be abolished only by a change of the Constitution of the United States, or of the law of the States; and this is the principle of the bill.

It required the new constitution of the State to provide for that prohibition; and the President, in the face of his own proclamation, does not venture to object to insisting on that condition. Nor will the country tolerate its abandonment—yet he defeated the only provision imposing it.

But when he describes himself in spite of this great blow at emancipation, as "sincerely hoping and expecting that a constitutional amendment abolishing slavery throughout the nation may be adopted," we curiously inquire on what his expectation rests, after the vote of the House of Representatives at the recent session, and in the face of the political complexion of more than enough of the States to prevent the possibility of its adoption within any reasonable time; and why he did not indulge his sincere hopes with so large an instalment of the blessing as his approval of the bill would have secured?

After this assignment of his reasons for preventing the bill

from becoming a law, the President proceeds to declare his purpose to execute it as a law by his plenary dictatorial power.

He says: "Nevertheless, I am fully satisfied with the system for restoration contained in the bill as one very proper plan for the loyal people of any State choosing to adopt it; and that I am, and at all times shall be, prepared to give the Executive aid and assistance to any such people as soon as the military resistance to the United States shall have been suppressed in any such State, and the people thereof shall have sufficiently returned to their obedience to the Constitution and the laws of the United States—in which cases military governors will be appointed, with directions to proceed according to the bill."

A more studied outrage on the legislative authority of the people has never been perpetrated.

Congress passed a bill; the President refused to approve it, and then by proclamation puts as much of it in force as he sees fit, and proposes to execute those parts by officers unknown to the laws of the United States, and not subject to the confirmation of the Senate.

The bill directed the appointment of provisional governors by and with the advice and consent of the Senate.

The President, after defeating the law, proposes to appoint, without law and without the advice and consent of the Senate, military governors for the rebel States!

He has already exercised this dictatorial usurpation in Louisiana, and defeated the bill to prevent its limitation.

Henceforth we must regard the following precedent as the Presidential law of the rebel States:

"EXECUTIVE MANSION,

WASHINGTON, March 15, 1864.

"His Excellency Michael Hahn, Governor of Louisiana:

"Until further orders you are hereby invested with the powers exercised hitherto by the military governor of Louisiana.

Yours,

ABRAHAM LINCOLN."

This Michael Hahn is no officer of the United States; the President, without law, without the advice and consent of the Senate, by a private note not even countersigned by the Secretary of State, makes him dictator of Louisiana!

The bill provided for the civil administration of the laws of the State—but it should be in a fit temper to govern itself—repealing all laws recognizing slavery, and making all men equal before the law.

These beneficent provisions the President has annulled. People will die, and marry and transfer property, and buy and sell; and to these acts of civil life courts and officers of the law are necessary. Congress legislated for these necessary things, and the President deprives them of the protection of the law!

The President's purpose to instruct his military governors "to proceed according to the bill"—a makeshift to calm the disappointment its defeat has occasioned—is not merely a grave usurpation but a transparent delusion.

He cannot "proceed according to the bill" after preventing it from becoming a law.

Whatever is done will be at his will and pleasure, by persons responsible to no law, and more interested to secure the interests and execute the will of the President than of the people; and the will of Congress is to be "held for naught," unless the loyal people of the rebel States choose to adopt it.

If they should graciously prefer the stringent bill to the easy proclamation, it will give no assurance that a majority of the people of the States have taken the oath; if administered, it will be without legal authority and void; no indictment will lie for false swearing at the election, or for admitting bad or rejecting good votes; it will be the law of Louisiana and Arkansas acted over again, under the forms of this bill, but not by authority of law.

But when we come to the guaranties of future peace which Congress meant to enact, the forms, as well as the substance of the bill, must yield to the President's will that none should be imposed.

It was the solemn resolve of Congress to protect the loyal men of the nation against three great dangers: (1) the return to power of the guilty leaders of the rebellion; (2) the continuance of slavery; and (3) the burden of the rebel debt.

Congress required assent to those provisions by the convention of the State; and if refused, it was to be dissolved.

The President "holds for naught" that resolve of Congress, because he is unwilling "to be inflexibly committed to any one plan of restoration," and the people of the United States are not to be allowed to protect themselves unless their enemies agree to it.

with a government. The Constitution of the United States assumes that when it compels Congress to guarantee a government. The Supreme Court of the United States assumed that, when, in the case of Fisher and Walton, they said if a military government be established in a State it would be the duty of the United States to abrogate and remove it. The rebel government in Arkansas is a military government, and therefore not a republican government, and the United States is now engaged in removing it. When it is removed there will be no government in point of fact, as there is none in point of law. To-day the condition of Arkansas I take to be this: her political privileges depend upon her organization of a State government, and not upon the fact of her being a State. Without her Legislature there are no electors; there is nobody entitled under the Constitution of the United States to vote for members of Congress. She is in the condition where Tennessee was under the administration, I believe, of General Washington. Tennessee was admitted into the Union without the scratch of the pen of a constitution. It was a State without a State government. When Tennessee organized her State government, that was recognized by Congress. When Arkansas shall organize a State government, that will be recognized by Congress and the President. Until that condition precedent representation upon this floor does not exist."

The order to proceed according to the bill is therefore merely at the will of the rebel States; and they have the option to reject it, accept the proclamation of the 8th of December, and demand the President's recognition!

Mark the contrast! The bill requires a majority, the proclamation is satisfied with one-tenth; the bill requires one oath, the proclamation another; the bill ascertains voters by registering, the proclamation by guess; the bill exacts adherence to existing territorial limits, the proclamation admits of others; the bill governs the rebel States *by law*, equalizing all before it, the proclamation commits them to the lawless discretion of Military Governors and Provost Marshals; the bill forbids electors for President, the proclamation and defeat of the bill threaten us with civil war for the admission or exclusion of such votes; the bill exacted exclusion of dangerous enemies from power and the relief of the nation from the rebel debt, and the prohibition of slavery forever, so that the suppression of the rebellion will double our resources to bear or pay the national debt, free the masses from the old domination of the rebel leaders, and eradicate the cause of the war; the proclamation secures neither of these guarantees.

It is silent respecting the rebel debt and the political exclusion of rebel leaders; leaving slavery exactly where it was by law at the outbreak of the rebellion, and adds no guaranty even of the freedom of the slaves he undertook to manumit.

It is summed up in an illegal oath, without sanction, and therefore void.

The oath is to support all proclamations of the President, during the rebellion, having reference to slaves.

Any government is to be accepted at the hands of one-tenth of the people not contravening that oath.

Now that oath neither secures the abolition of slavery, nor adds any security to the freedom of the slaves the President declared free.

It does not secure the abolition of slavery; for the proclamation of freedom merely professed to free certain slaves while it recognized the institution.

Every constitution of the rebel States at the outbreak of the rebellion may be adopted without the change of a letter; for none of them contravene that proclamation; none of them establish slavery.

It adds no security to the freedom of the slaves; for their title is the proclamation of freedom.

If it be unconstitutional, an oath to support it is void. Whether constitutional or not, the oath is without authority of law, and therefore void.

Mr. Stevens, of Pennsylvania, said: "Arkansas is now under a military governor, and I want to know whether any State under the authority of a military governor and general can enact any civil laws which will be binding. And I refer in this connection to California, in reference to which it was decided by the Supreme Court that while the military law existed the military governor and general could authorize no civil law, and that therefore the law in reference to revenue was void."

Mr. Harding, of Kentucky, asked Mr. Davis "Whether, in his judgment, the State of Arkansas is in, or out of the Union?"

Mr. Davis replied: "I will say that, in my judgment, it is in the Union; in the Union so far that we are bound to see that nothing which has the form without the substance of a government shall control her citizens; so far in the Union that we are responsible that she shall be governed according to republican laws; so far in the Union that the loyal men of Arkansas cannot be governed by traitors who call themselves the Legislature of Arkansas. We are bound to protect them."

Mr. Boutwell, of Massachusetts, expressed his opinion in these words: "I wish to say that, understanding as I do from the remark of the gentleman from Maryland, that he intends by his motion only to lay these credentials upon the table until the great question as to the political condition of Arkansas is settled,

If it be valid and observed, it exacts no enactment by the State, either in law or constitution, to add a State guaranty to the proclamation title; and the right of a slave to freedom is an open question before the State courts on the relative authority of the State law and the proclamation.

If the oath binds the one-tenth who take it, it is not exacted of the other nine-tenths who succeed to the control of the State government, so that it is annulled instantly by the act of recognition.

What the State courts would say of the proclamation, who can doubt?

But the master would not go into court—he would seize his slaves.

What the Supreme Court would say, who can tell?

When and how is the question to get there?

No *habeas corpus* lies for him in a United States Court; and the President defeated with this bill the extension of that writ to his case.

Such are the fruits of this rash and fatal act of the President—a blow at the friends of his Administration, at the rights of humanity, and at the principles of Republican Government.

The President has greatly presumed on the forbearance which the supporters of his Administration have so long practised, in view of the arduous conflict in which we are engaged, and the reckless ferocity of our political opponents.

But he must understand that our support is of a cause and not of a man; that the authority of Congress is paramount and must be respected; that the whole body of the Union men of Congress will not submit to be impeached by him of rash and unconstitutional legislation; and if he wishes our support, he must confine himself to his Executive duties—to obey and execute, not make the laws—to suppress by arms armed rebellion, and leave political reorganization to Congress.

If the supporters of the Government fail to insist on this, they become responsible for the usurpations which they fail to rebuke, and are justly liable to the indignation of the people whose rights and security, committed to their keeping, they sacrifice.

Let them consider the remedy of these usurpations, and, having found it, fearlessly execute it.

B. F. WADE,

Chairman Senate Committee.

H. WINTER DAVIS,

Chairman Committee House of Representatives on the Rebellious States.

I concur entirely in the wisdom of his proposition. I think it would be a most unfortunate thing for this country, and of course most unwise, for this House, by its action upon an incidental matter, to settle the condition of the State of Arkansas, or of any other State. I have examined this matter as much as I was able, from the commencement of the contest till now, and I have the settled conviction that the State of Arkansas and the other ten co-operating States in this rebellion have no legal or constitutional existence as States of this Union."

The motion to lay on the table was lost, and the credentials were referred to the Committee on Elections.

In the Senate, on June 18th, a joint resolution for the recognition of the free-State Government of Arkansas was considered. A motion was made to refer the resolution and the credentials of Messrs. Fishback and Baxter to the Judiciary Committee.

Mr. Sumner, of Massachusetts, took the floor and said: "William M. Fishback, a citizen of Arkansas, appears before the Senate of the United States, and claims membership therein. He asserts that he has been duly chosen to fill the unexpired term of Senator Sebastian, who was expelled in 1861 for complicity with the rebellion; and he produces a certificate purporting to be signed by the Governor of Arkansas.

"Shall this claimant be admitted to a seat in the Senate? Such is the immediate question. But I have said that there are other questions, of the most far-reaching character, which must be considered now and here; for they all enter into the present case. If we now admit the present claimant, we must also now admit that other claimant who has presented himself with like credentials, as a colleague. The question is not, therefore, shall Arkansas have one vote in this Senate? but, shall it have two?

"But if Arkansas is now to be fully represented in this Senate, does it not follow that it is to be represented with equal fulness in the House of Representatives? If represented in that Chamber, such representation must be under the existing apportionment act, which assigns to Arkansas two Representatives, who are to be chosen by districts, without reference to the number of votes polled in either.

"One privilege will draw after it another. To him that hath shall be given. If Arkansas is admitted to an immediate representation in the national Government, this rebel State, which has overthrown the Constitution within its borders, and assumed the front of war, can participate in the approaching election of President and Vice-President, by organizing an electoral college; and in case the election of either of those great officers should devolve upon Congress, it can give a vote affecting the result as weighty as that given by Massachusetts, New York, or Illinois; for in such case, the vote in the Senate is *per capita*, and in the House it is by States.

"Therefore, sir, I repeat, the decision of the question now before us rules all the questions which can arise upon the representation of Arkansas in the Congress of the United States, and also the other question of the participation of Arkansas in the election of President and Vice-President for the term of four years next ensuing. The importance of such a subject cannot be exaggerated.

"There are, Mr. President, five distinct reasons, obvious to the most superficial observer, against the recognition of any representation at this time from Arkansas: first, because the representation is founded on a minority; secondly, because any such representation, unjust in itself, is especially unjust toward the loyal States; thirdly, because the *military occupation* of Arkansas and its exposed condition, are inconsistent with *civil government*; fourthly, because the present organization of Arkansas is without that legality of origin which is required by American institutions; and, fifthly, because it is absurd to admit a State to representation which is still, by solemn proclamation, shut out from commercial intercourse with the loyal States.

"True it is, that the President put forward a plan for reorganizing loyal State governments in the rebel territory, and he proffered a guaranty to these communities against domestic violence and rebel invasion; but he neither proposed nor promised any representation in Congress or in the electoral college. Nor would such a proposition or promise by him have possessed the slightest validity; because, by the Constitution, 'each House is to be the judge of the elections, returns, and qualifications of its own members.' This provision is inconsistent with any prerogative of the President over this question, even if this prerogative were not controlled by that other provision which reserves to Congress the power to admit 'new States into this Union.'

"Besides, the power of the President to institute this Government, is only as Commander-in-Chief of the Army. It is therefore military in its character. But what proceeds from this power is, from the nature of the case, provisional or temporary, until it has received the sanction of Congress. To a certain extent, and from the necessity of the hour, military governments may be constituted by the President; but permanent civil governments with—"

Mr. Collamer: "To last beyond the war."

Mr. Sumner: "As the Senator from Vermont happily suggests, to last beyond the war, with a right of representation in Congress and in the electoral college, cannot be constituted by the President. Such a power would be open to infinite abuse, and, in the hands of an ambitious President, might be employed for selfish purposes. The national safety, in harmony with republican principles, requires that it should be exercised by Congress, which must take the lead in calling the new government into being.

"Congress must have jurisdiction over every portion of the United States where there is no other government; but there can be no other government in the rebel States, so that the words of Chief Justice Marshall are as applicable to a State without a loyal State government as they were originally to a Territory: "

Perhaps the power of governing a Territory belonging to the United States, which has not by becoming a State acquired the means of self-government, may result necessarily from the facts that it is not within the jurisdiction of any particular State, and is within the power and jurisdiction of the United States.—*American Insurance Company vs. Carter*, 1 Peters, 532.

"The three things which are here affirmed of a Territory, may all be affirmed of a rebel State:

"First. It has not the means of self-government.

"Secondly. It is not within the jurisdiction of any particular State.

"Thirdly. It is within the power and jurisdiction of the United States.

"From these again the necessity of congressional jurisdiction ensues.

"2. It would be unreasonable, if not absurd, for each Chamber to determine the question of representation for itself. Suppose, for instance, that the Senate admit claimants from Arkansas and the House reject them. Then we should witness the anomaly of a State admitted to one Chamber and excluded from the other. This would be a case of semi-admission into the Union. Part would be in and part out. The Senators and Representatives of the same State would be compelled to separate, as in Grecian mythology, when one of the inseparable twins, Castor and Pollux, was translated to Olympus, and the other was left upon earth. Surely the Constitution does not contemplate the repetition of any such fable. Arkansas must stay away until she can be received in both Houses and can be recognized as a unit and not as a fraction; but no power short of Congress can assure this equal reception in both Houses.

"8. Authority is in harmony with reason. This question seems to have been anticipated by the opinion of the Supreme Court of the United States, as pronounced by Chief Justice Taney in the case of *Luther vs. Borden* (7 Howard's Reports, 42). Here are the words:

The fourth section of the fourth article of the Constitution of the United States, provides that, the United States shall guarantee to every State in the Union a republican form of government, and shall protect each of them against invasion, and, on the application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

Under this article of the Constitution, it rests with Congress to decide what government is the established one in a State. For as the United States guarantee to each State a republican government, Congress must necessarily decide what government is established in the State before it can determine whether it is republican or not. And when the Senators and Representatives of a State are admitted into the councils of the Union, the authority of the

government under which they are appointed, as well as its republican character, is recognized by the proper constitutional authority. And its decision is binding on every other department of the Government, and could not be questioned in a judicial tribunal.

"According to these positive words 'it rests with Congress to decide what government is the established one of a State.' But Congress can decide only through joint action.

"4. The Constitution also, by a positive text, seems to place the question beyond doubt. There are express words, as we have already seen, declaring that 'the United States shall guarantee to every State in this Union a republican form of government.' If these words stood alone, the case would be clear; but it becomes clearer still when we revert to the other clause by which it is provided that 'the Congress shall have power to make all laws which shall be necessary and proper for carrying into execution all powers vested by this Constitution in the Government of the United States.' Now, since the guaranty is vested in the Government of the United States, it follows that Congress has the power for carrying it into execution. In Arkansas a republican government has been overthrown by rebellion. Congress must see that such government is restored; and to this end it has all needful power. Congress, and not the President, must decide when the restoration has taken place.

"5. There is also the President's proclamation, which, by its very terms, necessarily implies the action of Congress in the restoration of a State to the Union. There is first the positive declaration that 'whether members sent to Congress from any State shall be admitted to seats constitutionally rests exclusively with the respective Houses, and not to any extent with the Executive.' But the language of the proclamation and of the accompanying message plainly assumes that the rebel States have lost their original character as States of the Union. Thus in one place the President says that 'loyal State governments have for a long time been subverted.' But if subverted, they are no longer States. In another place he proposes 'to reinaugurate loyal State governments.' But a proposition to reinaugurate implies a new start. In another place he proposes to 'reestablish a State government which shall be republican.' But we do not reestablish a government which continues to exist. In another place he proposes to 'set up' a State government in the mode prescribed. But whatever requires to be set up is evidently down. In another place he seeks to guarantee and protect a 'revived State government.' But we revive only what is dead, or at least faint. There is still another place, where the President evidently looks to the possibility of a change of name, boundary, subdivision, constitution, and general code of laws in the restored State. These are his identical words: 'And it is suggested as not improper that in constructing a loyal State government in a State, the name of the State, the boundary,

the subdivisions, the constitution, and the general code of laws, as before the rebellion, be maintained.' Thus the President does not insist that even the name and boundary of a State shall be preserved. He contents himself with suggesting that it will not be 'improper' to preserve them 'in constructing a loyal State government.' Of course this suggestion of what is not improper implies necessarily that in his opinion these great changes were within the discretion of the revived community.

"I have called especial attention to the language of the President, because it constantly assumes, in a succession of phrases, that the rebel States are in an abnormal condition, from which they are to be recovered or revived; and since such restoration or revival can be consummated only by the action of Congress, it is reasonable to infer that such was his expectation. At all events, the proclamation, by its repeated assumptions with regard to the rebel States, testifies to the necessity of congressional action.

"We have already seen that Andrew Johnson had declared the State of Tennessee 'vacated' by all local government which we were bound to respect; and Arkansas was in a similar situation. But this language obviously harmonizes with that of the President.

"Such are some of the arguments for the power of Congress over this question. Others might be adduced; but I have said enough. The necessity of the case—reason—the authority of the Supreme Court—the Constitution—and the President's proclamation, each and all tend to the same conclusion, even without resorting to those war powers which are all within the reach of Congress. But if we glance at the latter we shall find the power of Congress declared beyond question. There is nothing which the President may do as Commander-in-Chief which Congress may not direct and govern, according to the authoritative words of Chancellor Kent:

Though the Constitution vests the executive power in the President, and declares him Commander-in-Chief of the Army and Navy of the United States, these powers must necessarily be subordinate to the legislative power in Congress."—Kent's Commentaries, volume 1, 292, note 6.

"And these powers, vast as they may be when called into activity by the exigency of war or rebellion, become as constitutional as if specified precisely in a written text.

"Of course when within the confines of a State the rebellion is triumphantly subdued, and the great body of the people testifies an unmistakable loyalty; when local elections can be held according to the ordinary municipal forms; when the laws and not arms prevail; and when a government, republican in fact as in name, making slavery forever impossible, has been permanently established, then will Congress, by proper legislative action, rejoice to welcome the newly-constituted State to its equal share in the national Government. But

such welcome must not be precipitated. It can be offered only after a most careful inquiry into the actual condition of things and the assured conviction that the rebel State has been newly constituted in fact, as in name. And this caution is needed not only for the good of the Union but for the good of the newly-constituted State, which must be saved from premature responsibilities beyond the measure of its present powers.

"Sir, it is much to be a State in full fellowship and equality with other States represented in this Chamber and in the other Chamber, with a voice in the election of President and Vice-President, and with a star on the national flag. To be admitted into these prerogatives and privileges a State must be 'above suspicion,' and it must be able to use well all the great powers which belong to a State. But if a State is not yet 'above suspicion,' and if it is not strong enough to stand alone, even against domestic disturbers, it cannot expect immediate recognition. It must wait yet a little longer until, restored at last in character and in strength, it can do all the duties of a State, and with master hand grasp that Ulyssean bow which pretenders strive in vain to bend."

Mr. Johnson, of Maryland, replied: "Has the honorable member refreshed his recollection with the debates which resulted out of the admission of Missouri? Has he consulted the debates which from time to time since have occurred in either branch of Congress? If he has, he will find that however upon the first occasion doubts were entertained whether it was in the power of Congress to annex any such condition to a State as a condition upon which it is to be admitted, it was soon after conceded that it was not in the power of Congress to annex any such condition to the admission of a State, because such condition would produce inequality as between the States. He reads every thing that comes out that is worth reading, and he will pardon me for saying he sometimes reads what is not worth reading; and I am sure the honorable member must have read the speech that electrified this body, charmed an immense audience, placed his name high upon the roll of orators, made him for the time the observed of all observers, the speech that Pinckney delivered on that question in this Chamber. It is very imperfectly reported, but the argument is there, and the argument was so overwhelming that although the opposite view was taken by a man of eminent ability, and pure and spotless character, and burning patriotism (Rufus King was his opponent, and spoke in advance), he yielded to its masterly power, and stood, if I may be permitted to use what I have heard from those who were spectators of the debate, crest-fallen. And from that day to this (I speak what I know, Mr. President, for it has happened to be my duty particularly to examine this question professionally), with rare exceptions every jurist in either branch of Congress who has spoken on

the subject, until the last two or three years, has admitted that whether a State is to be received into the Union or not, one thing is certain, she can only come in as an equal; and as Massachusetts might establish slavery if she thought proper to do so, as she once recognized it, as she once, if there could be any enjoyment in such an institution, enjoyed it, as some of her citizens sold the slaves which went out to the South—as she could now establish African slavery within her own limits, it followed that if you prohibited it to Arkansas or to Tennessee, or to any other States, they would not be on an equal footing with Massachusetts. I trust in God the Union is destined to last forever; but it cannot last when once it is understood that each State in the Union is not the equal of every other, equal in every thing, equal not only in the power to do right but equal in the power to do wrong; I mean morally wrong. My friend is for blotting out all these State lines which were so valuable to us in the past, around which so many associations that cling round the heart of an American are to be found; associations the result of intercourse, the result of marriage, the result of blood relationship, the result of joint glories and joint trials in the field. He is for blotting them all out and considering these States merely as territory, to return to the United States as territorial acquisitions; or, if the honorable member refuses to admit that that word properly illustrates his own view, to get them back into the United States as Territories, stripped of State power and unprotected by the Constitution of the United States, except so far as that Constitution deals with and protects the Territories of the United States.

"The difference between the honorable member and myself is as wide as the poles. I consider the war now being carried on against the citizens of those States as being carried on against them individually; that each man is just as much a citizen of the United States in those States now as is each man in the loyal States; but as those men for the most part are now in arms against the United States, trying to destroy the United States, they are not to be represented in the electoral college because they are criminals, traitors, whom it is the duty of the United States to prosecute as such, and to punish as such. If the President thinks proper to pardon them all, and he has pardoned a great many, or if Congress should think proper itself by some legislative act, with the consent of the President, to wipe out all their sins as against the United States, and they should organize their Government again, and come here, they have a right to come; but until they do that they are the enemies of the United States. But that is not the case made by the President."

Mr. Howard, of Michigan, said: "Mr. President, I shall vote against the reference of this subject to any committee of the Senate. I shall vote against the reference of the joint

resolution which is the first in order, because I think the time has not yet come for us to take into consideration the propriety of setting aside the President's proclamation declaring certain States of the Union to be in insurrection; and I shall vote against it, because I think that, fairly and properly speaking, at the present time the State of Arkansas is in insurrection. It is not at peace. So far as the resolution relates to that State, I shall treat it as a State in insurrection."

The joint resolution was adopted to refer the credentials to the Committee on the Judiciary, together with the following resolution offered by Mr. Sumner:

Resolved, That a State pretending to secede from the Union, and battling against the national Government, to maintain this pretension must be regarded as a rebel State, subject to military occupation, and without title to representation on this floor until it has been readmitted by a vote of both Houses of Congress; and the Senate will decline to entertain any application from any such rebel State until after such vote of both Houses of Congress.

The committee subsequently reported that the Senators were not entitled to seats. The report was approved.

In the House, on April 4th, Mr. Davis, of Maryland, received permission to report from the Committee on Foreign Affairs a joint resolution relative to Mexico. It declared that the Congress of the United States were unwilling by silence to leave the nations of the world under the impression that they were indifferent spectators to the deplorable events transpiring in the republic of Mexico, and that they therefore thought fit to declare that it did not accord with the policy of the United States to acknowledge any monarchical government erected on the ruins of any republican government in America under the auspices of any European power.

Mr. Brooks, of New York, asked: "What does the gentleman propose to do with the joint resolution?"

Mr. Davis replied: "I propose to put it upon its passage."

Mr. Brooks said: "I have no objection to the joint resolution if it be not a mere paper fulmination. I do object, however, to paper thunder. If it means any thing I am in favor of the resolution; if not, I am opposed to it."

Mr. Davis further added: "Mr. Speaker, whether it be a mere paper fulmination or not depends upon whether the Congress of the United States shall adopt it, and whether it represents, in adopting it, the opinions of the people of the United States. It is a declaration simply as to what our policy is to be respecting events which touch our interest very nearly. I take it that it is not a subject which anybody desires here to discuss; and I suspect that if there be a dissent in this House, it is about the only dissent that can be found in the United States on this subject."

The vote on the resolution was—yeas, 109; nays, 0. No action was taken on the resolution in the Senate.

In the House, Dec. 22, 1863, Mr. Johnson, of Pennsylvania, offered the following resolution:

Whereas the supreme judicial tribunal of the State of Pennsylvania has solemnly decided that the act of Congress, approved March 3, 1863, commonly called the Conscription Act, is, in its provisions, contrary to and in violation of the Constitution of the United States, and therefore null and void; therefore,

Resolved, That it is the sworn duty of the executive department of the Government to either acquiesce in that decision within that State, or to bring the question involved before the Supreme Court of the United States for final adjudication, to the end that, if Congress shall deem such legislation necessary, a bill may be prepared which shall not be subject to constitutional objections.

It was laid upon the table by the following vote:

YEAS—Messrs. Alley, Allison, Ames, Anderson, Arnold, Ashley, Bailey, John D. Baldwin, Beaman, Boutwell, Boyd, Brandegee, Broomall, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Creswell, Henry Winter Davis, Dawes, Deming, Dixon, Donnelly, Driggs, Dumont, Eckley, Eliot, Farnsworth, Fenton, Frank, Ganson, Gooch, Grinnell, Hale, Higby, Hooper, Hotchkiss, Asabel W. Hubbard, John H. Hubbard, Jenckes, Julian, Kasson, Longyear, Lovejoy, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Odell, Charles O'Neill, Orth, Pike, Price, William H. Randall, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schoenck, Scofield, Shannon, Sloan, Smith, Smithers, Spaulding, Stevens, Thomas, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Williams, Wilder, Windom, and Winfield—80.

NAYS—Messrs. Ancona, Augustus C. Baldwin, Bliss, Brooks, Coffroth, Cox, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Grider, Hall, Harding, Benjamin G. Harris, Charles M. Harris, Holman, Philip Johnson, William Johnson, Le Blond, Long, McDowell, McKinney, Middleton, Morrison, Nelson, Noble, John O'Neill, Pendleton, Perry, Rogers, Ross, Scott, John B. Steele, William G. Steele, Stiles, Strouse, Sweat, Wheeler, Chilton A. White, Joseph W. White, and Fernando Wood—48.

On February 1st, Mr. Eldridge, of Wisconsin, offered the following:

Whereas all conscription or other forced service of the citizen to the State is contrary to the genius and principles of republican government and opposed to the principles of self-government, which is the true basis of the American Republic; and whereas the laws for conscripting or drafting citizens into the military service of the United States have thus far proved, if not an entire failure, at least ineffectual for the supplying to the Government the necessary number of men requisite for the military service in putting down the rebellion; and whereas the principles of equity and justice require in a Government like ours, founded on the will of the majority, that the burdens of maintaining and preserving it should fall alike and equally upon all and every of the citizens, the rich as well as the poor, in proportion to their ability to bear the same; and whereas the military is a profession to which men are called as well from the inducements of personal gain and family advantage as from motives of patriotism and hopes of future fame; therefore,

Resolved, That the Committee on Military Affairs be, and they are hereby, instructed to examine and

inquire immediately into the propriety and expediency of repealing or suspending, so far as any future or further draft is concerned, all acts and parts of acts authorizing or empowering the conscripting or drafting of, or in any way forcing the citizen into the military service of the country, either in putting down rebellion or otherwise, and in lieu thereof providing by law for and authorizing the President of the United States from time to time, and as he may deem it expedient and necessary, to offer the payment of such sum or sums of money for volunteers in bounties or monthly payments, or otherwise, as may be best to induce enlistments and secure such moneys to the soldier and his family, and as will secure just so many and just such men as may be requisite or necessary to put down the rebellion and restore the supremacy of the Constitution; and that said committee do report by bill.

It was laid on the table—yeas, 84; nays, 42.

On the same day, Mr. Grinnell, of Iowa, offered the following:

Whereas the war policy of the Government having brought into the military service as soldiers and laborers free colored men and persons claimed to be held by rebels, who have rendered invaluable service to the army; and whereas the more extended employment and enlistment of colored persons will be a relief to our northern soldiers, unaccustomed and unused to manual labor, and lessen the number to be taken from their homes and from the industrial pursuits in the United States where there is now an unusual demand for labor; therefore,

Resolved, That a more vigorous policy to enlist at an early day and in larger numbers in our army persons of African descent, would meet the approbation of this House.

It was adopted by the following vote:

YEAS—Messrs. Allison, Ames, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blaine, Francis P. Blair, Jacob B. Blair, Blow, Boutwell, Boyd, Brandegee, Broomall, William G. Brown, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Creswell, Henry Winter Davis, Thomas T. Davis, Dawes, Deming, Driggs, Eliot, Farnsworth, Fenton, Garfield, Grinnell, Higby, Hooper, Hotchkiss, Asabel W. Hubbard, John H. Hubbard, Hulburd, Julian, Kelley, Francis W. Kellogg, Orlando Kellogg, Longyear, Marvin, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pomeroy, Price, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schoenck, Schofield, Shannon, Sloan, Smith, Spaulding, Stevens, Thayer, Thomas, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Webster, Whaley, Williams, Wilson, Windom, and Woodbridge—80.

NAYS—Messrs. James C. Allen, William J. Allen, Ancona, Clay, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Grider, Hall, Harding, Harrington, Benjamin G. Harris, Holman, Kernan, King, Knapp, Law, Lazear, Long, Marcy, McAllister, McKinney, William H. Miller, Morrison, Noble, John O'Neill, Pendleton, Perry, Prun, Samuel J. Randall, Robinson, Rogers, Ross, Scott, John B. Steele, Stiles, Strouse, Stuart, Sweat, Wadsworth, Chilton A. White, and Yeaman—48.

In the Senate, on December 21st, a bill to increase the bounty to volunteers, and the pay of the army, was taken up. An amendment was under consideration to pay the same bounties to persons enlisting in the marine corps.

Mr. Sherman, of Ohio, said: "I think—and indeed I believe we all think—that the assumption by the authorities of the power to give

bounties was without law. It was probably the greatest stretch of power that has been exercised during this war. I do not know whether it was necessary or not. I think it was not necessary. I believe that if the authorities had in good faith, commencing last March, enforced the law which was provided for them according to the terms of the law, by the month of July they would have had the army filled up. There is no doubt of it, in my judgment. They seem to have delayed action, to have put it off from day to day, showing timidity, anxiety, fear of the people; deterred at one moment by the mob in New York, at another by threatened political movements in other parts of the country; and finally, in October last, they fell upon the measure of offering bounties without law.

"This section of the bill, if it passes, will, in my judgment, involve the expenditure of over one hundred million dollars. There are three hundred thousand soldiers called for. The bounty offered to veterans is \$400 each; to other persons \$300 each. Counting one hundred and fifty thousand, or one-half the number required, as veterans—Senators can figure it up for themselves—and it amounts to over one hundred million dollars—an immediate demand on the Treasury of the United States. This money has not been paid out; no portion of it has been raised except the \$12,000,000 paid in as commutation money."

Mr. Wilson, of Massachusetts, followed, saying: "Mr. President, I think the passage of the first section of this bill, with the limitation put upon it, that it is only to continue till the fifth day of January next, will save money to the Treasury of the United States. I agree with the Senator from Ohio that the offer of these bounties by the Government was made without authority of law. The Government had no authority to offer bounties for any persons to enlist beyond the extent of the amount already received as commutation. But, sir, there had been a great deal of misrepresentation in the country in regard to the enrolment act, or conscription act, as some choose to call it. Its results, as well as the act itself, had been misrepresented. It was said to be a failure. Sir, it was not a failure. If not a great and eminent success, it was no failure. The Government made a draft of about one-fifth of the persons enrolled between the ages of twenty and thirty-five years in some of the States. The Government undertook to raise a class of very perfect men. The Government said that in the volunteer service a great many men had been enlisted who had broken down after a few months' service; and that we ought to have nothing but perfect men. They made, I think, one hundred and twenty-four causes of exemption; and I undertake to say that any enrolling board could let off nearly every drafted man under these exemption clauses. About one-fourth of all the persons drafted throughout the United States were held to service.

About sixty thousand men were placed in the service, either as drafted men or as substitutes, and about forty thousand men paid the commutation, and the Government was authorized to offer bounties to that extent, which would raise forty thousand men, and no more.

"The Government then, instead of going on and making another draft, in which, beyond all doubt, in drawing the same number of men, they would have obtained at least twice the number of soldiers or twice the amount of money obtained by the previous draft, called, on the 17th of October, for three hundred thousand men, promising to pay veterans a bounty of \$400, and other persons \$300. Supposing they obtained the men, one-half from each class, here was a promise of \$105,000,000 as bounties. The Government had then about nine million dollars paid in as commutation; the Government has now about twelve millions. That was all the money the Government had to pay the bounties promised.

"Now, sir, the first section of this bill undertakes to legalize and to fulfill the pledge made by the Government to the people of the country and to the States. The proposition of the Government is limited to the 5th day of January next. The promise was that persons enlisting before that day, the 5th day of January, should have these bounties. We propose to accept the proposition and to fulfill the promise; but we propose to close it on that day and fall back upon the bounty of \$100 for persons who are drafted or who volunteer after that day, not allowing it, however, to substitutes. We require the man who is drafted to pay the whole sum himself to get a substitute.

"I agree with the Senator from Ohio that we ought to have great care in regard to our expenditures and to the condition of our treasury. From the first hour of this war I have felt that our great danger, if we had any danger at all, was in obtaining money and not in obtaining men, and I am more convinced of that to-day than ever. As long as our currency is sound, as long as we can meet our obligations promptly, as long as the general business of the country is prosperous, we can maintain and prosecute this war. Had the treasury failed, had the currency of the country broken down and interrupted the trade and productive industry of the country, then we should have had at once a strong opposition to the Government. The condition of the treasury of the Confederate States is full evidence to the whole world that they must go down, that they cannot succeed. They are weaker in that than in their armies. I agree, therefore, with the Senator from Ohio, that it is very important to be careful as to what sums, either for bounties or any thing else, we pay in carrying on the war. It is important that we should be careful to keep the credit of the Government sound, the treasury full, the currency solid, and the productive industry of the country prosperous."

Mr. Hendricks, of Indiana, said: "Mr. Presi-

dent, the debate which has sprung up does not really seem to me to be upon that amendment, but upon the question which has been raised between the Senator from Ohio and the chairman of the Committee on Military Affairs. Upon that question I desire to express the opinion that Congress ought to encourage volunteering, rather than to rely upon what, of necessity, must be an unpopular measure of the Government—the draft. I think we have had evidence enough in the country that the army can be supplied with men by volunteering; and although the Senator from Massachusetts will not admit that the draft has been a failure thus far, he will hardly claim that it has been a success. Out of 125,000 drafted men, there went into the service about 6,000; about 20,000 paid the \$300 commutation; and 37,394 were exempted for physical disability. The Senator says that the Department made a mistake in the number of causes of exemptions for physical disability. I am not prepared to discuss that question with the Senator. He is better informed on the subject, unquestionably, than I can be; but that is a very large exemption for physical causes. According to this report, there paid commutation money, 20,188; furnished substitutes, 10,402; failed to report, 17,940; exempted for other causes, about 32,319. Under the draft, therefore, in New England, Pennsylvania, and New York, up to the 1st day of November, the Government realized about 6,000 troops who were drafted; 10,000 substitutes; and perhaps 20,000 volunteers, who were induced to volunteer under the policy adopted by the Administration in paying \$300 bounty—the \$300 that were paid by those who were drafted. I think that cannot be claimed as a success.

"But, sir, from the commencement of this war every effort on the part of the Administration to secure troops by appeals to the patriotism of the people, by appeals to their desire to provide for their families before they enter the service by giving them bounties, has been a success. At least, prior to the issuance of a proclamation by the President, which I shall not now discuss, there was no failure in the volunteer system. I claim that it was a success; and I may venture to say an army of volunteers is a better army than an army of conscripted men. They go freely, cheerfully, and they serve freely and cheerfully.

"What then is the plain duty of Congress? With these facts before us, is it not our plain duty to undertake to fill up the army by volunteering rather than by a draft? I do not ask that the draft law be repealed, for I know that such a motion in this body would not prevail; but it were better that it were repealed, in my judgment, and that the Government should pay liberal bounties to the soldiers in advance of their going into the field, in order that they might well provide for their families during their absence."

Mr. Fessenden, of Maine, was of a different

opinion. He said: "I believe there has been rather a mistake in the policy of the authorities with reference to this subject, and a mistake, too, on our part. I believe that the continued offer of bounties, and the continued increase of bounties—and they have been increasing almost geometrically from the beginning—instead of having a tendency to increase and promote the patriotism of the people, has had a tendency to diminish and destroy it. The effect has been, in my judgment, carried on at such a rate as it has been, especially in my section of country, to turn the attention of the people from the fact and the consideration that every man owed to the Government when necessary his personal service, which as a citizen he was bound to render, to the question, 'How much can we make by holding off a little longer before we volunteer?' And the system, as now proclaimed, going on as it does, must necessarily be one that increases and enlarges from day to day.

"The question then arises, do you mean to keep up that system and abandon your law? The law either ought to be enforced or abandoned. We ought to have a draft or else strike the law from our statute book. We adopted the policy. Why? Because we foresaw that after this war had continued so long the result would be that we should find it difficult to obtain men. With all the patriotism that exists in the community, when it comes to the individual case it is found hard to raise the number of men required. Now, will you abandon at once the idea, and say to the people that you have abandoned it; that there is no such thing in the United States of America as an obligation resting on every able-bodied citizen to serve his country, when his country needs his services? Sir, we cannot do so. It is the idea upon which that law was predicated, upon which it was passed, to give the Government the power to command the services of our citizens; and, in my judgment, it should be enforced. Spend the money you get from exemptions in bounties for the purpose of filling up the ranks; but, sir, there is no seeing how long the credit of this country can continue what it is if we are to go on recklessly and spend money as if we had a profusion of it and more than we knew what to do with.

"Now, sir, in my judgment, the failure of the draft, so far as it has been a failure, has been owing to the very clumsy manner in which the thing was attempted to be carried out, arising out of these exemptions for cause more than any thing else."

Mr. Lane, of Kansas, said: "Mr. President, suppose we resort to a draft alone, and retain the \$300 exemption clause. I show you that we cannot, by any possibility, raise an army under any system of draft which retains that clause. We cannot fill our armies under any conscription law which retains the \$300 exemption clause. If we rely upon volunteering alone, we may, and perhaps will, fill our ar-

mies; but is it just, is it fair and honest to the whole people, that the loyal, the true, the patriotic, the Union-loving shall be called again and again to volunteer and to shed their blood in defence of the flag, and to find martyrs' graves upon the battle-field, while the disloyal, the traitorous, and the sympathizers with treason refuse to go into the army, and remain at home to denounce every measure of the Administration calculated to suppress the rebellion?"

Mr. Howe, of Wisconsin, followed, saying: "The Senator from Maine has announced a principle here which I welcome with my whole heart, as it is about the first distinct enunciation of it I have heard in the Senate of the United States since I have had the honor of a seat here. I was particularly gratified with it. It was this, that every citizen of this Republic owes to its Government the utmost of his ability for the maintenance of the Government during this war, whether of money or of personal service. It is not a matter of choice, but it is a matter of duty. It is a debt due, and it ought to be paid, and the Government, as the agent of the whole people, ought to insist on the payment of it. I am glad to hear that doctrine. It is a very late day to proclaim it."

"But now, sir, if this is a correct principle—and I do not think it will be controverted here when it is once stated as clearly and as forcibly as it has been by the Senator from Maine—this follows, that whether you want an army of five hundred thousand or five million of men, it is the duty of every man to contribute to the composition of that army equally in proportion to his ability. How shall that be done? The Senator from Indiana has argued that the most popular if not the most equitable (I think he said the most equitable) way of doing it was to leave it to the choice of every man whether he would become a soldier in that army or not. Now, I must differ from that proposition. I do not think it is the most equitable, and I do not think it is the most popular method of raising an army. We have seen both methods tried, and that has proved the most successful, I am very willing to admit, so far; but it has had the most thorough trial; the latter method has not had a thorough trial by any means, not even a fair one."

Mr. Collamer, of Vermont, expressed his views as follows: "Mr. President, it is not to be disguised that the burdens in this war upon the people of this country consist in two things: one is in rendering personal service, and the other is in paying money. Now it is attempted to separate these things altogether. The men who are of that age and ability to be subject to the performance of military duty and capable of it, owe their services to the Government; and as many of them as the Government needs should be called out, and they should render the service. All that is very well; I find no fault with it; but let us see how it works."

"Here you repeal all essential bounties; you say to the men between twenty and forty-five years of age, 'You owe duties to this Government by the way of service, and you shall render them;' and another thing you say, too, 'You shall render them without the rest of us who should pay money, paying much of any thing to you.' It will not do, say gentlemen, to go on giving bounties; it will be so expensive that we cannot do it. What is it, then? Essentially that we will put the whole duties upon the men between twenty and forty-five—the duties of rendering service without any compensation, without our contributing anything. I do not like that. I prefer to bear my part of what shall be an honorable and fair bounty to these men. Almost any of them can earn infinitely more at home than we pay them. Can you expect that people are so patriotic that they are more willing to be shot at for twenty dollars a month than to stay at home and receive fifty dollars for common labor? Is it a reasonable request? Not at all. Now, I say that in the form of bounties, or in the form of pay (and it is not very material to me which, though I believe bounties will quickest fill the army), we should take measures to fill up the ranks. I am willing that the Government should fill the army by offering these bounties. I do not like the idea of saying, in this bill, 'You may continue the bounties to enable you to fill up your quota, but you shall not do it after the 5th of January.' What if the Executive finds that the army is being filled up rapidly, and will, under these laws, fill up rapidly, and he chooses to extend the time for the draft? Should he not have that privilege? Should not the influence of such a law be upon the people to enable them to fill up their quota? I think so."

The amendment of Mr. Grimes failed. Various other amendments to the bill were considered. Meantime a deficiency bill, appropriating \$20,000,000 for bounties already due, was passed in the House and sent to the Senate, where it was passed at once. While under consideration Mr. Wilson, of Massachusetts, said: "I tell you, sir, our conscription act has done more to raise and elevate the sentiment of this nation than any other act we have passed. When that act was passed, you had a wild, unreasoning prejudice against using a black man to fight the battles of our country. But when people who were filled with these prejudices saw that they must go themselves, and bare their bosoms to the shot and shell of the enemy, they learned that the black man's blood was no more sacred than their own, and that they would as soon have a black man stand up and fight the battles of the country as to do it themselves. The most popular thing to-day is to crowd black men into our armies. Sir, there would be a shout of joy throughout the nation in which our whole people would participate, if the intelligence should go out to them that we had a quarter of a million black men

organized and armed to fight the battles of our country."

Several sections of the bill relating to bounties, were thus disposed of, and the bill itself was laid on the table. Subsequently a joint resolution was passed to continue the bounties.

The Senate, on January 8th, proceeded to consider the bill to amend the "Act for enrolling and calling out the national forces." Several amendments were considered, one of which was the following, reported by the Committee on Military Affairs:

And be it further enacted, That so much of the act entitled "An act for enrolling and calling out the national forces and for other purposes," approved on the 3d day of March, 1863, as authorizes the discharge of persons drafted into the service of the United States under the authority of that act, upon the payment of a sum of money not exceeding \$500, be, and the same is hereby repealed.

Mr. Sumner, of Massachusetts, offered an amendment to this amendment, which he thus explained: "This proposition, as I have said, contains three different elements: first, that no person shall be allowed to furnish a substitute; secondly, fixing the minimum commutation absolutely at \$300; and, thirdly, adding to that commutation money of \$300 a ratable sum according to the income of the person drafted, yet the single object of the whole proposition is to establish a ratable contribution according to income, which every drafted man shall pay. That is not only the central idea of the proposition, but it is the single object of the proposition, to which all the other parts of it are subordinate.

"It will be observed that it will be practically impossible to require this ratable contribution, unless you declare that no person shall be allowed to furnish a substitute, and there will also be a practical difficulty in the way of it if you do not fix the standing sum at \$300, not leaving it to be varied in the discretion of the Secretary. I have, therefore, in preparing this proposition, introduced these two other elements as simply subordinate to the main proposition, the object being, in one word, to equalize the burden of this commutation where a person is drafted, that it may at least seem to be more equal even if it be not really more equal, and that, in one word, it may be popularized to the country.

"Some persons have said to me that I proposed to require a very large sum from certain persons who may be drafted, but I ask Senators whether any sum which is reasonable can be too large for a man of wealth to contribute if he should be drafted. Take, for instance, a man who has an income of \$5,000, or of \$10,000 if you will, what is the commutation money of \$300 to him? It is nothing. What is an additional sum of ten per cent., or twenty per cent., on that income? I say again, it is absolutely nothing as a commutation for the service which the country has a right to ex-

pect from him. He escapes from the hazard of wounds, of disease, and of death, and he also secures to himself the full employment of his time during the period of one, two, or three years for which he may be drafted. Is there any thing that he can reasonably pay which can be considered as too much?"

Mr. Clark, of New Hampshire, said: "I think the amendment of the Senator from Massachusetts goes upon a wrong theory. The Government asked for men, and we passed the enrolment law, and we inserted the commutation clause to relieve some people and enable them to get substitutes; but the idea was that the men should be furnished to the Government; that a man should either go himself or furnish a substitute, or give the Government money enough to obtain a substitute for him. The Senator's amendment strikes at all idea of a man's getting a substitute for himself, and puts it entirely into the hands of the Government. The idea of the bill was that a man should pay, not a percentage of his income, be he rich or be he poor, but should pay the Government enough to get a substitute, not exceeding \$300. The bill declares that the money is to be applied for the purpose of getting a substitute. If the Senator's amendment be adopted, you take from every individual the chance of getting a substitute for himself, and leave it entirely for the Government.

"The operation of the bill in my section of the country was that a great many men who were drafted felt an inclination to go, or to furnish somebody for the service where they could not well go themselves. They said, 'We will not pay this \$300; we do not want to shirk it; it is not the money we care for; but we will put something else to the \$300, and get a substitute, and put him into the army for us, so that the Government shall have a man.' The result was, in my State, that we furnished more men under the draft than any other State in the Union; we furnished fifty per cent. of the call."

Mr. Sumner subsequently modified his amendment so as to allow a drafted man to obtain a substitute.

Mr. Collamer, of Vermont, followed, saying: "I believe it was very generally understood in the Senate, that the great object of putting in that limitation for commutation was for the benefit of men of moderate circumstances, to enable them if they pleased to pay a sum of money for which we believed substitutes might be procured. Further, it was with a view to fix a limit to the price of substitutes in the market, that it should not go above that, because if the Government would take \$300 to procure substitutes with, nobody would give any more in the market, and the Government could give no more, but would get them for that. That was the object.

"Now it is suggested that that provision has in some measure defeated or prevented our obtaining by the draft the number of men

which it has been expected would be obtained. I do not think so. It is true the draft did not result in bringing into the field so many effective men as had been hoped for, but it is not attributable to this cause. Let me state some of the causes to which it is attributable.

"In the first place, somebody made out a schedule of infirmities for which a man was to be excluded as being an infirm man, not of sufficient physical ability. On reading it over it looked to me as if some one had undertaken to show what he knew of the most recent medical learning, by finding out all the probable infirmities to which the human frame could be subject, and especially all the most modernly invented diseases, or at any rate those for which new names had been invented. In short, very few men were to be found who could escape falling within some one or other of the various calls for infirmities, unless indeed it might be the man who could not find any thing else, and said at last that he was very much subject to measles and wanted to be excused.

"An unexpectedly large number were excused under that. In the next place, it was found that a very large proportion of our able-bodied young men were dependent on their parents for support; and, what was worse than that, it was ascertained that the parents were dependent upon them. Nobody had ever found it out before particularly; but there was a large part of these poor dependent young men dependent on their parents for support, and they showed somehow or other that their parents were dependent on them for support. That was worse yet. This was a very unexpected condition of things, and very large numbers got off on that plea. Between the infirmities of body and the infirmities of parents and children and their relative dependent condition, which came within the act, the number who were obtained under the act was comparatively few.

"I think the mode of administering the law tended very much to produce the effect that you did not get men readily with the \$300 which persons were permitted to pay in. If the people had been told plainly and directly in the beginning that paying the money or furnishing substitutes would be the same in effect, they would not have given any more, and the Government would not have given any more than \$300 for a substitute.

"Such, Mr. President, was the manner of the execution of this law, and I cannot but further say that I do not see why the law, even as it resulted in the draft, was any failure at all. What was the amount of the draft? They proposed to draft about one-fifth of those enrolled. The Senator from Indiana the other day gave us the numbers as they were returned. I do not remember the exact numbers; but that is not material. The general result is, that leaving out of view the exemptions, of which I have already spoken, the

Government got some twelve million dollars commutation money, and between forty and fifty thousand men. Why did they not go on, then, and draft another one-fifth, get forty thousand men more, and \$12,000,000 more; and, in the mean time, why did they not use the \$12,000,000 which they had got from persons who paid the \$300 each, for the purpose of procuring substitutes? Why did they not go on in this way? If it had been done, would it not have been effective? If it had been as effective as the first draft, the result would have been to bring all the men we wanted, and we should not have to go through the whole five drafts to obtain the number of men desired."

Mr. Lane, of Indiana, presented the following view: "What is our present legislation upon the subject? It is just this: that the able-bodied persons who are deemed subject to draft by the board of enrolment, shall either give personal service, hire themselves a substitute, or pay \$300 commutation in lieu of a substitute. By the provision of the bill reported by the Military Committee, that \$300 commutation exemption is proposed to be stricken out. Now, what is the effect of that \$300 exemption in view of the present legislation upon the subject? Under the provisions of that bill, thirty-five thousand men paid their commutation money, and received a certificate of entire exemption for three years; and the conscription law was enforced in but a small portion of the States. If it had been enforced in all the States, instead of thirty-five thousand men who have to-day in their pockets certificates of exemption for three years, we should have had seventy-five or one hundred thousand men who would have been exempted under the operations of that law from any draft for three years. That is the effect of it. If thirty-five thousand are now exempted and exempt for three years on the payment of \$300, if you enforce the conscription in all the loyal States, at each return of the draft one hundred thousand men may procure their exemption for three years. The report of the Provost Marshal General will show that we have less than half a million of men to draw from. Then, if we have continual drafts, and exempt at the end of every draft one hundred thousand men for three years, how long will you have any basis to draw from? You exempt these men for three years upon the payment of \$300. That is one of the effects of this system."

Mr. Wilson, of Massachusetts, followed, saying: "Mr. President, although my committee instructed me to report the amendment, I am opposed to the repeal of the \$300 commutation clause. I know that it was put into the act by Congress for the benefit of the people of the country, to make that law bear as lightly as possible upon the poor, toiling people. It has been demonstrated by experience so to operate. Nobody questions that now. Nobody rises in Congress now and denounces that provision as a

discrimination against the poor and in favor of the rich. I believe that the people of the country, by an uncounted majority, are against striking out that provision of the law. That is my conviction; and I believe we ought not at this time to do it. I do not see any necessity for doing it.

"Instead of striking out this \$300 provision, which was at one time so misunderstood and so misrepresented, but which in its practical workings has proved so favorable to the poor and toiling men of the country, so much so that it enabled forty-seven thousand of them to pay commutation—instead of repealing that clause, I would amend this bill and decrease the time of service from three years to eighteen months. I believe we ought to do it."

Mr. Cowan, of Pennsylvania, said: "I hope, sir, that the present pending amendment will not be adopted. I have become satisfied in my own mind from every thing I have seen and heard in relation to the draft, that the law is now in this respect just about as well as we can make it, and what is better, the people now understand it and its operation. That is a great deal in any law, if it is once understood and accepted by the people.

"I agree with the honorable Senator from Massachusetts, that the time for which the President calls for these men is too long. Three years is too long a term; and that was really the main objection on the part of the people to serve under the late draft. If it had been one year, or, if it had been eighteen months, I think the response would have been such a one as would have gratified the country; but to ask a man to serve for three years in the army is about equivalent to asking him to go for a lifetime; because, in three years the chances are very much against his returning safely in life and limb."

On the 12th, the bill coming before the Senate, Mr. Sumner again modified his amendment, saying:

"The single proposition upon which the Senate will now vote, will be whether they will make the rich man who is drafted, pay more than the poor man, or whether the two shall be treated on an equality."

Mr. Sherman, of Ohio, replied: "The amendment of the Senator from Massachusetts proposes to establish a new income tax, to be imposed only upon those who are drafted. In this view of the subject, it is an unjust and unequal tax, which makes the burden of the draft more severe than before. If the Senator desires to impose an income tax for the purpose of raising a special fund to hire substitutes, that tax ought to be imposed not only upon the man who is drafted, but upon all wealthy citizens.

"It is, Mr. President, impossible to mingle these two systems. Every man holds his property subject to the right of Congress to levy taxes; and the power of Congress extends to seizing the whole of all the property of all the

citizens. There is no doubt about that. Every man, also, who is able to render physical service, is bound to render that service whenever called upon by Congress. Congress has the unlimited power to raise armies, and Congress may by law prescribe that every man able to render service shall enter the Army of the United States. These are two distinct duties, one to render physical service, and the other to pay taxes. You cannot blend these two together. They operate upon different classes of individuals.

"There is no subject that ought to be more carefully considered by Congress before it is finally acted upon, than the amendment of the enrolment act. There are difficulties in the way. If you retain the commutation clause, you meet the objection made so ably by the Senator from Indiana. If you allow a man on paying \$300 to relieve himself for three years from the operation of the draft, you may leave yourself without the basis of future drafts; you may, by enforcing the conscription law, be able to raise one army of three hundred thousand men; but in doing so, you exhaust the basis of all future drafts and all future reinforcements. We dare not do that, we must not do it, because we do not know what the exigencies of the country may demand of us. It may be necessary for us to have a broader and more general levy. The argument of the Senator from Indiana satisfies me that the present commutation clause ought to be modified to some extent.

"But, on the other hand, if you make your draft arbitrary, and allow no man to be exempted, and require every one to render military service, you will incite resistance to the draft. You will not justify it, because nothing will justify resistance; but you may excite it. If you make your draft arbitrary, so that the citizen must in all cases be seized and forced into your ranks, compelled to hire substitutes or to render military service, you make the difficulties in the way of enforcing the draft very great."

Mr. Sherman then proposed an amendment, the effect of which, if adopted, he said would be "that every person drafted would have the right to hire a substitute. If he hired a substitute from among those not subject to draft, as unnaturalized foreigners, persons under twenty years of age, or men who, by having already served are exempt from the draft, in such case the substitute operates to exempt the drafted person from the entire draft for three years; but if the drafted person hires a man who is himself subject to draft, they then just change places, the drafted man again takes his place on the roll where his substitute stands, and the substitute renders military service to the Government. In this way the Government loses nothing. The number of persons enrolled and subject to military duty continues the same. There can be no exhausting the roll until every man has rendered military service. The person who has employed a substitute who is himself

subject to draft, would be liable to be called upon at the next draft. He would take his chance precisely as his substitute would have done, and that is the way it should be. On the other hand, the \$300 commutation clause is retained, so that a man whose business will not allow him to go, or who, for any reason, cannot go, may pay the \$300; but he is again to take his place on the roll, and be subject to future draft. With that \$300 a substitute may possibly be employed by the War Department; but if not, the War Department may go on and make another call, and the person should again be subject to military duty."

Mr. Collamer, of Vermont, replied: "I suggest to the Senator from Ohio, whether it would not better carry out the view which I cannot but think he entertains, to say that if a man is drafted and furnishes a substitute or pays his money, he shall not be subject to draft again until all the persons who are enrolled have been drafted. I would not take his name out. I would leave it in for the purpose of keeping up the whole number, so that the chances should be the same; but the provision I suggest is that such a man, if again drafted, shall not be subject to be called upon to perform duty under that draft until all the persons enrolled shall have been drafted. That might create something like equality and justice, and would not prevent the taking of such a man when the necessities of the country require it."

Mr. Sherman answered: "I think there is no injustice, and the Senator will see that there is no difficulty in enforcing my proposition, if he will allow me to illustrate my meaning by a supposable case. Suppose that he and I are subject to draft, and I am first drafted. It is not convenient for me to go, and he would go for \$300. I employ him to take my place and go into the service of the country, and pay him \$300; and I take his place on the enrolment, subject to future draft. We exchange places, precisely as if his name was drawn and mine remained. Is there any thing wrong in this? If by the turn of the wheel in a future draft my name should be drawn again, I only stand in his shoes; I take his place. I purchase a temporary and perhaps a permanent exemption for \$300, and the United States lose nothing."

Mr. Collamer said: "It is not that, but it is the other proposition I am talking about. I am talking about the taking a man's \$300 and subjecting him to be drafted again when you do not pay him back his money; and also about the drafting of a man who has furnished a substitute."

Mr. Cowan, of Pennsylvania, said: "The present law has been a good deal considered in my State by the legal profession, and that section which allowed a man to be exempted for the time for which he was drafted by furnishing a substitute, even though the substitute himself was liable to draft, was always thought to be unjust. But the fair construction of the commutation clause, as it is called, was that it

exempted the person paying it from any draft made to fill that call. The President, in the first place, calls for five hundred thousand men. The wheel is brought out and five hundred thousand men are drawn, or a certain number of men take their chance to be drawn, under that call. Those who are drawn and who do not go into the service pay their \$300. That exempts them from being drawn for that call. If it should become necessary the next year to raise five hundred thousand other men, they would still be liable to be drawn again, according to a fair construction of the law; and I may say this is based upon the construction given to the old law. Under the act of 1795, the act of 1813, and under our act of 1861, the person drawn, in order to escape actual service, if he desired it, was court-martialed and paid a fine. It was not that the Government offered to the drafted man to commute his service for money, but he was punished by a fine for refusing to appear, when drawn, at the place of rendezvous. By the payment of that fine he was exempted from any further drawing under that call. It was perfectly impossible, indeed, that he could be drawn, or that he could incur any risk of being drawn, under that call, because the call was filled before the court-martial imposed a fine upon him.

"It was a little unfortunate, perhaps, when we imposed this \$300, which is really a fine, and which ought to be considered in the nature of a fine for not appearing when drawn at the rendezvous, that it was also stated that it should be used to procure a substitute. I think that was unfortunate, because it introduced another and a different idea from that which pervaded the old law. It introduced the idea that you might commute your service for money. The old law repudiated that idea and called it a fine, penalty, punishment—punishment for not doing a duty which you are obliged to do, and which you and all men owe to the country. I think the idea of a fine or penalty should still be preserved, and therefore I am in favor of the amendment of the Senator from Ohio, if the word 'draft' in that amendment shall be changed into the word 'call,' or if it be understood as it used to be that 'draft' and 'call' are synonymous."

Mr. Collamer, of Vermont, followed in answer to Mr. Lane, of Indiana, saying: "When we have once taken that in as one of the elements of our argument, that the money is paid to procure a substitute and should be enough to do it, and we have said that \$300 properly managed would do it, then we take it that that is sufficient, that that will supply a man, and therefore amounts to the same thing as furnishing a substitute."

"Now, with the operation of that clause, the element of draft can never be exhausted. In the older States of the Union, and in the older States of Europe, the number of men subject to and capable of performing military duty is just about one-fifth of the population. Instead

of being twenty per cent. in some of our States, as appears by the enrolment, and as appears by the returns of the census, it is twenty-two and twenty-three per cent. But take it upon the average that the enrolment, if properly made, would include one-fifth of the population. What is our population? I take it it is considerably more than twenty millions. Then we should have four millions on the enrolment. Now, take the worst case that can possibly happen, that one-half of those men on the enrolment hire the other half for substitutes, and you would have two million men in the field. I merely state this as a matter of figures, as a matter of certainty, to show that the elements of the draft could not, by any possibility, ever be exhausted by allowing one man to hire another as a substitute."

Mr. Lane, of Indiana, replied: "There were in round numbers enrolled a little over three millions. The last draft was for three hundred thousand men. Of that number one-third were rejected as physically incompetent. That is not stricken out of the Senator's calculation. Another third, or almost another third, bought themselves off by exemption. That is not stricken out of the Senator's calculation. Now, how often will you repeat that draft before you exhaust the basis?"

Mr. Harris, of New York, followed: "It is true that out of the four hundred and fifty thousand men drafted one-third were exempted for physical and mental disability, and nearly one-third more as being aliens and non-residents, and already in the service, and excused on account of their social and domestic condition; so that really but about perhaps one hundred and fifty thousand of the four hundred and fifty thousand would be held; and of this number it is further true that about twenty per cent. did not appear, so that we did not get by the draft any thing like the three hundred thousand men who were called for. That is true; but it is still true that the call for three hundred thousand men may be repeated six times before this basis is exhausted. As I was about to say, I cannot contemplate, I will not contemplate, such a condition of things in our country as that we shall have occasion to repeat six times a draft for three hundred thousand men. All we have to do, in my judgment, is to carry on vigorously the efforts now being made to fill up our army by recruiting and by drafting, prepare for a vigorous and energetic campaign in the spring, and we shall never have occasion for another draft."

The amendment of Mr. Sumner was further discussed by himself and others and lost—yeas, 15; nays, 25.

The question now came up on the amendment reported by the Committee on Military Affairs, as follows:

And be it further enacted, That so much of the act entitled "An act for enrolling and calling out the national forces and for other purposes," approved on the 3d day of March, 1863, as authorizes the discharge

of persons drafted into the service of the United States under the authority of that act upon the payment of a sum of money not exceeding \$300, be, and the same is hereby, repealed.

To this Mr. Wilson, of Massachusetts, offered an amendment, providing for a commutation, more or less than \$300, according to the resources of the drafted man.

Mr. Grimes, of Iowa, said: "I should like to know from the chairman of the Committee on Military Affairs, before we have a vote on this question, what is the probable number of colored soldiers now in the service, or that are likely to be in the service under the attempted organizations which I understand are being made under the authority of the War Department. I should like to know whether or not any steps have been taken to enroll the colored men in what are known as the 'border States,' and if so, when those steps were inaugurated."

Mr. Wilson replied: "I understand that we have fifty thousand colored troops enlisted. It may be that we have increased that number considerably within the last two or three weeks; but it was understood about the time of the meeting of Congress, some four weeks ago, that we had about fifty thousand men. We are increasing them now at a more rapid rate than at any other period, for the reason that we can reach them better. We have for the last few weeks been doing well in Maryland. We are doing well in Eastern Virginia. General Butler told me the other day that since he had entered his department he had raised about three thousand. We are doing fairly in Missouri, but not so well as we ought to do there. We are raising colored men in Tennessee and in some other parts of the country. The Government has not pressed this matter of raising black troops with so much vigor as some of us think it ought to have done; but there has been great difficulty in reaching these people. They have been moved away and kept out of the reach of our armies as far as possible. They have now found their way in, and we are enlisting them. I think that as our armies advance we shall raise many more of them; and I am sure that the policy of the Government now being fixed, and the public sentiment demanding it, every effort will be made to enlist colored troops; for, sir, if there be any thing in the prosecution of this war that the people are in favor of, it is the raising of black troops to fight the battles of our country. Everybody now demands it.

"The Senator from Iowa (Mr. Grimes) put another question; and that is, whether the Government has enrolled the colored men in the border States. I understand that in Maryland they have done so; I believe they have done it in Kentucky; I speak now of the free-men, not the slaves. I am told that that is the case. I do not know certainly whether it be so or not. At any rate, there is no doubt that the Government has the power to do it. I am told that in the State of Maryland the Government

is enlisting slaves without asking the consent of their masters, and they have the same privilege in the State of Missouri; but I am told that this is not so in the State of Kentucky. The Government can go into any part of the country and take our sons and enlist them without asking our consent, but the Government of the United States cannot step into the great State of Kentucky and enlist a slave without asking the consent of his master. Sir, I would enlist him if I chose to do so, and ask no consent of the master anywhere. The Government can take your son or an apprentice belonging to you without your consent, but it must ask a slavemaster for his consent to enlist an able-bodied man into the service of the country. It is a thing which ought not to be submitted to a day, and it ought not to be acted upon a day longer."

Mr. Brown, of Missouri, asked under what authority the War Department paid the master of the slave where the latter enlisted?

Mr. Wilson replied that there was no express law for it; and that he could not answer unless it was, that they construed the law giving authority to use the money received from persons who had been drafted, to authorize its appropriation in that manner.

Mr. Sherman, of Ohio, said: "The Secretary of War has clearly the power to use that money in procuring substitutes, and the law makes no distinction between white and black."

Mr. Johnson, of Maryland, said: "The Senator from Missouri (Mr. Brown) asks what law there is to justify the Government in paying anything to the masters of slaves who are taken into the service of the United States. It is true that although the term 'slave' is nowhere found in the Constitution, slaves are evidently considered as property within the meaning of the fugitive clause and within the meaning of the clause which prohibits to the people of the United States the authority to change the Constitution at all in that particular provision of it which limits the authority of Congress upon the subject of the foreign slave trade to the expiration of twenty years from the adoption of the Constitution. They were considered as property, and were intended as property to be protected by that clause; and they have been considered as property and are now considered as property in your tax laws. So far as the direct tax is concerned they are considered as property. They are considered as property by the laws of all the slave States. They are subjects of distribution; they are liable for the debts of the master; they are subjects of bequests, they are subjects of sale, and are in every respect upon the condition of property; but notwithstanding that, they are no doubt also to be considered as in the character of persons.

"I suppose no one will for a moment hesitate in admitting that although they stand in the relation of property in a certain sense they also stand in the relation of persons to the Govern-

ment, because I suppose every one will admit that they could be guilty of treason as against the United States. If the slaves in the United States were to do as the white men in the southern States have done—I do not mean all the southern States; thank God, I am not obliged to say so—if the slaves in the seceded States had without the consent of the white men risen in rebellion and resisted the laws of the United States by arms, or if they were now found aiding the traitors in the seceded States in their effort by force of arms to destroy the Government of the United States, they might be considered and treated as traitors. In other words, although slaves liable to all the relations growing out of that condition, they are persons owing allegiance to the United States and consequently bound to abstain from every thing which is a violation of allegiance; and if they were to go to the extent of levying war upon the United States or of giving aid and comfort to the enemies of the United States, they might be dealt with as traitors.

"But it by no means follows from that that they are not to be esteemed as property, and that the master is not to be paid for them as property. The practice in Maryland, as I get from sources of information that I know can be relied upon, is that the recruiting officers, white officers, go to the homesteads of the masters, and not only enlist the slave without the consent of the master, but without his own consent. The poor ignorant black man who knows not to what extent the evident power of the Government may be carried, is told that he must enlist, and he enlists under what may be considered and what actually is compulsion. Whether he would enlist (as I think he would in a majority of cases) voluntarily, under the influence of no threat, or under no fear, is a question not submitted to him at all. And not only is that done, but the enlisting officer informs all the slaves upon the plantation, whether able to do duty in the field or not, old men and children and women, that they are all free; and the result has been that the whole of that population which has been able to get off has gone off. That the State will be benefited by the effect of it in the end, I have no doubt; but at the same time it is due to my own convictions of what the Constitution is, and the rights which the people of Maryland have under that Constitution, to protest without meaning to find fault with the Government; to protest, not in any acrimonious sense, against this mode which they have adopted to get the slaves of Maryland in the armies of the United States."

Mr. Grimes, of Iowa, in response to the remarks of Mr. Wilson, followed, saying: "I am very glad, sir, that I addressed the inquiry that I did to the Senator from Massachusetts (Mr. Wilson). I am rejoiced at the response he has given to it, and I think the country will be glad to know that the Administration has established a policy in regard to the recruitment of colored persons. I have heard for the last twelve

months giving-out that such was to be the policy of the Administration, or indeed that it actually was; but the results which have been accomplished have never satisfied me that that was their real genuine intention, for I have always believed that if there had been the proper agencies used, if there had been the proper degree of practical sagacity exhibited by the agents who were selected by the Government to raise colored regiments, there could have been two hundred thousand colored men marshalled into the field to-day, and I believe it now. I believe that there might have been, and ought to have been, two hundred thousand colored men in the field at this moment, and that instead of our being compelled to pass a bill appropriating \$20,000,000 for bounties, as we have done to-day, and passing a bill to amend the enrolment act, we need not have required a single new white soldier to enter the army."

Mr. Wilson, of Massachusetts, again said: "Mr. President, in the State of Maryland we have raised a large number of men under the lead of General Birney, a son of James G. Birney, who inherits the principles of his father, and who is one of the most devoted and faithful officers we have in the service of the United States. He has officered those regiments from men who have passed before this board, and in my judgment, derived from the information given by him and by others, no regiments in the service have been better officered. In General Butler's department, he said to me the other day that he had raised since he went there, only a few weeks ago, three thousand colored men. They had some raised there before; General Wilde had raised a brigade in North Carolina. General Wilde belongs to that class of men who know what this war is about, and whose heart is in it. He believed in raising these troops, and he had them well officered. We are raising in the State of Tennessee a large number of men, because there we have the influence of Andrew Johnson, who is for raising these troops and for making Tennessee what she ought to be, a free State. Down in the department of the Gulf we have raised probably twenty thousand black men, and we have officered them as best we could; perhaps they are not so well officered there as the regiments nearer the city of Washington, whose officers have passed through an examination before this board. Still we are improving there; and everywhere in the country, with possibly the exception of the States of Missouri and Kentucky, the raising of colored troops is progressing finely.

"Little has been done in the State of Kentucky, for the reason that Kentucky to-day is the only State in the Union that maintains the cause of slavery or carries its flag. Delaware has taken her position; Maryland has taken hers; and so have West Virginia and Missouri. Tennessee, which was excepted from the proclamation of freedom, is taking her

position under the influence of Andrew Johnson and the patriotic men of the State. But, sir, Kentucky passed into the hands of a conservative class of politicians, who started in the first place to hold her in a neutral position, where she could dictate terms to the country. They undertook, then, to dictate to the President, but they failed, and now they are denouncing him. That class of politicians, however, is passing away, even in Kentucky. The people are ripening there as they are ripening everywhere else; and when the next opportunity comes for Kentucky to speak, I entertain not the shadow of a doubt that she will speak by an overwhelming majority, just as Missouri and Maryland and Delaware and West Virginia have spoken. I think the Government has dealt rather tenderly in not enlisting colored men in that State. If I had the power I would enlist every black free man who was willing to enlist and every slave who was willing to enlist, and ask no leave of Kentucky politicians or of slavemasters in Kentucky, but I would put them into the service at once.

"Now, sir, a word in regard to the board for the examination of officers. General Casey is chairman of the board, and I say to the Senator from Iowa what I know to be the fact, that a more true, loyal, faithful man does not bear the commission of the United States than General Casey. He is in favor of enlisting black troops, and was early in favor of it. He is in favor of giving them good officers, men qualified to command, men of personal character and individual honor. I do not entertain a doubt that the men who have passed that board are better fitted for their places than are the officers of the average white regiments of the country. I know that General Casey believes that the colored troops ought to have better officers than white troops, that they ought to have men whose sympathies are with them, who will treat them kindly, but firmly, men of intelligence and of character qualified for their positions, and I know that he has striven to give them such officers. I wish all the colored troops in the country were as well officered as the troops are whose officers have passed before the board."

The bill was again considered on Jan. 14th, when Mr. Wilson, of Massachusetts, withdrew his amendment, and the vote was taken on the amendment reported by the committee as follows:

SEC. 21. *And be it further enacted*, That so much of the act entitled "An act for enrolling and calling out the national forces and for other purposes," approved on the 3d day of March, 1863, as authorizes the discharge of persons drafted into the service of the United States under the authority of that act upon the payment of a sum of money not exceeding \$300, be, and the same is hereby, repealed.

The bill was again considered on Jan. 14th, when Mr. Wilson, of Massachusetts, withdrew his amendment, and the vote was taken on the amendment reported by the committee as follows:

SEC. 21. *And be it further enacted*, That so much of the act entitled "An act for enrolling and calling out the national forces and for other purposes," approved on the 8d day of March, 1863, as authorizes the discharge of persons drafted into the service of the United States under the authority of that act upon the payment of a sum of money not exceeding \$300, be, and the same is hereby, repealed.

Ymas—Messrs. Brown, Grimes, Harlan, Lane of Indiana, Morgan, Nesmith, Ramsey, Sprague, Ten Eyck, Trumbull, Wade, and Wilkinson—12.

Nays—Messrs. Anthony, Buckalew, Carlile, Clark, Collamer, Conness, Cowan, Davis, Dixon, Doolittle, Fessenden, Foot, Foster, Hale, Harding, Harris,

Henderson, Hendricks, Howard, Howe, Johnson, Lane of Kansas, Pomeroy, Saulsbury, Sherman, Sumner, Van Winkle, and Wilson—28.

The bill, after numerous amendments in Committee, was reported to the Senate, and on the 16th it was considered.

Mr. Clark, of New Hampshire, offered the following amendment:

And be it further enacted, That the commutation money paid by persons drafted in any congressional district shall be applied by the War Department for the procurement of substitutes, which substitutes shall be credited to that district in filling its quota; and if the quota of such district shall not then be full, a further draft shall be made in said district according to the provisions of this act and the act to which it is an amendment, and like proceedings had until the quota of such district shall be filled.

Mr. Hendricks, of Indiana, said: "I recollect that the strongest objection made before the people to the law of last session was that by allowing a portion of the drafted men to pay money instead of rendering personal service, you but increased the liability to draft of those that did not pay the money; and that was answered somewhat successfully before the people by saying that the payment of the money discharged the obligation of the State to furnish the quota, and therefore the liability of those that could not pay the money was not increased. But this proposition is that when a man pays his money it shall not go to the credit of the State upon the demand made against her, but that the number of men shall remain the same, to be taken from the people. Then we have to raise the entire number of men from that class of the community that are too poor to pay the money at all.

"The principle of the legislation of the last Congress was that by the payment of the money the Government procured a substitute and the men were raised, and there was no increase of liability upon those who could not pay the money; they were precisely in the same position that they would have been in if there had been no commutation at all. But now, notwithstanding the Government receives the money, we throw upon the truly poor men the responsibility to furnish the men, and the money is but a revenue."

Mr. Clark, of New Hampshire, replied: "The amendment which I propose is that the War Department shall take the money paid by the men who are drafted and apply it, as far as it goes, to the procurement of substitutes. It may possibly, by the employment of Africans, get them for \$100, and then it would get four for the \$400, and credit that district with the four, and so relieve the poor men of the district very much."

Mr. Brown, of Missouri, said: "If I understand the bill, it provides that the amount of the commutation money shall be paid over to the Secretary of War, to be by him expended in the procurement of substitutes. Now, under the amendment of the Senator from New Hampshire, here is a district called upon to

furnish one thousand men. Five hundred pay the commutation money. That money goes into the hands of the Secretary of War. He is procuring substitutes generally. Now, how is the Secretary of War to assign the number of substitutes that he gets throughout the United States in various quarters? Is he going to assign some of them to this district and some of them to another, or are the substitutes to be recruited within that district?"

Mr. Clark replied: "I think I understand fully the Senator from Missouri, and I say to him that the design of the amendment is that the Secretary of War shall procure his substitutes anywhere, and we trust to his discretion to assign them rightfully to the districts according to the time for which they are raised."

Mr. Grimes, of Iowa, said: "Mr. President, I agree with the honorable Senator as to the necessity and propriety of calling these colored men into the service of the United States. I have been for that from the commencement of this war. No man has been ahead of me in that particular; but I want them called into the service of the United States as United States troops, and not as the substitutes for white soldiers from any State. That is the difference between the Senator and me. I would do any thing in my power to stimulate the recruitment of colored troops. I believe it is the most important thing, and more important than the passage of this bill, if we can devise some scheme by which we can stimulate the Administration to that course; but I am utterly opposed to the selection of these colored men as the representatives of the citizens of any State, I do not care whether it be mine or any other State, that has not filled up its quota."

Mr. Fessenden, of Maine, followed in reply: "Mr. President, the argument of the honorable Senator from Iowa is founded on a possibility. He thinks this amendment should not prevail because by possibility certain colored men may be procured to fill up the quotas of the States. Now, sir, the probability of it, in the first place, is not very strong; but what harm in it? Follow out the Senator's argument: he says, and says justly, that nobody has been more anxious than he has been to enlist colored troops, and to enlist a great many of them. For what purpose? Is it not to relieve the different States, if you please, or to relieve the country of the necessity of furnishing white men?"

An extended debate followed on recruiting in the border States, when Mr. Doolittle, of Wisconsin, offered the following amendment:

Provided, That colored troops enlisted and mustered into the service of the United States shall be credited upon the quota of the State within which they are enlisted, and not upon the quota of any other State.

This amendment to the amendment was adopted—yeas, 27; nays, 11, as follows:

YEAS—Messrs. Brown, Buckalew, Conness, Cowan,

Davis, Doolittle, Foot, Grimes, Hale, Harding, Harlan, Henderson, Hendricks, Howe, Johnson, Lane of Indiana, Lane of Kansas, Morgan, Morrill, Nesmith, Pomeroy, Ramsey, Saulsbury, Sherman, Ten Eyck, Trumbull, and Wright—27.

NAYS—Messrs. Anthony, Clark, Dixon, Fessenden, Foster, Harris, Howard, Sprague, Sumner, Wilkinson, and Wilson—11.

The following words were subsequently added: "and the bounty, pay, or expense of said enlistments shall not be paid out of said commutation fund," and the amendment of Mr. Clark adopted. Other amendments were adopted, and the bill passed the Senate by the following vote:

YEAS—Messrs. Anthony, Clark, Collamer, Conness, Cowan, Davis, Dixon, Doolittle, Fessenden, Foot, Foster, Hale, Harding, Harlan, Harris, Howard, Johnson, Lane of Kansas, Morgan, Morrill, Nesmith, Pomeroy, Ramsey, Sprague, Sumner, Ten Eyck, Van Winkle, Wade, Willey, and Wilson—30.

NAYS—Messrs. Buckalew, Carlile, Grimes, Hendricks, Howe, Lane of Indiana, Powell, Saulsbury, Wilkinson, and Wright—10.

The bill came before the House, and various amendments were proposed. On the 10th of February Mr. Stevens, of Pennsylvania, moved to strike out the twentieth section, and insert the following:

All able-bodied male persons of African descent, between the ages of twenty and forty-five years, whether citizens or not, resident in the United States, shall be enrolled according to the provisions of the act to which this is a supplement, and form part of the national forces. And when a slave shall have been drafted and mustered into the service of the United States his master shall have a certificate thereof which shall entitle him to receive \$300 from the United States, and the drafted man shall be free.

He said: "I think that that class of persons ought to form a part of the national forces. I know that they are now taken, as in Maryland, for instance, and I suppose they will be in other places. I do not say that it is contrary to law, but I prefer that it should be done under a known law."

It was suggested to Mr. Stevens to modify his amendment "so as to pay loyal men only for their slaves." He further said: "I modify my amendment in that respect, by adding the words, 'provided that the slaves of loyal men only shall be paid for.' My amendment will not only make this class of persons bear their part of the fighting burden of the nation, but it will also tend finally to eradicate slavery from all the States; eradicate it under necessity, and with compensation to the masters. Although we are now doing it—I will not say against law, but I do not precisely know under what law—I think it right that it should be done according to law. Of course this refers only to the loyal States."

Mr. Clay, of Kentucky, followed, saying: "You have told us in the border States, when we have appealed to you, that you intended to respect the laws and constitutions of those States. The enemies of the Union, those in those States called secessionists, have charged against the northern people that it was their

intention to seize upon all of our slaves, with or without law; that they intended to seize the personal property and finally the real estate of the slaveholding States. These charges have been made in my State against the Government. We have denied them. We have stated that there was no such intention; that the northern people proposed to respect our constitutions and laws; and that we had no fear when the case was presented justice would be done to us."

Mr. Boutwell, of Massachusetts, replied: "I desire to say in reply to the gentleman from Kentucky, that in the laws of Kentucky, so far as I know, slaves were recognized as property but still recognized as persons; and I think that we have reached that emergency when men in the border States should understand, at least so far as I am concerned, that slaves as inhabitants of the country are to be used as other men are used, to put down this rebellion. No constitution or law of any State shall stand between me and what I believe to be my duty to my country."

Mr. Morris, of New York, said: "Mr. Chairman, as I understand existing laws, the Government, when it deems it to be necessary, may seize the property of any citizen and use it for the purpose of prosecuting this war. I see no difference between seizing the property of the northern States and that of the border States. I do not see why the property of the border States should be exempted."

Mr. Davis, of Maryland, moved to amend the amendment by striking out so much of it as provided for the payment of \$300 to the owner of the drafted slave. He said: "I do it on this ground: if the slaves are liable to military duty at all, they are liable to military duty on the same ground as every person is who owes obedience to the laws; on the same ground that the citizen of the country, the subjects of the country, the denizens of the country owing temporary allegiance to the Government are bound to defend it. If they owe military service, we owe the master nothing for taking what the slaves owe."

Mr. Mallory, of Kentucky, opposed it, saying: "I think, Mr. Chairman, that the question is narrowed down simply to this: if the Government of the United States have the right to take from me my property in the service and labor of my slave, it is restricted and limited by that provision of the Constitution which says that private property shall not be taken without just compensation. Then, I ask the gentleman from Maryland, how is just compensation ascertained? Is it done by a law of the Government fixing it, or by any *ex parte* proceedings of that kind? He knows it is not. He knows that that would be unjust and unconstitutional. If you propose to compensate the owner of a slave, you must ascertain the value of the property as you do the value of any other property that the Government chooses to take for its use. You must ascertain the value of that property as you

ascertain the value of land taken for a road, by a jury summoned under a writ of *ad quod damnum*. The amendment of the gentleman from Maryland ignores this right, violates it in a plain, distinct, and palpable manner, and is contrary to the Constitution of the United States."

The amendment proposed by Mr. Davis was now accepted by Mr. Stevens. Mr. Davis now further moved as an amendment, to add as follows:

The Secretary of War shall appoint a commission in each of the slave States represented in Congress, charged to award a just compensation to each loyal owner of any slave who may volunteer into the service of the United States, payable out of the commutation money.

He said: "Mr. Chairman, I submit that amendment for this reason: not because I think it is due at all to the owner of the slave, but because the President and the Secretary of War in executing the law of 1862, allowing the President to use and organize persons of African descent to suppress the rebellion, have seen fit to appoint a commission, which is now in session in Maryland, for the purpose of estimating the value of and awarding reasonable compensation to the loyal owners of slaves who may volunteer in the service of the United States under the law of 1862. That brings the volunteering of slaves into some sort of correspondence with the established policy of the Government in paying bounties to volunteers, the difference being that in the case of the slave the bounty is paid to the master instead on his freeing the slave, whereas the bounty in the case of the white volunteer of course goes to himself.

"But the difference between that proposition and the proposition to pay drafted men is this: the volunteer having offered his services to the Government, the Government is of course at liberty to alleviate the burden which may be thrown upon the slaveowner, as far as it sees fit. It is a very different thing to impose upon the Government when it is driven to draft men the necessity of paying to every slaveowner a compensation for any slave that may be drafted. It is unequal, and I am sure every gentleman will see that it is in a moment. The poor man whose son works for him on his ten acres receives no compensation for that son when he is drafted into the service, while the wealthy slaveholder, who has three or four hundred slaves alongside, is to receive a compensation of \$300 for every one of his slaves who may be drafted."

Mr. Webster, of Maryland, said: "Sir, the question before us is not the right to take slaves for military service, but the expediency of so doing. For myself, I am free to confess that in the earlier stages of the war, when it seemed probable that the rebellion would be crushed at no distant day, and without serious interference with the domestic institutions of the States, believing as I did and do in the superiority of the white man as a soldier, I was unwilling to arm the negro. But now, sir, when we approach

the end of the third year of this war, and it is still huge in its dimensions; when call for troops follows call in quick succession; when draft after draft is made, and the drain upon our people for soldiers is grievous to be borne, I am for using all the means known to the law in suppressing the rebellion. I would put arms in the hands of all men capable of bearing them. The experience of the last twelve months has shown that the negro, though not so efficient a soldier as the white man, will fight bravely, and can be made a valuable auxiliary in the prosecution of the war and the restoration of the Union. Sir, his aid is not to be rejected, at least I will not assist in its rejection."

Mr. Harris, of Maryland, opposed the amendment, saying: "If you could properly enlist slaves, I am opposed to the degradation which such an act would bring upon a nation situated as this is. What are you fighting? Five million white men. You claim to be twenty million white men, and yet with such odds in your favor, and with means of blockading southern ports and almost starving them into subjection, you come here and command that the flag of your country shall be intrusted to the poor slaves. I say it is a degradation of the United States flag, and no man who duly honors that flag has heretofore ever undertaken at such odds to deprave the country and tarnish its honor by such any proceeding."

Mr. Mallory, of Kentucky, also opposed the amendment, urging objections as follows: "I ask the gentleman from Pennsylvania, the gentleman from Iowa, and the gentlemen on that side of the House, what they have got to do with the matter? If we allow you to put your free negroes into the army—and I have no objection to your putting them upon your enrolment list—what right have you to insist that our slaves in Kentucky shall be placed upon our enrolment list? You demand from Kentucky a certain number of men for the army upon this call. We who live in Kentucky say that we have the right to decide who those men shall be. If you are in earnest, if you really desire to raise men to fill our armies, that is the course by which you will accomplish that object. But if you are not in earnest; if you have another and a different object to accomplish covertly, by the operation of the bill; if you wish to demoralize and destroy the institution of slavery in my State, then the amendment of the gentleman from Pennsylvania (Mr. Stevens) is a wise one for the accomplishment of that purpose. Sir, I know the gentleman from Pennsylvania, I know him to be a bold man, I know him to be a frank and candid man, and I know this to be his argument; I know that if his simple, sole object by this bill was to raise an army, he would admit that the course I have marked is the proper one to accomplish that object."

The amendment to the amendment was adopted—yeas, 84; nays, 71.

Mr. Harding, of Kentucky, said: "I move

to amend the proposed amendment by adding thereto the following proviso:

Provided, That the provisions of this section in regard to slaves, shall not apply to the State of Kentucky.

"I regret that it becomes necessary, on a matter of such vital importance as this, to plead and plead for even five minutes' time. As my colleague (Mr. Mallory) very properly remarked, what more do gentlemen desire than that Kentucky shall furnish her proper quota of men and contribute her proper amount of money? It is manifest to every man that this seeks to inaugurate a general scheme of emancipation in the loyal slaveholding States. That can no longer be disguised. Gentlemen are disposed to pass it by as if that was a clear constitutional right. Sir, it is an absolute violation of the constitutions both of Kentucky and of the United States. No man can meet that proposition in argument. From the foundation of the Government to the present time the right to slave property was secured by all the laws, and approved by the Constitution, as much as the right to land was secured. It is a constitutional right in the State of Kentucky to hold slaves; and there can be no system of general emancipation inaugurated under the pretence of raising soldiers except by a plain and palpable violation of the Constitution.

"Moreover, sir, slaves have never been regarded as forming part of the military force of the country. They are property. A man in Kentucky holds his slaves by the same title as he holds his land. I defy any man to draw a distinction between the two. The title is as clear to slaves in Kentucky as it is to a man's home and land; and that spirit which will run lawlessly over the one would need but little temptation to run as lawlessly over the other. I beg gentlemen of the Republican party to look back a few years to the Chicago platform, and see what its language was. It was, that the maintenance inviolate of the rights of the States, and especially of the right of each State to order and control its own domestic institutions according to its own judgment exclusively, was essential to that balance of power on which the perfection and endurance of our system depended. I embodied that same profession in a resolution which I offered a few days ago, and it was unceremoniously laid on the table; seventy-three members on the other side rising and voting to lay it on the table. I deny that there is any constitutional power to wrest a slave from his owner, either by taking the slave as a volunteer or as a conscript. You have no right to do it even though you allow compensation. You cannot inaugurate emancipation in that indirect way. The President has disclaimed, and the Republican party has again and again disclaimed, all power to do so. And yet now it is proposed to violate all these pledges, to trample under foot this platform, and with it the Constitution of the United States, in order to bring about emancipation by

a wholesale system of robbery. Do you propose to take the loyal man's slave at a fair valuation? No, you propose to take him by conscription, to take him by an arbitrary process, and to fix his price by the same power. It amounts to nothing but robbery. It is a mockery of justice. The highwayman might as well seize my horse and take him from me, and then offer me a pittance."

The amendment to the amendment was lost and the amendment was agreed to. Other amendments were made, when it was moved to strike out all after the first section of the bill and insert a substitute, which was carried, and the bill then passed by the following vote:

YEAS—Messrs. Alley, Allison, Anderson, Arnold, Ashley, Bailey, John D. Baldwin, Baxter, Beaman, Jacob B. Blair, Boutwell, Boyd, Brandegee, Broomall, William G. Brown, Cobb, Cole, Creswell, Henry Winter Davis, Thomas T. Davis, Dawes, Deming, Dixon, Driggs, Eckley, Eliot, Farnsworth, Frank, Garfield, Gooch, Grinnell, Griswold, Hale, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hulburd, Hutchins, Jenckes, Julian, Kasson, Kelley, Francis W. Kellogg, Orlando Kellogg, Loan, Longyear, Marvin, McAllister, McBride, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Odell, Charles O'Neill, Orth, Perham, Pike, Pomeroy, William H. Randall, Alexander H. Rice, John H. Rice, Edward H. Rollins, Schenck, Scofield, Shannon, Sloan, Smith, Smithers, Spalding, Starr, Stevens, Thayer, Thomas, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Webster, Whaley, Wheeler, Williams, Wilder, Windom, and Woodbridge—94.

NAYS—Messrs. James C. Allen, William J. Allen, Ancona, Augustus C. Baldwin, Bliss, Brooks, James S. Brown, Chanler, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Edgerton, Eldridge, Finck, Ganson, Grider, Hall, Harding, Harrington, Benjamin G. Harris, Herrick, Holman, William Johnson, Kalbfleisch, Kernan, Knapp, Law, Lazear, Le Blond, Long, Mallory, Marcy, McDowell, McKinney, William H. Miller, James R. Morris, Morrison, Nelson, Noble, John O'Neill, Pendleton, Radford, Samuel J. Randall, Robinson, Rogers, Ross, Scott, John B. Steele, Stiles, Strouse, Stuart, Sweet, Voorhees, Wadsworth, Joseph W. White, Winfield, and Fernando Wood—60.

This resulted in striking out after the first section of the Senate bill, and substituting a House bill containing the amendments adopted and many provisions of the Senate bill.

A Committee of Conference between the two houses was appointed, and their report was made in the Senate on the 19th February. A debate ensued which resulted in the adoption of the report by the Senate—yeas, 26; nays, 16.

In the House, the report was adopted—yeas, 71; nays, 23.

This act changed the law of March 8d, 1863, by abolishing the two classes of enrolled men; authorizing the President to call for men whenever he deemed it necessary; making drafted men subject to the liabilities of their substitutes, and exempt only for the term for which the draft was made; abolishing all exemptions except for physical disability, service for two years, and being in the service. The other details were of less importance.

In the Senate, on the 8th of June, a new bill was reported from the Military Committee, and considered, the object of which was "to prohibit the discharge of persons from liability to military duty, by reason of the payment of money." The following message was also submitted from the President:

WASHINGTON, D. C., June 8, 1864.

To the Senate and House of Representatives:

I have the honor to submit for the consideration of Congress a letter and inclosure from the Secretary of War, with my concurrence in the recommendation therein made

ABRAHAM LINCOLN.

WAR DEPARTMENT,

WASHINGTON CITY, June 7, 1864.

SIR: I beg leave to submit to you a report made to me by the Provost Marshal General, showing the result of the draft now going on to fill the deficiency in the quotas of certain States, and recommending a repeal of the clause in the enrolment act commonly known as the \$300 clause. The recommendation of the Provost Marshal General is approved by this Department, and I trust that it will be recommended by you to Congress.

The recent successes that have attended our arms lead to the hope, that by maintaining our military strength, and giving it such an increase as the extended field of operations may require, an early termination of the war may be attained. But to accomplish this it is absolutely necessary that efficient means be taken, with vigor and promptness, to keep the army up to its strength, and supply deficiencies occasioned by the losses sustained by casualties in the field. To that end resort must be had to a draft, but ample experience has now shown that the pecuniary exemption from service frustrates the object of the enrolment law by furnishing money instead of men.

An additional reason for repealing the \$300 clause is, that it is contemplated to make the draft for a comparatively short term. The burden of military service will therefore be lightened, but its certainty of furnishing troops is an absolute essential to success.

I have the honor to be, your obedient servant,
EDWIN M. STANTON,
Secretary of War.

To the President.

WAR DEPARTMENT,

PROVOST MARSHAL GENERAL'S OFFICE,
WASHINGTON, D. C., June 6, 1864.

SIR: In accordance with the amended enrolment act, approved February 24th, 1864, and your orders on the subject, I am now conducting a draft in various sub-districts for their respective deficiencies on quotas of troops heretofore assigned. The results of this draft, so far as shown by reports of this date, are worthy of attention. They are, briefly, as follows:

Number of drafted men examined, 14,741
Number exempted for physical disability, 4,874
Number exempted for all other causes, . 2,682

Total exempted, 7,016

Number paid commutation money, . . 5,050

Number who have furnished substitutes, 1,416

Number held for personal service, . . 1,259

(This last includes some who may yet pay commutation money.)

Total not exempted, 7,725

These reports come from sub-districts in eight different States. I invite your attention to the small proportion of soldiers being obtained under the existing law. I see no reason to believe that the army

can be materially strengthened by draft so long as the \$300 clause is in force, nor do I think it safe to assume that the commutation paid by a drafted man will enable the Government to procure a volunteer or substitute in his place. I do not think that large bounties by the United States should be again resorted to for raising troops. I recommend that the \$300 clause, as it is known, be repealed.

I am, sir, very respectfully, your obedient servant,
JAMES B. FRY,
Provost Marshal General.

Hon. E. M. STANTON, Secretary of War.

A bill was subsequently introduced and passed which abolished the payment of \$300 as commutation, limited the service to one year, and allowed no exemption except for alienage, previous service of two years, and physical disability. (See ARMY U. S.)

It passed the Senate on June 30th, as follows:

YEAS—Messrs. Anthony, Chandler, Clark, Conness, Fessenden, Foot, Foster, Hale, Lane of Kansas, Morgan, Morrill, Pomeroy, Ramsey, Sumner, Van Winkle, Wade, Wilkinson, and Wilson—18.

NAYS—Messrs. Buckalew, Carlile, Davis, Doolittle, Harlan, Harris, Henderson, Hendricks, Howe, Lane of Indiana, McDougall, Powell, Riddle, Saulsbury, Sherman, Trumbull, and Willey—17.

ABSENT—Messrs. Brown, Collamer, Cowan, Dixon, Grimes, Harding, Hicks, Howard, Johnson, NeSmith, Richardson, Sprague, Ten Eyck, and Wright—14.

It passed the House by the adoption of a report of a Conference Committee, July 2d, by the following vote:

YEAS—Messrs. Allison, Ames, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blair, Boutwell, Boyd, Cobb, Cole, Creswell, Henry Winter Davis, Dawes, Deming, Dixon, Driggs, Eckley, Eliot, Farnsworth, Fenton, Garfield, Gooch, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Ingersoll, Jenckes, Julian, Kelley, Littlejohn, Loan, Longyear, McBride, McClurg, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, William H. Randall, John H. Rice, Schenck, Shannon, Sloan, Smith, Smithers, Spalding, Tracy, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Williams, Wilder, Wilson, Windom, and Woodbridge—65.

NAYS—Messrs. William J. Allen, Alley, Ancóna, Bailey, Blaine, Bliss, Chanler, Coffroth, Cox, Dawson, Dennison, Eden, Edgerton, Eldridge, English, Frank, Ganson, Griswold, Benjamin G. Harris, Charles M. Harris, Hutchins, Kernan, Knapp, Law, Le Blond, Long, Mallory, Marcy, Middleton, William H. Miller, James R. Morris, Noble, Odell, Patterson, Pendleton, Perham, Pruyn, Samuel J. Randall, Alexander H. Rice, Robinson, Edward H. Rollins, James S. Rollins, Ross, Scofield, John B. Steele, William G. Steele, Stevens, Stiles, Thomas, Wadsworth, Webster, Wheeler, and Winfield—53.

In the House, on December 14th, 1863, Mr. Finck, of Ohio, offered the following resolution relative to the object of the war:

Whereas, in the opinion of this House, the Federal Government is invested by the Constitution of the United States with all necessary power and authority to suppress any resistance to the due execution of the laws thereof, and to employ the Army and Navy in aid of the civil authority to disperse all armed resistance to the rightful power and jurisdiction of the United States; and whereas, in the judgment of this House, the Army and Navy cannot be rightfully used to subjugate and hold as conquered territory any of the States of this Union; therefore,

Be it resolved, That in this national emergency Congress will forego all feeling of mere passion or resentment, and will recollect only its duty to the country; that this war should not be waged on our part in any spirit of oppression, nor in any spirit of conquest or subjugation, nor for the purpose of overthrowing or interfering with the rights or established institutions of the States, but to defend and maintain the supremacy of the Constitution, and preserve the Union with all the dignity, equality, and rights of the several States unimpaired, and as soon as these objects are attained the war ought to cease.

On April 11th, the resolution was laid on the table by the following vote:

YEAS—Messrs. Alley, Allison, Ames, Anderson, Arnold, Ashley, John D. Baldwin, Baxter, Beman, Blaine, Boutwell, Boyd, Broomall, William G. Brown, Ambrose W. Clark, Freeman Clarke, Cobb, Cole, Henry Winter Davis, Thomas T. Davis, Deming, Driggs, Dumont, Eckley, Eliot, Farnsworth, Frank, Garfield, Gooch, Grinnell, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Jenckes, Julian, Kasson, Kelley, Francis W. Kellogg, Orlando Kellogg, Loan, Marvin, McBride, McClurg, Samuel F. Miller, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Pike, Pomeroy, Price, William H. Randall, Alexander H. Rice, Edward H. Rollins, Schenck, Schofield, Shannon, Sloan, Smith, Smithers, Spaulding, Starr, Stevens, Thayer, Thomas, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge—81.

NAYS—Messrs. James C. Allen, William J. Allen, Ancona, Augustus C. Baldwin, Francis P. Blair, Bliss, James S. Brown, Chanler, Clay, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Eldridge, English, Finck, Ganson, Grider, Hale, Harding, Harrington, Benjamin G. Harris, Herrick, Holman, Philip Johnson, William Johnson, Kernan, King, Knapp, Law, Lazear, Marcy, McAllister, McDowell, McKinney, Middleton, James R. Morris, Morrison, Nelson, Odell, Pendleton, Perry, Pruyn, Samuel J. Randall, Robinson, Rogers, James S. Rollins, Ross, Scott, John B. Steele, William G. Steele, Strouse, Stuart, Sweat, Voorhees, Webster, Wheeler, Chilton A. White, Joseph W. White, Winfield, and Fernando Wood—64.

On December 14th Mr. Holman, of Indiana, offered the following on the same subject:

Resolved, That the doctrine recently announced, that the States in which an armed insurrection has existed against the Federal Government have ceased to be States of the Union, and shall be held, on the ultimate defeat of that insurrection, as Territories or subjugated provinces, and governed as such by the absolute will of Congress and the Federal Executive, or restored to the Union on conditions unknown to the Constitution of the United States, ought to be rebuked and condemned as manifestly unjust to the loyal citizens of those States, tending to prolong the war and to confirm the treasonable theory of secession; and, if carried into effect, must greatly endanger the public liberty and the constitutional powers and rights of all the States, by centralizing and consolidating the powers of the Government, State and national, in the Federal Executive.

Resolved, That the only object of the war ought to be to subjugate the armed insurrection which, for the time being, suspends the proper relations of certain States with the Federal Government, and to reestablish the supremacy of the Constitution; and the loyal citizens of those States, and the masses of the people thereof, submitting to the authority of the Constitution, ought not to be hindered from restoring the proper relations of their respective States with the Federal Government, so far as the same is dependent on the voluntary action of the people, by ex-

condition, except unconditional submission to the Constitution and laws of the United States. In the language heretofore solemnly adopted by Congress, the war ought not to be waged on our part for any purpose of conquest or subjugation or purpose of overthrowing or interfering with the rights or established institutions of those States, but to defend and maintain the supremacy of the Constitution, and to preserve the Union, with all the dignity, equality, and rights of the several States unimpaired, and as soon as those objects are accomplished the war ought to cease.

Resolved, That all necessary and proper appropriations of money ought to be promptly made by this Congress for the support of the military and naval forces of the Government, and all measures of legislation necessary to increase and promote the efficiency of the Army and Navy and to maintain the public credit, ought to be adopted, that, through a vigorous prosecution of the war, peace on the basis of the union of the States and the supremacy of the Constitution may be the more speedily obtained.

Mr. Stevens, of Pennsylvania, moved to lay the resolution on the table, which was ordered by the following vote:

YEAS—Messrs. Alley, Arnold, Ashley, John D. Baldwin, Baxter, Beaman, Blaine, Blow, Boutwell, Boyd, Brandegee, Broomall, Ambrose W. Clark, Freeman Clarke, Clay, Cobb, Cole, Creswell, Henry Winter Davis, Dawes, Dixon, Donnelly, Driggs, Dumont, Eckley, Eliot, Farnsworth, Fenton, Frank, Garfield, Gooch, Grinnell, Higby, Hooper, Hotchkiss, Asahel W. Hubbard, John H. Hubbard, Hubbard, Jenckes, Julian, Kasson, Francis W. Kellogg, Orlando Kellogg, Loan, Longyear, Lovejoy, Marvin, McBride, McClurg, McIndoe, Samuel F. Miller, Moorhead, Morrill, Daniel Morris, Amos Myers, Leonard Myers, Norton, Charles O'Neill, Orth, Patterson, Perham, Pike, Pomeroy, Price, William H. Randall, Alexander H. Rice, John H. Rice, Edward H. Rollins, James S. Rollins, Schenck, Schofield, Shannon, Sloan, Smithers, Spaulding, Stevens, Thayer, Thomas, Upson, Van Valkenburgh, Elihu B. Washburne, William B. Washburn, Whaley, Williams, Wilder, Wilson, Windom, and Woodbridge—88.

NAYS—Messrs. James C. Allen, William J. Allen, Ancona, Bailey, Augustus C. Baldwin, Jacob B. Blair, Bliss, Brooks, William G. Brown, Chanler, Coffroth, Cox, Cravens, Dawson, Dennison, Eden, Edgerston, Eldridge, English, Finck, Ganson, Grider, Griswold, Hall, Harding, Harrington, Benjamin G. Harris, Charles M. Harris, Herrick, Holman, William Johnson, Kernan, King, Knapp, Law, Lazear, Le Blond, Long, Mallory, Marcy, McDowell, McKinney, William H. Miller, James R. Morris, Morrison, Nelson, Noble, Odell, John O'Neill, Pendleton, Robinson, Rogers, Ross, Scott, Smith, John B. Steele, Stuart, Voorhies, Wadsworth, Ward, Wheeler, Chilton A. White, Joseph W. White, Winfield, Fernando Wood, and Yeaman—66.

On the 16th, Mr. Rollins, of Missouri, offered the following resolution:

Resolved by the House of Representatives of the Congress of the United States, That, prompted by a just patriotism, we are in favor of an earnest and successful prosecution of the war, and that we will give a warm and hearty support to all those measures which will be most effective in speedily overcoming the rebellion, and in securing a restoration of peace, and which may not substantially infringe the Constitution, and tend to subvert the true theory and character of the Government; and we hereby reiterate that the present deplorable civil war has been forced upon the country by the secessionists now in revolt against the Government, and that in the progress of this war, Congress, banishing all

is enlisting slaves without asking the consent of their masters, and they have the same privilege in the State of Missouri; but I am told that this is not so in the State of Kentucky. The Government can go into any part of the country and take our sons and enlist them without asking our consent, but the Government of the United States cannot step into the great State of Kentucky and enlist a slave without asking the consent of his master. Sir, I would enlist him if I chose to do so, and ask no consent of the master anywhere. The Government can take your son or an apprentice belonging to you without your consent, but it must ask a slavemaster for his consent to enlist an able-bodied man into the service of the country. It is a thing which ought not to be submitted to a day, and it ought not to be acted upon a day longer."

Mr. Brown, of Missouri, asked under what authority the War Department paid the master of the slave where the latter enlisted?

Mr. Wilson replied that there was no express law for it; and that he could not answer unless it was, that they construed the law giving authority to use the money received from persons who had been drafted, to authorize its appropriation in that manner.

Mr. Sherman, of Ohio, said: "The Secretary of War has clearly the power to use that money in procuring substitutes, and the law makes no distinction between white and black."

Mr. Johnson, of Maryland, said: "The Senator from Missouri (Mr. Brown) asks what law there is to justify the Government in paying anything to the masters of slaves who are taken into the service of the United States. It is true that although the term 'slave' is nowhere found in the Constitution, slaves are evidently considered as property within the meaning of the fugitive clause and within the meaning of the clause which prohibits to the people of the United States the authority to change the Constitution at all in that particular provision of it which limits the authority of Congress upon the subject of the foreign slave trade to the expiration of twenty years from the adoption of the Constitution. They were considered as property, and were intended as property to be protected by that clause; and they have been considered as property and are now considered as property in your tax laws. So far as the direct tax is concerned they are considered as property. They are considered as property by the laws of all the slave States. They are subjects of distribution; they are liable for the debts of the master; they are subjects of bequests, they are subjects of sale, and are in every respect upon the condition of property; but notwithstanding that, they are no doubt also to be considered as in the character of persons.

"I suppose no one will for a moment hesitate in admitting that although they stand in the relation of property in a certain sense they also stand in the relation of persons to the Govern-

ment, because I suppose every one will admit that they could be guilty of treason as against the United States. If the slaves in the United States were to do as the white men in the southern States have done—I do not mean all the southern States; thank God, I am not obliged to say so—if the slaves in the seceded States had without the consent of the white men risen in rebellion and resisted the laws of the United States by arms, or if they were now found aiding the traitors in the seceded States in their effort by force of arms to destroy the Government of the United States, they might be considered and treated as traitors. In other words, although slaves liable to all the relations growing out of that condition, they are persons owing allegiance to the United States and consequently bound to abstain from every thing which is a violation of allegiance; and if they were to go to the extent of levying war upon the United States or of giving aid and comfort to the enemies of the United States, they might be dealt with as traitors.

"But it by no means follows from that that they are not to be esteemed as property, and that the master is not to be paid for them as property. The practice in Maryland, as I get from sources of information that I know can be relied upon, is that the recruiting officers, white officers, go to the homesteads of the masters, and not only enlist the slave without the consent of the master, but without his own consent. The poor ignorant black man who knows not to what extent the evident power of the Government may be carried, is told that he must enlist, and he enlists under what may be considered and what actually is compulsion. Whether he would enlist (as I think he would in a majority of cases) voluntarily, under the influence of no threat, or under no fear, is a question not submitted to him at all. And not only is that done, but the enlisting officer informs all the slaves upon the plantation, whether able to do duty in the field or not, old men and children and women, that they are all free; and the result has been that the whole of that population which has been able to get off has gone off. That the State will be benefited by the effect of it in the end, I have no doubt; but at the same time it is due to my own convictions of what the Constitution is, and the rights which the people of Maryland have under that Constitution, to protest without meaning to find fault with the Government; to protest, not in any acrimonious sense, against this mode which they have adopted to get the slaves of Maryland in the armies of the United States."

Mr. Grimes, of Iowa, in response to the remarks of Mr. Wilson, followed, saying: "I am very glad, sir, that I addressed the inquiry that I did to the Senator from Massachusetts (Mr. Wilson). I am rejoiced at the response he has given to it, and I think the country will be glad to know that the Administration has established a policy in regard to the recruitment of colored persons. I have heard for the last twelve

months givings-out that such was to be the policy of the Administration, or indeed that it actually was; but the results which have been accomplished have never satisfied me that that was their real genuine intention, for I have always believed that if there had been the proper agencies used, if there had been the proper degree of practical sagacity exhibited by the agents who were selected by the Government to raise colored regiments, there could have been two hundred thousand colored men marshalled into the field to-day, and I believe it now. I believe that there might have been, and ought to have been, two hundred thousand colored men in the field at this moment, and that instead of our being compelled to pass a bill appropriating \$20,000,000 for bounties, as we have done to-day, and passing a bill to amend the enrolment act, we need not have required a single new white soldier to enter the army."

Mr. Wilson, of Massachusetts, again said: "Mr. President, in the State of Maryland we have raised a large number of men under the lead of General Birney, a son of James G. Birney, who inherits the principles of his father, and who is one of the most devoted and faithful officers we have in the service of the United States. He has officered those regiments from men who have passed before this board, and in my judgment, derived from the information given by him and by others, no regiments in the service have been better officered. In General Butler's department, he said to me the other day that he had raised since he went there, only a few weeks ago, three thousand colored men. They had some raised there before; General Wilde had raised a brigade in North Carolina. General Wilde belongs to that class of men who know what this war is about, and whose heart is in it. He believed in raising these troops, and he had them well officered. We are raising in the State of Tennessee a large number of men, because there we have the influence of Andrew Johnson, who is for raising these troops and for making Tennessee what she ought to be, a free State. Down in the department of the Gulf we have raised probably twenty thousand black men, and we have officered them as best we could; perhaps they are not so well officered there as the regiments nearer the city of Washington, whose officers have passed through an examination before this board. Still we are improving there; and everywhere in the country, with possibly the exception of the States of Missouri and Kentucky, the raising of colored troops is progressing finely.

"Little has been done in the State of Kentucky, for the reason that Kentucky to-day is the only State in the Union that maintains the cause of slavery or carries its flag. Delaware has taken her position; Maryland has taken hers; and so have West Virginia and Missouri. Tennessee, which was excepted from the proclamation of freedom, is taking her

position under the influence of Andrew Johnson and the patriotic men of the State. But, sir, Kentucky passed into the hands of a conservative class of politicians, who started in the first place to hold her in a neutral position, where she could dictate terms to the country. They undertook, then, to dictate to the President, but they failed, and now they are denouncing him. That class of politicians, however, is passing away, even in Kentucky. The people are ripening there as they are ripening everywhere else; and when the next opportunity comes for Kentucky to speak, I entertain not the shadow of a doubt that she will speak by an overwhelming majority, just as Missouri and Maryland and Delaware and West Virginia have spoken. I think the Government has dealt rather tenderly in not enlisting colored men in that State. If I had the power I would enlist every black free man who was willing to enlist and every slave who was willing to enlist, and ask no leave of Kentucky politicians or of slavemasters in Kentucky, but I would put them into the service at once.

"Now, sir, a word in regard to the board for the examination of officers. General Casey is chairman of the board, and I say to the Senator from Iowa what I know to be the fact, that a more true, loyal, faithful man does not bear the commission of the United States than General Casey. He is in favor of enlisting black troops, and was early in favor of it. He is in favor of giving them good officers, men qualified to command, men of personal character and individual honor. I do not entertain a doubt that the men who have passed that board are better fitted for their places than are the officers of the average white regiments of the country. I know that General Casey believes that the colored troops ought to have better officers than white troops, that they ought to have men whose sympathies are with them, who will treat them kindly, but firmly, men of intelligence and of character qualified for their positions, and I know that he has striven to give them such officers. I wish all the colored troops in the country were as well officered as the troops are whose officers have passed before the board."

The bill was again considered on Jan. 14th, when Mr. Wilson, of Massachusetts, withdrew his amendment, and the vote was taken on the amendment reported by the committee as follows:

SEC. 21. *And be it further enacted,* That so much of the act entitled "An act for enrolling and calling out the national forces and for other purposes," approved on the 3d day of March, 1863, as authorizes the discharge of persons drafted into the service of the United States under the authority of that act upon the payment of a sum of money not exceeding \$300, be, and the same is hereby, repealed.

YEAS—Messrs. Brown, Grimes, Harlan, Lane of Indiana, Morgan, Nesmith, Ramsey, Sprague, Ten Eyck, Trumbull, Wade, and Wilkinson—12.

NAYS—Messrs. Anthony, Buckalew, Carlile, Clark, Collamer, Conness, Cowan, Davis, Dixon, Doolittle, Fessenden, Foot, Foster, Hale, Harding, Harris,

Henderson, Hendricks, Howard, Howe, Johnson, Lane of Kansas, Pomeroy, Saulsbury, Sherman, Sumner, Van Winkle, and Wilson—28.

The bill, after numerous amendments in Committee, was reported to the Senate, and on the 16th it was considered.

Mr. Clark, of New Hampshire, offered the following amendment:

And be it further enacted, That the commutation money paid by persons drafted in any congressional district shall be applied by the War Department for the procurement of substitutes, which substitutes shall be credited to that district in filling its quota; and if the quota of such district shall not then be full, a further draft shall be made in said district according to the provisions of this act and the act to which it is an amendment, and like proceedings had until the quota of such district shall be filled.

Mr. Hendricks, of Indiana, said: "I recollect that the strongest objection made before the people to the law of last session was that by allowing a portion of the drafted men to pay money instead of rendering personal service, you but increased the liability to draft of those that did not pay the money; and that was answered somewhat successfully before the people by saying that the payment of the money discharged the obligation of the State to furnish the quota, and therefore the liability of those that could not pay the money was not increased. But this proposition is that when a man pays his money it shall not go to the credit of the State upon the demand made against her, but that the number of men shall remain the same, to be taken from the people. Then we have to raise the entire number of men from that class of the community that are too poor to pay the money at all.

"The principle of the legislation of the last Congress was that by the payment of the money the Government procured a substitute and the men were raised, and there was no increase of liability upon those who could not pay the money; they were precisely in the same position that they would have been in if there had been no commutation at all. But now, notwithstanding the Government receives the money, we throw upon the truly poor men the responsibility to furnish the men, and the money is but a revenue."

Mr. Clark, of New Hampshire, replied: "The amendment which I propose is that the War Department shall take the money paid by the men who are drafted and apply it, as far as it goes, to the procurement of substitutes. It may possibly, by the employment of Africans, get them for \$100, and then it would get four for the \$400, and credit that district with the four, and so relieve the poor men of the district very much."

Mr. Brown, of Missouri, said: "If I understand the bill, it provides that the amount of the commutation money shall be paid over to the Secretary of War, to be by him expended in the procurement of substitutes. Now, under the amendment of the Senator from New Hampshire, here is a district called upon to

furnish one thousand men. Five hundred pay the commutation money. That money goes into the hands of the Secretary of War. He is procuring substitutes generally. Now, how is the Secretary of War to assign the number of substitutes that he gets throughout the United States in various quarters? Is he going to assign some of them to this district and some of them to another, or are the substitutes to be recruited within that district?"

Mr. Clark replied: "I think I understand fully the Senator from Missouri, and I say to him that the design of the amendment is that the Secretary of War shall procure his substitutes anywhere, and we trust to his discretion to assign them rightfully to the districts according to the time for which they are raised."

Mr. Grimes, of Iowa, said: "Mr. President, I agree with the honorable Senator as to the necessity and propriety of calling these colored men into the service of the United States. I have been for that from the commencement of this war. No man has been ahead of me in that particular; but I want them called into the service of the United States as United States troops, and not as the substitutes for white soldiers from any State. That is the difference between the Senator and me. I would do any thing in my power to stimulate the recruitment of colored troops. I believe it is the most important thing, and more important than the passage of this bill, if we can devise some scheme by which we can stimulate the Administration to that course; but I am utterly opposed to the selection of these colored men as the representatives of the citizens of any State, I do not care whether it be mine or any other State, that has not filled up its quota."

Mr. Fessenden, of Maine, followed in reply: "Mr. President, the argument of the honorable Senator from Iowa is founded on a possibility. He thinks this amendment should not prevail because by possibility certain colored men may be procured to fill up the quotas of the States. Now, sir, the probability of it, in the first place, is not very strong; but what harm in it? Follow out the Senator's argument: he says, and says justly, that nobody has been more anxious than he has been to enlist colored troops, and to enlist a great many of them. For what purpose? Is it not to relieve the different States, if you please, or to relieve the country of the necessity of furnishing white men?"

An extended debate followed on recruiting in the border States, when Mr. Doolittle, of Wisconsin, offered the following amendment:

Provided, That colored troops enlisted and mustered into the service of the United States shall be credited upon the quota of the State within which they are enlisted, and not upon the quota of any other State.

This amendment to the amendment was adopted—yeas, 27; nays, 11, as follows:

YEAS—Messrs. Brown, Buckalew, Conness, Cowan,

Davis, Doolittle, Foot, Grimes, Hale, Harding, Harlan, Henderson, Hendricks, Howe, Johnson, Lane of Indiana, Lane of Kansas, Morgan, Morrill, Nesmith, Pomeroy, Ramsey, Saulsbury, Sherman, Ten Eyck, Trumbull, and Wright—27.

NAYS—Messrs. Anthony, Clark, Dixon, Fessenden, Foster, Harris, Howard, Sprague, Sumner, Wilkinson, and Wilson—11.

The following words were subsequently added: "and the bounty, pay, or expense of said enlistments shall not be paid out of said commutation fund," and the amendment of Mr. Clark adopted. Other amendments were adopted, and the bill passed the Senate by the following vote:

YEAS—Messrs. Anthony, Clark, Collamer, Conness, Cowan, Davis, Dixon, Doolittle, Fessenden, Foot, Foster, Hale, Harding, Harlan, Harris, Howard, Johnson, Lane of Kansas, Morgan, Morrill, Nesmith, Pomeroy, Ramsey, Sprague, Sumner, Ten Eyck, Van Winkle, Wade, Willey, and Wilson—30.

NAYS—Messrs. Buckalew, Carlile, Grimes, Hendricks, Howe, Lane of Indiana, Powell, Saulsbury, Wilkinson, and Wright—10.

The bill came before the House, and various amendments were proposed. On the 10th of February Mr. Stevens, of Pennsylvania, moved to strike out the twentieth section, and insert the following:

All able-bodied male persons of African descent, between the ages of twenty and forty-five years, whether citizens or not, resident in the United States, shall be enrolled according to the provisions of the act to which this is a supplement, and form part of the national forces. And when a slave shall have been drafted and mustered into the service of the United States his master shall have a certificate thereof which shall entitle him to receive \$300 from the United States, and the drafted man shall be free.

He said: "I think that that class of persons ought to form a part of the national forces. I know that they are now taken, as in Maryland, for instance, and I suppose they will be in other places. I do not say that it is contrary to law, but I prefer that it should be done under a known law."

It was suggested to Mr. Stevens to modify his amendment "so as to pay loyal men only for their slaves." He further said: "I modify my amendment in that respect, by adding the words, 'provided that the slaves of loyal men only shall be paid for.' My amendment will not only make this class of persons bear their part of the fighting burden of the nation, but it will also tend finally to eradicate slavery from all the States; eradicate it under necessity, and with compensation to the masters. Although we are now doing it—I will not say against law, but I do not precisely know under what law—I think it right that it should be done according to law. Of course this refers only to the loyal States."

Mr. Clay, of Kentucky, followed, saying: "You have told us in the border States, when we have appealed to you, that you intended to respect the laws and constitutions of those States. The enemies of the Union, those in those States called secessionists, have charged against the northern people that it was their

intention to seize upon all of our slaves, with or without law; that they intended to seize the personal property and finally the real estate of the slaveholding States. These charges have been made in my State against the Government. We have denied them. We have stated that there was no such intention; that the northern people proposed to respect our constitutions and laws; and that we had no fear when the case was presented justice would be done to us."

Mr. Boutwell, of Massachusetts, replied: "I desire to say in reply to the gentleman from Kentucky, that in the laws of Kentucky, so far as I know, slaves were recognized as property but still recognized as persons; and I think that we have reached that emergency when men in the border States should understand, at least so far as I am concerned, that slaves as inhabitants of the country are to be used as other men are used, to put down this rebellion. No constitution or law of any State shall stand between me and what I believe to be my duty to my country."

Mr. Morris, of New York, said: "Mr. Chairman, as I understand existing laws, the Government, when it deems it to be necessary, may seize the property of any citizen and use it for the purpose of prosecuting this war. I see no difference between seizing the property of the northern States and that of the border States. I do not see why the property of the border States should be exempted."

Mr. Davis, of Maryland, moved to amend the amendment by striking out so much of it as provided for the payment of \$300 to the owner of the drafted slave. He said: "I do it on this ground: if the slaves are liable to military duty at all, they are liable to military duty on the same ground as every person is who owes obedience to the laws; on the same ground that the citizen of the country, the subjects of the country, the denizens of the country owing temporary allegiance to the Government are bound to defend it. If they owe military service, we owe the master nothing for taking what the slaves owe."

Mr. Mallory, of Kentucky, opposed it, saying: "I think, Mr. Chairman, that the question is narrowed down simply to this: if the Government of the United States have the right to take from me my property in the service and labor of my slave, it is restricted and limited by that provision of the Constitution which says that private property shall not be taken without just compensation. Then, I ask the gentleman from Maryland, how is just compensation ascertained? Is it done by a law of the Government fixing it, or by any *ex parte* proceedings of that kind? He knows it is not. He knows that that would be unjust and unconstitutional. If you propose to compensate the owner of a slave, you must ascertain the value of the property as you do the value of any other property that the Government chooses to take for its use. You must ascertain the value of that property as you

celling out the State of South Carolina among the negroes and enterprising Yankees of Massachusetts, gives courage, energy, and enthusiasm to the men now in arms in the confederate States. The order of the President to his military commanders in Louisiana and Arkansas, and the order issued in pursuance thereof by General Banks to the people of Louisiana, in which, by a single dash of his pen, he strikes out of existence the constitution and organic law of the State, and by virtue of the power vested in him as a major general proceeds to call and hold an election and inaugurate State officers, and set up a State government, and the legislation consummated and proposed by Congress and speeches made upon this floor, in support of radicalism, is strengthening the confederacy and prolonging the war. Herein, sir, is where they find strength; the true friends of the confederacy in the North are the radical abolitionists and the radical press goading on the President to issue proclamations and military orders, which provide food, raiment, strength, and support for the confederacy.

"If Mr. Lincoln had made a gift of millions of greenbacks to Jefferson Davis to be used as bounty money in recruiting the confederate army, he could not have done better service to the cause of the South than he has done by his silly, absurd, and insulting amnesty proclamation, and his equally absurd attempt to create State governments by dictatorial power. He has, in effect, said to the southern people, 'You shall not return to the Union except under such local governments as I and my military officers dictate;' and with the aid of his friends in Congress he is enabled to add: 'In the event of your submission and return, your estates shall be confiscated, your property, personal and real, shall be taken from you; your children shall be disinherited and left homeless and penniless to starve, under the scorn and hatred of northern fanatics; your lands and manor houses shall be parcelled out among our retainers; the negro (freedman) and the adventurer shall sit and rule at your hearthstones; and you, beggars and outcasts, shall be forbidden representation in our national councils, and be shut out forever from all offices of trust and honor.' Such is the language in which Mr. Lincoln and this Congress and the preceding Congress have spoken and are speaking to the people of the South. And now, sir, with such a prospect before them as the sequel of submission, outlawry, disfranchisement, social, moral, and political degradation, penury for themselves and their children, decreed as their portion, will they throw down their arms and submit to the terms? Who shall believe that the free, proud American blood, which courses with as quick pulsation through their veins as our own, will not be spilled to the last drop in resistance? This is the source, sir, from whence comes encouragement, strength, support, and susten-

ance for the confederates; herein lies the secret of the unity of their action, the prolongation of the contest, and the desperation of the conflict, produced, not by any thing said or measures proposed by gentlemen upon this side of the House, or by any measures proposed or policy advocated by the Democratic party, but by the acts of the gentlemen who make the charges, and the President and his military commanders, who issue the proclamations and military orders.

"Mr. Chairman, I have deemed it proper thus to advert to the charges of encouragement to the confederates so repeatedly made upon this floor, and I again recur to the consideration of the Union. Can the Union be restored by war? I answer most unhesitatingly and deliberately, No, never; '*war is final, eternal separation.*' My first and highest ground of opposition to its further prosecution is, that it is wrong; it is in violation of the Constitution and of the fundamental principles on which the federal Union was founded. My second objection is, that as a policy it is not *reconstructive* but *destructive*, and will, if continued, result speedily in the destruction of the Government and the loss of civil liberty, to both North and South, and it ought, therefore, to immediately cease.

"In order, Mr. Chairman, that we may know what views were entertained upon the right, as well as the expediency, of coercing States into submission, by some of the departed as well as living statesmen of the country, previous to the commencement of the present war, I propose to call the attention of the House and the country to a few extracts which, to my mind, are worthy of consideration at this time.

In 1827, during the administration of Mr. John Quincy Adams, when the Legislature of Georgia had passed an act setting aside the laws of Congress regulating intercourse with the Indian tribes within her limits, the messages of the President, of the 5th and 8th of February, 1827, in relation thereto, were referred to a select committee of the Senate, of which Colonel Benton was chairman, and of which Martin Van Buren and General William H. Harrison, both afterward Presidents of the United States, were members. The committee in their report (Senate Documents, second session Nineteenth Congress, Document No. 69) say:

It is believed to be among those axioms, which in a government like ours no man may be permitted to dispute, that the only security for the permanent union of these States is to be found in the principle of common affection, resting on the basis of common interest. The sanctions of the Constitution would be impotent to retain, in concerted and harmonious action, twenty-four sovereignties, hostile in their feelings toward each other, and acting under the impulse of a real or imagined diversity of interest. The resort to force would be alike vain and nugatory. Its frequent use would subject it, with demonstrative certainty, to ultimate failure; while its temporary success would be valueless for all purposes of social

happiness. In such contests, however unequal, and however transient, the seeds of disunion would be thickly sown, and those who may be destined to witness them will speedily thereafter be called to lament the destruction of the fairest prospect of civil liberty which Heaven in its mercy has vouchsafed to man.

The committee will not enlarge upon the frightful consequences of civil wars. They are known to be calamitous to single governments, and fatal to confederacies.

"The prediction of the committee of the destruction of the fairest prospect of civil liberty which Heaven in its mercy has vouchsafed to man, is already in great danger of being realized; and every hour the war is continued only widens the separation and increases the danger."

Mr. Long further quoted from the writings of J. Q. Adams, Jackson, W. H. Seward, President Lincoln, and Senator Wade.

"Three years' experience in attempting 'by numerical preponderance and military prowess of one section exerted to coerce the other into submission,' has convinced me more thoroughly that it is 'as self-contradictory as it is dangerous;' contradictory, because it violates the great principles of free government which 'derive their just powers from the consent of the governed,' and dangerous, because by its exercise, especially when wielded by a weak, vacillating, and unscrupulous man, it destroys instead of maintaining the Union. Constitutions and organic law, civil liberty and personal security are forced to yield to what is claimed to be a military necessity, and the Government itself, in the brief period of three short years, is to-day verging on the very brink of ruin.

"I am well aware, sir, that the cry of disloyalty, want of patriotism, and lack of devotion to the Government, which is in every place and at all times raised against those who have the independence to disapprove of any of the acts of Mr. Lincoln, as well as an inordinate desire for Government patronage, from the building of a steamship and a shoddy contract, down to the insignificant position of taking charge of a mutilated and depreciated greenback in the Treasury building, has changed the opinions of many men, but the fixed principles of free government as well as the rules of right, reason, justice and truth, are unchangeable; and although it may be unpopular, and even at the risk of personal liberty in times like the present, to advocate them, they are, nevertheless, eternal and immutable.

"The distinguished gentleman from Pennsylvania (Mr. Stevens), who stands upon this floor and before the country as an acknowledged leader of the Administration party, has had the honesty and independence, in a speech delivered at an early part of the session, to announce what he holds to be the true position of the confederate States. He says:

Some think that these States are still in the Union and entitled to the protection of the Constitution and the laws of the United States.

"This idea he at once repudiates, and then
VOL. IV.—22 A

boldly affirms that which he holds to be the true doctrine:

Others hold that having committed treason, renounced their allegiance to the Union, discarded the Constitution and laws, organized a distinct and hostile government, and by force of arms have risen from the condition of insurgents to the position of an independent Power *de facto*, and having been acknowledged as a belligerent both by foreign nations and our own Government, the Constitution and the Union are abrogated so far as they are concerned, and that as between the two belligerents they are under the laws of war and the laws of nations alone, and that whichever Power conquers may treat the vanquished as conquered provinces, and may impose upon them such conditions and laws as it may deem best.

"In answer to any objections that may be raised to this position, he says:

But it is said that this must be considered a contest with rebel individuals only, as States in the Union cannot make war. That is true so long as they remain in the Union. But they claim to be out of the Union, and the very fact that we have admitted them to be in a state of war, to be belligerents, shows that they are no longer in the Union, and that they are waging war in their corporate capacity, under the corporate name of the confederate States, and that such major corporation is composed of minor corporations called States, acting in their associated character.

When an insurrection becomes sufficiently formidable to entitle the party to belligerent rights, it places the contending Powers on precisely the same footing as foreign nations at war with each other.

No one acquainted with the magnitude of this contest, can deny to it the character of a civil war. For nearly three years the confederate States have maintained their declaration of independence by force of arms.

What, then, is the effect of this public war between these belligerent, these foreign nations? Before this war the parties were bound together by a compact, by a treaty called a "Constitution." They acknowledged the validity of municipal laws mutually binding on each. This war has cut asunder all these ligaments, abrogated all the obligations.

"Now, sir, for once at least, I agree with the distinguished gentleman from Pennsylvania, that the confederate States are out of the Union, occupying the position of an independent Power *de facto*, have been acknowledged as a belligerent both by foreign nations and our own Government, maintained their declaration of independence for three years by force of arms, and that the war has cut asunder all the ligaments and abrogated all the obligations that bound them under the Constitution. So far I agree with him, and however unwilling we may be to accept such position as the actual condition of the confederate States, the history of the past three years, the law of nations, the genius of our Government, and a regard for truth, compel me, at least, to accept it and my judgment to approve it; and if the charge of disloyalty is brought against me for this opinion, I have only to shield myself under the broad mantle of the distinguished leader of the Republican party.

"At the commencement of the war England and France both declared the confederate States

to be belligerents, the United States has treated with them as such in the exchange of prisoners, and the Administration is to-day, without the honesty or independence of the gentleman from Pennsylvania to avow it, doing precisely what he proposes to do under his war of conquest waged against the confederate States as a foreign nation. It is not now even pretended that the war is carried on having for its object the restoration of the Union. 'Reconstruction,' 'consolidation,' 'centralization,' 'with an entire change in the Constitution,' are the terms employed in speaking of the Government that is to exist hereafter. To speak of the Constitution as it is, and the Union as it was, is an offence, subjecting an officer in the army to punishment by dismissal from the service, and conclusive evidence of disloyalty in the citizen.

"If the time ever was when the Union could have been restored by war (which I do not believe), it has long since been dispelled by emancipation, confiscation, amnesty, and the like proclamations, military orders annulling State constitutions, setting aside State laws, obliterating State lines, and attempting to organize and set up a form of State government in their stead in which one man out of ten who shall turn abolitionist, take and subscribe an oath to execute and obey the will of Abraham Lincoln, whatever it may be, shall govern and rule over the remaining nine who refuse to become abolitionists. These follies of the Administration, and others of like character, have, instead of 'crushing the rebellion,' crushed out whatever Union sentiment may have remained among the southern people. It is possible that in districts of country occupied by the army, occasionally a man may be found who, seeing nothing before him but ignominy and death, his wife and innocent children appealing to him for protection with all the ties of filial affection, his property to be confiscated, and his family to become outcasts and beggars in the world—that such a man, in order for the time being to save himself, save his family, and save his property, may take the oath, but the effect produced by it will be like that of Galileo, who invented the telescope and who first taught the rotary motion of the earth. That noble old Italian, after many years of labor in the study of science, and when he had advanced to the extreme age of seventy, was summoned before an inquisition, tried, condemned, and imprisoned in a dungeon for teaching a heresy. Subsequently he was brought out and offered liberty on condition of his renouncing his heretical doctrine. The effect of once more beholding the glorious light of the sun, and breathing again the pure air of heaven, as contrasted with the loathsome dungeon in which he had been cast, and to which he had to return if he did not renounce his belief in the earth's motion, so far overcame his humanity that he consented to comply, and upon his bended knees, with his hands on the Gospels, he abjured his belief in the Copernican

doctrine. Part of his abjuration ran in these words:

With a sincere heart and unfeigned faith, I abjure, curse, and detest the said errors and heresies [namely, that the earth moves, &c.]; I swear that I will never in future say or assert any thing verbally or in writing, which may give rise to a similar suspicion against me.

"Rising from his knees, with eyes still fixed upon the earth, he whispered to a friend, '*E pur si muove.*' 'It moves for all that.'

"So it will be with the man who is forced to take the amnesty oath, to save himself, his family, and his property: he may take it, but in his heart he will detest and despise the authority that requires it. Will such a man be devoted to or make a good citizen of the Government in which he lives? Who shall believe it? The history of Poland, of Hungary, of Italy, and of Ireland furnishes an answer to the question. If imperial Governments are not able to hold in submissive obedience small portions of a vast empire, once in revolt, how much less a Government having for its basis 'the consent of the governed!'

"But, Mr. Chairman, 'subjugation' is the watchword. Liberty and freedom for the slave and subjugation or extermination for the master is the popular cry. 'Meet them, fight them, crush them,' says the gentleman from Kentucky (Mr. Smith). Sir, that is easily said upon this floor, and is popular with those who from day to day fill the gallery of this House; but even the gentleman from Kentucky as well as a number of other military gentlemen, were quite willing to forego the pleasure of the performance, and exchange their commissions as generals in the field for a certificate entitling them to a seat upon this floor; and were I to judge by the willingness with which it was done, the tenacity with which they hold on to it, and the efforts some of them are making to return here again, instead of the war spirit they breathe within these walls, I should strongly suspect them of being in sympathy with the peace party.

"Mr. Chairman, I am no military man, and therefore incompetent to give advice or advance an opinion in military affairs; but I have often been forcibly struck by the remarks of Marshal Ney in reply to Napoleon, as related by Headley in his Napoleon and his Marshals:

One day, at Madrid, Napoleon entered the room where Ney and several officers were standing, and said in great glee, 'Every thing goes on well; Romania will be reduced in a fortnight; the English are defeated and will be unable to advance; in three months the war will be finished.'

"The officers to whom this was addressed made no reply; but Ney, shaking his head, said with his characteristic bluntness:

'Sire, this war has lasted long already, and our affairs are not improved. The people are obstinate, even their women and children fight; they massacre our men in detail. To-day we cut the enemy in pieces, to-morrow we have to oppose another twice as numerous. It is not an army we have to fight, it is a whole nation. I see no end to this business.'

Bonaparte followed his own inclinations, and was eventually defeated.

"Mr. Chairman is there not instruction in the blunt yet forcible reply of the old French marshal to his superior officer for us? Have we not had from time to time the predictions of Napoleon during the past three years, but without a Marshal Ney to say, 'I see no end to this business'?"

"But, Mr. Chairman, how do we stand in the eyes of the civilized world to-day in waging a war of subjugation and conquest against the confederate States which have seceded from us and set up a government of their own? Are we not inconsistent with all our former acts? Have we not been early to admit this proper with regard to others? There never was a people on the face of the earth that demanded an independent Government that did not have the sympathy of the American people, and ought we now to shrink from the doctrine we have been so willing to apply to others?"
